INTRODUCTION

The International Bureau of Education has always shown great interest in international educational bibliography and, ever since the first year of the publication of its quarterly Bulletin, in 1925, it has devoted a certain number of pages in each issue to brief reviews of educational books published in the various countries.

Since the second quarter of 1934, in order to make it easier for librarians and educators to classify these bibliographical analyses in their card index, the Bureau has prefixed each of the reviews with a decimal number, in accordance with the plan for the classification of educational documents in current use at the Bureau. Moreover, since that date the International Bureau of Education has issued an offprint of this section, printed on one side of the paper only, so that the book reviews can be mounted on index cards and classified according to the above-mentioned plan. This bibliographical service was again improved in 1956 by the adoption of separate sheets on very thin paper of the same dimensions as standard index cards.

Since 1955, the Bureau has collected in one volume all the analytical bibliographies published in the Bulletin during the course of the year, and has grouped them according to the ten large divisions of the decimal classification plan used by the Bureau, reserving a special heading “Related Topics” for publications dealing with problems more or less closely connected with education. Under each of the sub-divisions of the main headings, the Bureau has classified the books in alphabetical order. An alphabetical index completes the publication.

It should be re-stated here that this annual bibliography must not be confused with an international selection of recently published books on education. It is, strictly speaking, a catalogue of the chief educational publications incorporated in the International Education Library during 1964. Despite its shortcomings, it is to be hoped that this work, like its predecessors, will prove useful to educators, librarians, and even publishers.
37 A (437) EDUCATIONAL SYSTEMS — 37 B (437) HISTORY OF EDUCATION (CZECHOSLOVAKIA)

APANASEWICZ, Nellie & ROSEN, Seymour M. Education in Czechoslovakia. (Washington), U.S. Office of Education, (1963). iii + 40 p., tabl., bibl., gloss., app. (Studies in Comparative Education, OE-14090, Bulletin 1963, No. 27). — Detailed historical account of education at the different levels in Czechoslovakia during the respective periods 1918 to 1948, 1948 to 1960 and following the 1960 school reform. In the appendix: study plans for the different types of school; number of students, teachers and schools according to type of school, including establishments for the handicapped. (IBE)

37 A (73) EDUCATIONAL SYSTEMS (UNITED STATES)

ATKINSON, Caroll & MALESKA, Eugen T. The story of education. [See 37 B (73+ oo)]

37 A (81) EDUCATIONAL SYSTEMS (BRAZIL)

AZEVEDO, Fernando de. A educação na encruzilhada. Problemas e discussões. 2a. ed. (São Paulo), Edições Melhoramentos, (1960). 271 p. — Report on an official inquiry undertaken in 1926 in the state of São Paulo. Originally published in 1937 under the title “Public education in São Paulo”. The report reflects an era of transition between an attachment to the past and a desire to follow the new educational trends. The ideas set forth are still sufficiently up to date to provide a basis for the work of all who are seeking renovation in education in Brazil. Hence the title “Cross-roads in education” of this republication. (IBE)

37 A (42) EDUCATIONAL SYSTEMS (UNITED KINGDOM)

BLISHEN, Edward (Ed.). Education today. The existing opportunities. (London), British Broadcasting Corporation, (1963). 203 p., bibl., app. (BBC Publication). — As a sequel to the BBC broadcasts on educational development in England and Wales, information is given here on (a) educational opportunities offered by the new curricula introduced at pre-primary, primary, secondary and higher levels, (b) some educational experiments (comprehensive schools, etc.), (c) vocational courses for apprentices, (d) special schools for the handicapped, (e) adult education, etc. The book constitutes a summary account of the educational measures taken by the British government in order to adjust school systems and syllabuses to the rate of progress in the modern world. (IBE)

CHAVARRÍA FLORES, Manuel. Cuestionario de pedagogia. [See 37 I]

The education authorities directory and annual 1964. [See 37 E (42)]

Education in the German Democratic Republic. Leipzig, VEB Edition, 1962. 182 p., fig., tabl., bibl. — History of the school reform by which socialist education was in 1945 introduced in the German Democratic Republic. Basic problems which in the teaching, methods and school policy have been raised for the education authorities by the reform. Polytechnical training of schoolchildren; general aims of socialist education; content of curricula from pre-primary to university level; education outside the school; adult education. (IBE)

HANS, Nicholas. The Russian tradition in education. [See 37 B (47)]

EDUCATIONAL SYSTEMS — 379.81 (51) THE SCHOOL AND POLITICS — 377.345 (51) COMMUNIST EDUCATION (CHINESE PEOPLE'S REPUBLIC)

notes. (Classics in Education No. 7). — After outlining the history of education in traditional China, a history characterised during a period of 2000 years by continuity and the absence of any fundamental change, Professor Hu examines the ideologies and principles which underlie education in communist China (dialectic materialism, the search for knowledge through practical experience, the development of a proletarian, national and scientific culture). Education's role in the creation of communist China: political education on the one hand, education for the purposes of production on the other, since all the nation's human resources must be mobilised. At the time of the "great leap forward" in 1958 education was decentralised and became for the most part a matter for the "communes". In the appendix are some articles by Mao Tse-Tung and other contemporary Chinese thinkers. (IBE)

37 A (676.2+676.1+678.2) EDUCATIONAL SYSTEMS (KENYA, UGANDA & TANGANYIKA)
HUNTER, Guy. Education for a developing region. A study in East Africa. London, George Allen and Unwin, (1963). xvi+119 p., tabl., ind., app. (Political and Economic Planning — The Institute of Race Relations). — Study on education in Kenya, Uganda and Tanganyika. Among the topics to receive particular attention: (a) plans and ambitions of governments in East Africa; (b) present systems and programmes of education and vocational training, together with the changes contemplated; (c) training of the administrative, technical, scientific and senior personnel required to replace foreign personnel; (d) organization of education and vocational training overseas for African students; (e) the living conditions abroad, the scholarships and living allowances offered to students by different countries. In conclusion, the administrative consequences which the extension of education has in East Africa. (IBE)

37 A (676.2) EDUCATIONAL SYSTEMS (VARIOUS COUNTRIES)
International yearbook of education. Vol. XXV, 1963. [See 37 G (676.2)]

37 A (52) EDUCATIONAL SYSTEMS (JAPAN)
JAPAN. JAPANESE NATIONAL COMMISSION FOR UNESCO. Development of modern system of education in Japan. [See 37 B (52)]

37 A (519.1) EDUCATIONAL SYSTEMS (REPUBLIC OF KOREA)
KIM, Sung-il (Ed.). Education in Korea. Seoul, Ministry of Education & National Commission for Unesco, 1962. 100 p., fig., tabl., app. — Report on education in Korea. A short history of the country under Japanese domination shows the efforts and progress made in the field of education since 1948. Prior to this very few Koreans had an opportunity of studying at higher level since they were destined to take up manual occupations. The official language was Japanese and in 1941 Korean was not even allowed to be spoken in schools. Consequently at the time of the liberation there was a dire shortage of teachers, no school literature in the national language, no schools and it was necessary to make a complete start in order to combat illiteracy. Other information in the report: details of the five-year plan (1961) for education; comparative statistical tables; list of the different types of schools; their respective curricula. (IBE)

37 A (47+676.2) EDUCATIONAL SYSTEMS (USSR & VARIOUS COUNTRIES) — 377.345 COMMUNIST EDUCATION
KING, Edmund J. (Ed.). Communist education. London, Methuen & Co., (1963). vii+509 p., ind. — Survey by several contributors who all, many of them several times, had made visits to one or more of the people's democracies in order to study the respective educational systems either as a whole or in some particular aspect. The different chapters are devoted to (1) the concept of ideology in communist education (E. King), (2) Soviet educational psycho/ogy (N. O'Connor), (3) Russian children at home and in school (M. Waddington), (4) the traditional and the distinctive in Soviet education (W. R. Fraser), (5) the status and training of teachers in the U.S.S.R. (A. E. Adams), (6) selection and differentiation in Soviet schools (J. J. Figueras), (7) the polytechnical principle (K. F. Smart), (8) higher education (C. L. Wrenn), (9) East Germany — distinctive features (D. Johnston), (10) Poland — a statement of aims and achievements (B. Suchodolski), (11) China (J. A. Lauwerys) and (12) common ground between communist and Western education (J. Katz). (IBE)
37 A (oo) EDUCATIONAL SYSTEMS — 371.42 (oo) SCHOOL REFORM — 370.48 (oo) COMPARATIVE EDUCATION RESEARCH (VARIOUS COUNTRIES)

37 A (oo) EDUCATIONAL SYSTEMS — 370.48 (oo) COMPARATIVE EDUCATION RESEARCH (VARIOUS COUNTRIES)

KING, Edmund J. World perspectives in education. London, Methuen & Co., (1962). 380 p., ind., notes, app. — Analysis in the nature both of comparative education research and of a record of educational principles. The author takes certain of these principles which have occupied educators throughout all time and examines them against the spectrum of international experience. The book is intended not only for educators in all countries but also for all men and women who are concerned with public affairs and must be informed on everything related to education. Of the opinion that on the threshold of the second phase of the industrial revolution — the social adjustment phase — education must not be regarded merely from the national aspect, the author analyses the perspectives of education in its international aspect and explains the resulting responsibilities and implications. Sections of the book: (1) introductory; (2) the social context; (3) the effect on schools; (4) the study of education as a personal and social leaven; (5) teachers in a world of change. An essay "The Gentleman" reflects one aspect of social change as seen by the author. (IBE)

37 A (73) EDUCATIONAL SYSTEMS — 370.3 (73) PHILOSOPHY OF EDUCATION (UNITED STATES) — 370 THEORY OF EDUCATION

KNELLER, George F. (Ed.). Foundations of education. New York & London, John Wiley and Sons, (1963). xiv+650 p., tabl., bibl., ind., notes. — The theoretical, social and practical bases for a science of education are proposed by nineteen American faculty professors, who show how education embraces all the cultural aspects which contribute to man's history, his thinking and his activities. This discipline is an intellectual and systematic subject comparable in all respects with the academic disciplines. The educational purpose of the book is manifest from the historical outline of how the educational system has evolved in the United States as well as from an analysis of the system's philosophical, theoretical and sociological bases and a discussion of technology in developed or developing societies. (IBE)

37 A (494) EDUCATIONAL SYSTEMS (SWITZERLAND) — 371.02 EDUCATION AT HOME

KUNZ, Johannes (Hrsg.). Unser Kind im Schulalter. Orientierungen und Hinweise für Eltern mit Kindern, im Volksschulalter (7-15 Jahre). Zürich, Ex-Libris Verlag, (cop. 1961). 326 p., fig., pl., bibl. (19 p.). — Twenty collected articles dealing with education in the home and at school in Switzerland. Each of the authors, whether teacher, psychologist or physician, is in close contact with today's youth and is familiar with its problems; moreover, themes and examples were chosen in view of their present interest and significance. They cover almost all the problems arising at each stage of development and show how parents and children can often unite their efforts to overcome obstacles. Special cases, of a more or less serious nature, are also considered: stuttering; mental or physical handicap, etc. In addition, parents are given information on how to find the help and possible financial assistance which they require. (IBE)

37 A (oo) EDUCATIONAL SYSTEMS — 370.48 (oo) COMPARATIVE EDUCATION RESEARCH (VARIOUS COUNTRIES)

LONDON AND HOME COUNTIES. REGIONAL ADVISORY COUNCIL FOR TECHNOLOGICAL EDUCATION. Learning from Europe. A brief comparative survey... (The Netherlands; W. Germany; Switzerland; France; Sweden). London, Tavistock House South, 1963. 19 p. — Comparative study showing (1) that in the Netherlands, France, Switzerland and Sweden there is no tendency to replace the "all-age primary school" by adoption of the pattern of "secondary education for all" existing in Great Britain and (2) that in these countries, whereas the requirements for admission to institutions of higher education are more rigid than in the United Kingdom the school curriculum on the other hand has a more technical and vocational bias. (IBE)
37 A (41) EDUCATIONAL SYSTEMS (SCOTLAND)
MACKINTOSH, M. Education in Scotland. [See 37 B (41)]

37 A (∞) EDUCATIONAL SYSTEMS (VARIOUS COUNTRIES)
MAGNINO, Leo. La scuola dell’obbligo nei vari paesi del mondo. [See 379.61 (∞)]

37 A (47) EDUCATIONAL SYSTEMS (USSR)
MOOS, Elizabeth. Education in the Soviet Union. New York, National Council of American-Soviet Friendship, 1963. 108 p., fig., bibl. — Account by the author following her third visit to many of the republics in the Soviet Union for the purpose of educational research. She was particularly impressed by the rapidity with which the educational reform had at all levels been given effect: (a) setting up of schools and leisure centres; (b) teacher training and adult education; (c) relaxed climate prevailing in the institutions, orphanages, nursery schools, etc.; (d) success obtained in the education of children suffering from psychic disorders and other handicaps as well as in the re-education of young delinquents. (IBE)

37 A (485) EDUCATIONAL SYSTEMS (SWEDEN)
ORRING, Jonas. Comprehensive school and continuation schools in Sweden. [See 379.66 (485)]

37 A (6) EDUCATIONAL SYSTEMS (AFRICA)
Phelps-Stokes reports on education in Africa. Abridged, with an introduction by L.J. Lewis. London, [etc.], Oxford University Press, 1962. 213 p. — Abridged extracts from two reports which were made, one in 1922 (relating to the western part of Africa) and the other in 1924 (relating to the eastern part). Principal matters with which the extracts deal: Africa and education; adaptation of education to the needs of the local community; organization and school supervision; education of the masses; training for national leadership; cooperation for the education of African peoples; education of African women and girls. (IBE)

37 A (54) EDUCATIONAL SYSTEMS (INDIA)
RAMANATHAN, G. Education from Dewey to Gandhi. [See 371.08]

37 A (931) EDUCATIONAL SYSTEMS — 379.9 (931) OFFICIAL DOCUMENTS ON EDUCATIONAL MATTERS (NEW ZEALAND)
Report of the Commission on Education in New Zealand. Wellington, R. E. Owen, Government Printer, 1962. xxx+1-885 p., fig., tabl., ind., app. — Final report of the Commission on Education in New Zealand set up on 15th February, 1960, to give its opinion on a great many educational matters and with special reference to the urgent one of primary teachers and their recruitment. The questions examined are arranged in six sections: (1) Public education in New Zealand: some governing views; growth and output of schools; administration of education; educational finance. (2) The organization of the school system; work of the schools; technical education; Maori education; rural and agricultural education; special education. (3) The pre-service and in-service training of teachers; the teaching profession, its status, salaries and conditions. (4) Research in education. (5) School buildings and their community use; delinquency and the schools; religious teaching in state schools; state aid to private schools. (6) Summary of the recommendations listed at the end of each chapter; summary of the recommendations in the 1960 interim report. (IBE)

37 A (87) EDUCATIONAL SYSTEMS — 37 B (87) HISTORY OF EDUCATION (VENEZUELA)
SÁNCHEZ, George I. The development of education in Venezuela. (Washington, U.S. Office of Education, (1963). x+114 p., bibl. (OE-14086, Bulletin 1963, No. 7). — Although statistics in Venezuela reveal that much remains to be done in providing for education, the historical antecedents show that after the revolution in 1958 it was necessary to plan the work of reconstruction on ground practically barren as regards education (60% of the population being illiterate). Matters examined in the present report: (a) the nature and composition of the central school administration and its agencies; (b) the
planning of the education system; (c) the initial results (1960-61) due to implementation of the programmes planned; (d) the literacy campaign and adult education in rural areas. (IBE)

37 A (55) EDUCATIONAL SYSTEMS (IRAN)
SASSANI, Abul H. K. Education in Iran. (Washington), U.S. Office of Education, (1963). iii+32 p., tabl., bibl. (OE-14081, Bulletin 1963, No. 18). — Picture of Iran from the geographical, economic, demographic, and political points of view followed by a study of the educational development. Traditional and based on the teaching of religion and ethics, education did not make much progress until the 19th century, when a stimulus to culture was given by France. Under the influence of American philanthropic and technical organizations, after the second world war, the educational system became modelled on the American pattern. Description of the ordinary school system (curricula at primary and secondary levels, etc.). (IBE)

37 A (47) EDUCATIONAL SYSTEMS -- 371.44 (47) SYSTEMS DISTINGUISHED BY THEIR SOCIAL AIMS: POLYTECHNICAL INSTRUCTION — 373.19 (47) EDUCATION COMBINING GENERAL CULTURE AND VOCATIONAL TRAINING — 375.9 (47) TECHNIQUES TAUGHT AT SCHOOL (USSR)
SHAPOVALENKO, S.G. (Ed.). Polytechnical education in the U.S.S.R. (Paris), Unesco, (1963). 433 p., fig., pl., tabl., bibl. (11 p.), app. (Monographs on education). — Under the 1958 school reform in the U.S.S.R. the duration of compulsory education has been extended by one year (eight-year instead of seven-year school), while the polytechnical and vocational nature of secondary education has received emphasis. The aim of the reform is, while ensuring the high standard of instruction as regards general education, to provide for still closer connection between the school and the requirements of the nation's industrial life such as these are envisaged in a communist society. Different authors, all members of the USSR Academy of Pedagogical Sciences, describe not only the aims, principles, methods and various types of polytechnical education but also the structure of the new curriculum and the content of the main subjects. In the appendix: the text of the new law; the respective statutes relating to the eight-year school, the secondary general education polytechnical school and the evening secondary school; a long reference list in regard to the matters treated. (IBE)

37 A (73) EDUCATIONAL SYSTEMS — 37 E (73) REFERENCE BOOKS (UNITED STATES)
SMITH, Edward W; KROUSE, Stanley W. Jr. & ATKINSON, Mark M. The educator's encyclopedia. Englewood Cliffs, N. J., Prentice-Hall, (1962). xiii+914 p., tabl., bibl. (15 p.), gloss., ind., app. — Encyclopaedia for educators in general. The information relates to all aspects of elementary and secondary education in the United States and is arranged under the following headings: philosophy and objectives; school organization; staff organization; professional growth; curricular areas; instructional improvement; evaluation and measurement (tests, etc.); students; pupil personnel services; child growth and development; teaching; classroom management; materials and resources (audio-visual material); student activities; community-school relations. Use of the volume is facilitated by the index, glossary and alphabetically classified subject sections, etc. (IBE)

37 A ( oo) EDUCATIONAL SYSTEMS (VARIOUS COUNTRIES)
UNESCO. International guide to educational documentation. 1955-1960. [See 37 L ( oo)]

37 A (89) EDUCATIONAL SYSTEMS (PARAGUAY)
UZCATEGUI, Emilio. Panorama de la educación paraguaya. 2a ed. ampliada y corregida. Asunción, Imprenta Nacional, 1959. 229 p., tabl., bibl. — Second edition of a work in which after an introductory discussion of Paraguay's geography, population, legislation, historical background, etc. a thorough analysis is made of her educational system. Administrative structure; financing of the educational institutions; number of schools, teachers and pupils; former and new curricula; training of teaching staff for the different levels of education. Future trends. The work of the Paraguayan educator Ramón I. Cardozo and his influence on education in Paraguay and in America generally. (IBE)
37 A (47) EDUCATIONAL SYSTEMS (USSR)  
WILICH, J. Tadeusz. Radziecki system oświatowo-wychowawczy. Warszawa, Państwowe Wydawnictwo Naukowe, 1962. 195 p., fig., tabl., bibl., notes. — Account of the present educational system and the teaching methods used in the USSR. This system is characterized by a continuity which makes it possible for pupils who finish the eighth-year school, or who have interrupted their studies, to take them up again at any time either at secondary or university level. The intention is that secondary education become universal and become made accessible to everyone, including apprentices and workers in cities and rural areas. Such studies are closely connected with the practical training necessary to the development of economic activity and should ensure a general and polytechnical education which will gradually eliminate cultural differences regardless of fields of specialization. (IBE)

37 A (47) EDUCATIONAL SYSTEMS — 37 B (47) HISTORY OF EDUCATION (USSR) — 37 D  
BIBLIOGRAPHY  
WITTIG, Horst E. Das Bildungswesen der UdSSR. Literatur zur Einführung in die ideologischen, historischen, politischen Grundlagen und pädagogischen Probleme des russischen und sowjetischen Bildungswesens. Frankfurt a.M., Hochschule für Internationale Pädagogische Forschung, (cop. 1960). 185 p. rom. — Selected bibliography of works and articles published in the USSR and other Eastern countries and which constitute a general introduction to the history and study of educational problems as well of the political and ideological principles first of Russian, then of Soviet education. Included are not only certain works of Marx, Engels, Lenin, Makarenko and those who succeeded them but also some publications on the “polytechnisation” of education. (IBE)

37 A (47) EDUCATIONAL SYSTEMS — 373 (47) SECONDARY EDUCATION — 379.96 (47)  
EDUCATIONAL STATISTICS — 370.46 (47) COMPARATIVE EDUCATION RESEARCH — 37 E (47) REFERENCE BOOKS (VARIOUS COUNTRIES)  
World survey of education, III. Secondary education. (Paris, Unesco, [1963]. 1482 p., fig., tabl., bibl., gloss., ind. — Third volume, in its English edition, of "World survey of education", a series of reference books regularly published by Unesco on organization of the different educational systems. The purpose of this important publication is twofold, it being to give (a) a world view of secondary education and (b) a more detailed view of all types of schooling or instruction provided at this level in every country and territory of the world. The volume opens with several international studies. These are followed by some 200 chapters of a national character relating respectively to the different political or territorial units which possess a distinct school system. Besides an account of the school system as a whole and a more detailed account of the organization, administration and financing of education, each chapter includes a glossary, statistical tables and summaries as well as a diagram of the school organization. In each case there is also an outline of the facts which since the beginning of the 20th century have marked the development of education, while an account is given both of recent trends and of the problems which are encountered particularly in secondary education. (IBE)

37 A (430.2) EDUCATIONAL SYSTEMS — 371.42 (430.2) SCHOOL REFORM (FEDERAL REPUBLIC OF GERMANY)  
ZEIDLER, Kurt. Plädoyer für die Schule. Eine Orientierung für jedermann. Braunschweig, Georg Westermann Verlag, 1962. 160 p., ind. — In the Federal Republic of Germany the "over-all plan for reorganization and simplification of the official system of general culture education" (Rahmenplan), which was submitted in 1959 by the German Committee for Education and Instruction, produced and is still producing many reactions and discussions in the press. The present publication gives a general picture of the current educational situation and shows in particular the main questions raised: arguments for and against schools with productive efficiency; some teaching problems; the school considered as a place for meeting and associating and as a protector of standards; foreign concepts which find little acceptance in Germany (comprehensive school, whole-day school); careful adjustment of the German educational system to a changed world, taking into account the "Rahmenplan" and the "Bremen Plan". (IBE)

37 B HISTORY OF EDUCATION — 370.3 PHILOSOPHY OF EDUCATION
BERTIN, Giovanni Maria. La pedagogia umanistica europea nel secolo XV e XVI. Milano, Marzorati, 1961. 376 p., bibl. notes, app. — Humanist education in Europe during the 15th and 16th centuries. The book brings back these two centuries during which, nourished by the ancient ideal, the humanities encouraged the blossoming forth of the human qualities. A discussion of the great educational “trends” (humanism and the Renaissance, the Reformation and Counter Reformation) in Italy and Europe is supplemented by a selection of texts including the little known educational writings of Melanchthon, Zwingli and Calvin. (IBE)

37 B (45) HISTORY OF EDUCATION — 379.6 (45) SCHOOL POLICY FROM THE SOCIAL POINT OF VIEW — 379.8 (45) SCHOOL POLICY AND STATE PROBLEMS (ITALY)
BERTONI JOVINE, Dina. La scuola Italiana dal 1870 ai giorni nostri. Roma, Editori riuniti, (1958). 500 p., pl., bibl. notes, ind. (Orientamenti). — Discussion of the educational trends which since 1870 have marked the development of Italian school education. What is presented is not so much an analysis of methods but rather a critical appraisal of the social and political movements which favoured or hindered educational development. While paying tribute to the many educators who introduced changes in favour of education having a more personal and liberal nature, the author laments the slowness with which education developed due to the fact that the “educational conscience” was not yet sufficiently wide-spread to create a truly popular effort in favour of education and eliminate all discrimination. (IBE)

CURTIS, S.J. History of education in Great Britain. 5th ed. London, University Tutorial Press, (1963). vii+706 p., fig., tabl., bibl. (23 p.), ind., chronol. tabl. — Fifth edition of a history of education in the United Kingdom. It may be regarded as consisting of seven main sections: I. Mediaeval education; schools and universities in the Tudor period; religious and social crises affecting the lives of children; the philanthropic movement; school reforms; state intervention in secondary education. II. The Revised Code (1862); founding of a national educational system (1895-1902); development of this system until 1944. III. General situation as regards all categories of education within the context of circumstances arising from the war (removal of schoolchildren to safety areas, shortage of teachers, return of servicemen, etc.). Analysis of the 1944 Education Act, its implementation up to the present, its implications for the future, the amendments made to it as a result of the changed circumstances since 1944. IV. Adult education; development of scientific and technical education. V. Review of the historical and religious circumstances which gave rise to the Education (Scotland) Act. VI. Education in the armed forces during the war and in peace time. VII. A new chapter dealing with recent developments in British education. (IBE)

37 B (47) HISTORY OF EDUCATION — 37 A (47) EDUCATIONAL SYSTEMS (USSR)

HANS, Nicholas. The Russian tradition in education. London, Routledge & Kegan Paul, (1963). vii+196 p., bibl., ind. — Historical discussion of Russian education (Peter the Great to Khruschev) intended to show how underlying the great diversity in philosophical trends and political regimes there is in education a Russian national tradition which does not vary. Whether it be the humanist tendency (Pirogov), the national tendency (Ushinsky), the moral tendency (Tolstoy), the materialistic and liberal tendencies or, finally, the Soviet "labour school" (Makarenko), the author, formerly professor of comparative education at the London University Institute of Education, maintains that the Russian tradition and methods of "Russification" are always dominant. He concludes that it would be wrong to consider the Soviet system of education as something entirely new and a product of Marxism. In the present system too there are elements of the traditional historical past which are inherent in the Russian character and of which the system is largely the natural result. (IBE)

37 B (87) HISTORY OF EDUCATION - 379.61 (87) THE RIGHT TO EDUCATION. COMPELLARY SCHOOLING (VENEZUELA)
LEMMO, Angelina. La educacion en Venezuela en 1870. Caracas, Universidad central de Venezuela, Facultad de humanidades y educacion, 1961. 194 p., tabl., facs., bibl., app. (Publicaciones del Instituto de antropologia e historia, Serie de historia). — History of education in Venezuela from the decree of 27th June, 1870, on free and compulsory public education to 1875, year in which the Ministry of Education published an extremely important statistical report on the development of education during that five-year period. Outline of trends gradually giving rise to the concept of free, compulsory and secular education. Detailed analysis of decrees issued in the State of Guyana with a view to the practical application of these principles. One section deals with the characteristics of the Venezuelan publication "El Abed" which was the organ for disseminating the educational ideas of the time. In the appendix: legislative texts, facsimiles and reproductions of some issues of "El Abed". (IBE)

37 B (438) HISTORY OF EDUCATION (POLAND) - 37 C LIFE AND WORK OF EDUCATIONISTS
LEWIN, A. Makarenko w Polsce. Warszawa, " Nasza Księgarnia ", 1962. 267 p., bibl. (18 p.), notes. — Historical study and critical appraisal of the influence, both theoretical and practical, exerted in Poland by the Soviet educator Makarenko. Discussions raised in regard to his doctrine and its application in circumstances other than those in which he practised it himself. The book shows how Makarenko's work on the whole assumes an importance which extends beyond the confines of the national setting. (IBE)

37 B HISTORY OF EDUCATION — 370.3 PHILOSOPHY OF EDUCATION
LICHSTENSTEIN, Ernst. Bildungsgeschichtliche Perspektiven. Glaube und Bildung — Bildung als geschiichtliche Begegnung. Ratingen bei Düsseldorf, A. Henn Verlag, (cop. 1962). x+187 p., bibl. notes (12 p.). — Collection of studies presented during a period of some thirty years on education as a historical process and on its philosophical, cultural, theological and social bases. In this "substratum" can be seen the various motives underlying the educational systems which have left their mark on history, at the time of Christianity's arrival in the West, at the time of the penetration and impact of German thinking and then during the period of modern scientific progress. These historical backgrounds reflect vital forces which have left a stamp of spirituality on some or other aspect of contemporary history. Considering first the problems of antiquity, the formation and modern times and through such men as Clement of Alexandria, Luther, Goethe, Pestalozzi and Herder it is possible to envisage some future trends in the problem of culture itself and gain a general idea of its origins. (IBE)

37 B (41) HISTORY OF EDUCATION — 37 A (41) EDUCATIONAL SYSTEMS (SCOTLAND)
MACKINTOSH, M. Education in Scotland. Yesterday and today. Glasgow, Robert Gibson & Sons, (1962). viii+248 p., fig., tabl., bibl., gloss., ind., app. — Historical account and a discussion of the Scottish educational system: traditions; those who by their energy, idealism, learning or wealth have been throughout the centuries the pioneers and benefactors of Scottish school education. Description of the different aspects of education: administration and financing of education; education at the different levels (day school; secondary and senior secondary education, comprehensive school, advanced technical education); problem of maladjusted children; juvenile delinquency, etc. List of the principal educational enactments from 1494 to 1946. (IBE)
MALLINSON, Vernon. Power & politics in Belgian education. 1815 to 1961. London, [etc.], Heinemann, (1963). xi-253 p., fig., tabl., bibl., ind., app. — Analysis of Belgian school policy and administration from 1815 to 1961 in the light of history, traditions and the social, economic and political forces which have influenced this country’s development. Linguistic, religious, political and economic problems which the education authorities have encountered and must still confront. Discussion of the educational situation in the Congo and of the 1959 Belgian Schools Pact. (IBE)

