The purpose of this report on Arkansas STEM (Science, Technology, Engineering, and Mathematics) program activity is to inform education and policy makers about the need to prepare and graduate more students with degrees in STEM related fields as defined by the U.S. Immigration and Customs Enforcement (ICE).

## A Brief Literature Review

## The Need for STEM

STEM jobs are very important to the economy and the need for STEM-skilled applicants is steadily rising. The U.S. Department of Education Secretary states that a ". . . STEM education is a pathway to prosperity" (U.S. Commerce Department.gov, 2011). In the first decade of the $21^{\text {st }}$ century, growth in STEM jobs was three times greater than growth in non-STEM jobs and such growth is expected to continue at a faster pace in the future (U.S. Commerce Department.gov, 2011).

According to Joe Harlan of the Dow Chemical Company, there is no worker shortage, only a skills shortage: ". . . four million jobs are open because the workers who are available don't have the right skills, primarily skills in Science, Technology, Engineering and Math—what's commonly referred to as STEM skills. . . Mostly we're talking about students who need an associate's degree in a STEM-related area or, at least, better STEM skills coming out of high school" (Harlan, 2014, p. 165) ". . . on average, there are 200,000 vacant engineering positions annually in the United States . . ." (Hall, Dickerson, Batts, Kauffmann, \& Bosse, 2011, p. 32). While the need for STEM workers is not being fully addressed in the United States, other countries are attempting to address this need. ". . . fewer than one in seven students in the United States receive a degree in science or engineering, compared to one out of every two students in China and two out of every three students in Singapore. . ." (Soldner, Rowan-Kenyon, Inkelas, Garvey, \& Robbins, 2012, p. 311). While engineering and scientific jobs are expected to increase by 70 percent, ". . . students from 15 countries are higher achieving in math, and students from eight countries are higher achieving in science than students in the U.S. . ." and ". . . while the
U.S. is producing fewer engineering and technology professionals, other countries are increasing the number of graduates in these fields" (Nugent, Kunz, Rilett, \& Jones, 2010, p.14).

While the number of STEM graduates is growing in the United States, the growth is not keeping pace with the demand. ". . .while our nation's workforce is growing in these fields, it still lags behind the overall growth of the United States, resulting in a serious deficit in the supply side of the STEM workforce" (Hall, Dickerson, Batts, Kauffmann, \& Bosse, 2011, p. 32). "While the actual enrollment in STEM degree fields increased from 519,000 students in 1994-1995 to 578,000 students in 2003-2004, the proportion of undergraduate degrees awarded in STEM fields actually declined from $32 \%$ to $27 \%$ of all degrees awarded" (Hall, Dickerson, Batts, Kauffmann, \& Bosse, 2011, p. 32).

The highest salaries seem to be in the STEM fields (Perryman, 2013, p. 4). According to a 2012 study, once they enter the labor market, STEM graduates earn an average of $\$ 48,856$ whereas education majors earn only $\$ 31,236$ (Melguizo \& Wolniak, 2012). According to the Commerce Department, STEM employees earn 26 percent more that non-STEM employees (U.S. Commerce Department.gov, 2011). The occupations with the highest earnings tend to have ". . . well-defined body of content knowledge and skills development, and focus on methods of inquiry that require a high level of quantitative or scientific knowledge" (Melguizo \& Wolniak, 2012, p. 385). These are STEM occupations. Part of the reason that STEM graduates tend to have substantially higher earnings is because ". . . STEM workers are highly educated. More than two-thirds of STEM workers have at least a college degree, compared to less than one-third of non-STEM workers" (U.S. Commerce Department.gov, 2011).

## Reasons for Under-Performance

Unfortunately, a large portion of students that enter college as a STEM major are not completing their STEM education. "About 28 percent of bachelor's degree students and 20 percent of associate's degree students entered a STEM field (i.e., chose a STEM major) at some point within 6 years of entering postsecondary education in 2003-04" (Chen \& Soldner, 2014, p. iv). In addition, a total of ". . . 48 percent of bachelor's degree students and 69 percent of associate's degree students who entered STEM fields between 2003 and 2009 had left these fields by spring 2009. Roughly one-half of these leavers switched their major to a non-STEM field, and the rest of them left STEM fields by exiting college before earning a degree or certificate" (Chen \& Soldner, 2014, p. iv). According to the GAO, 27 percent of degrees awarded in AY2003-2004 were in STEM fields, but it was 32 percent ten years earlier (Raines, 2012). Low-performing STEM students experience a greater chance of dropping out of college whereas higherperforming STEM students have a greater chance of changing majors to a non-STEM field (Chen \& Soldner, 2014).

Both math and science seems to be the subjects in which many STEM students have deficiencies. Too "many high school graduates fail to reach proficiency in math and science and are unprepared for college-level courses" (Raines, 2012, p. 22). "Nearly half of the students who entered four-year colleges or universities as biology or agriculture majors failed to graduate in those fields. . ." (Soldner, Rowan-Kenyon, Inkelas, Garvey, \& Robbins, 2012, p. 312).
"The problem of STEM attrition appears to be more vexing for specific student populations. Degree attainment for women and under-represented minority (URM) students in STEM . . . are even lower than for undergraduates as a whole. . ." (Soldner, Rowan-Kenyon, Inkelas, Garvey, \& Robbins, 2012, p. 312).

