## CHAPTER XLVII.

### CITY SCHOOL SYSTEMS.<sup>1</sup>

TABLE 1.—*Summary of statistics of cities containing over 8,000 inhabitants, showing increase from previous year.*

|  | 1896-97.      | 1897-98.      | Increase.    | Per cent of increase. |
|--|---------------|---------------|--------------|-----------------------|
| Enrollment.....                                  | 3,594,675     | 3,799,881     | 205,206      | 5.71                  |
| Aggregate number of days' attendance.....        | 507,622,259   | 539,048,222   | 31,425,963   | 6.19                  |
| Average daily attendance.....                    | 2,693,299     | 2,843,445     | 150,146      | 5.58                  |
| Average length of school term in days.....       | 188.5         | 189.6         | 1.1          | .....                 |
| Enrollment in private and parochial schools..... | 824,609       | 872,406       | 47,797       | 5.79                  |
| Number of supervising officers.....              | 3,998         | 4,429         | 431          | 10.78                 |
| Number of male teachers.....                     | 5,773         | 6,005         | 232          | 4.02                  |
| Number of female teachers.....                   | 68,344        | 72,355        | 4,011        | 5.87                  |
| Whole number of teachers.....                    | 74,117        | 78,360        | 4,243        | 5.72                  |
| Number of buildings.....                         | 8,604         | 9,113         | 509          | 5.91                  |
| Number of sittings.....                          | 3,383,405     | 3,500,970     | 117,565      | 3.48                  |
| Value of school property.....                    | \$267,425,289 | \$289,325,794 | \$21,900,505 | 8.19                  |
| Expenditure for tuition.....                     | 48,772,485    | 52,064,649    | 3,292,164    | 6.75                  |
| Total expenditure.....                           | 84,866,092    | 88,773,647    | 3,907,555    | 4.60                  |

The statistical tables<sup>2</sup> for 1897-98 show the usual increases of enrollment and attendance, the latter being relatively somewhat less than the former, indicating a slightly lower degree of regularity. The average school term increased by 1.1 days over 1896-97, the greater part of the increase coming from the North Atlantic Division. The average number of pupils in attendance to each teacher is less than in the previous year, since the number of teachers employed has increased more rapidly than the pupils. Supervising officers have increased at a disproportionate rate, in accordance with the tendency which has been marked for several years. By one of those combinations of circumstances which sometimes occur, the number of these officers did not show the usual increase in 1896-97, being in that year only 60 more than in 1895-96, though teachers increased by nearly 4,000. During the year just passed, however, the supervisors were augmented by 431, which made them more numerous than ever before, not only in actual numbers but in proportion to the number of teachers employed. Women teachers are increasing more rapidly than men—but that is an old story.

The financial rewards of the profession of teaching are plainly increasing. The average salary of teachers and supervisors was greater during 1897-98 than in the year before, and, while it was still a few cents behind that of 1895-96, the tendency is undoubtedly upward.

The average salaries for eight years past have been:

|              |          |              |          |
|--------------|----------|--------------|----------|
| 1890-91..... | \$606.00 | 1894-95..... | \$624.74 |
| 1891-92..... | 612.18   | 1895-96..... | 629.49   |
| 1892-93..... | 607.62   | 1896-97..... | 624.37   |
| 1893-94..... | 608.94   | 1897-98..... | \$628.83 |

<sup>1</sup>By James C. Boykin.

<sup>2</sup>See also tables, pp. 2348 et seq.

<sup>3</sup>See also the tables of salaries on pp. 1704-1707 of this Report.

Important increases in salaries, more or less general, have been made recently in several of the large cities, notably in Boston, Chicago, and New York. In some other cities, on the contrary, lack of funds has necessitated reduction of teachers' incomes, either by reducing the rate of pay or by closing the schools prematurely, which means a reduction just as surely.

In Boston the school committee formulated a new salary schedule in 1896, providing for certain gradual increases, the full effect of the schedule to be reached in 1900. The principal changes involved were stated by the salary committee to be as follows:

"Raising the minimum salary of a junior master in the high schools from \$1,008 to \$1,476, and carrying the maximum to \$3,060, an increase of \$180; starting assistants in high schools at \$972, an increase of \$216, and carrying the maximum to \$1,620, an increase of \$240; raising the maximum of masters in grammar schools from \$2,880 to \$3,180; raising the annual increase of submasters from \$60 to \$120; raising the maximum of first assistants in grammar schools \$132; abolishing the grade of second, third, and fourth assistant in grammar and primary schools, making the present incumbents' assistants dating from September 1, 1896; raising the minimum of assistants in grammar and primary schools \$96, and the maximum \$192; increasing the salary of kindergarten teachers about 10 per cent; increasing the salary of assistants in evening elementary schools from \$1.50 to \$2 per evening; making a new grade of first assistants in primary schools."<sup>1</sup>