MATTOS, Luiz Alves de. Primórdios da educação no Brasil. O período heróico (1549 a 1570). Rio de Janeiro, Gráfica editora Aurora, 1958. 306 p., bibl. — History of the first era of education in Brazil. This so-called “heroic” period extends from 1549 when the first Jesuit missionaries arrived with Father Manuel da Nobrega until the latter’s death in 1570. It was in this year too that were provided regular courses leading to a baccalaureate and a master of arts degree at the larger colleges in Bahia. (1) Foundations of an educational system and the opening of two colleges; (2) new administrative policy; (3) biographies of Brazil’s first educators (Martinote, Vicente Rijo, José de Anchieta); (4) end of the “heroic” period, discussion of its features. 37 C LIFE AND WORK OF EDUCATIONISTS — 370.3 PHILOSOPHY OF EDUCATION — 371.46 (54) SYSTEMS DISTINGUISHED BY THEIR PHILOSOPHIC INSPIRATION (INDIA)
MUKHERJEE, Himangshu Bhushan. Education for fulness. A study of the educational thought and experiment of Rabindranath Tagore. London, Asia Publishing House, (1962). xvi+496 p., bibl. (10 p.), ind. — Study dealing with Tagore’s life, thought, theories and experiments as an educator. Between 1861 and 1901 the young poet, his education in England, the “vision” which he had of spiritual reality and which is to be the quintessence of his educational philosophy. Between 1901 and 1918, Santiniketan where he desires to introduce a new kind of education but one based on the ideals of ancient India. His writing of “University Bill” in which he openly stands for “self determination” and describes his concept of a national education which accords with ancestral traditions but is related to the country’s development. Then, after having been a fervent nationalist, Tagore becomes one whose sole desire is universal brotherhood. From 1918 to 1948, Viva-Bharati, the institution at which Tagore’s earlier aspirations and activity yield concrete results and which corresponds to his enlightened humanism (Religion of Man). There he declares that the nation has a duty to educate children because education means the arousing of vitality and vitality means continuous progress for the nation’s good and in its interest. In the fourth section the author considers the application of Tagore’s theories to the requirements of modern culture. (IBE)
37 C LIFE AND WORK OF EDUCATIONISTS

NASSIF, Ricardo & CIRIGLIANO, Gustavo F. J. En el centenario de John Dewey. (Con una "Bibliografía de John Dewey"). La Plata, Universidad Nacional, Departamento de Ciencias de la Educación, 1961. 65 p., bibl., notes (Biblioteca del Departamento de Ciencias de la Educación, Serie Menor, 1). — Short study devoted to certain aspects of John Dewey's educational thought. Annotated text of two lectures delivered at the Faculty of Humanities and Educational Sciences in Buenos Aires to mark the centenary of the great American philosopher and educator's birth. The study is supplemented by a bibliography on John Dewey. (IBE)

37 C LIFE AND WORK OF EDUCATIONISTS — 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE: WINNETKA

ORLANDO, Diego. C.W. Washburne e l'esperimento di Winnetka. (Brescia), "La Scuola" Editrice, (cop. 1960). 176 p., tabl., bibl. (Pedagogisti ed educatori, 15). — Among John Dewey's group of followers who were adepts in activity methods was a practitioner and implementer, namely Washburne. His work may be summed up by reference to individualised teaching and the adaptation of the school to the child. In fact the procedure applied at Winnetka's schools was designed by him to enable the pupil to work individually, although group activities indispensable to the development of social sense were not excluded. (IBE)

37 C LIFE AND WORK OF EDUCATIONISTS — 37.1.450 CHRISTIAN EDUCATION

STRÜBIN, Eduard. Gottschef der Erzieher. Herausgegeben von der Literatur-kommission des Kantons Baselland. Liestal (Schweiz), Kommissionsverlag Lüdin, 1963. 28 p., fig., bibl., notes. — Educational views of Gotthelf, this people's writer belonging to German speaking Switzerland. Illustrated with many typical quotations they reveal simultaneously the man, the writer and the educator, one who was hostile to all theory and all system. What Gotthelf advocated was Christian education through living, with as basis the home and family. (IBE)
37 C LIFE AND WORK OF EDUCATIONISTS — 370.3 PHILOSOPHY OF EDUCATION

TODISCO, Nicola. Il pensiero di Sergio Hessen. Napoli, Stabilimento Tipografico G. Genovese, 1961. 122 p., tabl., bibl. — The thinking, in its main outline, of Sergio Hessen, this educator with original ideas and reformer of school education. His views may be summarised as follows: (a) no distinction to be made between education for the people and education for the privileged; (b) every individual to have the right to be educated according to his abilities and needs; (c) the entire community, young and adults alike, to be assured of cultural and vocational qualifications; (d) culture to have an aesthetic and social instead of an intellectual and literary basis; (e) industrial and economic life in general to be considered as an integral part of culture. International Jahrbuch für Geschichtsunterricht, Band VIII. [See 375.42 (00)]

The yearbook of education 1963. The education and training of teachers. Joint editors: George Z.F. Bereday & J.A. Lauwerys. London, Evans Brothers, in association with the University of London Institute of Education and Teachers College, Columbia University, New York, (1963). xxv +578 p., fig., tabl., bibl. notes, ind. — Representing the collaboration of some fifty persons prominent in the fields of educational administration, teacher training and comparative education, this twenty-fifth edition of the Yearbook of Education gives an idea from the international point of view of the problems encountered by teachers. The value of any educational system is determined much more by the quality of the teachers than by the educational goals, the efficiency of school administration or a wealth of teaching material. How to recruit successfully the required number of teachers, provide them first the best professional training possible and then with the working conditions and social status which they deserve. The contents of this yearbook deal with: I. Historical and theoretical studies (what is the pattern of the ideal teacher and what are, or were, the historical and theoretical factors capable of changing this pattern). II. The organization of teacher training (22 area studies). III. Social and economic problems (the quality of the teachers, social factors involved in teacher training, etc.). IV. New experiments in teacher education (school reform and its repercussions, group dynamics, teacher training for mass education, the work of the International Council on Education for Teaching). (IBE)

The year book of education 1964. Education and international life. Joint editors: George Z.F. Bereday & Joseph A. Lauwerys. London, Evans Brothers, in association with the University of London Institute of Education and Teachers College, Columbia University, New York, (1964). xxv +549 p., fig., tabl., bibl. notes, ind. — Representing the collaboration of some fifty persons prominent in the fields of educational administration, teacher training and comparative education, this twenty-sixth edition of the Yearbook of Education gives an idea from the international point of view of the problems encountered by teachers. The value of any educational system is determined much more by the quality of the teachers than by the educational goals, the efficiency of school administration or a wealth of teaching material. How to recruit successfully the required number of teachers, provide them first the best professional training possible and then with the working conditions and social status which they deserve. The contents of this yearbook deal with: I. Historical and theoretical studies (what is the pattern of the ideal teacher and what are, or were, the historical and theoretical factors capable of changing this pattern). II. The organization of teacher training (22 area studies). III. Social and economic problems (the quality of the teachers, social factors involved in teacher training, etc.). IV. New experiments in teacher education (school reform and its repercussions, group dynamics, teacher training for mass education, the work of the International Council on Education for Teaching). (IBE)
University, New York, (1964). xii+493 p., tabl., bibl. notes, ind. — The 1964 edition of this yearbook is entirely devoted to education and international life. I. Historical evolution of internationalism, the political background, the sociological and religious constraints and the underlying moral assumptions; factors which are conducive to or which hinder education for international understanding. Particular role of education and the consequent responsibilities of educators and school administrators (regional educational policies, language barriers); first fruits of education for a world government. III. Various practical measures in connection with international understanding (travel for study purposes by teachers and students, revision of textbooks, efforts to obtain equivalence of degrees and diplomas, provision of technical aid, possibilities of films and television). IV. Role played by certain government and unofficial international organizations. V. Some endeavours to provide international teaching; various types of international school; achievement of the Danish folk high schools; teaching of international understanding in traditional schools; contribution of the different subjects to international understanding. (IBE)
DENGO, Omar. Escritos y discursos. San Jose, Costa Rica, Ministerio de educación publica, 1961. xxi+479 p., facs., bibl. (Escritores Costarricenses, Sección obras completas, 1). — Considering education as the main force behind the economic and social transformation of his country, the professor and writer Omar Dengos shows in his addresses, letters and articles analysing men and events of his time that the solution of educational problems is determined by the investigation of political, economic and social circumstances in a country as well as by the psychological constitution of the pupil. Bibliography and concise biography on the author. (IBE)

HARTCUP, John & HARTCUP, Adeline (Comp.). Morning faces. A miscellany on childhood and education. London, [etc.], Heinemann, (1963). 320 p., pl. Collected material dealing with education, taken from fiction and biography written by well known Anglo-Saxon or other authors. Arranged in fourteen sections according to type and accompanied by illustrations, these excerpts reflect, sometimes with humour or irony, two points of view in regard to education, namely that of the teacher and that of the pupil. They also show that from the Renaissance until the present day, in East as in West, one triangle is not equilateral, that consisting of the cane, the devoted teacher and the likeable duffer! (IBE)

KRUPSKAJA, N. K. Pedagogicheskie sochinenija v desjati tomah. Tom X. Reцenzii, otryvy, zamecanija. Moskva, Izdatel'stvo Akademii pedagogicheskikh nauk RSFSR, 1962. 1 pl., fig., tabl., bibl., ind., notes. (Institute of Educational Theory and History). — Tenth volume of N. K. Krupskaja's works including accounts and critical studies of educational works, several notes and annotations, as well as letters written to different persons. Of the 283 texts, 210 are published for the first time; all of them come from official archives. Notes help to place this documentation in its historical context. (See IBE Bulletins N° 132, 134, 135, 136, 137 and 139). (IBE)

KRUPSKAJA, N. K. Pedagogicheskie sochinenija v desjati tomah. Tom XI (supplement). Pis'ma. Dnevntk poezdki na parohode « Krasnaja zvesda ». Moskva, Izdatel'stivo Akademii pedagogicheskikh nauk RSFSR, 1963. 935 p., fig., bibl., ind., notes. (Institute of Educational Theory and History). — Eleventh volume of N.K. Krupskaja's educational works. Published as a supplement to the previous ten volumes it contains in addition to letters the diary kept by the author during a lecture tour in the army occupation area in 1919. (IBE)

MAILLO, Adolfo. La educación en la sociedad de nuestro tiempo. Madrid, Centro de documentación y orientación didácticas de enseñanza primaria, (1961). 366 p., tabl., bibl., ind., notes. — Collected articles bearing on education, published between 1950 and 1960. Among the main topics dealt with: intuition; education in its relation to suffering and hope; psychology of Spanish; education and politics; relationship between the family and education; educational planning; anthropology in underdeveloped areas; the school considered as a social group, etc. (IBE)

OTTO, Berthold. Ausgewählte pädagogische Schriften. Besorgt von Karl Kreitmaier. Paderborn, Ferdinand Schöningh, 1963. 291 p., pl., bibl., ind., notes, chronol. tabl. (Schöninghs Sammlung Pädagogischer Schriften, Quellen zur Geschichte der Pädagogik). — Selected works by Berthold Otto (1849-1933), instigator of school reform in Germany during 1920 and subsequent years. First a tutor to his five children and then their teacher (in addition to his professional work), in 1907 he founded in Berlin the noted "Berthold Otto School" which quickly became a centre for pedagogical study and where many teachers went to receive their training or further training. A contemporary of Karl
Fischer, who founded the "Wandervögel" movement, as well as of Hermann Lietz, Gustav Wyneken and Paul Geheeb, originators of the first new education schools and free school communities in Germany, he fought strenuously for the child's right to have its own individual nature and interests. A determined representative of social pedagogy he contemplated in his book "Volkserziehungs- Einrichtung der Zukunftsschule" a complete reform of school organization, in particular of the upper primary and vocational schools, within the context of social education having general application. (IBE)

37 I COLLECTED WRITINGS BY THE SAME AUTHOR OR SYMPOSIUMS — 37 C LIFE AND WORK OF EDUCATIONISTS

PESTALOZZI, Johann Heinrich. Sämtliche Briefe. Fünfter Band: Briefe von Mitte 1805 bis Ende 1807. Sechster Band: Briefe aus den Jahren 1808 und 1809. Bearbeitet von Walter Feichenfeld Fales and Emanuel Dejung. Zürich, Orell Füssli Verlag, (cop. 1961 & 1962). 504 p. & 441 p., ind., notes, app. — Two volumes in which is collected Pestalozzi's correspondence dating from the period of the foundation, organization and then complete flourishing of the Yverdon Institute (1805-1809). The geographic dispersion of the addressees (Switzerland, Denmark, Prussia, France, Spain) as well as the nature of their personalities reflect the ever spreading renown of the Institute. In these letters Pestalozzi furnishes valuable information about his life and that of the Institute's teachers as well as about affiliated institutions of analogous type abroad; he also enlarges upon different educational topics and certain aspects of his method, in particular the attention paid at the Yverdon Institute to physical culture and social education. (IBE)

37 I COLLECTED WRITINGS BY THE SAME AUTHOR OR SYMPOSIUMS — 37 C LIFE AND WORK OF EDUCATIONISTS

REBLE, Albert (Hrsg.). Friedrich Wilhelm Dörpfeld. Ausgewählte pädagogische Schriften, Paderborn, Ferdinand Schöningh, 1963. 200 p., pl., bibli., ind., notes, chronol. tabl. (Schöninghs Sammlung Pädagogischer Schriften, Quellen zur Geschichte der Pädagogik). — These pages selected from among the most notable of his educational works show how far F.W. Dörpfeld (1824-1893) was ahead of the educators of his day both in his spirit of inquiry and in his advanced ideas about education. I. Articles for the "Evangelical Schools' Chronicle". II. Studies and essays on didactics, educational psychology and educational planning. III. Bases for healthy, fair and harmonious organization of schools. He was one of the first to consider the problem of the pupil's concentration in its relation to the teaching and the curriculum and thus went beyond the theories adopted by the followers of Pestalozzi and Herbart. Dörpfeld well deserves to be ranked among the precursors of modern scientific pedagogy. (IBE)

37 I COLLECTED WRITINGS BY THE SAME AUTHOR OR SYMPOSIUMS — 37 C LIFE AND WORK OF EDUCATIONISTS

RUTT, Theodor (Hrsg.). Wahrheit und Wert in Bildung und Erziehung. 3. Folge. Ratingen bei Düsseldorf, A. Henn Verlag, (cop. 1962). 548 p., pl., bibli. notes. — Tribute by thirty-two specialists to G. Raederscheidt, former Director of the Fredeburg Academy in Sauerland. Preceded by an account of his life, the articles are arranged as follows: (a) educational anthropology and fundamental pedagogy; (b) history of pedagogy; (c) problems of school education and the training of teachers; (d) particular teaching problems (9th class, teaching of history, arts, etc.); (e) inquiries relating to specialised vocational fields. G. Raederscheidt exerted strong influence in school reform and in the adjustment of provincial education and teaching staff to modern conditions, all this from the standpoint of western Catholic ideology. (IBE)
SACKIJ, S. T. Pedagogicke sojuzi. Tom I. Moskva, Izdatel’stvo Akademii pedagogiceskikh nauk RSFSR, 1962. 503 p., 1 pl., ind., notes. — The author (1878-1934) is considered one of the organizers and reformers of public education in the USSR. Under the combined influence of Leon Tolstoy, of the most significant Swiss, Scandinavian and other achievements as well as of circumstances in Russia, Sackij conceived principles and methods designed to raise the cultural level of his country more quickly. The first volume of his work includes autobiographical accounts, as well as articles and lectures relating to the period between 1917 and 1926. (IBE)

SCHNEIDER, Friedrich. Ausgewählte pädagogische Abhandlungen. Bearbeitet von Theodor Rutt. Paderborn, Ferdinand Schöningh, 1963. 147 p., pl., bibl., ind., notes, chronol. tabl. (Schöninghs Sammlung Pädagogischer Schriften, Quellen zur Geschichte der Pädagogik). — A picture of Friedrich Schneider, this pioneer in the field of comparative education, is offered here by some excerpts from his works and by a eulogy on his achievements in connection with teaching. Through his research work of the development of individuality and on individual psychology — fundamental studies aimed at teaching people to recognize their own innate values and educate themselves — as well as through his experience as a teacher and his critical examination of empirical and experimental pedagogy, Friedrich Schneider, a deeply Christian man, was led to found a pedagogy on the universal application of Christian spiritual values and on a psychology of an intermediate kind according to which, in view of the individual’s cultural needs, it is necessary to develop and balance human forces in order that they may serve society. (IBE)

SZARVAS, P. (Ed.). Acts Universitatis Debreceniensis de Ludovico Kossuth nominatae. Tomus IX — Series pedagogica — 1963. Budapest, Tankönyvkiadó, 1963. 139 p. (Summaries in Russian and German). (Series I). — Various works which were carried out by the Faculty of Educational Sciences at Debrecen University and which concern the following questions: historical aspects of education in Hungary; educational psychology (recent psychological research and school reform, the examination of interests); methods (new trends in grammatical analysis, problems of grammar in modern language teaching, etc.). 370 THEORY OF EDUCATION — 371.301 PARTICULAR THEORIES — 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE
BERZERGO, Giorgio. Come svolgo i miei temi di pedagogia. Esempi di temi interamente spiegati e di temi a traccia. [Torino], G.B. Paravia & C., (cop. 1958). xv+i-358 p., bibl. notes. (Collana " Il maestro "). — Educational encyclopedia for the use of students at training colleges and the teachers who prepare the competitive examinations. In short summaries is given the thinking of the educators who, since Rousseau, have had an influence on the development of modern pedagogy. The reader is induced to think himself about the various topics of discussion and composition based on the ideas of these different authors. Annotated bibliography of literary works bearing upon teaching. (IBE)
370 THEORY OF EDUCATION — 371 GENERAL ASPECTS OF EDUCATION

BONOMI, Giovanni. La pedagogia e i suoi problemi. Cremona, Editrice "Padus", 1960. 397 p., bibl., notes. — Discussions of a theoretical nature concerning educational problems. The studies are arranged in three main categories: (a) general aspects of education; (b) the teacher, his relationship with the school, the school itself; (c) experiments carried out in the field of didactics and systems characterised by their educational procedure. (IBE)

370 THEORY OF EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS

370 THEORY OF EDUCATION — 370.4 SCIENTIFIC PEDAGOGY. EXPERIMENTAL EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS — 37 E REFERENCE BOOKS

CHMAJ, Ludwik. Prady i kierunki w pedagogia XX wieku. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 535 p., bibl., ind., notes. — Educational treatise including a history of the developments and trends in the 20th century and showing the increasing role which biology, psychology and practical experimentation have in the educational sciences. Some 125 articles dealing respectively with the principal educators of the late 19th and the 20th centuries and accompanied each by a bibliography are arranged in the following five sections: (a) naturalist and liberal pedagogy; (b) sociological pedagogy; (c) cultural pedagogy; (d) religious pedagogy; (e) pedagogy founded on the theory of historical materialism. (IBE)

370 THEORY OF EDUCATION — 370.47 SOCIOLOGY AND EDUCATION

CIRIGLIANO, Gustavo F.J. Analisis fenomenologico de la educacion. Parana (Argentina), Universidad nacional del Litoral, Facultad de ciencias de la educacion, 1962. 191 p., bibl. — After showing the distinction between conceptions of education according to which the latter is seen either as a concept or as a fact — and which he considers true though incomplete — the author examines education as a phenomenon. He finds the conditions of its existence to be (a) social unity due to the possession of a cultural heritage and to the need for continuity, which is effected through the action of transmission, (b) the individual's social tendency manifested in assimilation owing to the development of his spiritual capacity. These real elements of the "education" phenomenon do not appear as isolated. Thus it is not society which is seen but "society confronted by man", not man but "man confronted by society". These two factors are united by a particular relationship, namely education. (IBE)

370 THEORY OF EDUCATION — 371.3 TEACHING AND INTELLECTUAL EDUCATION — 371.14 GOOD TEACHING CONDITIONS

CONNELL, W.F. et al. The foundations of education. London, The Crescent Press, 1962. x+308 p., fig., tabl., bibl., ind. — Investigation carried out under the auspices of the Department of Education, University of Sydney. Examination in turn of the four factors which must be understood before any educative action is undertaken: (1) the children (significant features in their development from birth to adolescence); (2) the social and cultural setting of the school and the latter's objects in general; (3) the organization of subject matter in school curricula and the bases upon which effective teaching methods and evaluation may be developed; (4) the characteristics of the teacher himself, upon whose art, skill, knowledge and personality the success of education for the most part rests. (IBE)

370 THEORY OF EDUCATION — 371.450 CHRISTIAN EDUCATION

to specialised study. The author distinguishes education and instruction in their educational sense from acquired culture and knowledge; the latter may be the conclusion or one of the aspects of the former. His concept of man is based on the Philosophia perennis, from which follows his definition of the duties of educators, be they natural or professional, individual or collective. It is necessary to have a good understanding (based on science and Christian revelation) of the child, his nature, his perviousness and resistance to the process of education. General survey of the facilities for culture (schools, institutes, youth groups, etc.). (IBE)

370 THEORY OF EDUCATION — 362 (45) SOCIAL AGENCIES. SOCIAL WELFARE (ITALY)

GIULIO, Abigail. Linee di pedagogia sociale. Catania, Dott. Romeo Prampolini, Editore, 1960. 122 p., bibl. — Intended for social workers of all types, this short work proposes to show the prime role played by education in the development of the individual. History and definition of the tasks belonging to social welfare in view of the problems (family, school, vocational) arising in the modern world. (IBE)

370 THEORY OF EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS

JEAN PAUL. Levana oder Erziehlehre. Reprint von K.G. Fischer. Paderborn, 1963. 352 p., fig., ind., notes, chronol. tabl. (Schröning's Sammlung Pädagogischer Schriften, Quellen zur Geschichte der Pädagogik). — When Levana was first published in 1807 the "rebuilding of the national order by means of education was already a definite idea" and consequently this new pedagogy aroused general interest — even that of Goethe — while some went so far as to set its author above J.J. Rousseau. Jean Paul himself said that Levana was his message to future generations. Such has proved true since the philosophical and psychological principles and the humanitarian motives underlying this teaching have not only lost nothing essential during the years but they are having their influence on modern pedagogy. Jean Paul's penetrating studies, his career as a private teacher and his role as a father enabled him to understand the child mind and he wished to protect its unfoldment. According to him, teaching should respect "the naturally good man" and develop his highest qualities (love of one's neighbour, religion, strength of will); "... let the child be taught to regard as sacred all manifestation of animal life... let him be given the heart of a Hindoo and not that of a Cartesian philosopher". In a critical discussion the commentator shows Jean Paul in true perspective as regards pre-romanticism and the influences of his day (Rousseau, Basedow, Herder, etc.) and that he had very accurate and up-to-date views concerning man's social and individual needs. (IBE)

370 THEORY OF EDUCATION

KNELLER, George F. (Ed.). Foundations of education. [See 37 A (73)]

370 THEORY OF EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS — 37 B (439)

HISTORY OF EDUCATION (HUNGARY)

KOVÁCS, Endre (Ed.). Comenius Magyarországon. Comenius Sárospataton írt műveiből. Budapest, Tankönykválasz, 1962. 409 p., tabl. (Summaries in Russian and German). (Pedagógiai Tudományos Intézet). — Hungarian texts of the writings and addresses of Comenius during the four years which he spent at Sárospatak (Hungary) as guest in the home of the Rakóczi family of princes. Preceding the texts is a discussion of the influence which Comenius has had since 1650 on educational, social and political developments in Hungary. In addition to works such as the Orbis Pictus and the Schola Ludus, of which he made fair copies during this period, he published either in Latin or Czech quite a series of articles reflecting the programme of the Patak school and the importance of method, textbooks, style, conduct and good administration. These writings, as well as others dealing with political and social life (which is still tainted with feudalism), had their effect on intellectual life during the 18th century in Hungary, while today they are the subject of much writing and translation. The texts in the present volume have been selected on the basis of the Amsterdam (1657) edition. (IBE)

370 THEORY OF EDUCATION — 377 EDUCATION OF THE PERSONALITY — 371.452 CATHOLIC EDUCATION

KRIEDEMANS, A. Algemene pedagogiek. Leuven, Uitgeverij E. Nauwelaerts, 1959. 477 p., fig., tabl., bibl. — Argument endeavouring to show from the point of view of
Christian principles that "education should always lead to spiritual maturity". All education (physical, intellectual, social, political, aesthetic, moral, religious or sex education) should be regarded from the single aspect of its aim in forming the personality. Discussion of man's different learning aptitudes, motor abilities and material and spiritual propensities as well as of the educational phenomenon such as it appears to be at the present. (IBE)

370 THEORY OF EDUCATION — 37 B HISTORY OF EDUCATION

LAENG, Mauro. Problemi di struttura della pedagogia. (Brescia), "La Scuola" Editrice, (1960). 287 p., bibl. notes, ind. (Pedagogia e scuola, Teoria e scienza dell'educazione). — Discussion, based on a historical and critical method, concerning the "structure" of pedagogy. Pedagogy is fundamentally an empirical art founded on rules which are dictated by practice and tradition. By reason of its "human" element such education is beyond any attempt to systematise it. According to the philosophical and religious conception of it the human person's values are universal, childhood must be re-appraised and people's education must assume new tasks. Having its own methods, pedagogy as a science opens the way to logical research and, although independent, draws on related sciences (biology, psychology, sociology) while not excluding philosophical speculation. (IBE)

370 THEORY OF EDUCATION

LAPORTA, Raffaele. La comunital scolastica. [See 371.01 (45)]

370 THEORY OF EDUCATION — 37 B HISTORY OF EDUCATION

370 THEORY OF EDUCATION

PETERSEN, Peter. Allgemeine Erziehungswissenschaft. 2. Aufl. Berlin, Walter de Gruyter & Co., 1962. 276 p., bibl. notes. — Courses given at Hamburg by Peter Petersen during the years 1921 and 1923 on the following subjects: principles underlying the educational sciences; collectivity, individual and person; nature and culture; education and instruction. The two parts of the complete publication presuppose a scale of values and among these philosophy was to form the subject of a third part. All moral values of society are related to those of the individual. The child, however, lives more within his environment than within himself and hence his distress if this environment is corrupt or is destroyed. Through exchanges between his individual self and those who surround him the adult becomes a personality. Petersen's aim is to justify a science of education which is without illusions, such alone being the requirement for effective education and alone able to lift the school out of the deadlock caused by administration and public education out of the stagnation due to disordered effort. (IBE)

370 THEORY OF EDUCATION — 371.30 TEACHING PRINCIPLES — 37 C LIFE AND WORK OF EDUCATIONISTS

PFEFFER, Fritz. Die pädagogische Idee Otto Willmanns in der Entwicklung. System der wissenschaftlichen Pädagogik und Vorgeschichte der "Didaktik". Freiburg i.B., Herder, (cop. 1962). 219 p., bibl. notes. (Schriften des Willmann-Instituts, München-Wien). — Discussion concerning the development of Otto Willmann's educational ideas which constitutes the basis of his work "Didaktik als Bildungslehre" (1872). Didactics — long considered to be the art of teaching — can only be explained within the context of a general system of education such as that described in "Die allgemeine Pädagogik" (1875) and in "Die Enzyklopädie der Pädagogik" (1876), from which emerges a description of the scientific study of educational aims and values as well as of the nature and development of universal traditions. Pedagogy is a discipline socially motivated and scientifically founded since the renewing of society constitutes the fundamental phenomenon which is the aim of education. Hence the endeavour to devise a system of pedagogy which is descriptive and historical as well as philosophic and practical. (IBE)

Wynne, John P. Theories of education. An introduction to the foundations of education. New York, etc., Harper and Row, (1963). xiii+521 p., bibl., ind. (Harper's Series on Teaching). Principal theories of education from Plato until the present day and including the scholasticism of Saint Thomas, the neo-Thomism of Leo XIII and particularly the theories which have been or are now current in the United States. A separate chapter, accompanied by a commentary and by a list of references, is devoted to each theory, which is systematically discussed in regard to its philosophical and psychological bases, its implications and applications as well as its cultural and social circumstances. (IBE)

370.1 (73) Concept and Aims of Education — 379.5 (73) Educational Policy in General — 37 N (73) Conferences (United States)

Elam, Stanley (Ed.). New dimensions for educational progress. The report of a symposium sponsored jointly by Phi Delta Kappa International, Xi Campus Chapter of Phi Delta Kappa & The School of Education, University of Pittsburgh. Bloomington (Indiana), Phi Delta Kappa, 1962. ix+190 p. — A Phi Delta Kappa symposium was held at the University of Pittsburgh in order that a new approach and adequate methods might be found for educational progress and to enable fresh consideration of certain educational problems which have become pressing due to the present rapid changes in society. The six papers presented, as well as a full report of the discussions to which they gave rise, illustrate various features which education in the United States is assuming: difficulties of children belonging to low socio-economic groups; relative inadequacy of educational research; the "missing dimension" in higher education; financing of university study; teacher training; application of cultural principles with the purpose of forming a "universal middle class". (IBE)

370.1 CONCEPT AND AIMS OF EDUCATION

SCHMUTZ, Heinz. Die Zukunft unserer Jugend in Freiheit. Eine Zeitstudie. (Bern, Verlag Buri & Cie, 1961). 35 p., fig. — Appeal which, addressed to those responsible in the home, the school and the Church as well as to business heads and political authorities in the western world, is intended to act as a warning to youth, who are the future guarantee of a culture based on respect for the individual and freedom, against the dangers of mass civilisation, educational intellectualism and vocational opportunism. All education should be reconsidered from the point of view of human values but lose nothing of its moral and spiritual basis. To counteract the despair in young people invaded by the "anonymous politics of the masses" the author suggests certain practical solutions based on the reinforcement of the democratic society which must be set up tomorrow by the young of today. (IBE)

370.25 COMPARATIVE METHOD — 37 C LIFE AND WORK OF EDUCATIONISTS

FRASER, Stewart. M.A. Jullien's plan for comparative education, 1816-1817. Nashville (Tennessee), George Peabody College for Teachers, 1962. 120 p., ron., notes, bibl., app. — Complete English edition of the Paris work "Esquisse d’un ouvrage sur l’éducation comparée, et série de questions sur l’éducation" (outline of a book on comparative education, together with some questions relating to education) by Marc Antoine Jullien. At the beginning of the volume is a discussion, accompanied by many references, of the life, personality and work of Jullien (1775-1848), who must be regarded both as the "precursor" of the International Bureau of Education and Unesco and as the father of comparative education. (IBE)

370.25 COMPARATIVE METHOD

370.25 COMPARATIVE METHOD

GOETZ, Helmut. Marc-Antoine Jullien de Paris 1775-1848. [See 37 C]

370.25 COMPARATIVE METHOD — 37 N (=) INTERNATIONAL CONFERENCES — 37 D BIBLIOGRAPHY

with the following matters: (1) the terminology, taxonomy and international classification which facilitate the use of data in comparative education studies; (2) inter-disciplinary collaboration (assistance from such fields as the social sciences, political science, psychology, etc.) in order that education may be planned on a rational basis and a system established for the quantitative and qualitative prediction and verification of educational development; (3) contribution which may be made to comparative education by statistics and documentary material relating to the social sciences. (IBE)

370.3 PHILOSOPHY OF EDUCATION — 370.4 SCIENTIFIC PEDAGOGY. EXPERIMENTAL EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS

ALESSANDRO, Vittorio d'. Gino Ferretti e il rinnovamento della pedagogia. Firenze, "La Nuova Italia" Editrice, (1959). xix-358 p., 1 pl., bibl., ind., notes. (Educatori antichi e moderni, CLXI). — Based on an aesthetic concept, Ferretti's work in the fields of educational philosophy, teaching and child psychology ranks among the important contributions to the movement whose aim was a new education characterised by activity methods. Professor of education at the University of Palermo, where he taught until his death in 1950, Ferretti was listened to with great attention at many national and international conferences. To analyse his contribution to present Italian pedagogy is tantamount to tracing the change from essentially idealistic pedagogy to pragmatic and experimental "activism". (IBE)

