The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and highquality data to the U.S. Department of Education, Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

## FOREWORD

The 2019 edition of the Digest of Education Statistics is the 55th in a series of publications initiated in 1962. The Digest has been issued annually except for combined editions for the years 1977-78, 1983-84, and 1985-86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The Digest includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the Digest, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to data on educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the Digest contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The Digest contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Funds for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Use of Technology. Each chapter is divided into a number of topical subsections. Preceding the seven chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The Digest concludes with two appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the Digest tables; the second, Definitions, is included to help readers understand terms used in the Digest.

The Digest can be accessed from https://nces.ed.gov/ programs/digest. Tables from each Digest edition since 1995 can be viewed by selecting the edition year from a drop-down menu. All tables that appear in the print version of the Digest are also included in the online version. In
addition, the online version of recent editions includes a number of supplemental "web-only" tables. (Web-only tables are identified as such in the print version's comprehensive List of Reference Tables.) In the online version, Digest tables are available both in HTML format and as downloadable Excel files. The most current versions of Digest tables are posted to the NCES website on a rolling basis before the entire edition of the report has been completed. The "Most Current Digest Tables" page provides access to the most recent versions of all tables, including any tables already completed for an edition currently in progress.

In addition to providing updated versions of many statistics that have appeared in previous years, this edition incorporates new material on the following topics:

- Enrollment in public elementary and secondary schools, by level, grade, and race/ethnicity (table 203.65)
- Percentage distribution of teachers in public elementary and secondary schools, by school locale and selected teacher characteristics (web-only table 209.26)
- Unadjusted and geographically adjusted average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and school locale (web-only table 211.45)
- Percentage of fall 2010 first-time kindergartners whose school administrator in fifth grade reported that selected problems occurred at the school at least once a month or were a problem in the school's neighborhood, by selected child, family, and school characteristics in spring of fifth grade (web-only table 220.65a)
- Percentage distribution of fall 2010 first-time kindergartners in spring of fifth grade and fifth-grade scores on and standard deviations of various academic, social, and emotional scales, by frequency or extent of selected school or neighborhood problems reported by the school administrator (web-only table 220.65b)
- Percentage of fall 2010 first-time kindergartners who reported consistent positive feelings about school in fifth grade and percentage whose parents reported frequent avoidance of school by their child, by frequency or extent of selected school or neighborhood problems reported by school administrator (web-only table 220.65c)
- Average National Assessment of Educational Progress (NAEP) mathematics scale score and standard deviation, by selected student characteristics, percentile, and grade (web-only table 222.77)
- Number of casualties from shootings at elementary and secondary schools and number of school shootings, by type of casualty and level of school (web-only table 228.12)
- Number of school shootings at public and private elementary and secondary schools, by type of situation associated with shooting (web-only table 228.13)
- Number of hate crimes occurring at public schools, percentage of schools reporting any hate crimes, and percentage reporting hate crimes motivated by specific types of bias, by school level (web-only table 229.70)
- Percentage of lower secondary teachers in public schools who reported being able to manage various aspects of student behavior "quite a bit" or "a lot," by selected teacher and school characteristics (web-only table 230.94)
- Number and percentage of public schools providing diagnostic mental health assessments and treatment to students and, among schools providing these services, percentage providing them at school and outside of school, by selected school characteristics (web-only table 233.69a)
- Percentage of public schools reporting that various factors limited in a major way their efforts to provide mental health services to students, by selected school characteristics (web-only table 233.69b)
- Number and percentage distribution of 25- to 64-year-old bachelor's degree holders, percentage of degree holders among all 25- to 64-year-olds, and unemployment rates and median annual earnings of 25- to 64-year-old bachelor's degree holders, by age group, field of study, and science, technology, engineering, or mathematics (STEM) status of field (web-only table 505.06)
- Percentage of lower secondary teachers in public schools who reported being able to manage various aspects of student behavior "quite a bit" or "a lot," by country or other education system (web-only table 602.93)
- Percentage distribution of children ages 3 to 18 , by whether they have home internet access, whether they have access through computer or only smartphone, and selected child and family characteristics (web-only table 702.12)

## List of Figures

Figure Page

1. The structure of education in the United States ..... 14
2. Fall enrollment, total expenditures, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965-66 through 2018-19 ..... 15
3. Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2019 ..... 16
4. Percentage of persons 25 to 29 years old, by highest level of educational attainment: Selected years, 1940 through 2019 ..... 16
5. Percentage distribution of persons 25 to 29 years old, by highest level of educational attainment: 2019 ..... 17
6. Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity: 2009 and 2019 ..... 17
7. Fall enrollment, number of teachers, pupil/teacher ratio, and expenditures in public elementary and secondary schools: Selected years, 1960-61 through 2017-18 ..... 64
8. Percentage change in public elementary and secondary enrollment, by state: Fall 2012 to fall 2017 ..... 65
9. Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2018 ..... 65
10. Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970-71 through 2016-17 ..... 66
11. Percentage of revenue for public elementary and secondary schools, by source of funds: 1970-71 through 2016-17 ..... 66
12. Fall enrollment, degrees conferred, and total expenditures in degree-granting postsecondary institutions: 1960-61 through 2018-19 ..... 221
13. Percentage change in total enrollment in degree-granting postsecondary institutions, by state: Fall 2013 to fall 2018 ..... 222
14. Fall enrollment in degree-granting postsecondary institutions, by age of student: 1970 through 2029 ..... 222
15. Ratio of full-time-equivalent (FTE) students to total FTE staff and to FTE faculty in degree- granting postsecondary institutions, by control of institution: 1999, 2009, and 2018 ..... 223
16. Number of bachelor's degrees conferred by postsecondary institutions in selected fields of study: 2007-08, 2012-13, and 2017-18 ..... 223
17. Percentage distribution of total revenues of public degree-granting postsecondary institutions, by source of funds: 2017-18 ..... 224
18. Percentage distribution of total revenues of private nonprofit degree-granting postsecondary institutions, by source of funds: 2017-18 ..... 225
19. Percentage distribution of total revenues of private for-profit degree-granting postsecondary institutions, by source of funds: 2017-18 ..... 226
20. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2019 ..... 420
Figure Page
21. Percentage distribution of federal on-budget funds for education, by agency: Fiscal year 2018 ..... 420
22. Unemployment rates of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2019 ..... 429
23. Employment to population ratios of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2019 ..... 429
24. Percentage distribution of 2017-18 high school dropouts and high school completers not enrolled in college, by labor force status: October 2018 ..... 430
25. Median annual earnings of full-time year-round workers 25 to 34 years old, by highest level of educational attainment and sex: 2018 ..... 430
26. Median annual earnings of 25- to 29-year-old bachelor's degree holders employed full time, by field of study: 2010 and 2018 ..... 431
27. Percentage change in enrollment, by major areas of the world and level of education: 2000 to 2017 ..... 468
28. Percentage of the population 25 to 34 years old with an associate's or higher degree, by country: 2018 ..... 469
29. Government and private expenditures on education institutions as a percentage of gross domestic product (GDP), by OECD country: 2016 ..... 470
30. Percentage of children ages 3 to 18 living in households with a computer, by parents' highest level of educational attainment and type of computer: 2018 ..... 502
31. Percentage of persons age 25 and over who used the Internet anywhere, at home, and at the workplace, by highest level of educational attainment: 2011 and 2017 ..... 503

## List of Text Tables

Table Page
A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949-50 through fall 2029 ..... 12
B. Number of public school staff, by selected categories: 1969-70, fall 1980, fall 2010, and fall 2017 ..... 57
C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007-08 through 2016-17 ..... 220
D. Federal on-budget funding for education, by category: Selected fiscal years, 2000 through 2019 ..... 411
E. Median annual earnings of full-time year-round workers age 25 and over, by selected levels of educational attainment and sex: Selected years, 1995 through 2018 ..... 428
F. Population and enrollment at different levels of education in major areas of the world: 2000 and 2017 ..... 464

## List of Reference Tables

Table Page
Chapter 1. All Levels of Education
Population
101.10. Estimates of resident population, by age group: 1970 through 2019 ..... 18
101.20. Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2019 ..... 19
101.30. Number, percentage, and percentage distribution of total resident population and population under 18 years old, by nativity, race/ethnicity, and selected racial/ethnic subgroups: 2005, 2010, and 2018 Web-only
101.40. Estimated total and school-age resident populations, by state: Selected years, 1970 through 2018 ..... Web-only
Characteristics of Households With Children
102.10. Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2018 ..... 20
102.20. Number and percentage distribution of children under age 18 and under age 6, by living arrangements, race/ethnicity, and selected racial/ethnic subgroups: 2018 ..... 21
102.30. Median household income, by state: Selected years, 1990 through 2018 ..... Web-only
102.40. Poverty rates for all persons and poverty status of related children under age 18, by region and state: Selected years, 1990 through 2018 ..... 23
102.45. Percentage of related children ages 5 to 17 living in poverty, by locale, region, and state: 2018 Web-only
102.50. Poverty status of all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2018 ..... Web-only
102.51. Supplemental Poverty Measure estimates for all persons, persons in families, and related children under age 18, by race/ethnicity: 2009 through 2018 ..... Web-only
102.60. Number and percentage of related children under age 18 living in poverty, by family structure, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2018 ..... Web-only
102.62. Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, child's race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2018 ..... 24
102.70. Number and percentage of students in prekindergarten through grade 12 living in poverty, by control of school: 2000 through 2017 ..... Web-only
102.90. Percentage distribution of students ages 5 through 17 attending kindergarten through grade 12, by locale, highest education level of parents/guardians in household, and number of parents in household: 2016 ..... Web-only
Enrollment Rates
103.10. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2018 ..... 26
103.20. Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2018 ..... 28
Educational Attainment
104.10. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and sex: Selected years, 1910 through 2019 ..... 30
104.20. Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity and sex: Selected years, 1920 through 2019 ..... 33
104.25. Percentage distribution of persons age 25 and over, by highest level of educational attainment, age group, and locale: 2018 ..... Web-only
104.30. Number of persons age 18 and over, by highest level of educational attainment, sex, race/ethnicity, and age: 2019 ..... 37
104.40. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2018 ..... Web-only
104.50. Persons age 25 and over who hold a bachelor's or higher degree, by sex, race/ethnicity, age group, and field of bachelor's degree: 2017 ..... 39
104.60. Number of persons 25 to 34 years old and percentage with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2018 ..... Web-only
104.70. Number and percentage distribution of children under age 18, by parents' highest level of educational attainment, child's age group and race/ethnicity, and household type: 2010 and 2018 Web-only
104.75. Total number of persons 25 to 64 years old, number with disabilities, and percentage with disabilities, by highest level of educational attainment and other selected characteristics: 2010 and 2018 Web-only
104.80. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000 and 2018 ..... 40
104.85. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and state: 2018 ..... 41
104.88. Number of persons age 25 and over and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex and state: 2018 Web-only
104.90. Percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012 and selected student characteristics: 2012 ..... Web-only
104.91. Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, and socioeconomic status and selected student characteristics while in high school: 2013 ..... Web-only
104.92. Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, socioeconomic status and educational expectations while in high school, and college enrollment status 2 years after high school: 2013 ..... Web-only
104.93. Sources of college information for spring 2002 high school sophomores who expected to attend a postsecondary institution, by highest level of education completed and socioeconomic status while in high school: 2013 Web-only
104.95. Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2019 ..... Web-only
Summary of Enrollment, Teachers, and Schools
105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2019 ..... 42
105.20. Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution, enrollment level, and attendance status and sex of student: Selected years, fall 1990 through fall 2029 ..... 43
105.30. Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution: Selected years, 1869-70 through fall 2029 ..... 44
105.40. Number of teachers in elementary and secondary schools, and faculty in degree- granting postsecondary institutions, by control of institution: Selected years, fall 1970 through fall 2029 ..... 45
105.50. Number of educational institutions, by level and control of institution: Selected years, 1980-81 through 2017-18 ..... 46
Summary of Finances
106.10. Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929-30 through 2018-19 ..... 47
106.20. Expenditures of educational institutions, by level and control of institution: Selected years, 1899-1900 through 2018-19 ..... 48
106.30. Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970-71 through 2016-17 ..... 49
106.40. Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2015-16 and 2016-17 ..... 51
106.50. Direct general expenditures of state and local governments per capita for all functions and for education, by level of education and state: 2015-16 and 2016-17 ..... 53
106.60. Gross domestic product, state and local expenditures, national income, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2018 ..... Web-only
106.70. Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2019 ..... Web-only
Chapter 2. Elementary and Secondary Education
Historical
201.10. Historical summary of public elementary and secondary school statistics: Selected years, 1869-70 through 2016-17 ..... 67
201.20. Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889-90 through fall 2019 ..... 69
Enrollment Status and Child Care Arrangements of Young Children
202.10. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by age of child, level of program, control of program, and attendance status: Selected years, 1970 through 2018 ..... 70
202.20. Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by level of program, attendance status, and selected child and family characteristics: 2018 ..... 72
202.25. Percentage of 3- and 4-year-old children enrolled in school, by race/ethnicity and state: 2018 ..... Web-only
202.30. Number of children under 6 years old and not yet enrolled in kindergarten, percentage participating in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2016 ..... 73
202.30a. Percentage distribution of children who were under 6 years old and not yet in kindergarten, by main reason household wanted a child care program, primary reason for difficulty finding child care, and selected child and family characteristics: 2016 . . . . Web-only
202.30b. Percentage distribution of children who were under 6 years old and not yet in kindergarten, by reported availability of good child care choices, amount of difficulty finding the type of child care wanted, and selected child and family characteristics: 2012 and 2016 Web-only
202.30c. Number of children under 6 years old and not yet in kindergarten whose families paid for child care, and families' average out-of-pocket expense, by type of child care arrangement and selected child and family characteristics: 2001 and 2016 Web-only
202.35. Percentage distribution of 4- and 5-year-old children who are not yet in kindergarten, by type of child care arrangement and selected characteristics: Selected years, 1995 through 2016 Web-only
202.40. Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Selected years, 1991 through 2016 ..... Web-only
202.50. Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003-04 and 2005-06 Web-only
202.60. Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005-06 Web-only
202.65. Percentage distribution of first-time kindergartners, by primary type of child care arrangement during the year prior to kindergarten entry and selected child, family, and school characteristics: 2010-11 Web-only
202.70. Number and percentage distribution of 3- to 5-year-olds not enrolled in school and children of any age enrolled in prekindergarten through second grade, by grade level and selected maternal and household characteristics: Selected years, 2001 through 2016 Web-only
Enrollment in Public Schools
203.10. Enrollment in public elementary and secondary schools, by level and grade: Selected years, fall 1980 through fall 2029 ..... 75
203.20. Enrollment in public elementary and secondary schools, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2029 ..... 76
203.25. Public school enrollment in prekindergarten through grade 8, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2029 ..... Web-only
203.30. Public school enrollment in grades 9 through 12, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2029 ..... Web-only
203.40. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2017 ..... 78
203.50. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region: Selected years, fall 1995 through fall 2029 ..... 80
203.60. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2029 ..... 81
203.65. Enrollment in public elementary and secondary schools, by level, grade, and race/ ethnicity: Selected years, fall 1999 through fall 2017 ..... 83
203.70. Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 2000 and fall 2017 ..... 85
203.72. Public elementary and secondary school enrollment, by locale and state: Fall 2017 ..... Web-only
203.75. Enrollment and percentage distribution of enrollment in public schools, by family poverty rate of 5- to 17-year-olds living in the school district, student race/ethnicity, region, and school locale: 2017-18 Web-only
203.80. Average daily attendance (ADA) in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2016-17 ..... Web-only
203.90. Average daily attendance (ADA) as a percentage of total enrollment, school day length, and school year length in public schools, by school level and state: 2007-08 and 2011-12 ..... Web-only
Participation in Public School Services
204.10. Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000-01 through 2017-18 ..... 86
204.20. English language learner (ELL) students enrolled in public elementary and secondary schools, by state: Selected years, fall 2000 through fall 2017 ..... 87
204.27. English language learner (ELL) students enrolled in public elementary and secondary
schools, by home language, grade, and selected student characteristics: Selected
years, 2008-09 through fall 2017 . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . .
204.30. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by type of disability: Selected years, 1976-77 through 2018-19 ..... 88
204.40. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and age group: 2000-01 through 2018-19 ..... 89
204.50. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and sex, race/ethnicity, and type of disability: 2018-19 ..... Web-only
204.60. Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2018 ..... Web-only
204.70. Number and percentage of children served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and state or jurisdiction: Selected years, 1990-91 through 2018-19 ..... 90
204.75a. Homeless students enrolled in public elementary and secondary schools, by grade, primary nighttime residence, and selected student characteristics: 2009-10 through 2016-17 ..... 91
204.75b. Number and percentage of homeless students enrolled in public elementary and secondary schools, by school district locale, primary nighttime residence, and selected student characteristics: 2016-17 Web-only
204.75c. Number and percentage of homeless students enrolled in public elementary and secondary schools, by state or jurisdiction: 2009-10 through 2016-17 ..... Web-only
204.75d. Number and percentage of homeless students enrolled in public elementary and secondary schools, by primary nighttime residence, selected student characteristics, and state or jurisdiction: 2016-17 Web-only
204.75e. Number and percentage of homeless students enrolled in public elementary and secondary schools in the 120 largest school districts, by primary nighttime residence and selected student characteristics: 2016-17 Web-only
204.80. Number of public school students enrolled in gifted and talented programs, by sex, race/ ethnicity, and state: Selected years, 2004 through 2013-14 ..... Web-only
204.90. Percentage of public school students enrolled in gifted and talented programs, by sex, race/ethnicity, and state: Selected years, 2004 through 2013-14 ..... 92
Private School Education
205.10. Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2017 ..... 93
205.15. Private elementary and secondary school enrollment, percentage distribution of private school enrollment, and private school enrollment as a percentage of total enrollment in public and private schools, by school orientation and grade: Selected years, fall 1999 through fall 2017 ..... 94
205.20. Enrollment and percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and grade level: Selected years, fall 1995 through fall 2017 ..... 96
205.30. Percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and selected characteristics: Selected years, fall 2005 through fall 2017 ..... 98
205.40. Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected characteristics: Fall 1999, fall 2009, and fall 2017 ..... 99
205.45. Number and percentage distribution of private elementary and secondary students, number of teachers and pupil/teacher ratio, and number and average enrollment size of schools, by religious affiliation of school: Fall 1999, fall 2009, and fall 2015 Web-only
205.50. Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: Selected years, 1999-2000 through 2011-12 ..... Web-only
205.60. Private elementary and secondary school full-time-equivalent (FTE) staff and student to FTE staff ratios, by orientation of school, school level, and type of staff: 2007-08 and 2011-12 Web-only
205.70. Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919-20 through 2019-20 Web-only205.80. Private elementary and secondary schools, enrollment, teachers, and high schoolgraduates, by state: Selected years, 2007 through 2017101205.90. Private elementary and secondary schools and enrollment, percentage distribution ofprivate schools and enrollment, and private schools and enrollment as a percentageof total public and private schools and enrollment, by locale: 2009-10 and 2017-18Web-only
Homeschooling and School Choice206.10. Number and percentage of homeschooled students ages 5 through 17 with a gradeequivalent of kindergarten through 12th grade, by selected child, parent, andhousehold characteristics: Selected years, 1999 through 2016102206.15. Percentage and percentage distribution of homeschooled students ages 5 through 17with a grade equivalent of kindergarten through grade 12, by reasons their parentsgave for homeschooling, the one reason their parents identified as most important,and race/ethnicity of child: 2015-16Web-only
206.20. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: Selected years, 1999 through 2016 Web-only206.30. Percentage distribution of students enrolled in grades 1 through 12, by public schooltype and charter status, private school orientation, and selected child and householdcharacteristics: 2016103
206.40. Percentage of students enrolled in grades 1 through 12 whose parents reported having public school choice, considered other schools, reported current school was their first choice, or moved to their current neighborhood for the public school, by school type and selected child and household characteristics: 2016 ..... Web-only
206.50. Percentage of students enrolled in grades 3 through 12 whose parents were satisfied or dissatisfied with various aspects of their children's schools, by school type: Selected years, 2003 through 2016 ..... Web-only
Parent Involvement in Education
207.10. Number of 3 - to 5 -year-olds not yet enrolled in kindergarten and percentageparticipating in home literacy activities with a family member, by type and frequency ofactivity and selected child and family characteristics: 2001, 2012, and 2016104
207.20. Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past month, by selected child, parent, and school characteristics: 2003, 2012, and 2016 ..... Web-only
207.30. Number of kindergartners through fifth-graders and percentage whose parents reported doing education-related activities with their children in the past week, by selected child, parent, and school characteristics: 2003, 2012, and 2016 ..... 106207.40. Percentage of elementary and secondary school children whose parents were involvedin school activities, by selected child, parent, and school characteristics: 2003, 2012,and 2016108

## Teachers and Pupil/Teacher Ratios

208.10. Public elementary and secondary pupil/teacher ratios, by selected school characteristics: Selected years, fall 1990 through fall 2017 ..... 110
208.20. Public and private elementary and secondary teachers, enrollment, pupil/teacher ratios, and new teacher hires: Selected years, fall 1955 through fall 2029 ..... 111
208.30. Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2017 ..... 112
208.40. Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2017 ..... 113
Teacher Characteristics, Class Sizes, and Assignments
209.05. Number and percentage of persons completing a teacher preparation program and receiving an initial teaching credential, by state or jurisdiction: 2012-13 ..... Web-only
209.10. Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987-88 through 2017-18
209.20. Number, highest degree, and years of teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1999-2000 through 2017-18 ..... 116
209.21. Number and percentage distribution of teachers in traditional public and public charter elementary and secondary schools, by instructional level and selected teacher and school characteristics: 2017-18 ..... Web-only
209.22. Number and percentage distribution of teachers in public elementary and secondary schools, by instructional level and selected teacher and school characteristics: 1999-2000 and 2017-18 Web-only
209.24. Number and percentage distribution of teachers in public elementary and secondary schools, by whether they entered teaching through an alternative route to certification program and selected teacher and school characteristics: 2017-18 ..... Web-only
209.26. Percentage distribution of teachers in public elementary and secondary schools, by school locale and selected teacher characteristics: 2017-18 ..... Web-only
209.27. Number and percentage of teachers who are military veterans, by control of school; sex, race/ethnicity, and age group of teacher; region; and level of instruction: 2017 ..... Web-only
209.27a. Number and percentage of teachers who are military veterans, by control of school; sex, race/ethnicity, and age group of teacher; region; and level of instruction: 2006 [updated periodically] Web-only
209.30. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2011-12 ..... 118
209.42. Percentage of public school teachers who teach English Language Learner (ELL) students and students with disabilities and percentage with selected qualifications or coursework, by selected teacher and school characteristics: 2017-18 ..... Web-only
209.50. Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2017-18 ..... Web-only
Teacher Attitudes and Teacher Mobility
210.30. Mobility of public elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987-88 through 2012-13 ..... Web-only
210.31. Mobility of private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987-88 through 2008-09 ..... Web-only

## Teacher Salaries

| 211.10. | Average total income, base salary, and other sources of school and nonschool income for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2017-18 $\qquad$ | Veb-only |
| :---: | :---: | :---: |
| 211.20. | Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of teaching experience: Selected years, 1990-91 through 2017-18 | 119 |
| 211.30. | Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of teaching experience and state: Selected years, 1993-94 through 2017-18 | Web-only |
| 211.40. | Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of teaching experience and state: Selected years, 1993-94 through 2017-18 | Veb-only |
| 211.45. | Unadjusted and geographically adjusted average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and school locale: 2017-18 | Veb-only |
| 211.50. | Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959-60 through 2018-19 | 121 |
| 211.60. | Estimated average annual salary of teachers in public elementary and secondary schools, by state: Selected years, 1969-70 through 2018-19 | Web-only |
| Schoo | incipals |  |
| 212.08. | Number and percentage distribution of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993-94 through 2017-18 | 122 |
| 212.10 | Highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993-94 through 2017-18 | Web-only |
| 212.15. | Percentage distribution of principals in public elementary and secondary schools, by school locale and selected characteristics: 2017-18 | Web-only |
| 212.20. | Percentage distribution of public elementary and secondary school principals, by mobility or attrition and selected principal and school characteristics: 2007-08 to 2008-09, 2011-12 to 2012-13, and 2015-16 to 2016-17 . | Web-only |
| 212.30. | Number and percentage distribution of public school principals, by mobility or attrition since the previous school year and occupational status: 2008-09, 2012-13, and 2016-17 | Web-only |

## School Staff

213.10. Staff employed in public elementary and secondary school systems, by type of 124
213.20. Staff employed in public elementary and secondary school systems, by type of
assignment and state or jurisdiction: Fall 2017 . . . . . . . . . . . . . . . . . . . . . . . . . 1251020
213.30. Staff employed in public elementary and secondary school systems, by type of
213.40. Staff, teachers, and teachers as a percentage of staff in public elementary and
secondary school systems, by state or jurisdiction: Selected years, fall 2000 through
fall 2017 . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 126
213.50. Staff, enrollment, and pupil/staff ratios in public elementary and secondary school
systems, by state or jurisdiction: Selected years, fall 2000 through fall 2017 . . . . . . . 127
213.60. Staff employed and pupil/staff ratios in public elementary and secondary school
systems, by type of assignment and locale: Fall 2017 . . . . . . . . . . . . . . . . . . . . . . Web-only

## Overview of Schools and School Districts

214.10. Number of public school districts and public and private elementary and secondary schools: Selected years, 1869-70 through 2017-18 ..... 128
214.20. Number and percentage distribution of regular public school districts and students, by enrollment size of district: Selected years, 1979-80 through 2017-18 ..... 129
214.30. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2016-17 and 2017-18 ..... 130
214.40. Public elementary and secondary school enrollment, number of schools, and other selected characteristics, by locale: Fall 2014 through fall 2017 ..... 131
Large School Districts
215.10. Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: Selected years, 1990 through 2017 Web-only
215.20. Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2016-17 and fiscal year 2019 Web-only
215.30. Enrollment, poverty, and federal funds for the 120 largest school districts, by enrollment size in 2017: 2016-17 and fiscal year 2019 Web-only
Public Schools
216.10. Public elementary and secondary schools, by level of school: Selected years, 1967-68 through 2017-18 ..... 133
216.20. Number and enrollment of public elementary and secondary schools, by school level, type, and charter, magnet, and virtual status: Selected years, 1990-91 through 2017-18 ..... 134
216.30. Number and percentage distribution of public elementary and secondary students and schools, by traditional or charter school status and selected characteristics: Selected years, 1999-2000 through 2017-18 ..... 135
216.40. Number and percentage distribution of public elementary and secondary schools and enrollment, by level, type, and enrollment size of school: 2015-16, 2016-17, and 2017-18 ..... 136
216.43. Number of public elementary and secondary schools reporting enrollment, by enrollment size of school and state: 2017-18 ..... Web-only
216.44. Enrollment of public elementary and secondary schools reporting enrollment, by enrollment size of school and state: 2017-18 Web-only
216.45. Average enrollment and percentage distribution of public elementary and secondary schools, by level, type, and enrollment size: Selected years, 1982-83 through 2017-18 ..... 137
216.50. Number and percentage distribution of public elementary and secondary school students, by percentage of minority enrollment in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2017 ..... 138
216.55. Number and percentage distribution of public elementary and secondary school students, by percentage of student's racial/ethnic group enrolled in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2017 ..... 139
216.60. Number and percentage distribution of public school students, by percentage of students in school who are eligible for free or reduced-price lunch, school level, locale, and student race/ethnicity: Fall 2017 ..... 140
216.70. Public elementary and secondary schools, by level, type, and state or jurisdiction: 1990-91, 2000-01, 2010-11, and 2017-18 ..... 141
216.75. Public elementary schools, by grade span, average school enrollment, and state or jurisdiction: 2017-18 ..... 142
216.80. Public secondary schools, by grade span, average school enrollment, and state or jurisdiction: 2017-18 ..... 143

| 216.90. | Public elementary and secondary charter schools and enrollment, and charter schools and enrollment as a percentage of total public schools and total enrollment in public schools, by state: Selected years, 2000-01 through 2017-18 | 144 |
| :---: | :---: | :---: |
| 216.90a. | Percentage distribution of enrollment in public traditional and charter schools and percentage of schools, by race/ethnicity, racial/ethnic concentration, and state: Fall 2017 | ly |
| $216.90 b$. | Percentage distribution of public traditional and charter school enrollment and schools, by school's level of free or reduced-price lunch eligibility and state: Fall 2017 . . . . . . | Veb-only |
| 216.90c. | Percentage distribution of public traditional and charter schools, by school level, school size, and state: Fall 2017 | Veb-only |
| 216.90d. | Percentage distribution of public traditional and charter schools, by school locale and state: Fall 2017 | Veb-only |
| 216.92. | Public elementary and secondary charter schools and enrollment, percentage distribution of charter schools and enrollment, and charter schools and enrollment as a percentage of total public schools and enrollment, by locale: 2010-11 and 2017-18 | Veb-only |
| 216.95. | Number and enrollment of public elementary and secondary schools that have closed, by school level, type, and charter status: Selected years, 1995-96 through 2017-18 | Veb-only |
| School Facilities |  |  |
| 217.10. | Functional age of public schools' main instructional buildings and percentage of schools with permanent and portable (temporary) buildings, by selected school characteristics and condition of permanent and portable buildings: 2012 | Veb-only |
| 217.15. | Percentage of public schools with plans for major repair, renovation, or replacement of building systems or features in the next 2 years and percentage distribution of schools with such plans, by selected school characteristics, type of system or feature, and main reason for the plans: 2012-13 | Veb-only |
| 217.20. | Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005 | Veb-only |
| Computers and Technology |  |  |
| 218.10. | Number and internet access of instructional computers and rooms in public schools, by selected school characteristics: Selected years, 1995 through 2008 | Veb-only |
| 218.16. | Percentage of students ages 5 through 17 enrolled in kindergarten through grade 12 who took any school-related courses online and, among those taking courses online, percentage who took courses from various providers, by selected child, parent, and household characteristics: 2016 | 145 |
| 218.20 | Percentage of public school districts with students enrolled in technology-based distance education courses and number of enrollments in such courses, by instructional level and district characteristics: 2002-03, 2004-05, and 2009-10 | Neb-only |
| 218.40 | Percentage of 4th-, 8th-, and 12th-grade public school students with their own or a shared digital device at home, by selected student and school characteristics: 2015 | Neb-only |
| 218.45 | Percentage distribution of 4th-, 8th-, and 12th-grade public school students, by when student first used a laptop or desktop computer and selected student and school characteristics: 2015. | Web-only |
| 218.50 | Percentage distribution of 8th-grade public school students, by number of hours they spend using a laptop or desktop computer for schoolwork on a weekday and selected student and school characteristics: 2015 | Web-only |
| High School Completers and Dropouts |  |  |
| 219.10. | High school graduates, by sex and control of school; public high school averaged freshman graduation rate (AFGR); and total graduates as a ratio of 17-year-old population: Selected years, 1869-70 through 2029-30 | 146 |

219.20. Public high school graduates, by region, state, and jurisdiction: Selected years, 1980-81 through 2029-30 ..... 147
219.30. Public high school graduates, by race/ethnicity: 1998-99 through 2029-30 ..... 149
219.32. Public high school graduates, by sex, race/ethnicity, and state or jurisdiction: 2012-13 ..... Web-only
219.35. Public high school averaged freshman graduation rate (AFGR), by state or jurisdiction: Selected years, 1990-91 through 2012-13 Web-only
219.40. Public high school averaged freshman graduation rate (AFGR), by sex, race/ethnicity, and state or jurisdiction: 2012-13 ..... Web-only
219.46. Public high school 4-year adjusted cohort graduation rate (ACGR), by selected student characteristics and state: 2010-11 through 2017-18 ..... 150
219.47. Public high school 4-year adjusted cohort graduation rate (ACGR), by selected student characteristics and locale: 2016-17 ..... Web-only
219.50. Number and percentage of 9th- to 12th-graders who dropped out of public schools (event dropout rate), by race/ethnicity, grade, and state or jurisdiction: 2009-10 ..... Web-only
219.55. Among 15- to 24-year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), by sex and race/ethnicity: 1972 through 2018 ..... 152
219.57. Among 15- to 24-year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), and number and percentage distribution of 15- to 24-year- olds in grades 10 through 12, by selected characteristics: Selected years, 2008 through 2018 ..... 153
219.60. Number and percentage of people taking, completing, and passing high school equivalency tests, by test taken and state or jurisdiction: 2013 and 2015 ..... Web-only
219.62a. Percentage distribution of 2009 ninth-graders, by high school persistence status in 2012 and selected student characteristics: 2009 and 2012 ..... Web-only
219.62b. Percentage distribution of 2009 ninth-graders who were current high school dropouts, stopouts, and continuous students in 2012, by selected student characteristics: 2009 and 2012 Web-only
219.62c. Among 2009 ninth-graders who were dropouts in 2012, percentage citing various reasons for leaving high school, by selected student characteristics: 2012 Web-only
219.65. High school completion rate of 18- to 24 -year-olds not enrolled in high school (status completion rate), by sex and race/ethnicity: 1972 through 2018 ..... 154
219.67. High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), number of 18- to 24 -year-olds not in high school, and number who are high school completers (status completers), by selected characteristics: Selected years, 2008 through 2018 ..... 155
219.69. High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by English speaking ability and race/ethnicity: 2003, 2005, and 2013 ..... Web-only
219.70. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2018 ..... 156
219.71. Population 16 to 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by sex and race/ethnicity: Selected years, 1970 through 2018 ..... Web-only
219.73. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number and percentage distribution of 16- to 24-year-olds, by selected characteristics: Selected years, 2008 through 2018 ..... Web-only
219.75. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and percentage distribution of status dropouts, by labor force status and years of school completed: Selected years, 1970 through 2018 ..... 157
219.76. Population 16 to 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by labor force status and years of school completed: 1970 through 2018 Web-only

| 219.80. | Total number 16-to 24-year-old high school dropouts (status dropouts) and percentage of dropouts among persons 16 to 24 years old (status dropout rate), by selected characteristics: 2006 through 2018 |  |
| :---: | :---: | :---: |
| 219.82. | Number of 16- to 24-year-old high school dropouts (status dropouts) and percentage of dropouts among persons 16 to 24 years old (status dropout rate), by race/ethnicity and racial/ethnic subgroup: 2014, 2018, and 2014-2018 | ly |
| 219.85a. | Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by race/ethnicity and state: 2018 |  |
| 219.85b. | Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by race/ethnicity and state: 2014-2018 | ly |
| 219.90. | Number and percentage distribution of 14- through 21-year-old students served under Individuals with Disabilities Education Act (IDEA), Part B, who exited school, by exit reason, sex, race/ethnicity, age, and type of disability: 2016-17 and 2017-18 | 158 |
| Skills of Young Children |  |  |
| 220.40. | Fall 2010 first-time kindergartners' reading scale scores and standard deviations through spring of fifth grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2016 | 160 |
| 220.10. | Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001-02 . . . . . . | Web-only |
| 220.20 . | Percentage of children demonstrating specific cognitive skills, motor skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003-04 | Web-only |
| 220.30 | Children's reading, language, mathematics, color knowledge, and fine motor skills at about 4 years of age, by child's age and selected characteristics: 2005-06 | Web-only |
| 220.39 . | Percentage distribution of fall 2010 first-time kindergartners, by two risk factors (low parental education and family poverty) and selected child, family, and school characteristics: 2010-11 | Web-only |
| 220.41 . | Fall 2010 first-time kindergartners' mathematics scale scores and standard deviations through spring of fifth grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2016 | Web-only |
| 220.42. | Fall 2010 first-time kindergartners' science scale scores and standard deviations through spring of fifth grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2016 | Web-only |
| 220.50 | Number and percentage distribution of kindergartners, by fall 2010 kindergarten entry status and selected child, family, and school characteristics: 2010-11 | Web-only |
| 220.55. | Percentage of fall 2010 first-time kindergartners, by type of peer victimization reported by child in third grade, frequency with which child reported being victimized in third grade, and selected child, family, and school characteristics: Spring 2014 . . . . . . . . . | Web-only |
| 220.56 . | Percentage of fall 2010 first-time kindergartners, by type of victimization their teacher reported that they perpetrated against peers in third grade, frequency with which the teacher reported that they victimized their peers, and selected child, family, and school characteristics: Spring 2014 | Web-only |
| 220.57. | Fall 2010 first-time kindergartners' scores on various academic, social, and emotional scales in third grade, by frequency of being victimized by their peers, frequency of victimizing their peers, and type of victimization: Spring 2014 | Web-only |
| 220.60. | Fall 2010 kindergartners' reading, mathematics, science, and approaches to learning scale scores and standard deviations, by kindergarten entry status and time of assessment: Fall 2010 and spring 2011 through spring 2016 | Web-only |
| 220.65 a. | Percentage of fall 2010 first-time kindergartners whose school adminstrator in fifth grade reported that selected problems occurred at the school at least once a month or were a problem in the school's neighborhood, by selected child, family, and school characteristics in spring of fifth grade: Spring 2016 | Web-only |

| 220.65b. | Percentage distribution of fall 2010 first-time kindergartners in spring of fifth grade and fifth-grade scores on and standard deviations of various academic, social, and emotional scales, by frequency or extent of selected school or neighborhood problems reported by the school administrator: Spring 2016 | b-only |
| :---: | :---: | :---: |
| $220.65 c$ | Percentage of fall 2010 first-time kindergartners who reported consistent positive feelings about school in fifth grade and percentage whose parents reported frequent avoidance of school by their child, by frequency or extent of selected school or neighborhood problems reported by school administrator: Spring 2016 . . . . . . . . . . . |  |
| 220.70 | Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 | ly |
| 220.80 | Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 | Web-only |
| Reading | ievement |  |
| 221.10. | Average National Assessment of Educational Progress (NAEP) reading scale score, by sex, race/ethnicity, and grade: Selected years, 1992 through 2019. | 162 |
| 221.12. | Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of students attaining NAEP reading achievement levels, by selected school and student characteristics and grade: Selected years, 1992 through 2019 | Web-only |
| 221.20 | Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading achievement levels, by grade and selected student characteristics: Selected years, 2005 through 2019 | 163 |
| 221.25. | Average National Assessment of Educational Progress (NAEP) reading scale score, by percentage of students in school eligible for free or reduced-price lunch, grade, and school locale: 2015 and 2019 | eb-only |
| 221.30. | Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012 | Web-only |
| 221.32. | Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and private schools, by selected characteristics: 2017 | Veb-only |
| 221.32a. | Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and Catholic schools, by selected characteristics: 2019 | Veb-only |
| 221.35 | Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders, by whether student has access to a computer or tablet and the Internet at home and other selected characteristics: 2019 . . | Web-only |
| 221.36 | Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 12th-graders, by whether student uses a computer at home, whether student has access to the Internet at home, and other selected characteristics: 2015 | Web-only |
| 221.40. | Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students, by state: Selected years, 1992 through 2019 . . . . . | 164 |
| 221.50. | Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students, by race/ethnicity, school's rate of free or reducedprice lunch eligibility, and state: 2019 | Web-only |
| 221.60. | Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students, by state: Selected years, 1998 through 2019 . . . . . . | 165 |
| 221.65. | Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students, by race/ethnicity, parents' highest level of education, and state: 2019 | Web-only |

| 221.70. | Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2019 | Web-only |
| :---: | :---: | :---: |
| 221.72. | Average National Assessment of Educational Progress (NAEP) reading scale score of 4th- and 8th-grade public school students, by school locale and state: 2019 | Web-only |
| 221.75 | Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2019 | Veb-only |
| 221.80 | Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining selected reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: Selected years, 2009 through 2019 | ly |
| 221.85 | Average National Assessment of Educational Progress (NAEP) reading scale score, by age and selected student characteristics: Selected years, 1971 through 2012 . . . . . . . | nly |
| 221.90. | Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2012 | eb-only |
| Mathematics Achievement |  |  |
| 222.10. | Average National Assessment of Educational Progress (NAEP) mathematics scale score, by sex, race/ethnicity, and grade: Selected years, 1990 through 2019 . . . . | 166 |
| 222.12. | Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage of students attaining NAEP mathematics achievement levels, by selected school and student characteristics and grade: Selected years, 1990 through 2019 | only |
| 222.20. | Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics achievement levels, by grade and selected student characteristics: Selected years, 2005 through 2019 | 167 |
| 222.25 | Average National Assessment of Educational Progress (NAEP) mathematics scale score, by percentage of students in school eligible for free or reduced-price lunch, grade, and school locale: 2015 and 2019 . | eb-only |
| 222.30 | Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 8th-graders, by selected attitudes toward mathematics, level of interest in/enjoyment of mathematics, and selected student characteristics: 2019 | b-only |
| 222.32. | Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and private schools, by selected characteristics: 2017 . | Veb-only |
| 222.32a. | Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and Catholic schools, by selected characteristics: 2019 | Veb-only |
| 222.35 | Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 12th-graders, by frequency of experiencing various attitudes in math class and selected student characteristics: 2015 . . . . . . | Web-only |
| 222.40 | Average National Assessment of Educational Progress (NAEP) mathematics scale score of high school graduates at grade 12, by highest mathematics course taken in high school and selected student and school characteristics: 2009 | Web-only |
| 222.45 | Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders, by whether student has access to a computer or tablet and the Internet at home and other selected characteristics: 2019 .. | Web-only |