The full salary schedule now in force in Boston, embodying these changes, is as follows:<sup>2</sup>

|  |            |
|--|------------|
| Superintendent .....   | \$4,200.00 |
| Six supervisors, each .....  | 3,780.00   |
| NORMAL SCHOOL.   |            |
| Head master .....  | \$3,780.00 |
| Master, first year, \$2,340; annual increase, \$144; maximum .....   | 3,060.00   |
| Assistants, first year, \$1,140; annual increase, \$60; maximum .....  | 1,620.00   |
| LATIN AND HIGH SCHOOLS.  |            |
| Head masters .....   | \$3,780.00 |
| Masters .....  | 3,060.00   |
| Junior masters, first year, \$1,476; annual increase (for eleven years), \$144; salary for the twelfth and subsequent years, with the rank of master ..... | 3,060.00   |
| Assistant principal, Girls' High School .....  | 2,040.00   |
| Assistant principal, Roxbury High School, first year, \$1,620; annual increase, \$72; maximum .....  | 1,836.00   |
| Assistants, first year, \$972; annual increase, \$72; maximum .....  | 1,620.00   |
| MECHANIC ARTS HIGH SCHOOL.   |            |
| Head master .....  | \$3,780.00 |
| Masters .....  | 3,060.00   |
| Junior masters, first year, \$1,476; annual increase (for eleven years), \$144; salary for the twelfth and subsequent years, with the rank of master ..... | 3,060.00   |
| Instructors, first year, \$1,500; annual increase, \$120; maximum .....  | 2,340.00   |
| Assistant instructors, first year, \$972; annual increase, \$72; maximum .....   | 1,620.00   |
| Instructor of metal working, first year, \$1,800; annual increase, \$60; maximum .....   | 2,580.00   |
| GRAMMAR SCHOOLS.   |            |
| Masters, first year, \$2,580; annual increase, \$120; maximum .....  | \$3,180.00 |
| Submasters, first year, \$1,500; annual increase, \$120; maximum .....   | 2,340.00   |
| First assistants, first year, \$972; annual increase, \$48; maximum .....  | 1,212.00   |
| Assistants, first year, \$552; annual increase, \$48; maximum .....  | 936.00     |
| PRIMARY SCHOOLS.   |            |
| First assistants, first year, \$984; annual increase, \$48; maximum .....  | \$1,080.00 |
| Assistants, first year, \$552; annual increase, \$48; maximum .....  | 936.00     |
| KINDERGARTENS.   |            |
| Principals, first year, \$600; annual increase, \$48; maximum .....  | \$792.00   |
| Assistants, first year, \$432; annual increase, \$48; maximum .....  | 624.00     |

<sup>2</sup> From the Proceedings of the Boston School Committee for 1898, pp. 451 et seq.

## EVENING SCHOOLS.

|  |         |
|--|---------|
| Principal, Evening High School (per week), first year, \$40; second year, \$45; third year and subsequently .....                  | \$50.00 |
| Assistants, Evening High School (per evening).....   | 4.00    |
| Principals, evening elementary schools, in schools where average attendance for month is 100 pupils or more (per evening).....     | 5.00    |
| In schools where average attendance for month is less than 100 (per evening).....  | 4.00    |
| First assistant, evening elementary schools, in schools where average attendance for month is 75 pupils or more (per evening)..... | 2.50    |
| In schools where average attendance for month is less than 75 (per evening).....   | 2.00    |
| Assistants, evening elementary schools (per evening) .....   | 2.00    |
| Principals, evening drawing schools (per evening), first year, \$7; second year and subsequently.....                              | 8.00    |
| Assistants, evening drawing schools (per evening), first year, \$4; second year, \$5; third year and subsequently.....             | 6.00    |