370.3 PHILOSOPHY OF EDUCATION — 370 THEORY OF EDUCATION — 37 I COLLECTED WRITINGS BY THE SAME AUTHOR OR SYMPOSIUMS

BANFI, Antonio. La problematicità dell'educazione e il pensiero pedagogico. Firenze, "La Nuova Italia" Editrice, (1961). 384 p., pl., bibl. notes, ind. (Educatori antichi e moderni, CLXVI). — The philosopher A. Banfi, professor for 25 years at the University of Milan and who died in 1957, sought to evolve a theory of education based both on philosophical considerations and on the concrete factors involved in the problem of education. For this purpose he made a special study of the contemporary trends in German pedagogy. After the war he gave his attention also to practical problems such as people's education and adult education. Selected from his main writings, the present extracts are commented by a former pupil of his who wished to pay a tribute to Professor Banfi's very fertile thought and many-sided activity. (IBE)

370.3 PHILOSOPHY OF EDUCATION — 377.38 EDUCATION FOR INTERNATIONAL UNDERSTANDING — 373.5 (45) VOCATIONAL AND TECHNICAL EDUCATION (ITALY)

BARONI, A. et al. La filosofia dell'educazione ed altri problemi pedagogici. Bologna, Edizioni Giuseppe Malipiero, (cop. 1961). 113 p., bibl. notes. (Associazione Pedagogica Italiana, Bologna e Istituto di Pedagogia, Bologna). — In preparation for the 5th National Educational Congress in Italy (1960) the education authorities in Bologna asked six specialists in the respective fields to introduce the congress discussions with reports on (a) the philosophy of education in today's world, (b) national and international education, (c) various problems connected with vocational training. (IBE)

370.3 PHILOSOPHY OF EDUCATION

BERTIN, Giovanni Maria. La pedagogia umanistica europea nei secoli XV e XVI. [See 37 B]

370.3 PHILOSOPHY OF EDUCATION

Owing to the progress made day after day in our present technical civilisation it is necessary for education to renew its tools and theories and formulate new philosophies capable of supporting practices which have already been changed by actual circumstances. Discussion of the latest philosophical trends in education in the United States ("reconstructionism", educational existentialism, the analytical movement). Examination of current American methods and techniques (language laboratories, teaching machines and other procedures for mechanising certain parts of the school’s programme). The book concludes with an explanation of the philosophies of education which have succeeded each other in Argentina and led education in this country to what the author terms the "movement for synthesis". LICHSTENSTEIN, Ernst. Bildungsgeschichtliche Perspektiven. [See 37 B]

MANTOVANI, Juan. Educación y vida. 2a ed. Buenos Aires, Editorial Losada, (1959). 153 p. (Publicaciones de la Revista de pedagogía, Biblioteca del maestro). — Second edition of a work which, by the Argentine educator who died recently, deals with the old and yet ever present problem of the relationship between education and life. Society demands improved specialisation but also a larger proportion of general culture in order that the ideal of the human person may be restored. During this period of crisis in education and culture it is necessary to revise educational methods so that the child may be endowed with collective virtues without prejudice to his sense of individual independence. One chapter is devoted to Pestalozzi and Maria Montessori, two great educators who dedicated their lives and work to the study of this problem. (IBE)

MINETTI, Eugenio. Il problema pedagogico nella dignità della persona. Ascoli Piceno, Soc. Tipolitografica Editrice, (1961). 292 p., tabl., bibl. notes. — The progress of science and of technology threaten man with the loss of awareness of his nature and destiny. It behoves the school, while providing the necessary education, to safeguard those values which ensure the dignity of the human being. The "natural" method seems realistic enough to train persons useful to modern society, while at the same time permitting them to develop their personality. This method receives its inspiration from thinkers and educators who, with Dewey, Claparède and the originators of the activity school, devised a kind of pedagogy based on respect for the child’s individuality and freedom, without neglecting the social education necessary for his adjustment to life. 370.3 PHILOSOPHY OF EDUCATION — 377.3 SOCIAL EDUCATION

PROHASKA, Leopold. Pädagogik der Begegnung. Entwurf einer ganzheitlichen Erziehungslehre. Freiburg i. B., etc., Herder, (cop. 1961). 112 p., bibl., ind. (Das Pädagogische Gespräch). — Philosophical study on the “contact”, its educational value and its ontological significance. The contact is a phenomenon occurring on three levels: physical, psychic and spiritual. It is a liberating, generous and existential force. From the contact between friends, between enemies even, between the sexes, between teacher and pupil, is derived a kind of teaching which must be consciously employed in the field of education; these contacts must be perfected in a natural, spiritual and miraculous sense. Reference is also made to the contact between man and God. (IBE)

RIEDEL, Johannes. Arbeiten and Lernen. [See 371.33]

370.3 PHILOSOPHY OF EDUCATION
SCHWEIKERT, Otto. Pädagogische Besinnung über eine problematisch gewordene Tatwelt. Ein Vortrag. Stuttgart, Calwer Verlag, (cop. 1958). 39 p., bibl. (Calwer Hefte zur Förderung biblischen Glaubens und christlichen Lebens, Heft 19). — Some thoughts concerning the “world of action” (Tatwelt) and which lead the author to conclude that human activity has become problematical in a world which, due to superficiality, generalisation as well as the secular trend, is characterised by lack of inner life, of achievement and of radical change. This discussion is followed by conclusions regarding education. (IBE)

370.3 PHILOSOPHY OF EDUCATION
TESTA, Aldo. La scuola come dialogo. Conclusioni della “Scuola del dialogo”. Nuova edizione. (Bologna), Cappelli, (1961). 245 p., app. (Biblioteca di cultura pedagogica, 1). — Philosophical discussion concerning the “school for dialogue”. It is proposed that education (the child’s behaviour) give way to “diagogia” (the building of spiritual and ethical reality by the teacher and pupil together). In education just as, generally speaking, in actual life the truth prevails by means of “dialogue” and for this reason the “school for dialogue” becomes the “school for truth”. (IBE)

MARTINOLI, Gino. Tecnica, sviluppo economico, scuola. Milano, Edizioni di Comunità, 1962. 279 p., tabl. (Cultura e realtà, Universale contemporanea, 31). — Under the title "Tecnica, economic development and the school" this book argues in favour of a fruitful discussion between the school and society, between "the producer and the consumer of the school's product", and emphasises the importance of planning in regard to present educational possibilities and future needs. Technicians, economists and teachers should collaborate so that the school may satisfy the modern demands arising from rapid changes in social and economic conditions. (IBE)

MUSHKIN, Selma J. (Ed.). Economics of higher education. [See 378 (73)]

Fundamental role which should be played by the primary school in providing early training of a technical and economic nature and the importance of the university in completing this training. Statistical data intended to facilitate the definition of educational problems. If education is to have an influence on economic development it is necessary that educational planning be related permanently to circumstances of an economic nature. (IBE)

370.44 ECONOMY AND EDUCATION — 379.50 PLANNING

ROMERO, Fernando. La educación como agente económico. (Introducción a un estudio de la economía educativa). (Lima, Editorial SENATI, 1963). vii+113 p. — Introduction to a previous work on the interrelation between education and the economy. The Latin-American countries — and particularly Peru — have considerably increased their educational investment during recent years but owing to the absence of accurate statistics, work of real planning the results have not been commensurate with the efforts made. In order that education — particularly in the developing countries — may stimulate a rise in the standard of living it is necessary for the underlying philosophy to be reconsidered in the light of the economy. Such is possible only if the existence of what may be called “educational economy” as a new scientific subject, issue of the union between education and the economy, be admitted and understood. This new discipline makes use of statistics, draws upon technical education and comparative education and enables observation of the influence which economic, political and cultural factors have in education. 370.45 (73+∞) BIOLOGY AND EDUCATION — 370.48 (73+∞) COMPARATIVE EDUCATION RESEARCH (UNITED STATES & VARIOUS COUNTRIES)

SPINDLER, George D. (Ed.). Education and culture. Anthropological approaches. New York, [etc.], Holt, Rinehart & Winston, (1963). xx+571 p., bibl., ind., notes. — Anthropology is the study of the racial and mental features, the physical and psychic development, the culture and the traditions of different peoples. In the present series of monographs seventeen specialists describe their work and tested findings in connection with the process of human development and the common facts and features by which education in societies is characterised. The aim here is to indicate how and in regard to what aspects the services of applied anthropology can be used in the education of societies, particularly the American society. In order to verify their assumption that educational systems, cultural standards and social relations are interdependent the authors compare American culture with that of five other societies. By an analysis of educational practices and economic factors as well as of the individual’s social and private behaviour and emotional development it is shown that education received during the early years is the major factor in determining how young persons are affected by their contact with the problems of adolescence. The authors find that in each of the societies concerned the education received by adolescents — as regards their future responsibilities as citizens and as heads of families — is certainly superior to that given by American society. (IBE)

AEBLI, Hans. Über die geistige Entwicklung des Kindes. Stuttgart, Ernst Klett Verlag, (cop. 1965). 124 p., fig., tabl., bibli. notes. — On the basis of his analysis, illustrated with examples, of Jean Piaget’s theories the author considers that in any discussion of children’s mental development more account should be taken of all the factors involved in the process of intellectual development. He next describes experiments which, conducted among groups of children in their third and fourth school years, gave the conclusive results underlying his “multifactorial” theory of development (Multifaktorielle Theorie der Entwicklung). Then he shows the application which the multifactorial theory has in education and he indicates the implications for child psychology. The book not only furnishes in the German language an explanation of Piaget’s theories but also offers further perspectives in regard to the psychology of the child’s mental development. (IBE)

370.46 EDUCATIONAL PSYCHOLOGY

BARRIOS PEÑA, Jaime. Integración de la personalidad y proceso educativo. Guatemala, Editorial del Ministerio de Educación Pública “Jose de Pineda Ibarra”, 1961. 127 p., fig., tabl., app. (Colección Científico-Pedagógica, 15). — Personality, culture and freedom are the concepts which underlie this study concerning the individualisation and integration of personality by the educational process. Starting from a rather theoretical position concerning the appreciation of the personality type and relying upon an experimental procedure intended to determine, on the basis of samples taken, the most significant characteristics of the human element the author explains the fundamental conflict of young Guatemalan delinquents as being a response to dissociation, to the anomalies and contradictions of his country’s institutional life which obstructs the process of personality’s integration. As a quick remedy and to enable maximum educational result to be obtained from children and adolescents, he offers a series of recommendations relating to family protection and proposes an educational reform having a qualitative basis which corresponds to the psychological, biological and social circumstances regarding pupils. (IBE)

(Studies in Education). — Series of courses organized by the Institute of Education, London University, and given by several prominent professors, specialists and psychologists on various aspects of children's development between the ages of 4 and 7 years. Topics dealt with: physical development; the child's thinking; his "scientific" interests; language development; idea of number; personal and social relationships; moral growth. The concluding chapter is concerned with the implications which this understanding and knowledge about the young child have for education. (IBE)

MIEKE, Karl. Begabung, Bildung und Bildsamkeit. Betrachtungen über das Bildungsschicksal des mittelmässig begabten Schulkindes. Bern & Stuttgart, Gemeinschaftsverlag Hans Huber - Ernst Klett, (cop. 1963). 203 p., fig., tabl., bibl. (Abhandlungen zur Pädagogischen Psychologie, Band VII). — Critical and analytical study concerning aptitudes and the plasticity of intelligence in the average pupil. Whereas tests identify exceptional cases (the specially gifted and the handicapped) average children, who constitute the majority of pupils, are at a disadvantage and have not the interest and encouragement to which they are entitled in view of their latent abilities and the place they will occupy in the society of tomorrow. Employing the empirical method the author shows that the average pupil is malleable, that his intelligence can be shaped and stimulated until his talents are manifested and that he can even excel in many kinds of activity. It is the social role of the school to develop these abilities. For this purpose it is advisable to evaluate tests not only qualitatively (to determine intellectual level) but
also quantitatively (to reveal personality and achievement). Leaving reforms as such to education authorities, psychology can assist pedagogy in the drawing up of a structural programme and in the recognition and development of individual talents in accordance with the personality and inclinations of each pupil. (IBE)
and collective development among adolescents; proper employment of programmed instruction tests. Education has in fact the role of helping the educator to bridge the space between theories of learning and methods of teaching. (IBE)

370.46 EDUCATIONAL PSYCHOLOGY

ZANKOV, L.V. (Ed.). Razvitie učátečnických procesů v obučeniu (I-II klasy). Moskva, Izdatel'vo Akademii pedagogičeskikh nauk RSFSR, 1963. 291 p., fig., tabl., bibl., notes. (Institute of Educational Theory and History). — Work dealing with "schoolchildren's development during the 1st and 2nd years of the school course" and being one in a series of publications written by specialists in the analysis of research results in regard to the effect of schooling on the pupil's development and the relation between the two. In one chapter the general significance of the problem is discussed, while the others describe the changes observed in the various aspects of the psychic state under the influence of schooling. (IBE)

370.47 (73) SOCIOLOGY AND EDUCATION — 373 (73) SECONDARY EDUCATION — 379.6 (73) SCHOOL POLICY FROM THE SOCIAL POINT OF VIEW — 379.83 (73) SCHOOL POLICY AND MINORITIES (UNITED STATES)

CONANT, James Bryant. Slums and suburbs. A commentary on schools in metropolitan areas. New York & London, McGraw-Hill Book Co., (1961). viii+147 p., tabl. — The contrast between the educational opportunities of children living in overcrowded areas of large American cities (often having large negro populations) and those of children in middle-class suburbs shows how the school's tasks and achievements depend upon the status and ambitions of the families being served. The author is anxious to draw the attention of his fellow citizens to the dangers presented by (a) the difficulty which young people in large cities experience in finding employment on completion of their schooling between the ages of 16 and 21 years, (b) failure to apply the principle of racial equality in school education. In his opinion these two factors threaten to cause a "social explosion" the serious consequences of which need not be emphasised. (IBE)

370.47 SOCIOLOGY AND EDUCATION — 370.44 ECONOMY AND EDUCATION

CURLE, Adam. Educational strategy for developing societies. A study of educational and social factors in relation to economic growth. (London), Tavistock Publications, (1962). xi+176 p., tabl., bibl. — Education in newly developing countries must be regarded as a force which is able not only to replace the apathy of the illiterate masses by the competences required for the country's development but also to transform society itself by overcoming traditionalism and social inequalities. Discussion (based on personal experience gained during six years spent in Asia and Africa) of the general problem of education as well as of several factors involved in development: agrarian reform; preventive medicine; education and vocational training particularly in the fields of industry and agriculture. Liberation of the talent necessary for establishing a new type of society must be founded upon selection criteria which are wiser and more flexible than hitherto as well as upon closer collaboration in regard to the different kinds of human potential. (IBE)

DWORKIN, Martin S. (Ed.). Dewey on Education. [See 370.3]

370.47 (42) SOCIOLOGY AND EDUCATION — 370.1 (42) CONCEPT AND AIDS OF EDUCATION (UNITED KINGDOM)

GARFORTH, F.W. Education and social purpose. London, Oldbourne, (1962). 174 p., bibl., ind. — Discussion of the manner in which education and society are interdependent as much as the nature of each is determined by the other. This fact should be borne in mind whenever educational planning is being discussed and at the time of any activity in connection with education. Actually, one of the aims of education is to enrich culture and, in a continually developing world, lead society towards richer forms of self-expression. The process of education should help to present traditional values while promoting social changes which are in keeping with such values. (IBE)
GIROD, Roger & ROUILLER, Jean-Frédéric. Milieu social et orientation dans la carrière des adolescents. Troisième partie: Projets et attitudes à 15 ans. Genève, Centre de recherches de la Faculté des sciences économiques et sociales de l'Université de Genève, Section de sociologie, 1963. 330 p., tabl. — Third part of an inquiry concerning the influence of social environment in the guidance of adolescents' careers. Main purposes: discover the ambitions of approximately one thousand boys and girls 15 years old; assess the effect of their school standing and certain aspects of their living conditions on their projects; draw up a table of the latter and compare it with the table of situations actually available; study the persistency in choices before and on completion of compulsory schooling. An analysis of the replies received shows (1) the determinative effect which adolescents' school standing has on the level and direction of their ambitions, (2) the high degree of social mobility resulting from these ambitions, (3) the influence exerted by conditions of home life and by material and other circumstances on the projects of the young, (4) the accordance of the projects with environmental needs. (IBE)

HUTCHINSON, Bertram et al. Mobilidade e trabalho. Um estudo na cidade de São Paulo. Rio de Janeiro, Centro Brasileiro de Pesquisas Educacionais, INEP — Ministério da Educação e Cultura, 1960. vm+i+451 p., fig., tabl., bibl. notes. (Publicações do Centro Brasileiro de Pesquisas Educacionais — Série VIII — Pesquisas e Monografias — Vol. 1). — Report on a series of studies undertaken by the Brazilian Educational Research Centre in order to determine in what way social mobility is related to education. The data, obtained among an adult population of 2,500 individuals, was of two kinds: (a) information and social mobility and the level of study; (b) psychological diagnosis (effected mainly by use of projective procedures) of the individual's personality. Besides giving an overall view of the problem the results provided fundamental data concerning the rate of social mobility in the city of São Paulo. Finally, a more thorough examination of the problem dealt with two specific groups of the São Paulo population, namely factory workers and Italian immigrants. The different chapters are arranged in 3 sections: vocational occupations and the prestige they confer; education and social mobility; aspects of social mobility in São Paulo. (IBE)

HUXLEY, Julian. Education and the humanist revolution. Southampton, University of Southampton, 1962. 37 p., bibl. (The ninth Fawley Foundation Lecture). — Values have their origin in the relations between men in society. One of humanity's functions is to test these values and adjust them to its evolutionary experience, while education's role is to transform them and transmit their tradition. The author describes his views, definitely constructive, concerning education, which he places within a context of humanist evolution. He holds to account the retrograde traditionalism which prevented the laws of evolution from being taught. Modern education should be founded on the teaching of a humanism which is also scientific and which renders man able to know himself, direct his own path and evolve scientifically. Huxley presents the bases of an evolving system which will have the function of both transforming and transmitting the traditions and which will raise the level of man's knowledge to include evolutionary experience. The fundamental task of the teaching profession is to know and understand, in all its aspects, the evolutionary humanist revolution, to study its educational implications and to apply its principles in order that for humanity the vision of its own destiny may be clearer. 370.47 SOCIOLOGY AND EDUCATION — 37 B (43) HISTORY OF EDUCATION (GERMANY)
WHANG, J.H. Die Entwicklung der pädagogischen Soziologie in Deutschland.
— Beginnings of educational sociology in Germany with Lorenz v. Stein (1815-1890); progress of social
pedagogy during the 19th century and at the commencement of the 20th century ( Pestalozzi,
Schleiermacher, Otto Willmann, Paul Natorp, Aloys Fischer); social pedagogy
and educational sociology in the 20th century (Paul Barth, Siegfried Kawerau, Karl
Dunkmann, Theodor Geiger, Carl Weiss); political and economic aspects (Kerschensteiner,
Ernst Kriek and Friedrich Oettinger); educational sociology today (Anna Siemsen,
Helmut Schelsky and René König). Account of those issues which, at the same time
practical and theoretical, were during the 19th century dominated by the concepts of
general culture, individualist philosophy and scientific efficiency. The definitely more
practical issues which in the 20th century are influenced by the findings of psychology, by
economic and social upheavals as well as by political ideologies. Educational sociology
belongs, together with educational psychology, to anthropology of a philosophical and
educational kind and deals mainly with the relationship between educators and pupils
within groups, communities, societies and nations as well as with the relationships between
groups themselves. (IBE)

For assessment to have meaning it is first necessary to specify the objectives sought by the activity which is to be assessed. As education depends upon life, school achievement can be expressed only if the different manifestations of the pupil’s present and future life, as well as the influence of the school on society, be taken into consideration. The measurement of achievement is based on the investigation of intellectual aspects (knowledge, cultural habits, mental ability) and emotional aspects (behaviour, moral judgment, psychic and social development). Such are the factors to which the main part of the pupil’s individual file or cumulative record should relate and which should guide all who are responsible in education, particularly in connection with school promotion and at the time of the transition from primary to secondary level. 371 GENERAL ASPECTS OF EDUCATION
BONOMI, Giovanni. La pedagogia e i suoi problemi. [See 370]

371.01 (45) THE SCHOOL — 371.44 (45) SYSTEMS DISTINGUISHED BY THEIR SOCIAL AIDS (ITALY) — 370 THEORY OF EDUCATION
— Despite its apparently Utopian nature, as compared with the existing school system, the school community is the institutional expression of a people’s education movement which will transform the manner of thinking of teachers and citizens. It will start to assume a real form as a result of the current economic and social changes and the crisis through which the traditional school is passing. The present study on the structural composition and educational problems of the community school is based on experiments conducted by school institutions which are already operating in Italy in accordance with these same community principles. 371.02 EDUCATION AT HOME — 613.95 CHILD CARE — 370.47 (42) SOCIOLOGY AND EDUCATION — 37 P (42) RESEARCH AND INQUIRIES (UNITED KINGDOM)

NEWSON, John & NEWSON, Elizabeth. Infant care in an urban community. London, George Allen and Unwin, (1963). 268 p., tabl., bibl., gloss., ind., app. — Sociological inquiry conducted in the urban section of Nottingham (England) on how children are reared during the period from birth until the age of one year. Data was obtained from the replies which some 700 family mothers belonging to all social classes furnished to a detailed questionnaire. In order that the inquiry may reveal what care is actually given to babies, by what instructions and advice (from doctors, families, friends, books, etc.) the mothers are influenced and what are the parent's reactions in all the situations which may arise during the upbringing of the very young, these aspects of child care are considered from the sociological point of view. The statistical interpretation of the replies emphasises the influence of social class on the behaviour of both mother and child in the matter of the child's feeding, sleep, comfort, "socialisation", habits of cleanliness as well as on the father's role during the child's first year, the parents' social habits and life, etc. (IBE)

371.02 Education at Home — 377.1 Religious Education — 37 K Educational Novels

371.02 Education at Home — 371.450 Christian Education — 377.24 Children's Faults

VIMORT, J. Avec nos enfants. 1. La vie de famille. 2. Leurs défauts. [Lyon], Editions du Chalet, 1963. 128 p. & 158 p. — Two works emphasising the paramount importance of the family's role in the development of the child's heart and mind. The family should never shrink from its heavy responsibility but should endeavour to follow the same path as the educators. In order that the child may develop the needs to be imbued with his family's spirit and it is consequently by example that parents are most effective in their action. They learn from the shortcomings of their children to understand the latter better and to love and help them. A proper balance between bodily health and mental health is essential if the child is to be capable of confronting the world and begin to understand. (IBE)

371.02 EDUCATION AT HOME — 371.94 SOCIALLY HANDICAPPED
ZUMBACH, Pierre. Parents d’aujourd’hui. Quelques réflexions pratiques tirées de l’actualité éducative. Neuchâtel [Suisse], A la Baconnière, (cop. 1962). 167 p., tabl., diagr. (Observation et Synthèse). — Realistic and varied experiences of a social worker everyday grappling with the urgent problems connected with children led astray or neglected, from whatever causes this abandon may arise (divorce, illegitimacy, housing crisis, family occupation, overwork, misunderstandings between the different generations, etc.). P. Zumbach has collected on the spot extensive and objective information among communities ranging from those over-developed in the United States to the embryonic ones of, for example, Cameroon and including the collective structures of the East. In all cases he suggests for the problems solutions which are applicable both in the family setting and at community level. List of addresses (for French-speaking Switzerland) useful in connection with family assistance. (IBE)

371.026 HOME AND SCHOOL — 371.02 EDUCATION AT HOME — 377.922 (44) EDUCATIONAL GUIDANCE (FRANCE)
FIRMIN, Lucien. Vos enfants... nos élèves. Comment les aider? (Tournai), Casterman, 1963. 264 p., fig., bibl. (Centre d’études pédagogiques). — Questions which parents and teachers may feel the need to ask as the child, once he reaches school age, proceeds step by step through his school career: choice of school and course; class work and homework; comrades and leisure; games and holidays; mind and character training; hygiene and health; moral, social and religious education. Consideration, based on long personal experience, of many educational problems ranging from the matter of pocket money to the serious decisions which must be taken in the case of change in vocational programme either during or at the end of schooling. (IBE)

BHATIA, Hans Raj. Craft in education. London, Asia Publishing House, (1962). xi+195 p., bibl., ind., app. — Account of a system of education existing in India and which is founded on handwork. 1. Criticism of intellectualism in education since it accentuates the difference between hand and head, action and thought, knowing and doing. Defence of the hard, which is the tool of thought. II. If it is to be preparation for life, education should include manual activity. The latter is the focus of all mental activity and thus becomes the activity with which the teaching of all other subjects is begun ("Wharda scheme" or "Basic scheme" or cf. Gandhi's "Propositions on Education"). Discussion on the psychological value of this method as well as on its moral and social value and its contribution to the development of personality. In the appendix are suggestions for research concerning the question of education by handwork or "basic education". (IBE)

371.08 (92) FUNDAMENTAL EDUCATION — 379.635 (92) ILLITERACY — 379.50 (92) PLANNING (INDONESIA)
PRAWIRODHARDJO, Tarit & KRISHNAMURTHY, T. Community education in Indonesia. Djakarta, Ministry of Education, Community Education Dept., 1960. 189 p., fig., tabl., bibl. — History, in its relation to Indonesia's geographical, economic and political situation, of community education from earliest times until this country's independence. Philosophy, methods and aims of community education, which includes literacy education, training of personnel, making of rural communities independent and setting up of women's and youth organizations. Detailed description of the literacy campaign, its planning, the procedures and media employed and the training of monitors. Review of the ten-year (1950-1960) and five-year (1960-1965) community education plans in all their aspects: discussion of their beginnings and preparation; appraisal of their results in regard to different aspects of their application: combating of illiteracy; adults' social courses; vocational training; organization of cooperatives; training of
371.08 FUNDAMENTAL EDUCATION — 370 THEORY OF EDUCATION — 37 A (54) EDUCATIONAL SYSTEMS (INDIA)

RAMANATHAN, G. Education from Dewey to Gandhi. The theory of basic education. London, Asia Publishing House, (1962). xxi+308 p., ind. — Theory of basic education, regarded as combining the ideas of Dewey and Gandhi ("life-centred, craft-centred and self-supporting education"). Origins and history of this theory which the author considers appropriate to a democratic society such as, and particularly, India. Theorist 1 components of basic education: (a) philosophy based on the principle of democracy; (b) the school and life closely related owing to the active part taken by pupils, teachers and adults in craft work which is exploited for an educational purpose; (c) education founded on the theory of correlation; (d) psychological value which reveals the value of work, awakens a sense of responsibility and provides its own motivation; (e) fundamental assumptions of the theory (economic value of the school work, which is essentially educative but whose product should be able to cover the cost of education). (IBE)

371.1 (73) TEACHERS (UNITED STATES)

BOYLAN, James R. School teaching as a career. New York, Henry Z. Walck, 1962. 100 p., fig., bibl., ind. (Careers for Tomorrow). — Over-all picture of the teaching profession, at all levels, in the United States. Requirements for admission to the various education institutions and the training facilities available for each type of position. Psychological factors to be considered before taking up a teaching career; compensations offered by the profession. Current problems of education at American public and private schools. Developments and present trends in teaching. (IBE)

371.1 TEACHERS

KANDEL, I.L. Hacia una profesion docente. La Habana, Centro Regional de la Unesco, 1962. 42 p. (Publicaciones del Proyecto Principal para la extension y mejora-miento de la educacion primaria en la America Latina, Serie de monografias, No. 5). — In industrialised countries the teacher shortage caused by economic changes cannot be remedied just by an increase in salaries; it is necessary at the same time for teachers’ professional status and living conditions to be improved. In the developing countries — in which the full importance of education is not yet understood by the public — it is in addition necessary to imbue the teacher with a sense of responsibility towards the community in which he performs his task. The training received by teachers should make it possible for teaching to cease being a “function” and to become a true “profession”. (IBE)

371.1 (73) TEACHERS — 370.1 (73) CONCEPT AND AIMS OF EDUCATION (UNITED STATES)

RICCIO, Anthony C. & CYPHERT, Frederic R. (Ed.). Teaching in America. Columbus (Ohio), Charles E. Merrill Books, (1962). ix+517 p., fig., tabl., bibl., notes — Articles on the teacher’s role in the United States such as it is determined by the current concept and situation of education in that country’s public schools. Some special aspects of education (the school’s function and importance, the state’s aims and responsibilities, the teacher’s behaviour and personality, etc.) are discussed from the standpoint of education whose aim is not merely to impart the basic curriculum to adolescents but to educate them with a view to the society of tomorrow. (IBE)

371.1 TEACHERS — 372 PRIMARY EDUCATION — 370.3 PHILOSOPHY OF EDUCATION — 37 B HISTORY OF EDUCATION

TUGGENER, Heinrich. Der Lehrer. Zürich, EVZ-Verlag, (cop. 1962). x+414 p., bibl. (14 p.), notes. — Study, accompanied by statistics and conducted by means of questionnaires and interviews among a wide sample of those concerned, both in Switzerland and in Germany, in regard to the professional, economic, social and cultural characteristics of primary school teachers engaged in compulsory education. I. Different educational theories and ideas (idealism, Pestalozzi school, positivism) together with the reforms and combined results to which they led. II. Questions of duties, training and moral and professional values. The investigation covers approximately two centuries of history and the findings are intended to make a constructive contribution to the acute problem raised by the recruitment of teachers and by present technical requirements. GOOD TEACHING CONDITIONS
SARASON, Seymour B.; DAVIDSON, Kenneth S. & BLATT, Burton. The preparation of teachers. An unstudied problem in education. New York & London, John Wiley and Sons, (1962). xvi+124 p., bibl. — Urged by their concept of the educator's role, two psychologists and an educator consider the problem which, in the United States, is raised by the training of elementary and secondary school teachers in such a way as to accord with the actual day-to-day work in the classroom. The teacher must realize that each of his pupils is a distinct personality and that a valuable lesson is to be learnt by observing them. During training courses this attitude must be encouraged by the discussion, both among students and with the professors, of spontaneous remarks prompted by the observation of children in the classroom. (IBE)