222.50. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students, by state: Selected years, 1992 through 2019 ..... 168
222.55. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students, by race/ethnicity, school's rate of free or reduced-price lunch eligibility, and state: 2019 ..... Web-only
222.60. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by state: Selected years, 1990 through 2019 ..... 169
222.70. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by race/ethnicity, parents' highest level of education, and state: 2019 ..... Web-only
222.75. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th- and 8th-grade public school students, by school locale and state: 2019 ..... Web-only
222.77. Average National Assessment of Educational Progress (NAEP) mathematics scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1990 through 2019 Web-only
222.80. Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining selected mathematics achievement levels, by race/ethnicity and jurisdiction or specific urban district: Selected years, 2009 through 2019 Web-only
222.85. Average National Assessment of Educational Progress (NAEP) mathematics scale score, by age and selected student characteristics: Selected years, 1973 through 2012 Web-only
222.90. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics score levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2012 ..... Web-only
222.95. National Assessment of Educational Progress (NAEP) mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2012 ..... Web-only
Science Achievement
223.10. Average National Assessment of Educational Progress (NAEP) science scale score, standard deviation, and percentage of students attaining science achievement levels, by grade level, selected student and school characteristics, and percentile: 2009, 2011, and 2015
223.17. Average National Assessment of Educational Progress (NAEP) science scale score, by percentage of students in school eligible for free or reduced-price lunch, grade, and school locale: 2015 ..... Web-only
223.20. Average National Assessment of Educational Progress (NAEP) science scale scores of 4th- and 8th-grade public school students, by race/ethnicity and state: 2009, 2011, and 2015 Web-only
223.23. Average National Assessment of Educational Progress (NAEP) science scale score of 4th- and 8th-grade public school students, by school locale and state: 2015 ..... Web-only
223.25. Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2015 ..... Web-only
223.30. Average National Assessment of Educational Progress (NAEP) science scale scores of 12th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2015 ..... Web-only
223.40. Average National Assessment of Educational Progress (NAEP) science scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015

## Achievement in Other Subjects

| 224.10. | Average National Assessment of Educational Progress (NAEP) music and visual arts scale scores of 8th-graders, percentage distribution by frequency of instruction at their school, and percentage participating in selected musical activities in school, by selected characteristics: 2016 | 171 |
| :---: | :---: | :---: |
| 224.20. | Average National Assessment of Educational Progress (NAEP) civics scale score, standard deviation, and percentage of students attaining civics achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1998 through 2018 | nly |
| 224.30. | Average National Assessment of Educational Progress (NAEP) economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected characteristics: 2006 and 2012 | Veb-only |
| 224.40. | Average National Assessment of Educational Progress (NAEP) geography scale score, standard deviation, and percentage of students attaining geography achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2018 | Web-only |
| 224.50 | Average National Assessment of Educational Progress (NAEP) U.S. history scale score, standard deviation, and percentage of students attaining achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2018 | eb-only |
| 224.60. | Average National Assessment of Educational Progress (NAEP) writing scale score of 8th- and 12th-graders, standard deviation, and percentage of students attaining writing achievement levels, by selected student and school characteristics and percentile: 2011 | Web-only |
| 224.70. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) overall and content area scale scores of 8th-graders and percentage of 8th-graders attaining TEL achievement levels, by selected student and school characteristics: 2018 | 172 |
| 224.73. | Average scale score of 8th-graders on the information and communication technology (ICT) content area of the National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) assessment and percentage distribution of 8th-graders, by computer use and internet access at home and other selected characteristics: 2014 | Veb-only |
| 224.74a. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of learning about or discussing various technology- and society-related topics in school and selected student and school characteristics: 2014 [periodically updated] | Veb-only |
| 224.74b. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of having done or of learning about various design- and systems-related activities or topics in school and selected student and school characteristics: 2014 [periodically updated] | Veb-only |
| 224.74c. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of having done various design- and systems-related activities outside of school and selected student and school characteristics: 2014 [periodically updated] . . | Veb-only |
| 224.74d. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of using a computer or other digital technology to perform various activities for schoolwork and selected student and school characteristics: 2014 [periodically updated] | Veb-only |

|  | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of using a computer or other digital technology to perform various activities not related to schoolwork and selected student and school characteristics: 2014 [periodically updated] | y |
| :---: | :---: | :---: |
| 224.74f | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by level of confidence in ability to perform various technology- and engineering-related tasks and selected student and school characteristics: 2014 [periodically updated] . . . | Veb-only |
| Coursetaking, Grades, and Retention in Grade |  |  |
| 225.10. | Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009 . | 173 |
| 225.20. | Average number of Carnegie units earned by public high school graduates in career/ technical education courses in various occupational fields, by sex and race/ethnicity, and percentage distribution of students, by units earned: Selected years, 2000 through 2009 | ly |
| 225.30. | Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2009 | 175 |
| 225.40. | Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by selected student and school characteristics: Selected years, 1990 through 2009 | nly |
| 225.50. | Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2009 | Veb-only |
| 225.60. | Number and percentage of public high school graduates taking dual credit, Advanced Placement (AP), and International Baccalaureate (IB) courses in high school and average credits earned, by selected student and school characteristics: 2000, 2005, and 2009 | Web-only |
| 225.70. | Number and percentage of high school graduates who took foreign language courses in high school and average number of credits earned, by language and number of credits: 2000, 2005, and 2009 | 176 |
| 225.72. | Among public schools with any of grades 9 to 12, percentage of schools with students enrolled or classes offered in selected programs or courses, and enrollments in these programs or courses as a percentage of 9th- to 12th-graders, by locale: 2015-16 . . . | Web-only |
| 225.75 | Percentage of 4th-, 8th-, and 12th-graders whose school reported offering selected classes and percentage of 8th-graders whose schools reported having students who take high school math classes, by selected student and school characteristics: 2015, 2017, and 2019 | Veb-only |
| 225.80. | Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 2003, 2012, and 2016 . . . . . . . | 177 |
| 225.90. | Number and percentage of elementary and secondary school students retained in grade, by sex, race/ethnicity, and grade level: 1994 through 2017 | Veb-only |
| College Admission Tests |  |  |
| 226.10. | Number, percentage distribution, and SAT mean scores of high school seniors taking the SAT, by sex, race/ethnicity, first language learned, and highest level of parental education: 2017, 2018, and 2019 | Neb-only |
| 226.20 | SAT mean scores of college-bound seniors, by sex: 1966-67 through 2015-16 [can no longer be updated] | Veb-only |

| 226.30. | Number, percentage distribution, and SAT mean scores of high school seniors taking the SAT, by high school grade point average, intended college major, and degreelevel goal: 2018 | ly |
| :---: | :---: | :---: |
| 226.40. | SAT mean scores of high school seniors, standard deviations, and percentage of the graduating class taking the SAT, by state: 2017, 2018, and 2019 | ly |
| 226.50. | Number and percentage of graduates taking the ACT test; average scores and standard deviations, by sex and race/ethnicity; and percentage of test takers with selected composite scores and planned fields of postsecondary study: Selected years, 1995 through 2018 | Web-only |
| 226.60. | Average ACT scores and percentage of graduates taking the ACT, by state: 2015 and 2019 | Veb-only |
| Student Activities, Homework, and Attendance |  |  |
| 227.10. | Percentage of 9th-grade students participating in various school-sponsored and non-school-sponsored activities, by sex and race/ethnicity: 2009 | ly |
| 227.20. | Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 | b-only |
| 227.30 | Percentage of high school seniors who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1992 and 2004 | Web-only |
| 227.40 | Percentage of elementary and secondary school students who do homework, average time spent doing homework, percentage whose parents check that homework is done, and percentage whose parents help with homework, by frequency and selected characteristics: 2007, 2012, and 2016 | ly |
| 227.50 | Average National Assessment of Educational Progress (NAEP) reading and mathematics scale scores of 4th-, 8th-, and 12th-graders and percentage absent from school, by selected characteristics and number of days absent in the last month: 2015 and 2019 | Veb-only |
| 227.52. | Percentage distribution of 4th-, 8th-, and 12th-graders, by number of days absent from school in the last month and school locale: 2015 and 2019 | Veb-only |
| School Crime Victims |  |  |
| 228.10. | School-associated violent deaths of all persons, homicides and suicides of youth ages 5-18 at school, and total homicides and suicides of youth ages 5-18, by type of violent death: 1992-93 through 2016-17 . | Web-only |
| 228.12 | Number of casualties from shootings at elementary and secondary schools and number of school shootings, by type of casualty and level of school: 2000-01 through 2018-19 . . | Web-only |
| 228.13 | Number of school shootings at public and private elementary and secondary schools, by type of situation associated with shooting: 2000-01 through 2018-19 | Web-only |
| 228.15 | Number of active shooter incidents at educational institutions and number of casualties, by level of institution: 2000 through 2017 | Web-only |
| 228.16 | Number of active shooter incidents at educational institutions, number and type of guns used, and number and characteristics of shooters, by level of institution: 2000 through 2017 | Web-only |
| 228.20. | Number of nonfatal victimizations against students ages 12-18 and rate of victimization per 1,000 students, by type of victimization and location: 1992 through 2018 . . . . . . . | Web-only |
| 228.25. | Number of nonfatal victimizations against students ages 12-18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2018 | Web-only |
| 228.30 | Percentage of students ages 12-18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2017 | 178 |

| 228.40. | Percentage of students in grades 9-12 who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2017. | y |
| :---: | :---: | :---: |
| 228.42. | Percentage distribution of students in grades 9-12, by number of times they reported being threatened or injured with a weapon on school property during the previous 12 months and selected student characteristics: Selected years, 2009 through 2017 | ly |
| 228.50. | Percentage of public school students in grades 9-12 who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by state or jurisdiction: Selected years, 2003 through 2017 | Web-only |
| School Crime Incidents |  |  |
| 229.10. | Percentage of public schools recording incidents of crime at school, percentage reporting incidents of crime at school to police, and number of incidents recorded or reported, by type of crime: Selected years, 1999-2000 through 2017-18 | 180 |
| 229.20. | Rate of crime incidents at school per 1,000 students recorded by public schools and reported to police by public schools, by school level, percentage of students eligible for free or reduced-price lunch, and type of crime: Selected years, 1999-2000 through 2017-18. | Veb-only |
| 229.30. | Percentage of public schools recording incidents of crime at school, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2017-18 | Veb-only |
| 229.40. | Percentage of public schools reporting incidents of crime at school to the police, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2017-18 . | Web-only |
| 229.50. | Percentage distribution of public schools, by number of violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2017-18 | Veb-only |
| 229.60. | Percentage distribution of public schools, by number of serious violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2017-18 | Veb-only |
| 229.70. | Number of hate crimes occurring at public schools, percentage of schools reporting any hate crimes, and percentage reporting hate crimes motivated by specific types of bias, by school level: 2015-16 and 2017-18 | Web-only |
| School Environment |  |  |
| 230.10. | Percentage of public schools reporting selected discipline problems that occurred at school, by frequency and selected school characteristics: Selected years, 1999-2000 through 2017-18 | 182 |
| 230.20. | Percentage of students ages 12-18 who reported that gangs were present at school during the school year, by sex, race/ethnicity, and urbanicity: Selected years, 2001 through 2017 | Web-only |
| 230.20a. | Percentage of students ages 12-18 who reported that gangs were present at school during the school year, by grade, control of school, and urbanicity: Selected years, 2001 through 2017 | Web-only |
| 230.30. | Percentage of students ages 12-18 who reported being called hate-related words and seeing hate-related graffiti at school during the school year, by selected student and school characteristics: Selected years, 1999 through 2017 . | Web-only |
| 230.35. | Percentage of students ages 12-18 who reported being called hate-related words at school, by type of hate-related word and selected student and school characteristics: 2017 | Web-only |
| 230.40. | Percentage of students ages 12-18 who reported being bullied at school during the school year, by selected student and school characteristics: Selected years, 2005 through 2017 | 184 |

| 230.45 | Percentage of students ages 12-18 who reported being bullied at school during the school year, by type of bullying and selected student and school characteristics: Selected years, 2005 through 2017 | ly |
| :---: | :---: | :---: |
| 230.50. | Percentage of students ages 12-18 who reported being bullied at school during the school year and, among bullied students, percentage who reported being bullied in various locations, by selected student and school characteristics: 2017 | ly |
| 230.51. | Percentage of students ages 12-18 who reported being bullied at school during the year, percentage of bullied students reporting various types of power imbalances in favor of someone who bullied them, and percentage distribution of bullied students, by whether they thought the bullying would happen again and selected student and school characteristics: 2017 | nly |
| 230.52. | Among students ages 12-18 who reported being bullied at school during the school year, percentage reporting that bullying had varying degrees of negative effect on various aspects of their life, by aspect of life affected and selected student and school characteristics: 2017 | Web-only |
| 230.53. | Among students ages 12-18 who reported being bullied at school during the school year, percentage reporting that bullying was related to specific characteristics, by type of characteristic related to bullying and other selected student and school characteristics: 2017 | nly |
| 230.55. | Percentage of students in grades 9-12 who reported having been electronically bullied during the previous 12 months, by selected student characteristics: Selected years, 2011 through 2017 | Web-only |
| 230.60. | Among students ages 12-18 who reported being bullied at school during the school year, percentage reporting various frequencies of bullying and the notification of an adult at school, by selected student and school characteristics: 2017 | Web-only |
| 230.62. | Percentage of public school students in grades 9-12 who reported having been bullied on school property or electronically bullied during the previous 12 months, by state or jurisdiction: Selected years, 2009 through 2017 | eb-only |
| 230.65. | Percentage of public schools reporting selected types of cyberbullying problems occurring at school or away from school at least once a week, by selected school characteristics: 2017-18 | eb-only |
| 230.70. | Percentage of students ages 12-18 who reported being afraid of attack or harm, by location and selected student and school characteristics: Selected years, 1995 through 2017 | Web-only |
| 230.80. | Percentage of students ages 12-18 who reported avoiding one or more places in school or avoiding school activities or classes because of fear of attack or harm, by selected student and school characteristics: Selected years, 1995 through 2017. | b-only |
| 230.85. | Percentage of students ages 12-18 who reported that they were victimized, that they were in a physical fight, or that alcohol or illegal drugs were available or used at school, by school locale, type of victimization, number of times in a fight, and type of drug: 2017 | Web-only |
| 230.94. | Percentage of lower secondary teachers in public schools who reported being able to manage various aspects of student behavior "quite a bit" or "a lot," by selected teacher and school characteristics: 2018 | Web-only |
| Fights | Weapons |  |
| 231.10. | Percentage of students in grades 9-12 who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2017 | 185 |
| 231.20. | Percentage distribution of students in grades 9-12, by number of times they reported having been in a physical fight anywhere or on school property during the previous 12 months and selected student characteristics: 2017 | Web-only |

| 231.30. | Percentage of public school students in grades 9-12 who reported having been in a physical fight at least one time during the previous 12 months, by location and state or jurisdiction: Selected years, 2005 through 2017 |  |
| :---: | :---: | :---: |
| 231.40 | Percentage of students in grades 9-12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2017 | Veb-only |
| 231.50. | Percentage distribution of students in grades 9-12, by number of days they reported carrying a weapon anywhere or on school property during the previous 30 days and selected student characteristics: 2017 | ly |
| 231.60 | Percentage of public school students in grades 9-12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2017 | Web-only |
| 231.65 | Total number of public school students who brought firearms to or possessed firearms at school and number of students who did this per 100,000 students enrolled, by state or jurisdiction: 2009-10 through 2017-18 | Web-only |
| 231.70. | Percentage of students ages 12-18 who reported having access to a loaded gun, without adult permission, at school or away from school during the school year, by selected student and school characteristics: Selected years, 2007 through 2017 . | Neb-only |
|  | Drugs, and Cigarettes |  |
| 232.10. | Percentage of students in grades 9-12 who reported using alcohol at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2017 | 186 |
| 232.20 | Percentage distribution of students in grades 9-12, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2011 through 2017 | only |
| 232.30. | Percentage of public school students in grades 9-12 who reported using alcohol at least 1 day during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2017 | Veb-only |
| 232.40. | Percentage of students in grades 9-12 who reported using marijuana at least one time during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2017 | 187 |
| 232.50 | Percentage distribution of students in grades 9-12, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2011 through 2017 | Web-only |
| 232.60 | Percentage of public school students in grades 9-12 who reported using marijuana at least one time during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2017 | Web-only |
| 232.65 | Percentages of 8th-, 10th-, and 12th-graders reporting use and availability of heroin and narcotics other than heroin, by grade and recency of use: Selected years, 1995 through 2017 | Web-only |
| 232.65a. | Percentages of 8th-, 10th-, and 12th-graders reporting use of heroin and narcotics other than heroin during the past 12 months, by grade and selected student and family characteristics: 2017 | Web-only |
| 232.65b. | Percentages of 8th-, 10th-, and 12th-graders who reported thinking that people are at great risk of harming themselves if they engage in activities related to use of heroin and narcotics other than heroin, by grade and type of activity: Selected years, 1995 through 2017 | Web-only |
| 232.70. | Percentage of students in grades 9-12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2017 | Web-only |

| 232.80. | Percentage of public school students in grades 9-12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by state or jurisdiction: Selected years, 2003 through 2017 |  |
| :---: | :---: | :---: |
| 232.90 | Percentage of 12th-graders reporting use of alcohol and illicit drugs, by recency of use and substance used: Selected years, 1975 through 2019 | - |
| 232.95. | Percentage of 12- to 17-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1985 through 2018 |  |
| D | Safety, and Security Measures |  |
| 233.10. | Number and percentage of public schools that took a serious disciplinary action in response to specific offenses, number and percentage distribution of serious actions taken, and number of students involved in specific offenses, by type of offense and type of action: Selected years, 1999-2000 through 2017-18 | Veb-only |
| 233.12. | Percentage of public schools that took a serious disciplinary action in response to specific offenses, by type of offense and selected school characteristics: 2017-18 | Neb-only |
| 233.20. | Percentage of public school students in grades 6 through 12 who had ever been suspended or expelled, by sex and race/ethnicity: Selected years, 1993 through 2012 | Web-only |
| 233.25. | Number and percentage of fall 2009 ninth-graders who were ever suspended or expelled through spring 2012, by when student was suspended or expelled and selected student characteristics: 2013 | Veb-only |
| 233.27. | Number of students receiving selected disciplinary actions in public elementary and secondary schools, by type of disciplinary action, disability status, sex, and race/ ethnicity: 2013-14 | b-only |
| 233.28. | Percentage of students receiving selected disciplinary actions in public elementary and secondary schools, by type of disciplinary action, disability status, sex, and race/ ethnicity: 2013-14 | -only |
| 233.30 | Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2013-14 | Neb-only |
| 233.40. | Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2013-14 | 188 |
| 233.45 | Number of discipline incidents resulting in removal of a student from a regular education program for at least an entire school day and rate of incidents per 100,000 students, by discipline reason and state: 2014-15 | eb-only |
| 233.50. | Percentage of public schools with various safety and security measures: Selected years, 1999-2000 through 2017-18 | 190 |
| 233.60. | Percentage of public schools with various safety and security measures, by selected school characteristics: 2017-18 | b-only |
| 233.65. | Percentage of public schools with a written plan for procedures to be performed in selected scenarios and percentage that have drilled students on the use of selected emergency procedures, by selected school characteristics: Selected years, 2003-04 through 2017-18. | Neb-on |
| 233.67a. | Percentage of public schools providing training for classroom teachers or aides in specific safety and discipline topics, by safety and discipline training topic: Selected years, 2003-04 through 2015-16 | Neb-only |
| 233.67b. | Percentage of public schools providing training for classroom teachers or aides in specific safety and discipline topics, by safety and discipline training topic and selected school characteristics: 2017-18 | Neb-only |
| 233.69a. | Number and percentage of public schools providing diagnostic mental health assessments and treatment to students and, among schools providing these services, percentage providing them at school and outside of school, by selected school characteristics: 2017-18 | Web-only |

233.69b. Percentage of public schools reporting that various factors limited in a major way their efforts to provide mental health services to students, by selected school characteristics: 2017-18 Web-only
233.70. Percentage of public schools with security staff present at least once a week, and percentage with security staff routinely carrying a firearm, by selected school characteristics: 2005-06 through 2017-18 Web-only
233.70a. Percentage of public schools with security staff present at least once a week, by full-time or part-time status and selected school characteristics: 2005-06 through 2015-16 Web-only
233.72. Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with officers present at specific times and percentage with any officers present for all instructional hours every day, by school level, times present, and selected school characteristics: 2015-16 Web-only
233.70b. Percentage of public schools with security staff present at school at least once a week, by type of security staff, school level, and selected school characteristics: 2005-06, 2015-16, and 2017-18 ..... Web-only
233.74a. Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with any officers who routinely carry or wear specific items, by school level, type of item, and selected school characteristics: 2015-16 ..... Web-only
233.74b. Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with officers participating in selected activities, by type of activity, school level, and selected school characteristics: 2015-16 Web-only
233.74c. Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with formalized policies or written documents defining the roles of officers at school, by school level, specific areas for which officers' role is defined, and selected school characteristics: 2015-16 Web-only
233.80. Percentage of students ages 12-18 who reported various security measures at school: Selected years, 1999 through 2017 ..... Web-only
State Regulations
234.10. Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 2000 through 2018 ..... 191
234.20. Minimum amount of instructional time per year and policies on textbooks, by state: Selected years, 2000 through 2020 ..... 192
234.30. Course credit requirements and exit exam requirements for a standard high school diploma and the use of other high school completion credentials, by state: 2013 ..... Web-only
234.40. States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006-07 ..... Web-only
234.50. Required testing for initial certification of elementary and secondary school teachers, by type of assessment and state: 2017 and 2018 ..... Web-only
Revenues
235.10. Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919-20 through 2016-17 ..... 194
235.20. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2016-17 ..... 196
235.30. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2015-16 ..... Web-only
235.40. Public elementary and secondary revenues and expenditures, by locale, source of revenue, and purpose of expenditure: 2016-17 ..... 197
Expenditures
236.10. Summary of expenditures for public elementary and secondary education and other related programs, by purpose: Selected years, 1919-20 through 2016-17 ..... 198
236.15. Current expenditures and current expenditures per pupil in public elementary and secondary schools: 1989-90 through 2029-30 ..... 199
236.20. Total expenditures for public elementary and secondary education and other related programs, by function and subfunction: Selected years, 1990-91 through 2016-17 ..... 200
236.25. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969-70 through 2016-17 ..... 202
236.30. Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2016-17 ..... 203
236.40. Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2015-16 ..... Web-only
236.50. Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2015-16 and 2016-17 ..... 205
236.55. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919-20 through 2016-17 ..... 207
236.60. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and subfunction: Selected years, 1990-91 through 2016-17 ..... 208
236.65. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2016-17 ..... 210
236.70. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2016-17 ..... 212
236.75. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2016-17 ..... 214
236.80. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2015-16 ..... Web-only
236.85. Unadjusted and geographically adjusted current expenditure per pupil in fall enrollment in public elementary and secondary schools, by function, district poverty level, and locale: 2016-17 Web-only
236.90. Students transported at public expense and current expenditures for transportation: Selected years, 1929-30 through 2016-17 Web-only
Chapter 3. Postsecondary Education
Overview and Historical
301.10. Enrollment, staff, and degrees/certificates conferred in degree-granting and non- degree-granting postsecondary institutions, by control and level of institution, sex of student, type of staff, and level of degree: Fall 2018 and 2017-18 ..... 227
301.20. Historical summary of faculty, enrollment, degrees conferred, and finances in degree- granting postsecondary institutions: Selected years, 1869-70 through 2017-18 ..... 228
Enrollment Rates
302.10. Recent high school completers and their enrollment in college, by sex and level of institution: 1960 through 2018 ..... 229
302.20. Percentage of recent high school completers enrolled in college, by race/ethnicity: 1960 through 2018 ..... 230
302.40. Number of high schools with 12th-graders and percentage of high school graduates attending 4-year colleges, by selected high school characteristics: Selected years, 1998-99 through 2011-12 ..... 231
302.43. Percentage distribution of fall 2009 ninth-graders who had completed high school, by postsecondary enrollment status in fall 2013, and selected measures of their high school achievement and selected student characteristics: 2013 Web-only
302.44. Percentage distribution of all 2009 9th-graders and those who ever attended a postsecondary institution, by socioeconomic status in 2009 and selected postsecondary outcomes: 2016 Web-only
302.45. Percentage distribution of all 2009 9th-graders and those who ever attended a postsecondary institution, by poverty status in 2009 and 2012 and selected postsecondary outcomes: 2016 Web-only
302.46. Percentage distribution of fall 2009 ninth-graders, by high school locale in 2009, high school completion status, postsecondary enrollment and work status or plans, and postsecondary attainment status: 2013 and 2016 ..... Web-only
302.50. Estimated rate of 2011-12 high school graduates attending degree-granting postsecondary institutions, by state: 2012 ..... 232
302.60. Percentage of 18- to 24-year-olds enrolled in college, by level of institution and sex and race/ethnicity of student: 1970 through 2018 ..... 233
302.62. Percentage of 18- to 24-year-olds enrolled in college and percentage distribution of those enrolled, by sex, race/ethnicity, and selected racial/ethnic subgroups. 2010 and 2018 Web-only
302.65. Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions, by race/ethnicity and state: 2018 ..... Web-only
302.70. Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions, by race/ethnicity and state: 2007 ..... Web-only
Total Fall Enrollment-General
303.10. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2029 ..... 234
303.20. Total fall enrollment in all postsecondary institutions participating in Title IV aid programs and annual percentage change in enrollment, by degree-granting status and control of institution: 1995 through 2018 ..... 236
303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2018 ..... 237
303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2029 ..... 238
303.40. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age of student: Selected years, 1970 through 2029 ..... 240
303.45. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and age of student: 2013, 2015, and 2017 ..... 241
303.50. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2017 ..... 242
303.55. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, attendance status, and age of student: 2017 ..... 243
303.60. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, level and control of institution, and attendance status of student: 2018 ..... 244
303.65. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, level and control of institution, and attendance status of student: 2017 ..... Web-only
303.70. Total undergraduate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control and level of institution: Selected years, 1970 through 2029 ..... 245
303.80. Total postbaccalaureate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: 1970 through 2029 ..... 247
303.90. Fall enrollment and number of degree-granting postsecondary institutions, by control and religious affiliation of institution: Selected years, 1980 through 2018 ..... 248
Total Fall Enrollment-State-Level
304.10. Total fall enrollment in degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2018 ..... 250
304.15. Total fall enrollment in public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2018 ..... 251
304.20. Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2018 ..... Web-only
304.21. Total fall enrollment in private nonprofit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1980 through 2018 ..... 252
304.22. Total fall enrollment in private for-profit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1980 through 2018 ..... 253
304.30. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2017 and 2018 ..... 254
304.35. Total fall enrollment in public degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2017 and 2018 ..... 255
304.40. Total fall enrollment in private degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2017 and 2018 ..... Web-only
304.45. Total fall enrollment in private nonprofit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2017 and 2018 Web-only
304.50. Total fall enrollment in private for-profit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2017 and 2018 ..... Web-only
304.60. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2017 and 2018 ..... 256
304.70. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment and state or jurisdiction: Selected years, 2000 through 2018 Web-only
304.80. Total fall enrollment in degree-granting postsecondary institutions, by control of institution, level of enrollment, level of institution, and state or jurisdiction: 2018 ..... Web-only
First-Time Students and Admissions
305.10. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, and level and control of institution: 1960 through 2029 ..... 257
305.20. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, control of institution, and state or jurisdiction: Selected years, 2000 through 2018 ..... 258
305.30. Number and percentage of degree-granting postsecondary institutions with first-year undergraduates using various selection criteria for admission, by control and level of institution: Selected years, 2000-01 through 2018-19 ..... Web-only
305.40. Acceptance rates; number of applications, admissions, and enrollees; and enrollees' SAT and ACT scores for degree-granting postsecondary institutions with first-year undergraduates, by control and level of institution: 2018-19 ..... 259
Enrollment of Racial/Ethnic Groups
306.10. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment,sex, attendance status, and race/ethnicity or nonresident alien status of student:Selected years, 1976 through 2018260
306.20. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity or nonresident alien status of student: Selected years, 1976 through 2018 ..... 263
306.30. Fall enrollment of U.S. residents in degree-granting postsecondary institutions, by race/ ethnicity: Selected years, 1976 through 2029 ..... 265
306.40. Fall enrollment of males and females and specific racial/ethnic groups in degree- granting postsecondary institutions, by control and classification of institution and percentage of U.S. resident enrollment in the same racial/ethnic group: 2018 ..... Web-only
306.50. Total fall enrollment in degree-granting postsecondary institutions, by control and classification of institution, level of enrollment, and race/ethnicity of student: 2018 ..... 266
306.60. Total fall enrollment in degree-granting postsecondary institutions, by race/ethnicity or nonresident alien status of student and state or jurisdiction: 2018 ..... 268
306.65. Total fall enrollment in degree-granting postsecondary institutions, by race/ethnicity or nonresident alien status of student and state or jurisdiction: 2017 ..... Web-only
Full-Time-Equivalent Fall Enrollment
307.10. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1967 through 2029 ..... 270
307.20. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2000, 2010, and 2018 ..... Web-only
307.30. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2018 Web-only
Twelve-Month Enrollment
308.10. Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2016-17 and 2017-18 Web-only
308.20. Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004-05 through 2017-18 Web-only
Student Residence and Migration
309.10. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions, by state or jurisdiction: Fall 2018 ..... 271
309.20. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2018 ..... 272
309.30. Residence and migration of all first-time degree/certificate-seeking undergraduates in 4 -year degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2018 ..... 273
Study Abroad and Foreign Students
310.10. Number of U.S. students studying abroad and percentage distribution, by sex, race/ ethnicity, and other selected characteristics: Selected years, 2000-01 through 2017-18 . ..... 274
310.20. Foreign students enrolled in institutions of higher education in the United States, by continent, region, and selected countries of origin: Selected years, 1980-81 through 2018-19 ..... 275
Programs and Courses
311.10. Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2015-16 ..... 276
311.15. Number and percentage of students enrolled in degree-granting postsecondary institutions, by distance education participation, location of student, level of enrollment, and control and level of institution: Fall 2017 and fall 2018 ..... 277
311.20. Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics: 2011-12 ..... Web-only
311.22. Number and percentage of undergraduate students enrolled in distance education or online classes and degree programs, by selected characteristics: Selected years, 2003-04 through 2015-16 ..... 278
311.30. Number and percentage of graduate students taking night, weekend, or online classes, by selected characteristics: 2011-12 ..... Web-only
311.32. Number and percentage of graduate students enrolled in distance education or online classes and degree programs, by selected characteristics: Selected years, 2003-04 through 2015-16 ..... 279
311.33. Selected statistics for degree-granting postsecondary institutions that primarily offer online programs, by control of institution and selected characteristics: Fall 2018 and 2017-18 ..... 280
311.40. Percentage of first-year undergraduate students who reported taking remedial education courses, by selected student and institution characteristics: Selected years, 2003-04 through 2015-16 ..... 281
311.50. Percentage of degree-granting postsecondary institutions with first-year undergraduates offering remedial services, by control and level of institution: 1989-90 through 2018-19 ..... Web-only
311.60. Enrollment in postsecondary education, by level of enrollment, level of institution, student age, and major field of study: 2015-16 ..... 283
311.70. Course enrollments in languages other than English compared with total enrollment at degree-granting postsecondary institutions, by enrollment level, institution level, and language: Selected years, 1965 through 2016 ..... Web-only
311.80. Number and percentage distribution of course enrollments in languages other than English at degree-granting postsecondary institutions, by language and enrollment level: Selected years, 2002 through 2016
311.90. Graduate enrollment in research-based programs in engineering, natural and social sciences, mathematics and computer sciences, and selected health fields in degree- granting postsecondary institutions, by discipline division: Selected years, fall 2007 through fall 2018 ..... Web-only
Large Institutions and Institutions Serving Specific Groups
312.10. Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2018 ..... 285
312.20. Enrollment, degrees/certificates conferred, and total expenditures of degree-granting postsecondary institutions enrolling more than 15,000 students in 2018, by selected characteristics and institution: Selected years, 1990 through 2017-18 ..... Web-only
312.30. Enrollment and degrees conferred in degree-granting women's colleges, by selected characteristics and institution: Fall 2018 and 2017-18 ..... Web-only
312.40. Enrollment and degrees conferred in Hispanic-serving institutions, by institution level and control, percentage Hispanic, degree level, and other selected characteristics: Fall 2018 and 2017-18 ..... Web-only
312.50. Fall enrollment and degrees conferred in degree-granting tribally controlled postsecondary institutions, by state and institution: Selected years, fall 2000 through fall 2018, and 2016-17 and 2017-18 ..... 286
312.60. Enrollment and degrees conferred in Asian and Pacific Islander-serving institutions, by selected institution and student characteristics, degree level, and state or jurisdiction: Fall 2018 and 2017-18 ..... Web-only
Historically Black Colleges and Universities
313.10. Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2017, 2018, and 2017-18 ..... 287
313.20. Fall enrollment in degree-granting historically Black colleges and universities, by sex of student and level and control of institution: Selected years, 1976 through 2018 ..... 289
313.30. Selected statistics on degree-granting historically Black colleges and universities, by control and level of institution: Selected years, 1990 through 2018 ..... 290
Staff
314.10. Total and full-time-equivalent (FTE) staff and FTE student/FTE staff ratios in postsecondary institutions participating in Title IV aid programs, by degree-granting status, control of institution, and primary occupation: Fall 1999, fall 2009, and fall 2018 ..... 291
314.20. Employees in degree-granting postsecondary institutions, by sex, employment status, control and level of institution, and primary occupation: Selected years, fall 1991 through fall 2018 ..... 292
314.30. Employees in degree-granting postsecondary institutions, by employment status, sex, control and level of institution, and primary occupation: Fall 2018 ..... 293
314.35. Employees in degree-granting postsecondary institutions, by employment status, sex, control and level of institution, and primary occupation: Fall 2017 ..... Web-only
314.40. Employees in degree-granting postsecondary institutions, by race/ethnicity, sex, employment status, control and level of institution, and primary occupation: Fall 2018 ..... 295
314.45. Employees in degree-granting postsecondary institutions, by race/ethnicity, sex, employment status, control and level of institution, and primary occupation: Fall 2017. ..... Web-only
314.50. Full-time-equivalent (FTE) staff, FTE faculty, and ratios of FTE students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2018 ..... Web-only
314.55. Full-time-equivalent (FTE) staff, FTE faculty, and ratios of FTE students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2017 ..... Web-only
314.60. Full-time-equivalent (FTE) staff, FTE faculty, and ratios of FTE students to FTE staff and FTE faculty in private degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2018 ..... Web-only
314.65. Full-time-equivalent (FTE) staff, FTE faculty, and ratios of FTE students to FTE staff and FTE faculty in private degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2017 Web-only
Faculty and Instructional Staff
315.10. Number of faculty in degree-granting postsecondary institutions, by employment status, sex, control, and level of institution: Selected years, fall 1970 through fall 2018 ..... 298
315.20. Full-time faculty in degree-granting postsecondary institutions, by race/ethnicity, sex, and academic rank: Fall 2015, fall 2017, and fall 2018 ..... 299
315.30. Percentage distribution of full-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 Web-only
315.40. Percentage distribution of part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 Web-only
315.50. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 ..... Web-only

| 315 | Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 |  |
| :---: | :---: | :---: |
| 315.70. | Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 . . . | Web-only |
| 315.80. | Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003 . . . . . . | Web-only |