## SPECIAL INSTRUCTORS.

|   |            |
|---|------------|
| Special instructors of music .....  | \$2,640.00 |
| Assistant instructors of music.....   | 888.00     |
| Director of drawing .....   | 3,000.00   |
| Assistants to director of drawing (2) .....   | 1,500.00   |
| Master of evening drawing schools .....   | 1,200.00   |
| Assistant to director of drawing .....  | 800.00     |
| Assistant to director of drawing <sup>1</sup> .....   | 2,508.00   |
| Teacher of German, girls' high and girls' Latin schools.....  | 1,500.00   |
| Teacher of chemistry, Girls' High School .....  | 1,620.00   |
| Laboratory assistant, Girls' High School .....  | 804.00     |
| Laboratory assistant, Roxbury High School.....  | 804.00     |
| Teacher of physical training, Brighton High School.....   | 700.00     |
| Teacher of physical training, girls' high and girls' Latin schools.....   | 900.00     |
| Teacher of physical training and reading, girls' high and girls' Latin schools.....                                 | 900.00     |
| Teacher of physical training, East Boston High School .....   | 300.00     |
| Teacher of physical culture, Roxbury High School.....   | 1,200.00   |
| Director of kindergartens .....   | 2,880.00   |
| Assistant teacher of the theory and practice of the kindergarten, Normal School.....                                | 1,380.00   |
| Teacher of songs and games, Normal School.....  | 240.00     |
| Director of French and German .....   | 3,000.00   |
| Assistants .....  | 1,500.00   |
| Director of physical training.....  | 3,000.00   |
| Assistant .....   | 2,280.00   |
| Horace Mann School for the Deaf:  |            |
| Principal .....   | 2,880.00   |
| Assistant principal, first year, \$1,152; annual increase, \$72; maximum.....                                       | 1,440.00   |
| Assistants, first year, \$780; annual increase \$72; maximum.....   | 1,284.00   |
| Principal of manual training schools.....   | 2,508.00   |
| Instructors in manual training schools .....  | 1,620.00   |
| Instructors in manual training schools.....   | 1,200.00   |
| Assistant instructors in manual training schools, first year, \$804; annual increase, \$48; maximum.....            | 996.00     |
| Principal of schools of cookery.....  | 1,500.00   |
| Instructors in schools of cookery, first year, \$552; annual increase, \$48; maximum.....                           | 936.00     |
| Instructor in school on Spectacle Island (including all expenses connected with the school, except for books) ..... | 400.00     |
| Instructor of military drill.....   | 2,000.00   |
| Armorer .....   | 1,050.00   |
| Teachers of sewing:   |            |
| One division .....  | 132.00     |
| Two divisions.....  | 228.00     |
| Three divisions.....  | 324.00     |
| Four divisions .....  | 408.00     |
| Five divisions .....  | 492.00     |
| Six divisions.....  | 564.00     |
| Seven divisions .....   | 636.00     |
| Eight divisions .....   | 696.00     |
| Nine divisions .....  | 744.00     |

<sup>1</sup>To give instruction in drawing in the Normal School, and to assist the director of drawing.

## Teachers of sewing—Continued.

|   |          |
|---|----------|
| Ten divisions.....  | \$792.00 |
| Eleven divisions.....                                     | 840.00   |
| All over eleven divisions.....                            | 888.00   |
| Special assistant teachers, first grade (per day).....    | 1.00     |
| Special assistant teachers, kindergartens (per week)..... | 5.00     |

In Chicago an active crusade during the spring and summer of 1898 resulted in the adoption of the following schedule,<sup>1</sup> which contained important advances, especially for teachers of the lower grades and for those of long service:

|  |            |
|--|------------|
|  | Per annum. |
| Superintendent of schools.....   | \$7,000    |
| District superintendent of schools, <sup>2</sup> during the first two years of service in such position..... | 3,500      |
| District superintendent of schools, after two years of service in such position.....                         | 4,000      |

## SUPERVISORS.

|   |       |
|---|-------|
| Supervisor of modern languages.....                               | 3,000 |
| Supervisor of singing (high school grades).....                   | 2,400 |
| Supervisor of singing (primary grades).....                       | 2,400 |
| Supervisor of drawing (high schools).....                         | 2,500 |
| Supervisor of drawing (grammar and primary grades).....           | 2,800 |
| Supervisor of physical culture.....                               | 2,400 |
| Supervisor of schools for the deaf.....                           | 1,500 |
| Supervisor of manual training in grammar grades.....              | 2,000 |
| Assistant supervisor of drawing (grammar and primary grades)..... | 2,200 |
| Supervising principal of kindergartens.....                       | 1,200 |

## TEACHERS OF SPECIAL STUDIES.

*Special teachers of drawing and music in primary and grammar grades.*

|   |       |
|---|-------|
| For first year of service.....          | 1,000 |
| For the second year.....                | 1,200 |
| For the third year.....                 | 1,300 |
| For the fourth year.....                | 1,400 |
| For the fifth year.....                 | 1,500 |
| For the sixth and subsequent years..... | 1,600 |

## HIGH SCHOOLS.

*Grouping of principals.*

*First group.*—\$2,500 the first year, increasing \$100 a year until a maximum of \$3,000 is reached.

*Second group.*—\$2,000 the first year, increasing \$100 a year until a maximum of \$2,500 is reached.

*Grouping of instructors.*

*First group.*—\$1,500 the first year, increasing \$100 a year until a maximum of \$2,000 is reached.