371.14 (45) GOOD TEACHING CONDITIONS — 371.16 (45) TEACHER’S ROLE AND POSITION (ITALY) — 370 THEORY OF EDUCATION
AGOSTI, Marco & CHIZZOLINI, Vittorio. Maturità magistrale. 2a ed. Brescia "La Scuola" Editrice, (1961). 392 p., pl., app. (Riciami, Scuola fraterna per l’aggiornamento culturale dei maestri). — Full benefit of the new syllabuses adopted in 1955 for the eight-year course of compulsory schooling in Italy can be reaped only if their inner meaning is thoroughly understood by teachers. More than just being accordingly trained or adjusted, the latter must possess "maturity" of three kinds, (a) ethical and religious, (b) human and professional, (c) political and social. In other words it is necessary for the teacher to acquire new habits as regards morality, new abilities of a professional nature and a new spirit of initiative in order to adjust himself to social changes. By discussing in turn these requirements the present guide should not only give a direction to the training of young teachers but it should also enable serving teachers both to keep themselves up to date and to have a broader and more dynamic conception of their task. (IBE)
BOLDYREV, N.I. Ocherki po metodike raboty klassnogo rukovoditelia. 2nd rev. ed. Moskva, Gosudarstvennoe uchebo-pedagogicheskoe izdatel' stvo Ministerstva prosvechenija RSFSR, 1962. 280 p., bibl., notes. — A classroom teacher being he who so to speak directs the consciences of the pupils, it is necessary to define clearly the types and methods of his work. His success as a teacher will depend largely on his ability to organize and not only on his educational knowledge and gifts. He must learn how to know each one of his pupils, create the climate which is indispensable to progress in school work and allot the tasks which train pupils for collective work in life outside the school. Moreover, he will see to the observance of that discipline which engenders in each one a sense of duty freely accepted and examine with his class certain problems of an ethical, aesthetic and social nature. Finally the classroom teacher will supervise the proper functioning of schoolchildren’s associations and have talks with parents to advise them and keep them informed, etc. (IDE)

WALTERS, Elsa H. & GRANT, Margaret. School methods with younger children. A handbook for teachers in the Caribbean. (Adaptation from the West African Edition). London, Evans Brothers, (1963). 215 p., fig., bibl., ind. — Illustrated guide for use of teachers at primary schools in the British West Indies. Suggestions based on the syllabuses for various subjects (arithmetic, English, reading, writing, art and craft, hygiene, nature study) and relating to the organizing of educational games, the construction of teaching material, the preparation of lessons as well as to certain fundamental principles of child psychology. (IBE)

371.140 THE TEACHER'S PERSONALITY — 371.141 TEACHER-PUPIL RELATIONS — 370.3 PHILOSOPHY OF EDUCATION
GUSDORF, Georges. Pourquoi des professeurs? Pour une pédagogie de la pédagogie. Paris, Payot, 1963. 262 p., bibl. notes. (Bibliothèque scientifique, Collection Science de l'Homme). — At the present when education heads and officials, prompted by the population growth, are beginning to dream of mass instruction, it may be of value to insist on the real meaning of education and on the usefulness of teachers. The present study, somewhat like a philosophical discussion and at times in the nature of an indictment, endeavours to identify, among the abstract ideas, the permanent meaning of the educational undertaking. Keeping the teacher's personality in the foreground this "pedagogy of pedagogy" analyses good teaching conditions and the teacher-pupil relationship, drawing comparisons in particular between eastern and western concepts in this connection. (IBE)

371.140 THE TEACHER'S PERSONALITY
OKOŃ, W. (Ed.). Osobowość nauczyciela. 2nd ed. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 260 p., fig., bibl., notes. — Collected articles on the teacher's personality and his skill as well as on the qualities required for being both a good teacher and a good educator. While dealing with different aspects of the matter all six authors agree that educators must have that "cardinal virtue", the desire to make life's path smoother for children. (IBE)

371.15 (73) TEACHER STATUS — 378 (73) HIGHER EDUCATION (UNITED STATES)

EELLS, Walter Crosby & HOLLIS, Ernest V. Sabbatical leave In American higher education. Origin, early history and current practices. Washington, U.S. Office of Education, (1962). 75 p., bibl., ind., app. (Bulletin 1962, No. 17). — The practice of granting sabbatical leave (leave which, on a full or part-time basis, is given to professors for the purposes of professional improvement after seven consecutive years' service at the same establishment) was first introduced in the United States in 1880 at Harvard University, the latter's example being followed between 1880 and 1900 by some ten other institutions of higher education. The present report on an inquiry in the matter of sabbatical leave indicates the relevant practices adopted by 48 American colleges and universities. (IBE)

PARDO, Carlo Vello di & GRAVINA, Antonio. L'ordinamento giuridico della istruzione elementare. [See 379.91:372 (45)]

371.15 (44) TEACHER STATUS — 371.14 (44) GOOD TEACHING CONDITIONS (FRANCE)

PIERRET, R. & BARDON, H. La vie de l'Instituteur. Paris, Hatier, cop. 1963. 205 p., tabl., bibl. — Collected articles most of which were originally published in the educational review "l'Instituteur". Constituting a practical guide for the beginning teacher the book furnishes the necessary documentation for his task and deals with the everyday problems which he may encounter within the school and outside. The second part is particularly devoted to the teaching problems raised in connexion with each subject. (IBE)

371.15 (73) TEACHER STATUS — 37 P (73) RESEARCH AND INQUIRIES (UNITED STATES)

STEFFENSEN, James P. Merit salary programs in six selected school districts. (Washington), U.S. Office of Education, (1963). v+63 p., tabl., bibl. notes. (OE-23025, Bulletin 1963, No. 5). — Should teachers be remunerated according to their merit (their teaching results) or should the current salary scale be maintained? This is at present a much debated question in the United States, where it is desired that increasingly better qualified persons be attracted to the teaching profession. The aim of the present study is not to adopt either point of view but rather to make a comparative analysis of the research which concerns professional merit, was carried out at six colleges selected by the authorities and where in each case the college's own programme and experimental system of assessment were followed. (IBE)

GRAY, Susan W. The psychologist in the schools, New York, [etc.], Holt, Rinehart and Winston, (1963). ix+406 p., bibl., ind. — What the psychology student in the United States should know about the school psychologist’s work as well as about its professional and social implications in order that he may be equal to his future task. By reason of education’s larger role and its adjustment to the rate of progress the psychologist’s duties have become more extensive. Today he is consulted on everything which closely or remotely concerns the type of school establishment to which he is attached, on, for example, educational methods and the programmes for encouraging rivalry among pupils in order to improve work standards, on measures regarding order and discipline, on constructive aspects of leisure, etc. His presence is required on administrative boards, on advisory committees of principals, teachers and other members of school staff as well as at meetings of teachers and parents. He collaborates with auxiliary services (welfare, medical, health, etc.) and even with parish and denominational groups. (IBE)

VILLEVIEILLE, Joseph & VILLEVIEILLE, Jean. Votre fils est intelligent, mais...

By speaking as one to another and dealing with a number of questions often asked by parents and educators the author endeavours to make the reader share in educational problems. These range from teaching methods, programme planning, pupil guidance and curriculum content to guided activities and leisure. (IBE)

HOLZINGER, Fritz. Schulreife und Schullaufbahn. Wien, Verlag Eugen Ketterl, (1960). 199 p., 12 pl., tabl., bibl., ind. — "School Readiness and Schooling" is a study on the child’s mental level at the time of his admission to school and is intended to provide the teacher with a means of understanding medical advice and to give the school doctor an idea of the work of remedial education. I. Account of the somatic, psychic and social factors of concern to educators. II. Analysis of the Styrian test, showing by means of examples from Lower Austria its application and scoring procedure and its adaptation to the different categories of case. III. The author advocates a pre-school test, followed by individual examinations; the teacher could then adapt his teaching programme to the mental state of those in his care. IV. How to classify cases according to their motor actions, their aptitudes and propensities (the mediocre, highly-strung, neglected, mentally weak, etc.). In conclusion, suggestions for broadening the field of remedial education and for giving better defined purpose to classes and syllabuses. (IBE)

INGENKAMP, Karlheinz et al. (Ed.). Praktische Erfahrungen mit Schulreifetests. Basel (Schweiz) & New York, S. Karger, 1962. 128 p., tabl., fig., bibl. (Psychologische Praxis, Schriftenreihe für Erziehung Jugendpflege, Heft 30). — Third report on the discussion days held by the educational psychology section of the German psychologists’ professional association. Problems of incorporating in the school the points of view of education and psychological diagnostics, of “readiness for schooling” and its diagnosis; psycho-pedagogical research concerning the school achievement of children enrolled too soon; maturity and the alleged readiness for schooling; experiments conducted with the Weilburg tests in connection with admission to schools in Berlin-Tempelhof; research in regard to school readiness in Frankfurt. (IBE)

371.237 RETARDATION IN STUDIES — 370.46 EDUCATIONAL PSYCHOLOGY — 377.91 MEDICO-PSYCHOLOGICAL AND EDUCATIONAL AID
CORRELL, Werner. Lernstörungen beim Schulkind. Ursachen, Formen, Überwindungsmöglichkeiten. Donauwörth, Verlag Ludwig Auer, Cassianum, s.d. 157 p., fig., bibl. notes. — Study, based on actual observation and on psychological examination, concerning difficulties manifested for no apparent reason in the school work of normally endowed pupils. It is known that such difficulties become increasingly serious and may result in regrettable changes of behaviour unless the underlying causes can be eradicated. Analysis of the different factors responsible and which may be (a) connected with the school (teacher-pupil relations, unfavourable teaching conditions), (b) unconnected with the school or of a family kind, (c) of a personal kind (abilities, maturity, interests, nervous or organic features, work rate), (d) related to character (laziness, obstinacy, fear, need to play a part, etc.). By means of this analysis it is possible to determine the preventive and remedial procedures available in treatment. (IBE)

HUGHES, P.W. Academic achievement at the university. [See 378 (94)]

371.237 (494.42) RETARDATION IN STUDIES — 37 P (494.42) RESEARCH AND INQUIRIES (SWITZERLAND/GENEVA)
ROLLER, S. & HARAMEIN, A. Enquete sur les retards scolaires. Etude analytique de quelques-unes de leurs causes presurées. Neuchâtel & Paris, Editions Delachaux & Niestlé, 1963. 44 p., fig., tabl. (Cahiers de pédagogie expérimentale et de psychologie de l’enfant — No. 19). — An endeavour to employ the procedure of statistical analysis for determining the causes of retardation in school work among children in the canton of Geneva. Data was obtained by means of questionnaire and on analysis the factors studied were divided into the following four categories according to their relative effect on the pupils’ school performance: (1) vocation of the person replying; (2) sex, supervision of study; (3) home situation, schooling received, change of teacher; (4) attendance of nursery school, nationality. These factors cannot be considered as causes of retardation but the investigation shows their combined effect. In cases of retardation it is recommended that the treatment be designed to neutralise the negative effect of the examined factors according to their observed relative influence. (IBE)

371.243 INDIVIDUAL TEACHING. FITTING THE SCHOOL TO THE CHILD — 371.141 TEACHER-PUPIL RELATIONS
KOLESSOWA, A. M. Zum individuellen Eingehen auf die Schüler in der Unterstufe. Adapted by Horst Strietzel from the Russian. Berlin, Volk und Wissen Volkseigener Verlag, 1960. 54 p. — To know his pupils is of paramount importance for the teacher. There is no recipe for this knowledge as it is the result of a long and systematic approach by a teacher who is up to date in child psychology. How to make use of his pupil's individual particularities for helping him to learn better at school and find himself. Examples of individual work accomplished by the pupils of the first four classes during one hour in class. (IBE)

371.243 INDIVIDUAL TEACHING. FITTING THE SCHOOL TO THE CHILD
PAGANELLI, Zeno. Come individualizzare l'insegnamento. (Brescia), "La Scuola" Editrice, (cop. 1962). 118 p., fig., bibl., notes. (Collezione "COME?", Guide didattiche per l'applicazione dei vigenti programmi della scuola elementare). — As each pupil has his own personality it is essential for teaching to be adapted to individual needs and capabilities. Only individual teaching can satisfy this condition. Suggestions for application of this method in the teaching of mother tongue and science as well as in moral, civic and artistic training. Reference is made to the employment of card systems and the reader's attention is drawn to their limitations and dangers. (IBE)

371.249 OVERLOADING OF CURRICULUM — 158.1 PSYCHOLOGICAL TECHNIQUES
GEREB, György. Kísérletek a fáradtság leletekának Köröböl. Budapest, Akadémiai Kiadó, 1962. 215 p., fig., tabl., bibl. — In reviewing relevant experimental research the author of "Psychological atlas" (see IBE Bulletin No. 150) studies different aspects of the psychology of fatigue. Discussion of pupils' school work, of what causes fatigue and of the effects produced by overloaded syllabuses; characteristics of the different types of children who are prone to fatigue, etc. Comparative tables in respect of deaf-and-dumb and oligophrenic children. Interpretation of fatigue curves in the case of students, sport players and workmen; explanation of the changes produced among the latter by provision for balanced periods of work and of time off. 371.26 (430.3) METHODS OF EXAMINATION AND CONTROL OF PUPILS (GERMAN DEMOCRATIC REPUBLIC)
to school work has a new sense in the socialist schools of the German Democratic Republic. In such control, account should be taken, as regards curriculum requirements, not only of the knowledge learnt by the pupil but also of the use and practical application which he makes of it. Instructions to teachers concerning (a) the concept of evaluating the results of the teaching, (b) the aims, place, types, designing and application of control methods in general, (c) the possibilities which such control offers in the teaching of arithmetic and mother tongue, (d) the comparison to be made between the progress of the different pupils in one class or in several parallel classes, (e) the evaluation of results in connection with the education of workers' and peasants' children. (IBE)

371.261 SCHOOL RECORDS

McINTOSH, Douglas M.; WALKER, David A. & MACKAY, Donald. The scaling of teachers' marks and estimates. Rev. and enl. ed. Edinburgh & London, Oliver and Boyd, (1962). xii+182 p. fig., tabl., ind., app. — Revised and enlarged edition of a work which, originally published by the same firm in 1949, explains a standard procedure for the scaling of pupils' marks in the classroom and at examinations as well as of all other kinds of estimate. Clear in its application as regards the different subjects and various types of school and amply illustrated by tables, graphs and score sheets the procedure was designed for the following purposes: simplify the teacher's work; standardise the classification of pupils for their transition to secondary and higher education; facilitate transfer from one school to another; give validity and reliability throughout the country to the marks and intelligence quotient of each pupil. (IBE)

371.262 EXAMINATIONS — 378.241 ORGANIZATION OF THE STUDENT'S WORK — 371.336 INITIATION INTO METODICAL WORK

ALLEN, Clifford. Passing examinations. A psychological study of learning, remembering and examination techniques, and the causes of failure, for the assistance of students. London, Macmillan & Co., 1963. xiii+146 p. — Advice based on psychological principles and intended for students who are to take examinations at higher level. Among the matters dealt with: emotional and environmental factors (living conditions, for example) which determine the effectiveness of study; theory of learning (conditioning, insight, etc.); remembering (use of mnemonics); causes of failure; techniques of study (note taking, revision, etc.); how to answer examination questions. (IBE)

371.262 (45) EXAMINATIONS — 373.105 (45) BACCALAUREATE (ITALY)

ROBERTAZZI, Mario. Troppi esami, poca scuola. Milano, Longanesi & C., p. 1961). 237 p. ("La Fronda", Volume 41). — Journalistic inquiry which, on the quality of education in Italy, was conducted by a former secondary school teacher and university professor who is particularly concerned about the number of examinations and excessive importance attached to them at the expense of the pupils' true education and training. Adopting a style sometimes polemical, sometimes anecdotal, the author exposes the facts which he collected either through a newspaper inquiry concerning state examinations or by himself among students suffering from the excessive burden or tension of examinations. The evidence should lead not only teachers and responsible authorities but also parents and children to examine their own minds concerning the education provided and received in Italy. (IBE)

371.262 (42) EXAMINATIONS — 373.105 (42) BACCALAUREATE — 378.25 (42) UNIVERSITY DEGREES (UNITED KINGDOM)

STRONG, Alan. Pass that exam! Edited by A.H. Throwes. Preston, A. Thomas & Co., (1963). 206 p., 1 pl. — While showing that success in an examination does not depend upon intensive work at the last moment but that it is the result of intellectual and physical preparation carried out logically from the beginning of study, the author explains what is required for the "eleven-plus" and "G.C.E." examinations (both O level and A level) and offers practical advice on how to approach a question, arrange answers, use time to the best advantage and thus do justice to one's examination preparation. List of the degrees, diplomas and grants awarded by the University of London. Details of the courses and various examinations which must be taken for certain professions (estate agent, accountancy, advertising, architect, bank clerk, secretary, the law, librarian, etc.). (IBE)
371.263 SCHOOL TESTS — 375.31 ARITHMETIC

BONDOIR, A. Test pour la mesure de l'acquis arithmétique en fin de scolarité primaire. Contribution à la psycho-pédagogie des mathématiques. Liége, Vaillant-Carmanne, 1961. 49 p., tabl., bibl., app. (Centre national de Recherches de Psychotechnique scolaire, Psychologie appliquée à l'éducation, Document No. 10). — Results (including standard rating, diagnostic tables, etc.) of a test used by the University Educational Advisory Commission (Commission consultative universitaire de Pédagogie) in studying pupils' achievement in arithmetic at the time of leaving the sixth primary class in Belgium. CLAPARÈDE, E. Como diagnosticar las aptitudes en los escolares. [See 371.264]

371.265 TESTS OF INTELLIGENCE AND APTITUDE — 153 INTELLIGENCE, REASON, UNDERSTANDING

DONALDSON, Margaret. A study of children's thinking. In collaboration with Donald Withrington. (London), Tavistock Publications, (1963). viii+263 p., fig., tabl., bibl., ind., notes, app. — Study which, dealing with the thinking of children aged 9 to 15 years, is based on an analysis of the errors made during verbal tests of intelligence. The errors are of three main types and their distinguishing features are studied in relation to (a) the work of J. Piaget and that of Goldstein and Luria, (b) recent research carried out by Broadbent and others on attention and immediate memory. The book is intended to make it possible for the psychologist to know children's capacity for thought in order that he may direct his administration and interpretation of verbal intelligence tests accordingly. (IBE)

371.265 (73) TESTS OF INTELLIGENCE AND APTITUDE — 371.263 (73) SCHOOL TESTS (UNITED STATES)

GOSLIN, David A. The search for ability. Standardized testing in social perspective. New York, Russell Sage Foundation, 1963. 204 p., fig., tabl., bibl. notes, ind. (Volume 1 of a Series on the social consequences of ability testing). — Every year in the United States between 150 and 250 million standardized tests of ability are administered and they give rise to certain problems and criticism, etc. For this reason the Russell Sage Foundation decided upon a programme of research in regard to testing and its implications and consequences for the American community. First in a series of reports to be published in this connection the present volume explains (a) the origin and procedures of ability testing as well as its employment in the United States, USSR and United Kingdom, (b) its use in business and industry, government and the military forces. Then follows a discussion of the principles underlying the testing of mental and physical ability; the consequences both in the social and economic context and for families in the American community, which adopts for itself the test criteria. Such testing affects vocations and social life, while it may sometimes also have a subjective influence, fortunate or unfortunate, on the individual's inner life and his moral or emotional behaviour. (IBE)
371.265 TESTS OF INTELLIGENCE AND APTITUDE — 371.243 INDIVIDUAL TEACHING. FITTING THE SCHOOL TO THE CHILD — 37 P (485) RESEARCH AND INQUIRIES (SWEDEN)

HARNQVIST, Kjell. Individuella differenser och skoldifferentiering. 1957 års skolberedning, II. Stockholm, Victor Pettersons Bokindustri, 1960. 127 p., fig., tabl., bibl., app. (Statens offentliga utredningar 1960:13). — Inquiry on the psychological conditions necessary for the differentiation which, applicable in schooling, is based on age level and requires the use of tests of ability and vocational aptitude. The inquiry is concerned with the following matters: nature and preparation of the tests; statistical analysis of the results; their interpretation; value of the tests. In appraising a test and its validity for assessment of individual aptitudes it is necessary to consider the methods of application, the material to be employed, the comparison of results, the extent to which the opinions of comrades tally with that of the teacher. (IBE)

371.265 TESTS OF INTELLIGENCE AND APTITUDE — 15 PSYCHOLOGY

HEINONEN, Veikko. Differentiation of primary mental abilities. Jyväskylä (Finland), Jyväskylän yliopistoyhdistyksen ja kasvatuopillisen korkeakoulun kustantama, 1963. 136 p., fig., tabl., bibl. (Jyväskylä Studies in Education, Psychology and Social Research, 2). — Research on the differentiation of mental ability in children 9 to 15 years of age. The intelligence quotient or a change in performance is insufficient to describe the mental development; an analysis of the change in mental ability must be taken into account. The author suggests the method of factorial analysis for understanding such differences in achievement and for determining (a) the changes, (b) the composition of the factors involved and their correlation with the increase in performance, (c) the difference in mental development between girls and boys, (d) the relationship between mental ability on the one hand and school success and socio-economic status on the other, (e) the difference between primary and secondary school pupils in regard to development of intelligence. The study embraced over 2,000 pupils attending primary and secondary schools (rural and urban) and belonging to various socio-economic environments. Results tabulated in the appendix. (IBE)

371.265 TESTS OF INTELLIGENCE AND APTITUDE

WITWICKI, Tadeusz. Badania praktycznej sprawności umysłowej metodą wkładanek. Toruń, Towarzystwo naukowe w Toruniu, 1962. 101 p., fig., tabl., bibl. (English summary). (Praca wydana z zasiliu Polskiej Akademii nauk, Prace wyższych szkół filologiczno-biologicznych, Tom XII - Zeszyt 2). — Account of mental testing for the measurement of "practical intelligence", that is of the kind manifested in everyday behaviour. In the test described here, geometrical figures of different shapes, cut out of a parallelepiped then scattered, are required to be arranged in their original position in a minimum of time. (IBE)

371.266 PERSONALITY TESTS — 378.23 ENTRANCE REQUIREMENTS

BURGER, Robert. Eignungs- und Erziehungsdiaagnosen für höhere Schulen mit dem Diapositiv-Z-Test. Eine Einführung für Pädagogen und Psychologen. Bern & Stuttgart, Gemeinschaftsverlag Hans Huber - Ernst Klett, (cop. 1963). 193 p., fig., tabl., bibl., ind. (Abhandlungen zur Pädagogischen Psychologie, Band V). — The Z-Test constitutes one of the principal ways of diagnosing school abilities and selecting candidates for study at higher level. Administration of the Z-Test; projection of the slides; scoring and interpretation of the replies; record to be kept for each case. These different aspects are explained with the aid of many examples of model replies and their scores and by means of parallels drawn between groups at the same schooling level. (IBE)

371.266 PERSONALITY TESTS — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

COETSIER, L. & LAGAE, C. Frustration-studie. Een experimentele Bijdrage tot de Jeugdpsychologie. (Gent), Universitaire Stichting van België, Interuniversitair Centrum voor Testonderzoek, 1961. 499 p., fig., tabl., bibl. (Mededelingen van het Laboratorium voor toegespaste psychologie en de dienst voor studieadvies bij de Rijksuniversiteit te Gent, Nummer 10). — Frustration, its definition, causes and results. Account of an investigation, the psychological theories, sociological, experimental and clinical studies. Description of a battery of 30 frustration tests chosen according to different criteria and administered to a representative selection of 5,836 boys and girls aged 11 to 19 years in the Flemish portion of Belgium. Application of the tests; results obtained. The aim of the present study is twofold: (a) verify whether this test battery really corresponds to the requirements of such an investigation; (b) contribute in an experimental way to psychological study of Belgian youth. (IBE)

371.266 PERSONALITY TESTS

371.266 PERSONALITY TESTS — 137 CHARACTER STUDY

371.266 PERSONALITY TESTS

ZÜST, Ruth. Das Dorfspiel. Diagnostische und therapeutische Auswertung eines Testverfahrens nach Henri Arthus. Bern & Stuttgart, Verlag Hans Huber, (cop. 1963). 230 p., fig., bibl., notes, app. — Method for adaptation and interpretation of the "creative activities village test" according to H. Arthus. This test is designed to make possible, from form and content in a game of building a small village, the detection of mental age level as well as of emotional conflicts and disturbances. Some 175 photos of villages and as many individual records and relevant notes provide the material for the method which (a) explains the symbols used in the design and components of the game, (b) indicates everything which in building his village the child expresses concerning his experiences with his mother and others surrounding him and (c) shows how to interpret this information usefully by exact diagnosis of the mental and emotional state of each case. (IBE)
Barankiewiczowa, H.; Lewin, A. & Pelcowa, M. Wychowawca gromadzki material o l'dole. Warszawa, " Nasza Książarnia ", 1963. 95 p., fig., tabl., bibl. (Instytut Pedagogiki, Pracownia Wychowania Szkolnego). — Three articles on the various means (questionnaires, competitions, " plebiscites ", pupil's diaries, etc.) by which teachers can come to know their classes and the schoolchildren's views. (IBE)

Lee, Grace (Ed.). Helping the troubled school child. [See 377.9 (73)]

Alvarez Constantino, J. Jesus. L'educazione de la comunità. Traduit de l'espagnol par Saint-Lucien Hector. Port-au-Prince, Haiti, Imprimerie de l'Etat, 1956. xxiv+86 p., bibl., app. — French translation of a report published in Spanish on the community's role in rural education in Mexico. Critical appraisal of certain principles and theories hitherto applied in this country. Analysis of the following factors which should be taken into account in the official education programme required for the country's development: (a) physical environment; (b) economic structure; (c) system of social services; (d) the home and family; (e) public health and safety; (f) recreation and artistic activities; (g) educational and cultural activities. (IBE)

Iglesias, Luis F. Mario de rata. Los trabajos y los días de un maestro rural. (Buenos Aires), Editorial Lautaro, (cop. 1963). 316 p. (Biblioteca Ciencias del Hombre). — Diary of the life at a one-teacher rural school attended by some thirty children. The author, the school's teacher, deals in detail with the everyday problems involved in the teaching and endeavours to trace the difficulties to their origin. The daily task (teaching to read, write or calculate) sometimes requires an effort almost disproportionate to the results. With sincere and constructive devotion, however, and if he fosters and intensifies his love for the child the teacher will overcome the obstacles. (IBE)

Paganelli, Zeno. L'organizzazione didattica dellapluriclasse. Brescia, " La Scuola " Editrice, (cop. 1962). 118 p., bibl., app. (Collezione " COME? ", Guide didattiche per l'applicazione dei vigenti programmi della scuola elementare). — Discussion intended to encourage young teachers who are given charge of one-teacher schools in isolated areas. Examination of practical problems (class arrangement, the textbooks, etc.) and of the problems involved in the teaching. Apart from manual activities the teaching of both gardening and breeding is strongly recommended. Some observations on supervision of the teaching are followed by the description of a day at a one-teacher school. (IBE)

Spain. Ministerio de Educación Nacional. Centro de documentación y orientación didáctica de enseñanza primaria. Guía práctica para las escuelas de un solo maestro. (Madrid), 1961. 159 p., fig., tabl, bibl. (Didáctica breve, Publicaciones del C.E.D.O.D.E.P.). — Practical guide for organizing the work at one-teacher primary schools and intended particularly for teachers who are beginning. Organization of the school and of the school work (syllabuses, time-tables, teaching material, school books, discipline); administrative instructions; out-of-school activities (homework, school excursions, visits to museums, relations with the home); questionnaire for study of a locality; table showing the instructional level in relation to pupil age; models of school record cards; types of objective tests applicable at primary level, etc. (IBE)

SWADKOWSKAJA, M. M. Ausbildung neuer Arbeitskräfte durch indviduelle Schulung. Berlin, Volk und Wissen Volkseigenner Verlag, 1961. 58 p., fig., bibl. (Allgemeine Schriften zur Qualifizierung der Werkstätten). — Practices employed in the training of personnel at a tool factory in Moscow. Features of the syllabuses and time-tables adopted; instructions concerning the methods used in the theoretical and practical courses; selection of the teachers and instructors; work of the qualifications board, etc. (IBE)

371.3 TEACHING AND INTELLIGENT EDUCATION — 370.46 EDUCATIONAL PSYCHOLOGY — 375.0 (73) GENERAL QUESTIONS RELATIVE TO THE CURRICULUM — 37 G (73) YEARBOOKS (UNITED STATES)
ASSOCIATION FOR SUPERVISION AND CURRICULUM DEVELOPMENT (A Department of the National Education Association, United States). New insights and the curriculum. Washington, A.S.C.D., N.E.A., (1963). vii+328 p., fig., bibl. (Yearbook 1963). — Contribution which, in regard to curricula, particularly those of the United States, is owed by education to new discoveries and to progress in the sciences related to education. Specialists in these different fields describe the relationships involved and how the latter influence the concept of education. The topics treated are arranged in sections: (a) potentiality (definition and development); (b) knowledge (new concepts and possibilities); (c) self-management; (d) relationships (new modes and their meanings); (e) across cultures (gaining culture from value choice); (f) citizenship; (g) creativity (sources and circumstances). (IBE)

371.3 TEACHING AND INTELLIGENT EDUCATION — 375.0 (45) GENERAL QUESTIONS RELATIVE TO THE CURRICULUM (ITALY)
CIVES, Giacomo. Didattica e cultura. Bologna, Edizioni Giuseppe Malipiero, (cop. 1960). 145 p., bibl., notes, ind. — In discussing children's aesthetic education, today's teaching of mathematics, the limitations and possibilities of educational radio as well as the past and present in regard to textbooks the author presents his broadened concept of teaching. What is termed " vertical instruction " should furnish methods which in " absorbing " so-called scientific education, take account of the social and cultural situation in any country. (IBE)

371.30 (438) TEACHING PRINCIPLES (POLAND)
BARTECKI, J. & CHABIOR, E. O nowej organizacji procesu nauczania. Warszawa, " Nasza Księgarnia ", 1962. 391 p., fig., tabl., bibl., ind., notes. — A " reorganization of the teaching process " gives an account of the search for new teaching methods more and more appropriate to the needs of society and of its individuals. The present study is specially concerned with a socialist society within which work, in its broadest sense, constitutes the basic element of the education process. Whether it be just the successive phases ranging from observation to the forming of concepts the connection between thought and its object is always involved although it may or may not be related to the collectivity. Citing Jean Piaget, Adolphe Ferrière and other authorities in the matter, the author shows the difference between these phases and in what way they depart from or approach the concepts now prevailing in Poland. Value of free work in small permanent or temporary groups; constructive role of the pupils' councils which discuss problems connected with the improvement of their work. (IBE)

371.30 TEACHING PRINCIPLES — 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE: ARBEITSCHULE — 37 B HISTORY OF EDUCATION
enlarged edition of a work originally published in 1957 under the title "Die Methoden der Jugendarbeit durch Unterricht". Intended for teachers, this study of methods begins with an analysis of the school reforms introduced at Munich (in regard to exercise of a trade), Leipzig (in regard to laboratory research) and Hamburg (in regard to artistic activity) and endeavours to integrate these new trends in order to provide the teacher with subject matter for lively and well meditated lessons. The present review of discoveries in the field of method is a contribution to the renewal of subject content — the basic problems, incidentally, being always the same — in order that the school may be adapted to education's current tasks and to the mentality of young people 10 to 16 years old (Jugendschule). (IBE)