Faculty Salaries and Benefits
316.10. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, control and level of institution, and sex: Selected years, 1970-71 through 2018-19 ..... 300
316.20. Average salary of full-time instructional faculty on 9 -month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999-2000 through 2018-19 ..... 303
316.30. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2018-19 ..... 304
316.40. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2017-18 ..... Web-only
316.50. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree- granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2018-19 ..... 305
316.60. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree- granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2017-18 Web-only
316.70. Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by type of benefit and control of institution: Selected years, 1977-78 through 2010-11 ..... Web-only
316.80. Percentage of degree-granting postsecondary institutions with a tenure system and percentage of full-time faculty with tenure at these institutions, by control and level of institution and selected characteristics of faculty: Selected years, 1993-94 through 2018-19 ..... 306
316.81. Percentage of full-time faculty (instruction, research, and public service) with tenure at degree-granting postsecondary institutions with a tenure system, by control, level, and state: 2018-19 ..... Web-only
Institutions
317.10. Degree-granting postsecondary institutions, by control and level of institution: Selected years, 1949-50 through 2018-19 ..... 307
317.20. Degree-granting postsecondary institutions, by control and classification of institution and state or jurisdiction: 2018-19 ..... 308
317.30. Number of non-degree-granting institutions offering postsecondary education, by control of institution and state or jurisdiction: Selected years, 2000-01 through 2018-19
317.40. Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and classification of institution: Fall 2018 ..... 310
317.50. Number of degree-granting postsecondary institutions that have closed, by control and level of institution: 1969-70 through 2018-19 ..... 313

## Summary of Degrees Conferred

318.10. Degrees conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1869-70 through 2029-30 ..... 314
318.20. Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2017-18 ..... 315
318.30. Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2017-18 ..... 316
318.40. Degrees/certificates conferred by postsecondary institutions, by control of institution and level of degree/certificate: 1970-71 through 2017-18 ..... 332
318.45. Number and percentage distribution of science, technology, engineering, and mathematics (STEM) degrees/certificates conferred by postsecondary institutions, by race/ethnicity, level of degree/certificate, and sex of student: 2008-09 through 2017-18
318.50. Degrees conferred by postsecondary institutions, by control of institution, level of degree, and field of study: 2017-18 ..... 333
318.60. Number of postsecondary institutions conferring degrees, by control of institution, level of degree, and field of study: 2017-18 ..... 334
Degrees Conferred-State-Level
319.10. Degrees conferred by postsecondary institutions, by control of institution, level of degree, and state or jurisdiction: 2017-18 ..... 335
319.20. Degrees conferred by postsecondary institutions, by level of degree and state or jurisdiction: 2015-16 through 2017-18 ..... 336
319.30. Bachelor's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2017-18 ..... Web-only
319.40. Master's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2017-18 ..... Web-only
Certificates Below the Associate's Degree Level
320.10. Certificates below the associate's degree level conferred by postsecondary institutions, by length of curriculum, sex of student, institution level and control, and field of study: 2017-18 ..... 337
320.20. Certificates below the associate's degree level conferred by postsecondary institutions, by race/ethnicity and sex of student: 1998-99 through 2017-18 ..... 339
Associate's Degrees
321.10. Associate's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2007-08 through 2017-18 ..... 340
321.12. Certificates below the associate's degree level and associate's degrees conferred by public 2-year postsecondary institutions, by length of curriculum, sex of student, and discipline division: 2014-15 Web-only
321.20. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2017-18 ..... 341
321.30. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... 342
321.40. Associate's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
321.50. Associate's degrees conferred to females by postsecondary institutions, by race/ ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
Bachelor's Degrees
322.10. Bachelor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2017-18 ..... 343
322.20. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2017-18 ..... 344
322.30. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... 345
322.40. Bachelor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
322.50. Bachelor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
Master's Degrees
323.10. Master's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2017-18 ..... 346
323.20. Master's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2017-18 ..... 347
323.30. Master's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... 348
323.40. Master's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
323.50. Master's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
Doctor's Degrees
324.10. Doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2017-18 ..... 349
324.20. Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2017-18 ..... 350
324.25. Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 ..... 351
324.30. Doctor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 Web-only
324.35. Doctor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2016-17 and 2017-18 Web-only
324.40. Number of postsecondary institutions conferring doctor's degrees in dentistry, medicine, and law, and number of such degrees conferred, by sex of student: Selected years, 1949-50 through 2017-18 ..... 352
324.50. Degrees conferred by postsecondary institutions in selected professional fields, by sex of student, control of institution, and field of study: Selected years, 1985-86 through 2017-18 Web-only
324.55. Degrees conferred by postsecondary institutions in selected professional fields, by race/ ethnicity and field of study: 2016-17 and 2017-18 ..... Web-only
324.60. Degrees conferred to males by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2016-17 and 2017-18 Web-only
324.70. Degrees conferred to females by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2016-17 and 2017-18 Web-only
324.80. Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2016-17 and 2017-18 ..... Web-only
324.90. Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees, by rank order: 2008-09 through 2017-18 ..... Web-only

## Trends in Degrees by Field

325.10. Degrees in agriculture and natural resources conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18 Web-only
325.15. Degrees in architecture and related services conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2017-18 Web-only
325.20. Degrees in the biological and biomedical sciences conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1951-52 through 2017-18 Web-only
325.22. Degrees in biology, microbiology, and zoology conferred by postsecondary institutions, by level of degree: 1970-71 through 2017-18 Web-only
325.25. Degrees in business conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1955-56 through 2017-18 Web-only
325.30. Degrees in communication, journalism, and related programs and in communications technologies conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18 Web-only
325.35. Degrees in computer and information sciences conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18 Web-only
325.40. Degrees in education conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2017-18 Web-only
325.45. Degrees in engineering and engineering technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2017-18 Web-only
325.47. Degrees in chemical, civil, electrical, and mechanical engineering conferred by postsecondary institutions, by level of degree: 1970-71 through 2017-18 Web-only
325.50. Degrees in English language and literature/letters conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2017-18 Web-only
325.55. Degrees in foreign languages and literatures conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959-60 through 2017-18 Web-only
325.57. Degrees in French, German, Italian, and Spanish language and literature conferred by postsecondary institutions, by level of degree: Selected years, 1949-50 through 2017-18 Web-only
325.59. Degrees in Arabic, Chinese, Korean, and Russian language and literature conferred by postsecondary institutions, by level of degree: 1969-70 through 2017-18 Web-only
325.60. Degrees in the health professions and related programs conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18 Web-only
325.65. Degrees in mathematics and statistics conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2017-18 Web-only
325.70. Degrees in the physical sciences and science technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959-60 through 2017-18 ..... Web-only
325.72. Degrees in chemistry, geology and earth science, and physics conferred by postsecondary institutions, by level of degree: 1970-71 through 2017-18 Web-only
325.80. Degrees in psychology conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2017-18 ..... Web-only
325.85. Degrees in public administration and social services conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18 ..... Web-only
325.90. Degrees in the social sciences and history conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18
325.92. Degrees in economics, history, political science and government, and sociology conferred by postsecondary institutions, by level of degree: Selected years, 1949-50 through 2017-18 Web-only
325.95. Degrees in visual and performing arts conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2017-18 ..... Web-only
Completion and Retention Rates
326.10. Graduation rate from first institution attended for first-time, full-time bachelor's degree- seeking students at 4-year postsecondary institutions, by race/ethnicity, time to completion, sex, control of institution, and percentage of applications accepted: Selected cohort entry years, 1996 through 2012 Web-only
326.15. Percentage distribution of first-time, full-time bachelor's degree-seeking students at 4 -year postsecondary institutions 6 years after entry, by completion and enrollment status at first institution attended, sex, race/ethnicity, control of institution, and percentage of applications accepted: Cohort entry years 2007 and 2012 ..... 353
326.20. Graduation rate from first institution attended within 150 percent of normal time for first-time, full-time degree/certificate-seeking students at 2-year postsecondary institutions, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2015 ..... Web-only
326.25. Percentage distribution of first-time, full-time degree/certificate-seeking students at 2 -year postsecondary institutions 3 years after entry, by completion and enrollment status at first institution attended, sex, race/ethnicity, and control of institution: Cohort entry years 2010 and 2015 ..... 354
326.27. Number of degree/certificate-seeking undergraduate students entering a postsecondary institution and percentage of students 4, 6, and 8 years after entry, by completion and enrollment status at the same institution, institution level and control, attendance level and status, Pell Grant recipient status, and acceptance rate: Cohort entry year 2010 ..... Web-only
326.30. Retention of first-time degree-seeking undergraduates at degree-granting postsecondary institutions, by attendance status, level and control of institution, and percentage of applications accepted: Selected years, 2006 to 2018 ..... 355
326.40. Percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2003-04 academic year, by highest degree attained, enrollment status, and selected characteristics: Spring 2009 ..... Web-only
326.50. Number and percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2011-12 academic year, by attainment and enrollment status and selected characteristics: Spring 2014 ..... Web-only
Achievement and Admissions Testing
327.10. Average scores and standard deviations on Graduate Record Examination (GRE) general and subject tests: 1965 through 2018 ..... Web-only
Security and Crime
329.10. On-campus crimes, arrests, and referrals for disciplinary action at degree-granting postsecondary institutions, by location of incident, control and level of institution, and type of incident: Selected years, 2001 through 2017 ..... 357
329.20. On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time- equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: Selected years, 2001 through 2017 ..... 360
329.30. On-campus hate crimes at degree-granting postsecondary institutions, by level and control of institution, type of crime, and category of bias motivating the crime: Selected years, 2010 through 2017 ..... 363

## Student Charges

| 330.10. | Average undergraduate tuition and fees and room and board rates charged for fulltime students in degree-granting postsecondary institutions, by level and control of institution: Selected years, 1963-64 through 2018-19 | 364 |
| :---: | :---: | :---: |
| 330.20. | Average undergraduate tuition and fees and room and board rates charged for fulltime students in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2017-18 and 2018-19 | 368 |
| 330.30. | Average undergraduate tuition, fees, room, and board charges for full-time students in degree-granting postsecondary institutions, by percentile of charges and control and level of institution: Selected years, 2000-01 through 2018-19 | 369 |
| 330.40. | Average total cost of attendance for first-time, full-time undergraduate students in degree-granting postsecondary institutions, by control and level of institution, living arrangement, and component of student costs: Selected years, 2010-11 through 2018-19 | 370 |
| 330.41 . | Average total cost of attendance for first-time, full-time undergraduate students in public degree-granting postsecondary institutions, by level of institution, living arrangement, component of student costs, and state: 2014-15 [updated periodically] | Web-only |
| 330.50. | Average and percentiles of graduate tuition and required fees in degree-granting postsecondary institutions, by control of institution: 1989-90 through 2018-19 | 371 |
| Financia | Aid for Undergraduates |  |
| 331.10. | Percentage of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 2015-16 | 372 |
| 331.20. | Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000-01 through 2017-18 | 373 |
| 331.30. | Average amount of grant and scholarship aid and average net price for first-time, fulltime degree/certificate-seeking students awarded Title IV aid, by control and level of institution and income level: Selected years, 2009-10 through 2017-18 | 375 |

331.35. Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by type and source of aid and selected student characteristics: Selected years, 1999-2000 through 2015-16 ..... 377
331.37. Percentage of part-time or part-year undergraduates receiving financial aid, and average annual amount received, by type and source of aid and selected student characteristics: Selected years, 1999-2000 through 2015-16 ..... Web-only
331.40. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2015-16 ..... 380
331.45. Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2015-16 ..... Web-only
331.50. Aid status and sources of aid for full-time and part-time undergraduates, by control and level of institution: 2011-12 and 2015-16 ..... 381
331.60. Percentage of full-time, full-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992-93 through 2015-16 ..... 382
331.70. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and level of institution: Selected years, 1992-93 through 2015-16 ..... 384
331.80. Percentage of part-time or part-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992-93 through 2015-16
331.90. Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and level of institution: 2011-12 and 2015-16 ..... 386
331.95. Percentage of undergraduate degree/certificate completers who ever received loans and average cumulative amount borrowed, by degree level, selected student characteristics, and institution control: Selected years, 1999-2000 through 2015-16 ..... 387
Financial Aid for Postbaccalaureate Students
332.10. Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992-93 through 2015-16 ..... 390
332.20. Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992-93 through 2015-16 Web-only
332.30. Percentage of full-time, full-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992-93 through 2015-16 Web-only
332.35. Average amount of financial aid awarded to full-time, full-year postbaccalaureate students, by type of aid, level of study, and control and level of institution: Selected years, 1992-93 through 2015-16 Web-only
332.40. Percentage of part-time or part-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992-93 through 2015-16 Web-only
332.42. Average amount of financial aid awarded to part-time or part-year postbaccalaureate students, by type of aid, level of study, and control and level of institution: Selected years, 1992-93 through 2015-16 Web-only
332.45. Percentage of graduate degree completers with student loan debt and average cumulative amount owed, by level of education funded and graduate degree type, institution control, and degree program: Selected years, 1999-2000 through 2015-16 ..... 392
332.50. Number of postsecondary students who entered the student loan repayment phase, number of students who defaulted within a 3-year period, and 3-year student loan cohort default rate, by level and control of institution: Fiscal years 2010 through 2016 ..... Web-only
Revenues
333.10. Revenues of public degree-granting postsecondary institutions, by source of revenue and level of institution: Selected years, 2007-08 through 2017-18 ..... 394
333.20. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2017-18 ..... 396
333.25. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2016-17 ..... Web-only
333.30. Appropriations from state and local governments for public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1990-91 through 2017-18 Web-only
333.40. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999-2000 through 2017-18 ..... 397
333.50. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and classification of institution: 2017-18 ..... 399
333.55. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999-2000 through 2017-18 ..... 400
333.60. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and classification of institution: 2017-18 ..... Web-only
333.70. Revenue received from the federal government by the 120 degree-granting postsecondary institutions receiving the largest amounts, by control and rank order: 2017-18 Web-only
333.80. Voluntary support for degree-granting postsecondary institutions, by source and purpose of support: Selected years, 1949-50 through 2017-18 Web-only
333.90. Endowment funds of the 120 degree-granting postsecondary institutions with the largest endowments, by rank order: Fiscal year 2018 Web-only
Expenditures
334.10. Total expenditures of public degree-granting postsecondary institutions, by purpose of expenditure and level of institution: 2009-10 through 2017-18 ..... 401
334.20. Total expenditures of public degree-granting postsecondary institutions, by level of institution, purpose of expenditure, and state or jurisdiction: 2014-15 through 2017-18 ..... 403
334.30. Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999-2000 through 2017-18 ..... 404
334.40. Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and classification of institution: 2017-18 ..... 406
334.50. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999-2000 through 2017-18 ..... 408
334.60. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and classification of institution: 2017-18 ..... Web-only
334.70. Total expenditures of private nonprofit and for-profit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1999-2000 through 2017-18 ..... Web-only
Chapter 4. Federal Funds for Education and Related Activities
On-Budget and Off-Budget Support
401.10. Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2019 ..... 421
401.20. Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2018 ..... 423
401.30. Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2019 ..... Web-only
401.60. U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2018 ..... 425
401.70. Appropriations for Title I and selected other programs under the Every Student Succeeds Act of 2015, by program and state or jurisdiction: Fiscal years 2018 and 2019 ..... 426
Federal Obligations for Research and Development
402.10. Federal obligations for research, development, and R\&D plant, by category of obligation, performer, and field of science and engineering: Fiscal years 2010 through 2019 Web-only
Chapter 5. Outcomes of Education
Labor Force Status by Educational Attainment
501.10. Labor force participation, employment, and unemployment of persons 25 to 64 years old, by sex, race/ethnicity, age group, and educational attainment: 2016, 2017, and 2018 ..... 432
501.20. Labor force participation, employment, and unemployment of persons 16 to 24 years old who are not enrolled in school, by age group, sex, race/ethnicity, and educational attainment: 2016, 2017, and 2018 ..... 434
501.30. Percentage and number of persons 18 to 24 years old who were neither enrolled in school nor working, by age group, high school completion status, sex, and race/ ethnicity: Selected years, 2006 through 2018 ..... 436
501.35. Labor force status of persons 25 to 64 years old, by disability status, highest level of educational attainment, age, sex, and race/ethnicity: 2015 [updated periodically] ..... Web-only
501.40. Percentage distribution of 25- to 34-year-olds with various levels of educational attainment, by labor force status, sex, race/ethnicity, and U.S. nativity and citizenship status: 2018 ..... 438
501.45. Percentage distribution of persons 25 to 64 years old, by labor force and employment status and earnings, educational attainment, and locale: 2016 ..... Web-only
501.50. Employment to population ratios of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2019 ..... 439
501.60. Employment to population ratios of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2019 ..... Web-only
501.70. Employment to population ratios of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2019 ..... Web-only
501.80. Unemployment rates of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2019 ..... 440
501.85. Unemployment rates of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2019 ..... Web-only
501.90. Unemployment rates of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2019 ..... Web-only
Occupation and Earnings by Educational Attainment
502.10. Occupation of employed persons 25 years old and over, by highest level of educational attainment and sex: 2018 and 2019 ..... 441
502.20. Median annual earnings, number, and percentage of full-time year-round workers age 25 and over, by highest level of educational attainment and sex: 1990 through 2018 ..... 442
502.30. Median annual earnings of full-time year-round workers 25 to 34 years old and full-time year-round workers as a percentage of the labor force, by sex, race/ethnicity, and educational attainment: Selected years, 1995 through 2018 ..... Web-only
502.40. Annual earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2018 ..... 446
Employment of Students
503.10. Percentage of high school students age 16 and over who were employed, by age group, sex, race/ethnicity, family income, nativity, and hours worked per week: Selected years, 1970 through 2017 ..... 448
503.20. Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and control and level of institution: Selected years, October 1970 through 2017 ..... 450
503.30. Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and selected characteristics: October 2015 through 2017 ..... Web-only
503.40. Percentage of 16- to 64-year-old undergraduate students who were employed, by attendance status, hours worked per week, and selected characteristics: 2000, 2010, and 2018 ..... Web-only
Labor Force Status of Recent High School Completers and Dropouts
504.10. Labor force status of recent high school completers, by college enrollment status, sex, and race/ethnicity: October 2016, 2017, and 2018 ..... 451
504.20. Labor force status of recent high school dropouts, by sex and race/ethnicity: Selected years, October 1980 through 2018 ..... 453
504.30. Among special education students out of high school up to 8 years, percentage attending and completing postsecondary education, living independently, and working competitively, by type of disability: 2007 and 2009 Web-only
Labor Market Outcomes for Recent Bachelor's Degree Completers
505.06. Number and percentage distribution of 25- to 64-year-old bachelor's degree holders, percentage of degree holders among all 25- to 64-year-olds, and unemployment rates and median annual earnings of 25- to 64-year-old bachelor's degree holders, by age group, field of study, and science, technology, engineering, or mathematics (STEM) status of field: 2018
505.10. Number, percentage distribution, unemployment rates, and median earnings of 25- to 29-year-old bachelor's degree holders and percentage of degree holders among all 25- to 29-year-olds, by field of study and science, technology, engineering, or mathematics (STEM) status of field: 2010 and 2018 ..... 454
505.15. Number, percentage distribution, and median annual earnings of 25-to 34-year-olds with a bachelor's or higher degree, by sex, race/ethnicity, and selected employment and occupational characteristics: 2017 ..... Web-only
505.20. Unemployment rate of 25- to 34-year-olds with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2018 Web-only
505.30. Percentage distribution of employed 25- to 34-year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, by STEM or non- STEM occupation, sex, race/ethnicity, and U.S. nativity and citizenship status: 2018 Web-only505.40. Percentage distribution of recipients of bachelor's degrees in various fields of study1 year after graduation, by time to completion, enrollment and employment status, andoccupation: 2001 and 2009Web-only
505.50. Percentage, selected employment characteristics, and annual salaries of bachelor's degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009 ..... Web-only
Attitudes of Young Adults
506.10. Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were "very important," by sex: Selected years, 1972 through 2004 Web-only
Skills of Adults and Continuing Education
507.10. Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003 Web-only
507.15. Average literacy and numeracy scale scores and percentage distribution of 25- to 65-year-olds, by proficiency level and selected characteristics: 2017 ..... 456
507.16. Percentage of 25- to 65-year-olds who were not assessed in the problem solving in technology-rich environments domain and average scale score and percentage distribution of those who were assessed, by proficiency level and selected characteristics: 2017
507.20. Participants in state-administered adult basic education, adult secondary education, and English as a second language programs, by type of program and state or jurisdiction: Selected fiscal years, 2000 through 2017
507.30. Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: 1995, 1999, and 2005 ..... 457
507.40. Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 ..... 460
507.50a. Number, percentage, and percentage distribution of persons 16 to 65 years old who have work credentials or have completed a work experience program, by selected characteristics: 2016 ..... Web-only
507.50b. Percentage and percentage distribution of those 16-to 65-year-olds who have work credentials or have completed a work experience program, by college degree attainment status and selected characteristics: 2016 Web-only
507.50c. Percentage distribution of persons 16 to 65 years old, by labor force and employment status and earnings, college degree attainment status, and work credential and work experience program status: 2016 ..... Web-only
Chapter 6. International Comparisons of Education Population, Enrollment, and Teachers
601.10. Population, school enrollment, and number of teachers, by major areas of the world and level of education: Selected years, 1980 through 2017 ..... 471
601.20. Selected population and enrollment statistics for countries with populations of at least 10 million in 2017, by continent and country: Selected years, 2000 through 2017 ..... Web-only
601.30. School-age populations as a percentage of total population, by age group and country: Selected years, 2005 through 2017 ..... Web-only
601.35. Percentage of 3- and 4-year-olds and 5- to 14-year-olds enrolled in school, by country: Selected years, 2000 through 2017 ..... 472
601.40. Percentage of 15 - to 29 -year-olds enrolled in school, by selected levels of education, age, and country: 2017 ..... 473
601.50. Pupil/teacher ratios in public and private elementary and secondary schools, by level of education and country: 2013 through 2017 ..... 474
601.60. Teachers' statutory teaching and total working time and average class size in public elementary and secondary schools, by level of education and country: 2017 and 2018 ..... Web-only
Achievement, Instruction, and School Environment
602.10. Average reading literacy scale scores of fourth-graders and percentage distribution, by international benchmark level and country or other education system: Selected years, 2001 through 2016 ..... 475
602.15. Average online reading literacy scale scores of fourth-graders and percentage distribution, by international benchmark level and country or other education system: 2016 ..... Web-only
602.20. Average fourth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2015 ..... 477
602.30. Average eighth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2015 ..... 478
602.32a. Average mathematics score and percentage of eighth-graders, by access to the Internet at home, access to a computer or tablet at home or other place outside of school, frequency of computer or tablet use for schoolwork outside of school, and country or other education system: 2015 ..... Web-only
602.32b. Average mathematics score and percentage of eighth-graders, by mathematics teachers' reports of student access to computers and frequency of computer use during mathematics lessons and country or other education system: 2015 ..... Web-only602.33a. Average science score and percentage of eighth-graders, by access to the Internetat home, access to a computer or tablet at home or other place outside of school,frequency of computer or tablet use for schoolwork outside of school, and country orother education system: 2015Web-only
602.33b. Average science score and percentage of eighth-graders, by science teachers' reports of student access to computers and frequency of computer use during science lessons and country or other education system: 2015 Web-only
602.35. Average advanced mathematics and physics scores of high school seniors who had taken advanced courses in these subjects, seniors who had taken such courses as a percentage of their age cohort, and instructional time in such courses, by country: 2015 ..... 479
602.40. Average reading literacy, mathematics literacy, and science literacy scores of 15-year- old students, by sex and country or other education system: Selected years, 2009 through 2018 ..... 480
602.45. Average reading literacy, mathematics literacy, and science literacy scores of 15-year- old students, by computer and internet access at home and country or other education system: 2018 Web-only
602.50. Average reading literacy scores of 15 -year-old students and percentage attaining reading literacy proficiency levels, by country or other education system: 2018 ..... 482
602.60. Average mathematics literacy scores of 15 -year-old students and percentage attaining mathematics literacy proficiency levels, by country or other education system: 2018 ..... 484
602.70. Average science literacy scores of 15 -year-old students and percentage attaining science literacy proficiency levels, by country or other education system: 2018 ..... 486
602.84. Percentage distribution of fourth- and eighth-graders, by frequency with which they reported being bullied during the school year and country or other education system: 2015 ..... Web-only
602.85. Percentage distribution of fourth- and eighth-graders, by extent to which their teachers rated the school as safe and orderly and country or other education system: 2015 ..... Web-only
602.86. Percentage distribution of fourth- and eighth-graders, by severity of school discipline problems reported by their principal and country or other education system: 2015 Web-only
602.90a. Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by student absenteeism or truancy and country: Selected years, 2000 through 2015 Web-only
602.90b. Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by students skipping classes and country: Selected years, 2000 through 2015 Web-only
602.90c. Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by student use of alcohol or illegal drugs and country: Selected years, 2000 through 2015 Web-only
602.90d. Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by students intimidating or bullying other students and country: Selected years, 2000 through 2015 Web-only
602.90e. Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by students lacking respect for teachers and country: Selected years, 2000 through 2015 ..... Web-only
602.93. Percentage of lower secondary teachers in public schools who reported being able to manage various aspects of student behavior "quite a bit" or "a lot," by country or other education system: 2018 ..... Web-only
Attainment, Degrees, and Outcomes
603.10. Percentage of the population 25 to 64 years old who completed high school, by age group and country: Selected years, 2000 through 2018 ..... 488
603.20. Percentage of the population 25 to 64 years old who attained any postsecondary degree, by age group and country: Selected years, 2000 through 2018 ..... 489
603.30. Percentage of the population 25 to 64 years old who attained a postsecondary degree, by highest degree attained, age group, and country: 2018 ..... 490
603.60. Percentage of postsecondary degrees awarded to women, by field of study and country: 2017 Web-only
603.70. Percentage of degrees at the bachelor's level and above awarded in science and mathematics, information technologies, and engineering, by field of study, level of degree, and country: 2017 Web-only
603.90. Employment to population ratios of 25- to 64-year-olds, by sex, highest level of educational attainment, and country: 2018 ..... 492
Skills of Adults
604.10. Average literacy and numeracy scale scores of 25- to 65-year-olds, by sex, age group, highest level of educational attainment, and country or other education system: 2012 . ..... 493
604.20. Percentage distribution of 25- to 65-year-olds, by literacy proficiency level, numeracy proficiency level, selected levels of educational attainment, and country or other education system: 2012 ..... 494
604.30. Employment rates and mean monthly earnings of 25- to 65-year-olds, by literacy proficiency level, numeracy proficiency level, and country or other education system: 2012 ..... 495
604.40. Percentage distribution of 16- to 19-year-olds, by frequency of using computers or the Internet to perform selected activities in everyday life and country or subnational region: 2012, 2014, and 2015 ..... Web-only
604.50. Percentage of 16- to 19-year-olds who were not assessed in the problem solving in technology-rich environments domain and percentage distribution of those who were assessed, by proficiency level, selected U.S. and international respondent characteristics, and country or subnational region: 2012, 2014, and 2015

## Finances

605.10. Gross domestic product per capita and expenditures on education institutions per full- time-equivalent (FTE) student, by level of education and country: Selected years, 2005 through 2016 ..... 496
605.20. Government and private expenditures on education institutions as a percentage of gross domestic product, by level of education and country: Selected years, 2005 through 2016 ..... 498
Chapter 7. Libraries and Use of Technology
Libraries
701.10. Selected statistics on public school libraries/media centers, by level of school: Selected years, 1999-2000 through 2011-12 ..... Web-only
701.15. Number and percentage of public schools with libraries/media centers and average number of staff per library/media center, by staff type and employment status and school level, enrollment size, and locale: 2015-16 ..... 504
701.20. Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2011-12 ..... Web-only
701.30. Selected statistics on public school libraries/media centers, by state: 2011-12 ..... Web-only
701.40. Collections, staff, and operating expenditures of degree-granting postsecondary institution libraries: Selected years, 1991-92 through 2016-17 ..... 505
701.50. Collections, staff, operating expenditures, public service hours, and reference services of the 60 largest college and university libraries: Fiscal year 2012 ..... Web-only
701.60. Number of public libraries, number of books and serial volumes, and per capita usage of selected library services per year, by state: Fiscal years 2015 and 2016 ..... 506

## Computer and Internet Use

702.10. Percentage of children ages 3 to 18 living in households with a computer, by type of computer and selected child and family characteristics: Selected years, 2010 through 2017
702.12. Percentage distribution of children ages 3 to 18, by whether they have home internet access, whether they have access through computer or only smartphone, and selected child and family characteristics: 2016 and 2018
Web-only
702.15. Percentage of children ages 3 to 18 who use the Internet from home, by selected child
and family characteristics: Selected years, 2010 through 2017 . . . . . . . . . . . . Web-only
702.20. Percentage of children ages 3 to 18 who use the Internet and, among those who use the Internet, percentage using it in various locations, by selected child and family characteristics: 2011 and 2017
Web-only
702.30. $\begin{aligned} & \text { Percentage of persons age } 3 \text { and over who use the Internet anywhere and who use the } \\ & \text { Internet at selected locations, by selected characteristics: } 2011 \text { and } 2017 \ldots \ldots . . . \text {.... } 508\end{aligned}$
702.35. Percentage of home internet users age 3 and over and ages 3 to 18 , by means of internet access from home and selected characteristics: 2010 and 2017
Web-only
702.40. Percentage of persons age 3 and over and ages 3 to 18 with no internet access at home and percentage distribution of those with no home access, by main reason for not having access and selected characteristics: 2010 and 2017
Web-only
702.60. Number and percentage of households with computer and internet access, by state: 2018 ........................................................................................ . . . Web-only

## READER'S GUIDE

## Data Sources

The data in this edition of the Digest of Education Statistics were obtained from many different sourcesincluding students and teachers, state education agencies, local elementary and secondary schools, and colleges and universities-using surveys and compilations of administrative records. Users should be cautious when comparing data from different sources. Differences in aspects such as procedures, timing, question phrasing, and interviewer training can affect the comparability of results across data sources.

Most of the tables present data from surveys conducted by the National Center for Education Statistics (NCES) or conducted by other agencies and organizations with support from NCES. Some tables also include other data published by federal and state agencies, private research organizations, or professional organizations. Totals reported in the Digest are for the 50 states and the District of Columbia unless otherwise noted. Brief descriptions of the surveys and other data sources used in this volume can be found in Appendix A: Guide to Sources. For each NCES and non-NCES data source, the Guide to Sources also provides information on where to obtain further details about that source.

Data are obtained primarily from two types of surveys: universe surveys and sample surveys. In universe surveys, information is collected from every member of the population. For example, in a survey regarding certain expenditures of public elementary and secondary schools, data would be obtained from each school district in the United States. When data from an entire population are available, estimates of the total population or a subpopulation are made by simply summing the units in the population or subpopulation. As a result, there is no sampling error, and observed differences are reported as true.

Since universe surveys are often expensive and time consuming, many surveys collect data from a sample of the population of interest (sample surveys). For example, the National Assessment of Educational Progress (NAEP) assesses a representative sample of students rather than the entire population of students. When a sample survey is used, statistical uncertainty is introduced, because the data come from only a portion of the entire population. This statistical uncertainty must be considered when reporting estimates and making comparisons. For information about how NCES accounts for statistical uncertainty when reporting sample survey results, see "Data Analysis and Interpretation," later in this Reader's Guide.

## Common Measures and Indexes

Various types of statistics derived from universe and sample surveys are reported. Many tables report the size of a population or a subpopulation, and often the size of a subpopulation is expressed as a percentage of the total population.

In addition, the average (or mean) value of some characteristic of the population or subpopulation may be reported. The average is obtained by summing the values for all members of the population and dividing the sum by the size of the population. An example is the average annual salary of full-time instructional faculty at degree-granting postsecondary institutions. Another measure that is sometimes used is the median. The median is the midpoint value of a characteristic at or above which 50 percent of the population is estimated to fall, and at or below which 50 percent of the population is estimated to fall. An example is the median annual earnings of young adults who are full-time yearround workers. Some tables also present an average per capita, or per person, which represents an average computed for every person in a specified group or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population. An example is the per capita expenditure on education in each state.

Many tables report financial data in dollar amounts. Unless otherwise noted, all financial data are in current dollars, meaning not adjusted for changes in the purchasing power of the dollar over time due to inflation. For example, 1996-97 teacher salaries in current dollars are the amounts that the teachers earned in 1996-97, without any adjustments to account for inflation. Constant dollar adjustments attempt to remove the effects of price changes (inflation) from statistical series reported in dollars. For example, if teacher salaries over a 20 -year period are adjusted to constant 2018-19 dollars, the salaries for all years are adjusted to the dollar values that presumably would exist if prices in each year were the same as in 2018-19 (in other words, as if the dollar had constant purchasing power over the entire period). Any changes in the constant dollar amounts would reflect only changes in real values. Constant dollar amounts are computed using price indexes. Price indexes for inflation adjustments can be found in web-only table 106.70. Each table that presents constant dollars includes a note indicating which index was used for the inflation adjustments; in most cases, the Consumer Price Index was used.

When presenting data for a time series, some tables include both actual and projected data. Actual data are data that have already been collected. Projected data can be used when data for a recent or future year are not yet available. Projections are estimates that are based on recent trends in relevant statistics and patterns associated with correlated variables. Unless otherwise noted, all data in this volume are actual.

## Standard Errors

Using estimates calculated from data based on a sample of the population requires consideration of several factors before the estimates can be interpreted. When using data from a sample, some margin of error will always be present in estimations of characteristics of the total population or subpopulation because the data are available from only a portion of the total population. Consequently, data from samples can provide only an approximation of the true or actual value. The margin of error of an estimate, or the range of potential true or actual values, depends on several factors such as the amount of variation in the responses, the size and representativeness of the sample, and the size of the subgroup for which the estimate is computed. The magnitude of this margin of error is measured by what statisticians call the standard error of an estimate.

When data from sample surveys are reported, the standard error is calculated for each estimate. In the tables, the standard error for each estimate generally appears in parentheses next to the estimate to which it applies. In order to caution the reader when interpreting findings, estimates from sample surveys are flagged with a "!" when the standard error is between 30 and 50 percent of the estimate and suppressed with a " $\ddagger$ " when the standard error is 50 percent of the estimate or greater. The term coefficient of variation $(\mathrm{CV})$ refers to the ratio of the standard error to the estimate; for example, if an estimate has a CV of 30 percent, this means that the standard error is equal to 30 percent of the value of the estimate.

## Nonsampling Errors

In addition to standard errors, which apply only to sample surveys, all surveys are subject to nonsampling errors. Nonsampling errors may arise when individual respondents or interviewers interpret questions differently; when respondents must estimate values, or when coders, keyers, and other processors handle answers differently; when people who should be included in the universe are not; or when people fail to respond, either totally or partially. Total nonresponse means that people do not respond to the survey at all, while partial nonresponse (or item nonresponse) means that people fail to respond to specific survey items. To compensate for nonresponse, adjustments are often made. For universe surveys, an adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often
a substitution of the "average" questionnaire response for the nonresponse. For universe surveys, imputations are usually made separately within various groups of sample members that have similar survey characteristics. For sample surveys, total nonresponse is handled through nonresponse adjustments to the sample weights. For sample surveys, imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent. For additional general information about imputations, see the NCES Statistical Standards (NCES 2014-097). Standard 4-1 provides information about imputation for item nonresponse. Appendix A: Guide to Sources includes some information about specific surveys' response rates, nonresponse adjustments, and other efforts to reduce nonsampling error. Although the magnitude of nonsampling error is frequently unknown, idiosyncrasies that have been identified are noted in the appropriate tables.

## Data Analysis and Interpretation

When estimates are from a sample, caution is warranted when drawing conclusions about one estimate in comparison to another or about whether a time series of estimates is increasing, decreasing, or staying the same. Although one estimate may appear to be larger than another, a statistical test may find that the apparent difference between them is not reliably measurable due to the uncertainty around the estimates. In this case, the estimates will be described as having "no measurable difference," meaning that the difference between them is not statistically significant.

Whether differences in means or percentages are statistically significant can be determined using the standard errors of the estimates. In reports produced by NCES, when differences are statistically significant, the probability that the difference occurred by chance is less than 5 percent, according to NCES standards.

Data presented in the text do not investigate more complex hypotheses, account for interrelationships among variables, or support causal inferences. We encourage readers who are interested in more complex questions and in-depth analysis to explore other NCES resources, including publications, online data tools, and public- and restricted-use datasets at https://nces.ed.gov.

In text that reports estimates based on samples, differences between estimates (including increases and decreases) are stated only when they are statistically significant. To determine whether differences reported are statistically significant, two-tailed $t$ tests at the .05 level are typically used. The $t$ test formula for determining statistical significance is adjusted when the samples being compared are dependent. The $t$ test formula is not adjusted for multiple comparisons, with the exception of statistical tests conducted using the NAEP Data Explorer (https://nces. ed.gov/nationsreportcard/data/). When the variables to be
tested are postulated to form a trend, the relationship may be tested using linear regression, logistic regression, or ANOVA trend analysis instead of a series of $t$ tests. These alternate methods of analysis test for specific relationships (e.g., linear, quadratic, or cubic) among variables. For more information on data analysis, please see the NCES Statistical Standards, Standard 5-1, available at https://nces.ed.gov/ statprog/2012/pdf/Chapter5.pdf.

A number of considerations influence the ultimate selection of the data years to include in the tables and to feature in the text. To make analyses as timely as possible, the latest year of available data is shown. The choice of comparison years is often also based on the need to show the earliest available survey year, as in the case of NAEP and the international assessment surveys. The text typically compares the most current year's data with those from the initial year and then with those from a more recent year. In the case of surveys with long time frames, such as surveys measuring enrollment, changes over the course of a decade may be noted in the text. Where applicable, the text may also note years in which the data begin to diverge from previous trends. In figures and tables, intervening years are selected in increments in order to show the general trend.

## Rounding and Other Considerations

All calculations are based on unrounded estimates. Therefore, the reader may find that a calculation, such as a difference or a percentage change, cited in the text or a figure may not be identical to the calculation obtained by using the rounded values shown in the accompanying tables. Although values reported in the tables are generally rounded to one decimal place (e.g., 76.5 percent), values reported in the text are generally rounded to whole numbers (with any value of 0.50 or above rounded to the next highest whole number). Due to rounding, cumulative percentages may sometimes equal 99 or 101 percent rather than 100 percent.