## Potential Strategies to Improve College Performance of STEM Students

1. Improve Math Skills: Math preparation is a good indicator of success for STEM students (Reisel, Jablonski, Hosseini, \& Munson, 2012).
2. Improve Science Skills: "Students in science disciplines often arrive at college without experience using primary science literature and lacking in skills required to manipulate information. A cohesive, curriculum-integrated information literacy program is crucial in teaching science majors how to determine information needs and to locate, evaluate, synthesize, and use information" (Scaramozzino, 2010, p. 315). ". . . if students are to be attracted to STEM fields, they must be given meaningful science experiences outside of textbook chapters, problem sets, quizzes, and tests. To make this cost-effective, these science experiences should be given an interactive lab environment in which to learn these concepts, one that doesn't jeopardize precious lab space or departmental budgets or educators' time" (Schwab, 2013, p. 334).
3. Identify Strategies for Under-Represented Minorities: "Recent research indicates that students of color or underrepresented racial minorities (URM) are now entering the STEM disciplines as college freshmen in the same proportional interest (as compared to interest in the liberal arts) as their White and Asian American classmates. However, these students of color continue to graduate with degrees in STEM at a considerably lower proportional rate than their White counterparts" (Schwartz, 2012, p. 36).
4. Consider Implementing Summer Bridge Programs: Summer bridge programs are an effective means to recruit students to the STEM fields and to increase their academic preparedness (Raines, 2012).
5. Consider Implementing Programs for Undergraduate Research (UR): "The literature suggests that undergraduate research is a promising pedagogical strategy for retaining students in STEM" (Schwartz, 2012, p. 36).
6. Consider Implementing Mentoring Programs: "Using NSF/CSEMS and NSF/S-STEM projects, LSU/OSI has developed a very successful mentoring program for economically disadvantaged students based on the following indicators: (a) The costs for college education have been leveraged efficiently and effectively; (b) Graduation rates have increased; (c) More students have received regional/national awards and recognitions; and (d) Student performance (e.g., GPA) has improved. Achieving all of these for college students has been a challenge in higher education, especially for minority and female students in the STEM disciplines. LSU/OSI has created numerous innovative mentoring activities to achieve these impressive results. OSI was established to break disciplinary barriers and change the traditional way of conducting education and mentoring. Herein,

LSU resources have been leveraged to enhance the synergy and positive "composite action'’ among the existing projects. OSI Mentoring Programs have and continue to: (1) nurture students in an interdisciplinary environment so that they become Inspirational Teachers, Exemplary Mentors, and Effective Leaders; (2) create and implement programs that broaden the participation of more diversified students; (3) enhance the academic environment to better support students, who subsequently transfer their service to K-12 education. Furthermore, CSEMS/S-STEM Scholars are able to readily relate to a broad spectrum of individuals: academicians, K-12 teachers and students, industry personnel, and the public in general. It is anticipated that all OSI program students will exert a positive and ethical influence in the community as Model Citizens" (Wilson, Ivengar, Pang, Warner, \& Luces, 2012, p. 586).

## STEM in Arkansas

Arkansas is witnessing a significant shortfall in its ability to meet the STEM education needs of its students which will have tremendous implications for the state's scientific and engineering workforce needed for the next decade. Addressing this issue is absolutely essential for the continued economic success of Arkansas. All Arkansas citizens must have the basic scientific, technological, and mathematical knowledge to make informed personal choices, to develop human capital, and to thrive in the increasingly technological global marketplace.

## STEM CIP Codes

The Arkansas Department of Higher Education uses three different sets of CIP Codes for the STEM fields. The most recent was obtained in 2012 with other versions being obtained in 2011 and before 2010. All sets of CIP Codes for the STEM fields were obtained from the website of the U.S. Immigration and Customs Enforcement (ICE) at www.ice.gov. The 2010 and earlier version contains 217 CIP Codes, the 2011 version contains 328 CIP Codes, and the 2012 version contains 422 CIP Codes. In this report,

- all graduate and enrollment data for Academic Year 2010 and before used the 2010 version (217 CIP Codes);
- all graduate and enrollment data for Academic Year 2011 used the 2011 version (328 CIP Codes); and
- all graduate and enrollment data for Academic Year 2012 and 2012 Fall (AY2013) through Academic Year 2014 and 2014 Fall (AY2015) used the 2012 version (422 CIP Codes).
Therefore, this report is comparable to last year's report.
The above discussion regarding the different versions of CIP Codes for the STEM fields points to the need for the state of Arkansas to consider establishing a list of static STEM CIP Codes. A static or less fluid list of CIP Codes for STEM would enable the state to better identify growth, or the lack of such, from year to year. With an increasing list of STEM CIP Codes, some growth can be attributed to the increasing number of CIP Codes and not in the growth of graduates or enrollment. However, any and all growth noted in this report from AY2012 to AY2014 or 2012 Fall to 2014 Fall will be due to actual growth in the graduates and students since the STEM CIP Codes did not change in 2013 or 2014.

Due to the growth in the number of CIP Codes designated as STEM, substantial growth can be attributed to the increasing number of CIP Codes rather than the growth of graduates. Note that the below comparisons have not changed since last year's report as the STEM CIP Codes did not change from AY2012 to AY2013.

- Using the 2011 CIP Codes for AY2011 graduates accounts for an additional 6.9 percent credentials to be counted. In other words, if the 2010 STEM Codes were used, 3,439 credentials would have been counted rather than 3,679 actually reported below.
- Using the 2012 CIP Codes for AY2012 graduates accounts for an additional 16.7 percent credentials to be counted. In other words, if the 2010 STEM Codes were used, 3,609 credentials would have been counted rather than 4,213 actually reported below.
- Using the 2012 CIP Codes for AY2012 graduates accounts for an additional 8.8 percent credentials to be counted. In other words, if the 2011 STEM Codes were used, 3,872 credentials would have been counted rather than 4,213 actually reported below.

The state of Arkansas should consider adopting a static list of CIP Codes for identifying STEM categories.

## STEM Degree Production

The total number of all STEM credentials awarded has increased in each year except AY2013. The total growth from AY2010 to AY2014 was 41.1 percent.

| Credentials Awarded | AY2010 | AY2011 | AY2012 | AY2013 | AY2014 |
| :--- | ---: | ---: | ---: | ---: | ---: |
| 4-Year Universities | 1,951 | 2,436 | 2,808 | 2,913 | 3,090 |
| 2-Year Colleges | 809 | 905 | 982 | 811 | 828 |
| Private/Independents | 323 | 338 | 423 | 382 | 430 |
| Nursing Schools | 0 | 0 | 0 | 3 | 1 |
| Total | 3,083 | 3,679 | 4,213 | 4,109 | 4,349 |
| Growth | NA | $19.3 \%$ | $14.5 \%$ | $-2.5 \%$ | $5.8 \%$ |

NOTE: The Private/Independent and Vocational includes the 11 Private/Independent institutions and the 2 Nursing Schools. (The Nursing Schools had 3 STEM credentials awarded in AY2013 and 1 in AY2014).

