Note that the percentages presented in this product are reported to one decimal place. All other numbers, after aggregation, have been rounded to the nearest hundred. Rounding can lead to instances where the numbers in the body of a given table might not add to the rounded totals.

For more detailed information refer to the 'Apprentices and trainees, March 2017 quarter: data slicer'. The data slicer is a MS Excel pivot table containing a set of buttons that enable users to quickly filter or slice data without the need to open drop-down lists. A slicer clearly labels the filters that may be applied and provides detail so that users can easily identify the slice of data presented. It presents information on client demographics, programs, occupations, training rates, state or territory and other variables to compare training activity over time.

This infographic is drawn from Australian vocational education and training statistics: apprentices and trainees 2017 — March quarter, NCVER, Adelaide.

SOURCE: National Centre for Vocational Education Research (NCVER), National Apprentice and Trainee collection no. 92, June 2017 estimates, Australian Bureau of Statistics (ABS), Labour force, Australian, detailed quarterly, May 2017 (as at February), cat. no. 6291.0.55.003.