## Race and Ethnicity

The Office of Management and Budget (OMB) is responsible for the standards that govern the categories used to collect and present federal data on race and ethnicity. The OMB revised the guidelines on racial/ethnic categories used by the federal government in October 1997, with a January 2003 deadline for implementation. The revised standards require a minimum of these five categories for data on race: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and White. The standards also require the collection of data on the ethnicity categories Hispanic or Latino and Not Hispanic or Latino. It is important to note that Hispanic origin is an ethnicity rather than a race, and therefore persons of Hispanic origin may be of any race.

Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. The race categories White, Black, Asian, Native Hawaiian or Other Pacific Islander, and American Indian or Alaska Native exclude persons of Hispanic origin unless otherwise noted.

For a description of each racial/ethnic category, please see the "Racial/ethnic group" entry in Appendix B: Definitions. Some of the category labels are shortened for more concise presentation in text, tables, and figures. American Indian or Alaska Native is denoted as American Indian/ Alaska Native (except when separate estimates are available for American Indians alone or Alaska Natives alone); Black or African American is shortened to Black; and Hispanic or Latino is shortened to Hispanic. When discussed separately from Asian estimates, Native Hawaiian or Other Pacific Islander is shortened to Pacific Islander.

Many of the data sources used for this volume are federal surveys that collect data using the OMB standards for racial/ethnic classification described above; however, some sources have not fully adopted the standards, and some tables include historical data collected prior to the adoption of the OMB standards. Asians and Pacific Islanders are combined into a single category for years in which the data were not collected separately for the two groups. The combined category can sometimes mask significant differences between the two subgroups. For example, prior to 2011, NAEP collected data that did not allow for separate reporting of estimates for Asians and Pacific Islanders. The population counts presented in table 101.20, based on the U.S. Census Bureau's Current Population Reports, indicate that 96 percent of all Asian/Pacific Islander 5- to 17 -yearolds were Asian in 2010. Thus, the combined category for Asians/Pacific Islanders is more representative of Asians than of Pacific Islanders.

Some surveys give respondents the option of selecting more than one race category, an "other" race category, or a "Two or more races" or "more than one race" category. Where possible, tables present data on the "Two or more races" category; however, in some cases this category may not be separately shown because the information was not collected or due to other data issues. Some tables include the "other" category. Any comparisons made between persons of one racial/ethnic group and persons of "all other racial/ethnic groups" include only the racial/ethnic groups shown in the reference table. In some surveys, respondents are not given the option to select more than one race category and also are not given an option such as "other" or "more than one race." In these surveys, respondents of Two or more races must select a single race category. Any comparisons between data from surveys that give the option to select more than one race and surveys that do not offer such an option should take into account the fact that there is a potential for bias if members of one racial group are more likely than members of the others to identify themselves as
"Two or more races." ${ }^{1}$ For postsecondary data, foreign students are counted separately and are therefore not included in any racial/ethnic category.

In addition to the major racial/ethnic categories, several tables include Hispanic ancestry subgroups (such as Mexican, Puerto Rican, Cuban, Dominican, Salvadoran, Other Central American, and South American) and Asian ancestry subgroups (such as Asian Indian, Chinese, Filipino, Japanese, Korean, and Vietnamese). In addition, selected tables include "Two or more races" subgroups (such as White and Black, White and Asian, and White and American Indian/Alaska Native).

## Limitations of the Data

Due to large standard errors, some differences that seem substantial are not statistically significant and, therefore, are not cited in the text. This situation often applies to estimates involving American Indians/Alaska Natives and Pacific Islanders. The relatively small sizes of these populations pose many measurement difficulties when conducting statistical analysis. Even in larger surveys, the numbers of American Indians/Alaska Natives and Pacific Islanders included in a sample are often small. Researchers studying
${ }^{1}$ For discussion of such bias in responses to the 2000 Census, see Parker, J., et al. (2004). Bridging Between Two Standards for Collecting Information on Race and Ethnicity: An Application to Census 2000 and Vital Rates. Public Health Reports, 119(2): 192-205. Available at https:// www.ncbi.nlm.nih.gov/pmc/articles/PMC1497618/.
data on these two populations often face small sample sizes that increase the size of standard errors and reduce the reliability of results. Readers should keep these limitations in mind when comparing estimates presented in the tables.

As mentioned, caution should be exercised when comparing data from different sources. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, and data processing and coding mean that results from different sources may not be strictly comparable. For example, the racial/ethnic categories presented to a respondent, and the way in which the question is asked, can influence the response, especially for individuals who consider themselves of more than one race or ethnicity. In addition, data on American Indians/Alaska Natives are often subject to inaccuracies that can result from respondents self-identifying their race/ethnicity. Research on the collection of race/ethnicity data suggests that the categorization of American Indian and Alaska Native is the least stable self-identification (for example, the same individual may identify as American Indian when responding to one survey but may not do so on a subsequent survey). ${ }^{2}$

[^0]
## INTRODUCTION

The Introduction provides a brief overview of current trends in American education, highlighting key data that are presented in more detail later in this volume. Topics outlined include the participation of students, teachers, and faculty in U.S. educational institutions; the performance of U.S. elementary/secondary students overall and in comparison to students in other countries; the numbers of high school graduates and postsecondary degrees; and the amounts of expenditures on education at the elementary/ secondary and postsecondary levels. Data on enrollments, teachers, and faculty are for fall of the given year.

In fall 2019, about 76.1 million people were enrolled in American schools and colleges (table 105.10). About 4.7 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.7 million FTE employees. All data for 2019 in this Introduction are projected, except for data on student performance and educational attainment. Some data for other years are projected or estimated as noted. All projections were estimated prior to the coronavirus pandemic. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

## Elementary/Secondary Education

## Enrollment

Overall, public school enrollment rose 28 percent, from 39.4 million to 50.6 million, between 1985 and 2019. This reflects a pattern of annual increases in total public elementary and secondary school enrollment, which began in 1985, but stalled at 49.3 million between 2006 and 2008, before beginning to increase again (table 105.30). Private school enrollment fluctuated during this period, with the fall 2019 enrollment of 5.7 million being 3 percent higher than the fall 1985 enrollment of 5.6 million. About 10 percent of elementary and secondary school students were enrolled in private schools in 2019, reflecting a decrease from 12 percent in 1985.

In public schools between 1985 and 2019, there was a 31 percent increase in elementary enrollment (prekindergarten through grade 8), compared with a 23 percent increase in secondary enrollment (grades 9 through 12;
table 105.30). Part of the higher growth in public elementary school enrollment resulted from the expansion of prekindergarten enrollment. Between 1985 and 2019, enrollment in prekindergarten increased 880 percent, while enrollment in other elementary grades (including kindergarten through grade 8 and ungraded elementary programs) increased 26 percent (table 203.10). The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.5 million in 2019 , and the number enrolled in other elementary grades increased from 26.9 million to 33.9 million. Public secondary school enrollment declined 8 percent from 1985 to 1990 but then increased 33 percent from 1990 to 2007. Over the most recent 10-year period (between 2009 and 2019), public school enrollment rose 3 percent. Elementary school enrollment increased 3 percent between 2009 and 2019, while secondary school enrollment increased 2 percent.

Since the enrollment rates of 5- and 6-year-olds (typical ages for preprimary grades) and 7 - to 13-year-olds (typical ages for elementary grades) decreased by fewer than 5 percentage points from 1985 to 2018 and the enrollment rate for 14- to 17-year-olds (typical ages for secondary grades) in 2018 was not measurably different from the rate in 1985, overall increases in public school enrollment primarily reflect increases in the number of children in these age groups (tables 101.10 and 103.20). For example, the enrollment rate of 7 - to 13 -year-olds decreased from 99 to 98 percent between 1985 and 2018, but the number of 7 - to 13 -year-olds increased 26 percent. Similarly, increases in public secondary school enrollment are more reflective of the 12 percent increase in the 14- to 17-year-old population between 1985 and 2018 than of the enrollment rates for these years, which were not measurably different (about 95 percent for both years). Increases in the enrollment rate of prekindergarten-age children (ages 3 and 4), from 39 percent in 1985 to 54 percent in 2018 , and in the number of 3- and 4-year-olds, from 7.1 million to 8.1 million, also contributed to overall increases in prekindergarten through grade 12 enrollment.

Before the coronavirus pandemic, the National Center for Education Statistics (NCES) projected near record levels of total public elementary and secondary school enrollment from 2019 ( 50.6 million) through 2029 ( 51.1 million; table 105.30). Public elementary school enrollment was projected to increase 2 percent between 2019 and 2029, while public secondary school enrollment was projected to be about 1 percent lower in 2029 than in
2019. Overall, total public school enrollment was projected to increase 1 percent between 2019 and 2029. However, as the impact of the coronavirus pandemic remains unknown, these projections are subject to revision.

## Teachers

A projected 3.7 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2019, which was less than 1 percent higher than the number of FTE teachers in fall 2009 (table 105.40). Of these 3.7 million FTE elementary and secondary school teachers in 2019, about 3.2 million taught in public schools and 0.5 million taught in private schools.

Public school enrollment was 3 percent higher in 2019 than in 2009, while the number of public school teachers was 1 percent lower (table 208.20). The number of public school pupils per teacher was higher in 2019 (15.9) than in 2009 (15.4).

The average salary for public school teachers in 2018-19 was $\$ 61,730$ (table 211.50). In constant (i.e., inflationadjusted) dollars, the average teacher salary was 1 percent lower in 2018-19 than in 1990-91.

## Student Performance

## National Comparisons

Much of the student performance data in the Digest are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in subjects including reading, mathematics, science, and writing, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the Digest, while the information in this Introduction includes only selected results from the national main NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the Digest) are based on statistical testing of unrounded values.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4,8 , and 12 . The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

## NAEP Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500 . For 4th-grade students, the average reading score in 2019 (220) was lower than the score in 2017 (222) but was higher than the 1992 score (217; table 221.10). This pattern held for certain racial/ethnic groups (White and Black students), but not for others (Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students). Specifically, at grade 4, the 2019 reading scores for White (230) and Black (204) students were lower than the corresponding scores in 2017 (232 and 206, respectively), but higher than in 1992 (224 and 192, respectively). In contrast, the 4th-grade reading scores for Hispanic (209) and Asian/Pacific Islander (237) students were not measurably different in 2019 than in 2017, but the scores for both groups were higher in 2019 than in 1992 (197 and 216, respectively). For American Indian/Alaska Native students, the average 4th-grade reading score in 2019 (204) was not measurably different from the scores in either 2017 or 1994 (1994 was the first year data were available for 4th-grade American Indian/Alaska Native students).

From 1992 through 2019, the average reading scores for White 4th-graders were higher than those for their Black and Hispanic peers. Although the White-Black achievement gap did not change measurably from 2017 to 2019, the achievement gap narrowed from 32 points in 1992 to 27 points in 2019. The White-Hispanic achievement gap in 2019 (21 points) was smaller than the achievement gap in 2017 (23 points), but it was not measurably different from the achievement gap in 1992.

At grade 8, the average reading score in 2019 (263) was lower than the score in 2017 (267), but it was higher than the score in 1992 (260). The reading scores for White (272), Black (244), and Hispanic (252) 8th-grade students in 2019 were lower than the corresponding scores in 2017 (275, 249 , and 255 , respectively), but the score for each group was higher in 2019 than in 1992 ( 267,237 , and 241, respectively). The reading score for 8th-grade Asian/Pacific Islander students in 2019 (281) was not measurably different from the score in 2017, but it was higher than the score in 1992 (268). The reading score for 8th-grade American Indian/Alaska Native students in 2019 (248) was lower than the score in 2017 (253), but it was not measurably different from the score in 1994 (1994 was the first year data were available for 8th-grade American Indian/Alaska Native students).

From 1992 through 2019, the average reading score for White 8th-graders was higher than the scores for their Black and Hispanic peers. The White-Black achievement gap in 2019 (28 points) was larger than the White-Black achievement gap in 2017 ( 25 points), but it was not measurably different from the achievement gap in 1992. Although the White-Hispanic achievement gap at grade 8 did not change measurably from 2017 to 2019, the achievement gap narrowed from 26 points in 1992 to 20 points in 2019.

For 12th-grade students, the most recent scores available are from 2015. The average reading score for 12th-grade students in 2015 (287) was not measurably different from the score in 2013, but it was lower than the score in 1992 (292). At grade 12, the reading scores in 2015 for White (295), Hispanic (276), and Asian/Pacific Islander (297) students were not measurably different from the scores in 2013 and 1992. For Black students, the 2015 reading score (266) was lower than the 1992 score (273), but it was not measurably different from the 2013 score. The reading score for American Indian/Alaska Native students in 2015 (279) was not measurably different from the scores in 2013 and 1994 (1994 was the first year data were available for 12th-grade American Indian/Alaska Native students).

The White-Black achievement gap for 12th-grade students was larger in 2015 ( 30 points) than in 1992 (24 points), while the White-Hispanic achievement gap in 2015 (20 points) was not measurably different from the achievement gap in any previous assessment year.

## NAEP Mathematics

The main NAEP mathematics assessment data for 4thand 8th-graders are reported on a scale of 0 to 500 . The average mathematics score for 4th-grade students in 2019 (241) was higher than the scores in both 2017 (240) and 1990 (213; table 222.10). At grade 4, the average mathematics scores in 2019 for Asian/Pacific Islander (260), White (249), and Black (224) students were not measurably different from the corresponding scores in 2017, but the mathematics score for each group was higher in 2019 than in 1990 ( 225,220 , and 188 , respectively). The 2019 mathematics score for 4th-grade Hispanic students (231) was higher than the scores in both 2017 (229) and 1990 (200). The 2019 mathematics score for 4th-grade American Indian/Alaska Native students (227) was not measurably different from the scores in 2017 and 1996 (1996 was the first year data were available for 4th-grade American Indian/Alaska Native students).

In 2019 and in all assessment years since 1990, the average mathematics scores for White students in grade 4 have been higher than those of their Black and Hispanic peers. Although the White-Black and White-Hispanic achievement gaps at grade 4 did not change measurably from 2017 to 2019, the White-Black achievement gap narrowed from 32 points in 1990 to 25 points in 2019. The 4th-grade White-Hispanic achievement gap in 2019 (18 points) was not measurably different from the gap in 1990.

For 8th-grade students, the average mathematics score in 2019 (282) was lower than the score in 2017 (283), but it was higher than the score in 1990 (263). At grade 8, the mathematics scores for Asian/Pacific Islander (310), White (292), Hispanic (268), and Black (260) students in 2019 were not measurably different from the corresponding scores in 2017, but the score for each group was higher in 2019 than in 1990 ( $275,270,246$, and 237, respectively). The mathematics score for 8th-grade American Indian/ Alaska Native students in 2019 (262) was lower than the
score in 2017 (267), but it was not measurably different from the score in 2000 ( 2000 was the first year data were available for 8th-grade American Indian/Alaska Native students).

In 2019 and in all assessment years since 1990, the average mathematics scores for White students in grade 8 have been higher than the scores for their Black and Hispanic peers. At grade 8, the White-Black (32 points) and White-Hispanic ( 24 points) achievement gaps in 2019 were not measurably different from the corresponding gaps in 2017 and 1990.

For 12th-grade students, the average mathematics score in 2015 (152) was lower than the score in 2013 (153), but it was not measurably different from the score in 2005, the earliest year with comparable data. At grade 12, the mathematics scores for Asian/Pacific Islander (170), White (160), Hispanic (139), and Black (130) students in 2015 were not measurably different from the scores in 2013, but the score for each group was higher in 2015 than in 2005 ( $163,157,133$, and 127 , respectively). The mathematics score for American Indian/Alaska Native students in 2015 (138) was not measurably different from the scores in 2013 and 2005.

In 2015, the mathematics score for White 12th-grade students was 30 points higher than the score for their Black peers and 22 points higher than the score for their Hispanic peers. The White-Black and White-Hispanic gaps in 2015 were not measurably different from the corresponding gaps in 2005 and 2013.

## NAEP Science

NAEP has assessed the science abilities of students in grades 4,8 , and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. Scores are based on a scale ranging from 0 to 300 (table 223.10). In 2015, the average 4th-grade science score (154) was higher than the score in 2009 (150). The 8th-grade science score in 2015 (154) was higher than the scores in 2009 (150) and in 2011 (152). The 12th-grade science score in 2015 (150) was not measurably different from the score in 2009.

While the scores for White 4th- and 8th-grade students remained higher than those for their Black and Hispanic peers in 2015, racial/ethnic achievement gaps in 2015 were smaller than in 2009. For example, at grade 4, the WhiteBlack achievement gap was 36 points in 2009 and 33 points in 2015, and the White-Hispanic achievement gap was 32 points in 2009 and 27 points in 2015. For 12th-grade students, in contrast, science scores for White students remained higher than those for their Black and Hispanic peers in 2015, and these racial/ethnic achievement gaps were not measurably different from 2009. In addition, the 5-point gender gap, which favored male 12th-graders, in 2015 was not measurably different from the gap in 2009.

## International Comparisons

## Trends in International Mathematics and Science Study (TIMSS)

The 2015 Trends in International Mathematics and Science Study (TIMSS) assessed students' mathematics and science performance at grades 4 and 8 . Mathematics performance was assessed in 43 countries at grade 4 and in 34 countries at grade 8 . Science performance was assessed in 42 countries at grade 4 and in 34 countries at grade 8. In addition, TIMSS Advanced data were collected by 9 countries from students in their final year of secondary school (grade 12 in the United States). At grades 4 and 8, several subnational entities also participated in TIMSS as separate education systems (e.g., Hong Kong, the U.S. state of Florida, England and Northern Ireland within the United Kingdom). However, the following paragraphs include results only from countries, not from subnational entities. At all three grades, TIMSS scores are reported on a scale of 0 to 1,000 , with a fixed scale centerpoint of 500 . The scale centerpoint represents the mean of the overall achievement distribution in 1995. The TIMSS scale is the same in each administration; thus, a value of 500 in 2015 equals 500 in 1995.

In 2015, the average mathematics scores of U.S. 4th-graders (539) and 8th-graders (518) were higher than the TIMSS centerpoint of 500 (tables 602.20 and 602.30). At grade 4, the average U.S. mathematics score was higher than the average score in 30 of the 42 other countries participating, lower than the average score in 6 countries, and not measurably different from the average score in the remaining 6 countries (table 602.20). The 6 countries that outperformed the United States in 4th-grade mathematics were Ireland, Japan, the Republic of Korea, Norway, the Russian Federation, and Singapore. At grade 8, the average U.S. mathematics score was higher than the average score in 21 of the 33 other participating countries, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 7 countries (table 602.30). The 5 countries that outperformed the United States in eighth-grade mathematics were Canada, Japan, the Republic of Korea, the Russian Federation, and Singapore.

In science, the average scores of both U.S. 4th-graders (546) and U.S. 8th-graders (530) were higher than the TIMSS scale centerpoint of 500 in 2015 (tables 602.20 and 602.30). The average U.S. fourth-grade science score was higher than the average score in 30 of the 41 other countries participating in the science assessment at grade 4 , lower than the average score in 5 countries, and not measurably different from the average score in the remaining 6 countries (table 602.20). The 5 countries that outperformed the United States in 4th-grade science were Finland, Japan, the Republic of Korea, the Russian Federation, and Singapore. At grade 8, the average U.S. science score was higher than
the average score in 23 of the 33 other participating countries in 2015, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 5 countries (table 602.30). The 5 countries that outperformed the United States in 8th-grade science were Japan, the Republic of Korea, the Russian Federation, Singapore, and Slovenia.

The TIMSS Advanced assessment measures the advanced mathematics and physics achievement of students in their final year of secondary school who are taking or have taken advanced courses in those two subjects (table 602.35). On TIMSS Advanced, the U.S. average advanced mathematics score (485) and physics score (437) in 2015 were lower than the TIMSS Advanced scale centerpoint of 500. However, the U.S. average scores in advanced mathematics and physics were not measurably different from the U.S. average scores in those subjects in 1995. No education systems had higher average advanced mathematics or physics scores in 2015 than in 1995, but three education systems (France, Italy, and Sweden) had lower average scores in advanced mathematics and four (France, Norway, Russian Federation, and Sweden) had lower average physics scores.

## Program for International Student Assessment (PISA)

The Program for International Student Assessment (PISA) assesses 15 -year-old students' application of reading, mathematics, and science literacy to problems within a real-life context. In 2018, PISA assessed students in all 37 Organization for Economic Cooperation and Development (OECD) countries as well as more than 40 other education systems. While data on mathematics literacy and science literacy were reported for all OECD countries, data on reading literacy were reported for only 36 countries due to data quality concerns. PISA scores are reported on a scale of 0 to 1,000 .

On the 2018 PISA assessment, U.S. 15-year-olds' average score in reading literacy was 505 , which was higher than the OECD average score of 487 (table 602.50). The average reading literacy score in the United States was lower than the average score in 4 other OECD countries, higher than the average score in 21 OECD countries, and not measurably different from the average score in 10 OECD countries. In all participating education systems, females outperformed males in reading literacy (table 602.40). The U.S. gender gap in reading (24 points) was not measurably different from the OECD average gap but was smaller than the gaps in 12 other OECD countries, larger than the gaps in 2 OECD countries, and not measurably different from the gaps in 21 other OECD countries.

In mathematics literacy, U.S. 15-year-olds' average score of 478 on the 2018 PISA assessment was lower than the OECD average score of 489 (table 602.60). The average mathematics literacy score in the United States was lower than the average score in 24 other OECD countries, higher
than the average score in 6 OECD countries, and not measurably different from the average score in 6 OECD countries. In 21 OECD countries, including the United States, males outperformed females in mathematics literacy; in 3 countries, females outperformed males in mathematics (table 602.40).

In science literacy, U.S. 15-year-olds' average score of 502 on the 2018 PISA assessment was higher than the OECD average score of 489 (table 602.70). The average science literacy score in the United States was lower than the average score in 6 other OECD countries, higher than the average score in 19 OECD countries, and not measurably different from the average score in 11 OECD countries. On average across OECD countries, females outperformed male students in science by 2 points. There was no measurable difference in the average science literacy scores for males and females in 22 OECD countries, including the United States. In 13 OECD countries, females outperformed males in science literacy; in 2 countries, males outperformed females in science literacy.

Progress in International Reading Literacy Study (PIRLS)
The Progress in International Reading Literacy Study (PIRLS) measures the reading knowledge and skills of 4th-graders over time. PIRLS scores are reported on a scale from 0 to 1,000 , with the scale centerpoint set at 500 . On the 2016 PIRLS, U.S. 4th-graders had an average reading literacy score of 549 (table 602.10). The U.S. average score in 2016 was 7 points lower than in 2011 but 10 points higher than in 2006. In all 4 assessment years, the U.S. average score was higher than the PIRLS scale centerpoint. The average reading literacy score of 4th-graders in the United States was higher than the average score in 24 of the 42 other countries participating in 2016, lower than the average score in 7 countries, and not measurably different from the average score in the remaining 11 countries.

## High School Graduates and Dropouts

About 3,663,000 high school students were projected to graduate during the 2020-21 school year (based on prepandemic data), including 3,302,000 public school graduates and 360,000 private school graduates (table 219.10). High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2020-21 projection of high school graduates is slightly lower than the prior record-high projection of $3,674,000$ graduates in 2018-19, but it exceeds the baby boom era's high point in 1975-76, when $3,142,000$ students earned diplomas. In 2017-18, about 85 percent of public high school students graduated with a regular diploma within 4 years of first starting 9th grade, which reflects an increase since 2010-11 (79 percent; table 219.46). This rate is known as the 4 -year adjusted cohort graduation rate (ACGR).

The status dropout rate has decreased since 2000. The status dropout rate is the percentage of the civilian noninstitutionalized 16 - to 24 -year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 2000 and 2018, the status dropout rate declined from 10.9 to 5.7 percent (table 219.70). During this period, the status dropout rate for Black 16- to 24 -year-olds declined from 13.1 to 5.8 percent, and the rate for Hispanic 16- to 24 -yearolds declined from 27.8 to 9.0 percent. In 2018, the status dropout rate for White 16- to 24 -year-olds ( 4.5 percent) was lower than the rate for Hispanic 16- to 24 -year-olds, but it was not measurably different from the rate for Black 16- to 24-year-olds.

## Postsecondary Education

## Enrollment in Degree-Granting Institutions

College enrollment was 19.6 million in fall 2018, reflecting a 7 percent decrease from the record enrollment of 21.0 million in fall 2010 (table 105.30). College enrollment is expected to remain below the 2010 record through fall 2029, the last year for which NCES enrollment projections have been developed. Based on these pre-pandemic projections, enrollment is expected to increase 2 percent between fall 2018 and fall 2029.

Despite decreases in the size of the traditional college-age population (18 to 24 years old) during the late 1980s and early 1990s, total enrollment increased during this period (tables 101.10 and 105.30). The traditional college-age population was 1 percent higher in 2018 than in 2008, and total college enrollment was 3 percent higher in 2018 than in 2008. The number of full-time students was 2 percent higher in 2018 than in 2008, while the number of part-time students was 4 percent higher (table 303.10). Postsecondary enrollment was 3 percent higher in 2018 than in 2008 for both male and female students.

## Faculty

In fall 2018, degree-granting institutions-defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid programs-employed 1.5 million faculty members, including 0.8 million full-time and 0.7 million part-time faculty (table 314.30). In addition, degree-granting institutions employed 0.4 million graduate assistants.

## Degrees

During the 2019-20 academic year, postsecondary degrees conferred were projected to number 981,000 associate's degrees, $1,996,000$ bachelor's degrees, 832,000 master's degrees, and 186,000 doctor's degrees (table 318.10). The doctor's degree total includes most degrees that were classified as first-professional prior to 2010-11, such as M.D.'s, D.D.S.'s, and law degrees. Between 2007-08 and 2017-18 (the last year of actual data), the number of degrees conferred increased at all levels. Between 2007-08 and 2017-18, the number of associate's degrees increased 35 percent, the number of bachelor's degrees increased 27 percent, the number of master's degrees increased 30 percent, and the number of doctor's degrees increased 23 percent.

Between 2007-08 and 2017-18, the number of bachelor's degrees awarded to male students increased 26 percent, while the number of bachelor's degrees awarded to female students increased 27 percent (table 318.10). Female students earned 57 percent of all bachelor's degrees in 2017-18, which was the same as the percentage in 2007-08. Between 2007-08 and 2017-18, the number of bachelor's degrees awarded to White students increased 6 percent, which was smaller than the increases for Black students (28 percent), Hispanic students (118 percent), and Asian/ Pacific Islander students ( 38 percent; table 322.20). The number of bachelor's degrees awarded to American Indian/ Alaska Native students decreased 20 percent during this period. In 2017-18, White students earned 63 percent of all bachelor's degrees (compared with 74 percent in 2007-08), Black students earned 10 percent (the same percentage as 2007-08), Hispanic students earned 14 percent (compared with 8 percent in 2007-08), and Asian/Pacific Islander students earned 8 percent (compared with 7 percent in 2007-08). American Indian/Alaska Native students earned less than 1 percent of all bachelor's degrees in both years. In 2017-18, students of Two or more races earned 4 percent of all bachelor's degrees.

## Undergraduate Prices

For the 2018-19 academic year, average annual prices for undergraduate tuition, fees, room, and board were estimated to be $\$ 18,383$ at public institutions, $\$ 47,419$ at
private nonprofit institutions, and $\$ 27,040$ at private for-profit institutions (table 330.10). Between 2008-09 and 2018-19, prices for undergraduate tuition, fees, room, and board at public institutions rose 28 percent, and prices at private nonprofit institutions rose 19 percent, after adjustment for inflation. The average price for total tuition, fees, room, and board at private for-profit institutions was 6 percent lower in 2018-19 than in 2008-09.

## Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 2009 and 2019, the percentage of the adult population age 25 and over who had completed at least high school (or an equivalency program) rose from 87 to 90 percent, and the percentage of adults with a bachelor's or higher degree increased from 30 to 36 percent (table 104.10). Among 25 - to 29-year-olds, the percentage who had completed at least high school increased from 89 to 94 percent between 2009 and 2019, and the percentage who had completed a bachelor's or higher degree increased from 31 percent to 39 percent (table 104.20). During this same period, the percentage of 25- to 29-year-olds who had completed a master's or higher degree increased from 7 to 9 percent.

Among employed adults age 25 and over 42 percent had a bachelor's or higher degree in 2019, and about half (53 percent) had an associate's or higher degree (table 502.10).

## Education Expenditures

U.S. expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), were an estimated $\$ 1.5$ trillion for 2018-19 (table 106.10). Expenditures of elementary and secondary schools totaled an estimated $\$ 832$ billion, while those of degree-granting postsecondary institutions totaled an estimated $\$ 620$ billion. Total expenditures for education were an estimated 7.1 percent of the gross domestic product (GDP) in 2018-19. Education spending as a percentage of GDP peaked at 7.6 percent in 2009-10 but declined between 2009-10 and 2014-15 (7.1 percent).

## CHAPTER 1

## All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American education system. Tables summarize the total number of people enrolled in school, the number of teachers, the number of schools, and the total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as school-age resident populations, characteristics of households with children, and educational attainment. Economic indicators and price indexes have been added to facilitate analyses.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## The U.S. System of Education

The U.S. system of education can be described generally as having three levels of formal education: elementary, secondary, and postsecondary (figure 1). However, these levels can be defined quite differently across school districts. For example, students may spend 1 to 3 years in preprimary programs (prekindergarten [PK] and kindergarten [K]), which may be offered either in separate schools or in elementary schools that also offer higher grades. (For simplicity, in Digest of Education Statistics tables, prekindergarten and kindergarten are generally defined as a part of elementary education, although preprimary schooling is not universally included in the elementary level.) Following kindergarten, students ordinarily spend 6 to 8 years in elementary school. The elementary school program is followed by a 4- to 6-year program in secondary school. Students typically complete the entire program of elementary and secondary schooling by age 18 . This formal schooling is provided in a range of institutional settings-including elementary schools (preprimary schools, primary schools, middle schools, and other types of schools offering broader ranges of elementary grades); secondary schools (junior high schools, high schools, and senior high schools); and combined (multi-age, ungraded, and elementary/secondary schools)-that vary in structure from locality to locality.

High school graduates who decide to continue their education may enter a specialized career/technical institution,
a 2-year community or junior college, or a 4-year college or university. A 2-year college typically offers the first 2 years of a standard 4 -year college curriculum, awarding an associate's degree upon completion of at least 2 years of postsecondary coursework, as well as a selection of terminal career and technical education programs. Academic courses completed at a 2 -year college are usually transferable for credit at a 4-year college or university. A career/technical institution offers postsecondary technical training programs of varying lengths that lead to a specific career.

A 4-year college or university offers at least a bachelor's degree, which typically requires 4 years of postsecondary coursework, and some offer master's or doctor's degrees. At least 1 year of coursework beyond a bachelor's degree is necessary for a master's degree, while a doctor's degree (which comprises a wide variety of degrees, including doctor of medicine [M.D.], juris doctor [J.D.], and doctor of philosophy [Ph.D.]) usually requires a minimum of 3 or 4 years beyond a bachelor's degree.

Professional schools are pathways to licensed or ordained professions, such as dentistry, law, or ministry. They differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4 -year program at a professional medical school. Law programs typically involve 3 years of coursework beyond a bachelor's degree. Depending on the length of the program and the degree awarded, degrees from professional schools are categorized as either master's or doctor's degrees.

## Enrollment: From Preprimary to Postsecondary

Total enrollment in public and private elementary and secondary schools (prekindergarten through grade 12) grew rapidly during the 1950s and 1960s, reaching a peak year in 1971 (table A, table 105.30, and figure 2). This growth in enrollment reflected what is known as the "baby boom," a dramatic increase in births following World War II. Between 1971 and 1984, total elementary and secondary school enrollment decreased every year, reflecting a decline in the size of the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and continued to reach new record levels every year through 2006. After
declining 1 percent between 2006 and 2011, enrollments in 2019 are projected to have increased 3 percent over 2011 levels. Enrollments since fall 2013 have remained above the fall 2006 enrollment of 55.3 million, the final year of the post "baby boom" record highs. Before the coronavirus pandemic, national changes in school enrollment were projected to remain relatively small through 2029, with annual percentage changes of less than 0.4 percent. However, as the impact of the coronavirus pandemic remains unknown, these projections are subject to revision.

## Table A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949-50 through fall 2029

| Trend and year | Number of <br> students <br> (in millions) |
| :--- | ---: |
| "Baby boom" increases |  |
| 1949-50 school year | 28.5 |
| Fall 1959 | 40.9 |
| Fall 1969 (peak) | 51.1 |
| Fall 1971 |  |
| 13 years with annual post "baby boom" declines | 51.3 |
| Fall 1972 (first year of decline) | 50.7 |
| Fall 1984 (final year of decline) | 44.9 |
| Annual increases from 1985 to 2006 |  |
| Fall 1985 | 45.0 |
| Fall 1996 (surpasses "baby boom" peak) | 51.5 |
| Fall 2006 (final year of post "baby boom" record highs) | 55.3 |
| Slight declines or stable enrollment |  |
| Fall 2007 | 55.2 |
| Fall 2010 | 54.9 |
| Fall 2011 | 54.8 |
| Annual increases with new record highs |  |
| Fall 2013 | 55.4 |
| Fall 2014 | 55.9 |
| Fall 2015 | 56.2 |
| Fall 2017 | 56.4 |
| Fall 2018 (projected) | 56.4 |
| Fall 2019 (projected) | 56.3 |
| Fall 2029 (projected) | $56.8^{\star}$ |

*Subject to revision once the impact of the coronavirus pandemic becomes known.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States, 1949-50; Statistics of Public Elementary and Secondary School Systems, 1959 through 1972; Common Core of Data (CCD), 1984 through 2017; Private School Universe Survey (PSS), 1997-98 through 2017-18; and National Elementary and Secondary Enrollment Projection Model, 1972 through 2029.

Between 1985 and 2018, the total public and private elementary and secondary school enrollment rate decreased for 5- and 6-year-olds (typical ages for preprimary grades) from 96 to 94 percent, and for 7- to 13-year-olds (typical ages for elementary grades) from 99 to 98 percent (table 103.20). In contrast, the enrollment rate for 14 - to 17-year-olds (typical ages for secondary grades) in 2018 (95 percent) was not measurably different from the rate in 1985. As there were no measurable increases in enrollment rates between 1985 and 2018, increases in the total number of enrolled elementary and secondary students primarily reflect the increases in the number of children in these age groups. Between 1985 and 2018, the number of 5- and 6 -year-olds increased by 16 percent, the number of 7 - to 13 -year-olds increased by 26 percent, and the number of 14- to 17 -year-olds increased by 12 percent (table 101.10). Increases in the enrollment rate of prekindergarten-age children (ages 3 and 4), from 39 percent in 1985 to

54 percent in 2018, and in the number of 3 - and 4 -year-olds, from 7.1 million to 8.1 million, also contributed to overall increases in prekindergarten through grade 12 enrollment (tables 101.10 and 103.20).

The vast majority of elementary and secondary students in the United States attend public schools. Considering only these students, enrollment at the elementary level (prekindergarten through grade 8) rose from 29.9 million in fall 1990 to 34.2 million in fall 2003 (table 105.30). Public elementary school enrollment was lower in fall 2004 than in fall 2003 (by less than 1 percent) and then generally increased to a projected total of 35.4 million for fall 2019. From 2019 to 2029, public elementary school enrollment has been projected to increase 2 percent. At the secondary level (grades 9 through 12), public school enrollment rose from 11.3 million in 1990 to 15.1 million in 2007. After a decline of 2 percent to 14.7 million in 2011, public secondary enrollments are projected to have increased 3 percent by 2019.

The percentage of students opting out of public schools in favor of private elementary and secondary schools was lower in 2017 ( 10.1 percent) than in 2007 ( 10.7 percent; table 105.30). In fall 2019 , an estimated 5.7 million students were enrolled in private schools at the elementary and secondary levels, or 10.1 percent of students.

At the postsecondary level, total enrollment in public and private degree-granting institutions increased 47 percent between 1995 and 2010 (to 21.0 million) but declined 7 percent between 2010 and 2018 (to 19.6 million; table 105.30). Total enrollment is expected to increase 2 percent between fall 2018 and fall 2029, reaching 20.1 million. The percentage of students who attended private institutions (including both for-profit and nonprofit institutions) in fall 2018 ( 26 percent) was 1 percentage point lower than in 2008. During this period, the percentage of postsecondary students attending private nonprofit institutions increased from 19 to 21 percent and the percentage of students attending for-profit institutions decreased from 8 to 5 percent (table 303.10). In fall 2018, about 5.1 million students attended private institutions, with 4.1 million in nonprofit institutions and 1.0 million in for-profit institutions.

Despite a decrease since 2010, enrollment in postsecondary degree-granting institutions in fall 2018 was 3 percent higher than in fall 2008 (table 105.30). Changes in total enrollment may be affected by changes in enrollment rates, changes in the population, or both. While the postsecondary enrollment rate of 18- and 19-year-olds in 2018 (50 percent) was not measurably different from the percentage in 2008, the overall number of 18 - and 19-year-olds in the population decreased 5 percent, from 9.0 million in 2008 to 8.6 million in 2018 (tables 101.10 and 103.20). In contrast, although the enrollment rate of 20 - to 24 -year-olds in 2018 ( 39 percent) was also not measurably different from the rate in 2008, the number of 20 - to 24-year-olds was 3 percent higher in 2018 (21.9 million) than in 2008 ( 21.2 million).

## Educational Attainment

The percentage of people 25 years old and over who earned a high school degree (or equivalent) or higher has been increasing over the past decade. Between 2009 and 2019, the percentage of people 25 years old and over who had completed at least high school increased from 87 to 90 percent, and the percentage who had completed a bachelor's or higher degree increased from 30 to 36 percent (table 104.10 and figure 3). In 2019, about 10 percent of people 25 years old and over held a master's degree as their highest degree, and 3 percent held a doctor's or firstprofessional degree (table 104.30). Among 25- to 29-year-olds, the percentage who had completed at least high school increased from 89 to 94 percent between 2009 and 2019, and the percentage who had completed a bachelor's or higher degree increased from 31 to 39 percent (table 104.20 and figure 4). Overall, the percentage of 25 - to 29-year-olds who held a master's or higher degree rose from 7 percent in 2009 to 9 percent in 2019, including about 2 percent who held a doctor's or first-professional degree (tables 104.20 and 104.30 and figures 4 and 5).