At the associate degree level, the total number of STEM graduates has increased 5.9 percent between AY2010 and AY2014. (This level includes Diplomas [from Nursing Schools], Certificates of Proficiency, Technical Certificates, Associate Degrees, and Advanced Certificates).

| Associates and Lower (including Advanced Certificates) |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| TOTAL | AY2010 | AY2011 | AY2012 | AY2013 | AY2014 |
| 4-Year Universities | 144 | 134 | 151 | 191 | 178 |
| 2-Year Colleges | 809 | 905 | 982 | 811 | 828 |
| Private/Independents | 2 | 0 | 2 | 0 | 4 |
| Nursing Schools | 0 | 0 | 0 | 3 | 1 |
| Total | 955 | 1,039 | 1,135 | 1,005 | 1,011 |
| Growth | NA | $8.8 \%$ | $9.2 \%$ | $-11.5 \%$ | $0.6 \%$ |

As the graph below indicates this lower level of credentials includes Certificates of Proficiency, Technical Certificates, Associate Degrees, and Advanced Certificates.

At the Bachelor's level, the total number of STEM graduates has increased by 52.2 percent over the 5-year period.

| STEM Bachelor Degrees Only |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Credentials Awarded | AY2011 | AY2011 | AY2012 | AY2013 | AY2014 |
| 4-Year Universities | 1,310 | 1,604 | 1,813 | 1,858 | 2,056 |
| Private/Independents | 321 | 338 | 421 | 382 | 426 |
| Total | 1,631 | 1,942 | 2,234 | 2,240 | 2,482 |
| Growth | NA | $19.1 \%$ | $15.0 \%$ | $0.3 \%$ | $10.8 \%$ |

Increases have also occurred at the graduate levels. The graduate level indicated below includes Master Degrees, Post-Baccalaureate Certificates, Specialist Degrees, and Doctoral Degrees: Research/Scholarship. This level has increased 72.2 percent over the 5-year period.

The Doctoral Level includes both the Doctor: Research/Scholarship and Doctor: Professional Practice degrees. However, there were no Doctor: Professional Practice credentials awarded during the 5 -year period as these are not included in the STEM CIP Codes.

| STEM Graduate Credentials Awarded |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: |
| Credentials Awarded | AY2010 | AY2011 | AY2012 | AY2013 | AY2014 |  |
| 4-Year Universities | 497 | 698 | 844 | 864 | 856 |  |
| Private/Independents | 0 | 0 | 0 | 0 | 0 |  |
| Total | 497 | 698 | 844 | 864 | 856 |  |
| Growth | NA | $40.4 \%$ | $20.9 \%$ | $2.4 \%$ | $-0.9 \%$ |  |

STEM Graduate Credentials: AY2014

The below graphic shows that the number of STEM credentials awarded as compared to all credentials awarded increased from AY2010 to AY2012. However, this percentage has dropped to 10.6 percent from a high of 11.0 percent in AY2012 but does illustrate an increase of 0.1 percentage points from the previous year.

STEM graduates are predominantly male.

STEM graduates are predominantly white.

| Academic <br> Year | Asian <br> Only | Black <br> Only | Hispanic <br> Any | Amer. <br> Indian/ <br> Alaskan <br> Only | White <br> Only | Hawaiian or <br> Pacific <br> Islander <br> Only | Two or <br> More <br> Races | Non <br> Resident <br> Alien | Unknown |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| AY2010 | $2.5 \%$ | $9.0 \%$ | $2.5 \%$ | $1.0 \%$ | $74.6 \%$ | $0.0 \%$ | $1.5 \%$ | $7.2 \%$ | $1.7 \%$ |
| AY2011 | $3.0 \%$ | $8.5 \%$ | $2.6 \%$ | $1.0 \%$ | $73.3 \%$ | $0.1 \%$ | $2.0 \%$ | $8.2 \%$ | $1.2 \%$ |
| AY2012 | $2.8 \%$ | $9.9 \%$ | $2.4 \%$ | $0.9 \%$ | $71.8 \%$ | $0.1 \%$ | $1.6 \%$ | $9.1 \%$ | $1.4 \%$ |
| AY2013 | $3.3 \%$ | $8.9 \%$ | $2.6 \%$ | $0.8 \%$ | $71.5 \%$ | $0.1 \%$ | $1.8 \%$ | $10.0 \%$ | $1.1 \%$ |
| AY2014 | $2.9 \%$ | $9.2 \%$ | $3.3 \%$ | $0.9 \%$ | $71.4 \%$ | $0.1 \%$ | $2.2 \%$ | $9.3 \%$ | $0.8 \%$ |

The following shows a summary by Race/Ethnicity for AY2014.

Credentials awarded in AY2010-AY2014 were in seventeen different CIP Categories (2-digit CIP Code). The percentages shown below represent the total credentials awarded in the 5-year period reviewed. Note that the Engineering Technologies (CIP 15) and Engineering (CIP 14) fields comprise 42.5 percent of the overall total. Also, the hard sciences (biology and physical science) along with engineering and computers constitute the top five categories.

| 2-Digit CIP Categories |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| CIP Description | AY2010 | AY2011 | AY2012 | AY2013 | AY2014 | Total | Percent |
| 15: ENGINEERING TECHNOLOGIES AND ENGINEERINGRELATED FIELDS | 990 | 1,172 | 1,164 | 992 | 1,030 | 5,348 | 27.5\% |
| 26: BIOLOGICAL AND BIOMEDICAL SCIENCES | 707 | 723 | 820 | 748 | 867 | 3,865 | 19.9\% |
| 11: COMPUTER AND INFORMATION SCIENCES AND SUPPORT SERVICES | 485 | 557 | 663 | 653 | 623 | 2,981 | 15.3\% |
| 14: ENGINEERING | 503 | 551 | 559 | 644 | 654 | 2,911 | 15.0\% |

## STEM Graduates Entering Graduate School

The following graph shows that the total number of students earning bachelor degrees in STEM fields and entering graduate school within five (5) years is decreasing. The total number has decreased by 17.9 percent since AY2010 (from 418 to 343 ). (Graduates from AY2010 were reviewed for AY2011-AY2015, graduates from AY2011 were reviewed for AY2012-AY2015, graduates from AY2012 were reviewed for AY2013-AY2015, graduates from AY2013 were reviewed for AY2014-AY2015, and graduates from AY2014 were for reviewed for AY2015.) The total number was increasing for students earning bachelor degrees until AY2012. However, the total number dropped substantially in AY2013 and thereafter. This is most likely due to the period reviewed (AY2015) having only the Summer II and Fall terms available at the time of the report were created. If the entire academic year was available at the time of the review, the number for AY2014 would most certainly be higher.