*Second group.*—\$1,200 the first year, increasing \$100 a year until a maximum of \$1,500 is reached.

*Third group.*—\$850 the first year, \$900 the second year, increasing \$75 a year until a maximum of \$1,200 is reached.

*Teachers of German, French, and drawing.*

*First group.*—\$1,200 the first year, increasing \$50 a year until a maximum of \$1,500 is reached.

*Second group.*—\$750 the first year, increasing \$50 a year until a maximum of \$1,200 is reached.

High school substitutes, \$4 to \$5 per day, at the discretion of the superintendent. Substitutes to be paid for days of actual service.

## CHICAGO NORMAL SCHOOL.

Principal, \$5,000. Substitutes to be paid the same as high school substitutes.

## PRINCIPALS OF ELEMENTARY SCHOOLS.

Principals of schools shall receive \$1,200 per annum for the first year's service, increasing \$100 a year to a maximum salary.

*First group.*—For schools having an average membership for the school year of 700 or more pupils the maximum salary shall be \$2,500 per annum.

*Second group.*—For schools having an average membership for the school year of 300 to 700 pupils the maximum salary shall be \$2,200 per annum.

<sup>1</sup>From the Directory of the Public Schools of the City of Chicago for 1899.

<sup>2</sup>There are eight district superintendents, and one assistant superintendent in charge of high schools who ranks as a district superintendent.

*Third group.*—For schools having an average membership for the school year under 300 pupils the maximum salary shall be \$1,500 per annum.

Whenever the membership of a school is reduced by transfer of pupils to other schools, or by the opening of a new school, the salary of the principal shall not be reduced for two years on account of the reduced membership.

*Assistants to principals.*

Assistants to principals, each, \$1,175 per annum.

*Head assistants.*

For year beginning January 1, 1898, \$975, and advancing \$50 each year until a maximum salary of \$1,175 is reached. Head assistants who began service before January 1, 1898, to receive \$75 advance upon the schedule of 1897.

*Extra teachers.*

For year beginning January 1, 1898, \$925, and advancing \$50 each year until a maximum salary of \$1,175 is reached.

*Eighth grade teachers.*

For year beginning January 1, 1898, \$925, and advancing \$50 each year until a maximum salary of \$1,075 is reached.

*Assistant teachers in grammar grades.*

|                                  |       |
|----------------------------------|-------|
| For first year of service.....   | \$500 |
| For second year of service.....  | 550   |
| For third year of service.....   | 625   |
| For fourth year of service.....  | 675   |
| For fifth year of service.....   | 725   |
| For sixth year of service.....   | 800   |
| For seventh year of service..... | 825   |

After January 1, 1898, teachers who have completed the seventh year of service to receive an advance of \$75 for the first year and \$50 each additional year until a maximum salary of \$1,000 is reached.

*Assistant teachers in primary grades.*

|                                  |       |
|----------------------------------|-------|
| For first year of service.....   | \$500 |
| For second year of service.....  | 550   |
| For third year of service.....   | 575   |
| For fourth year of service.....  | 650   |
| For fifth year of service.....   | 700   |
| For sixth year of service.....   | 775   |
| For seventh year of service..... | 860   |

After January 1, 1898, teachers who have completed the seventh year of service to receive an advance of \$75 for the first year and \$50 each additional year until a maximum salary of \$1,000 is reached.

TEACHERS IN KINDERGARTENS.

*Morning sessions*

Directors:

|                                 |       |
|---------------------------------|-------|
| First year of service.....      | \$500 |
| Second year of service.....     | 550   |
| Third year of service.....      | 600   |
| Fourth year of service.....     | 650   |
| Fifth and subsequent years..... | 700   |

Assistants:

|                                  |     |
|----------------------------------|-----|
| First year of service.....       | 350 |
| Second year of service.....      | 400 |
| Third year of service.....       | 450 |
| Fourth and subsequent years..... | 500 |

Directors in all-day sessions to be paid the same salaries as primary grade teachers to a maximum of \$1,000 per annum. Assistants in all-day sessions to be paid the same salaries as primary grade teachers to a maximum of \$725 per annum.

All changes in salary to take place at the commencement of the school month succeeding the expiration of the year's service.

*Substitutes.*—Experienced substitutes to be employed at the discretion of the superintendent at a compensation varying from \$2.50 to \$4 per day for each day of actual service, according to the experience of the substitute so employed.

*Cadets.*—Cadets who have completed the training course shall receive for cadet service at the rate of \$20 per month; as substitutes at the rate of \$2.50 per day.

