## Question: How do AISD students with disabilities rank among all 2009 NAEP TUDA districts in math, and are the gaps on NAEP math between students with disabilities and students without disabilities closing?

## Response:

AISD students with disabilities outperformed their fourth and eighth grade peers in Large Cities (see Tables 1 and 2). Fourth grade students with disabilities also performed significantly higher than did their peers in eleven jurisdictions (Atlanta, Chicago, Cleveland, Detroit, The District of Columbia, Fresno, Houston, Los Angeles, Milwaukee, Philadelphia and San Diego) and eighth grade students with disabilities scored significantly higher than did their peers in all other jurisdictions except Boston.

Table 1. Average scores and achievement-level results for fourth-grade public school students with disabilities (SD) who could be assessed in NAEP math, by jurisdiction: 2009

|  |  | Percentage of students |  |
| ---: | ---: | :---: | ---: | :--- |
| Jurisdiction | Average scale score | At or above Basic | At or above Proficient |
| Nation | 220 | $59 \%$ | $19 \%$ |
| Large City | 210 | $45 \%$ | $12 \%$ |
| Charlotte | $226^{*}$ | $67 \%^{*}$ | $21 \%$ |
| Austin | $222^{*}$ | $60 \%^{*}$ | $17 \%$ |
| Boston | $29^{*}$ | $57 \%$ | $10 \%$ |
| New York City | $218^{*}$ | $57 \%$ | $13 \%$ |
| Miami-Dade | $217^{*}$ | $55 \%^{*}$ | $13 \%$ |
| Jefferson County (KY) | 213 | $46 \%$ | $15 \%$ |
| Baltimore City | 212 | $46 \%$ | $9 \%$ |
| Houston | 209 | $44 \%$ | $9 \%$ |
| San Diego | 205 | $43 \%$ | $8 \%$ |
| Atlanta | 202 | $34 \%$ | $9 \%$ |
| Chicago | 200 | $33 \%$ | $7 \%$ |
| Philadelphia | 200 | $29 \%$ | $4 \%$ |
| Milwaukee | 199 | $31 \%$ | $4 \%$ |
| District of Columbia | 194 | $25 \%$ | $5 \%$ |
| Cleveland | 193 | $24 \%$ | $4 \%$ |
| Los Angeles | 191 | $24 \%$ | $5 \%$ |
| Fresno | 190 | $26 \%$ | $4 \%$ |
| Detroit | 176 | $5 \%$ | $1 \%$ |

Note. The results for students with disabilities are based on students who were assessed including students classified as 504. Data are sorted from largest to smallest average scale score, which ranges from 0 to 500. * Indicates that the score is significantly higher than Large Cities in 2009.

Table 2. Average scores and achievement-level results for eighth-grade public school students with disabilities (SD) who could be assessed in NAEP math, by jurisdiction: 2009

| Jurisdiction | Average scale score | Percentage of students |  |
| :---: | :---: | :---: | :---: |
|  |  | At or above Basic | At or above Proficient |
| Nation | 249 | 36\% | 9\% |
| Large City | 238 | 24\% | 6\% |
| Austin | 259 *** | 47\% *** | 13\% |
| Boston | 247* | 32\% | 5\% |
| Charlotte | 247* | 29\% | 5\% |
| San Diego | 246 | 32\% | 10\% |
| Miami-Dade | 244 | 30\% | 3\% |
| New York City | 242 | 28\% | 7\% |
| Jefferson County (KY) | 241 | 26\% | 3\% |
| Chicago | 235 | 20\% | 4\% |
| Baltimore City | 232 | 18\% | 2\% |
| Philadelphia | 232 | 13\% | 3\% |
| Houston | 231 | 19\% | 2\% |
| Atlanta | 228 | 16\% | 1\% |
| Cleveland | 227 | 14\% | \# |
| Los Angeles | 225 | 13\% | 2\% |
| Fresno | 222 | 13\% | 3\% |
| Milwaukee | 220 | 6\% | 1\% |
| Detroit | 207 | 3\% | 1\% |
| District of Columbia | 204 | 2\% | 1\% |

Note. The results for students with disabilities are based on students who were assessed including students classified as 504. Data are sorted from largest to smallest average scale score which ranges from 0 to 500. \# denotes the percentage rounds to zero. * Indicates that the score is significantly higher than Large Cities in 2009, ** Indicates that the score is significantly higher than the Nation in 2009.