These changes in the educational attainment of 25- to 29 -year-olds over the last decade varied by race/ethnicity. The percentages of Hispanic and White 25- to 29-year-olds who had completed at least high school increased between 2009 and 2019; however, there was no measurable change among Asian and Black 25- to 29-year-olds (table 104.20 and figure 6). The percentage of Hispanic 25- to 29-year-olds who had completed at least high school rose from 69 percent in 2009 to 86 percent in 2019, an increase of 17 percentage points. During the same period, the percentage of White 25- to 29-year-olds who had completed at least high school rose from 95 to 96 percent. Taken together, the gap between the high school completion percentages for these two groups decreased from 26 percentage points in 2009 to 10 percentage points in 2019. In contrast, the gap between the White and Black high school completion percentages in 2019 (5 percentage points) was not measurably different from the gap in 2009. Whereas high school completion rates were higher among White 25- to 29 -year-olds than among their Black or Hispanic peers in 2019, they were not measurably different from the high school completion rates of Asian 25- to 29-year-olds ( 97 percent).

The percentage of bachelor's degree holders also varied among 25- to 29-year-olds of different racial/ethnic groups. Between 2009 and 2019, the percentages who had
completed a bachelor's or higher degree showed no measurable change for those who were of Two or more races, Pacific Islander, and American Indian/Alaska Native (34 percent, 22 percent, and 14 percent, respectively, in 2019). In contrast, the percentage who had completed a bachelor's or higher degree increased for Asian, White, Black, and Hispanic 25- to 29 -year-olds during this 10 -year period. Between 2009 and 2019, the percentages who held a bachelor's or higher degree increased from 60 to 71 percent among Asian 25- to 29-year-olds, from 37 to 45 percent among White 25- to 29-year-olds, from 19 to 29 percent among Black 25- to 29 -year-olds, and from 12 to 21 percent among Hispanic 25- to 29 -year-olds (table 104.20 and figure 6). The gaps in bachelor's degree attainment percentages between White and Black 25- to 29-year-olds ( 16 percentage points) and White and Hispanic 25 - to 29-year-olds ( 24 percentage points) in 2019 were not measurably different from these gaps in 2009.

## Teachers and Faculty

A projected 3.7 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2019, which was less than 1 percent higher than in 2009 (table 105.40). Of these 3.7 million FTE elementary and secondary school teachers in 2019 , about 3.2 million taught in public schools and 0.5 million taught in private schools.

FTE faculty at degree-granting postsecondary institutions totaled a projected 1.1 million in 2019 , including 0.7 million at public institutions and 0.4 million at private institutions (table 105.10).

## Expenditures

Expenditures of educational institutions were an estimated \$1.5 trillion for the 2018-19 school year (table 106.20 and figure 2). Elementary and secondary schools spent 57 percent of this total ( $\$ 832$ billion), and degreegranting postsecondary institutions spent the remaining 43 percent ( $\$ 620$ billion). After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 13 percent between 2008-09 and 2018-19. Inflation-adjusted expenditures for public elementary and secondary schools increased by an estimated 7 percent during this period, while expenditures of degree-granting postsecondary institutions increased by an estimated 22 percent. In 2018-19, expenditures of educational institutions were an estimated 7.1 percent of the gross domestic product (table 106.10).

## —Not available.

${ }^{1}$ Included under Asian.
${ }^{2}$ Data on persons of Two or more races were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals
because of rounding. Some data have been revised from previously published figures. Population estimates as of July 1 of the indicated reference year.

$\dagger$ Not applicable.
\#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
IIncludes all children who live either with their parent(s) or with a householder to whom they are related by birth, marriage, or adoption (except a child who is the spouse of the householder). Children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children. Living arrangements with only a "female householder" or "male householder" are those in which the parent or the householder who is related to the child does not have a spouse living in the household. The householder is the person (or one of the people) who owns or rents (maintains) the housing unit.
${ }^{2}$ Includes foster children, children in unrelated subfamilies, children living in group quarters, and children who were reported as the householder or spouse of the householder. ${ }_{3}$ Includes other Central American subgroups not shown separately.

## ${ }^{4}$ Includes Taiwanese

In addition to the subgroups shown, also includes Sri Lankan.
${ }^{6}$ Consists of Indonesian and Malaysian.
${ }^{7}$ Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Data are based on sample surveys of the entire population residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2018. (This table was prepared November 2019.)

Table 102.40. Poverty rates for all persons and poverty status of related children under age 18, by region and state: Selected years, 1990 through 2018

${ }^{1}$ Data exclude institutionalized persons (e.g., those living in prisons or nursing homes) as well as persons living in most types of noninstitutional group quarters (e.g., college housing or military barracks). Data include noninstitutionalized persons living in households as well as those living in group homes and shelters.
${ }^{2}$ Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. This table excludes unrelated children and householders who are themselves under the age of 18.
${ }^{3}$ Based on 1989 incomes and family sizes collected in the 1990 census
"Based on 1999 incomes and family sizes collected in the 2000 census.
${ }^{5}$ Based on income and family size data from the American Community Survey (ACS). ACS respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States.

NOTE: Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see https://www.census.gov/topics/income-poverty/poverty/guidance/ poverty-measures.html. Poverty estimates in this table may differ from table 102.50's official national poverty estimates, which are based on a different data source (the Current Population Survey). Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, 1990 Summary Tape File 3 (STF 3), "Median Household Income in 1989" and "Poverty Status in 1989 by Family Type and Age"; Decennial Census, 1990, Minority Economic Profiles, unpublished data; Decennial Census, 2000, Summary Social, Economic, and Housing Characteristics; Census 2000 Summary File 4 (SF 4), "Poverty Status in 1999 of Related Children Under 18 Years by Family Type and Age"; and American Community Survey (ACS), 2010, 2015, and 2018. (This table was prepared November 2019.)

Table 102.62. Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, child's race/ ethnicity, and selected racial/ethnic subgroups: 2010 and 2018

!lnterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Parents include adoptive and stepparents but exclude parents not residing in the same household as their children.
${ }^{2}$ Includes parents who completed high school through equivalency programs, such as a GED program
${ }^{3}$ Includes parents with professional degrees.
${ }^{4}$ Includes other Central American subgroups not shown separately.
${ }^{5}$ Includes Taiwanese.
${ }^{6}$ In addition to the subgroups shown, also includes Sri Lankan.
${ }^{7}$ Consists of Indonesian and Malaysian.
${ }^{8}$ Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified. ${ }^{9}$ Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Table includes only children under the age of 18 who resided with at least one of their parents (including an adoptive or stepparent). Respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States. Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see https://www.census.gov/topics/income-poverty/poverty/guidance/poverty-measures. html. Race categories exclude persons of Hispanic ethnicity.

-Not available.
It is not possible to compute a 1964 enrollment percentage for the total 3 - to 34 -year-old population because, although enrollment percentages are available for each component age group, underlying data on population size are not available for 3 - and 4 -year-olds.
"Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.
noninstitutionalized population, which excludes persons in the military and persons living in institutions (e. prisons or
nursing facilities). Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary and secondary schools, colleges, universities, and professional schools. Attendance may generalized variance function methodology rather than the more precise replicate weight methodology used in later years. SOURCE: U.S. Department of Commerce, Census Bureau, Historical Statistics of the United States, Colonial Times to 1970 Current Population Reports, Series P-20, various years; CPS Historical Time Series Tables on School Enrollment, retrieved June 6, 2012, from http://www.census.gov/hhes/school/data/cps/historical/index.html; and Current Population Survey (CPS), October, 1970 through 2018. (This table was prepared November 2019.)

## -Not available.

$\dagger$ Not applicable.
1'Includes persons of Hispanic ethnicity for years prior to 1980.
${ }^{2}$ Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers-i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.
${ }^{3}$ Estimates based on Census Bureau reverse projection of 1940 census data on education by age.
${ }^{4}$ Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Prior to 2005, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. For 1960 and prior years, data were collected in April. For later years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{\text {I }}$ Includes persons of Hispanic ethnicity for years prior to 1980
${ }^{2}$ Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers-i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.
${ }^{3}$ Estimates based on Census Bureau reverse projection of 1940 census data on education by age.
${ }^{4}$ Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Prior to 2005, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. For 1960 and prior years, data were collected in April. For later years, data were collected in March. Data are based on sample surveys of the noninstitutionalized population, which excludes persons living in institutions (e.g., prisons or nursing facilities); data include military personnel who live in households with civilians, but exclude those who live in military barracks. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

\#Rounds to zero.
High school completers include those graduating from high school with a diploma as well as those completing high school through equivalency programs, such as a GED program.
OTE. Data for 2018 are based on sample surveys of the entire population in the given age range residing within the United
States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing
located within the United States) and institutionalized persons (e.
facilities), while data for 2000 are based on sample surveys of the population residing in individual housing units only. SOURCE: U.S. Department of Commerce, Census Bureau, Census 2000 Summary File 3, retrieved October 11, 2006, from https://factfinder2.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=DEC 00 SF3 QTP20\&prodType=table Census Briefs, Educational Attainment: 2000; and American Community Survey (ACS), 2018. (This table was prepared
February 2020.)

Table 104.85. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and state: 2018
[Standard errors appear in parentheses]

Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is <br> 50 percent or greater. <br> ${ }^{1}$ Includes completion of high school through equivalency programs, such as a GED program. <br> ${ }^{2}$ Total includes racial/ethnic groups not shown separately. |  |  |  |  |  |  |  |  |  | NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Race categories exclude persons of Hispanic ethnicity. <br> SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2018 (This table was prepared February 2020.) |  |  |  |  |  |  |  |  |  |  |  |  |  |

Table 105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2019 [In millions]

| Participants | All levels (elementary, secondary, and degree-granting postsecondary) | Elementary and secondary schools |  |  | Degree-granting postsecondary institutions |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Total | Public | Private | Total | Public | Private |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Total | 86.5 | 63.8 | 57.2 | 6.6 | 22.7 | 16.6 | 6.2 |
| Enrollment | 76.1 | 56.3 | 50.6 | 5.7 | 19.7 | 14.6 | 5.1 |
| Teachers and faculty | 4.7 | 3.7 | 3.2 | 0.5 | 1.1 | 0.7 | 0.4 |
| Other professional, administrative, and support staff | 5.7 | 3.8 | 3.4 | 0.4 | 1.9 | 1.3 | 0.7 |

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal Bureau of Indian Education schools and Department of Defense Education Activity schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

IIncludes imputations for public school prekindergarten enrollment in California and Oregon. ${ }^{2}$ Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.
${ }^{3}$ Estimated.
${ }^{4}$ Includes prorated proportion of students classified as ungraded. The total ungraded counts of students were prorated to the elementary level (prekindergarten to grade 8) and the secondary level (grades 9 to 12) based on prior reports.
${ }^{5}$ In addition to students in grades 9 to 12 and ungraded secondary students, includes a small number of students reported as being enrolled in grade 13.
${ }^{6}$ Data are actual.

NOTE: Postsecondary data for 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. -Not available.
${ }^{1}$ Beginning in fall 1985, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.
${ }^{2}$ Data for 1869-70 through 1949-50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.
${ }^{3}$ Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports
${ }^{4}$ Estimated.
${ }^{5}$ Includes imputations for public school prekindergarten enrollment in California and Oregon. ${ }^{6}$ Includes imputations for public school prekindergarten enrollment in California. Projected data. Fall 2017 data for degree-granting institutions are actual.
NOTE: Data for 1869-70 through 1949-50 reflect enrollment for the entire school year Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Excludes preprimary students in private schools that do not offer kindergarten or higher grades. Postsecondary data through 1995 are for institutions of
higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding

## -Not available.

${ }^{1}$ Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.
${ }^{2}$ Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year roll og. Excludes teaboving assistants Headcounts are used to report data for faculty. Data through 1995 are for institutions of Headcounts are used to repor data for facult. Datathing 19ys are for institutions of institutions grant associate's or higher degrees and participate in Title IV federal financial aid instions gran associate's programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.
${ }^{3}$ Estimated on the basis of enrollment and staff counts in adjacent years.
${ }^{4}$ Inclusion of institutions is not consistent with surveys for 1987 and later years.
${ }^{5}$ Data for elementary and secondary schools are projected; data for degree-granting institutions are actual.
${ }^{6}$ Projected.
NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

-Not available.
$\dagger$ Not applicable.
${ }^{1}$ Includes special education, alternative, and other schools not classified by grade span Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.
2Data for 1980-81 and 1990-91 include schools with first or higher grades. Data for later years include schools with kindergarten or higher grades.
${ }^{3}$ Included in the elementary, secondary, and combined categories.
NOTE: Postsecondary data for 1980-81 and 1990-91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar
o the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

-Not available.
${ }^{1}$ Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.
${ }^{2}$ Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.
${ }^{3}$ Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929-30 and 1939-40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949-50 through 1995-96 are for current-fund expenditures. Data for private degree-granting institutions for 1996-97 and later years are for total expenditures. Data for public degree-granting institutions for 1996-97 through 2000-01 are for current expenditures; data for later years are for total expenditures. Postsecondary data through 1995-96 are for institutions of higher education,
while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

## -Not available

${ }^{1}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
${ }^{2}$ Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.
${ }^{3}$ Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.
${ }^{4}$ Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Expenditures for public and private colleges and universities in 1929-30 and 1939-40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949-50 through 1995-96 are for current-fund expenditures. Data for private degree-granting institutions for 1996-97 and later years are for total expenditures. Data for public degreegranting institutions for 1996-97 through 2000-01 are for current expenditures; data for later
years are for total expenditures. Postsecondary data through 1995-96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financia aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

## $\dagger$ Not applicable.

\#Rounds to zero.
${ }^{1}$ Includes highways, air transportation (airports), parking facilities, and sea and inland port
facilities. For 2000-01 and earlier years, also includes transit subsidies.
${ }^{2}$ Includes judicial and legal expenditures, expenditures on general public buildings, and other governmental administration expenditures.
${ }^{3}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Excludes monies paid by states to the federal government. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Commerce, Census Bureau, Governmental Finances. Retrieved April 15, 2020, from https://www.census.gov/data/datasets/2017/econ/local/ public-use-datasets.html. (This table was prepared April 2020.)

\#Rounds to zero.
'Includes state and local government expenditures for education and public libraries, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other direct general expenditures.
bsidies to individuals, private elementary and secondary schools, and private colleges and universities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of silightly varying definitions used in the Governmental Finances and Common Core of Data surveys. In 2016-17, a census of state and local governments was conducted; therefore, standard errors are not applicable. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures
, Governmental Finances. Retrieved April 15, 2020, from https:// www.census.gov/data/datasets/2016/econ/local/public-use-datasets.html. (This table was prepared June 2020.)

Table 106.50. Direct general expenditures of state and local governments per capita for all functions and for education, by level of education and state: 2015-16 and 2016-17

| State | Direct general expenditures, 2015-16 |  |  | Direct general expenditures, 2016-17 |  |  |  |  |  |  |  |  |

## CHAPTER 2 <br> Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys, censuses, and administrative data collections conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements. Public school enrollment data are for fall of the given year. Private school data are available only for odd-numbered years. Information on enrollments is also available in Chapter 1. Discussion in this chapter typically focuses on more recent years, although longer trends are available in the tables.

## Enrollments

## Public Elementary/Secondary

In fall of 2017-the most recent year of data collec-tion- 50.7 million students were enrolled in public elementary and secondary schools, an increase of 2 percent from 49.8 million over the preceding 5 years (table 203.10 and figure 7). At the elementary level, public school enrollment increased 1 percent between 2012 and 2017 (from 35.0 million to 35.5 million), while public secondary enrollment increased 3 percent (from 14.8 million to 15.2 million). ${ }^{1}$

Although public school enrollment increased overall between 2012 and 2017, this was not true of all racial/ethnic groups. Increases occurred in Hispanic student enrollment (12 percent), Asian student enrollment (11 percent), and enrollment of students of Two or more races (41 percent; table 203.50). Also, the enrollment of Pacific Islander students was 3 percent higher in 2017 than in 2012. In contrast, the enrollment of American Indian/Alaska Native students decreased 7 percent, the enrollment of White students decreased 5 percent, and the enrollment of Black students decreased 1 percent between these years.

From 2012 to 2017, changes in public elementary and secondary school enrollment also varied from state to state. Thirty-four states and the District of Columbia had higher

[^9]enrollment in 2017 than in 2012, while 16 states had lower enrollment in 2017 than in 2012 (table 203.20 and figure 8). The largest public school enrollment increases occurred in the District of Columbia (15 percent), North Dakota (11 percent), Nevada (9 percent), and Utah (9 percent). The largest decrease in public school enrollment occurred in New Hampshire (5 percent); decreases of 3 percent or more occurred in 4 other states (West Virginia, Connecticut, Illinois, and Mississippi; table 203.20).

## Private Elementary/Secondary

Enrollment in private elementary and secondary schools in 2017 ( 5.7 million) was 9 percent higher than in 2011 ( 5.3 million; table 105.30). In 2017, private school students made up 10.1 percent of all elementary and secondary school students, which was 0.5 percentage points higher than in 2011.

## Preprimary

Sixty-four percent of 3- to 5-year-olds were enrolled in preprimary education (prekindergarten and kindergarten) in 2018, which was not measurably different from the percentage enrolled in 2008 (table 202.10 and figure 9). However, among 3- to 5-year-olds who were enrolled in preprimary education, the percentage enrolled in full-day programs increased from 58 percent in 2008 to 65 percent in 2018. Among 3- to 5-year-old children not yet enrolled in kindergarten, a higher percentage were cared for primarily in center-based programs (49 percent) than had no regular nonparental care (27 percent) or were cared for primarily in home-based settings by relatives (14 percent) or by nonrelatives (8 percent), according to the most recent data from 2016 (table 202.30).

An earlier survey in 2005-06 found that there were differences in the average quality of care 4-year-old children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (web-only table 202.60).

## Individuals with Disabilities

The Individuals with Disabilities Education Act (IDEA), enacted in 1975, mandates that children and youth ages 3-21 with disabilities be provided a free and appropriate public
school education. The overall percentage of students being served by federally supported special education programs was 14.1 percent in 2018-19 (table 204.30). This was slightly higher than in 2004-05 (13.8 percent), but reflected a 5.8 percentage point increase from 8.3 percent in 1976-77, immediately following the passage of IDEA (table 204.30 and Digest of Education Statistics 2016, table 204.30). Much of the growth in the percentage of students served in programs for those with disabilities is attributable to concurrent increases in the percentage of students identified as having specific learning disabilities, from 1.8 percent in 1976-77 to 5.7 percent in 2004-05. After 2004-05, the percentage of children identified as having specific learning disabilities declined from 5.7 percent of total public school enrollment to 4.7 percent in 2018-19. However, there were different patterns of change in the percentages of students served with some specific conditions between 2004-05 and 2018-19. The percentage of children identified as having autism rose from 0.4 to 1.5 percent of total public school enrollment; the percentage identified as having a developmental delay rose from 0.7 to 0.9 percent; and the percentage with other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes) rose from 1.1 to 2.1 percent. In contrast, the percentage identified as having speech or language impairments decreased from 3.0 to 2.7 percent and the percentage with intellectual disabilities decreased from 1.2 to 0.9 percent.

In fall 2018, some 95 percent of 6- to 21-year-old students with disabilities were served in regular schools; 3 percent were served in a separate school for students with disabilities; 1 percent were placed in regular private schools by their parents; and less than 1 percent each were served in one of the following environments: homebound or in a hospital, in a separate residential facility, or in a correctional facility (web-only table 204.60).

## Teachers and Other School Staff

## Teachers

During the 1970s and early 1980s, public school enrollment decreased while the number of teachers generally increased. For public schools, the number of pupils per teacher-that is, the pupil/teacher ratio ${ }^{2}$-declined from 22.3 in 1970 to 17.9 in 1985 (table 208.20 and figure 7). After enrollment started increasing in 1985, the public school pupil/teacher ratio continued to decline, reaching 17.2 in 1989. After a period of relative stability from the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 15.3 in 2008, before increasing again to 16.1 in 2013. Following this increase, there was a decrease in the

[^10]pupil/teacher ratio to 16.0 in 2017. Because some classrooms have multiple teachers, the pupil/teacher ratio is smaller than average class size. The average class size was 21.2 pupils for public elementary schools and 26.8 pupils for public secondary schools in 2011-12, when the most recent data were obtained (table 209.30).

The demographic composition of public school teachers has changed over the last 20 years. In 2017-18, 76 percent of public school teachers were female, up from 75 percent in 1999-2000 (table 209.10). Over the same period, the percentage of public school teachers who were White decreased from 84 percent to 79 percent. The percentage of public school teachers who were Black was 1 percentage point lower in 2017-18 than in 1999-2000 (7 vs. 8 percent). In contrast, the percentage of Hispanic teachers increased from 6 percent of all teachers to 9 percent of all teachers. In 2017-18, about 2 percent of public school teachers were Asian, 2 percent were of Two or more races, 1 percent were American Indian/Alaska Native, and less than 1 percent were Pacific Islander. Changes in the percentage of teachers from different racial/ethnic backgrounds did not mirror demographic changes among students. For instance, although the percentage of teachers who were White decreased by 5 percentage points between 1999-2000 and 2017-18, White teachers still constituted the vast majority of teachers (79 percent). In contrast, the percentage of students who were White decreased 14 percentage points (from 61 percent in 2000 to 48 percent in 2017).

Teachers acquire skills both during formal training and in the classroom. The majority of public school teachers now have formal training culminating in a postbaccalaureate degree (table 209.10). Specifically, the percentage of public school teachers with a master's or higher degree increased from 47 percent in 1999-2000 to 58 percent in 2017-18. During the same time period, there were shifts in the average experience of public school teachers, with an increase in mid-career teachers. Specifically, the percentage of public school teachers with 10 to 20 years of teaching experience increased from 29 percent in 1999-2000 to 40 percent in 2017-18, while the percentage of teachers with more than 20 years of teaching experience decreased from 32 to 23 percent. The percentage of public school teachers with less than 3 years of teaching experience was lower in 2017-18 (9 percent) than in 1999-2000 (11 percent).

There were differences in the demographics of public and private school teachers in 2017-18. The percentage of private school teachers who were female ( 74 percent) was lower than the corresponding percentage for public school teachers (76 percent; table 209.10). The percentage of private school teachers who were White (85 percent) was higher than the percentage for public school teachers (79 percent). The percentage of private school teachers with a master's or higher degree ( 48 percent) was lower than the percentage for public school teachers (58 percent). However, although there are no comparable figures on teacher experience, the percentage of private school teachers who were age 60 and over ( 15 percent) was higher than the percentage for public school teachers ( 7 percent) in 2017-18.

Public school teachers with more years of teaching experience and those with higher levels of education earn higher average salaries than their peers with less experience or lower levels of education. In 2017-18, the average salary among public school teachers who had completed a bachelor's degree as their highest degree was $\$ 50,920$ (in constant 2018-19 dollars), compared with $\$ 64,430$ among those who had completed a master's degree, \$67,890 among those who had an education specialist degree, and \$70,960 among those who had a doctor's degree as their highest degree (table 211.20). Within each level of education, teachers who had more teaching experience had higher salaries than those who had taught for fewer years. For example, average salaries for those who had completed a bachelor's degree ranged from $\$ 43,010$ for those with 1 year or less of teaching experience to $\$ 65,340$ for those who had 30 to 34 years of teaching experience.

Average salaries for public school teachers in 2017-18 were lower than in 1999-2000 for teachers overall, and at the bachelor's, master's, and specialist degree levels (after adjusting for inflation in 2018-19 dollars). For example, the average salary for teachers with a master's degree was \$64,430 in 2017-18 compared with \$66,910 in 1999-2000 (table 211.20). However, this pattern was not consistent across all combinations of experience and educational attainment.

## Public School Principals

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2017-18, some 83 percent of public school principals were over age 40, and 98 percent had a master's or higher degree (table 212.08). In comparison, only 57 percent of public school teachers were over age 40, and 58 percent had a master's or higher degree (table 209.10). Relative to the composition of the teacher workforce, principals were also disproportionately male: only 54 percent of principals were female, compared with 76 percent of teachers (tables 209.10 and 212.08).

There were changes in the characteristics of public school principals between 1999-2000 and 2017-18. The percentage of principals who were female increased from 44 percent in 1999-2000 to 54 percent in 2017-18 (table 212.08). The percentage of principals who were White decreased from 82 to 78 percent, while the percentage of principals who were Hispanic increased from 5 to 9 percent. The percentage of principals who were under age 40 was higher in 2017-18 (17 percent) than in 1999-2000 ( 10 percent), and the percentage who were ages 40 to 44 was also higher in 2017-18 (20 percent) than in 1999-2000 (13 percent). In contrast, the percentage who were ages 50 to 54 in 2017-18 (18 percent) was lower than in 1999-2000 ( 32 percent). The percentage of principals who had 20 or more years of experience as a principal was lower in 2017-18 (4 percent) than in 1999-2000 (11 percent). The percentage of principals with 3 or fewer years of experience as a principal was higher in 2017-18 (37 percent) than in 1999-2000 ( 30 percent). The average salary for public school principals in 2017-18 was $\$ 100,340$ (in 2018-19 dollars; web-only table 212.10).

## School Staff

From 1969-70 to 1980, there was an 8 percent increase in the number of public school teachers, compared with a 48 percent increase in the number of all other public school staff $^{3}$ (table B and table 213.10). Consequently, the percentage of staff who were teachers declined from 60 percent in 1969-70 to 52 percent in 1980. From 1980 to 2017, the number of teachers and the number of all other staff grew at more similar rates ( 45 and 70 percent, respectively) than they did in the 1970s. As a result, the proportion of teachers among total staff was 4 percentage points lower in 2017 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. The numbers of staff in two categories increased more than 100 percent between 1980 and 2017: the number of instructional aides rose 153 percent, and the number of instruction coordinators rose 366 percent. Taken together, the percentage of staff with direct instructional responsibilities (teachers and instructional aides) was higher in 2017 (61 percent) than in 1980 (60 percent). In 2017, there were 8 pupils per staff member (total staff) at public schools, compared with 10 pupils per staff member in 1980 (table 213.10). At private schools in 2011-12, the number of pupils per staff member was 6 (web-only table 205.60).

Table B. Number of public school staff, by selected categories: 1969-70, fall 1980, fall 2010, and fall 2017

| [In thousands] |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Selected staff category | $1969-70$ | 1980 | 2010 | 2017 |
| Total | $\mathbf{3 , 3 6 1}$ | $\mathbf{4 , 1 6 8}$ | $\mathbf{6 , 1 9 5}$ | $\mathbf{6 , 5 4 5}$ |
|  | 2,016 | 2,184 | 3,099 | 3,170 |
| Teachers | 57 | 326 | 732 | 824 |
| Instructional aides | 32 | 21 | 69 | 96 |

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1969-70; Statistics of Public Elementary and Secondary Schools, 1980; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/ Secondary Education," 2010-11 and 2017-18.

In more recent years, the numbers of most types of staff have increased. Overall, the number of public school staff increased 6 percent between fall 2012 and fall 2017 (table 213.10). The number of officials and administrators rose 14 percent during this period, and the number of principals and assistant principals rose 12 percent. Also, the number of instruction coordinators rose 35 percent, the number of instructional aides rose 13 percent, and the number of support staff rose 8 percent. The number of teachers rose 2 percent between fall 2012 and fall 2017, and the number of guidance counselors increased 11 percent. In contrast, the number of librarians decreased by 9 percent during this period.

## Schools

## Total Schools

Despite an increase in the number of students, the number of public schools declined in the United States, reflecting a trend toward consolidating small schools during

[^11]most of the last century. In 1929-30, there were approximately 248,000 public schools, compared with about 98,500 in 2017-18 (table 214.10). However, the number of public schools has increased in recent decades: Between 1988-89 and 2006-07, there was an increase of approximately 15,600 schools, up to a total of 98,800 . Since 2006-07, the number of public schools has remained relatively stable, varying by fewer than 500 schools from year to year.

While the total number of public schools in the country has remained relatively stable in recent years, new schools have opened and some schools have closed. In 2017-18, there were 1,310 school closures (web-only table 216.95). The schools that closed had enrolled about 267,000 students in the prior school year (2016-17). Of the schools that closed, 889 were regular schools, 217 were special education schools, 13 were vocational schools, and 191 were alternative schools. Of these closed schools, 247 were classified as charter schools. The number of schools that closed in 2017-18 was higher than the number in 2015-16 $(1,160)$ or 2016-17 (1,098); however, the number of annual school closures fluctuated during the 2000-01 to 2017-18 period, ranging from 1,098 to 2,168 . School closures do not necessarily reflect the number of school buildings that have been closed, since a school may share a building with another school, or one school may have multiple buildings.

## School Structure

Since the early 1970s, public school systems have been shifting away from junior high schools (schools consisting of either grades 7 and 8 or grades $7-9$ ) and moving toward middle schools (a subset of elementary schools beginning with grade 4,5 , or 6 and ending with grade 6,7 , or 8 ). The number of all public elementary schools (schools beginning with grade 6 or below and ending with grade 8 or below) increased 5 percent between 1970-71 and 2017-18 (from 64,000 to 67,400 ), and the number of middle schools increased by 546 percent (from 2,100 in 1970-71 to 13,400 in 2017-18; table 216.10). During the same period, the number of junior high schools declined by 68 percent (from 7,800 in 1970-71 to 2,500 in 2017-18). Compared over more recent years, the number of all elementary schools was less than 1 percent higher in 2017-18 than in 2007-08, while the subset of middle schools rose by 3 percent, from 13,000 to 13,400 . During the same period, the number of junior high schools declined by 20 percent, from 3,100 to 2,500 . The total number of secondary schools decreased 3 percent, from 24,600 in 2007-08 to 23,900 in 2017-18.

The average number of students in public elementary schools increased from 469 in 2007-08 to 483 in 2017-18 (table 216.45). The average enrollment size of public secondary schools was also higher in 2017-18 (709) than in 2007-08 (704). However, considering only regular public secondary schools-which exclude alternative, special education, and vocational education schools-average enrollment size was lower in 2017-18 (804) than in 2007-08 (816).

## School Choice

Over the past two decades, the range of options that parents have for the education of their children has expanded. Private schools have been a traditional alternative to public school education, but there are now more options for parents to choose public charter schools, and more parents are also homeschooling their children. Between fall 1999 and fall 2017, enrollment in private elementary and secondary schools decreased from 6.0 million to 5.7 million, a decline of 0.3 million or 5 percent (table 105.30). Although private school enrollment declined through much of this period, it was higher in fall 2017 ( 5.7 million) than in fall 2011 ( 5.3 million). From fall 1999 to fall 2017, the percentage of students who were enrolled in private schools declined from 11.4 percent to 10.1 percent. In contrast, enrollment in public charter schools increased between fall 1999 and fall 2017, rising from 0.3 million to 3.1 million, an increase of 2.8 million students or 825 percent (table 216.20). During this period, the percentage of public elementary and secondary school students who were in charter schools increased from 0.7 percent to 6.2 percent. In addition, there has been an increase in the number and percentage of 5- to 17-year-olds who are homeschooled (table 206.10 and web-only table 206.20). About 1.7 million children were homeschooled in 2016, compared with 0.9 million in 1999. ${ }^{4}$ This also reflects an increase in the percentage of 5 - to 17-year-olds who were homeschooled, from 1.7 percent in 1999 to 3.3 percent in 2016.

Today, charter schools are the archetypical form of school choice available to parents within the public education sector; however, there is also opportunity for school choice among traditional public schools. In 2016, the parents of 41 percent of all students in grades $1-12$ indicated that public school choice was available to them (webonly table 206.40). Also in 2016, some 20 percent of the students in grades $1-12$ were enrolled in public schools chosen by their families (Digest of Education Statistics 2017, table 206.30). Of the remaining 80 percent of students, 71 percent attended an assigned public school and 9 percent attended a private school. Not all school choice options are equally accessible to all families-private schools require personal financial investments for tuition, while public choice options are more prevalent in urban districts-and there were differences by some characteristics in the percentages of students who attended public schools chosen by their parents and the percentages of students who attended private schools in 2016. The percentage of students attending chosen public schools was

[^12]higher for students living in cities (31 percent) than for students in suburban areas (17 percent), towns (14 percent), and rural areas (11 percent). Meanwhile, the percentage of students attending private schools was higher for students whose parents had a bachelor's degree (13 percent) or graduate degree (18 percent) than for students whose parents had less than a high school diploma (5 percent), only a high school diploma (4 percent), or only some college or a vocational degree ( 6 percent). Conversely, a lower percentage of students whose parents had completed only a bachelor's degree (18 percent) were enrolled in chosen schools, compared with students whose parents had not completed high school (23 percent) or who had only completed high school (21 percent). There were also some differences in the percentage of students in chosen public versus private schools by student race. The percentage of students attending chosen public schools was higher for Black students ( 32 percent) and Hispanic students (25 percent) than for White students (14 percent). In contrast, the percentage attending private schools was higher for White students (11 percent) than for Black students (8 percent) and Hispanic students (6 percent).

Compared with students in assigned public schools, a higher percentage of students in chosen public schools had parents who were very satisfied with some elements of their children's education in 2016 (web-only table 206.50). Specifically, among students in grades 3 through 12, the percentage of students whose parents were very satisfied with their school was higher for students in chosen schools (60 percent) than for students in assigned schools (54 percent). Similarly, the percentage of students whose parents were very satisfied with their school's academic standards was higher for students in chosen schools (60 percent) than for students in assigned schools (53 percent). Also, higher percentages of students in chosen schools than in assigned schools had parents who were very satisfied with school order and discipline ( 57 vs. 53 percent) as well as with staff interaction with parents (51 vs. 47 percent). There was no measurable difference in the percentage of students who had parents who were highly satisfied with the teachers in their school, whether assigned or chosen.

## High School Graduates and Dropouts

About 3,663,000 high school students were projected to graduate during the 2020-21 school year (based on pre-pandemic data), including 3,302,000 public school graduates and 360,000 private school graduates (table 219.10). High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2020-21 projection of high school graduates is slightly lower than the prior record high projection of $3,674,000$ graduates for 2018-19, but it exceeds the baby boom era's high point in 1975-76, when $3,142,000$ students earned diplomas. In 2017-18, about 85 percent of public high
school students graduated with a regular diploma within 4 years of first starting 9th grade, which reflects an increase since 2010-11 (79 percent; table 219.46). This rate is known as the 4 -year adjusted cohort graduation rate (ACGR).

The status dropout rate has decreased since 2000. The status dropout rate is the percentage of the civilian noninstitutionalized 16 - to 24 -year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 2000 and 2018, the status dropout rate declined from 10.9 to 5.7 percent (table 219.70). During this period, the status dropout rate for Black 16- to 24-year-olds declined from 13.1 to 5.8 percent and the rate for Hispanic 16- to 24-yearolds declined from 27.8 to 9.0 percent. In 2018, the status dropout rate for White 16 - to 24 -year-olds ( 4.5 percent) was lower than the rate for Hispanic 16- to 24-year-olds, but it was not measurably different from the rate for Black 16- to 24-year-olds.

## Achievement

Much of the student performance data in the Digest are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP (which includes the Trial Urban District Assessment), and national long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4,8 , and 12 . The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. For mathematics, reading, science, and writing assessments since 2002, a combined sample of public schools has been selected for 4th- and 8th-grade national NAEP and state NAEP (including the Trial Urban District Assessment).

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are
administered nationally and report student performance in reading and mathematics at ages 9,13 , and 17 . Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

The following paragraphs discuss results for the national main NAEP, state NAEP, and long-term trend NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the Digest) are based on statistical testing of unrounded values.

## Reading

## Main NAEP

The main NAEP reading assessment data are reported on a scale of 0 to 500 . For 4th-grade students, the average reading score in 2019 (220) was lower than the score in 2017 (222) but was higher than the 1992 score (217; table 221.10). This pattern held for certain racial/ethnic groups (White and Black students), but not for others (Hispanic, Asian/Pacific Islander, and American Indian/ Alaska Native students). Specifically, at grade 4, the 2019 reading scores for White (230) and Black (204) students were lower than the corresponding scores in 2017 (232 and 206, respectively), but higher than in 1992 (224 and 192, respectively). In contrast, the 4th-grade reading scores for Hispanic (209) and Asian/Pacific Islander (237) students were not measurably different in 2019 than in 2017, but the scores for both groups were higher in 2019 than in 1992 (197 and 216, respectively). For American Indian/Alaska Native students, the average 4th-grade reading score in 2019 (204) was not measurably different from the scores in either 2017 or 1994 (1994 was the first year data were available for 4th-grade American Indian/Alaska Native students).

From 1992 through 2019, the average reading scores for White 4th-graders were higher than those for their Black and Hispanic peers. Although the White-Black achievement gap did not change measurably from 2017 to 2019, the achievement gap narrowed from 32 points in 1992 to 27 points in 2019. The White-Hispanic achievement gap in 2019 (21 points) was smaller than the achievement gap in 2017 (23 points), but it was not measurably different from the achievement gap in 1992.

At grade 8, the average reading score in 2019 (263) was lower than the score in 2017 (267), but it was higher than the score in 1992 (260). The reading scores for White (272), Black (244), and Hispanic (252) 8th-grade students in 2019 were lower than the corresponding scores in 2017 (275, 249 , and 255 , respectively), but the score for each group
was higher in 2019 than in 1992 (267, 237, and 241, respectively). The reading score for 8th-grade Asian/Pacific Islander students in 2019 (281) was not measurably different from the score in 2017, but it was higher than the score in 1992 (268). The reading score for 8th-grade American Indian/Alaska Native students in 2019 (248) was lower than the score in 2017 (253), but it was not measurably different from the score in 1994 (1994 was the first year data were available for 8th-grade American Indian/ Alaska Native students).

From 1992 through 2019, the average reading score for White 8th-graders was higher than the scores for their Black and Hispanic peers. The White-Black achievement gap in 2019 (28 points) was larger than the White-Black achievement gap in 2017 ( 25 points), but it was not measurably different from the achievement gap in 1992. Although the White-Hispanic achievement gap at grade 8 did not change measurably from 2017 to 2019, the achievement gap narrowed from 26 points in 1992 to 20 points in 2019.