371.30 Teaching Principles — 370.46 Educational Psychology

BOGOJAVLENSKIJ, D. N. & MENCINSKAJA, N. A. (Ed.). Puti povyšenija kwalifikačija učitelja v naših školah. Moskva, Izdatel'stvo Akademii pedagogičeskikh nauk RSFSR, 1962. 280 p., fig., tabl. — Methods which, designed for teaching primary grade pupils to think for themselves, are intended to awaken in them a desire for further knowledge. The documentary material analysed is based on psychological information and relates to the different subjects (mother tongue, arithmetic, natural history, explained reading, etc.). Discussion of the problems involved in the pupils' mental preparation for assimilating polytechnical knowledge. (IBE)

371.301 PARTICULAR THEORIES — 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL
PROCEDURE — 370.46 EDUCATIONAL PSYCHOLOGY

KILPATRICK, William Heard. I fondamenti del metodo. Conversazioni sui problemi
dell'insegnamento. Traduzione di Antonio Guccione Monroy. Firenze, "La Nuova
translation of "Foundations of method, Informal talks on teaching" published in 1936
by Macmillan, New York. (IBE)

371.301 PARTICULAR THEORIES

MEYER, Ernst. Praxis des Exemplarischen. Didaktische Dokumentationen aus
208 p., fig., tabl., bibl., notes. (Erziehungswissenschaftliche Bücherreihe — Reihe III:
Unterrichtslehre). — Teaching by "the example" method advocated by the author is similar
to the use of centres of interest and the project method. By giving many examples he
shows how study should be connected with observation and with specific facts. Although
depending upon the value of the teacher this method offers a maximum of effectiveness
by involving the pupils' collaboration (individual reports, group work, making recordings,
illustrating, actual observation). Its purpose is to develop capacities of judgment, adjust-
ment and resistance in pupils and thus render them able to live in the environment of
modern society. The final part of the book is devoted to the results obtained by this
method with a class in its ninth year of compulsory schooling. (IBE)

371.301 PARTICULAR THEORIES: NATURAL EDUCATION

ROUSSEAU, Jean-Jacques. Emile oder über die Erziehung. V. Buch. In neuer
deutscher Fassung besorgt von Josef Esterhues. Paderborn, Verlag Ferdinand Schönigh,
1961. 183 p., bibl., ind., chronol. tabl. (Schönighs Sammlung Pädagogischer Schriften,
Quellen zur Geschichte der Pädagogik). — Fifth book of the Emile in a new German
edition: Emile's marriage with Sophie, who was brought up according to the same
principles as the young man himself. (See IBE Bulletin No. 138). (IBE)

371.301 PARTICULAR THEORIES: SPENCER — 371.3 TEACHING AND INTELLECTUAL EDU-
CATION — 371.73 PHYSICAL EDUCATION

education was based on book learning and on the teaching of mathematics and the
classical languages Herbert Spencer (1820-1903) urged that first piece be allotted to
"science" education and that the child be given an opportunity of learning and experi-
menting for himself. In these of the great educator's essays dealing with intellectual,
moral and physical education and kindred matters, he enunciated even a hundred years
ago principles which today underlie any school reform. (IBE)

371.31 GENERAL TYPES OF TEACHING
ODENBACH, Karl. Studien zur Didaktik der Gegenwart. [See 371.30]

371.312 INDIVIDUAL TEACHING: PROGRAMMED INSTRUCTION
CRAM, David. Explaining "teaching machines" and programming. [See 371.341]

371.312 INDIVIDUAL TEACHING: PROGRAMMED INSTRUCTION — 371.341 "TEACHING MACHINES"
DÉCOTÉ, Georges. Vers l'enseignement programmé. Paris, Gauthier-Villars, (1963). xiii+102 p., fig., pl., bibl. (Publications du Centre de pédagogie cybernétique. Section I — Information générale, No. 1). — First important work in the French language on the apparently new method consisting of programmed instruction. A review of relevant history (Socrates, Quintilian, Descartes, the Pressey tests and Skinner's experiments) is followed by a discussion of the scientific basis, the advantages and results of the method. Programmed instruction textbooks and teaching machines are also considered and attention is drawn to the importance attaching to the preparation of the programmes. Brief account of programmed instruction in France. Bibliography of American authors and list of teaching machine manufacturers. The book concludes that "programmed instruction is a contribution to the humanistic concept of education and will some day become the chosen tool of teachers". (IBE)

371.312 INDIVIDUAL TEACHING: PROGRAMMED INSTRUCTION
FOLTZ, Charles I. The world of teaching machines. [See 371.341]

371.312 INDIVIDUAL TEACHING: PROGRAMMED INSTRUCTION — 371.341 "TEACHING MACHINES"
FRY, Edward B. Teaching machines and programmed instruction. An introduction. New York & London, McGraw-Hill Book Co., (1963). xi+244 p., fig., tabl., bibl., ind., app. — Description, illustration and classification of the main kinds of teaching machines and programmed instruction material in use at the present. Theoretical and practical aspects involved, particularly in connection with the following matters: cost; knowledge required of teachers for employment of such media; place which programmed instruction occupies in the entire American educational system; lesson length; amount of repetition required for learning, etc. (IBE)

371.312 (73) INDIVIDUAL TEACHING: PROGRAMMED INSTRUCTION — 371.341 (73) "TEACHING MACHINES" — 37 E (73) REFERENCE BOOKS (UNITED STATES)
HANSON, Lincoln F.; CHRISTMAN, Carol & SEIDEL, Gertrude (Ed.). Programs, '63. A guide to programmed instructional materials available to educators by September 1963. (New York), The Center for Programmed Instruction & (Washington), U.S. Office of Education, (1963). xvi+814 p., fig., tabl., bibl., ind., app. (OE-34015-63, Bulletin 1964, No. 3). — Guide to the material, including teaching machines, available in the United States for programmed instruction as from September, 1963. Introduction on the employment of such material. General classification of the programmes according to the different subjects: arithmetic; economics and administration; games; English (grammar and language); language arts; modern languages; various mathematics subjects; medicine; music; natural sciences (chemistry, physics, etc); social studies, etc. Each programme or programmed instruction textbook listed is illustrated with a facsimile of one of its pages. The appendix contains an index of authors and an index of producers. A few months after publication of this annual guide, and to accompany it, a brochure is issued on the employment of programmed instruction in American schools. (IBE)

371.312 INDIVIDUAL TEACHING: PROGRAMMED INSTRUCTION — 370.7 EDUCATIONAL EXPERIMENTATION
LUMSDAINE, A.A. (Ed.). Student response in programmed instruction. A sym-
posium on experimental studies of cue and response factors in group and individual learning from instructional media. Washington, National Academy of Sciences — National Research Council, 1961. ix + 555 p., fig., tabl., bibl. (27 p.), app. (Sponsored by Headquarters Air Research and Development Command United States Air Force — Publication 943). — Report on the symposium’s work, which dealt with group and individual learning from the following media: teaching machines and other teaching aids; programmes broadcast by radio or television; films, etc. The research was specially concerned with the process of concept formation and the eliciting of the implicit or overt responses of learners. This experimentation should help in making programmed instruction and audio-visual procedures more effective. (IBE)

371.312 Individual Teaching: Programmed Instruction

LYSAUGHT, Jerome P. & WILLIAMS, Clarence M. A guide to programmed instruction. New York & London, John Wiley and Sons, (1963). xi + 180 p., fig., tabl., bibl., ind. — Method for use in programmed instruction at schools and in industrial courses. With the aid of many diagrams taken from programmed instruction material itself the following matters are dealt with in detail: how to test the instructional value of the different items of the programme in each subject; how to select and arrange them; how to construct a programme and present it to the pupils so that they may be sure to acquire accurate and detailed knowledge; how to submit to pupils questions which will elicit direct responses in correct form. (IBE)

371.312 (73) Individual Teaching: Programmed Instruction — 371.341 (73) “Teaching Machines” (United States)

MARGULIES, Stuart & EIGEN, Lewis D. Applied programmed instruction. New York & London, John Wiley and Sons, (1962). ix + 387 p., fig., tabl., bibl., app. — Guide dealing not with the educational and psychological principles underlying programmed instruction and teaching machines but with the practical details involved in the use of this new type of instruction (cost, time necessary for preparation prior to employment of existing apparatus and material, etc.). Contributions due to different authors are arranged under the following sectional headings: (1) Introduction; (2) Internal industrial programmes; (3) Military programmes; (4) Computer-based teaching systems; (5) Market analysis and economic considerations; (6) Machines and devices; (7) Programmes and agencies. (IBE)

371.312 Individual Teaching: Programmed Instruction

MARKLE, Susan Meyer; EIGEN, Lewis D. & KOMOSKI, P. Kenneth. A programmed primer on programming. 2 vol. I. Principles. II. Practical problems. 2nd ed. New York, The Center for Programmed Instruction, (1961). v + 27 p. & ii + 40 p. — Programmed instruction requires from the student more than does the customary textbook because in the former case the text is incomplete and must be completed. Programmed instruction is based on research findings in the field of educational psychology and these must be constantly assessed, revised and improved. In the first volume of this textbook written in “programmed” form the following matters are explained: principles on which programmed instruction is based; techniques for ensuring correct responses; experimental teaching; branching; uses and devices. The second volume deals with practical problems and offers several suggestions for devising various types of test and for the introduction both of new terms in the student’s vocabulary and of new subject matter, etc. (IBE)

371.314 Group Work in Teaching

AGOSTI, Marco. Il sistema del reggenti. [See 371.43]

371.314 Group Work in Teaching

371.34 GROUP WORK IN TEACHING — 370.7 EDUCATIONAL EXPERIMENTATION

SIMON, Alfons. Partnerschaft im Unterricht. Kinder lernen miteinander und voneinander. 2. Aufl. München, R. Oldenbourg Verlag, (cop. 1959). 186 p., ind. — Results of experiments which during four years fourteen teachers conducted on group work in ordinary, advanced and improvement classes at primary level in urban and rural schools; the pupils included boys and girls and numbered 588 in all. Detailed study of some examples shows that group work stimulates interest and activity among pupils. Although it is not to be regarded as a panacea for all of today's teaching problems, experience has proved that it permits of serious and concentrated work and that it deserves to be employed on a wider and more general scale. (IBE)

371.33 PUPILS' WORK

DANILOV, M.A. & ESIPOV, B.P. (Ed.). Obuchenie škol'nikov priemam samostoiatel'noj raboty. Izdatel'stvo Akademii pedagogičeskikh nauk RSFSR, 1963. 175 p., fig., tables, notes. (Institute of Educational Theory and History). — "How to instil in school-children the methods of independent work" according to experience with the teaching of mathematics, Russian and history. Account of research conducted by the Moscow Institute of Educational Theory and History on the aspects and significance of school-children's individual work. The old way, that of allowing the pupil to face his problem alone, was followed by another defective method, that in which the teacher corrects the
pupil's mistakes and makes him repeat and memorise the right form. In order, however, that the pupil may be encouraged to think logically and be taught to work by himself, the teacher should create a situation in which the pupil is led to discover his mistakes and correct them himself. Such a situation conducive to reasoning can be produced either by the conversion of abstract ideas into concrete form or else, depending on the subject taught, by comparison of the pupil's plans and notions with the actual facts as furnished by the surrounding life or by the textbook. (IBE)

371.33 PUPILS' WORK — 371.241 PSYCHOLOGY AND HYGIENE OF SCHOOL WORK
RAVKIN, Z.I. (Ed.). Vospitanie v processe obucheniya. Moskva, Gosudarstvennoe učebno-pedagogičeskoe izdatel'stvo Ministerstva prosveščeniya RSFSR, 1962. 244 p., tabl., bibl. notes. — Some instructions to help teachers in solving the educational problems which must be confronted. First of all how to ensure that schoolchildren's actions conform to their words and that study be regarded by them as a duty owed to the collectivity. Incentives of a social kind which, by reason of the mental outlook produced, are conducive both to the acquisition of knowledge and to the cultivation of the mind. (IBE)

371.33 PUPILS' WORK — 370.3 PHILOSOPHY OF EDUCATION
— Theory (psychological, historical and educational considerations) relating to work: work as a way of life; man in the work process; the ranging of propensities considered as the central problem of work; learning to work; learning (Lernen) in general; usefulness of a specialist teacher in learning to work. Relationship between work, learning and culture. (IBE)

371.332 (47) SUPERVISED STUDY (USSR)
ANIKINA, T. P. & JASCENKO, M. M. Iz opyta raboty moskovskikh škol s prodlonnym davlem. Moskva, Gosudarstvennoe učebno-pedagogičeskoe izdatel'stvo Ministerstva prosveščeniya RSFSR, 1962. 175 p., tabl., bibl. — Experiments conducted at Moscow's care schools, where the specifically educational work occupies a larger place than at the other establishments and where the role of minding the pupils as well as that played by the pupils' associations are more important. Actually the nature of the social activity varies considerably depending on the teachers, one school giving free rein to imagination and romantic thinking, another emphasising practical work and rational effort. As quality may suffer when work is prepared together, particularly in the case of good pupils, the educators responsible for pupils' supervised study must learn to organize the work and not be content with mere supervision. It is well recognised that many problems can be solved by the intensified re-education of educators themselves. (IBE)

SAHMAEV, N.M. (Ed.). Ispol'zovanie tehnicheskikh sredstv v učebnom processe. (Materialy pedagogičeskikh issledovanij). Moskva, Izdatel'stvo Akademii pedagogičeskikh nauk RSFSR, 1963. 247 p., fig., tabl., bibl. notes. (Bulletin of the Academy of Educational Sciences of the RSFSR, No. 128 - 1963). — Collected matter dealing with the audio-visual media now available (films, television, tape recorders, various apparatus and laboratories). Theoretical considerations and disputed questions; applicability depending on the particular subject (history, physics, elocution, modern languages, etc.). Curricula having become overloaded owing to the introduction of many new subjects it is no longer possible to rely solely on traditional teaching methods. The success attending the use of technical media has so far been due to the effective work of teachers in the van of progress; the absence, however, of relevant theory involves mistakes and the waste of time and effort. Throughout the book it is emphasised that the teacher's importance is not consequently diminished by the use of such media and that there is no substitute for his intellectual and moral influence. (IBE)

371.36 EDUCATIONAL FILMS — 372.1 PRIMARY TEACHING METHODS
UNESCO. The teaching film in primary education. (Paris), Unesco, (cop. 1963). 51 p. (Reports and papers on mass communication, No. 39). — In view of the now undisputed role belonging to the teaching film, various educationists, film-makers and practitioners present their estimations. The following educational and technical aspects are considered; the child's reaction to the film; the place of the film in the teaching of various subjects; certain problems involved in the production, use and appraisal. (IBE)
371.368 (47+∞) Educational Television (USSR & Various Countries)

GEL'MONT, A.M. & POLTORAK, D.I. Televidenie v školnom obrazovaní. Moskva, Izdatel'stvo Akademii pedagogičeskikh nauk RSFSR, 1963. 135 p., fig., tabl., bibl., notes. (Institute of General and Polytechnical Education). — Report on research so far conducted in regard to educational television in the USSR and abroad. Technical progress is making it possible for an increasing number of television sets to be used in schools (8 million sets in 1962, with 120 central and 250 relay stations, in the USSR). The current seven-year period will see the installation of 100 additional central stations and several hundred additional relay stations with a corresponding increase in the number of receiving sets. A considerably extended role of television in education is thus expected.

(497.1)]

371.42 (44) SCHOOL REFORM — 379.6 (44) SCHOOL POLICY FROM THE SOCIAL POINT
OF VIEW — 373 (44) SECONDARY EDUCATION (FRANCE)
cut over several years by the education committee of the French general union of national
school teachers. Attempts at educational reform should be discussed in order to ensure
that the reform come from within, that it be integral and involve an over-all plan. On the
basis of statistics the authors examine a first aspect of the problem, namely the " explosion" of
the school population resulting from general population growth, and consider its
consequences as regards the amount of investments and the need for teachers. In order
that these consequences may be reconciled with the democratization of education it is
necessary for a reform which, based on a new concept of national education and of primary
school syllabuses and methods, affects educational guidance, the organization of secondary
education and the qualifications and training of teachers. Finally, syllabuses must be
adapted to the modern world because scientific education requires the training of a
mathematical way of thinking and that education of the masses accord with humanism
and secularism. (IBE)

371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE — 371.301 PARTICULAR THEORIES — 37 C LIFE AND WORK OF EDUCATIONISTS

CALOGERO, Giuseppe. Pedagogisti stranieri contemporanei. (Firenze & Agrigento), G. de Bono editore, (1960). 146 p., bibl. (Collana di filosofia e pedagogia, 2). — Review of all the forms assumed by the educational movement which, with the advance made by child psychology, developed under the names of new education, the work school, the activity school, etc. Theorists and practitioners have their place in this panorama, which concludes with an objective summing up of the movement, itself still at the origin of many school reforms. (IBE)
CODIGNOLA, Ernesto & CODIGNOLA, Anna Maria. *La scuola-città Pestalozzi*. Firenze, “La Nuova Italia” Editrice, (1962). xii+299 p., fig., pl., bibl. (15 p.), notes. (Educatori antichi e moderni, CLXXX). — Just after the second world war a primary school in a poor district of Florence was converted into an experimental school where the principles of the activity school and of self-government could be applied. The founders relate the life of the school, which became a “free city” governed by laws that everybody, teachers and pupils, accepted. The purpose of the experiment was to give the child a sense of responsibility and provide him with many opportunities for development of his artistic and expressive as well as intellectual abilities. (IBE)

DÖPP-VORWALD, Heinrich. *Die Erziehungsslehre Peter Petersen*. Ratingen, A. Henn Verlag, (op. 1962). 109 p. — Three studies published to mark the tenth anniversary of the death of Peter Petersen, professor of educational sciences at Jena University. I. Peter Petersen’s theory of education; account of the philosophical and anthropological bases of an educational science which, deriving its value from an understanding of its object, is alone capable of leading to justifiable teaching. II. The concept of the “teaching situation” in Peter Petersen’s educational doctrine; application of the principles of practical education; aims to be achieved; resources available. III. The assumptions of an internal educational reform and the Jena Plan (conditions of effective education taking into account the contemporary development of activity methods and global teaching). In connection with the “surface” educational reforms which have been successively introduced without appreciable result in Germany since 1945, emphasis is laid on the importance of a reform such as the “Jena Plan” and of the revival of Peter Petersen’s influence after a period of oblivion and ingratitude. 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE: ACTIVITY SCHOOL
LETOUZEY, Yvonne. Ma classe en liberté. Paris, Editions du Scarabée, 1963, 206 p. (Centre d'entraînement aux méthodes d'éducation active). — Account of an experiment in the use of activity methods during two years, at a “new education” school of an international and bilingual nature in Paris, at the end of the second world war. Excerpts from the daily notes which a young teacher took on her lessons to a cosmopolitan group of 7 to 13-years-old children. The freedom enjoyed by the pupils, in encouraging discipline and perseverance, makes it possible for each to develop harmoniously and receive the maximum of life’s abundance and pleasure. The introduction of history and geography lessons shows, for instance, the effort made to open the pupils’ eyes upon the universe, to encourage and satisfy their curiosity, to develop their sensitiveness and emotions in front of the mystery and beauty of works of art. The wealth and variety of means and methods employed in order to give the young children a knowledge and love of nature, to acquaint them with culture, as well as to glance with them at philosophical and ethical problems, constitute a valuable aid for all who are concerned with education. (IBE)

371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE: NEW EDUCATION
LOURENÇO FILHO, M.B. Introdução ao estudo da escola nova. 7a ed. (São Paulo), Edições Melhoramentos, s.d. 266 p., fig., bibl. notes, ind. (Obras completas de Lourenço Filho, Volume II). — Fresh edition of a work first published in 1929. Origin and development of the “new education” movement both in its historical context and from the standpoint of changes in new conceptions concerning human ability in general and the development of the child and adolescent in particular. Analysis of the respective contributions made by biology, sociology, psychology and educational psychology in furnishing a basis for the devising of new teaching procedures; application of the latter in particular educational systems. Description and discussion of these systems. The introduction of a new system of pedagogy does not depend simply on the desire of educators for change but is linked with philosophical concepts as well as with political action and is aimed at solving different problems involved in the school programme, the educational process and the adjustment of the school to the requirements of social life. 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE — 371.30 TEACHING PRINCIPLES

TITONE, Renzo. Metodologia didattica. I. Orientamenti e problemi. Zürich, Pas-Verlag, 1963. 550 p., bibl., ind. (Enciclopedia delle scienze dell’educazione, 12). — Combined representation of two works ("I problemi della didattica", 1956 and "Metodologia della scuola moderna", 1957) tracing the main lines taken by contemporary education. History of "new education"; methods in which the pupil is promoted to principal "agent"; systems based on the socialisation of education. An analysis of general educational problems leads to a discussion concerning the teacher, who is the fundamental guarantee of effective education. (IBE)

371.44 (47) SYSTEMS DISTINGUISHED BY THEIR SOCIAL TENDENCIES: POLYTECHNICAL INSTRUCTION (USSR)

MONOSZON, E.I. & SKATKIN, M.N. (Ed.). Sovetskoe obuchenie s zhim"ju v vos’miletnej škole. Moskva, Izdatel’stvo Akademii pedagogičeskich nauk RSFSR, 1962. 407 p., tabl., bibl. notes. — Collective work intended for teachers and administrators of eight-year general education schools. Account of the guiding principles of the "connection between education and life". Discussion of the actual problems raised by this contact with the country’s political and social life, by the work at enterprises and by scientific progress. Consideration of the ethical aspects of this system of education. (IBE)

371.44 (430.3) SYSTEMS DISTINGUISHED BY THEIR SOCIAL TENDENCIES: POLYTECHNICAL INSTRUCTION — 375.9 (430.3) TECHNIQUES TAUGHT AT SCHOOL (GERMAN DEMOCRATIC REPUBLIC)
Polytechnical instruction and education in the German Democratic Republic. Berlin, Volk und Wissen Volkseigener Verlag, 1962. 111 p., fig., tabl. — Abundantly illustrated account, in four languages (German, Russian, English and French), of the role and different stages of polytechnical instruction in the German Democratic Republic. The principle involved: the school linked with life, polytechnical instruction linked with the vocation. The aim: education within the context of the socialist state, comprehensive training of youth. The present publication shows how the industrial enterprises and agricultural producers’ cooperatives are becoming, alongside the schools, new centres of education and instruction. (IBE)
purely theoretical. Discussion of the school's educational task and the meaning of Maria Montessori's work. Acquisition of knowledge and the ability to apply it. Fruitful results of individual teaching; obstacles encountered; current objections refuted. Need to make use of so-called "sensitive" phases. Sense perception (including exercise of it) and self-control, both depending on freedom and the spontaneous submission to physical laws. Acceptance of real authority. (IBE)

371.461 RUDOLF STEINER SCHOOLS
DÜRR, Otto. Ist gehorchen so schwer? Fragen der Gehorsamserziehung in Elternhaus und Schule. Stuttgart, Ernst Klett Verlag, (cop. 1962). 112 p., bibl. — Psychological and, above all, practical study on the question of obedience, together with the results of an inquiry conducted among two hundred boys and girls of various ages, etc. Nature and importance of obedience; education for obedience as education for freedom; positive and negative influences; how to strengthen the will to obey; power of the father's and the mother's example; obstinacy more noticeable in intelligent children; assistance to be given to the young during critical phases of their development. According to the author, an absence of belief in God engenders in men lack of confidence, which accounts for most of today's worries in this connection. (IBE)

MÜLLER-ECKHARD, Hans. Erziehung ohne Zwang. Kritik der Wunschbild-pädagogik. Mit einem Gesprächsbeitrag von Gustav Siewerth. Freiburg i.B., [etc.], Herder, (cop. 1962). 104 p., bibl. notes. (Das pädagogische Gespräch, Aktuelle Veröffentlichungen des Willmann-Instituts, München-Wien). — Criticism of the education based on "accepted fables", showing the errors which may result from conventional ideas about the family, religion, science, etc. Such errors and the misuse of authority by parents and educators who resort to threats and coercion are at the origin of nearly 90% of the disturbances noted by the psychiatrist among the adolescents to be treated. (IBE)

AMREIN, Maria Winfrid. Die aktive Verantwortung des Zöglinges im Mädcheninternat. Freiburg (Schweiz), Universitätsverlag, 1963. 196 p., fig., tabl., bibl., ind., app. (Arbeiten zur Psychologie, Pädagogik und Heilpädagogik, Band 20). — Inquiry concerning the sense of responsibility among girls at boarding schools and intended to elucidate a certain conflicting influences (restraint versus freedom, freedom versus discipline, individual freedom, etc.) characteristic of this type of establishment. Regarding their desire for independence several hundred girls were systematically questioned by the psychologist in an endeavour to determine, with the aid of a parallel inquiry conducted among the teachers, whether the boarders should be granted "self-government". The author describes his method of investigation, critically discusses "self-government" and analyses its social implications as well as its suitability for boarding schools. (IBE)

MISSISSIPPI. UNIVERSITY. The Educational Film Production Department. Audio-visual aids for student council education. Mississippi, Extension Division of the University, s.d. 141 p., fig., tabl., app. — Report on an investigation carried out with the ultimate aim of improving the education for citizenship provided at American schools. The method of having "student councils", enabling the students to take part in the proper
running of the school, has proved particularly effective in regard to character training for young citizens. The present study is concerned with the employment of audio-visual aids and with their contribution to the work of the student councils. The following were the objectives of the researchers: (a) to draw up a list of the existing audio-visual aids which may help with the training of student council members; (b) to have such aids evaluated by leaders of student groups, by faculty advisers and by specialists in audio-visual education; (c) to find how far the existing material is understood and employed by educators; (d) to seek suggestions from teachers and students both for the improvement of existing material and for the production of new films; (e) to draw up a list of concrete proposals based on the findings. ODIER-DOLLFUS & LÉANDRI, Françoise. La santé de l’enfant à l’école maternelle. [See 371.71]
KYÖSTIÖ, O.K. Oppilaiden terveydentilan riippuvuus koulutyypistä. Health status of pupils according to type of school. Jyväskylä, Jyväskylän yliopistoyhdistyksen ja kasvatusopillisen korkeakoulun kustantama, 1962. 78 p., tabl., bìbl. (English summary) (Jyväskylä Studies in Education, Psychology and Social Research 1). — Research intended to determine whether there is any difference in state of health between children who have taken the course at secondary schools and those who have completed their compulsory education in upper classes of elementary schools in Finland. It is noted that although the elementary school children belong to less privileged social classes their general health differs very little from that of secondary school pupils, mainly due to the standard of the health services at elementary schools. Furthermore, it was found that physical development of children attending elementary schools is slower than that of secondary school pupils as in the case of the latter (boys and girls) the spurt in growth which is related to puberty begins earlier. (IBE)

ODIER-DOLLFUS & LÉANDRI, Françoise. La santé de l'enfant à l'école maternelle. A l'usage des institutrices des écoles maternelles, des classes enfantines et des cours préparatoires, [etc.]. Pa.-s., Librairie Armand Colin, (1963). 217 p., fig., pl., bìbl. (Collection Bourrelier, Cahiers de pédagogie moderne). — For protecting the child’s health it is necessary to find ways of ensuring his development under the best conditions (care in regard to growth, nutrition, breathing, etc.). At present the means of protection are ever increasing due to progress in medicine, education and the technical equipment of school premises. This book on health is intended mainly for nursery school teachers and describes the child’s development from the age of 2 to 6 years and the illnesses which may affect him. Principal events which determine his life in the nursery school. Suggestions to enable the problems of each situation to be dealt with so that the child’s health may be safeguarded, kept intact or restored. (IBE)

BRATISLAVA. INSTITÚTU TELESNEJ VVCHOVY A ŠPORTU. Fakulty Univerzity J.A. Komenského v Bratislave. Za výuku telesnej výchovy. II. 1961. Bratislava, Slovenske Pedagogické Nakladateľstvo, 1961. 287 p., fig., tabl., bìbl., Russian and German summaries). — Twelve collected articles dealing with physical education (theory and practice) in Czechoslovakia and arranged according to their connection with the following four topics: (1) ideological basis and present development of physical education; (2) techniques of various sports (running, jumping, volleyball, balancing, skiing, throwing the javelin, etc.); (3) practical aspects in the school setting (schoolchildren’s interest in sport, camps in the open air); (4) training of sports and physical education instructors. WOOD, Alfredo. Gimnasia y recreación en la escuela primaria. 3a ed. Buenos Aires, Editorial Kapelusz, (1961). x+242 p., fig., tabl., bibl. — Third edition of a guide on the implementation of the programme in physical education at primary schools in Argentina. Detailed explanation of the different methods employed. Account of the effects which each movement has on the development of the different parts of the body. School games as part of physical education. Steps, dances and exercises which can be used as basic preparation for school festivals and celebrations. (IBE)

371.73 PHYSICAL EDUCATION

ZAMPORI, Giorgio. Ginnastica educativa. Guida pratica per gli insegnanti elementari e gli allievi degli Istituti magistrali. 2a. ed. (Brescia), “La Scuola” Editrice, (1960). 176 p., fig., tabl. — Practical guide for teachers of classes at lower and upper primary level. Role of gymnastics in the prevention of illness and certain disorders due to the sedentary life at school and in maintaining a correct balance between the child’s mental and physical health. From the theoretical point of view the author’s aim is uniformity in gymnastics teaching in conformity with the current official curriculum and with the advice of E. Baumann and G. Monti who established the scientific, educational and technical bases of school gymnastics. Practical account of imitative gymnastics, group exercises (in the classroom and in the open-air) and various games. (IBE)

371.732 SPORTS

BERNHARD, Gunter. Leichtathletik der Jugend. II. Eine Übungs- und Bewegungslehre für die fortgeschrittene Jugendarbeit. Wien & Munchen, Österreichischer Bundesverlag für Unterricht, Wissenschaft und Kunst, (1961). 151 p., fig., tabl., bibl., notes. (Thorie und Praxis der Leibesübungen, Schriftenreihe der Bundesanstalten für Leibeserziehung, Heft 19). — Teacher’s guide for instructing in field athletics. By placing athletics above the idea of competition and record making, the “global” method described is intended to help young people acquire through such instruction a social development and a harmonious sporting outlook. Discussion of the physical, technical, psychological and educational conditions necessary for effective physical education. Many illustrations of athletic exercises. (IBE)

371.732 SPORTS — 376.7 ADOLESCENCE

371.735 PLAYGROUNDS — 371.303 ROLE OF PLAY — 37 B HISTORY OF EDUCATION

AICK, Gerhard. Die Befreiung des Kindes. Kleine Kulturgeschichte des Spiels und des Kinderspielplatzes. Hamburg, Hans Christians Verlag, s.d. 77 p., fig., pl., bibl. — After reflecting throughout history, at first art and philosophic thought, then pedagogy and psychology, certain writings, hopes and experiments have finally resulted in the provision of playgrounds where “modern Robinsons can set free their imaginations”. These spaces range from the simple garden with modest equipment to the systematic Anglo-Saxon, Scandinavian, Swiss or German installations. Provided that they correspond to the child’s world and that educators, architects and town planners collaborate in designing them such gardens and play equipment have their place among up-to-date educational means. (IBE)

371.75 (73) SCHOOL HEALTH SERVICE (UNITED STATES)

CROMWELL, Gertrude E. The nurse in the school health program. Philadelphia and New York, W.B. Saunders Co., 1963. 126 p., fig., bibl., ind., app. — In 1902 a New York school for the first time engaged a nurse to supervise the pupils’ health. Since then there has been development in the provision of school services responsible for hygiene, medical inspection, etc. and today, regarded as essential for ensuring the safety of children and the community, they employ over 11,000 permanent or visiting nurses. Information on how their work is organized and how it is related to that of other health specialists or services as well as on the way in which these nurses cooperate with teachers and fulfill an intermediary role between the schools and the community, etc. (IBE)

371.82 THE CHILD AND THE SCHOOL — 377.9 AID FOR THE YOUNG — 373.1 (430.2) SECONDARY GENERAL CULTURE EDUCATION (FEDERAL REPUBLIC OF GERMANY)
FRANKE, Hans & GUNTHER, Friedrich. Der Daseinkampf beginnt in Sexta. Unsere Kinder zwischen Schule und Wohlstandsgesellschaft. (Oldenburg/Hamburg), Gerhard Stilling Verlag, 1962. 221 p., app. — Discussion of what appears to be the most serious crisis of the century in education. On all sides it is claimed that the school is no longer ensuring the elementary education of the young: one pupil out of three is obliged to take private lessons; one out of four in the 6th class resorts to sedatives or stimulants; approximately a thousand schoolchildren commit suicide every year in the German Federal Republic. The number of enrolments at upper secondary schools has increased alarmingly and unfortunately the aptitude for education at this level is not manifested in the same proportion. An account of some actual case histories of young people illustrates this criticism of the present education system, criticism based among other evidence on the results of an achievement test conducted among 500 pupils in upper classes at secondary level. 371.824 SOCIOMETRY AND EDUCATION
ZABOROWSKI, Zbigniew. Psychologia społeczna a wychowanie. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 196 p., fig., tabl., bibl., notes. — Research concerning social psychology in its relation to education. The major part of this study is devoted to the concept of the social group consisting of school classes.
Examination of such concepts as popularity, preference, polarisation, etc. with emphasis on the role of recognised educators and of those possessing similar influence (group leaders, outstanding individuals). An explanation of the beginnings and development of “the public opinion” distinguishing a group is followed by a description of suitable methods and techniques for identifying the specific characteristics of the social group.