Although students with disabilities and students without disabilities made performance gains at some achievement levels in 2009, the gaps continued to persist and in some cases widened at most achievement levels in 2009. The figures below compare students' average scale scores over time by disability status. As figure 1 suggests, among fourth grade students identified with and without disabilities, the achievement gap widened for those students scoring at or above the Basic level and for those students scoring at or above the Proficient level.

Figure 1. Average score gaps for fourth-grade students with disabilities (SD) compared to students without disabilities (Non SD), from 2007-2009.

Percent of 4th Grade Students At or Above Basic, Proficient and Advanced, by Student with Disability (SD) Status, 2007-2009

Note. NAEP grade 4 mathematics scale ranges from 0 to 500 with achievement levels corresponding with the following points: 213 or lower is considered below Basic, 214-248 is considered Basic, 249-281 is considered Proficient and 282 and higher is considered Advanced.

Figure 2 suggests that although the achievement gap between eighth grade students identified with and without disabilities began to close for students scoring at or above the Basic level, the achievement gap widened for those students scoring at or above the Proficient and Advanced levels.

Figure 2. Average score gaps for eighth-grade students with disabilities (SD) compared to students without disabilities (Non SD), from 2007-2009.

Percent of 8th Grade Students At or Above Basic, Proficient and Advanced, by Students with Disability (SD) status, 2007-2009

Note. Note. NAEP grade 8 mathematics scale ranges from 0 to 500 with achievement levels corresponding with the following points: 261 or lower is considered below Basic, 262-298 is considered Basic, 299-332 is considered Proficient and 333 and higher is considered Advanced.

Table 3 provides information regarding the number of students with disabilities who were assessed from 2005-2009 with exclusion rates declining slightly over time. Each year, NAEP assesses a representative sample of Austin ISD students allowing for reliable reporting for each student group within AISD. For example, 1,500 $4^{\text {th }}$ grade students and $1,3008^{\text {th }}$ grade students were assessed in 2009 . It is important to note that NAEP does not utilize modified assessments; therefore, students who take a modified TAKS test are excluded in NAEP. NAEP does allow for some accommodations; however, types of accommodations that NAEP does not allow are: read aloud testing, calculators on mathematics tests and testing over multiple days. Additionally, students identified as 504 are included in the sample.

Table 3. Fourth and eighth grade students identified as students with disabilities (SD) in NAEP mathematics by assessment year and testing status compared to the nation and large cities as a percentage of students.

| Grade | Testing Status | Austin |  |  | Nation |  |  | Large City |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 05 | 07 | 09 | 05 | 07 | 09 | 05 | 07 | 09 |
| $4^{\text {th }}$ Grade | Identified in the sample as SD | 15\% | 13\% | 16\% | 14\% | 14\% | 13\% | 13\% | 13\% | 13\% |
|  | Excluded from the sample | 7\% | 4\% | 4\% | 3\% | 3\% | 2\% | 3\% | 3\% | 2\% |
|  | Assessed without accommodations | 2\% | 2\% | 2\% | 4\% | 3\% | 3\% | 3\% | 3\% | 2\% |
|  | Assessed with accommodations | 6\% | 7\% | 10\% | 8\% | 8\% | 8\% | 7\% | 7\% | 9\% |
| $8^{\text {th }}$ Grade | Identified in the sample as SD | 14\% | 16\% | 17\% | 13\% | 13\% | 13\% | 13\% | 13\% | 13\% |
|  | Excluded from the sample | 8\% | 4\% | 6\% | 3\% | 4\% | 3\% | 3\% | 4\% | 3\% |
|  | Assessed without accommodations | 5\% | 7\% | 3\% | 3\% | 2\% | 2\% | 3\% | 3\% | 2\% |
|  | Assessed with accommodations | 2\% | 5\% | 7\% | 7\% | 6\% | 8\% | 6\% | 6\% | 9\% |