*Teachers of Latin.*—Grade teachers having charge of Latin classes in seventh and eighth grades and grammar grade teachers who also teach German in connection with regular grade work to be paid

\$50 per annum, in addition to the regular schedule, provided that no such teacher shall receive more than the maximum salary of grade teachers.

*Reserve teachers.*—Eight reserve teachers, one for each school district, to be employed at the discretion of the superintendent at a compensation of \$800 per annum each.

*Compensation of acting principal.*—An additional salary of 25 per cent to be added to the salary of a head assistant, or an eighth grade teacher, when such assistant acts as principal during the absence of the principal of the school.

*Compensation for acting head assistants.*—Any teacher acting as head assistant during her absence on account of sickness to be paid at the rate of \$975 per annum—the salary for the first year of service of said position—beginning two weeks after the absence of said head assistant.

The consolidation of the several municipalities forming Greater New York was followed by an advance in teachers' salaries in the boroughs other than that of Manhattan to bring them more nearly to the Manhattan standard. This involved heavy increases in many cases. The original consolidation law permitted the borough school boards to fix the salaries of superintendents and teachers, and left the whole matter to their discretion. The early increases mentioned, therefore, were due to local action. But in the spring of 1899 the matter was brought before the State legislature, and several bills were advocated with a view to prescribing a minimum salary, and that known as the "Ahearn bill" finally became a law. Following is its text:

SECTION 1. Section ten hundred and ninety-one of chapter three hundred and seventy-eight of the laws of eighteen hundred and ninety-seven is hereby amended to read as follows:

SEC. 1091. Each school board shall have the power to adopt by-laws fixing the salaries of the borough and associate superintendents, of principals and branch principals, and of all other members of the supervising and teaching staff, and such salaries shall be regulated by merit, by the grade of class taught, by the length of service, or by the experience in teaching of the incumbent in charge, or by such a combination of these considerations as the school board may deem proper. Said salaries need not be uniform throughout all the several boroughs, nor in any two of them, nor throughout any one borough. The salaries fixed and established and duly payable in the different schools of the territory hereby consolidated, as these salaries were on the first day of January, eighteen hundred and ninety-eight, shall be and remain the salaries in the schools of the several boroughs hereby constituted until the same shall be changed or modified as provided for in this section. No regular teacher in the public schools of any of the boroughs shall be paid a sum less than six hundred dollars per annum. No teacher shall, after ten years of service in the public schools of said boroughs, receive less than nine hundred dollars per annum; nor shall any teacher, after fifteen years of service in said schools, receive less than twelve hundred dollars per annum; and no vice-principal, head of department, or first assistant in said schools shall be paid less than fourteen hundred dollars per annum; and no male teacher, after twelve years of service in said schools, shall receive less than two thousand and one hundred and sixty dollars per annum: *Provided, however,* That the service of such teacher, vice-principal, head of department, or first assistant shall have been approved, after inspection and investigation, as fit and meritorious by a majority of the borough board of school superintendents. For all purposes affecting the increase of salaries of the teachers in any school, the principal of such school shall have a seat in the borough board of superintendents, with a vote on all increases of salaries of teachers in said school. The salaries of the women principals in said schools shall be increased, by the addition of two hundred and fifty dollars in each year, until they receive the sum of two thousand and five hundred dollars per annum; and the salaries of the male principals in said schools shall be increased, by the addition of two hundred and fifty dollars in each year, until they receive the sum of three thousand and five hundred dollars per annum; and no male principal, after ten years of service as principal in said schools, shall receive less than three thousand five hundred dollars per annum; and no woman principal of ten years' service as principal in said schools shall receive less than twenty-five hundred dollars per annum: *Provided, however,* That the service of such principal shall have been approved, after inspection and investigation, as fit and meritorious by the borough board of superintendents; but these provisions shall not apply to principals of schools of less than twelve classes. No salary now paid to any public school-teacher in the city of New York shall be reduced by the operation of this act.

SEC. 2. The board of estimate and apportionment is hereby authorized and required to direct the issue of revenue bonds for the purpose of providing funds to carry into effect the provisions of this act.

SEC. 3. This act shall take effect immediately.

## THE AVERAGE CITY SCHOOL SYSTEM.

It is often said that the most favorable conditions for public education exist in the city of moderate size; that is, with a population of about 40,000. Without going fully into the reasons for this view, it may be said that in cities of this size the population is sufficiently compact to allow schools large enough for all purposes of grading and classification, which is not the case in the small city, the village, or the country district; and, on the other hand, the population is usually more homogeneous than in the great cities; there are not such extremes of wealth and poverty, and the people as a whole take more personal interest in the schools. It happens that the average population of all the cities in the country corresponds closely with that population which is considered most favorable for school work, and the average of the educational conditions of all the cities substantially coincides with what may be expected in a city of that ideal size. A discussion of those averages, therefore, receives an added interest from that coincidence.