371.825 JUDGMENTS AND ATTITUDES OF CHILDREN WITH REGARD TO THE SCHOOL
BARANKIEWICZOWA, H.; LEWIN, A. & PELCOWA, M. Wychoowawca gromadzi materiały o klasie. [See 371.267]

371.85 COLLECTIVE ACTIVITIES AT SCHOOL (POLAND)
WAWRZYKOWSKA-WIERCIOCHOWA, D. Świetlice dla uczniów. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1963. 304 p., fig., notes. — Account of the organization and activities of school clubs: arrangement and decoration of the premises; games and entertainments; artistic activities; dramatic performances and the making of costumes and scenery; drawing, painting and modelling; singing, dancing and music; handwork; film showing; out-of-school study; the club journal; description of the work plan and method. (IBE)

371.86 (438) SCHOOLCHILDREN’S LEISURE (POLAND)
CHMIELIŃSKA, Irena (Ed.). Pedagogika podświetła. Warszawa, Towarzystwo “Dziękuję dzieci”, 1963. 304 p., fig., tabl. — The leisure of children who are left more or less to themselves, outside the school, raises many problems whether in regard to premises, equipment or, particularly, staff. Highly appreciated activity is undertaken by the “Children’s Friends”, the Social Welfare Association and district teams in order that children who play in yards or in the street may be attached to a local centre which provides friendly and effective supervision and is able to organize “self-government” and influence the games in such a way that these may be entertaining and not degenerate into reprehensible pastimes. Account of the absorbing and difficult work performed in many Polish localities; suggestions for effecting a remedy of the inadequacies mentioned. (IBE)

371.86 SCHOOLCHILDREN’S LEISURE — 371.866 VARIOUS GAMES — 377.26 EDUCATION FOR LEISURE
GUILLEN, E. Loisirs d’aujourd’hui. Jeux et activités pour les loisirs familiaux et amicaux. (Paris), Presses d’Ile de France, (1964). 217 p., fig., bibl. — List, accompanied by illustrations, of leisure-time activities and games. After some suggestions concerning the value and interest connected with organizing of leisure this small guide deals with audio-visual media (television, radio, films, photography, screening, gramophone records) and shows how intelligent use may be made of such techniques. One chapter on evenings and visual entertainments offers suggestions for many kinds of meeting, while another is devoted to activities for young children between one and ten years old. (IBE)

TAVARES, Denise Fernandes. Sugestões para organizaçãã o dumã pequena biblioteca infantil. 2a. ed. revista. Salvador-Bahia, Biblioteca Infantil Monteiro Lobato, 1960. 146 p. + 7 pl., fig., tabl., bibl. — Explanation of the purposes and value of a children’s library. General matters and internal organization; technical considerations in regard to the operation (register, cataloguing, classification of the volumes in the shelves and on cards, lending service). The book is amply illustrated. (IBE)

371.862 CHILDREN’S LITERATURE
CUTFORTH, J.A. & BATTERSBY, S.H. Children and books. [See 371.391]
371.862 CHILDREN'S LITERATURE — 37 E REFERENCE BOOKS

371.862 (47) CHILDREN'S LITERATURE (USSR)

O literature dlja detej. Series 7. Leningrad, Gosudarstvennoe izdatel'stvo detelek literatury Ministerstva prosvetjenija RSFSR, 1962. 215 p., bibl. notes. — Collection of critical articles on children's literature; defence by two teachers, S. Marchak and K. Tchoukovsky, as regards works in the Russian language; review of recent works (1961); critical appraisal of the dogmatic school which, moralising and instructing, dominated children's literature until about 1955. (IBE)

371.862 CHILDREN'S LITERATURE

MESSINER-MININI, Maria. Von der Spieelecke zur Schulbank. [See 376.5]

371.862 CHILDREN'S LITERATURE

371.862 CHILDREN'S LITERATURE — 377.4 AESTHETIC EDUCATION

POLOZLOVA, T. D. (Ed.). Kniga - učitel' i drug. Moskva, Izdatel'stvo Akademiî pedagogičeskîh nauk RSFSR, 1962. 176 p., bibl. notes (Institute of Aesthetic Education). — Six collected articles on the importance and the artistic and educational value of out-of-school reading. Although the authors do not express the same views about the books they analyse they agree on the essential truth that only a work of high aesthetic value and conforming to the requirements of the young reader's age can be a spiritual teacher and encourage creative ability. (IBE)

371.862 CHILDREN'S LITERATURE

RUTT, Theodor. Sprachentaltung und Buch. [See 375.12]

371.862 CHILDREN'S LITERATURE

STEJSKAL, Václav. Cesty současné literatury pro děti. Praha, Státní nakladatelství dětské knihy, 1960. 84 p. — Discussion dealing with the trends and features of today's literature for children and with the qualities which it should foster. The transpositions made by authors for child readers must certainly not just reflect the thinking of adults. It is consequently necessary to exploit both the educational role of the fable and the interest which for young readers is possessed by stories having the child as centre of action. A good children's book should extol qualities opposed to egocentricity without moralising or becoming too abstract. Not only the actual facts of life but also fiction can constitute an abundant source of education, poetry and optimism. (IBE)

371.863 (46) CHILDREN'S PERIODICALS

VAZQUEZ, Jesús María. La prensa infantil en España. (Madrid), Doncel, (1963). 202 p., tabl., bibl. — A historical analysis from the social aspect of children's periodicals in Spain shows the need for thorough, sincere and disinterested review of the commercial motives underlying the publication of children's papers which, apart from a few exceptions, do not satisfy standards as they should. Spanish legislation concerning children's periodicals, although it may be inspired by the most candid respect for the country's traditions, has so far certainly not been applied. After discussing various aspects (religious, moral, psychological, educational, social, literary, artistic) of such publications the author enumerates the principles which in all cases should be observed in the publication of periodicals for children: appropriateness to age and sex; ideological aspect; technical aspect, etc. Suggestions for a programme of action to improve children's periodicals in Spain. (IBE)
371.864 ENTERTAINMENTS FOR THE YOUNG — 621.388 TELEVISION — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

ASSOCIATION CATHOLIQUE INTERNATIONALE POUR LA RADIO-DIFFUSION ET LA TÉLÉVISION. TV: Code et commentaire à l'usage des éducateurs, Fribourg (Suisse), Editions UNDA, (1951). 126 p., fig. — "Code" intended for parents and other educators who in the home, boarding school, classroom, hospital, sanatorium or youth centre, make use of television but who wonder whether it deserves a place among teaching techniques or if it should be considered solely in connection with leisure. Discussion dealing first with the Church and the techniques of dissemination, then with the following matters: (a) norms dictated by the child's age; (b) norms regarding the duration of the listening and viewing; (c) optimum conditions for listening and viewing; (d) parents' role in TV reception; (e) parents' role in regard to TV "producers". (IBE)

371.864 (73) ENTERTAINMENTS FOR THE YOUNG — 621.388 (73) TELEVISION — 37 P (73) RESEARCH AND INQUIRIES (UNITED STATES) — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

GARRY, Ralph; RAINSBERRY, F.B. & WINICK, Charles (Ed.). For the young viewer. Television programming for children... at the local level. New York & London, McGraw-Hill Book Co., (1942). v+181 p., fig., bibl., ind. — Based on existing knowledge in the fields of psychology and children's development (their persons, interests, needs and activities) as well as on recent television techniques, this detailed inquiry conducted by the United States Television Information Office gives a description of 425 television programmes broadcasted for children by 223 local American stations. Recommendations for improving and selecting children's programmes while ensuring a good educational basis. (IBE)

371.9 (493) PARTICULAR CATEGORIES OF CHILDREN (BELGIUM) — 379.61 THE RIGHT TO EDUCATION. COMPULSORY SCHOOLING.

BATON, Pierre. Inadaptes scolaires et enseignement special. Bruxelles, Universite Libre de Bruxelles, Les Editions de l'Institut de Sociologie, (cop. 1962). 261 p., tabl., bibl., notes. (Etudes de sociologie de l'éducation). — The right to education does not concern only normal children but handicapped children as well, the "school misfits" as the author prefers to call them. This critical and well documented study on the legislation regarding special education in Belgium shows that mere legal provision, or even more adequate financial provision, is not sufficient to bring about the social adjustment and integration of the handicapped. There is a need for education of an affective, intellectual and vocational nature, which calls for "the understanding and collaboration of all men of good will". Statistical tables and an extensive bibliography of works of different countries complete the documentation. (IBE)

371.9 (71) PARTICULAR CATEGORIES OF CHILDREN — 371.199 (71) EDUCATORS OF HANDICAPPED CHILDREN (CANADA)

MONTREAL. LE CONSEIL DES EUVRES. L'enfance exceptionnelle. Mémoire présenté à la Commission royale d'enquête sur l'éducation. Montreal, Conseil des Euvres, 1962. 346 p., bibl. — Detailed description of various categories of exceptional children and their handicaps in order to draw attention to the specific problems concerning them which result from the right to education for all children, both normal and handicapped. It should be possible to overcome the social injustice existing in this connection in Quebec by the adoption of five essential measures as proposed in the present report: (1) drawing up of a programme of general and vocational education suitable for exceptional children; (2) establishment of adequate psychological and medico-pedagogical services; (3) training of educational personnel qualified to direct special institutions; (4) administrative reorganization in accordance with the characteristics of exceptional children; (5) provision of means for financing special education. (IBE)

371.9 PARTICULAR CATEGORIES OF CHILDREN

ROUCEK, Joseph S. (Ed.). The unusual child. New York, Philosophical Library, (1962). vi + 293 p., bibl., ind. — Discussion concerning the various categories of unusual child (intellectual superiority, physical, mental or moral defect, emotional or behaviour problem, etc. including cases involving life in a special institution) from the standpoint of the implications of a social, educational or family nature. How to identify and diagnose such cases at the earliest age? What are the latest theories and procedures available to remedial education in order that these children may be rehabilitated with a view to their social integration? Consideration of the preventive and therapeutic steps taken by society in order to avoid such cases: education of parents; training of specialist teachers and educators; provision of social services and community institutions; importance to be given at government level to vocational guidance and training for the crippled, the mentally retarded and the maladjusted in general. In conclusion a picture is presented of the preventive measures taken in Europe regarding the exceptional child. (IBE)

371.90 HANDICAPPED CHILDREN

BENFENATI, Armando. Psicologia e pedagogia degli anormali. Urbino, Armando Argalia Editore, (1961). 285 p., bibl. (Collana "Saggi di Pedagogia"). — In this book the term "abnormal" includes not only the mentally weak and the socially maladjusted but also persons afflicted with physical defects (the blind, deaf-and-dumb, handicapped in movement, etc.). In each of these cases consideration should be given to all the possibilities now offered by education in order to assist both in the process of adjustment to normal life and social rehabilitation (intellectual, moral, physical education, etc.). Reference is also made to the aid which psychology can furnish and to the major influence exerted by the family and the environment. (IBE)

371.90 (42) HANDICAPPED CHILDREN — 37 B (42) HISTORY OF EDUCATION (UNITED KINGDOM)

PRITCHARD, D.G. Education and the handicapped 1760-1960. London, Routledge & Kegan Paul; New York, Humanities Press, (1963). viii + 250 p., bibl., ind. (International Library of Sociology and Social Reconstruction). — Historical development in England and Wales, from 1760 to 1960, concerning handicapped children and which have resulted in transforming the "asylum" — the first type of institution for deaf-and-dumb children — into a "school" and the instruction into education. First schools; experiments; methods of teaching the blind to read; improvement in education of the mentally weak and physically handicapped child; State intervention; present situation. (IBE)

371.90 HANDICAPPED CHILDREN — 371.95 SPECIALLY GIFTED CHILDREN — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 37 P (73) RESEARCH AND INQUIRIES (UNITED STATES)

TRAPP, E. Philip & HIMMELSTEIN, Philip (Ed.). Readings on the exceptional child. Research and theory. London, Methuen & Co., (1962). xii + 574 p., fig., tabl., bibl., ind. (The Century Psychology Series). — Some fifty collected articles, by different authors, on the present state of research, theoretical study and practical endeavours in connection with the education of children other than those considered as "normal". The articles relate to the following matters: intellectual development (the mentally handicapped and the specially gifted); sensory and motor development (the deaf-and-dumb, the blind, children suffering from language difficulties or poor motor control, cripples); emotional development (schizophrenic and psychic cases, etc.). (IBE)

371.911 (45) SIGHT DEFECTS (ITALY)

L’Istituto Regionale “Giuseppe Garibaldi” peliech. Nel 75° annuale della sua fondazione. Reggio Emilia, Tipografia editrice Guidetti, s.d. 250 p., fig., bibl. — Publication to mark the 75th anniversary of the setting up of the Giuseppe Garibaldi Institute for the Blind at Reggio. Review of the institute’s history from the foundation, originally due to private initiative. Reference is made to the originators, founders and benefactors of the school provided for blind and amblyopic children from kindergarten age to that of apprenticeship. Short account of the school’s programme and discussion of its features (physical guidance, teaching of drawing, the visual arts, etc.). (IBE)

371.911 SIGHT DEFECTS — 371.912 HEARING DEFECTS

371.912 HEARING DEFECTS — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

BOSKIS, R.M. Gluhie i slabolily§altie deti. Moskva, Izdatel’stvo Akademii pedagogickeskikh nauk RSFSR, 1963. 335 p., fig., tabl., bibl. (16 p.). (Institute for the Study of Deficiency). — Study on the psychic state of children who are deaf or hard of hearing. The purpose was to determine the special type of education which corresponds to the characteristics possessed by the cognitive activity in each category of deaf person, since hearing defects are different in the case of the child and the adult. Research relating to the rules governing language development makes it possible to offer certain evidence concerning the causes of the so-called illogical language of the deaf-and-dumb. The data, which is accompanied by a discussion of mimicking and gestication, may help with the establishment of criteria resulting in a wiser classification of the children examined. (IBE)

371.912 HEARING DEFECTS — 371.913 SPEECH DEFECTS — 371.92 MENTALLY HANDICAPPED — 37 N (47) CONFERENCES (USSR)

pants discussed the subject of education by work combined with the different school subjects, the teaching of which is suitably adapted to the various types of case showing anomaly. The papers presented are arranged under three headings: speech education; education of the deaf. 

D'JACKOV, A.I. (Ed.). Surdopedagogika. Moskva, Izdatel'stvo Akademii pedagogicheskikh nauk RSFSR, 1963. 335 p., tabl., notes. (Institute for the Study of Deficiency, The Teachers' Educational Library). — Textbook on deficiency and intended to serve also as a practical guide for future teachers and educators engaged at establishments for children who are deaf or hard of hearing. Various theoretical aspects connected with the education of the deaf; description of the highly differentiated methods now employed; recommendations concerning the teaching staff, administration and management of such special establishments. 

JUSSEN, Heribert. Die Erschliessung des verbalen Denkkreises im Taubstummenunterricht. Ratingen, Aloys Henn Verlag, (cop. 1961). 163 p., fig., bibl., notes. — How may the world of spoken thought be opened to the deaf-and-dumb? Examination of the problem from the standpoint of linguistics, language psychology and special education. An endeavour to find a minimum of word forms to constitute an elementary language for the use of the deaf-and-dumb. Inability to speak is mainly responsible for their behaviour difficulties and adjustment problems. It is thus essential for them to know the mental equivalence of the language in order that they may be emancipated as far as possible by being admitted into the world of the thought and action of those who hear. The systematic study of the mother tongue — German in this case — represents an undoubted progress in making it possible for new procedures to be employed. 

of Deficiency). — Work intended for teachers and doctors who are concerned with children suffering from hearing difficulties. Theoretical matters are explained and practical advice given with a view to improvement in the teaching received by this type of handicapped. (IBE)

371.92 Mentally Handicapped

PINSKU, B. I. Psihološke osobennosti deččestvo umstvenno otstalih škol’nikov. Moskva, Izdatel’stvo Akademii pedagogičeskikh nauk RSFSR, 1962. 319 p., fig., tabl., bibl. (19 p.). — Peculiarities of the mental activity (structure, motivations and dynamics) of mentally handicapped children. Ignorance of these peculiarities results in inability to organize rationally the activity of the backward. This is why it is essential that individual characteristics be studied more thoroughly. The analysis and interpretation of the facts mentioned naturally refer to pupils who are more or less able to follow the courses at special schools. (IBE)

371.92 (o) Mentally Handicapped (various countries)

SCHONELL, F. J.; McLEOD, J. & COCHRANE, R. G. (Ed.). The slow learner. Segregation or integration. St. Lucia, University of Queensland Press, 1962. vii + 92 p., fig., tabl., bibl. — Collection of articles by prominent educators and psychologists in several countries (Australia, Canada, Denmark, Japan, Netherlands, New Zealand, Sweden, United Kingdom, United States, USSR) concerning mentally handicapped pupils and the problems raised by their integration in the ordinary schools or their segregation. Each contributor expresses his opinion on the question and describes the current tendency in his country. The points of view — integration or segregation of the mentally handicapped child — are presented without any definite stand being taken for one or the other. The various articles consider the provision of special classes within the ordinary school and their influence on the slow learning child’s adjustment to school, the provision of special schools and the education of the mentally handicapped. (IBE)

371.93 Morally Handicapped — 377.911 Problem Children — 37 N (493 + 44 + 43.59) Conferences (belgium, france & luxembourg)

BRUSSELS. CENTRE D’ETUDE DE LA DELINQUANCE JUVÉNILE. La délinquance juvénile et l’école. Colloque des 11 et 12 mai 1962. Bruxelles, C.E.D.J., 1963. 159 p., ind., app. (Publication No. 11). — Account of a colloquy of teachers and psychologists gathered together for study of the problems relating to thefts committed at school or outside it by young delinquents. Characteristics of the thefts (age, sex, social background and personality of the young thieves, public opinion, reactions of the guilty child and his parents, etc.). What is the school’s responsibility in the process leading to crime; its role in the early detection of delinquents and future delinquents; the contribution of education institutions in combating juvenile delinquency, etc. (IBE)
371.93 Morally Handicapped — 616.89 Psychiatry

Gibbens, T. C. N. Psychiatric studies of Borstal lads. With the assistance of A. Marriage & A. Waiker. London, [etc.], Oxford University Press, 1963. 230 p., fig., tabl., ind. (Institute of Psychiatry, Maudsley Monographs, No. 11). — Study on psychology and forensic psychiatry in relation to delinquents 17 to 21 years of age, all from the London area and consigned to Borstal institutions. The object of the study was to obtain material for research and comparison statistics on criminal predispositions, (motives and activities, criminal records, case histories, etc.) and to show that in order to establish a prognosis of such cases, it is necessary to supplement psychiatric diagnosis with clinical data of a psychological nature concerning the deviations of personality. The author proposes to follow up subsequent convictions of the offenders, if possible during some years, in order to find what mental abnormality can reveal in regard both to early recidivism and to the recruitment of hardened criminals. (IBE)

371.93 (438) Morally Handicapped (Poland)

Jedlowski, Stanislaw. Nlelatw z zakadach poprawnych. (Warszawa), Wiedza Powszechna, 1962. 310 p., tabl., bibl., notes. (Sygnały). — Study of a psychological and sociological nature concerning the influence exercised by reformatories on young delinquents at the different stages of detention (arrest, inquiry, sentence, punishment). The emotional shocks and injuries suffered by these young people warps their judgment and distorts their conceptions of life. Educational steps should not be confined to "straightening" but should limit the damage and compensate it with a view to social rehabilitation. In re-education the role of art, sport and visual entertainments cannot be underestimated, although nothing can substitute human understanding. (IBE)

371.93 Morally Handicapped — 301 Sociology — 37 P (44) Research and Inquiries (France)

Michard, H. et al. La délinquance des jeunes en groupe. Contribution à l'étude de la société adolescente. [Paris], Editions Cujas, 1963. xvi+327 p., fig., tabl., bibl., notes (Sygnali). — Comprehensive study, descriptive rather than explanatory, conducted with the cooperation of the police services throughout France, on juvenile delinquency of a group character. The analysis of delinquent adolescent society is made in a sociological or psycho-sociological context and the youth involved are considered neither as a myth nor an idol but as a social reality. The cooperation of the police services made it possible to broaden the field of investigation and seek the factors responsible for these groups of young people and for the punishable acts of which they are guilty. (IBE)

371.93 (73) Morally Handicapped (United States)

Neumeyer, Martin H. Juvenile delinquency in modern society. Princeton (N.J.), [etc.], D. Van Nostrand Co., (1961). xi+426 p., bibl., ind., notes. (The Van Nostrand Series in Sociology). — Description and discussion of the problem of juvenile delinquency such as it exists in our constantly changing modern society. Extent of the problem in the United States; the trends, the factors by which the delinquent's behaviour is determined, the means of detection and the social supervision in that country. For the purpose of comparison several references are made to differences in conception and in the amount of delinquency in other countries as well as to the efforts made for dealing with the problem. (IBE)

371.93 (73) Morally Handicapped (United States)

Weber, George H. Problems in changing programs in institutions for delinquent children. (Washington), U.S. Dept. of Health, Education, and Welfare, 1962. 40 p., bibl. (Children's Bureau Publication No. 397-1962). — The misunderstandings in such institutions between the "parents", the teachers, the superintendent and the newly introduced psychologist and social worker are examined under their various aspects, showing how difficult it is to apply new methods and to create an atmosphere favourable to indispensable cooperation. (IBE)

371.93 Morally Handicapped — 377.91 Medico-psychological and Educational Aid

Zierl, W. Kindliche und jugendliche Diebe in Erziehungsaufgaben und Gutachtenpraxis. Friedmann, A. Bemerkungen zum Problem dissozialer Fehlhaltungen und
Analysis of seven cases of stealing in children and adolescents, stressing the motivation and symbolism of these acts. Detailed results of the tests used in the course of each treatment (Behn-Rorschach, Z Test, tree test, Duss fables, Binet-Simon test, etc.) followed by general remarks (by A. Friedmann) on asocial behaviour, its diagnosis and treatment. Family or social pressure is often an unsuitable means. In these cases the effect of adult morality is to make outcasts out of young delinquents to the prejudice of their adequate re-education. (IBE)

TORRANCE, E. Paul (Ed.). Creativity. Proceedings of the third Minnesota Conference on gifted children, October 10-12, 1960. Minneapolis, University of Minnesota, Center for Continuation Study, 1961. 185 p., tabl. bibl., app. (New Educational Ideas). — In view of the fact that gifted children represent an intellectual potential of great value to the national economy and culture the conference proposed the setting up of a special institute for them. This institution would have the task of detecting talent in children early with a view to providing them with an education enabling best use to be made of their exceptional gifts. (IBE)

TORRANCE, E. Paul. Guiding creative talent. Englewood Cliffs (N.J.), Prentice-Hall, (1963). xi+278 p., fig., tabl., bibl. (16 p.), ind., app. — Experimental research has only recently become concerned with the mind's creative activity as such. The "Minnesota tests of creative thinking" have made it possible to identify systematically a number of characteristics which distinguish invention from other mental activity. After dealing with the psychology relating to creative imagination and with the aims and methods of the tests (details of their application being given in the appendix) the author furnishes by way of example the most recent data in regard to: (a) the factors involved in invention; (b) the stages in its development and the danger that the child may stifle his inventive talent, even perhaps at kindergarten age; (c) the social, emotional and character problems caused not only by the particular nature of creative expression, which separates the in-
ventive child from those of his own age, but also by repression due to coercion or to wrong handling of his desire to create and which leads him either to withdraw within himself or perhaps to the state of schizophrenia. Recommendations concerning the training and qualifications of educators for all schooling levels, but particularly of school administrators and counsellors, in order that the creative talent of the exceptionally gifted child may be preserved and put to advantage. GEORIS, Pol. Essai d'acclimatation par l'enseignement primaire au Congo. Bruxelles, Edition CEMUBAC, 1962. 148 p., fig., tabl., app. (Centre scientifique et médical de l'Université Libre de Bruxelles en Afrique centrale, LIX). — On the assumption that education plays an important role in acculturation, that is "the acquiring of a culture which is produced by the combination of elements belonging to two cultures present", the author examines the structural composition of education in the Congo (Leopoldville). He endeavours to identify the factors involved (the unstable situations in the Congo since the turn of the century, the knowledge of an educational, social and cultural kind, the physical and psychological development of the African) and suggests ways of reducing the lack of balance found and of improving the education. Experimental study concerning curricula and methods; assessment of the different levels of study; educational organization. Examination of the obstacles to educational development (physical problems, traditional beliefs, maternal education) and of problems of a cultural, political, administrative, economic and social nature as well as that of the importance to be given to education. (IBE)

PETERSEN, Dorothy G. & HAYDEN, Velma D. Teaching and learning in the elementary school. New York, Appleton-Century-Crofts, (1961). xv + 538 p., fig., tabl., bibl., ind. — Guide intended to give the elementary school teacher assistance by bridging the gap which is often found between educational theory and its practical application. Comprehensive account of elementary education in the United States. Historical outline of the American elementary school’s development, aims and methods. Detailed suggestions, together with examples of lessons, for the teaching of the various curriculum subjects. Procedures for assessment of pupil achievement. (IBE)

372.1 PRIMARY TEACHING METHODS — 370.46 EDUCATIONAL PSYCHOLOGY

SCHMIDT, Wolfgang. Neuzeitliche Volksschularbeit. Unter besonderer Berücksichtigung ganzheits- und gestaltpsychologischer Erkenntnisse oder Versuch einer psychologische Didaktik. Ratingen bei Düsseldorf, A. Henn Verlag, (cop. 1962). 108 p., fig., bibl. — Work dealing with the psychology of pedagogy and based on eleven years’ systematic practical experience at the Worms Higher School of Pedagogy. Theory and practice in school work adapted to the new concepts of education and taking into account the psychology of the whole (Ganzheitspsychologie) and the psychology of form (Ge-staltpsychologie). The child mind considers, analyses and expresses the part in relation to the whole. Effective teaching helps the child to give reality to his concepts by providing him with school work which is individual, shared and collective at the same time. The practical problem of ensuring concentration and learning requires of the educator an adequate understanding of the child’s mind and of the process of its development (IBE)
372.1 PRIMARY TEACHING METHODS

SEALEY, L.W. & GIBBON, V. Communication and learning in the primary school. Oxford, Basil Blackwell, 1962. viii+184 p., pl., bibl., app. — On the assumption that learning in the nursery and primary school depends largely both on the different kinds of relationships which children are required to establish with their surroundings and on the need for such surroundings to be adjusted to the environment the authors discuss the work carried out in this connection at many primary schools. Suggestions concerning the following: climate to be created; suitable material and equipment; dramatisation; dancing; physical education; group work; development of vocabulary; puppetry; teaching of reading and writing; composition; employment of construction materials in the teaching of mathematics; teaching machines; music and science in the primary school, etc. (IBE)

(Collection Bourrelier, Cahiers de pédagogie moderne, 30). — Work which takes as basis the topic "Changes in nursery school teaching from 1920 until 1960" chosen for the national Congress of Nursery School Teachers (Nice, 1962) and consists of two parts. I. Reports on which different prominent members of the teaching profession deal with (a) the present situation and the future as regards the development of nursery schools, (b) the history and causes of change in nursery school education, (c) the evolution which contemporary psychology has brought about in the education of young children. II. Various activities of the French nursery school, showing the latter's features at the present. The book constitutes an ample and varied source of information on the methods and practices of an education which allows freedom to the child's energy. (IBE)

372.3 EDUCATIONAL METHODS WITH YOUNG CHILDREN
ZAVOLI, Cesare. La scuola dei bambini. Guida per le educatrici dell'infanzia. 2 vol. Modena, Editrice Marverti, s.d. 256 p. & 213 p., fig., pl. Description of existing, programme and of the principal methods (Montessori, Agazzi, Froebel, etc.) which are designed for nursery school education. The world of the young child is made clearer by the way in which the conditions for his life and work are envisaged and by the paramount importance of the premises in which he is to develop (much space is reserved for the garden, where he learns about and follows nature's course). Emphasis on the dominant role of the teacher who, by reason of her delicacy and foresight, must be to the children more than a mother. (IBE)