The average reading scores for 4th- and 8th-grade students varied by state. Although 4th-grade reading scores fell nationally from 2017 to 2019, they were higher in 2019 than in 2017 in one state (Mississippi) and showed no measurable change in 32 states and the District of Columbia (table 221.40). In the remaining 17 states, 4th-grade reading scores were lower in 2019 than in 2017. The reading score for 8th-grade students was higher in 2019 than in 2017 in the District of Columbia, but the scores showed no measurable change in 19 states (table 221.60). In the remaining 31 states, the reading scores for 8th-grade students were lower in 2019 than in 2017.

For 12th-grade students, the most recent scores available are from 2015. The reading score for 12th-grade students in 2015 (287) was not measurably different from the score in 2013, but it was lower than the score in 1992 (292; table 221.10). At grade 12, the reading scores in 2015 for White (295), Hispanic (276), and Asian/Pacific Islander (297) students were not measurably different from the scores in 2013 and 1992. For Black students, the 2015 reading score (266) was lower than the 1992 score (273), but it was not measurably different from the 2013 score. The reading score for American Indian/Alaska Native students in 2015 (279) was not measurably different from the scores in 2013 and 1994 (1994 was the first year data were available for 12th-grade American Indian/Alaska Native students).

The White-Black achievement gap for 12th-grade students was larger in 2015 (30 points) than in 1992 (24 points), while the White-Hispanic achievement gap in 2015 (20 points) was not measurably different from the achievement gap in any previous assessment year.

## Long-Term NAEP

Reported on a scale of 0 to 500 , NAEP long-term trend results in reading are available for 13 assessment years going back to the first in 1971. The average reading score for 9-year-olds was higher in 2012 (221) than in assessment
years prior to 2008, increasing 5 points since 2004 and 13 points since 1971 (web-only table 221.85). The score for 13-year-olds in 2012 (263) was higher than in all previous assessment years except for 1992. The score for 17-yearolds was higher in 2012 (287) than in 2004 (283), but it was not measurably different from the score in 1971 (285).

White, Black, and Hispanic 9-, 13-, and 17-year-old students all had higher average reading scores in 2012 than they did in the first assessment year (which was 1975 for Hispanic students because separate data for Hispanics were not collected in 1971). The scores were higher in 2012 than in 2004 for White, Black, and Hispanic students at all three ages (web-only table 221.85). Reading results for 2012 continued to show gaps in scores between White and Black students (ranging from 23 to 26 points, depending on age) and between White and Hispanic students (about 21 points at all three ages). The WhiteBlack and White-Hispanic achievement gaps were smaller in 2012 than in the first assessment year at all three ages. For example, the White-Black reading gap for 17-yearolds was 53 points in 1971 compared with 26 points in 2012. Similarly, the White-Hispanic gap for 17 -year-olds narrowed from 41 points in 1975 to 21 points in 2012.

In 2012, female 9-, 13 -, and 17 -year-old students continued to have higher average reading scores than male students at all three ages (web-only table 221.85). The gap between male and female 9 -year-olds was 5 points in 2012; this was narrower than the gap in 1971 (13 points). The 8-point gender gap for 13-year-olds in 2012 was not measurably different from the gap in 1971. At age 17, the 8 -point gap between males and females in 2012 was not measurably different from the gap in 1971.

## Mathematics

## Main NAEP

The main NAEP mathematics assessment data for 4thand 8th-graders are reported on a scale of 0 to 500 . The average mathematics score for 4th-grade students in 2019 (241) was higher than the scores in both 2017 (240) and 1990 (213; table 222.10). At grade 4, the average mathematics scores in 2019 for Asian/Pacific Islander (260), White (249), and Black (224) students were not measurably different from the corresponding scores in 2017, but the mathematics score for each group was higher in 2019 than in 1990 (225, 220, and 188, respectively). The 2019 mathematics score for 4th-grade Hispanic students (231) was higher than the scores in both 2017 (229) and 1990 (200). The 2019 mathematics score for 4th-grade American Indian/Alaska Native students (227) was not measurably different from the scores in 2017 and 1996 (1996 was the first year data were available for 4th-grade American Indian/Alaska Native students).

In 2019 and in all assessment years since 1990, the average mathematics scores for White students in grade 4 have been higher than those of their Black and Hispanic peers. Although the White-Black and White-Hispanic achievement gaps at grade 4 did not change measurably from

2017 to 2019, the White-Black achievement gap narrowed from 32 points in 1990 to 25 points in 2019. The 4th-grade White-Hispanic achievement gap in 2019 (18 points) was not measurably different from the gap in 1990.

For 8th-grade students, the average mathematics score in 2019 (282) was lower than the score in 2017 (283), but it was higher than the score in 1990 (263). At grade 8, the mathematics scores for Asian/Pacific Islander (310), White (292), Hispanic (268), and Black (260) students in 2019 were not measurably different from the corresponding scores in 2017, but the score for each group was higher in 2019 than in 1990 (275, 270, 246, and 237, respectively). The mathematics score for 8th-grade American Indian/Alaska Native students in 2019 (262) was lower than the score in 2017 (267), but it was not measurably different from the score in 2000 (2000 was the first year data were available for 8th-grade American Indian/Alaska Native students).

In 2019 and in all assessment years since 1990, the average mathematics scores for White students in grade 8 have been higher than the scores for their Black and Hispanic peers. At grade 8, the White-Black ( 32 points) and White-Hispanic (24 points) achievement gaps in 2019 were not measurably different from the corresponding gaps in 2017 and 1990.

For 12th-grade students, the average mathematics score in 2015 (152) was lower than the score in 2013 (153), but it was not measurably different from the score in 2005, the earliest year with comparable data. At grade 12, the mathematics scores for Asian/Pacific Islander (170), White (160), Hispanic (139), and Black (130) students in 2015 were not measurably different from the scores in 2013, but the score for each group was higher in 2015 than in 2005 (163, 157, 133, and 127, respectively). The mathematics score for American Indian/Alaska Native students in 2015 (138) was not measurably different from the scores in 2013 and 2005.

In 2015, the mathematics score for White 12th-grade students was 30 points higher than the score for their Black peers and 22 points higher than the score for their Hispanic peers. The White-Black and White-Hispanic gaps in 2015 were not measurably different from the corresponding gaps in 2005 and 2013.

## Long-Term NAEP

NAEP long-term trend mathematics results, reported on a scale of 0 to 500, are available for 12 assessment years, going back to the first in 1973. In 2012, the average mathematics score for 9-year-olds (244) was higher than in all assessment years prior to 2008 (web-only table 222.85). The score for 9 -year-olds in 2012 was 5 points higher than in 2004 and 25 points higher than in 1973. The score for 13-year-olds in 2012 (285) was higher than in all previous assessment years. For 13-year-olds, the score in 2012 was 6 points higher than in 2004 and 19 points higher than in 1973. In contrast, the score for 17 -year-olds in 2012 (306) was not measurably different from the scores in 2004 and in 1973.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average mathematics scores in 2012 than in 1973 (web-only table 222.85). In comparison to 2004, scores were higher in 2012 for White 9- and 13-year-olds; Hispanic 13-year-olds; and Black 13-year-olds. Mathematics results for 2012 continued to show achievement gaps between White and Hispanic students (ranging from 17 to 21 points [based on unrounded scores], depending on age) and between White and Black students (ranging from 25 to 28 points). For 9-year-olds, the White-Black gap was lower in 2012 than in 1973. For 13- and 17-year-olds, both the White-Black and the White-Hispanic gaps were lower in 2012 than in 1973. For example, among 17-year-olds, the White-Black gap was 40 points in 1973 compared with 26 points in 2012, and the White-Hispanic gap was 33 points in 1973 compared with 19 points in 2012.

While there was no significant difference between the average mathematics scores of male and female 9- and 13-year-olds in 2012, among students still in high school at age 17, male students scored higher than female students (web-only table 222.85). At age 17, the 4-point gender score gap in 2012 was smaller than the gap in 1973 (8 points).

## Science

## Main NAEP

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared with results from earlier science assessments. Scores are based on a scale ranging from 0 to 300 (table 223.10). In 2015, the average 4th-grade science score (154) was higher than the score in 2009 (150). The 8th-grade science score in 2015 (154) was higher than the scores in 2009 (150) and in 2011 (152). The 12th-grade science score in 2015 (150) was not measurably different from the score in 2009.

While the scores for White 4th- and 8th-grade students remained higher than those for their Black and Hispanic peers in 2015, racial/ethnic achievement gaps in 2015 were smaller than in 2009. For example, at grade 4, the WhiteBlack achievement gap was 36 points in 2009 and 33 points in 2015, and the White-Hispanic achievement gap was 32 points in 2009 and 27 points in 2015. For 12th-grade students, in contrast, science scores for White students remained higher than those for their Black and Hispanic peers in 2015, and these racial/ethnic achievement gaps were not measurably different from 2009. In addition, the 5-point gender gap, which favored male 12th-graders, in 2015 was not measurably different from the gap in 2009.

## Skills of Young Children

In addition to student performance data available through NAEP, the Digest presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in
the acquisition of cognitive skills have been demonstrated at relatively early ages in the Early Childhood Longitudinal Study, Kindergarten Class of 2010-11 (ECLS-K:2011). Possible scores for the mathematics assessment range from 0 to 159, and possible scores for the reading assessment range from 0 to 167 .

Children who enrolled in kindergarten for the first time in 2010-11 showed similar patterns of score differences across racial/ethnic and socioeconomic status (SES) groups for both mathematics and reading. In fall 2010, average mathematics scores were higher for first-time kindergartners from high-SES families (43) than for those from low-SES families (29). White (39) and Asian (41) first-time kindergartners had higher mathematics scores than their Black (32), Hispanic (31), and American Indian/ Alaska Native (33) peers (table 220.40 and web-only table 220.41). Similarly, average early reading scores in fall 2010 were higher for White (56) and Asian (59) first-time kindergartners than for their Black (53), Hispanic (51), and American Indian/Alaska Native (50) peers. High-SES children (61) had higher early reading scores than low-SES children (49).

## School Violence

In 2017-18, some 71 percent of public schools reported one or more violent incidents, such as a serious violent incident, a physical attack, or a threat of a physical attack (table 229.10). This 2017-18 percentage was not measurably different from the percentage of schools reporting violent incidents in 1999-2000. Serious violent incidents is a subcategory of violent incidents that includes the crimes of rape, sexual assault, robbery, and aggravated assault. The percentage of schools reporting a serious violent incident in 2017-18 (21 percent) also was not measurably different from the percentage reporting a serious violent incident in 1999-2000. The percentage of schools reporting a physical attack or fight without a weapon in 2017-18 (66 percent) was not measurably different from the percentage in 1999-2000; however, the percentage of schools reporting a physical attack or fight with a weapon in 2017-18 (3 percent) was lower than the percentage in 1999-2000 (5 percent). Also, the percentage of schools reporting a threat of a physical attack without a weapon in 2017-18 (41 percent) was lower than the percentage in 1999-2000 (52 percent). One percent of public schools reported that a rape had occurred in 2017-18, which was not measurably different from the percentage in 1999-2000; however, the percentage of schools that reported that some other type of sexual assault had occurred in 2017-18 (5 percent) was higher than the percentage in 1999-2000 (2 percent). The percentage of schools reporting that a theft/ larceny had occurred in 2017-18 (33 percent) was lower than in 1999-2000 ( 46 percent), and also the percentage reporting that vandalism had occurred in 2017-18 ( 33 percent) was lower than in 1999-2000 (51 percent). Overall, schools reported 20 violent incidents per 1,000
students in 2017-18, which was lower than the 31 violent incidents per 1,000 students reported in 1999-2000 (webonly table 229.20).

On the National Crime Victimization Survey, students ages 12 to 18 reported a decrease in victimizations at school between 2000 and 2018 (web-only table 228.20). The total victimization rates for students ages 12 to 18 declined 61 percent, from 85 victimizations per 1,000 students in 2000 to 33 victimizations per 1,000 students in 2018. This pattern of decline in total victimization rates between 2000 and 2018 also held for thefts and violent victimizations overall. Thefts at school declined from a rate of 49 thefts per 1,000 students to 9 thefts per 1,000 students. The rate of violent victimization at school declined overall from 36 victimizations per 1,000 students in 2000 to 24 victimizations per 1,000 students in 2018. The rate of violent victimizations excluding simple assault at school was 6 per 1,000 students in 2018, which was not measurably different from the rate in 2000. The victimization rates for theft declined more rapidly than the victimization rates for violent crimes. In 2000, the victimization rates for theft were higher than the rates for violent crimes, but in 2018 the victimization rates for theft were lower than the rates for violent crimes.

## Revenues and Expenditures

After adjustment for inflation, current expenditures per student at public schools (based on fall enrollment) rose during the 1980s but remained stable during the first part of the 1990s. There was an increase of 37 percent from 1980-81 to 1990-91, followed by minor fluctuations from 1990-91 to 1994-95 (table 236.55 and figure 10). Current expenditures per student increased 34 percent from 1994-95 to 2008-09 but declined 5 percent from 2008-09 to 2012-13. Current expenditures per student increased 9 percent between 2012-13 and 2016-17, reaching \$12,258 in unadjusted dollars.

The federal share of public school revenues in 2016-17 (8.1 percent) was lower than in 2006-07 ( 8.5 percent; table 235.10 and figure 11). Also, the state share in 2016-17 (47.0 percent) was lower than in 2006-07 (47.4 percent). The remaining, local, share in 2016-17 (44.9 percent) was higher than in 2006-07 (44.1 percent).

'Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909-10 to 1959-60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas. ${ }^{2}$ Data for 1869-70 through 1959-60 are school year enrollment. Data for later years are fall enrollment. Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports
stimated by the
SPrior to 1919-20, data are for the number of different persons employed rather than number of positions.
${ }^{6}$ Prior to 1919-20, includes interest on school debt.
Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959-60 and later years are not entirely comparable with prior years.
Beginning in 1969-70, includes capital outlay by state and local school building authorities.
${ }^{\text {I }}$ Includes summer schools, community colleges, and adult education. Beginning in 1959-60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."
Excludes community colleges and adult education.
ncipals, teachers, and other nonsupervisory instructional staff. Data for 1959-60 and later years are estimated by the National Education Association.

Excludes current expenditures not allocable to pupil costs.
${ }^{3}$ "ADA" means average daily attendance in elementary and secondary schools.
${ }^{4}$ Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt. ${ }^{5}$ Per-day rates derived by dividing annual rates by average length of term.
${ }^{16}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department o Labor, adjusted to a school-year basis. No Consumer Price Index data available for years prior to 1919-20.
NOTE: Some data have been revised from previously published figures. Beginning in 1959-60, data include Alaska and WRCE: US. Department of Eductionse of rounding
Commissioner of Education, 1869-70 through 1909-10; Bienniar Education Statistics, Annual Report of the United State 1949-50; Statistics of State School Systems, 1959-60 and 1969-70; Statistics of Public Elementary States, 1919-20 throug Systems, 1979-80; Revenues and Expenditures for Public Elementary and Secondary Education, FY 1980; Schools and Staffing Survey (SASS), "Public School Questionnaire," 1999-2000, 2007-08, and 2011-12; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1989-90 through 2017-18; "National Public Education Financial Survey," 1989-90 through 2016-17; and "State Dropout and Completion Data File," 2012-13. -Not available.
Includes students reported as being enrolled in grade 13
${ }^{2}$ Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year
${ }^{3}$ Gross enrollment ratio (GER) based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. The GER allows for comparisons over time but is not intended to provide a precise measure of enrollment for any single year. Because some high school students are younger than 14 or older than 17, the GER is likely higher than the enrollment rate for the 14- to 17-year-old population. The GER differs from enrollment rates in other tables, which compare the population in a given age group with enrollment of persons in that age group only.
${ }^{4}$ Data are for 1927-28.
Data are for 1940-41.
${ }^{6}$ Estimated
Projected
NOTE: Includes enrollment in public schools that are a part of state and local schoo systems and also in most private schools, both religiously affiliated and nonsectarian. The enrollment for ungraded public school students was estimated based on the secondary proportion of ungraded students in prior years. The enrollment of ungraded private school
students was estimated based on the secondary proportion of ungraded students in students was estimated based on the secondary proportion of ungraded students in Detail may not sum to totals because of rounding. $\dagger$ Not applicable.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
'Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.
Enrollment data for 5-year-olds include only those students in preprimary programs and do not include those enrolled in primary programs.

NOTE: Preprimary programs include kindergarten and preschool (or nursery school) programs. "Preschool," which was referred to as "nursery school" in previous versions of this table, is defined as a group or class that is organized to provid educational experiences for children during the year or years preceding kindergarten. Data are based on sample surveys of the or nursing facilities). Prior to 2010, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. Detail may not sum to totals because of rounding OURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2018 (This table was prepared July 2019.)
[Standard errors appear in parentheses]

educational experiences for children during the year or years preceding kindergarten. Enrollment data for 5 -year-olds include only those students in preprimary programs and do not include those enrolled in primary programs. Race categories exclude persons of Hispanic ethnicity. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Detail may not sum to totals because of rounding

Commerce, Census Bureau, Current Population Survey (CPS), October, 2018. (This table was prepared July 2019.)

Table 202.30. Number of children under 6 years old and not yet enrolled in kindergarten, percentage participating in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2016
[Standard errors appear in parentheses]

See notes at end of table.

Table 202.30. Number of children under 6 years old and not yet enrolled in kindergarten, percentage participating in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2016-Continued
[Standard errors appear in parentheses]

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Center-based arrangements include day care centers, Head Start programs, preschools, prekindergartens, and other early childhood programs.
${ }^{2}$ Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.
${ }^{3}$ A child's primary arrangement is the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week.
${ }^{4}$ Children who spent an equal number of hours per week in multiple nonparental care arrangements.
${ }^{5}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and
nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was $\$ 24,257$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
${ }^{6}$ Excludes children living apart from their parents.
${ }^{7}$ Excludes children living in households with no mother or female guardian present.
NOTE: For the 2016 administration of the National Household Education Surveys Program (NHES), initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

'Includes students reported as being enrolled in grade 13.
${ }^{2}$ The prekindergarten, elementary total, and "all grades" counts include imputations for prekindergarten enrollment in California and Oregon.
${ }^{3}$ The prekindergarten, elementary total, and "all grades" counts include imputations for prekindergarten enrollment in California.
NOTE: Due to changes in reporting and imputation practices, prekindergarten enrollment for years prior to 1992 represent an undercount compared to later years. The total ungraded counts of students were prorated to the elementary and secondary levels based on prior
reports. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

- Not available.

Includes students reported as being enrolled in grade 13
Inputed by the National Center for Education Statistics.
DoDEA = Department of Defense Education Activity. Includes both domestic and overseas schools.

NOTE: The total ungraded counts of students were prorated to the elementary and secondary levels based on prior state reports of the percentage of elementary and of secondary ungraded students.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2017-18. (This table was prepared August 2019.)

Table 203.50. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region: Selected years, fall 1995 through fall 2029

## -Not available.

${ }^{1}$ Includes Pacific Islanders
${ }^{2}$ For this year, data on Pacific Islanders and students of Two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.
${ }^{3}$ Includes imputations for prekindergarten enrollment in California and Oregon.
${ }^{4}$ Includes imputations for prekindergarten enrollment in California.
${ }^{5}$ Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008, data on students of Two or more races were not collected. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 1995-96 through 2017-18; and National Elementary and Secondary Enrollment by Race/Ethnicity Projection Model, 1972 through 2029. (This table was prepared December 2019.)

Table 203.60. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2029

'Includes students reported as being enrolled in grade 13.
${ }^{2}$ For 2009, data on students of Two or more races were reported by only a small number of states. Therefore, the data are not comparable to the figures for later years.
Includes imputations for prekindergarten enrollment in California and Oregon.
NOTE: Race categories
 were prorated by state and grade to match state totals. Prior to 2008, the survey did not yet include separate categories
for "Asian" and "Pacific Islander" or a "Two or more races" category; each student could be assigned to only one of the for "Asian" and "Pacific Islander" or a "Two or more races" category; each student could be assigned to only one of the based on prior reports. Detail may not sum to totals because of rounding

${ }^{1}$ DoDEA = Department of Defense Education Activity. Includes both domestic and overseas schools
NOTE: Percentage distribution based on students for whom race/ethnicity was reported
which may be less than the total number of students in the state. Race categories exclude
persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

Table 204.10. Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000-01 through 2017-18

| State | Number of students enrolled |  |  |  | Number of students eligible for free/reduced-price lunch |  |  |  | Percent of students eligible for free/reduced-price lunch |  |  |  |

U.S. total includes imputation for nonreporting states.
${ }^{2}$ Imputation for survey nonresponse. State-level imputations for 2000-01 were based on the reported percentages for 2001-02 applied to the 2000-01 enrollments.
${ }^{3}$ Imputation for survey nonresponse. State-level imputations for 2016-17 and 2017-18 were based on the reported percentages for 2015-16 applied to the 2016-17 and 2017-18 enrollments.
${ }^{4}$ This state reported only the count of students who were eligible based on direct certification. Direct certification is the process by which children are certified for free meals based on household participation in one or more means-tested federal assistance programs-such as the Supplemental Nutrition Assistance Program (SNAP)-without the need for a household application.
${ }^{5}$ Imputation for survey nonresponse. State-level imputations for 2016-17 and 2017-18 were based on the reported percentages for 2014-15 (the most recent year for which percentages were reported) applied to the 2016-17 and 2017-18 enrollments
NOTE: The National School Lunch Program (NSLP) is a federally assisted meal program. Table reflects counts of students enrolled in all schools for which both enrollment data and free/reduced-price lunch eligibility data were reported. Data for 2016-17 and 2017-18 include students whose NSLP eligibility has been determined through direct certification.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2000-01, 2010-11, 2016-17, and 2017-18. (This table was prepared February 2020.)

## -Not available.

$\dagger$ Not applicable.
\#Rounds to zero.
${ }^{1}$ Data do not include Vermont, for which 2007-08 and 2008-09 data were not available. In 2006-07, the total number of 3- to 21-year-olds served in Vermont was 14,010
${ }^{2}$ Data in the 2016-17, 2017-18, and 2018-19 columns include 2015-16 data for 3 - to 21-year-olds in Wisconsin because 2016-17, 2017-18, and 2018-19 data were not available for children served in Wisconsin
${ }^{3}$ Data in the 2016-17 column include 2015-16 data for 3- to 5-year-olds in Nebraska because 2016-17 data were not available for children in that age group served in Nebraska ${ }^{4}$ Data in the 2017-18 column include 2016-17 data for 3- to 5 -year-olds in Minnesota and 6 - to 21-year-olds in Maine and Vermont because 2017-18 data were not available for children in those age groups served in those states.
${ }^{5}$ Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes
${ }^{6}$ For 1990-91, preschool children are not included in the counts by disability condition but are separately reported. For other years, preschool children are included in the counts by disability condition.

Based on total public school enrollment in prekindergarten through grade 12. For total public school enrollment, see table 203.20.
NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act (ESEA) as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for years prior to 1994-95 include children ages 0-21 served under Chapter 1 of ESEA. Data are for the 50 states and the District of Columbia only. Increases since 1987-88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3 - to 5 -year-old children with disabilities. Detail may not sum to totals because of rounding

2Data do not include Vermont, for which 2007-08 and 2008-09 data were not available. ${ }^{3}$ For 2008-09 and 2009-10, data on children of Two or more races were reported by only a ${ }_{4}$ For 2011-12 and lates. Therefore, these data are not comparable to figures for lateryears reported by the 50 states and the District of Columbia rather than the sum of counts reported for individual racialethnic groups. (Due to data limitations, summing the data for the racial/ethnic groups can result in overcounts. For 2017-18, summing these data would result in a total overcount of 13 children in the 3 - to 5 -year-old age group and 629 children in the 6 -to 21 -year-old age group. For 2018 -19 summing these data would 2 cult in a total overcount of 68 children in the 3 -to 5 -year-old age group and 178 children esult 6 to 21 vear-old age group) Includes 2015-16 data for chip.)
Inclat in Wisconsin. More recent data were not available for children in any age group served in Wisconsin.
data for 3- to 5-year-olds served in Nebraska because 2016-17 data were not available.
${ }^{7}$ Includes 2016-17 data for 3- to 5-year-olds served in Minnesota because 2017-18 data were not available.
${ }^{3}$ Includes 2016-17 data for 6- to 21-year-olds served in Maine and Vermont because 2017-18 data were not available
Based on total public school enrollment in prekindergarten through grade 12 by race/ ethnicity. For total public school enrollment by race/ethnicity, see table 203.60.
NOTE: Data include only those children served for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding

## -Not available.

${ }^{1}$ Includes some data for 2015-16 or 2016-17 due to unavailability of 2017-18 and 2018-19 data for specific states, as noted below.
${ }^{2}$ Based on projected total public school enrollment in prekindergarten through grade 12
For total public school enrollment, see table 203.20.
${ }^{3}$ Data for 6 - to 21-year-olds are for 2016-17 instead of 2017-18 because 2017-18 data for this age group were not available for this state.
${ }^{4}$ Data for 3- to 5-year-olds are for 2016-17 instead of 2017-18 because 2017-18 data for
this age group were not available for this state.
${ }^{5}$ Data are for 2015-16 because 2017-18 and 2018-19 data were not available for this state.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act (ESEA) as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for 1990-91 include children ages 0-21 served under Chapter 1 of ESEA.
SOURCE: U.S. Department of Education, Office of Special Education Programs, Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act, selected years, 1992 through 2006; and Individuals with Disabilities Education Act (IDEA) database, retrieved February 20, 2020, from https://www2.ed.gov/programs/osepidea/618-data/state-level-data-files/index.html. -Not available.
${ }^{1}$ The decrease in homeless students in 2014-15 was caused in part by changes to California's data collection systems. For more information, see section 1.9.1.1 of California's 2014-15 Consolidated State Performance Report, available at https://www2.ed.gov/admins/lead/ account/consolidated/sy14-15part1/ca.pdf.
${ }^{2}$ Includes imputed data for Kansas
${ }^{3}$ The sum of counts by grade.
Homeless children 3 to 5 years old who are not in kindergarten.
${ }^{5}$ Includes students reported as being enrolled in grade 13.
${ }^{6}$ Does not sum to the total number of homeless students because of missing data on primary nighttime residence. (Counts by primary nighttime residence differ from those shown in the total row by less than 2 percent for 2012-13 and less than 1 percent for all other years.)
${ }^{7}$ Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence)
${ }^{8}$ Includes living in cars, parks, campgrounds, temporary trailers-including Federal
Emergency Management Agency (FEMA) trailers-or abandoned buildings.
Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.
${ }^{10}$ Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see https://www2.ed.gov/about/inits/ed/edfacts/ eden-workbook.html
${ }^{11}$ Students who met the definition of eligible migrant children as outlined in the EDFacts workbook. Such students are either migratory workers or the children or spouses of
migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see https://www2.ed.gov/ about/inits/ed/edfacts/eden-workbook.html. Connecticut, the District of Columbia, Rhode Island, and West Virginia did not operate a migrant education program during the 2012-13, 2013-14, 2014-15, 2015-16, and 2016-17 school years and therefore had no data to provide on migrant homeless students.
${ }^{12}$ Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).
NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118-Homeless Students Enrolled" at https://www2.ed.gov/about/inits/ed/edfacts/sy-16-17-nonxml.html. Data include all homeless students enrolled at any time during the school year. Data exclude Puerto Rico and the Bureau of Indian Education. This table is based on state-level data unless otherwise noted.
SOURCE: U.S. Department of Education, National Center for Education Statistics, EDFacts file 118, Data Group 655, extracted June 5, 2019, from the EDFacts Data Warehouse (internal U.S. Department of Education Source); and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 2009-10 through 2016-17. (This table was prepared June 2019.)

\#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between
30 and 50 percent.
${ }^{1}$ Data are based on universe counts of schools and school districts; therefore, these figures
do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Percentages based on counts of between 1 and 3 gifted and talented students are displayed as ranges to protect student privacy.
SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection: 2004, 2006, 2011-12, and 2013-14. (This table was prepared June 2018.)

Table 205.10. Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2017

Table 205.15. Private elementary and secondary school enrollment, percentage distribution of private school enrollment, and private school enrollment as a percentage of total enrollment in public and private schools, by school orientation and grade: Selected years, fall 1999 through fall 2017

Table 205.30. Percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and selected characteristics: Selected years, fall 2005 through fall 2017
[Standard errors appear in parentheses]

## -Not available.

$\dagger$ Not applicable.
!lnterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
'Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.
${ }^{2}$ Elementary schools have grade 6 or lower and no grade higher than 8 . Secondary schools have no grade lower than 7 Combined schools include those that have grades lower than 7 and higher than 8 , as well as those that do not classify students by grade level.
${ }^{3}$ Race categories exclude persons of Hispanic ethnicity. Race/ethnicity was not collected for prekindergarten students ( 821,800 out of $5,719,990$ students in 2017). Percentage distribution is based on the students for whom race/ethnicity was reported ${ }^{4}$ Prior to 2009 , Pacific Islander data are included with Asian data. Separate data on Pacific Islander students and data on
NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding

-Not available.
\#Not applicable.
\#Rounds to zero.
Includes students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade.
${ }^{2}$ Elementary schools have grade 6 or lower and no grade higher than 8 . Secondary schools have no grade lower than 7 . Combined schools include those that have grades lower than 7 and higher than 8 , as well as those that do not classify students by grade level.
${ }^{3}$ Race/ethnicity was not collected for prekindergarten students ( 821,800 in fall 2017). Percentage distribution is based on the students for whom race/ethnicity was reported.

For 1999, Pacific Islander students are included under Asian. Prior to 2009, data were not collected on Pacific Islander tudents as a separate category.
${ }^{5}$ Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students
NOTE: Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1999-2000, 2009-10, and 2017-18. (This table was prepared August 2019.)

## $\dagger$ Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.
NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of
students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Some state counts are based on a census of schools in that state rather than a sample; for these counts, standard errors are not applicable. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2007-08 through 2017-18. (This table was prepared August 2019.)

Table 206．10．Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade，by selected child，parent，and household characteristics：Selected years， 1999 through 2016
［Standard errors appear in parentheses］

## $\dagger$ Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
${ }^{1}$ In 31 cases, questions about whether a student's school was assigned were not asked because parents reported the school as a private school, and it was only later identified as a public school based on administrative data. Due to the missing data on whether the school was assigned or chosen, these cases were included neither with assigned public schools nor with chosen public schools. These cases were included in the public school totals, however, and they could still be accurately classified as either traditional or charter schools based on administrative data.
${ }^{2}$ Includes all types of public noncharter schools.
${ }^{3}$ Includes American Indian/Alaska Native, Two or more races, and race/ethnicity not reported.
${ }^{4}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was $\$ 24,257$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation
NOTE: Data exclude homeschooled children. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

Table 207.10. Number of 3 - to 5 -year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 2001, 2012, and 2016-Continued
[Standard errors appear in parentheses]

-Not available.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
'The respondent was the parent most knowledgeable about the child's care and education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household.
The 2001 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.
${ }^{3}$ Excludes children living in households with no mother or female guardian present.
4Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data
collection; near-poor children are those whose family incomes ranged from the collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty
threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually
to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was $\$ 24,257$ Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount o NOTE- Prio, therefore, the measure of poverty status is an approximation.
an interviewer. NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. For NHES:2016, initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of estimates that did not meet reporting standards. Some data have been revised from previously published figures.
Survey of the National Household Education Surveys Pror Education Statistics, Early Chilahood Program Participation prepared October 2017.)

Table 207.30. Number of kindergartners through fifth-graders and percentage whose parents reported doing education-related activities with their children in the past week, by selected child, parent, and school characteristics: 2003, 2012, and 2016-Continued
[Standard errors appear in parentheses]

## -Not available.

$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
The 2003 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.
${ }^{2}$ The 2012 and 2016 questionnaires included an item specifying that the child was not able to speak. Children who were not able to speak are excluded from this analysis.
In 2003 ,
data collection; near-poor children are those whose family incomes ranged from the poverty threshold to the year prior to the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, or example, the poverty threshold for a family of four with two children was
$\$ 24,257$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
${ }^{5}$ Based on zip code of the household.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their based on parent reports. Excludd data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2012, and 2016). (This table
was prepared April 2019.)

-Not available.
PTO stands for Parent Teacher Organization and PTA stands for Parent Teacher Association.
The 2003 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.
${ }^{3}$ In 2003, education level was not collected for the second parent in a same sex couple.
${ }^{4}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was $\$ 24,257$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

Bate: While Node of he telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled children. The
respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2012, and 2016). (This table was prepared April 2019.)

## —Not available

${ }^{1}$ Includes imputations for California and Wyoming
NOTE: Includes only schools that reported both enrollment and teacher data. Ratios are
based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1990-91 through 2017-18. (This table was prepared February 2020. )

Table 208.20. Public and private elementary and secondary teachers, enrollment, pupil/teacher ratios, and new teacher hires: Selected years, fall 1955 through fall 2029

## -Not available.

${ }^{1}$ A teacher is considered to be a new hire for a public or private school if the teacher had not taught in that control of school in the previous year. A teacher who moves from a public to private or a private to public school is considered a new teacher hire, but a teacher who moves from one public school to another public school or one private school to another private school is not considered a new teacher hire.
${ }^{2}$ Estimated
${ }^{3}$ Projected.
NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported
by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding

## -Not available.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
'Data for 1987-88 through 1999-2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003-04.
${ }^{2}$ Includes Pacific Islander for 1987-88 through 1999-2000.
Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
4Teachers were classified as elementary o
school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those
teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6 . In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance o
grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5 . grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5 .
rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity.

| -Not available. <br> $\dagger$ Not applicable. <br> ! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent. <br> $\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater. <br> ${ }^{1}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies. <br> ${ }^{2}$ Data for 1999-2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003-04. <br> ${ }^{3}$ Includes Pacific Islander for 1999-2000. <br> ${ }^{4}$ Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those <br> teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5 . <br> ${ }^{5}$ Included under Other elementary. <br> ${ }^{6}$ Included under Other secondary. <br> NOTE: Excludes teachers who teach only prekindergarten. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity. <br> SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File" and "Private School Teacher Data File," 1999-2000, 2003-04, 2007-08, and 2011-12; <br> SASS, "Charter School Teacher Data File," 1999-2000; and National Teacher and Principal Survey (NTPS), "Public School Teacher Data File" and "Private School Teacher File," 2017-18. ## $\dagger$ Not applicable.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a
preponderance of grades taught being kindergarten through grade 6 . In general, secondary eachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5 .
${ }^{2}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Detail may not sum to totals because of rounding and cell suppression.

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
Teachers were asked how many school years they had worked as a teacher. In 2011-12 and earlier years, teachers were longer asked how many years were full time versus part time. Throughout this table, all school years are counted, regardless of whether teachers taught full time or part time.
${ }^{2}$ Teachers' base salary does not include any supplemental contracts for additional work at a school during the school year (e.g., coaching) or during the summer (e.g., teaching summer sessions). Also does not include any income from nonschool
${ }^{3}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
ncludes teachers with levels of education below the bachelor's degree (not shown separately)
${ }^{5}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes ertificate of advanced graduate studies.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Detail may not sum to totals because of rounding.
OURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), Public School Teacher Data File," 1990-91, 1999-2000, 2007-08, and 2011-12; and "Charter School Teacher Data File," 1999-2000; and National Teacher and Principal Survey (NTPS), "Public School Teacher Data File," 2017-18. (This table
was prepared November 2019.) was prepared November 2019 .

## -Not available.

${ }^{1}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
${ }^{2}$ The average monetary remuneration earned by FTE employees across all industries in a given year, including wages, salaries, commissions, tips, bonuses, voluntary employee contributions to certain deferred compensation plans, and receipts in kind that represent income. Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.
${ }^{3}$ Teachers at schools that are classified as elementary by state and local practice and composed of any span of grades not above grade 8. Preschool or kindergarten schools are included only if they are an integral part of an elementary school or a regularly established school system.
${ }^{4}$ Teachers at schools comprising any span of grades beginning with the next grade following elementary or middle school (usually 7,8 , or 9 ) and ending with or below grade 12 . Includes both junior high schools and senior high schools.
NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

－Not available．
\＃Rounds to zero．
Unterpret data with caution．The coefficient of variation（CV）for this estimate is between 30 and 50 percent
Reporting standards not met．Either there are too few cases for a reliable estimate or the coefficient of variation（CV）is 0 percent or greater．
Data for 1993－94 and 1999－2000 are only roughly comparable to data for later years，because the new category of Two or more races was introduced in 2003－04
Education specialist degrees or certificates are generally awarded for 1 year＇s work beyond the master＇s level．Includes certificate of advanced graduate studies．
${ }^{4}$ Excludes data for 4，930 public and 2，690 private school principals whose school level could not be determined NOTE：Data are based on a head count of full－time and part－time principals rather than on the number of full－time－equivalent principals reported in other tables．Detail may not sum to totals because of rounding and cell suppression．Some data have been revised from previously published figures．Race categories exclude persons of Hispanic ethnicity．

-Not available.
${ }^{1}$ Includes school district administrative support staff, school and library support staff,
student support staff, and other support services staff.
${ }^{2}$ Because of classification revisions, categories other than teachers, principals, librarians and guidance counselors are only roughly comparable to figures for years after 1980. ${ }^{3}$ Data included in column 8 .

NOTE: Data for 1949-50 through 1969-70 are cumulative for the entire school year, rather than counts as of the fall of the year. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, various years; Statistics of Public Elementary and Secondary Schools, various years; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986-87 through 2017-18. (This table was prepared August 2019. )

Table 213.20. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2017

| State or jurisdiction | Total | School district staff |  |  | School staff |  |  |  |  |  | Student support staff | Other support services staff |

## $\dagger$ Not applicable

${ }^{1}$ Because of expanded survey coverage, data for 1979-89 are not directly comparable with figures for later years.
NOTE: Size not reported (column 11) includes school districts reporting enrollment of zero and school districts whose enrollment counts were suppressed because they failed data quality edits. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and
other types of local education agencies, such as independent charter schools. Enrollment totals differ from other tables because this table represents data reported by regular school districts rather than states or schools. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 1979-80 through 2017-18. (This table was prepared March 2020.)

## -Not available

${ }^{1}$ Includes both independent districts and those that are a dependent segment of a local government. Also includes components of supervisory unions that operate schools but share superintendent services with other districts.
${ }^{2}$ Includes public agencies that provide education but are not school districts, such as juvenile correctional institutions, sheriff's offices, hospitals, residential treatment centers,
and university lab schools.
${ }^{3}$ New York City is counted as one school district.
${ }^{4}$ DoDEA $=$ Department of Defense Education Activity. Includes both domestic and overseas schools.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2016-17 and 2017-18. (This table was prepared February 2020.)