NOTES: (1) The first year below had five years of review, but the second year had only four, the third year had three, the fourth had two, and the fifth year had only one partial year. Therefore, a declining number is anticipated due to the fewer years reviewed. Therefore, to have an increase in the first few years is a promising sign.
(2) The field of study for the graduate students is any field, i.e., meaning that these are not necessarily STEM fields of study. But these students obtained STEM bachelor degrees before entering graduate school.

Page 12 of 25

In addition, STEM graduates entering graduate school expressed as a percentage of total STEM graduates is decreasing. But this decrease may be primarily due to the fewer years reviewed for each successive cohort (see the notes above).

The next graph illustrates the percent of STEM gradutes entering graduate school (seeking a Post-Baccalaureate Certificate, a Masters Degree, or a Specialist Degree/Post-Masters Certificate) within five years.

The 4-Year Universities have a substantially higher percentage of STEM graduates entering graduate school (Masters, etc. level).

The next graph illustrates the percent of STEM gradutes entering doctoral school (seeking a Doctoral: Research/Scholarship Degree, Doctoral: Professional Practice Degree, or other similar credential) within five years.

The percentage of Doctoral students between 4-Year Universities and Private/Independent Institutions is approximately the same.

Note that the graduate and doctoral programs referenced above may not be a STEM program. Also, the percentages shown for graduate levels and doctoral levels may exceed the total shown for graduate school. This is due to some students enrolling twice within the same 5 -year period, for example, a student enrolling in a master's degree program, earning the master's degree, and then going on to a doctoral program.

## Education

The following three CIP Codes are the only "Educational" STEM programs: 13.0501 Educational/Instructional Technology, 13.0601 Educational Evaluation and Research, and 13.0603 Educational Statistics and Research Methods. No CIP Codes for education were present in the 2010 and before version of the STEM Codes and only one CIP Code for education was present in the 2011 version of the STEM Codes (13.0603).

In Arkansas, the only public institutions with these CIP Codes are:

| AY2014 Graduates |  |  |  |  |  |  |  |
| :---: | :--- | :--- | :---: | :--- | :--- | ---: | :---: |
| Inst. <br> Type | Institution | CI P <br> Code | Degree <br> Level | Award | Degree Name | Count |  |
| 1 | ATU | 13.0501 | 07 | MEd | Instructional Technology | 15 |  |
| 1 | SAUM | 13.0501 | 06 | GC | STEM Education for Early Childhood (K- <br> () | 10 |  |
| 1 | SAUM | 13.0501 | 06 | GC | Teaching Advanced Placement | 10 |  |
| 1 | SAUM | 13.0501 | 07 | MEd | Library Media | 10 |  |
| 1 | UAF | 13.0501 | 07 | MEd | Educational Technology | LT10 |  |
| 1 | UAF | 13.0501 | 07 | MEd | Learning Systems Technology | LT10 |  |
| 1 | UAF | 13.0501 | 07 | MS | Instructional Technology | LT10 |  |
| 1 | UAF | 13.0601 | 08 | PMC | Educational Program Evaluation | LT10 |  |
| 1 | UAF | 13.0603 | 17 | PhD | Educational Statistics \& Research <br> Methods | 19 |  |
| 1 | UALR | 13.0501 | 07 | MEd | Educational Technology | 19 |  |
| 1 | UALR | 13.0501 | 07 | MEd | Learning Systems Technology | 19 |  |
| 1 | UALR | 13.0501 | 07 | MS | Instructional Technology | 11 |  |
| 1 | UCA | 13.0501 | 07 | MEd | Educational Technology | 11 |  |
| 1 | UCA | 13.0501 | 07 | MEd | Learning Systems Technology | 11 |  |
| 1 | UCA | 13.0501 | 07 | MS | Instructional Technology |  |  |
| LT10 $=$ Less Than 10 |  |  |  |  | 10 |  |  |

The credentials awarded in these "Educational" STEM programs in AY2011-AY2014 are shown in the following table. (Note that none of the STEM educational codes were STEM codes per ICE in AY2010 and the only CIP Code in AY2011 recognized by ICE was 13.0603.)

| Inst. <br> Type | Institution | CIP Code | Degree Level | Award | Degree Name | AY2011 | AY2012 | AY2013 | AY2014 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | ATU | 13.0501 | 7 | MEd | Instructional Technology | LT10 | 14 | 18 | 15 |
| 1 | SAUM | 13.0501 | 6 | GC | STEM Education for Early Childhood (K-4) | LT10 | 16 | 14 | 10 |
| 1 | SAUM | 13.0501 | 6 | GC | Teaching Advanced Placement | LT10 | 16 | 14 | 10 |
| 1 | SAUM | 13.0501 | 7 | MEd | Library Media | LT10 | 16 | 14 | 10 |
| 1 | UAF | 13.0501 | 7 | MEd | Educational Technology | LT10 | LT10 | 11 | LT10 |
| 1 | UAF | 13.0501 | 7 | MEd | Learning Systems Technology | LT10 | LT10 | 11 | LT10 |
| 1 | UAF | 13.0501 | 7 | MS | Instructional Technology | LT10 | LT10 | 11 | LT10 |
| 1 | UAF | 13.0601 | 8 | PMC | Educational Program Evaluation | LT10 | LT10 | LT10 | LT10 |
| 1 | UAF | 13.0603 | 8 | PMC | Educational Statistics \& Research Methods | LT10 | LT10 | LT10 | LT10 |
| 1 | UAF | 13.0603 | 17 | PhD | Educational Statistics \& Research Methods | LT10 | LT10 | LT10 | LT10 |
| 1 | UALR | 13.0501 | 7 | MEd | Educational Technology | LT10 | 17 | 15 | 19 |
| 1 | UALR | 13.0501 | 7 | MEd | Learning Systems Technology | LT10 | 17 | 15 | 19 |
| 1 | UALR | 13.0501 | 7 | MS | Instructional Technology | LT10 | 17 | 15 | 19 |
| 1 | UCA | 13.0501 | 7 | MEd | Educational Technology | LT10 | LT10 | LT10 | 11 |
| 1 | UCA | 13.0501 | 7 | MEd | Learning Systems Technology | LT10 | LT10 | LT10 | 11 |
| 1 | UCA | 13.0501 | 7 | MS | Instructional Technology | LT10 | LT10 | LT10 | 11 |
| Totals |  |  |  |  |  | 7 | 172 | 162 | 165 |