372.4 READING
BLIGNAUT, C.M. Inleiding tot leesonderd. (‘N handleiding vir studente). Johannesburg, Afrikaanse Pers-Boekhandel, 1963. 234 p., fig., bibliog. — Teacher's guide containing a detailed analysis of the different stages in teaching to read Afrikaans. Review of the means by which children's reading ability may be revealed. Description of some simple procedures which, with the use of basic material, can make reading lessons more entertaining. Consideration of backwardness in reading, of its various psychological causes, etc. and the remedial methods. (IBE)

372.4 READING
GANS, Roma. Common sense in teaching reading. Indianapolis & New York, The Bobbs-Merrill Co., (1963) xi+414 p., bibliog. ind. — Discussion of teaching and learning, both at home and at school, to read. What is taught and what should or could be taught at each stage. Examples furnished by the author's observations and experience. I. How at home and at school the child learns to read; attitudes adopted and methods used in each of these environments; relationship in each case with educational aims. II. Main problems encountered by schools in teaching today's children to read. (IBE)

132
372.4 READING — 375.101 ELOCUTION. READING. PHONETICS — 37 P (73) RESEARCH AND INQUIRIES (UNITED STATES)

HARRIS, Albert J. Readings on reading instruction. New York, David McKay Co., 1963. xiii+i-466 p., bibl., ind. — Articles and short accounts written by different American specialists between 1941 and 1962, together with reports on experiments and research, in regard to reading and its teaching. General consideration of the subject (psychological aspects, reading readiness, tests, syllabus, teaching methods, ...). Problems involved in actual reading (word perception and phonics, vocabulary, reading for meaning, interest, reading in content areas, oral reading, ...). Related problems (materials for reading, reading for the gifted and the retarded). (IBE)

372.4 READING — 371.913 SPEECH EFFECTS

JADOUlle, Andrea. Apprentissage de la lecture et dyslexie. Liège, Georges Thone, Editeur, 1962. 332 p., tabl., bibl. (Education et culture). — Analysis of the difficulties encountered in the teaching of reading and spelling of children. Favourable conditions for effective teaching, taking into consideration factors such as intelligence, family background, etc.; particular importance of detecting left-handedness in the child by studying the laterality of the hand, foot, ear, eye (techniques and tables), the sense of time and space and the symbolic function. On this information and the notion of dyslexia is founded a preventive and remedial procedure for the teaching of reading, account being taken of the problems raised by the global method. (IBE)

372.4 READING — 377.92 REMEDIAL EDUCATION

MORRIS, Ronald. Success and failure in learning to read. London, Oldbourne, (1963). 176 p., bibl., ind. — Information for educators, for those engaged in teaching the initial stages of reading and for those who give remedial instruction in reading. Significance of reading: its value in the modern world, learning to read (success or failure) and the repercussions of these factors on the adjustment of the individual to a society founded on the written language. Different teaching methods; reading comprehension and its bases; development of the intellectual faculties from the initial stage until the most advanced levels of reading; improvement of the techniques and habits of study at secondary and higher level. Tests; remedial instruction in reading and its practical applications. (IBE)

372.4 READING — 377.92 REMEDIAL EDUCATION — 374.8 COURSES FOR THE ILLITERATE

MOXON, C.A.V. A remedial reading method. London, Methuen and Co., (1962). 129 p., fig. — Account of a remedial method which, intended for the reading of English as mother tongue, was tried out over a period of years with pupils and people of all ages who experienced difficulty in reading. In this method, which has proved not only valuable for teaching illiterate adults to read but also applicable for the teaching of English to foreigners by the direct method, use is made of educational games (card playing, completing of words and pictures, colour codes, etc.) which can be constructed by the teacher himself. (IBE)

MÜLLER, Ernst. Zur Problematik des Schullesebuches für Zahnärzte, mit besonderer Berücksichtigung seines Wortschatzes und seines Weltbildes. [See 375.12]

372.4 READING — 375.101 ELOCUTION. READING. PHONETICS

NATIONAL SOCIETY FOR THE STUDY OF EDUCATION (United States). Development in and through reading. Part I. Edited by Nelson B. Henry, Chicago. The University of Chicago Press, 1961. xviii+i-406 p., tabl., bibl. notes, ind. (N.S.S.E., 60th Yearbook). — Sixtieth Yearbook of the N.S.S.E., on learning to read in its developmental aspects. The following topics are treated in detail: characteristics of child development; different kinds of reading ability in pupils; effect of the environment on reading ability; importance of motivation and interest as factors of progress in reading; contribution of language study in the teaching of reading; effect of reading on the progress made in other subjects; use of audio-visual materials in reading instruction; maintaining a balance in the different levels of reading ability. (IBE)
372.4 READING

PAPPAS, George. Reading in the primary school. Melbourne, etc., Macmillan and Co., 1962. xv + 226 p., fig., tabl., bibl., app. — Intended for primary teachers, a book dealing with the teaching of reading and with its importance in the adult world, its place in the schoolchild's life and its educational aims. Main topics treated: the different skills necessary in learning to read (acquiring a basic vocabulary, recognising new words, the spoken word), programmes (examples of activities, textbooks, materials, etc.); individualised reading; reading in order to learn; various types of tests; remedial reading; efficient and rapid reading in the primary school; school libraries and the reading programme. The appendix contains information to assist the teacher and examples of reading exercises. List of tests for classroom use. (IBE)

372.4 READING

SILVEIRA, Juracy. Leitura na escola primária. Rio de Janeiro, Ministério da educação e cultura, Centro brasileiro de pesquisa educacional, INEP, (1960). 310 p., fig., pl., tabl., bibl., app. (Publicações do Centro brasileiro de pesquisa educacional, Série II — Livros de texto — Vol. 3). — Teacher's guide for instruction in reading in the primary school. Discussion of the following matters: (a) the cultural value of reading; (b) the employment of reading at school and outside it; (c) guided activities and educational games designed to develop in the child a love of books; (d) the different steps in learning to read and ways of evaluating the progress achieved; (e) the teaching and the different methods applicable in this subject (group work, reading aloud, silent reading, etc.); (f) the reading handicaps encountered and remedial steps. (IBE)

372.4 READING — 375.107 POETRY

SINGER, Kurt. Lehendige Lese-Erziehung. Grundlegung und Praxis des Lesunterrichts. München, E. Reinwirth Verlag, s.d. 175 p., bibl., ind. — Thanks to global methods, children from the beginning regard reading as looking for the meaning of a word or sentence. After the initial stage, that of the spoken word, reading very soon involves intellectual effort as the written word comes to be understood without intervention of the spoken word. This process is important and must not be thwarted as a result of keeping the child too long at the first stage and of insisting on reading skill (Lesefertigkeit) before the comprehension. As soon as the pupil is ready for it he should proceed to silent reading as this gives a feeling of success and of greater attainment while allowing him to advance at his own pace. The process in the individual is assisted if pupils are grouped according to their progress. To maintain their interest the teacher should alternate individual work with class work and group work, while reading should be alternated with reflection, writing and oral expression. The final section of the book deals with poetry at school. (IBE)

372.4 READING

SMITH, Nila Banton. Reading instruction for today's children. Englewood Cliffs (N. J.), Prentice-Hall, (1963). xii + 594 p., fig., tabl., bibl., ind. — Information intended to acquaint students and teachers with theoretical aspects of reading as well as with relevant research and the possibilities of its application to the teaching of children in the classroom at the present time. Reading instruction during recent years and prospects for the future: close relation between the factors of progress in reading and other aspects of child development; relationship between reading and the other language arts. Learning of the basic reading skills at all levels of primary schooling; development of an interest and taste for reading; preparation for learning to read in the kindergarten and first primary year; teacher-parent relationships in this connection. Suggestions and additional examples for fixation of knowledge. (IBE)

372.4 READING — 371.34 TEACHING MATERIAL — 374.8 COURSES FOR THE ILLITERATE

UNESCO. Simple reading material for adults: its preparation and use. (Paris), Unesco, (1953). 95 p., fig., tabl., pl., bibl., app. (Manuals on adult and youth education, 3). — Information which, on writing and publishing for the benefit of new literates, is intended to guide those who write, illustrate or publish reading material. Although tried out and proved effective in many countries, the procedures recommended should be adapted to local circumstances and needs. (IBE)

372.5 WRITING
BASURTO GARCIA, Alfredo. La escritura. Mexico, Luis Fernández G., (1959). 137 p., fig., bibl. (Ensayos pedagogicos, XXVII). — Essay on the teaching of handwriting: the importance of which subject is somewhat minimized at the present due to the fact that most are disconcerted by the contradiction between the different views and theories voiced on the matter. Use of the typewriter also is partly responsible for the crisis through which the teaching of writing is passing. The dispute between supporters of script writing and cursive writing as being more or less suitable for giving a clear and readable handwriting. Necessity of supervising the proper forming of letters during the initial stage of teaching by ensuring that the pupil is not submitted to any influence which is extraneous to that of the school. Role belonging to visual work and handwork as aids in the teaching of writing. (IBE)

372.5 WRITING
CALMY, G. Comment faire les exercices graphiques. Manuel de pédagogie pratique pour les écoles maternelles, les classes enfantines, les jardins d’enfants et les cours préparatoires. [Paris], Fernand Nathan, (1963). 64 p., fig. (L’éducation enfantine). — Method for guiding children in their first writing lessons by means of which they pass from the scribbling stage to that of handwriting. Rendered easy to teach by numerous models and detailed explanations these lessons further the child’s intellectual development and prepare him for writing. (IBE)

372.5 WRITING — 375.92 SHORTHAND, TYPING — 375.101 ELOCUTION. READING. PHONETICS
INNOCENZI, Andrea. Celeri scrittura e rapida lettura. Roma, Tipo Litografia R. Pioda, (1963). 134 p., fig., bibl., notes. — Addressing himself to the problems raised by the necessity for rapid writing and reading, the author reviews the different types of handwriting and comes to the conclusion that English cursive and a vertical joined writing both present difficulties as regards outline and reading; they can be profitably substituted by a type of writing derived from printed characters. Description of the various proposals made in the latter connection since 1933 and of some types of writing taught in several European countries. Research for devising the ideal type of writing which combines, although in slightly modified form, the respective advantages of printing and ideographic writing, namely clarity and rapidity. Criteria for choosing a stenographic type of writing: consideration of the different shorthand machines; requirements of a machine which may combine the advantages of the typewriter with those of a shorthand machine and thus make it possible to reproduce a speaker’s words directly in clear language without the intervening process of transcription. In connection with reading, the book concludes with a discussion on procedures for reading quickly and profitably at the same time and on methods employed for training to read quickly. (IBE)

372.5 WRITING — 375.7 ART TEACHING — 375.91 HANDICRAFTS — 371.73 PHYSICAL EDUCATION

372.5 WRITING
MAÍLLO, Adolfo. Reflexiones pedagógicas sobre la historia de la escritura. Madrid, Centro de documentación y orientación didáctica de enseñanza primaria, 1962. 70 p., bibl. (Biblioteca de “Notas y Documentos”). — Expression (psychological assumption) and communication (social assumption) are considered to be at the origin of language.
The evolution of these two assumptions has been dictated by the predominant influence which the social needs of communication have over the individual requirements of expression and represents the path traversed by writing from the time of dynamic melody to that of the letter. Outline of some general rules governing methods in writing and which are deduced from its history. Value of genetic, logical and psychological methods in early writing lessons. (IBE)

MALMQUIST, Eve. Skrivmaskiner i den elementära läs- och skrivundervisningen. [See 375.92]

372.6 NUMBER WORK
BRANDAU, Walter; BENISCHKE, Erna & LABACK, Johanna. Menge und Zahl. Ganzheitliche Rechenarbeit im ersten und zweiten Schuljahr. Graz & Wien, Leykam Pädagogischer Verlag (cop. 1962). 182 p., fig., bibl. — Elementary arithmetic textbook based on Wittmann's methods as used in schools in Styria (Austria). The plan follows the school year (four terms of ten weeks) for the first and second classes and the vocabulary and examples are adapted to the child's interests. The global method is based on notions (whole, group, quantity, row) which are applied to the five basic operations. In the case of each lesson there are typical figures and elementary material enabling them to be represented and drawn. The observation of composite units, their decomposition, number formation, calculation, etc. determine the dialogue and the exercises in deduction or simple mechanical repetition. These exercises are related to centres of interest and to seasonal activities. (IBE)

372.6 NUMBER WORK — 371.34 TEACHING MATERIAL
DAVIS, Dorothy. Some thoughts on mathematical apparatus in the infants' school. Digswell Place (Herts.), James Nisbet and Co., (1962). 122 p., fig., tabl., bibl. — Practical guide, illustrated with many examples, to assist teachers in regard to the different material which can be employed in teaching elementary mathematics to children 5 to 7 years old. Description; roles; classification according to pupil age and the operation to be taught; design; construction. Mathematical concepts and vocabulary in connection with games and experiences; knowledge of numbers; the four operations; relation of the number concept to reading and writing. Real life situations, simplified and appropriate to the classroom work, for explaining the use of money and the application of the concepts of weight, length, volume, time, etc. Mathematical apparatus in connection with testing. (IBE)

372.6 NUMBER WORK — 375.31 ARITHMETIC

372.7 EDUCATION OF THE SENSORY AND MOTOR NERVES
GRZOKA, Anna. Zakcia ruchowe w przedszkolu. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 316 p., fig., tabl., bibl. — Definition, aims and usefulness of physical exercises and “motory activities” in the kindergarten. A teacher reports her observations and draws attention to the inadequacy, at least numerical, of theoretical books and practical guides capable of interesting educators who have charge of pre-school establishments, particularly the beginners. Description of the various kinds of games and exercises most widely used in pre-school education. (IBE)

CURCI, Angelo Vincenzo. Questa scuola. Opinioni di studenti. Roma, Unione cattolica italiana insegnanti medi, 1959. 120 p., tabl. ("Luce nella professione."). — Results of an inquiry conducted among about 500 pupils in the final three classes at Italian general secondary schools and vocational schools. The pupils' opinions concerning school provide the basis for essays on the adolescent's mentality in today's world and on the role which the school should play, whether from the educational or social point of view, in furnishing him not only with instruction but also with the training which he needs in his encounter with present-day life. (IBE)

373 (44) SECONDARY EDUCATION (FRANCE)
NATANSON, Jacques & PROST, Antoine. La révolution scolaire. [See 371.42 (44)]
To secondary and higher education belongs the responsibility of guiding and educating the politicians and technicians and of preparing them for the tasks imposed by future events. In today's world, however, the increasing tempo produces problems in regard to teaching, organization and technical efficiency and the educator consequently asks what plans the government has for meeting the inevitable expansion in public education. What are the individual secondary schools doing to satisfy the requirements of technical education, to accommodate ever increasing numbers of students and to organize the latter's work and leisure? How to discover the young talent at a time when it is essential to employ all available human resources? Such questions and others are discussed on the basis of the experience possessed by the authors, who offer suggestions of a practical nature (setting up and financing of additional colleges, training of teachers, etc.) for bringing education into step with progress.

HUTCHINSON, Michael & YOUNG, Christopher. Educating the intelligent. (Harmondsworth), Penguin Books, (1962). 240 p., tabl., bibl., ind. — Criticism of public education in the United Kingdom, mainly in regard to the secondary school curriculum, to improve which for the benefit of intelligent pupils (40% of schoolchildren) it is considered that nothing has been done. Addressing themselves not only to parents, who desire that their children be given, in addition to knowledge, the preparation for a better life than they themselves have had, but also to teachers who are aware of the shortcomings in present curricula, the authors first describe the cultural and intellectual needs of the young in relation to the requirements of tomorrow's society. They then discuss the implications in regard to the school programme as from the second or third secondary year and outline a curriculum which, while permitting the free development of the most varied talent, would ensure that young people learn the nature of the great human family as well as how to work and behave for taking their place in it. 373.10 (42) GENERAL ORGANIZATION — 373.109 (42) PRIVATE SECONDARY EDUCATION
— 373.6 (42) RELIGIOUS TEACHING (UNITED KINGDOM)
FLETCHER, Ronald. Issues in education. London, (The Ethical Union), s.d. 94 p., bibl. (The Plain View Supplements — 2). — Discussion of those educational issues which have been most disputed in the United Kingdom since the passing of the 1944 Education Act: (1) organization of secondary education (based until then on the "triptite" structure) and the development of the "comprehensive" school; (2) the question of the public schools; (3) the problem of religious instruction at schools. Other matters considered: the present aims of education; the various authorities responsible for education; some of the main factors underlying the social changes which influence educational development in Great Britain. The varied and complex arguments for and against in these controversial issues are explained as objectively as possible. Attention drawn to the need for research and urgent steps in the respective matters. (IBE)

373.10 (42) GENERAL ORGANIZATION (MULTILATERAL SCHOOLS, ...) — 371.232 (42) ENTRANCE EXAMINATIONS. METHODS OF SELECTION (UNITED KINGDOM)
PEDLEY, Robin. The comprehensive school. (Harmondsworth, Middlesex), Penguin Books, (1963). 222 p., fig., tabl., bibl., gloss., ind. (Pelican Books, A 613). — Critical discussion of the "11+" selection examination which pupils in England and Wales take at the age of eleven and which so far has furnished the sole basis for admission to grammar schools and later to the large universities. The author, who is director of the University of Exeter Institute of Education, has for many years argued in favour of the truly democratic "comprehensive school" which offers children from all environments the same opportunities of selection and advancement in regard to their education. He endeavours to refute the arguments put forward against this institution and with the aid of statistics shows that the 239 comprehensive schools existing in England, Wales and the Isle of Man are already rivalling the "triptite" system (grammar school — technical school — secondary modern school) as regards pupil's results. 373.11 (714) SECONDARY CLASSICAL EDUCATION — 371.11 (714) SELECTION AND RECRUITMENT OF TEACHERS — 371.129 (714) TRAINING OF SECONDARY TEACHERS — 371.452 (714) CATHOLIC EDUCATION (CANADA/QUEBEC)
SAVARD, Michel. Paradoxes... et réalités de notre enseignement secondaire. Montréal, Centre de Psychologie et de Pédagogie, (1962). 144 p., tabl., bibl., notes, app. — Study on the professional promotion of teachers from the laity at Catholic private institutions in the province of Quebec. In accordance with the current claim that priest educators be replaced by laymen, the Church must seek the assistance of all its members, both clerical and lay. In the province of Quebec, however, the admission of the latter to the ranks of teachers at secondary classical schools must be planned. In this connection, the author shows how to recruit teachers, to train them according to the Christian spirit and, finally, to integrate them in schools where their task is not only of a social but also of a religious nature. (IBE)

373.12 (42) SECONDARY MODERN EDUCATION (UNITED KINGDOM)
TAYLOR, William. The secondary modern school. London, Faber and Faber, (1963). 254 p., bibl. (10 p.), ind. (Society Today and Tomorrow). — Discussion concerning the new functions of the secondary modern school in Great Britain in the light of the social, economic and industrial development which has taken place in the last few years. It was hoped that this type of school, which was instituted under the 1944 Education Act establishing the principle of equal opportunity for secondary education, would have a more flexible and independent nature than the traditional secondary or "grammar" school and the secondary technical school but it has had to accept incorporation in the system of vocational and social selection made necessary by present circumstances and conform to certain requirements in connection with examinations. (IBE)

373.15 (45) LOWER SECONDARY EDUCATION — 371.42 (45) SCHOOL REFORM (ITALY)
GENTILE, Marino. La riforma silenziosa della scuola. Il completamento della istruzione inferiore. Bologna, Edizioni Giuseppe Malipiero, (cop. 1961). 134 p., app. — Under a decree signed in 1955 by the President of the Italian Republic the system of compulsory education was reorganized and, as a result, involves three levels of education. The author’s views concerning the compulsory continuation level (three-year course taken, after the five-year primary course, by children 11 to 14 years old). As regards this level, the stage is still experimental and he makes a detailed study of relevant matters: reform at lower level; compulsory attendance; humanistic training; basic features of the current syllabuses; the school work; vocational guidance. (IBE)

373.15 (71) LOWER SECONDARY EDUCATION — 37 G (71) YEARBOOKS (CANADA)
The intermediate division. 1959. The fifteenth yearbook of the Ontario School Inspectors’ Association. Vancouver, [etc.], The Copp Clark Publishing Co., (1959). xxvii+180 p., fig., pl. — Yearbook devoted to the problem of the intermediate division (grades VII to X) at Ontario schools. Different articles discuss the following: academic, cultural, social, emotional and physical needs of the pupils; questions relating to the programme; educational guidance; introduction of vocational courses; coordination of the programme; problem of individual differences, etc. (IBE)

BURGER, Robert. Liegt die höhere Schule richtig? Umfang und Ursachen des vorzeitigen Abgangs von höheren Schulen. Freiburg i.B., [etc.], Herder, (1963). 157 p., fig., tabl. (Das pädagogische Gespräch, Aktuelle Veröffentlichungen des Willmann-Instituts, München-Wien). — An increasing number of adolescents are leaving school too early. Why? Is it the fault of the teaching, the system of secondary education? Returning to an inquiry in the matter, the results of which were published in 1957, the present volume furnishes the latest statistics and documentation on (1) the magnitude of the problem, (2) the factors supposed to be responsible for dropping of study, (3) the measures necessary for better diagnosis and encouragement of young talent, for raising the level of study and for organizing of services to provide psycho-pedagogical aid and vocational advice. (IBE)

GLASER, Hermann. Gedanken zur Reform der Höheren Schule. Aufsätze zu Grund- sätzlichen und Konkreten. Freiburg i.B., Verlag Rombach, (1963). 179 p., fig., bibl. notes. — In a free society the schools should be free. Too much regulation and a narrow dogmatic attitude destroy their spiritual climate. The reform of upper secondary education is also concerned and it should result not from arbitrary decisions but from practical discussion and from exchange of views. Intended as a contribution to such an exchange, the different articles in this book deal from various angles and in various ways with the central problems involved: aims and meaning of upper secondary education; political education; syllabus reform; concentration of subjects, etc. (IBE)

HÖHNE, Ernst (Hrsg.). Vertiefung und Konzentration. Arbeitsweisen in der neu- gestalteten Oberstufe der Höheren Schule. München, Bayerischer Schulbuch-Verlag, 1961. 196 p., bibl. notes. — Discussion concerning the psychological problem of concentration and thoroughness in school work, in connection with the reform introduced in the final year of the German secondary school course. The first practical results of this reform are presented by specialists possessing much experience in education and in teacher training. It would seem that a choice should be made at the level of the final secondary years if the large number of subjects is not to have the effect of less thoroughness in the pupils' work. The different studies presented are intended to train teachers in a new style of school work which will make it easier for pupils to be accepted for higher level courses. (IBE)

UNESCO. INSTITUT FÜR PÄDAGOGIK & INTERNATIONALER ARBEITS- KREIS SONNENBERG. Hauptlinien und Kernfragen der internationalen pädagogischen Entwicklung. Bericht über eine Pädagogen-Tagung vom 17. bis 26. März 1962... Redaktion: Hans-Georg Thode. Braunschweig, Waisenhaus-Buchdruckerei und Verlag, s.d. 129 p., fig., tabl., bibl. — Report on the international discussion days organized jointly by the Unesco Institute, Hamburg, and the Sonnenberg International Circle in 1962. The topics related mainly to upper secondary education: organization and differentiated training under the Swedish educational reform; problem of guidance; the "second educational path" in the German Federal Republic; organization and the teaching in upper classes at secondary level; teaching principles; specialisation in the 6th class at English secondary schools; training of a critical attitude in regard to political matters; adolescence and psychological research, etc. (IBE)

Rabat, Editions La Porte & Paris, Librairie de Médicis, 1962. 114 p., fig., tabl., app. (Publications du Centre Universitaire de la Recherche Scientifique, C.E.D.E.S., Faculté des Sciences Juridiques, Economiques et Sociales de Rabat). — Principal features of the plan under which use is made of the "exercise units" (unités-exercices) method in order to train middle and lower ranking personnel and executives for the public services in the developing countries.
I. Alternating stages devoted to training and production; at each stage the trainees receive instruction in a specific subject and then are given practice (known as an exercise unit) in problem solving. II. Setting up of regional centres which are dependent upon the service system and where leaders and instructors, trained in active educational methods, organize the life and instruction. III. Under the plan, which is based on detailed study of employment, the knowledge required and typical behaviour, the tasks are first arranged in "families" and then in exercise units. IV. Selection of trainees; with the exercise units method it is possible to recruit persons having neither culture nor qualifications, give them quick instruction and enable them to accomplish their task of "execution conception" (conception-exécution). WHITE, A.C.T. The story of army education, 1643-1963. London, [etc], George G. Harrap & Co., (1963). 286 p., pl., ind., app. — In 1643 the need to educate soldiers was recognised and since then they have been supplied with pocket books, including the Bible. In 1763 the first army school "First Regiment of Guards" was established in the Tower of London and after that, with the opening of many regimental schools, the education of soldiers and their children became general. In overseas garrisons and even during hostilities they are provided with education alongside the military training. Changes were introduced during the 1914-1918 war but the programme was still limited. Under the "Haining Scheme" in 1940 a humanistic element was introduced; soldiers were kept informed on the progress of the war and on world events and were encouraged to discuss locally topics of general interest. Education, as basis for military training and as moral support for troops, has continued to prove its worth throughout the years. (IBE)

375.0 (73) GENERAL QUESTIONS RELATIVE TO THE CURRICULUM — 370.3 (73) PHILOSOPHY OF EDUCATION (UNITED STATES)

PARKER, J. Cecil; EDWARDS, T. Bentley & STEGEMAN, William H. Curriculum in America. New York, Thomas Y. Crowell Co., (1962). xix + 587 p., bibl., ind. — Considering the school's first responsibility to be that of educating young Americans so that they may be able to make the decisions which are essential in a democratic community, the author explains the process and techniques involved in education of judgment and how they may be integrated into the teaching of the various subjects of the curriculum particularly at secondary level. Theory should be linked with the different aspects of current educational practice and thus furnish the basic principles for designing a curriculum suitable to the needs of any community. Such theory is based on recent research findings, many of which are studied in detail. At the end of each chapter there are exercises and discussion topics. (IBE)

375.12 Mother Tongue: Spanish

ABREU GOMEZ, Ermilo. La enseñanza del español. San Salvador, Ministerio de educación, Departamento editorial, (cop. 1961). 67 p., bibl. notes. — The instruction in Spanish as mother tongue is considered to be based too much on rules of grammar. To remedy this the aims of such instruction at primary level should be (a) to cultivate the pupil’s thinking as well as his oral and written expression, (b) to refine and enrich his vocabulary, (c) to instil the rudiments of grammar, (d) to correct mistakes in elocution, (e) to arouse a taste for reading. (IBE)

375.12 (81) Mother Tongue: Portuguese — 375.05:373.1 (81) General Secondary School Syllabuses (Brazil)

AZEVEDO FILHO, Leodegario Amarante de et al. Difusao de portugues. Sumulas de orientagao para os exames de suficiencia. (Rio de Janeiro), Ministerio da Educagao e Cultura, Diretoria do ensino secundario, 1960. 123 p., bibl. (Campanha de Aperfeicoamento e Difusao do Ensino Secundario). — Guidance for future teachers of Portuguese at general secondary schools in Brazil. Introduction to the subject; aims; nature and content of the current syllabuses; teaching methods; Portuguese taught as vernacular language; procedures and checking (exercises, guided study, testing, etc.); out-of-school activities for enriching the programme in mother tongue. (IBE)

375.12 Mother Tongue: English

BRIGGS, F. Allen (Ed.). Tricks of the trade in teaching language arts. Alpine (Texas), The Cathedral Press, 1961. 124 p., ron. — Practical guide which, for teaching of English as mother tongue, is intended on the one hand to help the beginning teacher and on the other to give more zest to the work of teachers who have been serving for many years and are tired of teaching always in the same way. The teaching of English at secondary level is treated in several aspects: vocabulary; syntax; grammar; spelling; teaching to listen; poetry and drama; elocution; lesson repetition; assessment of pupils’ progress. (IBE)

375.12 Mother Tongue: German

375.12 Mother Tongue: German — 372.4 Reading — 371.329 Textbooks — 37 P (494) Research and inquiries (Switzerland)

MÜLLER, Ernst. Zur Problematik des Schullesbuches für Zehnjährige, mit besonderer Berücksichtigung seines Wortschatzes und seines Weltbildes. Zürich, Juris-Verlag, 1962. 131 p., tabl., bibl., notes, app. — Analysis of the educational value of the reader, its vocabulary and the picture of the world it offers to fourth-year pupils (10-11 years old) at schools in German speaking Switzerland. Account of the changes introduced since the end of the 19th century and during the first half of the 20th century. The reader reflects the educational policy and fundamental ideas of the age; this is why it should take into account the results of the science of pedagogy and undergo the test of school use. The structure of words, their meaning for the child, the establishment of a basic vocabulary and the choice of texts — in relation to objective knowledge and the current situation — these are a few of the major problems raised by the reading textbook. (IBE)

375.12 Mother Tongue: German

RUTT, Theodor. Mutter sprachschule. 1. Teil: Theoretische und schulpraktische Beiträge zur deutschen Sprachlehre, Sprachkunde und Rechtschreibung. Ratingen, A. Hiermann Verlag, (1955). 192 p., notes, ind. (Lebendiges Sprachwissen, schaffendes Sprachkönnen, Band 2). — Book based on experience and explaining for schoolteachers how knowledge of mother tongue develops and becomes wider, how it increases and is maintained as the child speaks and listens. The contents are concerned with the structure and inner nature of the language rather than with its grammar, spelling and rules. The teaching theory and practical examples are based on exchange of ideas with children themselves as well as on school work and human relations. (IBE)

Second edition, revised and enlarged, of a work originally published in 1951 under the same title and by the same publishers. (See IBE Bulletin No. 111).

