Overall Results

- In 2013, the average score of fourth-grade students in San Diego was 241. This was higher than the average score of 235 for public school students in large cities.
- The average score for students in San Diego in 2013 (241) was not significantly different from their average score in 2011 (239) and was higher than their average score in 2003 (226).
- The score gap between higher performing students in San Diego (those at the 75th percentile) and lower performing students (those at the 25th percentile) was 42 points in 2013. This performance gap was not significantly different from that in 2003 (37 points).
- The percentage of students in San Diego who performed at or above the NAEP Proficient level was 42 percent in 2013. This percentage was not significantly different from that in 2011 (39 percent) and was greater than that in 2003 (20 percent).
- The percentage of students in San Diego who performed at or above the NAEP Basic level was 81 percent in 2013. This percentage was not significantly different from that in 2011 (80 percent) and was greater than that in 2003 (66 percent).

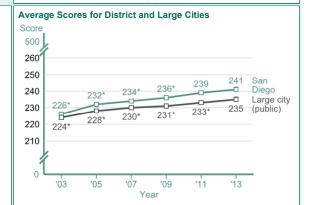

Significantly different (p < .05) from district's results in 2013. Significance tests were performed using unrounded numbers.

NOTE: Detail may not sum to totals because of rounding. Large city (public) includes public schools located in the urbanized areas of cities with populations of 250,000 or more including the participating districts.