The average population of the cities of over 8,000 inhabitants in 1890 was 41,164, and at the present time it appears, from an estimate based on school enrollment, to be about the same, with probably an increase of a few hundred. The average of the enrollment for the 626 city systems in 1897-98 is 6,070 pupils in the public schools and 1,393 in the private and parochial institutions. Of the 6,070 public school children 4,542 is the average number in daily attendance. The number of superintendents and other supervising officers is 7 to a city, the proportion of the sexes being about 4 men to 3 women. 125 teachers, 9 or 10 of them being men, is the average number employed, each teacher averaging 36 pupils in attendance. The average city has 15 buildings, each worth, with its appurtenances, \$31,748, and accommodating 8 or 9 teachers and 312 pupils daily, but with seats for 72 other pupils. \$141,810 is the average amount spent for all purposes in a year, \$83,170 of it going to supervisors and teachers, the average salary of whom is \$628.88. The schools are open nine and one-half months of twenty days each, and the average time that each child attends is about two days more than seven months. For each day that a pupil is present he costs 16½ cents, of which 9¾ cents are for his instruction.

These figures represent the average conditions of education in the cities. In contrast with them let us place the statistics of the country schools and villages, which may be obtained by deducting the statistics of cities from those of the United States as a whole. In the great majority of schools other than city schools there is but a single teacher to a schoolhouse, the average for the United States being 1.4 teachers and 48.2 pupils enrolled for each building. The attendance is naturally less regular in the country than in the city; while three-fourths of the pupils may be expected to be present every day in the town, only two-thirds of the country children manage to get to school regularly. City pupils have the advantage of an annual school term three and one-fourth months longer than that of their country cousins, and each enrolled child in the rural schools averages only eighty-three days of actual instruction a year.

The cost of country schoolhouses is ridiculously small as compared with the elaborate city buildings, and the outlay required per pupil is only about one-fourth as much in the former case as in the latter. An average country schoolhouse, site, and all, costs only \$872.

The wages of the country schoolmaster are generally on the same plane of economy as the building he occupies, for the average amount that he receives in a year is only \$217, or but little over a third as much as his more fortunate city brother receives. The word "brother" in this connection is somewhat out of place, for only 7.7 per cent. of the city teachers are men; the proportion for the country is 38 per cent. Notwithstanding the difference in the annual salary of teachers, it costs nearly as much per day for the tuition of the country child as for the city child, the difference being about 2 cents. This is due, of course, to the greater number of pupils to a teacher in the city.

In regard to expenses other than for teaching, the per diem cost is relatively much greater in the urban schools. When the patrons of the school bring the wood, and the teachers make the fires and sweep the floors, the expense for fuel and janitor service cuts very little figure; and when the excessive ventilation through the cracks between the logs is a source of discomfort, the cost of rotary blowers and fresh-air chambers naturally does not cause any concern. Just such primitive conditions as these still prevail in many districts, and even where the accommodations are of the best that can be expected in a country school the contingent expenses are very low. Then when new houses are required the expense for them per pupil is only about one-fourth as much as it would be in the city. So that while the cities must spend 6.8 cents per day for each pupil for purposes other than direct instruction, the rural districts need to spend only 3.6 cents, or slightly over half as much.

Having compared the average city school with the average country school, it may be well to add to the comparison some of the figures for the city of New York, not only the greatest city in the country in population, but that in which the typical conditions of cities in regard to expense of living and value of real estate exist in the most pronounced form. There the daily expense for each pupil attending is 24.4 cents, of which 10.9 cents are for instruction. The school property, which is still insufficient, is nevertheless worth \$129 per pupil, and the supervisors and teachers receive an average of \$825 a year. In Chicago this average is even higher, reaching \$844. In both New York and Chicago the average pay of teachers will soon show a considerable increase over even these figures, as the result of recent legislation.

*Comparison of city and country schools.*

|  | Average of all city schools. | Average of all country and village schools. | Schools of New York City. |
|--|------------------------------|---|---------------------------|
| Ratio of average attendance to total enrollment.....per cent..       | 74.8                         | 66.2  | 71.2                      |
| Average length of school term.....days..                             | 189.6                        | 125.3                                       | 195.7                     |
| Average number of days' attendance of each pupil enrolled.....       | 141.8                        | 83.0  | 139.4                     |
| Average number of pupils in attendance to each teacher.....          | 36.3                         | 22.5  | 42.3                      |
| Proportion of men in the teaching force.....per cent..               | 7.7                          | 38.0  | 5.1                       |
| Average number of pupils to a building.....                          | 312                          | 48  | 828                       |
| Value of school property per capita of pupils in attendance.....     | \$101.78                     | \$27.33                                     | \$129.34                  |
| Average value of a school building, with its site and furniture..... | \$31,748                     | \$872                                       | \$107,104                 |
| Average cost of tuition per day for one pupil.....cents..            | 9.66                         | 7.69  | 10.88                     |
| Average daily expenditure per pupil for all purposes.....do...       | 16.47                        | 11.29                                       | 24.37                     |
| Average salary of teachers and supervisors.....                      | \$629                        | \$217                                       | \$825                     |

Proportion of the total population of the United States who inhabit cities of over 8,000 inhabitants, 31.6 per cent.