However, there were many education graduates that were in CIP Codes not officially recognized by ICE as a STEM CIP Code.

| Education Graduates | AY2010 | AY2011 | AY2012 | AY2013 | AY2014 |
| ---: | ---: | ---: | ---: | ---: | ---: |
| $4-$ Year Universities | 2,881 | 3,314 | 3,886 | 3,845 | 3,629 |
| 2-Year Colleges | 313 | 400 | 408 | 373 | 346 |
| Private/Independents | 371 | 428 | 447 | 481 | 517 |
| Total | 3,565 | 4,142 | 4,741 | 4,699 | 4,492 |

The education fields with the most graduates in AY2014 are:

| Rank | CI P Code |  | CI P Description |
| :---: | ---: | :--- | ---: |
| 1 | 13.1210 | Early Childhood Education and Teaching | 683 |
| 2 | 13.0408 | Elementary and Middle School Administration/Principalship | 432 |
| 3 | 13.0301 | Curriculum and Instruction | 378 |
| 4 | 13.1206 | Teacher Education, Multiple Levels | 306 |
| 5 | 31.0501 | Health and Physical Education/Fitness, General | 239 |
| 6 | 13.1202 | Elementary Education and Teaching | 224 |
| 7 | 13.1203 | Junior High/Intermediate/Middle School Education and Teaching | 217 |
| 8 | 13.1101 | Counselor Education/School Counseling and Guidance Services | 216 |
| 9 | 13.1314 | Physical Education Teaching and Coaching | 181 |
| 10 | 13.1299 | Teacher Education and Professional Development, Specific Levels and Methods, Other | 176 |
| 11 | 13.1001 | Special Education and Teaching, General | 173 |
| 12 | 13.1205 | Secondary Education and Teaching | 172 |
| 13 | 13.1209 | Kindergarten/Preschool Education and Teaching | 147 |
| 14 | 13.1401 | Teaching English as a Second or Foreign Language/ESL Language Instructor | 140 |
| 15 | 13.1102 | College Student Counseling and Personnel Services | 114 |
| 16 | 13.1004 | Education/Teaching of the Gifted and Talented | 95 |
| 17 | 13.0401 | Educational Leadership and Administration, General | 92 |
| 18 | 13.0101 | Education, General | 84 |
| 19 | 13.1305 | English/Language Arts Teacher Education | 65 |
| 20 | 13.0501 | Educational/Instructional Technology | 64 |

## Enrollment Trends

As the following table and chart illustrates, STEM enrollment has increased substantially. Over the entire 5 -year period, STEM enrollment has increased by 35.4 percent. However, this growth has significantly slowed as growth over the last 1-year (fall-to-fall) was only 3.2 percent.

| STEM Enrollment | 2009 Fall | 2010 Fall | 2011 Fall | 2012 Fall | 2013 Fall | 2014 Fall |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Enrollment | 12,792 | 14,540 | 15,664 | 16,541 | 17,133 | 18,421 |
| Growth | NA | $13.7 \%$ | $7.7 \%$ | $5.6 \%$ | $3.6 \%$ | $7.5 \%$ |

Males substantially outnumber females in the STEM fields, but the percentage of females in STEM programs are increasing.

Almost three-fourths ( 72.7 percent) of STEM students are age 24 or younger.

Most STEM students attend college on a full-time basis (76.0 percent).

White students substantially outnumber other races/ethnicities in the STEM fields.

The vast majority of STEM students are undergraduates.

## STEM Enrollment at Institutions

ADHE can track STEM enrollment at public institutions of higher education only. The pie chart below shows that the vast majority of STEM students are enrolled at public 4-Year Universities.

UAF (University of Arkansas, Fayetteville) has the largest share of STEM students followed by UALR (University of Arkansas at Little Rock), and ASUJ (Arkansas State University at Jonesboro). All percentages shown are percentages of the total for 4-Year Universities the 2014 Fall term.

While the 2-Year Colleges do not enroll as many STEM students, the enrollment percentage by institution is shown below. NWACC (Northwest Arkansas Community College) has the largest share followed by CCCUA (Cossatot Community College of the University of Arkansas) and UACCM (University of Arkansas Community College at Morrilton). All percentages shown are percentages of the total 2-Year Colleges for the 2014 Fall term.

## Teachers for STEM Fields

As noted above, the official ICE STEM CIP Codes have few listings for education majors. Only three CIP Codes are listed as education in the ICE STEM CIP Code list:
Educational/Instructional Technology (13.0501), Educational Evaluation and Research (13.0601), and Educational Statistics and Research Methods (13.0603).

The following additional CIP Codes were identified as being STEM Education: Technology Teacher Education/Industrial Arts Teacher Education (13.1309), Mathematics Teacher Education (13.1311), Science Teacher Education/General Science Teacher Education (13.1316), Computer Teacher Education (13.1321), Biology Teacher Education (13.1322), Chemistry Teacher Education (13.1323), and Physics Teacher Education (13.1329).