${ }^{2}$ Located inside an urban cluster that is more than 35 miles from an urbanized area.
Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.
${ }^{1}$ Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an ${ }^{2}$ Located outsid or more than 2.5 miles but less than or equal to 10 miles from an urban cluster
from an urb 10 miles from an urban cluster.

Data are based on locales of school districts rather than locales of schools as in the rest of the table. Data for 2014 and earlier years include only those ELL students who participated in ELL programs. Starting with 2015, data include all ELL students, regardless of program participation. Data exclude ELL students who are enrolled in prekindergarten.
${ }^{4}$ Average for schools reporting enrollment. Enrollment data were available for 95,230 out of 98,176 schools in 2014-15 95,240 out of 98,277 schools in 2015-16, 95,306 out of 98,169 schools in 2016-17, and 95,265 out of 98,480 schools in 217-18.
NOTE: Detail may not sum tot lis because of rounding. Race categories exclude persons of Hispanic ethnicity. Enrollment and ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate otals reported by states

## -Not available.

Includes schools that provide nontraditional education, address needs of students that typically cannot be met in regular schools, serve as adjuncts to regular schools, or fall outside the categories of regular, special education, or vocational ducation.
Includes schools beginning with grade 6 or below and with no grade higher than 8 .
Includes schools with no grade lower than 7 .
Includes schools beginning with grade 6 or below and ending with grade 9 or above.
${ }^{5}$ Magnet, charter, and virtual schools are also included under regular, special education, vocational, or alternative schools ${ }_{6}$ as appropriate.
Virtual schools are defined as having instruction during which students and teachers are separated by time and/or location SOURCE: U.S. Dialernet-connected computers or other electronic devices.
Elementary/Secondary School Universe Survey," 1990-91 through 2017-18. (This table was prepared November 2019.)

${ }^{1}$ The National School Lunch Program (NSLP) is a federally assisted meal program. To be eligible for free lunch under the program, a student must be from a household with an income at or below 130 percent of the poverty threshold; to be eligible for reduced-price lunch, a student must be from a household with an income between 130 percent and 185 percent of the poverty threshold. Data for 2017-18 include students whose NSLP eligibility has been determined through direct certification.
${ }^{2}$ Pupil/teacher ratio based on schools that reported both enrollment and teacher data
${ }^{3}$ Includes schools beginning with grade 6 or below and with no grade higher than 8 .

Includes schools with no grade lower than 7.
${ }^{5}$ Includes schools beginning with grade 6 or below and ending with grade 9 or above. NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

\#Rounds to zero.
${ }^{1}$ Because the data reflect reports by schools, totals differ from those in tables based on reports by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.
${ }^{2}$ Includes elementary, secondary, combined elementary/secondary, and other schools ${ }^{3}$ Includes schools beginning with grade 6 or below and with no grade higher than 8. ${ }^{4}$ Includes schools with no grade lower than 7 .
${ }^{5}$ Includes schools beginning with grade 6 or below and ending with grade 9 or above. ${ }^{6}$ Includes special education, alternative, and other schools not reported by grade span.
'Excludes special education schools, vocational schools, and alternative schools.
${ }^{8}$ Data are for schools reporting enrollments greater than zero. Enrollments greater than zero were reported for 95,240 out of 98,277 schools in 2015-16, 95,283 out of 98,158 in 2016-17, and 95,240 out of 98,469 in 2017-18.
NOTE: Detail may not sum to totals because of rounding.

## -Not available.

${ }^{1}$ Includes elementary, secondary, combined elementary/secondary, and other schools.
${ }^{2}$ Includes schools beginning with grade 6 or below and with no grade higher than 8 .
${ }^{3}$ Includes schools with no grade lower than 7.
${ }^{4}$ Includes schools beginning with grade 6 or below and ending with grade 9 or above.
${ }^{5}$ Includes special education, alternative, and other schools not reported by grade span.
${ }^{6}$ Excludes special education schools, vocational schools, and alternative schools.

NOTE: Data reflect reports by schools rather than by states or school districts. Percentage distribution and average enrollment calculations include data only for schools reporting enrollments greater than zero. Enrollments greater than zero were reported for 95,240 out of 98,469 schools in 2017-18. Detail may not sum to totals because of rounding.

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding

\#Rounds to zero.
NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1995-96 through 2017-18. (This table was prepared December 2019.)

Table 216.60. Number and percentage distribution of public school students, by percentage of students in school who are eligible for free or reduced-price lunch, school level, locale, and student race/ethnicity: Fall 2017

${ }^{1}$ Combined elementary/secondary schools and schools not reported by grade span are not shown separately.
${ }^{2}$ Includes schools beginning with grade 6 or below and with no grade higher than 8 . ${ }^{3}$ Includes schools with no grade lower than 7.
NOTE: Students with household incomes under 185 percent of the poverty threshold are eligible for free or reduced-price lunch under the National School Lunch Program (NSLP). In addition, some groups of children-such as foster children, children participating in the Head Start and Migrant Education programs, and children receiving services under the Runaway and Homeless Youth Act-are assumed to be categorically eligible to participate in the NSLP. Data include students whose NSLP eligibility has been determined through
direct certification. Also, under the Community Eligibility option, some nonpoor children who attend school in a low-income area may participate if the district decides that it would be more efficient to provide free lunch to all children in the school. For more information, see https://www.fns.usda.gov/nslp. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

## $\dagger$ Not applicable.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between
30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ One student could take courses from more than one provider. Therefore, the percentages sum to more than 100.

NOTE: Excludes homeschooled students and any enrolled students whose parents filled out the questionnaire that was intended for homeschooled students. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2016). (This table was prepared April 2019.)

Table 219.10. High school graduates, by sex and control of school; public high school averaged freshman graduation rate (AFGR); and total graduates as a ratio of 17-year-old population: Selected years, 1869-70 through 2029-30

[^21]${ }^{10}$ Includes estimate for Connecticut, which did not report graduates by sex. ${ }^{11}$ Projected by the National Center for Education Statistics (NCES).
${ }^{12}$ Public school data are projected by NCES; private school data are actual. NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates Some data have been revised from previously published figures. Detail may not sum to totals because of rounding and adjustments to protect student privacy.

## －Not available．

＇U．S．total includes estimates for nonreporting states
${ }^{2}$ Beginning in 1989－90，graduates from adult programs are excluded．
${ }^{3}$ Projected data from NCES 91－490，Projections of Education Statistics to 2002
${ }^{4}$ DoDEA $=$ Department of Defense Education Activity．Includes both domestic and overseas schools．
NOTE：Data include regular diploma recipients，but exclude students receiving a certificate
of attendance and persons receiving high school equivalency certificates．Some data have
been revised from previously published figures．Detail may not sum to totals because of rounding．

-Not available.
$\dagger$ Not applicable
${ }^{1}$ Data on students of Two or more races were not reported by all states; therefore, the data are not comparable to figures for 2010-11 and later years.
${ }^{2}$ Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2007-08, data on students of Two or more races were not collected separately. Some data have been revised

$\ddagger$ Reporting standards not met (too few cases).
fReporting standards not met (too few cases).
'The time when students are identified as having certain characteristics varies by state. Depending on the state, a student may be included in a category if the relevant characteristic is reported in 9th-grade data, if the characteristic is reported in 12th-grade data, or if it is reported at any point during the student's high school years.
Students identified as children with disabilities under the Individuals with Disabilities Education Act (IDEA).
${ }^{3}$ Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html.
${ }^{5}$ States either report data for a combined "Asian/Pacific Islander" group or report the "Asian" and "Pacific Islander" groups separately. Total represents either a single value reported by the state for "Asian/Pacific Islander" or an aggregation of separate values reported for "Asian" and "Pacific Islander." "Asian/Pacific Islander" includes the "Filipino" group, which only California and Hawaii report separately.
, Kentucky, and Oklahoma. Data were not available for these states because they had not yet started reporting ACGR data in 2010-11 and 2011-12.
${ }^{7}$ Includes imputed data for Idaho. Data were not available for Idaho because this state had not yet started reporting ACGR data in 2012-13.
IUse data with caution. The Alabama State Department of Education has indicated that their ACGR data for some years was misstated. For more information, please see the following press release issued by the state: https://www.alsde.edu/ $\mathrm{sec} / \mathrm{comm} /$ News \%20Releases $/ 12-08$-2016\%20Graduation\%20Rate\%20Review.pdf.
NOTE: The adjusted cohort graduation rate (ACGR) is the percentage of public high school freshmen who graduate with a regular diploma within 4 years of starting 9 th grade. Students who are entering 9 th grade for the first time form a cohort for the graduating class. This cohort is "adjusted by adding any students who subsequently transfer into the cohort and symbol have been "blurred" (rounded) to protect student privacy. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, Office of Elementary and Secondary Education, Consolidated State Performance Report, 2010-11 through 2017-18. (This table was prepared February 2020.)

Table 219.55. Among 15- to 24 -year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), by sex and race/ethnicity: 1972 through 2018
[Standard errors appear in parentheses]

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater
${ }^{1}$ The event dropout rate is the percentage of 15 - to 24 -year-olds in grades 10 through 12 who dropped out between one October and the next (e.g., the 2018 data refer to 10th- through 12th-graders who were enrolled in October 2017 but had dropped out by October 2018). Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate
${ }^{2}$ Includes all 15- to 24-year-olds who were enrolled in grades 10 through 12 in October 2017 ${ }^{3}$ Includes only those 15 - to 24 -year-olds who dropped out of grades 10 through 12 between October 2017 and October 2018. Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate.
${ }^{4}$ Age at the time of data collection. A person's age at the time of dropping out may be
1 year younger, because the dropout event could occur at any time over the previous 12-month period

United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.
${ }^{6}$ Individuals identified as having a disability reported difficulty with at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Prior to 2010, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years

-Not available.
$\dagger$ Not applicable.
The status completion rate is the number of 18- to 24-year-olds who are high school completers as a percentage of the total number of 18 - to 24 -year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high school diploma, as well as those with an alternative credential, such as a GED. ${ }^{2}$ Prior to 2003, Asian data include Pacific Islanders.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1972 through 2018. (This table was prepared November 2019.)

Table 219.67. High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), number of 18- to $\mathbf{2 4}$-year-olds not in high school, and number who are high school completers (status completers), by selected characteristics: Selected years, 2008 through 2018

## —Not available

$\dagger$ Not applicable
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ The status completion rate is the number of 18 - to 24 -year-olds who are high schoo completers as a percentage of the total number of 18- to 24-year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high school diploma, as well as those with an alternative credential, such as a GED.
${ }^{2}$ Includes all 18- to 24-year-olds who are not enrolled in high school or a lower level of education.
${ }^{3}$ Status completers are 18- to 24-year-olds who are not enrolled in high school or a lowe level of education and who also are high school completers-that is, have either a high school diploma or an alternative credential, such as a GED.
${ }^{4}$ United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad
to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.
${ }^{5}$ Individuals identified as having a disability reported difficulty in at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing doing errands alone, concentrating, remembering, or making decisions.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and the suppression of cells that do not meet National Center for Education Statistics reporting standards.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 2008 through 2018. (This table was prepared October 2019.)

Table 219.70. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2018

$\dagger$ Not applicable
${ }^{1}$ Includes other racial/ethnic groups not separately shown
${ }^{2}$ Based on the April 1960 decennial census.
${ }^{3}$ For 1967 through 1971, White and Black include persons of Hispanic ethnicity.
${ }^{4}$ Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
${ }^{5}$ After 2002, White and Black exclude persons of Two or more races.
NOTE: Status dropouts are 16- to 24-year-olds who are not enrolled in school and who
have not completed a high school program, regardless of when they left school. People
who have received equivalency credentials, such as the GED, are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Prior to 2010, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2018. (This table was prepared November 2019.)

Table 219.75. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and percentage distribution of status dropouts, by labor force status and years of school completed: Selected years, 1970 through 2018
[Standard errors appear in parentheses]

—Not available.
$\dagger$ Not applicable
'Data are not comparable to employment and unemployment rate data produced by the Bureau of Labor Statistics because the percentage distributions presented here include persons who are not in the labor force. The labor force consists of those who are employed and those who are unemployed (i.e., seeking employment); persons who are neither employed nor seeking employment are not in the labor force.
${ }^{2}$ Includes persons who were employed but not at work during the survey week.
${ }^{3}$ Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

NOTE: Status dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received equivalency credentials, such as the GED, are counted as high school completers. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Prior to 2010, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. Detail may not sum to totals because of rounding

$\dagger$ Not applicable
${ }^{1}$ Received a certificate of completion, modified diploma, or some similar document, but did not meet the same standards for graduation as those for students without disabilities, ${ }^{2}$ Each state determines its maximum age to receive special education services. At the time these data were collected, the maximum age across states generally ranged from 20 to 22 years old
"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit for any of the other reasons described. Includes students previously categorized as "moved, not known to continue."
4"Transferred to regular education" was previously labeled "no longer receives specia education."
5"Moved, known to be continuing" is the total number of students who moved out of the administrative area or transferred to another district and are known to be continuing in an educational program.
${ }^{6}$ Age data are as of fall of the school year, so some students may have been 1 year older at the time they exited school.
Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

NOTE: Data are for the 50 states, the District of Columbia, the Bureau of Indian Education, American Samoa, the Federated States of Micronesia, Guam, the Northern Marianas, Puerto Rico, the Republic of Palau, the Republic of the Marshall Islands, and the U.S. Virgin Islands. Includes imputations for missing or unavailable data from Illinois in 2016-17 and Vermont in 2017-18. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of reporting anomalies and rounding

[^23]Table 220.40. Fall 2010 first-time kindergartners' reading scale scores and standard deviations through spring of fifth grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2016Continued
${ }^{1}$ Reflects performance on questions measuring basic skills (e.g., word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appro
${ }^{2}$ Derived from child's approaches to learning scale score in fall of the kindergarten year. 'Derived from child's approaches to learning scale score in fall of the kindergarten year This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to a child exhibits positive learning behaviors more often. Fall 2010 scores were categorized into the four anchor points on the original scale-1 (never), 2 (sometimes), 3 (often), and 4 (very often)-by rounding the mean score to the nearest whole number.
${ }^{3}$ The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.
${ }^{4}$ A two-parent household may have two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include biological or adoptive parents, the guardian or guardians may be related or unrelated to the child.
${ }^{5}$ Two or more languages (which could include English) were spoken in the child's home and the parent respondent was unable to specify which language was the primary one (the one spoken most of the time).
Parents' highest level of education is the highest level of education achieved by either o the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010.
Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or poverty status
${ }^{10}$ High school not completed by any parent or guardian living with the child. education and occupations and household income during the child's kindergarten year. NOTE: Estimates weighted by W9C9P 20. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. The same children were assessed in spring 2012 (when the majority were in first grade), spring 2013 (when the majority were in second grade), spring 2014 (when the majority were in third grade), spring 2015 (when the majority were in fourth grade), and spring 2016 (when the majority were in fifth grade). Estimates differ from previously published figures because reading scale scores were recalculated to represent he kindergarten through fifth-grade assessment item pools and because weights were adjusted to account for survey nonresponse a each data collection wave, including the latest round of data collection (spring 2016). Race categories exclude persons of Hispanic ethnicity.

## —Not available.

$\dagger$ Not applicable
$\ddagger$ Reporting standards not met. Participation rates fell below the required standards for reporting.
${ }^{1}$ Did not meet one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.
${ }^{2}$ Did not meet one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
${ }^{3}$ Prior to 2005, NAEP divided the DoDEA schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: Scale ranges from 0 to 500. State-level data for 1992 and 1994 are not available. Table does not include private schools, Bureau of Indian Education schools, or (except in the final row) DoDEA schools. Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2002, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, and 2019 Reading Assessments, retrieved November 3, 2019, from the Main NAEP Data Explorer (https://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2019.)

Table 222.10. Average National Assessment of Educational Progress (NAEP) mathematics scale score, by sex, race/ethnicity, and grade: Selected years, 1990 through 2019

## -Not available

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater
${ }^{1}$ Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.
${ }^{2}$ Accommodations were not permitted for this assessment.
${ }^{3}$ Because of major changes to the framework and content of the grade 12 assessment, scores from 2005 and later assessment years cannot be compared with scores from earlier assessment years. Therefore, this table does not include scores from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to scale score comparisons between earlier years, see the Digest of Education Statistics 2009 table 138 (https://nces.ed.gov/programs/digest/d09/tables/dt09 138.asp)

NOTE: For the grade 4 and grade 8 assessments, the scale ranges from 0 to 500 . For the grade 12 assessment, the scale ranges from 0 to 300. Includes public, private, Bureau of Indian Education, and Department of Defense Education Activity schools. For 1996 and later years, includes students tested with accommodations (3 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, and 2019 Mathematics Assessments, retrieved November 6, 2019, from the Main NAEP Data Explorer (https://nces.ed.gov/nationsreportcard/ naepdata). (This table was prepared November 2019.)

Table 222.20. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics achievement levels, by grade and selected student characteristics: Selected years, 2005 through 2019
[Standard errors appear in parentheses]

## -Not available.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
NAEP Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
${ }^{2}$ NAEP Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
students tested with accommodations (3 to 14 percent of all students, depending on grade level and year); excludes only
those students with disabilities and English language learners who were unable to be tested even with accommodations 1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.

-Not available.
$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met. Participation rates fell below the required standards for reporting.
${ }^{1}$ Accommodations were not permitted for this assessment.
${ }^{2}$ The 1996 data in this table do not include students who were tested with accommodations Data for students tested with accommodations are not available at the state level for 1996. ${ }^{3}$ Did not meet one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.
${ }^{4}$ Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
${ }^{5}$ Prior to 2005, NAEP divided the DoDEA schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the domestic and overseas schools into a
single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: Scale ranges from 0 to 500. State-level data for 1990 are not available. Table does not include private schools, Bureau of Indian Education schools, or (except in the final row) DoDEA schools. For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1996, 2000, 2003, 2005, 2007, 2009 , 2011, 2013, 2015, 2017, and 2019 Mathematics Assessments, retrieved October 30, 2019, from the Main NAEP Data Explorer (https://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2019.)

Table 222.60. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by state: Selected years, 1990 through 2019

For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.

-Not available.
$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Scale ranges from 0 to 300 for all three grades, but scores cannot be compared across grades. For example, the average score of 166 for White 4th-graders in 2015 does not denote higher performance than the score of 160 for White 12th-graders.
"Prior to 2011, students in the "Two or more races" category were categorized as "Unclassified."
${ }^{3}$ The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).
${ }^{4}$ The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it ${ }^{5}$ The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. In 2015, for example, the average score for all 4th-graders was 154, and the standard
deviation was 35 . This means that one would expect about two-thirds of the students to have scores between 189 (one standard deviation above the average) and 119 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.
${ }^{6}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
${ }^{7}$ Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
${ }^{8}$ Advanced signifies superior performance.
NOTE: In 2011, only 8th-grade students were assessed in science. Includes students tested with accommodations ( 7 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 1 to 3 percent of all students). Race categories exclude persons of Hispanic ethnicity.

\#Rounds to zero.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate) or the standard error could not be accurately determined.
${ }^{1}$ Scale ranges from 0 to 300.
${ }^{2}$ TEL achievement levels are for performance on the TEL assessment overall, rather than performance on any specific content area.
${ }^{3}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
${ }^{4}$ Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
${ }^{5}$ Advanced signifies superior performance.
${ }^{6}$ In addition to students with an Individualized Education Program (IEP), also includes students with a 504 plan.
'These data are based on students' responses to questions about their parents' education level. Data for students whose parents have an unknown level of education are included in table totals, but not shown separately.
${ }^{8}$ Nonresponse rate for this item was greater than 15 percent but not greater than 50 percent ${ }^{9}$ Bureau of Indian Education and Department of Defense schools are excluded from the Public category but included elsewhere in this table. The Private category includes Catholic and Other private schools.
NOTE: Includes students tested with accommodations (11 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all 8th-graders). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\not$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
'For each course category, percentages include only students who earned at least the number of credits shown in parentheses. Excludes prealgebra.
${ }^{4}$ For 2000 and later years, includes International Baccalaureate (IB) courses in addition to Advanced Placement (AP) and honors courses.
${ }^{\text {s }}$ Percentages include only students who earned at least one credit in each of the indicated courses.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the student graduated with either a standard or honors diploma, (2) the student's transcript contained 16 or more Carnegie units, and (3) the student's transcript contained more than 0 Carnegie units in English courses. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1 -year course $(0.5=$ one semester; $1.0=$ one academic year). Data differ slightly
from figures appearing in other National Center for Education Statistics reports because of differences in taxonomies and from figures appearing in other National Center for Education Statistics reports because of differences in taxonomies and separately shown. Some data have been revised from previously published figures.

## $\dagger$ Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Average credits earned are shown only for those graduates who earned any credit in the specified language while in high school. For these students, however, credits earned include both courses taken in high school and courses taken prior to entering high school.

Credits are shown in Carnegie units. The Carnegie unit is a standard unit of measurement that represents one credit for the completion of a 1-year course.
NOTE: For a transcript to be included in the analyses, it had to meet three requirements. (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses.

| -Not available. $\dagger$ Not applicable. |  |  |  |  |  |  |  |  |  |  | The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| !!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent. <br> $\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 |  |  |  |  |  |  |  |  |  |  | Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation. |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  | one item for Asian and a separate item for Pacific Islander. | telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years |  |  |  |  |  |  |  |  |  |  |  |  |  |
| ${ }^{2}$ For 2003, the "Two or more races" row also includes children whose race was reported as "Other." The "Other" race category was not included on the 2012 and 2016 questionnaires. |  |  |  |  |  |  |  |  |  |  | could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| ${ }^{3} \mathrm{In} 2003$, education level was not collected for the second parent in a same sex couple. |  |  |  |  |  |  |  |  |  |  | Excludes children whose programs have no classes with lettered grades. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. |  |  |  |  |  |  |  |  |  |  |  |  |  |
| ${ }^{4}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data |  |  |  |  |  |  |  |  |  |  | SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in |  |  |  |  |  |  |  |  |  |  |  |  |  |
| collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. |  |  |  |  |  |  |  |  |  |  | Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2012, and 2016). was prepared June 2018.) |  |  |  |  |  |  |  |  |  |  |  |  |  |

Table 228.30. Percentage of students ages 12-18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2017

-Not available.
$\dagger$ Not applicable.
Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Race categories exclude persons of Hispanic ethnicity. Prior to 2003, separate data for
Asian students, Pacific Islander students, and students of Two or more races were not Asian stud
collected.
${ }^{2}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural).
${ }^{3}$ Serious violent victimization is also included in violent victimization.

NOTE: "Total victimization" includes theft and violent victimization. A single student could report more than one type of victimization. In the total victimization section, students who reported both theft and violent victimization are counted only once. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "Violent victimization" includes the serious violenterien as ons assault. "At school" includes in the school building, onschool prom bus, and, from 2001 onward, going to and from school Some data have been revised from previously published figures
(Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, 1995 through 2017. (This table was prepared September 2018.)

Table 229.10. Percentage of public schools recording incidents of crime at school, percentage reporting incidents of crime at school to police, and number of incidents recorded or reported, by type of crime: Selected years, 1999-2000 through 2017-18

Table 229.10. Percentage of public schools recording incidents of crime at school, percentage reporting incidents of crime at school to police, and number of incidents recorded or reported, by type of crime: Selected years, 1999-2000 through 2017-18-Continued

[^26]The survey items "Distribution of illegal drugs" and "Possession or use of alcohol or illegal drugs" appear only on the 1999-2000 and 2003-04 questionnaires. Different alcohol- and drug-related survey items were used on the SSOCS questionnaires for later years.
${ }^{6}$ The survey items "Distribution, possession, or use of illegal drugs" and "Distribution, possession, or use of alcohol" appear only on the SSOCS questionnaires for 2005-06 and later years.
The survey item "Inappropriate distribution, possession, or use of prescription drugs" appears only on the SSOCS questionnaires for 2009-10 and later years.
school. "At school" was defined to include activities the person most knowledgeable about crime and safety issues at the and at places that hold school-sponsored events or activities in school buildings, on school grounds, on school buses, occurred before, during, and after normal school hours or when school activities ore events were in session. Detail may no sum to totals because of rounding and because schools that recorded or reported more than one type of crime inciden were counted only once in the total percentage of schools recording or reporting incidents.

- Not available.

IInterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent. $\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
Includes schools that reported the problem happens either at least once a week or daily.
Includes schools that reported the problem happens at all at their school during the school year. In the 1999-2000 survey administration, the questionnaire specified "undesirable" gang activities and "undesirable" cult or extremist group activities As of 2013-14, to the 2007-08 survey administration, the questionnaire wording was "student racial
${ }^{4}$ The 2015-16 and 2017-18 questionnaires defined bullying as "any unwanted aggressive behavior(s) by another youth or group of youths who are not siblings or current dating partners that involves an observed or perceived power imbalance and is repeated multiple times or is highly likely to be repeated." The term was not defined for respondents in previous survey administrations.
Prior to 2015-16, the questionnaire asked about "student harassment of other students based on sexual orientation or gender dentity (i.e., lesbian, gay, bisexual, transgender, questioning)" in one single item. The 2015-16 and 2017-18 questionnaires item asking about "student harassment of other students based on gender identity." For 2015-16 and 2017-18, schools are included in this column if they responded "daily" or "at least once a week" to either or both of these items; each school is counted only once, even if it indicated daily/weekly frequency for both items. The 2015-16 and 2017-18 questionnaires provided definitions for sexual orientation-"one's emotional or physical attraction to the same and/or opposite sex"一-and gender identity-"one's inner sense of one's own gender, which may or may not match the sex assigned at birth." These erms were not defined for respondents in previous survey administrations.
using the School Survey on Crime and Safety (SSOCS). The 2013-14 FRSS
with SSOCS data. However, all respondents to the 2013-14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas all respondents to SSOCS had only the option of completing 2013-14 FRSS survey to 2017-18, when SSOCS experimented with offering an online option os somple size and difference in survey administration may have impacted the 2013-14 results.
Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the grade is not lower than rade 9. Combined schools include all other combinations of grades, including K-12 schools.

信 tudents of Two or more races
Violent incidents" include rape or attempted rape, sexual assault other than rape, physical attack or fight with or withou weapon, threat of physical attack or fight with or without a weapon, and robbery with or without a weapon. Respondent were instructed to include violent incidents that occurred before, during, or after normal school hours or when schoo activities or events were in session.
Ne. " Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session, unless the survey specified otherwise.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ In 2005, the period covered by the survey question was "during the last 6 months," whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for 2005 are comparable to those for 2007 and later years.
${ }^{2}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." These data by metropolitan status were based on the location of households and differ from those published in Student Reports of Bullying: Results From the 2015 School Crime

Supplement to the National Crime Victimization Survey, which were based on the urbancentric measure of the location of the school that the child attended.
${ }^{3}$ Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in Student Reports of Bullying: Results From the 2015 School Crime Supplement to the National Crime Victimization Survey.
NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, selected years, 2005 through 2017. (This table was prepared September 2018.)

Table 231.10. Percentage of students in grades 9-12 who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2017

-Not available.
†Not applicable.
Interpret data with caution. The coefficient of variation (CV for this estimate is between 30 and 50 percent.
"Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent. many times in the past 12 months they had been in a physical fight.
${ }^{2}$ Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing
data on race from 1993 and 1997 with data from later years.

## ${ }^{3}$ Students were a

${ }^{4}$ Refers to the Stand Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)," In the question asking students about physical fights at school, "on school property" was not defined for survey respondents, NOTE: Race categories exclude persons of Hispanic ethnicity.

-Not available.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.
Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Awo or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
${ }^{3}$ Students were asked which sexual orientation - "heterosexual (straight)," "gay or lesbian," "bisexual," or "not sure" -best escribed them.
${ }^{4}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
In the question about using marijuana at school, "on school property" was not defined for survey respondents. Data on marijuana use at school were not collected from 2013 onward
NOTE: Race categories exclude persons of Hispanic ethnicity
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2017. (This table was prepared August 2018.)

\#Rounds to zero.
An out-of-school suspension is an instance in which a student is temporarily removed from his or her regular school for disciplinary purposes for at least half a day (but less than the remainder of the school year) to another setting (e.g., home or behavior center).
xxpulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes, with or without the continuation of educational services, for the remainder of the schoo year or longer in accordance with local education agency policy. Expulsions and ${ }^{3}$ Data by race/ethnicity exclude students with disabilities served only under Section 504 (not receiving services under IDEA).
 quality review.
tudents receiving of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2013-14 school year by the student enrollment based on
a count of students taken on a single day between September 27 and December 31. Percentages based on suspension or expulsion counts of between 1 and 3 students are displayed as ranges to protect student privacy. Race categories exclude persons of Hispanic ethnicity.
Estimations by Discipline Type" and "2013-14 Estimations for Enrollment." (This table was prepared January 2018.)

$\dagger$ Not applicable
${ }^{1}$ Data for 2013-14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013-14 FRSS survey was designed to allow comparisons with SSOCS data. However, all respondents to the 2013-14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas all respondents to SSOCS had only the option of completing a paper survey prior to 2017-18, when SSOCS experimented with offering an online option to some respondents. The 2013-14 FRSS survey also relied on a smaller sample than SSOCS. The FRSS survey's smaller sample size and difference in survey administration may have impacted the 2013-14 results.
${ }^{2}$ Prior to 2017-18, the examples of controlled access to buildings included only "locked or monitored doors" and did not include loading docks.
${ }^{3}$ Prior to 2015-16, the questionnaire asked only if visitors were required "to sign or check in" and did not include the requirement to wear badges.
${ }^{4}$ In the 2017-18 questionnaire, a single item asked about drug testing "for students participating in athletics or other extracurricular activities." Prior to 2017-18, the questionnaire included one item about testing for athletes, followed by a separate item about testing for students in other extracurricular activities. For years prior to 2017-18, schools are included in this row if they answered "yes" to either or both of these items; each school is counted only once in this row, even if it answered "yes" to both items.
${ }^{5}$ The wording of this item was revised in 2015-16. Prior to 2015-16, the item asked whether students were required "to pass through metal detectors each day."
${ }^{6}$ The 2017-18 questionnaire included only a single item about random sweeps for contraband, and it provided locker checks and dog sniffs as examples of types of sweeps. Prior to 2017-18, the questionnaire included one item about dog sniffs for drugs, followed by a separate item about sweeps not including dog sniffs. For years prior to 2017-18 schools are included in this row if they answered "yes" to either or both of these items each school is counted only once in this row, even if it answered "yes" to both items.
${ }^{7}$ For example, a system for reporting threats through online submission, telephone hotline, or written submission via drop box.
${ }^{8}$ Prior to 2017-18, the questionnaire asked about prohibiting the "use of cell phones and text messaging devices during school hours." It did not refer to "nonacademic" use or "smartphones."
NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school

X Denotes that the state has a policy. A blank denotes that the state does not have a policy. ${ }^{1}$ Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first
${ }^{2}$ Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency
Parent/guardian may delay child's miry und a later age per staw lagulation.
Student may continue in the programe 18 for Manaty
${ }^{5}$ Attendance is compulsory until age 18 forn a high school diploma prior to reaching their 18th birthday
${ }^{\circ}$ Through age 21 or until child graduates with a high school or special education diploma Sequa
Some schools operate on a multitrack system; the schools are open year round, but inferent cohorts start and end at different times.
${ }^{3}$ District must offer either a half-day or full-day program
${ }^{9}$ Children enrolled in preschool programs (who must be 4 years old on or before September 15) are considered to be of compulsory school attendance age
${ }^{10}$ Not specified in statute, rules, or regulations.
${ }^{11}$ To be determined by rules and regulations adopted by the state board.
${ }^{12}$ All districts adopted a policy to raise the upper compulsory school age from 16 to 18
${ }_{13}$ Thildren from birth fhrough
${ }^{14}$ Children from birth through age 2 are eligible for addional
${ }^{14}$ Attendance is required unless the student otherwise satisfactorily passes an academic readiness screeng upon enrolment in grade 1

作 15 and not age 20 before start of school year
${ }^{16}$ Each school committee is permitted to establish its own minimum age for school attendance, provided that it is not older than the mandatory minimum age established by the state.
Policies about year-round schools are decided locally.
${ }^{18}$ State did not participate in 2008 online survey. Data are from 2006.
${ }^{19}$ Abbott Districts are required to offer full-day kindergarten and students are required to attend.
${ }^{20}$ Local boards of education can require school attendance until age 17 unless employed In Syracuse, New York City, Rochester, Utica, Buffalo, Cohoes, Watervliet, and Yonkers districts are required to offer full-day kindergarten and children are required to attend full-day kindergarten
Student may complete school year if 21st birthday occurs while attending school. ${ }^{22}$ All children must attend kindergarten before age 7.
${ }^{23}$ Children with severe disabilities may begin receiving services at age 3.
${ }^{24}$ Children must attend in districts that offer kindergarten.
${ }^{25}$ School districts must establish and maintain relationships with a district that offers fullNOTE. The Educ

## - Not available.

Not applicable.
X Denotes that the state has a policy. A blank denotes that the state does not have a policy.
Or an equivalent number of hours or minutes of instruction per year.
Includes time for in-service or staff development or parent-teacher conferences. No more than 22 hours of staff development can be counted toward Idaho's instructional time requirement, and no more than 30 hours of staff development can be counted toward Oklahoma's requirement.
${ }^{\circ}$ Fees permitted at the high school level for nonrequired or supplementary textbooks.
${ }^{5}$ State Department of Education prepares a list of suggestions, but the districts choose
Through 2014-15, districts were allowed to shorten the 180-day instructional year to 175 days without fiscal penalty
Select dists.
school year.
${ }^{\circ}$ No statewide policy; varies by distric.
${ }^{10} 1996$ data.
${ }^{11}$ Does not apply to charter and multitrack schools.
${ }^{12}$ Fees for lost or damaged books permitted.
${ }^{131} 1998$ data.
${ }^{1}$ Fees permitted, but if 5 percent or more of the voters in a district petition the school board, a majority of the district's voters may decide to furnish free textbooks to students.
${ }^{\circ}$ Fees permitted for students in grades 9-12, but students who qualify for free or reduced-price lunch are exempted Instructional time for graduating seniors may be reduce
Refundable or security deposits permitted.
Local districts may select textbooks not on the
he state recommended list provided the textbooks meet specific criteria and e selection is based on recommendations by the district's curriculum materials review committee.
A district
Adistrict may provide free textbooks to students when, in its judgment, the best interests of the district will be served. NOTE: Minimum number of instructional days refers to the actual number of days that pupils have contact with a teacher Some states allow for different types of school calendars by setting instructional time in both days and hours, while others use only days or only hours. For states in which the number of days or hours varies by grade, the relevant grade(s) appear
in parentheses. For states that specify minimum hours both for part-day kindergarten and for full-day kindergarten, a slash separates the part-day hours from the full-day hours. SOURCE: Council of Chief State School Officers, Key State Education Policies on PK-12 Education, 2000 and 2006 Education Commission of the States, StateNotes, Number of Instructional Days/Hours in the School Year (August 2011 and October 2014 revisions), retrieved September 22, 2011, from http://www.ecs.org/clearinghouse/95/05/9505.pdf and

## \#Rounds to zero.

'Excludes revenues from other in-state school systems
${ }^{2}$ Includes general formula assistance, staff improvement programs, school lunch programs capital outlay and debt service programs, transportation programs, all other revenues from state sources, state payments on behalf of the local education agency, Census state NCES local revenue, and unspecified state revenue.
${ }^{3}$ Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.
${ }^{4}$ Includes tuition fees, transportation fees, textbook sales and rentals, school lunch revenues, district activity receipts, other student fees, and private contributions.
${ }^{5}$ Includes revenues from other taxes, rents and royalties, sales and services, interest earnings, and other local revenues.
${ }^{6}$ Includes expenditures for guidance, health, attendance, social work, student accounting, counseling, student appraisal, information, record maintenance, placement services, and medical, dental, nursing, psychological, and speech pathology services.
Includes expenditures for curriculum development, staff training, supervision of instruction service improvements, academic assessment, and media, library, and instruction-related technology services
NOTE: Detail may not sum to totals because of rounding

## -Not available.

${ }^{1}$ Includes expenditures for summer schools, adult education, community colleges, and community services.
${ }^{2}$ Prior to 1969-70, excludes capital outlay by state and local school housing authorities ${ }^{3}$ Prior to 1959-60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services. ${ }^{5}$ Plant operation also includes plant maintenance.
Data not comparable to figures prior to 1989-90.
${ }^{6}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Beginning in 1959-60, includes Alaska and Hawaii. Beginning in 1989-90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989-90, extensive changes were made in the data collection procedures. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.
Includes expenditures for property and for buildings and alterations completed by school district staff or contractors. Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

Includes expenditures for guidance, health, attendance, and speech pathology services.
Includes expenditures for curriculum development, staff training, libraries, and media and computer centers. NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

－Not available．
＇Data for 1919－20 to 1953－54 are based on school－year enrollment．
${ }^{2}$ Unadjusted（or＂current＂）dollars have not been adjusted to compensate for inflation． ${ }^{3}$ Constant dollars based on the Consumer Price Index，prepared by the Bureau of Labor Statistics，U．S．Department of Labor，adjusted to a school－year basis．
${ }^{4}$ Excludes＂Other current expenditures，＂such as community services，private schoo programs，adult education，and other programs not allocable to expenditures per student at public schools．
${ }^{5}$ Estimated．
NOTE：Beginning in 1980－81，state administration expenditures are excluded from both ＂total＂and＂current＂expenditures．Current expenditures include instruction，support
services，food services，and enterprise operations．Total expenditures include current expenditures，capital outlay，and interest on debt．Beginning in 1988－89，extensive changes were made in the data collection procedures．Some data have been revised from previously published figures．

See notes at end of table.

Table 236.65. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2016-17-Continued

-Not available.
Unadjusted (or "current") dollars have not been adjusted to compensate for inflation.
based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department
of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Expenditures for state administration are excluded in all years except 1969-70 and 1979-80. Beginning in 1989-90, extensive changes Were made in the data collection procedures. Some data have been revised from previously published figures. Revenues and Expenditures for Public Elementary and Secondary Schools, 1979-80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989-90 through through 2016-17. (This and Common Core of Data (arepared August 2019),

Table 236.70. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2016-17

[^31]Unadjusted (or "current") dollars have not been adjusted to compensate for inflation.
${ }^{2}$ Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state. for state administration are excluded in all years except 1969-70 and 1979-80. Beginning in 1989-90, extensive changes

[^32]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
NOTE: Excludes expenditures for state education agencies. " 0 " indicates none or less than $\$ 0.50$. Detail may not sum to totals because of rounding.
Public Education Financial Survey," 2016-17. (This table was prepared August 2019.)