Proportion of the following items for the cities to similar items for the entire United States:

|  | Per cent. |
|--|-----------|
| Public school enrollment.....          | 25.3      |
| Average daily attendance.....          | 27.6      |
| Whole amount of instruction given..... | 36.6      |
| Number of male teachers.....           | 4.6       |
| Whole number of teachers.....          | 19.1      |
| Number of buildings.....               | 3.8       |
| Value of school property.....          | 58.7      |
| Expenditure for tuition.....           | 42.1      |
| Total expenditure.....                 | 45.7      |

That is to say, while 31.6 per cent of the population live in cities of over 8,000 inhabitants, only 25.3 per cent of the public school enrollment is found in them. 27.6 per cent of the average attendance, etc.

## DISTRIBUTION OF PUPILS IN THE SEVERAL GRADES.

The proportion of pupils in the several stages of advancement in the course of study has an important bearing on many questions in school administration. On the material side, the preparation of accommodations and facilities for instruction is largely influenced by the number in the different grades; but beyond this, many deeper considerations relating to course of study and plans with a view to holding pupils in school as long as possible must be based upon a knowledge of how many and what proportion of children are already in the various degrees of advancement. Following are two tables showing these facts for 24 typical cities.<sup>1</sup>

The existing conditions of life do not permit us to expect as great a number of children in school or out of school at the age of 17 as at the age of 6,<sup>2</sup> the highest and the lowest ages of the children for whom the ordinary course of study is designed. According to the best data available,<sup>3</sup> the proportion of the number of each age to the whole number from 6 to 17, inclusive, in the United States is as follows:

|                | Per cent. |                | Per cent. |
|----------------|-----------|----------------|-----------|
| 6 years .....  | 9.4       | 13 years ..... | 8.0       |
| 7 years .....  | 9.2       | 14 years ..... | 7.9       |
| 8 years .....  | 8.9       | 15 years ..... | 7.8       |
| 9 years .....  | 8.6       | 16 years ..... | 7.8       |
| 10 years ..... | 8.4       | 17 years ..... | 7.7       |
| 11 years ..... | 8.2       |                |           |
| 12 years ..... | 8.1       | Total.....     | 100.0     |

In contrast to the small differences in these percentages, the rapid falling off in the upper grades of the schools, as shown by the tables, stands forth in a strong light. The steady decrease in the actual number of children is relatively so small that mortality may be eliminated in considering the causes of the falling off in school attendance. Those causes must be sought elsewhere.

To make an average showing the mean rate of decrease from class to class for all the cities is an unsatisfactory undertaking because of the differences in the length of the course. But if we take only cities having at least 8 years in the elementary course and 4 in the high school, and omitting kindergartens, ninth grammar grades, and normal schools, we have the following totals and percentages for 21 cities:

|                                   | Number of pupils. | Per cent of total number. |
|-----------------------------------|-------------------|---------------------------|
| First year's work.....            | 211,070           | 22.9                      |
| Second year's work.....           | 151,330           | 16.4                      |
| Third year's work.....            | 136,412           | 14.8                      |
| Fourth year's work.....           | 114,837           | 12.5                      |
| Fifth year's work.....            | 94,854            | 10.3                      |
| Sixth year's work.....            | 73,634            | 8.0                       |
| Seventh year's work.....          | 53,693            | 5.8                       |
| Eighth year's work.....           | 38,943            | 4.2                       |
| Total of 8 elementary grades..... | 874,773           | 94.9                      |
| High schools (4 grades).....      | 47,251            | 5.1                       |
| Total.....                        | 922,024           | 100.0                     |

<sup>1</sup> Pages 2346 and 2347.

<sup>2</sup> In the Education Report for 1893-94, pp. 30 and 31, were a series of tables showing for 10 cities the number of children of each year of age in the city and the number and proportion of them in school. An examination of those tables will be interesting in this connection.

<sup>3</sup> See Education Report for 1891-92, p. 37.