Also, the Student Information System Database (SISDB) maintained by ADHE contains a field that identifies education students other than by their major. These fields are included because many education majors are identified by CIP Code other than 13 (Education). For example, a Biology Education major may be reported as CIP 26 (Biological and Biomedical Sciences) rather than CIP 13. This field is UTeach and it is found in the student file.

Using the (a) above list of STEM CIP 13 Codes, (b) the seven listed CIP Codes, and (c) the UTeach field from the student file, the following academic majors are identified.

| Top 20 Education Majors using Three Criteria |  |  |  |
| :---: | ---: | :--- | ---: |
| No. | CI P Code | CIP Name | Count |
| 1 | 24.0101 | Liberal Arts and Sciences/Liberal Studies | 3,409 |
| 2 | 13.1210 | Early Childhood Education and Teaching | 2,677 |
| 3 | 13.0408 | Elementary and Middle School Administration/Principalship | 1,765 |
| 4 | 24.0102 | General Studies | 1,765 |
| 5 | 13.1206 | Teacher Education, Multiple Levels | 1,332 |
| 6 | 13.1314 | Physical Education Teaching and Coaching | 1,302 |
| 7 | 52.0101 | Business/Commerce, General | 1,021 |
| 8 | 13.0301 | Curriculum and Instruction | 1,010 |
| 9 | 13.1202 | Elementary Education and Teaching | 837 |
| 10 | 13.1203 | Junior High/Intermediate/Middle School Education and Teaching | 622 |
| 11 | 13.1001 | Special Education and Teaching, General | 602 |
| 12 | 52.0201 | Business Administration and Management, General | 547 |
| 13 | 13.1209 | Kindergarten/Preschool Education and Teaching | 491 |
| 14 | 13.1101 | Counselor Education/School Counseling and Guidance Services | 398 |
| 15 | 13.1205 | Secondary Education and Teaching | 382 |
| 16 | 13.1312 | Music Teacher Education | 357 |
| 17 | 13.0401 | Educational Leadership and Administration, General | 320 |
| 18 | 51.3801 | Registered Nursing/Registered Nurse | 315 |
| 19 | 13.1004 | Education/Teaching of the Gifted and Talented | 299 |
| 20 | 13.1305 | English/Language Arts Teacher Education |  |

## Discussion

The good news:

- Overall, the number of total STEM credentials awarded has increased from 3,083 credentials in AY2010 to 4,349 credentials in AY2014 (a 41.1 percent increase).
- STEM credentials awarded at the associate level (including lower level certificates) have increased from 955 credentials in AY2010 to 1,011 in AY2014 (a 5.9 percent increase).
- STEM credentials awarded for bachelor's degrees have increased from 1,631 credentials in AY2010 to 2,482 in AY2014 (a 52.2 percent increase).
- STEM credentials awarded for all graduate levels have increased from 497 credentials AY2010 to 856 in AY2014 (a 72.2 percent increase).
- Overall STEM enrollment is up from 12,792 in the 2010 Fall term to 18,421 in the Fall 2014 term (a 44.0 percent increase).

## Summary and Recommendations

STEM means jobs!!!! Nearly two-thirds of the jobs in today's economy are high-skill positions. The Arkansas workforce has fewer than half the number of qualified candidates needed to fill these positions. In Arkansas, STEM enrollments have increased over the past five years but not enough to continue the graduation pool so that STEM graduates fill the many job openings that are available. In addition, total credentials awarded in the STEM fields increased but at a slower pace. The number of Baccalaureate degrees awarded has increased over the same time period. In addition, increasing the number of graduates will increase the number of job seekers to fill the STEM jobs in Arkansas.

Borrowing from Change the Equation, ". . .a nonprofit, nonpartisan, CEO-led initiative that is mobilizing the business community to improve the quality of science, technology, engineering and mathematics (STEM) learning in the United States, " ${ }^{1}$ the following three recommendations are provided.

## Ease the Transition between High School and Colleges

Arkansas students should understand the requirements for college admission and whether a high school diploma prepares them for college-level work. One way to ensure that diplomas have meaning is to align state high school graduation and college entrance requirements. Arkansas should also expand access to rigorous courses in math and science. For example, the state could strengthen initiatives that help schools boost participation in AP courses, especially among women and minorities.

## Stretch the STEM Education Investment

In lean or flush times, Arkansas must improve its return on investment in K-12 STEM education. Every dollar spent should be linked to student mastery of high expectations in STEM courses. This does not mean that resources are not critical to dramatically raising student performance. It does mean that Arkansas has to ask tough questions and make choices about which investments in STEM learning are most closely tied to the goals of college and career readiness.

## Improve Teacher Preparation and Support

Arkansas needs more teachers with a strong background in STEM content and pedagogy, particularly in math. Strategies include requiring teachers to demonstrate a stronger grasp of content while broadening the supply of teachers who can clear the higher hurdles. Arkansas should create more pathways into teaching for STEM majors in

[^0]college or STEM professionals who are interested in teaching. The state should also strengthen incentives to attract and retain such teachers for the schools that need them most - often in low-income communities.

Current teachers must receive excellent professional development, especially as new math and science standards take effect. Rather than reporting on the amount of professional development teachers receive, states should measure and report on its quality. (Source: Change the Equation.org, September 2012, Retrieved from $\underline{\text { http://vitalsigns.changetheequation.org/tcpdf/vitalsigns/newsletter.php?statename=Arkan }}$ sas)

Arkansas policymakers, business and industry, and educators must consider these outcomes in order to "fix the gap" between employers and STEM job seekers:

1. Create the basis for a new data-driven jobs and careers marketplace that will accurately reflect the employment needs of companies and the skill requirements necessary to obtain jobs, making it easier for both sides to match supply and demand;
2. Inform educators and policymakers of the innovation needed in the classroom and beyond to better align skills with jobs;
3. Produce a statewide leadership consensus on implementing programs that demonstrate success and can scale to a statewide level;
4. Showcase the industry/government/education partnerships that are doing the best at aligning skills with jobs;
5. Increase public and political awareness of the expanding skills gap and the devastating effect it is having on the economy as a whole and certain segments of Arkansas' society in particular; and
6. Develop a policy that promotes the study of computer science from kindergarten through college to produce more computer science skilled workers.
7. Adopt a static list of CIP Codes for identifying STEM categories.