## CHAPTER 3 Postsecondary Education

Postsecondary education includes academic, career and technical, and continuing professional education programs after high school. American colleges and universities and career/technical institutions offer a diverse array of postsecondary educational experiences. For example, a community college normally offers the first 2 years of a standard college curriculum as well as a selection of terminal career and technical education programs. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as programs leading to advanced degrees. A specialized career/technical institution offers training programs of varying lengths that are designed to prepare students for specific careers.

This chapter provides an overview of the latest statistics on postsecondary education, including data on various types of postsecondary institutions and programs. However, to maintain comparability over time, most of the data in the Digest are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in Title IV federal financial aid programs. ${ }^{1}$ These include almost all 2- and 4-year colleges and universities. Non-degree-granting institutions are those that offer only career and technical programs of less than 2 years' duration and continuing education programs, and therefore do not award associate's or bachelor's degrees. The degree-granting institution classification currently used by the National Center for Education Statistics (NCES) includes approximately the same set of institutions as the higher education institution classification that was used by NCES prior to 1996-97. ${ }^{2}$ This chapter highlights historical data that enable the reader to observe long-range trends in postsecondary education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal

[^33]funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5. Chapter 7 contains data on college libraries. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes. See chapter 5 for information on adults' participation in nonpostsecondary education, such as adult secondary education classes (e.g., to prepare for the GED test) or English as a Second Language (ESL) classes.

## Enrollment

In 2018, 19.6 million students were enrolled in degreegranting postsecondary institutions. In addition to the students enrolled in degree-granting institutions, about 363,000 students attended non-degree-granting Title IV-eligible postsecondary institutions in fall 2018 (table 303.20). The remainder of this chapter focuses primarily on degree-granting institutions.

## Who Enrolls?-Enrollment and Enrollment Rates

Fall enrollment in degree-granting postsecondary institutions increased 32 percent between 1998 and 2008 (table 303.10 and figure 12). In 2018, fall enrollment in degree-granting postsecondary institutions (19.6 million) was 3 percent higher than in 2008 ( 19.1 million). However, during this period, enrollment reached a peak in 2010 ( 21.0 million or 10 percent higher than in 2008), followed by a decrease of 7 percent between 2010 and 2018. Similar patterns held for different groups of students, including by sex and enrollment status. For example, postsecondary enrollment was 3 percent higher in 2018 than in 2008 for both male and female students. For each, this overall increase reflects annual increases during the early part of the period followed by decreases during the most recent part of the period (a decrease of 7 percent for males and 6 percent for females from 2010 to 2018).

Such trends in overall enrollment are shaped both by the size of the college-age population and by rates of enrollment. While the traditional college-age population (18- to 24 -yearolds) was about 1 percent higher in 2018 ( 30.5 million) than in 2008 ( 30.2 million), the percentage of this age group who enrolled in degree-granting postsecondary institutions (41 percent) was not measurably different from the percentage in 2008 (tables 101.10 and 302.60). However, whereas percentage increases in total enrollment were similar for male and female students, trends in enrollment
rates differed. Like the general population, the enrollment rate for male 18- to 24-year-olds in 2018 ( 38 percent) was not measurably different from the rate in 2008. For females, in contrast, the enrollment rate in 2018 (44 percent) was 2 percentage points higher than the rate in 2008 (42 percent). Additional differences in enrollment rates were observed by race. The enrollment rate for Hispanic 18- to 24-year-olds rose from 26 percent in 2008 to 36 percent in 2018. The enrollment rate for Black 18- to 24-year-olds in 2018 ( 37 percent) was 5 percentage points higher than in 2008 ( 32 percent). Meanwhile, the rate for White 18 - to 24 -year-olds in 2018 ( 42 percent) was 2 percentage points lower than in 2008 ( 44 percent).

Although 18- to 24-year-olds are our best approximation of the college-age population, not all college students are part of this age group and trends in enrollment differ by age. The number of students under age 25 enrolled in degree-granting institutions was 6 percent higher in 2018 than in 2008, while the number of students age 25 and over decreased 2 percent (table 303.40 and figure 14). A similar pattern is expected to continue in the coming years. NCES projects that enrollment for students under age 25 will increase 5 percent between 2018 and 2029, while the enrollment of students age 25 and over will be 1 percent lower in 2029 than in 2018.

Postsecondary enrollment also differs across states. Overall, fall enrollment in degree-granting institutions declined 4 percent between 2013 and 2018, driven by declines across 40 states (table 304.10 and figure 13). The largest declines were in Alaska ( -26 percent) and Iowa (-25 percent). In contrast, enrollment was higher in 2018 than in 2013 in 10 states and the District of Columbia. The largest increases were in New Hampshire ( 74 percent), ${ }^{3}$ followed by Utah ( 37 percent), Idaho ( 13 percent), the District of Columbia ( 10 percent), and Texas ( 7 percent). The overall enrollment decline in Iowa between 2013 and 2018 resulted primarily from declines among private forprofit institutions, while the enrollment increases in New Hampshire, Utah, and Idaho during the same period resulted primarily from increases among private nonprofit institutions (tables 304.15, 304.21, and 304.22).

## Characteristics of Enrolled Students

As enrollment has changed at different rates for different groups of students, the composition of colleges and universities has shifted. The percentage of U.S. resident postsecondary students who are Hispanic, Asian/Pacific Islander, and Black has been increasing (table 306.30). From fall 1976 to fall 2018, the percentage of Hispanic students rose from 4 to 20 percent of all U.S. residents enrolled in degree-granting postsecondary institutions, and the percentage of Asian/Pacific Islander students rose from 2 to 7 percent. The percentage of Black students increased

[^34]overall from 10 percent in 1976 to 13 percent in 2018, but the 2018 percentage reflects a decrease since 2011, when Black students made up 15 percent of all enrolled U.S. residents. The percentage of American Indian/Alaska Native students in 2018 ( 0.7 percent) was about the same as in 1976 ( 0.7 percent). During the same period, the percentage of White students fell from 84 to 55 percent. Four percent of students in 2018 were of Two or more races. Race/ethnicity is not reported for nonresident aliens, who made up 5 percent of total enrollment in 2018 (table 306.10).

Nineteen percent of undergraduates in 2015-16 reported having a disability (table 311.10). In 2015-16, the percentage of undergraduates who reported having a disability was 19 percent for male students and 20 percent for female students. There were some differences in the percentages of undergraduates with disabilities by characteristics such as veteran status, age, dependency status, and race/ethnicity. For example, 26 percent of undergraduates who were veterans reported having a disability, compared with 19 percent of undergraduates who were not veterans. The percentage of undergraduates having a disability was higher among those age 30 and over ( 23 percent) than among 15- to 23 -year-olds (18 percent). Among dependent undergraduates, 17 percent reported having a disability, which was lower than the percentages for independent undergraduates who were married (21 percent) or unmarried (24 percent). A lower percentage of Asian undergraduates (15 percent) had a disability than White, Hispanic, and Black undergraduates ( 21,18 , and 17 percent, respectively).

Of the 19.6 million students enrolled in degree-granting postsecondary institutions in fall 2018, some 35 percent took at least one distance education course, including 17 percent who took their courses exclusively through distance education programs (table 311.15). Distance learning varied across the level and control of institutions. Twelve percent of students at public institutions took their coursework exclusively through distance education courses, compared with 20 percent of students at private nonprofit institutions and 63 percent of students at private for-profit institutions. Fourteen percent of undergraduates took their coursework exclusively through distance education courses, compared with 31 percent of postbaccalaureate students.

In fall 2018, the five institutions with the highest enrollment (including distance education as well as in-person enrollment) were Western Governors University (121,400 students); Southern New Hampshire University (104,100 students); University of Phoenix, Arizona (95,800 students); Grand Canyon University (90,300 students); and Liberty University (79,200 students; table 312.10). Enrollments in these institutions were predominantly students enrolled in distance learning only. Overall, despite the sizable numbers of small degree-granting postsecondary institutions, most students attend larger colleges and universities. Although only 14 percent of campuses enrolled 10,000 or more students, these institutions accounted for 61 percent of total
postsecondary enrollment in fall 2018. In contrast, some 39 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 3 percent of all postsecondary students (table 317.40).

## Changes in Undergraduate and Postbaccalaureate Enrollment

Enrollment trends have differed at the undergraduate and postbaccalaureate levels. Undergraduate enrollment increased 47 percent between fall 1970 and fall 1983, when it reached 10.8 million (table 303.70 and Digest of Education Statistics 2016, table 303.70). Undergraduate enrollment dipped to 10.6 million in 1984 and 1985 but then increased each year from 1985 to 1992, rising 18 percent before stabilizing between 1992 and 1998. Undergraduate enrollment increased every year between 1998 and 2008. Undergraduate enrollment was 2 percent higher in 2018 ( 16.6 million) than in 2008 ( 16.3 million). This overall change reflects increases in undergraduate enrollment in 2008, 2009, and 2010 (when undergraduate enrollment reached 18.1 million), followed by an 8 percent decrease between 2010 and 2018.

Postbaccalaureate enrollment increased 34 percent between 1970 and 1984, with most of this increase occurring in the early and mid-1970s (table 303.80). Postbaccalaureate enrollment increased between 1985 and 2018, rising a total of 84 percent. During the last decade of this period, between 2008 and 2018, postbaccalaureate enrollment rose 11 percent, from 2.7 million to 3.0 million. Unlike undergraduate enrollment, which was lower in 2018 than in 2010, postbaccalaureate enrollment was higher in 2018 than in 2010.

Since fall 1988, the number of female students in postbaccalaureate programs has exceeded the number of male students (table 303.80). Between 2008 and 2018, the number of full-time male postbaccalaureate students increased 12 percent, compared with an 18 percent increase in the number of full-time female postbaccalaureate students. Among part-time postbaccalaureate students, the number of males enrolled in 2018 was 3 percent higher than in 2008, while the number of females was 6 percent higher.

The percentage of postbaccalaureate students who reported having a disability ( 12 percent) was lower than the percentage for undergraduates (19 percent).

## Faculty, Staff, and Salaries

## Characteristics of Faculty and Staff

Approximately 3.9 million people were employed in degree-granting postsecondary institutions in fall 2018, including 1.5 million faculty, 0.4 million graduate assistants, and 2.0 million other staff (table 314.20). Out of the 1.5 million faculty in 2018 , about 0.8 million were full-time and 0.7 million were part-time. In 2019 , the proportion of
staff who were faculty was 39 percent, about the same as in 2009. During the same period, the proportion of staff who were graduate assistants increased from 9 to 10 percent. The proportion of staff who were not engaged in teachingthat is, staff in any occupational category except the faculty and graduate assistant categories-decreased from 52 percent in 2009 to 51 percent in 2018. The full-time-equivalent (FTE) student/FTE staff ratio at degree-granting institutions in 2018 (4.9) was lower than in 2009 (5.4; table 314.10 and figure 15). Also, the FTE student/FTE faculty ratio was lower in 2018 (13.8) than in 2009 (15.9).

Degree-granting postsecondary institutions differ in their practices of employing part-time and full-time staff. In fall 2018, some 45 percent of the employees at private forprofit 4 -year institutions and 49 percent at public 2-year institutions were employed full time, compared with 61 percent at private for-profit 2-year institutions, 68 percent at public 4-year institutions, 69 percent at private nonprofit 4 -year institutions, and 70 percent at private nonprofit 2 -year institutions (table 314.30). Between 2009 and 2018, the number of full-time staff increased 7 percent, while the number of part-time staff was 2 percent higher in 2018 than in 2009 (table 314.20). For faculty specifically, the percentage employed full time was higher at public 4-year institutions ( 66 percent) than at private nonprofit 4-year institutions (56 percent), private nonprofit 2-year institutions (46 percent), private for-profit 2 -year institutions (41 percent), public 2-year institutions ( 33 percent), and private for-profit 4 -year institutions ( 18 percent; table 314.30). The number of full-time faculty increased 14 percent between 2009 and 2018, while the number of part-time faculty was less than 1 percent higher in 2018 than in 2009 (table 314.20). The number of part-time graduate assistants increased 12 percent during this period.

In fall 2018, some 9 percent of faculty at degree-granting institutions were Asian (based on a faculty count that excludes nonresident aliens and other persons whose race/ ethnicity was unknown), 8 percent were Black, 6 percent were Hispanic, 1 percent were of Two or more races, 0.5 percent were American Indian/Alaska Native, and 0.2 percent were Pacific Islander (table 314.40). About 76 percent of all faculty were White: 38 percent were White males and 38 percent were White females. Staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/ Alaska Native, or of Two or more races made up 30 percent of graduate assistants and 32 percent of other staff in nonfaculty positions in 2018, compared with 24 percent of faculty. The proportion of total staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races was similar at public 4-year institutions (29 percent), public 2-year institutions (28 percent), and private nonprofit 4 -year institutions (27 percent), but the proportion was higher at private forprofit 2-year institutions (43 percent), private nonprofit 2 -year institutions ( 36 percent), and private for-profit 4 -year institutions ( 35 percent).

## Salary and Tenure

Faculty salaries generally lost purchasing power during the 1970s. In constant 2018-19 dollars, average salaries for faculty on 9-month contracts declined 16 percent during the period from 1970-71 (\$81,000 in constant 2018-19 dollars) to $1980-81$ ( $\$ 68,100$; table 316.10 ). During the 1980s, average salaries rose and recouped most of the losses. Between 1990-91 and 2018-19, there was a further increase in average faculty salaries, resulting in an average salary in 2018-19 $(\$ 88,700)$ that was 9 percent higher than the average salary in 1970-71. The average salary for male faculty in 2018-19 $(\$ 96,400)$ was 2 percent higher than in 2008-09 (\$94,100). The average salary for female faculty in 2018-19 $(\$ 80,000)$ was 3 percent higher than in 2008-09 $(\$ 77,500)$. The average salary for male faculty was higher than the average salary for female faculty in all years for which data are available. In 2018-19, average salaries for male faculty were 20 percent higher than for female faculty, nearly the same percentage difference as in 2008-09 (21 percent).

The percentage of faculty with tenure has declined since 1993-94, both because of declines in the percentage of institutions with tenure systems and declines in the percentage of faculty receiving tenure at these institutions. The percentage of institutions with tenure systems in 2018-19 ( 57 percent) was lower than in 1993-94 ( 63 percent; table 316.80). Part of this change was due to the expansion in the number of for-profit institutions, relatively few of which have tenure systems ( 1.3 percent in 2018-19; tables 316.80 and 317.10). Between 1993-94 and 2011-12, the percentage of institutions with tenure systems decreased from 63 to 45 percent, while the number of for-profit institutions increased from 320 to 1,404 . In more recent years, the growth of for-profit institutions has reversed, declining to 742 in 2018-19. During the same period as this decline, the percent of institutions with tenure systems increased from 45 percent in 2011-12 to 57 percent in 2018-19. In addition to the compositional change in postsecondary institutions, there was also an increase in the percentage of public institutions with a tenure system, from 71 percent in 2009-10 to 74 percent in 2018-19.

At institutions with tenure systems, the percentage of full-time faculty with tenure decreased from 56 percent in 1993-94 to 45 percent in 2018-19 (table 316.80). Among these institutions, there were differences between males and females in the percentage of full-time instructional faculty having tenure: 54 percent of males had tenure in 2018-19, compared with 40 percent of females. In 2018-19, about 49 percent of full-time instructional faculty had tenure at public institutions with tenure systems, compared with 44 percent at private nonprofit institutions with tenure systems and 13 percent at private for-profit institutions with tenure systems.

## Degrees

During the 2018-19 academic year, 4,042 accredited institutions offered degrees at the associate's level or above (table 317.10). These included 1,636 public institutions, 1,664 private nonprofit institutions, and 742 private forprofit institutions. Of the 4,042 degree-granting institutions, 2,703 were 4 -year institutions that awarded degrees at the bachelor's or higher level, and 1,339 were 2-year institutions that offered associate's degrees as their highest award. In 2017-18, associate's degrees were awarded by 2,457 institutions, bachelor's degrees by 2,335 institutions, master's degrees by 1,884 institutions, and doctor's degrees by 1,011 institutions (table 318.60 ). In addition to degreegranting institutions, 2,096 institutions offered postsecondary education in 2018-19 but did not grant degrees at the associate's level or higher (web-only table 317.30).

A growing number of people are completing postsecondary degrees. Between 2007-08 and 2017-18, the number of associate's, bachelor's, master's, and doctor's degrees that were conferred increased (table 318.10). During this period, the number of associate's degrees increased 35 percent (from 750,000 to $1,011,000$ ), the number of bachelor's degrees increased 27 percent (from $1,564,000$ to $1,981,000$ ), the number of master's degrees increased 30 percent (from 631,000 to 820,000), and the number of doctor's degrees increased 23 percent (from 149,000 to 184,000 ). The doctor's degree total includes most degrees formerly classified as first-professional, such as M.D. (medical), D.D.S. (dental), and J.D. (law) degrees. In addition to degrees awarded at the associate's level or higher, 955,000 certificates were awarded by postsecondary institutions participating in federal Title IV financial aid programs in 2017-18 (table 320.20).

Since the mid-1980s, more females than males have earned associate's, bachelor's, and master's degrees (table 318.10). Beginning in 2005-06, the number of females earning doctor's degrees has also exceeded the number of males. Between 2007-08 and 2017-18, the numbers of associate's and master's degrees awarded to males increased at higher rates than the numbers awarded to females, while the numbers of bachelor's and doctor's degrees have increased by higher percentages for females. The number of associate's degrees awarded to males increased 41 percent during this period, while the number awarded to females increased 31 percent. The number of master's degrees awarded to males increased 31 percent, while the number awarded to females increased 30 percent. In contrast, the number of bachelor's degrees awarded to males increased 26 percent, while the number awarded to females increased 27 percent. Also, the number of doctor's degrees awarded to females increased 30 percent between 2007-08 and 2017-18, while the number awarded to males increased 17 percent.

Of the 1,981,000 bachelor's degrees conferred in 2017-18, the greatest numbers of degrees were conferred in the fields of business $(386,000)$, health professions and related programs $(245,000)$, social sciences and history $(160,000)$, engineering $(122,000)$, biological and biomedical sciences $(119,000)$, psychology $(116,000)$, communication, journalism, and related programs $(92,000)$, and visual and performing arts $(89,000$; table 322.10). At the master's degree level, the greatest numbers of degrees were conferred in the fields of business $(192,000)$, education $(146,000)$, and health professions and related programs $(125,000$; table 323.10$)$. At the doctor's degree level, the greatest numbers of degrees were conferred in the fields of health professions and related programs $(80,300)$, legal professions and studies $(34,500)$, education $(12,800)$, engineering $(10,800)$, biological and biomedical sciences ( 8,200 ), psychology $(6,300)$, and physical sciences and science technologies (6,200; table 324.10).

In recent years, the numbers of bachelor's degrees conferred have followed patterns that differed significantly by field of study. While the number of bachelor's degrees conferred increased 27 percent overall between 2007-08 and 2017-18, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 322.10 and figure 16). For example, the number of degrees conferred in foreign languages, literatures, and linguistics increased 3 percent between 2007-08 and 2012-13 but then decreased 22 percent between 2012-13 and 2017-18. Also, the number of degrees in social sciences and history increased 6 percent between 2007-08 and 2012-13 but then decreased 10 percent between 2012-13 and 2017-18. In a number of other major fields, the number of bachelor's degrees increased by higher percentages in the second half of the 10-year period than in the first half. The number of bachelor's degrees conferred in the combined fields of engineering and engineering technologies increased 23 percent between 2007-08 and 2012-13 and then increased a further 37 percent between 2012-13 and 2017-18. Also, computer and information sciences increased 32 percent between 2007-08 and 2012-13 and then increased 56 percent between 2012-13 and 2017-18. Some other major fields had smaller increases between 2012-13 and 2017-18 than between 2007-08 and 2012-13. For example, the number of degrees conferred in agriculture and natural resources increased 39 percent between 2007-08 and 2012-13 and then 17 percent between 2012-13 and 2017-18. The number of degrees conferred in health professions and related programs increased 62 percent between 2007-08 and 2012-13 and then 35 percent between 2012-13 and 2017-18. Also, the number of degrees conferred in public administration and social services increased 36 percent between 2007-08 and 2012-13 and then 12 percent between 2012-13 and 2017-18. The other field with a large number of degrees (over 10,000 in 2017-18) that showed increases of 25 percent or more between 2012-13 and 2017-18 was parks, recreation, leisure, and fitness studies
(26 percent). Some other fields with sizable numbers of degrees saw decreases during the 2012-13 to 2017-18 period. For example, the number of degrees in philosophy and religious studies decreased 25 percent between 2012-13 and 2017-18. Also, the number of degrees in English language and literature/letters decreased 24 percent; the number of degrees in education decreased 21 percent; and the number of degrees in visual and performing arts decreased 9 percent. Additionally, the number of degrees in liberal arts and sciences, general studies, and humanities was 5 percent lower in 2017-18 than in 2012-13, and the number of degrees in homeland security, law enforcement, and firefighting was 4 percent lower in 2017-18 than in 2012-13.

Among first-time students who were seeking a bachelor's degree or its equivalent and attending a 4 -year institution full time in 2012, about 44 percent completed a bachelor's degree or its equivalent at that institution within 4 years, while 59 percent did so within 5 years, and 62 percent did so within 6 years (web-only table 326.10). These graduation rates were calculated as the total number of completers within the specified time to degree attainment divided by the cohort of students who first enrolled at that institution in 2012. Graduation rates were higher at private nonprofit institutions than at public or private for-profit institutions. For example, the 6-year graduation rate for the 2012 cohort at private nonprofit institutions was 67 percent, compared with 61 percent at public institutions and 25 percent at private for-profit institutions. Graduation rates also varied by race/ethnicity. At 4-year institutions overall, the 6-year graduation rate for Asian students in the 2012 cohort was 75 percent, compared with 66 percent for White students, 58 percent for students of Two or more races, 57 percent for Hispanic students, 49 percent for Pacific Islander students, 42 percent for Black students, and 41 percent for American Indian/Alaska Native students.

## Finances and Financial Aid

For the 2018-19 academic year, annual current dollar prices for undergraduate tuition, fees, room, and board were estimated to be $\$ 18,383$ at public institutions, $\$ 47,419$ at private nonprofit institutions, and $\$ 27,040$ at private forprofit institutions (table 330.10). Between 2008-09 and 2018-19, prices for undergraduate tuition, fees, room, and board at public institutions rose 28 percent, and prices at private nonprofit institutions rose 19 percent, after adjustment for inflation. In contrast, the price for undergraduate tuition, fees, room, and board at private for-profit institutions were 6 percent lower in 2018-19 than in 2008-09, after adjustment for inflation.

In 2015-16, about 86 percent of full-time undergraduate students received financial aid (grants, loans, work-study, or aid of multiple types; table 331.10). About 70 percent of full-time undergraduates received financial aid in 2015-16 from federal sources, and 67 percent received aid from
nonfederal sources. (Many students receive aid from both federal and nonfederal sources.) Section 484(r) of the Higher Education Act of 1965, as amended, suspends a student's eligibility for Title IV federal financial aid if the student is convicted of certain drug-related offenses that were committed while the student was receiving Title IV aid. For 2016-17, less than 0.01 percent of postsecondary students had their eligibility to receive aid suspended due to a conviction (table C).

## Table C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007-08 through 2016-17

| Award year | $\begin{array}{r} \text { No } \\ \text { suspension } \\ \text { of eligibility } \end{array}$ | Suspension of eligibility |  |  |

\# Rounds to zero.
NOTE: It is not possible to determine whether a student who lost eligibility due to a drug conviction otherwise would have received Title IV aid, since there are other reasons why an applicant may not receive aid. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, Federal Student Aid, Free Application for Federal Student Aid (FAFSA), unpublished data.

In 2017-18, total revenue was $\$ 409$ billion at public institutions, $\$ 248$ billion at private nonprofit institutions, and $\$ 13$ billion at private for-profit institutions (tables $333.10,333.40$, and 333.55 and figures 17,18 , and 19). The category of student tuition and fees typically accounts for a significant percentage of total revenue and was the largest single revenue source at both private nonprofit and for-profit institutions in 2017-18 (31 and 94 percent, respectively). Tuition and fees accounted for 20 percent of revenue at public institutions in 2017-18. Public institutions typically report Pell grants as revenue from federal grants, while private institutions report Pell grants as revenue
from tuition and fees; this difference in reporting contributes to the smaller percentage of revenue reported as tuition and fees at public institutions compared with private institutions. At public institutions, the share of revenue from tuition and fees in 2017-18 (20 percent) was higher than the share from state appropriations ( 18 percent), while in 2007-08 the share from tuition and fees (18 percent) was lower than the share from state appropriations ( 25 percent; table 333.10). In 2017-18, tuition and fees constituted the largest single revenue category at private nonprofit 2-year and 4-year institutions, private for-profit 2-year and 4-year institutions, and public 4 -year institutions (tables 333.10, 333.40, and 333.55). At public 2-year institutions, tuition and fees ( 16 percent) constituted the third-largest revenue category, below state (26 percent) and local (21 percent) appropriations.

Average total expenditures per full-time-equivalent (FTE) student in 2017-18-shown in constant 2018-19 dollars throughout this paragraph—varied by institution control and level, as did changes in average total expenditures per FTE student between 2009-10 and 2017-18 (after adjustment for inflation). In 2017-18, average total expenditures per FTE student at public degree-granting institutions were $\$ 37,200$, reflecting an increase of 22 percent from $\$ 30,600$ in 2009-10 (table 334.10). At public 4-year institutions, the average total expenditures per FTE student were $\$ 46,200$ in 2017-18, compared with $\$ 16,900$ at public 2 -year institutions. At private nonprofit institutions, the average total expenditures per FTE student increased 14 percent between 2009-10 and 2017-18, from \$53,600 to $\$ 60,900$ (table 334.30). In 2017-18, average total expenditures per FTE student at private nonprofit institutions were $\$ 61,400$ at 4 -year institutions and $\$ 19,500$ at 2-year institutions. The average total expenditures per FTE student at private for-profit institutions in 2017-18 $(\$ 16,500)$ were 6 percent higher than in 2009-10 (\$15,700; table 334.50). In 2017-18, average total expenditures per FTE student at private for-profit institutions were $\$ 16,400$ at 4-year institutions and $\$ 17,000$ at 2-year institutions. This difference in expenditures per FTE student between 4 -year and 2-year private for-profit institutions was relatively small compared with the differences between 4-year and 2-year institutions in the public and private nonprofit sectors, due to relatively low spending at 4 -year private for-profit institutions.

At the end of fiscal year 2018, the market value of the endowment funds of colleges and universities was $\$ 648$ billion, reflecting an increase of 9 percent since the beginning of the fiscal year, when the total was $\$ 597$ billion (web-only table 333.90). At the end of fiscal year 2018, the 120 institutions with the largest endowments accounted for $\$ 482$ billion, or about three-fourths of the national total. The five institutions with the largest endowments at the end of fiscal year 2018 were Harvard University ( $\$ 39$ billion), the University of Texas System ( $\$ 31$ billion), Yale University ( $\$ 29$ billion), Stanford University (\$26 billion), and Princeton University ( $\$ 25$ billion).

Figure 12. Fall enrollment, degrees conferred, and total expenditures in degree-granting postsecondary institutions: 1960-61 through 2018-19

Total expenditures, in billions of constant 2018-19 dollars

NOTE: Expenditure data for the school year beginning in 2018 (2018-19) are estimated. Degree data for the school year beginning in 2018 are projected. Doctor's degrees include Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were classified as first-professional degrees prior to 2010-11. Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

## $\dagger$ Not applicable.

${ }^{1}$ Includes both degree-granting and non-degree-granting institutions.
NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Degree-granting institutions grant degrees at the associate's or higher level, while non-degree-granting institutions grant only awards below that level. The non-degreegranting classification includes some institutions transitioning to higher level program
offerings, though still classified at a lower level; therefore, a small number of associate's degrees are shown as awarded by non-degree-granting institutions.

## －Not available．

1Prior to 1979－80，excludes branch campuses．
${ }^{2}$ Total number of different individuals（not reduced to full－time equivalent）．Beginning in 1959－60，data are for the first term ${ }^{3}$ Estimated．
${ }^{4}$ Estimated number of senior instructional staff based on actual enrollment data for the designated year and enrollment／staff ratios for the prior staff survey．Excludes graduate assistants．
${ }^{5}$ Because of revised survey procedures，data may not be directly comparable with figures prior to 1989－90．Excludes graduate assistants．
＇Data for 1869－70 to 1939－40 are for resident degree－credit students who enrolled at any time during the academic year From 1869－70 to 1959－60，bachelor＇s degrees include degrees that were classified as first－professional prior to 2010－11 such as M．D．，D．D．S．，and law degrees
Includes Ph．D．，Ed．D．，and comparable degreise professional prior to 2010－11，such as M．D．，D．D．S．，and law degrees．
＇Data for 1929－30 through 1989－90 are current－fund revenues only．Data for 1999－2000 include total revenues for private institutions and current－fund revenues for public institutions．Data for later years are for total revenues
＇Includes revenues from student tuition payments，government appropriations，endowment income，private gifts，sponsored
${ }^{12}$ Data for 1929－30 and 1939－40 include current－fund expenditures and additions to
1989－90 are current－fund expenditures only．Data for 1999－2000 include total expenditures for private institutions and current－fund expenditures for public institutions．Data for later years are for total expenditures
${ }^{13}$ Includes unexpended plant funds
${ }^{15}$ Constant dollars based on the Consumer Price Index，prepared by the Bureau of Labor Statistics，U．S．Department of Labor，adjusted to a school－year basis．
NOTE：Data through 1989－90 are for institutions of higher education，while later data are for degree－granting institutions Degree－granting institutions grant associate＇s or higher degrees and participate in Title IV federal financial aid programs．The degree－granting classification is very similar to the earlier higher education classification，but it includes more 2 －year colleges and excludes a few higher education institutions that did not grant degrees．Detail may not sum to totals because of rounding States；Education Directory，Colleges and Universities；Faculty and Other Professional Staff in Institutions of Higher Education Fall Enrollment in Colleges and Universities；Earned Degrees Conferred；Financial Statistics of Institutions of Higher Education Higher Education General Information Survey（HEGIS），＂Fall Enrollment in Institutions of Higher Education，＂＂Degrees and Other Formal Awards Conferred，＂and＂Financial Statistics of Institutions of Higher Education＂surveys；Integrated Postsecondary Education Data System（IPEDS），＂Fall Enrollment Survey＂（IPEDS－EF：89－99），＂Fall Staff Survey＂（IPEDS－S：89－99），＂Finance Survey＂（IPEDS－F：FY90－00），＂Completions Survey＂（IPEDS－C：90－00），and＂Institutional Characteristics Survey＂（IPEDS IC：89－99）；IPEDS Winter 2009－10 and Spring 2018，Human Resources component，Fall Staff section；IPEDS Spring 2010 2011 and Spring 2019，Finance component．（This table was prepared February 2020．）

## -Not available.

$\dagger$ Not applicable.
${ }^{1}$ Individuals ages 16 to 24 who graduated from high school or completed a GED or other high school equivalency credential.
${ }^{2}$ Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. High school completion data in this table differ from figures appearing in other tables
because of varying survey procedures and coverage. Prior to 2010, standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. Detail may not sum to totals because of rounding.
SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2018. (This table was prepared August 2019.)

Table 302.20. Percentage of recent high school completers enrolled in college, by race/ethnicity: 1960 through 2018
[Standard errors appear in parentheses]

| Year | Percent of recent high school completers ${ }^{1}$ enrolled in college ${ }^{2}$ (annual data) |  |  |  |  | 3 -year moving averages ${ }^{3}$ |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | Percent of recent high school completers ${ }^{1}$ enrolled in college ${ }^{2}$ |  |  |  |  | Difference between percent enrolled |  |  |  |
|  | Total | White | Black | Hispanic | Asian ${ }^{4}$ | Total | White | Black | Hispanic | Asian ${ }^{4}$ | WhiteBlack | WhiteHispanic |  | White Asian |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |  | 14 |

[^37]${ }^{4}$ Prior to 2003, Asian data include Pacific Islanders.
${ }^{5}$ Prior to 1972, White data include persons of Hispanic ethnicity.
${ }^{6}$ After 2002, White, Black, and Asian data exclude persons of Two or more races.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Includes enrollment in 2-year colleges and in 4-year colleges and universities. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Total includes persons of other racial/ethnic groups not separately shown. Prior to 2010 standard errors were computed using generalized variance function methodology rather than the more precise replicate weight methodology used in later years. Some data have been revised from previously published figures.
SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2018. (This table was prepared August 2019.)

-Not available.
Not applicable.
Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ The 12 th-grade graduation rate is the number of students who graduated from grade 12 with a diploma during the 2010-11 school year divided by 12 th-grade enrollment in October 2010.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12 th grade. Some data have been revised from previously figures. Detail may not sum to totals because of rounding

${ }^{1}$ Total includes public high school graduates for 2011-12 and private high school graduates for 2012-13. Data on private high school graduates are not available for 2011-12.
${ }^{2}$ All U.S. resident students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.
${ }^{3}$ Students who attend institutions in their home state. Total includes 183 students attending U.S. Service Academies in their home state, not shown separately.
${ }^{4}$ U.S. total includes some U.S. residents whose home state is unknown.
${ }^{5} \mathrm{~A}$ percentage of the private high school graduates are not residents of the District of Columbia

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding

-Not applicable.
Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent Prior to 2003, Asian data include Pacific Islanders.
${ }^{3}$ After 2002, data for individual race categories exclude persons of Two or more races. In 2002 and earlier years, the questionnaire did not include the "Two or more races" category, and each respondent could select only one race category.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Prior to 2010, standard errors were computed using generalized variance function methodology rather than the more precise
replicate weight methodology used in later years.

## —Not available

${ }^{1}$ Degree-credit enrollment only.
${ }^{2}$ Includes part-time resident students and all extension students (students attending courses at sites separate from the primary reporting campus). In later years, part-time student enrollment was collected as a distinct category.
${ }^{3}$ Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology
${ }^{4}$ Because of imputation techniques, data are not consistent with figures for other years. ${ }^{5}$ Projected.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting
classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

\#Rounds to zero.
${ }^{1}$ Includes degree-granting and non-degree-granting institutions.
2Data for 1995 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.
${ }^{3}$ Data are for institutions that did not offer accredited 4-year or 2-year programs, but were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level program offerings, though still classified at a lower level.
NOTE: Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:95-99); and IPEDS Spring 2001 through Spring 2019, Fall Enrollment component. (This table was prepared November 2019.)

Table 303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2018

-Not available.
Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
Because of imputation techniques, data are not consistent with figures for other years
. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-yea colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1970 through 1985; Integrated Postsecondary Fall Enrollment component. (This table was prepared November 2019.)

Table 303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2029

| Level and control of institution, attendance status, and sex of student | Actual |  |  |  |  |  |  |  |  |  |  |  |  |  |

## －Not available．

${ }^{1}$ Large increase in private 2－year institutions in 1980 is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology． NOTE：Data through 1995 are for institutions of higher education，while later data are for degree－granting institutions．Degree－granting institutions grant associate＇s or higher degrees and participate in Title IV federal financial aid programs．The degree－granting classification is very similar to the earlier higher education classification，but it includes more 2－year colleges and excludes a few higher education institutions that did not grant degrees．Some data have been revised from previously published figures．

SOURCE：U．S．Department of Education，National Center for Education Statistics， Higher Education General Information Survey（HEGIS），＂Fall Enrollment in Colleges and Universities＂surveys， 1970 through 1985；Integrated Postsecondary Education Data System（IPEDS），＂Fall Enrollment Survey＂（IPEDS－EF：90－99）；IPEDS Spring 2001 through Spring 2019，Fall Enrollment component；and Enrollment in Degree－Granting Institutions Projection Model， 2000 through 2029．（This table was prepared December 2019．）

Table 303.40. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age of student: Selected years, 1970 through 2029

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutionalized population from the U.S. Census Bureau's Current Population Survey. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

\#Rounds to zero.
'Percentage distributions exclude students whose age is unknown
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2014, 2016, and 2018, Fall Enrollment component. (This table was prepared September 2019.)

Table 303.50. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2017

\#Rounds to zero.
${ }^{1}$ Percentage distributions exclude students whose age is unknown
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in
Title IV federal financial aid programs. Detail may not sum to totals because of rounding.
Some data have been revised from previously published figures.

Table 303.60. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, level and control of institution, and attendance status of student: 2018

| Level and control of institution and attendance status of student | Total |  |  | Undergraduate |  |  | Postbaccalaureate |  |  |

## -Not available.

${ }^{1}$ Projected.
NOTE: Data include unclassified graduate students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher
education institutions that did not grant degrees. Some data have been revised from previously published figures.

## - Not available.

Counts of institutions in this table may be lower than reported in other tables because counts in this table include only institutions reporting separate enrollment data.
Included under "Other public."
NOTE: Data for 1980 and 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Titte IV federal financial aid programs The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2 -year
colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.
 Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; Characteristics Survey" (IPEDS-IC:90); and IPEDS Spring 2001 through Spring 2019, Fall Enrollment component. (This table was prepared February 2020.)

${ }^{1}$ Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2019, Fall Enrollment component. (This table was prepared January 2020.)

Table 304.15. Total fall enrollment in public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2018

| State or jurisdiction | 1970 | 1980 | 1990 | 2000 | 2010 | 2013 | 2015 | 2016 | 2017 | 2018 | Percent change, 2013 to 2018 |

${ }^{1}$ Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2019, Fall Enrollment component. (This table was prepared January 2020.)

$\dagger$ Not applicable.
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" survey, 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2019, Fall Enrollment component. (This table was prepared January 2020.)

Table 304.30. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2017 and 2018

| State or jurisdiction | 2017 |  |  |  |  | 2018 |  |  |  |  | $\begin{array}{r} \text { Percent } \\ \text { change, } \\ 2017 \text { to } 2018 \end{array}$ |