TABLE 3.—Proportion of pupils in the several school grades in certain cities.

| 1                           | Elementary schools. |             |              |             |              |             |             |               |              |             |  | High schools. |              |             |              |        | Normal schools. |

a 0.1 per cent in fifth year in Baltimore City College.  
 b 2.9 per cent in grammar schools in ungraded classes.  
 c 0.3 per cent in Latin schools "out of course."  
 d 5.4 per cent in 4-year course in grammar schools.  
 e 0.4 per cent in fifth-year Latin school.  
 f 0.3 per cent in fifth and sixth years in high school.  
 g Approximately.  
 h 0.2 per cent in special courses in high school.

TABLE 4.—Summary, by States, etc., of enrollment, attendance, supervising officers, and teachers in cities containing over 8,000 inhabitants.

| Cities of—                   | Number of city school systems. | Enrollment in public day schools. | Aggregate number of days' attendance of all pupils. | Average daily attendance. | Number of supervising officers. |         |        | Number of teachers. |         |        | Enrollment in private and parochial schools (largely estimated). |

\* Statistics of 1896-97.

a Estimated.

b On account of smallpox, the colored schools were open only 157 days.

c The "Greenwich school" only.

d The schools were closed three weeks because of measles.

TABLE 9.—Statistics of population and school enrollment and attendance in cities of over 3,000 inhabitants, 1897-98—Continued.

| City.                                       | Population in 1897 (estimated). | School population. |                                | Pupils in private and parochial schools (largely estimated). | Different pupils enrolled in public day schools. |         |        | Averaged daily attendance in public day schools. | Number of days the public schools were actually in session. | Aggregate number of days' attendance of all pupils in public day schools. |

\* Statistics of 1896-97.

α The schools were opened later than usual because of the prevalence of fever.

TABLE 9.—Statistics of population and school enrollment and attendance in cities of over 8,000 inhabitants, 1897-98—Continued.

| City.                    | Population in 1897 (estimated). | School population. |                                | Pupils in private and parochial schools (largely estimated). | Different pupils enrolled in public day schools. |         |        | Average daily attendance in public day schools. | Number of days the public schools were actually in session. | Aggregate number of days' attendance of all pupils in public day schools. |

## CHAPTER XLVIII.

### MANUAL AND INDUSTRIAL TRAINING.

References to recent Reports of the United States Commissioner of Education, in which this subject has been treated or statistics published: Annual Report for 1888-89, pages 411-428, 1362-1367; 1889-90, pages 1148, 1209-1212, 1351-1356; 1891-92, page 1197; 1892-93, pages 186-188, 569-575; 1893-94, pages 877-949, 2093-2169; 1894-95, page 2170; 1895-96, pages 989-992, 1001-1152, 1321-1329, 1510-1521 (column 8); 1896-97, pages 193-197, 699-703, 2211-2222 (column 8), 2279-2294.

For the school year 1897-98 there were 114 manual or industrial training schools reporting to this office. This was an increase of 15 over the preceding year. Of the 114 schools, 24 were industrial schools for Indian children.

In Table 3 the statistics of the two classes of schools are summarized. In the 114 schools there were employed 945 teachers, 507 men and 438 women. There were 30,683 pupils receiving manual and industrial training, 19,152 boys and 11,531 girls.

The total expenditure for manual and industrial training by 86 of the 114 schools was \$655,247. Of this amount \$440,572 was paid teachers, \$93,058 for materials, \$36,508 for tools and repairs, and \$85,109 for incidentals and for items not classified.

Table 4 gives the statistics in detail of the 90 manual and industrial training schools other than Indian schools. In these 90 schools there were employed 673 teachers, 384 men and 289 women. In the same schools there were 25,893 pupils, 16,449 boys and 9,446 girls.

The detailed statistics of the 24 Indian schools will be found in Table 5. There were 272 teachers employed in these schools, 123 men and 149 women. There were 4,790 pupils, 2,705 boys and 2,085 girls.

In Table 6 are shown the branches of manual training or the trades taught and the number of pupils in each branch, so far as reported by the individual schools mentioned in Tables 4 and 5.

No attempt was made to ascertain the number of pupils receiving manual or industrial training in 1897-98 in institutions which are not distinctively manual or industrial training schools. This was done in 1893-94, and the statistics were printed in the Report of this office for that year, pages 2093 to 2169.

For a number of years the returns from city systems of public schools have shown in what grades manual training has been given if taught at all. The following table shows that in 1890 there were 37 cities of 8,000 population and over in whose public schools manual training other than drawing was taught; in 1894 there were 93 cities; in 1896 there were 121 cities, and in 1898 there were 146 cities.

TABLE 1.—*Cities of 8,000 population and over in each State, in which manual training was taught.*