In order to increase the number of graduates, higher education institutions should consider establishing support mechanisms, such as:

1. Create residential STEM communities or STEM dormitories;
2. Provide special access to tutors;
3. Create customized or special new student orientations for STEM students;
4. Create and promoting STEM student organizations and/or social organizations;
5. Provide targeted scholarships for juniors and/or seniors in STEM fields;
6. Develop education and engineering internships for STEM students;
7. Continue to develop new programs, such as UTeach, to increase the number of new, certified secondary STEM teachers;
8. Train college faculty to use technology in classroom instruction;
9. Improve data collection at the university and state levels in STEM education fields as well as in STEM hard sciences so that there is accurate data on which to study trends;
10. Increase graduate assistantships and other mechanisms to promote research, laboratory science, and engineering opportunities; and
11. Promote the need of STEM majors in the workforce after college graduation in the state of Arkansas. With gas companies moving to Arkansas to drill for natural gas, there has been a surge in the number of engineers needed in the state.

Additionally, K-12 and higher education agencies should:

1. Develop the vision for every high school to have a $21^{\text {st }}$ century learning environment;
2. Integrate engineering education into $\mathrm{K}-12$ instruction by designing challenging content and curricula frameworks and assessments that include engineering;
3. Increase engineering and technology teacher preparation programs and recruit qualified teachers to provide engineering education in high-needs schools;
4. Promote aspirations for a STEM career particularly in engineering among diverse student populations, especially among girls and underrepresented minorities;
5. Invest in afterschool K-12 STEM programs;
6. Invite non-profit organizations and informal science organizations to sponsor after school STEM programs;
7. Invest in professional development that trains teachers how to incorporate technology into the instructional process;
8. Allow students to use technology to facilitate learning while working on educational projects that incorporate curriculum elements form multiple classes;
9. Increase the rigor and time for hands-on learning, and the understanding of science concepts in the elementary schools (K-5);
10. Promote STEM competitions such as Math Counts, robotics competitions, and science fairs; and
11. Promote active partnerships among K-12 school administrators, teachers and business, manufacturing and engineering professionals.
12. Create an Arkansas K-12 computer science curriculum and require school districts to promote a computer science credit for all high school graduating students.

## NOTES:

1. Degree Levels are:

06 = Post-Baccalaureate (Graduate School)
$07=$ Masters Degree (Graduate School)
08 = Specialist Degree (Graduate School)
09 = Doctoral Degree (Doctoral School)
10 = First Professional Degree (Doctoral School)
11 = Post-First Professional Certificate (Doctoral School)
12 = Post-First Professional Degree (Doctoral School)
17 = Doctoral - Research/Scholarship (Doctoral School)
18 = Doctoral - Professional Practice (Doctoral School)
19 = Doctoral - Other (Doctoral School)
2. Graduate Level and Doctoral Level totals may exceed the number enrolled in Graduate Schools due to students completing a graduate program and then enrolling in a doctoral program.
3. Students entered graduate school at any Arkansas 4-Year University.
4. Student entering graduate school are not necessarily entering into STEM graduate program.

## NOTES:

1. Degree Levels are:

06 = Post-Baccalaureate (Graduate School)
07 = Masters Degree (Graduate School)
08 = Specialist Degree (Graduate School)
09 = Doctoral Degree (Doctoral School)
10 = First Professional Degree (Doctoral School)
11 = Post-First Professional Certificate (Doctoral School)
12 = Post-First Professional Degree (Doctoral School)
17 = Doctoral - Research/Scholarship (Doctoral School)
18 = Doctoral - Professional Practice (Doctoral School)
19 = Doctoral - Other (Doctoral School)
2. Graduate Level and Doctoral Level totals may exceed the number enrolled in Graduate Schools due to students completing a graduate program and then enrolling in a doctoral program.
3. Students entered graduate school at any Arkansas 4-Year University.
4. Student entering graduate school are not necessarily entering into STEM graduate program.

Top Education Majors (Degree 1) AY2014
Ranked by Count
NOTE: Counts of 10 or less is not shown due to FERPA.

| No. | CIP Code | CIP Name | Count |
| :---: | :---: | :---: | :---: |
| 1 | 24.0101 | Liberal Arts and Sciences/Liberal Studies | 3,409 |
| 2 | 13.1210 | Early Childhood Education and Teaching | 2,677 |
| 3 | 13.0408 | Elementary and Middle School Administration/Principalship | 1,765 |
| 4 | 24.0102 | General Studies | 1,765 |
| 5 | 13.1206 | Teacher Education, Multiple Levels | 1,332 |
| 6 | 13.1314 | Physical Education Teaching and Coaching | 1,302 |
| 7 | 52.0101 | Business/Commerce, General | 1,221 |
| 8 | 13.0301 | Curriculum and Instruction | 1,092 |
| 9 | 13.1202 | Elementary Education and Teaching | 1,010 |
| 10 | 13.1203 | Junior High/Intermediate/Middle School Education and Teaching | 837 |
| 11 | 13.1001 | Special Education and Teaching, General | 622 |
| 12 | 52.0201 | Business Administration and Management, General | 602 |
| 13 | 13.1209 | Kindergarten/Preschool Education and Teaching | 547 |
| 14 | 13.1101 | Counselor Education/School Counseling and Guidance Services | 491 |
| 15 | 13.1205 | Secondary Education and Teaching | 398 |
| 16 | 13.1312 | Music Teacher Education | 382 |
| 17 | 13.0401 | Educational Leadership and Administration, General | 357 |
| 18 | 51.3801 | Registered Nursing/Registered Nurse | 320 |
| 19 | 13.1004 | Education/Teaching of the Gifted and Talented | 315 |
| 20 | 13.1305 | English/Language Arts Teacher Education | 299 |
| 21 | 11.0101 | Computer and Information Sciences, General | 294 |
| 22 | 13.0501 | Educational/Instructional Technology | 262 |
| 23 | 13.1102 | College Student Counseling and Personnel Services | 240 |
| 24 | 31.0501 | Health and Physical Education/Fitness, General | 237 |
| 25 | 43.0104 | Criminal Justice/Safety Studies | 236 |
| 26 | 13.1299 | Teacher Education and Professional Development, Specific Levels and Methods, Other | 225 |
| 27 | 13.1311 | Mathematics Teacher Education | 219 |
| 28 | 12.0503 | Culinary Arts/Chef Training | 208 |
| 29 | 13.0406 | Higher Education/Higher Education Administration | 197 |
| 30 | 13.1201 | Adult and Continuing Education and Teaching | 185 |
| 31 | 13.1317 | Social Science Teacher Education | 174 |
| 32 | 13.1328 | History Teacher Education | 166 |
| 33 | 13.0101 | Education, General | 165 |
| 34 | 51.0904 | Emergency Medical Technology/Technician (EMT Paramedic) | 162 |
| 35 | 50.0402 | Commercial and Advertising Art | 145 |
| 36 | 13.1318 | Social Studies Teacher Education | 133 |
| 37 | 13.1315 | Reading Teacher Education | 122 |
| 38 | 23.0101 | English Language and Literature, General | 117 |
| 39 | 13.1301 | Agricultural Teacher Education | 112 |
| 40 | 22.0302 | Legal Assistant/Paralegal | 93 |
| 41 | 13.9999 | Education, Other | 89 |
| 42 | 13.1322 | Biology Teacher Education | 88 |
| 43 | 13.1401 | Teaching English as a Second or Foreign Language/ESL Language Instructor | 85 |
| 44 | 13.1199 | Student Counseling and Personnel Services, Other | 83 |
| 45 | 13.1302 | Art Teacher Education | 83 |
| 46 | 13.1319 | Technical Teacher Education | 80 |
| 47 | 15.1301 | Drafting and Design Technology/Technician, General | 78 |
| 48 | 50.0901 | Music, General | 77 |
| 49 | 51.0601 | Dental Assisting/Assistant | 77 |
| 50 | 13.1303 | Business Teacher Education | 75 |
| 51 | 43.0202 | Fire Services Administration | 70 |
| 52 | 26.0101 | Biology/Biological Sciences, General | 63 |
| 53 | 42.0101 | Psychology, General | 63 |
| 54 | 30.9999 | Multi-/Interdisciplinary Studies, Other | 62 |
| 55 | 50.0903 | Music Performance, General | 56 |
| 56 | 54.0101 | History, General | 53 |

| No. | CIP Code | CIP Name | Count |
| :---: | :---: | :---: | :---: |
| 57 | 51.0806 | Physical Therapy Technician/Assistant | 52 |
| 58 | 15.0507 | Environmental Engineering Technology/Environmental Technology | 50 |
| 59 | 19.0708 | Child Care and Support Services Management | 50 |
| 60 | 27.0101 | Mathematics, General | 48 |
| 61 | 13.0403 | Adult and Continuing Education Administration | 46 |
| 62 | 51.0908 | Respiratory Care Therapy/Therapist | 40 |
| 63 | 13.1306 | Foreign Language Teacher Education | 35 |
| 64 | 51.0707 | Health Information/Medical Records Technology/Technician | 35 |
| 65 | 50.0701 | Art/Art Studies, General | 32 |
| 66 | 13.1330 | Spanish Language Teacher Education | 31 |
| 67 | 44.0701 | Social Work | 29 |
| 68 | 51.0204 | Audiology/Audiologist and Speech-Language Pathology/Pathologist | 29 |
| 69 | 52.0301 | Accounting | 24 |
| 70 | 13.1316 | Science Teacher Education/General Science Teacher Education | 23 |
| 71 | 15.0303 | Electrical, Electronic and Communications Engineering Technology/Technician | 23 |
| 72 | 51.0913 | Athletic Training/Trainer | 23 |
| 73 | 09.0101 | Speech Communication and Rhetoric | 21 |
| 74 | 09.0401 | Journalism | 21 |
| 75 | 19.0706 | Child Development | 21 |
| 76 | 40.0501 | Chemistry, General | 20 |
| 77 | 13.1015 | Education/Teaching of Individuals in Early Childhood Special Education Programs | 18 |
| 78 | 19.0101 | Family and Consumer Sciences/Human Sciences, General | 18 |
| 79 | 31.0505 | Kinesiology and Exercise Science | 18 |
| 80 | 45.1101 | Sociology | 18 |
| 81 | 13.0901 | Social and Philosophical Foundations of Education | 17 |
| 82 | 01.0102 | Agribusiness/Agricultural Business Operations | 16 |
| 83 | 31.0101 | Parks, Recreation and Leisure Studies | 16 |
| 84 | 43.0107 | Criminal Justice/Police Science | 16 |
| 85 | 16.0101 | Foreign Languages and Literatures, General | 15 |
| 86 | 31.0301 | Parks, Recreation and Leisure Facilities Management, General | 15 |
| 87 | 51.3902 | Nursing Assistant/Aide and Patient Care Assistant/Aide | 15 |
| 88 | 13.1308 | Family and Consumer Sciences/Home Economics Teacher Education | 14 |
| 89 | 43.9999 | Homeland Security, Law Enforcement, Firefighting and Related Protective Services, Other | 14 |
| 90 | 52.0901 | Hospitality Administration/Management, General | 14 |
| 91 | 52.1401 | Marketing/Marketing Management, General | 14 |
| 92 | 13.0404 | Educational, Instructional, and Curriculum Supervision | 13 |
| 93 | 45.1001 | Political Science and Government, General | 13 |
| 94 | 19.0501 | Foods, Nutrition, and Wellness Studies, General | 12 |
| 95 | 12.0501 | Baking and Pastry Arts/Baker/Pastry Chef | 11 |
| 96 | 13.0499 | Educational Administration and Supervision, Other | 11 |
| 97 | 13.0603 | Educational Statistics and Research Methods | 11 |
| 98 | 13.1331 | Speech Teacher Education | 11 |
| 99 | 50.0409 | Graphic Design | 11 |
| 100 | 51.2314 | Rehabilitation Science | 11 |