Shane, Harold G. & Mulry, June Grant. Improving language arts instruction through research. Washington, Association for Supervision and Curriculum Development, (1963). 152 p., bibl. (46 p.). — Annotated bibliography relating to research conducted in the United States for improving the instruction, particularly at secondary level, in language arts (reading, writing, spelling, grammar, elocution, etc.). A few chapters deal with the introduction of foreign languages into the primary school curriculum, children's literature and the employment of audio-visual aids. (IBE)

Winkler, Christian. Lesen als Sprachunterricht. [See 375.101]

Bohlen, Adolf. Bild und Ton im neusprachlichen Unterricht. [See 371.36]

Brandt, B. & Garsky, I. (Hrsg.). Sprachpraxis. Berlin, Volk und Wissen Volkseigener Verlag, 1961. 112 p., fig., tabl., bibl. (Sammelband zur Methode des Fremdsprachenunterrichts). — Teacher's guide for giving instruction in modern languages, particularly Russian, in the German Democratic Republic. Description of a method intended to instil in pupils quickly a sufficient knowledge of the grammar, syntax, pronunciation and vocabulary in order that they may use this language with very little delay. Particulars concerning the exchange of letters between Soviet and East-German schools; list of the most frequently employed Russian terms. In conclusion a brief consideration of the views held by German humanists of the 15th century about the teaching of languages (mainly Latin) with a view to quick practical use of them. (IBE)

The inquiry conducted by the International Federation of Teacher's Associations in view of its 1962 Congress was intended to serve as groundwork for the discussion on the advisability of introducing the study of modern languages in the last years of primary school (towards the end of compulsory schooling) in order to encourage international contacts. The reports of the sixteen countries which replied to the questionnaire show, despite the great variety of situation existing in the various countries there is a certain uniformity since only in a very few cases is a modern language taught before secondary level. (IBE)

French, F.G. Teaching English as an international language. London, Oxford University Press, 1962. 112 p., fig., tabl. — Practical suggestions for teachers who, while not having English as mother tongue, teach this language in their country's schools. Certain considerations regarding the structure of English are followed by recommendations dealing mainly with ways of enlivening the teaching and making it more concrete by the use, in particular, of "substitution tables". (IBE)
GATTEGNO, C. Teaching foreign languages in schools. The silent way. Reading [England], Educational Explorers, (1963). x+84 p., app. (Modern Language Series). — Language teaching method called "the silent way" and found to be particularly effective with classes containing pupils of different nationalities. Its main features are as follows: (a) subordination of teaching to learning; (b) replacement of memory by recognition and familiarity; (c) use of letters or groups of letters in colour (to show similarity and dissimilarity) as well as of many audio-visual aids; (d) acquainting children with the spirit of the language (melody, rhythm, most common sounds) through the medium of tape and gramophone recordings; (e) introduction, at the beginning, of only very few nouns, together with some verbs, pronouns, adjectives and other qualifying words, in order to encourage linguistic comprehension; (f) teaching of the written word at the same time as the spoken word. (IBE)

Modern languages at general secondary schools. Research in comparative education. Geneva, International Bureau of Education & Paris, Unesco, (cop. 1964). xvi+189 p., tabl. (Publication No. 268). — This comparative education study undertaken by the I.B.E. was confined to general secondary schools although it is known that the teaching of modern languages is by no means limited in extent to such establishments. It was considered, however, that a useful purpose would be served by study of the particular problems connected with the place of modern languages in general education. These languages are found among the compulsory subjects, that is to say regarded as essential to modern humanistic culture, in 76 of 85 countries which replied to the questionnaire and in 44 of these 76 countries two languages, or even more, are compulsory. As regards the languages taught, the data collected shows on one hand the wide-spread use of so-called western languages and on the other the increasing attention given to indigenous languages. A summary analysis of the aims assigned to modern language teaching and of the methods employed shows a similarity of trends. There is, however, still conflict between the traditional cultural aims and the utilitarian ones dictated by the development of international relations. Almost everywhere the teaching starts with oral and aural practice of the spoken language. In this connection, audio-visual media constitute valuable aids, although the use of actual language laboratories is not wide-spread owing to the high cost. The main hindrance, however, to effective development of language teaching is the shortage of qualified teachers. By way of remedy in most countries various means are provided enabling teachers to receive further training and sometimes foreign assistants are engaged. (IBE)

MONFRIES, Helen. Oral drills in sentence patterns. For foreign students. London, Macmillan & Co., 1963. xv+150 p., fig., app. — Sentence patterns in which oral drill makes English lessons easy and "less passive" for beginners and enables the verbs as well as an ample vocabulary to be mastered quickly. The accented syllables and the intonation of the English sentence are indicated from the start. (IBE)

SHANE, Harold G. & MULRY, June Grant. Improving language arts instruction through research. [See 375.12]

SHANE, Harold G. & MULRY, June Grant. Improving language arts instruction through research. [See 375.12]
Education, 1963. 103 p., tabl., bibl., notes, app. (International Studies in Education). — Report on a meeting of experts held in Hamburg in 1962 on “the teaching of foreign or second languages to younger children”. After having considered successively the social, political, economic, educational, psychological and physiological aspects of the matter, these specialists declare themselves in favour of the early learning of a foreign language. Account of experiences and experiments carried out in European and non-European countries (a) in which a foreign language is used as “lingua Franca”, (b) in which the coexistence of populations speaking different languages demands knowledge of an international or supra-regional language. Account of experiments conducted by bilingual international schools in France, Luxembourg and Berlin. Practical suggestions concerning methods; list of research problems recommended for future studies. (IBE)

375.13 MODERN LANGUAGES — 379.821 (oo) STUDIES ABROAD. FOREIGN SCHOOLS (VARIOUS COUNTRIES)

WILLOT, A. Langues vivantes et problèmes d’éducation. Bruxelles & Paris, Marcel Didier, (1962). 414 p., tabl., bibl. (18 p.), ind. (Publications du Séminaire de méthodologie spéciale et d’orthophonie des langues germaniques de l’Université de Liège). — The teaching of modern languages as part of secondary schooling has a much broader significance than the mere technical study of a foreign language. Foreign languages are a means both of discovering the culture and mentality of other peoples and of acquiring a true humanistic and international education. The value of visits abroad, of exchanges and meetings between young people from different countries. Practical information, with addresses of the institutions and organizations concerned, on the opportunities for study abroad, language courses for foreigners, international work camps, various types of contact, etc. This information concerns mainly Dutch, German and English speaking countries. (IBE)

375.13 MODERN LANGUAGES: FRENCH — 372.4 READING — 370.7 (611) EDUCATIONAL EXPERIMENTATION (TUNISIA)

WITTWER, J. La lecture et sa compréhension en troisième primaire tunisienne. (Etude expérimentale des méthodes de l’enseignement du français). Tunis, Centre National d’Études et de Formation pédagogiques, (1961). 38 p., tabl. (Cahier No. 1). — Research for ascertaining whether the “method based, from the beginning, on reading comprehension” for teaching of French is better than other methods. The experiment concerned an experimental class (O.A.) and 7 control classes of Tunisian pupils in their third primary year. Preliminary testing for homogeneity of the groups. Assumptions tested: (a) method based on the study of connected stories; (b) creation of a climate conducive to comprehension of the topic; (c) limited frequency of new words during the first six weeks; (d) establishment of an individual “analytic and synthetic” procedure. Analysis of the method and of the results. According to the “reading indications” and the “comprehension scores” the author found the effect of the assumed factors proved. He hopes for “closer connection between work in experimental psychology and that in educational experimentation” as well as for all teachers to receive “a sound training in educational psychology”. (IBE)

375.14 CLASSICAL LANGUAGES: LATIN

NÓBREGA, Vandick L. da. A presença do latim. 3 vol. I. Metodologia e instituições. II. Parte gramatical. III. Antologia. Rio de Janeiro, Centro Brasileiro de Pesquisas Educacionais, INEP, Ministério da Educação e Cultura, 1962. 403, 576 & 775 p., tabl., bibl., ind., app. (Publicações do Centro Brasileiro de Pesquisas Educacionais. Guias de ensino. Série L. Vol. 6. B. — Escola secundária). — These three well informed volumes containing ample documentation may be considered as a kind of compendium for the study of Latin. Defence of Latin as being the basis of humanist culture. Detailed account of the life and customs of the Romans. The language (grammar, syntax, vocabulary). The texts have been selected so that not only secondary school pupils and the teachers but also university students may broaden their knowledge by reading them Cicero’s “De Legibus” for law students, Pliny’s “Natural history” for medical students, etc. (IBE)

375.2 NATURAL SCIENCE

ARNOL’D, N. V. Učebnyj fil’m na urokah prirodovedenija. [See 371.364]
CESSAC, J. Science teaching in the secondary schools of tropical Africa. (Paris), Unesco, (1965). 79 p., fig., tabl. — Analysis of the situation and needs of the different states in tropical Africa in regard to science teaching, together with a consideration of the ways in which such teaching may be improved. Comparison, as regards various aspects of this teaching (syllabuses, time-tables, textbooks), between the African countries which are influenced by language differences. Emphasis on the need (a) to equip these countries reasonably with experimental material in order that they may better evaluate and grade the science teaching, (b) to provide teachers with adequate training and the facilities for further training, (c) to investigate a possible method, suitable for teaching conditions in tropical Africa, by which science may be popularised. (IBE)

PERKINS, W. H. (Ed.). The place of science in primary education. London, The British Association for the Advancement of Science, 1962. 93 p., tabl. — Studies based on reports presented at a conference held in 1961 on the introduction of natural science in primary school. At this level such instruction must not be regarded as a formal subject but rather as a means of encouraging the pupil to observe and experiment and thus be drawn towards natural science. Problems relative to the training of teachers accordingly; questions most frequently asked by pupils, concrete examples, etc. (IBE)

PROCTOR, Elsie. Nature study for primary schools. London, Evans Brothers, (1962). 256 p., fig., tabl., bibl., ind. — Suggestions and indispensable knowledge for the teaching of nature study at primary level. Topics (birds, fish, animals, the weather, plants, trees, etc.) may be studied according to the season and in connection with the environment whether rural or urban. How to make written notes of observations and represent them by graphs, etc. Necessary teaching material. Examples of lessons which can be given even by teachers who are not specialised in this field. (IBE)

SAUNDERS, H.N. Beginning science. A year's course for tropical schools. London, [etc.], Thomas Nelson and Sons, (1956). x+171 p., fig., bibl., ind., app. (Nelson's Education Handbooks). — Guide for science teachers who are not provided with a proper science laboratory or the necessary material for experiments. By the employment of improvised equipment the lessons can be given more life, while construction of such material will help the teacher to grasp the significance of the experiment all the better. Discussion concerning the scientist's work, the sciences and the science teacher. Description of easy experiments in physics, chemistry and biology. In the appendix: basic material required for experiments in these three subjects; bibliography. (IBE)

VIDAL BOX, C. Didáctica y metodología de las ciencias naturales en la enseñanza media. Madrid, Ministerio de educación nacional, Dirección general de enseñanza media, (1961). 348 p., fig., pl., bibl. notes. (Ediciones de la revista "Enseñanza media ", Num. 234). — General remarks on the aim and present position of natural science teaching at secondary level in Spain. Methods to be employed in courses (4-year elementary and 2-year senior) for each of the two baccalaureates; aim of country walks; visits to museums; how to use various laboratory instruments, etc. Concrete examples of theoretical and practical work. Lists of additional reading matter for pupils. (IBE)
375.21 PHYSICS

WAGENSCHEIN, Martin. Die pädagogische Dimension der Physik. Braunschweig, Georg Westermann Verlag, 1962. 292 p., fig., bibl., ind., app. (Grundthemen der pädagogischen Praxis). — Physics considered as a process which during twenty-five centuries has been transforming man's relationship with nature and at the same time changing man himself. As regards the teaching of physics, the author's purpose is not so much to offer specific directions but to help transform the "climate" for it. The book is in two parts: (1) creation of physical concepts in man; (2) training man through teaching of physics. (IBE)

375.25 BIOLOGY — 371.34 TEACHING MATERIAL

MILLER, David F. & BLAYDES, Glenn W. Methods and materials for teaching the biological sciences. A text and source book for teachers in training and in service. 2nd ed. New York & London, McGraw-Hill Book Co., 1962. x+453 p., fig., bibl., ind. — Work, now in a second and completely re-arranged edition, dealing with (a) methods and principles, (b) teaching material and its employment in the classroom or in the laboratory. Possibilities of employing simple apparatus made in the classroom where funds and scientific equipment are lacking. Suggestions concerning the "problems and projects method" in which the pupils are given not only biological knowledge but also the opportunity of experimenting and of thus learning this knowledge so that they are helped both to understand the principles and to apply them in everyday life. (IBE)

375.3 MATHEMATICS

BIGGS, J.B. Anxiety, motivation and primary school matematics. (See 370.46)

375.3 MATHEMATICS

GOUTARD, Madeleine. Les mathématiques et les enfants. Neuchâtel & Paris, Editions Delachaux & Niestlé, (cop. 1963). 189 p., fig., bibl. — Report informing teachers about experiments carried out during three years in more than 150 classes in the province of Quebec for acquainting teaching staff with how to use the Cuisenaire rods and with new instructional methods. Empirical research, first stage in employment of the Cuisenaire material, followed by an endeavour to systematise and master the structures. Designing of mathematical language; examples of mathematical composition written by children in a primary class and then applied without material. Numeration and teaching it with aid of the rods. Arithmetic methods. Problems in application. Critical discussion, in the light of the experiments reported, concerning present teaching. (IBE)

375.3 MATHEMATICS

375.3 MATHEMATICS — 375.05:373.1 (81) GENERAL SECONDARY SCHOOL SYLLABUSES (BRAZIL)

JACQUES DA SILVA, Maria Edmée de Andrade. Didática da matemática no ensino secundário. [Rio de Janeiro], Ministério da Educação e Cultura, Diretoria do Ensino Secundário, Campanha de Aperfeiçoamento e Difusão do Ensino Secundário, (1960). 240 p., tabl., bibl., app. — Work which was awarded first prize in an annual competition held by the Directorate of Secondary Education in Brazil for the best monograph on method in the case of the different subjects. Part I. General matters: aims of mathematics teaching; its place in the curriculum; motivation and learning; methods and teaching material; evaluation of pupils' progress. A very comprehensive list of books for teachers as well as pupils is included in order to serve as basis for a small reference library. Part II. Different matters involved in the mathematics and in their teaching (arithmetic, algebra, geometry, trigonometry, functions, infinitesimal calculus). Part III. Examples of syllabus arrangement for junior secondary level. (IBE)

375.3 (73) MATHEMATICS — 579.31 (73) SCHOOL INSPECTION — 37 N (73) CONFERENCES (UNITED STATES)

SNAIDER, Daniel W. (Ed.). The leadership role of State supervisors of mathematics.

375.3 MATHEMATICS

WITTENBERG, Alexandre Israel; SAINTE-JEANNE-DE-FRANCE, Sœur & LEMAY, Fernand. Redécouvrir les mathématiques. Exemples d’enseignement génétique. Neuchâtel & Paris, Editions Delachaux & Niestlé, (cop. 1963). 93 p., fig., bibl. notes, app. (Actualités pédagogiques et psychologiques). — Appeal for rediscovery in mathematics teaching, that is for producing in the child’s mind a genesis of the mathematician’s reply to questions which have obvious meaning and interest for the child. In this way, learning mathematics becomes logical and connected and is no longer confined to the collection of concepts, definitions, theorems and proofs. Hence the need for a corresponding change in the training of teachers, who should be taught “to see elementary mathematics with new eyes”, to meditate on internal structure, on the logical chain of ideas in mathematics. This new perspective in education is illustrated with examples of actual instruction in geometry, algebra, etc. (IBE)

375.31 ARITHMETIC

BOÎBON, A. Test pour la mesure de l’acquis arithmétique en fin de scolarité primaire. [See 371.263]

375.31 ARITHMETIC

DUTTON, Wilbur H. & ADAMS, L.J. Arithmetic for teachers. Englewood Cliffs, N.J., Prentice-Hall, (1961). xiii+370 p., fig., tabl., bibl., ind. — Presentation to help elementary school teachers give sound and challenging lessons in arithmetic. Explanation of basic concepts and theories (accompanied throughout by practical exercises and the procedure required in them) relating to the following subject matter: addition; subtraction; multiplication; division; measurement; problem solving and its analysis; fractions; units of measure (weight, volume, etc.); percentage; introduction to algebra and geometry; evaluation of the teaching and of pupil progress. (IBE)

375.31 ARITHMETIC

GATTEGNO, Caleb. Enfin Freddy comprend l’arithmétique! L’emploi des réglettes Cuisenaire expliqué aux parents. Traduction de René Fourné. Neuchâtel & Paris, Editions Delachaux & Niestlé, (cop. 1962). 98 p., fig. — French translation of a work explaining the Cuisenaire method and intended specially for parents who wish to help their children when the latter are in difficulty with arithmetic. Description of the box of 241 coloured rods, together with indications as to its use. After familiarising himself with the rods, and by means of a series of games, the child proceeds to exercises which will enable him to perform the four arithmetical operations and solve other problems: proportion sums; calculating length, area and volume; finding the highest common factor and the lowest common multiple; work on fractions, etc. (IBE)

MOTT, E.M. First steps in practical number work. [See 372.6]

375.31 ARITHMETIC — 371.912 HEARING DEFECTS

Two opposing methods of teaching arithmetic to the deaf: (a) mimicking, which offers a too simple solution and makes difficult or impossible the explanation of abstract concepts; (b) transformation of the arithmetic lesson into a lesson in articulation and in definition; this likewise makes difficult the progress in arithmetic teaching. The author consequently suggests a middle solution enabling the pupils to learn words which are essential for the planning and conducting of lessons; each school year the pupils are given a minimum number of additional words necessary for the teaching of arithmetic.
COMMISSION INTERNATIONALE POUR L’ENSEIGNEMENT DE L’HISTOIRE. Index de références. Documentation rassemblée par G. Ecken, Y. Cottaz & J. de Launay. Bruxelles & Paris, Brepols, s.d. x+246 p., bibl. — An “index of references” compiled in conformity with the aim of the International Commission for the Teaching of History, namely “to promote better understanding between peoples by the improvement of history teaching in accordance with the strictest objectivity”. Resolutions and recommendations adopted at several recent international meetings of historians and of specialists in history teaching. The content of the resolutions — relating to nine historical periods ranging from the Middle Ages to the second world war — is given in extenso in the French version and followed in each case by the date of the resolution. In the case of each “era”, experts of the Council of Europe offer general comments on the manner in which the teaching of each historical period should be approached. (IBE)

HEINEL, Jürgen. Die deutsche Sozialpolitik des 19. Jahrhunderts im Spiegel der Schulgeschichtsbücher. Braunschweig, Albert Limbach Verlag, (1962). 108 p., bibl., notes. (Schriftenreihe des internationalen Schulbuchinstituts, 6. Band). — Comparative study of 147 history textbooks published by German education authorities: (a) from 1900 to 1918, (b) under the Weimar Republic, (c) under the Third Reich and (d) by the present Federal Republic of Germany. This research reflects German social policy since the nineteenth century, the educational aspirations of the State under the different regimes and the importance of historical research in establishing an objective truth. The development of German social policy in the nineteenth century shows the advent of what is known as the fourth State, its existence as a political power leading to government of the masses. The difference of appreciation in the presentation of the same historical facts to pupils is of great interest. The last section of the book is devoted to an examination of how certain aspects of German social policy are presented by recent textbooks in the western world. (IBE)

MIRANDA BASURTO, Angel. Didáctica de la historia. 2a ed. Mexico, Fernandez editores, (1960). 133 p., bibl. (Ensayos pedagogicos, XIV). — The teaching of history constitutes one of the most delicate tasks in education. The value of this subject from the standpoint of training resides in the cult of truth. An analysis of the various changes in the concept of history (comparative, biographical, ethnographic, geographical, etc. methods) leads to an explanation of the attitude to be adopted by history teachers. (IBE)

bibl. — Critical analysis of the programmes, syllabuses and methods of history teaching at secondary schools in Brazil. It is for the teacher rather than for regulations to avoid the dangers both of lessons having a purely political bias and of the excessive memorising of facts, dates, dynasties, etc. Through him the aims ascribed to this subject will be achieved: development of a spirit of impartial critical appraisal; training of a patriotic, civic and democratic attitude open to tolerance and to international understanding. (IBE)

375.44 ECONOMIC SCIENCES — 373.5 VOCATIONAL AND TECHNICAL EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS

ABRAHAM, Karl (Hrsg.). Gedanken zur Wirtschaftspädagogik. Festschrift für Friedrich Schlieper zum 65. Geburtstag am 5. März 1962. Freiburg i.Br., Lambertus-Verlag, (cop. 1962). 194 p., 1 pl., fig., bibl. — Ten studies on educational questions connected with the teaching of economic and social sciences in commercial and vocational courses. The diversity reflected in these articles, sometimes supporting each other, sometimes disagreeing, accords with the desire for objectivity possessed by Fr. Schlieper, to whom this book is dedicated. (1) Modern culture and the teaching of economics; (2) influence of economics teaching on practical vocational training; (3) economical education relationship at the time of mercantilism; (4) vocational education, social education, teaching of economics; (5) relationship between education and the economy; (6) planning the courses of the higher schools of commerce; (7) scientific bases of vocational education and the teaching of economics in modern education; (8) vocational education for adults; (10) development of vocational education in the USSR. List of Fr. Schlieper's publications at the end of the book. (IBE)

375.44 (714) ECONOMIC SCIENCES — 37 N (714) CONFERENCES (CANADA/QUEBEC)

375.5 (81) PHILOSOPHY — 37 P (81) RESEARCH AND INQUIRIES (BRAZIL)

MACIEL, Carlos Frederico. Um estudo-pesquisa sobre o ensino secundário da filosofia. Recife, MEC - INEP, Centro regional de pesquisas educacionais do Recife, 1959. 188 p., notes, app. — Research on the teaching of philosophy at secondary level establishments in Brazil. From certain studies and from an investigation among pupils and teachers at various colleges and secondary schools in the state of Pernambuco it is possible for some conclusions to be drawn, for example that the difficulties encountered in such instruction are due to an internal crisis in philosophy itself and to shortcomings in secondary education (lack of coordination between different subjects, inadequate training of teachers in this field, etc.). As a result of the country's need for quicker industrialisation, philosophy is often regarded as a useless subject and hence the ever diminishing place allotted to it in curricula. A re-appraisal of philosophy teaching is thus seen to be essential and might be made easier by the setting up of an association of philosophy teachers. (IBE)

375.6 RELIGIOUS TEACHING — 375.72 VISUAL ARTS

CARILE, Sergio. Il dipinto spontaneo infantile. Appunto guida per i monitori che vogliono usare il metodo del dipinto nelle scuole domenicali. Torino, Editrice Claudiana, 1961. 77 p., fig., bibl. — Handbook for Sunday-school monitors. Drawing may be considered as a means of expression which can make the teaching of historical facts and anecdotes in religious instruction attractive and more effective. Remarks on psychological aspects involved (drawing as a function of the child's development and as a means of expression) are followed by practical suggestions concerning the interpretation of early attempts at drawing. This theory is illustrated by a series of children's drawings. (IBE)

162
375.6 (42) RELIGIOUS TEACHING (UNITED KINGDOM)
FLETCHER, Ronald. Issues in education. [See 373.10 (42)]

375.6 RELIGIOUS TEACHING
HENDRICK, V. Et vous serez mes témoins. Méthodes et programmes du cours de religion à l'école primaire. Issy-les-Moulineaux (Seine), Editions Saint-Paul, 1963. 191 p. — Syllabuses and methods for teaching of the catechism. Intended for pupils in teacher training schools and staff who give religious instruction at primary level, this guide is based on very broad lines and easily adaptable to local school conditions. I. Methods: statement of various didactic principles applicable to teaching of the catholic religion to children 6 to 12 years of age. II. Syllabuses: model lessons for first classes. (IBE)

375.7 (47) ART TEACHING
BRYCE, Mayo. Fine arts education in the Soviet Union. (Washington), U.S. Office of Education, (1963). v + 74 p., fig., tabl., bibl., app. (OE-14085). — In connection with bilateral cultural exchanges the United States sent a mission to the Soviet Union to study and interpret for American educators (1) the intent and philosophy (dialectical materialism) behind this country's strong support for the arts, (2) the organization, administration and content of arts education programmes. Comprehensive report on the mission's investigation concerning not only the aesthetic education received by children from primary school until completion of schooling but also the special courses for amateurs and professionals (dancing, acrobatics, music, dramatic art, etc.). In the appendix: the study plans in their entirety. (IBE)

375.7 ART TEACHING
LEIF, J.; DEZALY, R. & RUSTIN, G. Didactica de la escritura y de las asignaturas especiales. [See 372.5]

375.7 ART TEACHING — 372.1 PRIMARY TEACHING METHODS — 371.17 THE TEACHER'S LIFE
MARSHALL, Sybil. An experiment in education. Cambridge, At the University Press, 1963. vii + 222 p., 36 pl., notes. — The author describes her "symphonic method" for artistic activities and their planning at school. The success of her pupils in class and at exhibitions prove the value of a method whose prime objective is to awaken the child's interest. The account of eighteen years' teaching experience reveals those factors which, added to an extremely subtle psychology, create an atmosphere conducive to the expression of poetic and visual ideas and give the child a taste for work. (IBE)

375.72 VISUAL ARTS — 377.4 AESTHETIC EDUCATION
BERCY, Jean. L'expression artistique et son contexte pédagogique. Peinture, modelage, dessin. Paris, Editions Fleurus, cop. 1963. 120 p. (Collection "Animateurs"). — All education and teaching should start from the idea of self-expression or of the individual's assertion of his personality, that inner treasure-house of experiences, aspirations, desires, emotions and ideas. Creating is an indispensable activity which airs the inner life, giving unity and balance to the individual. In the light of personal experience the author lists the essential rules for producing true artistic expression and analyses the creative process, following carefully its development. He offers practical advice on methods and on the organization of work in an atelier, describes the ideal conditions for free, partially free or guided activity to thrive, presents several themes for work and assesses their value from the aspect of educational psychology. Those starting to work as inspiring instructors are enabled by this book to work out their own method. (IBE)

375.72 VISUAL ARTS
CARILE, Sergio. Il dipinto spontaneo infantile. [See 375.6]

375.72 VISUAL ARTS — 371.264 METHODS OF PSYCHOLOGICAL DIAGNOSTICS
CASTIGLIONI, Giulio. Intuizione ed espressione. Ricerche di psicologia dell'età evolutiva. (Torino), Società editrice internazionale, (1961). 228 p. + 48 pl., fig., tabl., bibl., notes. (Psicologia e vita, Collana di psicologia applicata ai problemi educativi, 40). — Psychological study of drawing, the child's means of expression, as being a way of grasping the reality and as an indication of mental development. Of the two series of reproductions one illustrates with examples of children's coloured drawings the development of this art,
while the other concerns masterpieces (by Murillo, Dürer, etc.) which were used in a study on their interpretation and the emotions experienced in front of them by children aged 8 to 17 years. Statistical tables for psychological diagnosis. (IBE)

375.72 VISUAL ARTS — 375.91 HANDICRAFTS — 372.8 SPONTANEOUS AND EXPRESSIVE ACTIVITIES

DEAN, Joan. Art and craft in the primary school. London, Adam & Charles Black, (1963). 184 p., fig., pl., ind. — Practical information concerning the techniques, tools and material which may be employed at primary level in the teaching of drawing, painting, needlework, modelling, carving, woodwork, bookwork, fabric printing, weaving, puppet making, etc. Discussion on the aims of art and craft teaching, on the factors which influence the child's drawing and painting, on how his progress can be guided and the natural freshness of his work retained. Facts about colour, harmony, line, form and composition in drawing. Suggestions concerning a plan for classifying the various artistic activities according to age level in the primary school (5 to 7 years, 7 to 9 years, 9 to 11 years). (IBE)

375.72 VISUAL ARTS — 375.79 APPLIED ARTS

DIMMACK, Max. A dictionary of creative activities for school use. Melbourne, [etc.], Macmillan and Co., 1962. 199 p., fig. — Detailed and illustrated explanation of artistic activities and handwork most apt to stimulate the child's creative imagination. Nearly 200 ideas for handwork, drawing, painting, etc., all of which can be carried out in the classroom and at a very low cost, will assist the teacher in encouraging pupils to express their personality through shapes and colours as well as in varying their artistic activities. (IBE)

375.72 VISUAL ARTS — 377.4 AESTHETIC EDUCATION — 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE: NEW EDUCATION

FREINET, Elise. L'enfant artiste. Cannes, Imprimerie Robaudy, s. d. 168 p., fig., pl. — In the light of experiments carried out by the Freinet school, this abundantly illustrated work emphasizes the importance of aesthetic education. The child's personality and spontaneity, curbed by the external discipline of the so-called traditional school, demand the creative liberty without which education would be seeking " mere scholastic achievement ". This natural branch of educational procedure, based on the child's free expression, makes use of modern and effective educational techniques. (IBE)

375.72 VISUAL ARTS

HARTKE, Friedrich. Die Seele des Kindes in Zeichnung und Schrift. [See 371.264]

375.72 VISUAL ARTS — 372.8 SPONTANEOUS AND EXPRESSIVE ACTIVITIES — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

IGNAT'EV, E.I. Psihologija izobrazit'noj dejatel'nosti detej. 2nd Ed. Moskva, Gosudarstvennoe uchebno-pedagogiceskoe izdatel'stvo Ministerstva prosvechenija RSFSR, 1961. 233 p., fig., bibl. — Psychological analysis of graphic representation and expression in the case of children as well as in that of art students and drawing teachers. In reviewing various concepts the author describes the figurative process, which reflects not an isolated faculty but the whole personality such as it has been conditioned by the individual's way of life and by the up-bringing and education he has received. By use of the dialectic method the author seeks an objective explanation of the findings. This method requires each phenomenon to be examined in all its complexity, in its development and in all its interconnections and hence the account which is given of the difficulties and contradictions encountered in understanding the successive stages. Analysis of the artistic activity appraised should make it possible to understand the activity of the lower levels. (IBE)

375.72 VISUAL ARTS

LEWICKA, Janina & CZAJKOWSKI, Stanislaw. Zakcia *stymie z dzieemi klas pocuitkowych. Warszawa, "Nasza Ksiegarnia", 1963. 124 p., bibl. — Teacher's guide, amply illustrated, for instruction in the visual arts at primary level. Planning the work and preparing the subject matter; ways of proceeding (from nature, memory, according to fantasy); techniques (modelling); materials (paper objects); interior decoration; costumes for games and entertainments, etc. Role of exhibitions, museums and craftwork as aids in such instruction. (IBE)
MAFRA DE SOUZA, Alcício et al. Apostilas de didática de desenho. [Rio de Janeiro], Ministério da Educação e Cultura, Campanha de Aperfeiçoamento e Difusão do Ensino Secundário, (1959). 103 p., fig., tabl. — Material which, contributed by a group of specialist teachers, deals with the teaching of drawing at primary level. Topics chosen: aim and three main functions (cultural and educational, utilitarian, social) of such teaching; drawing teaching in relation to differential and evolutionary psychology; questions of motivation; preparation of programmes for drawing (geometrical, decorative, from nature); evaluation of pupil progress; teaching material; out-of-school activities (art clubs, exhibitions of competitive work, etc.). (IBE).

PIAZ, Riccardo dal. Linguaggio grafico e arte infantile. Nelle scuole materne ed elementari. (Torino), Società editrice internazionale, (1962). 382 p., fig., bibl. — Detailed and amply illustrated study of drawing in the case of children 3 to 11 years old. The aesthetic aspect is considered from both the objective and the subjective point of view or that of the perfection in execution and that of drawing as being a “mirror” of the personality. The main subjects depicted in children’s drawings (persons, houses, trees) are discussed in regard to the different stages of their development and consideration is given to the representation of subjects situated in the different planes, that is to the question of perspective. Also dealt with are questions of decoration, special work (cutting out paper, painting with fingers, etc.) and plastic expression. (IBE)

PLUCKROSE, H. Picture making with juniors. London, Oldbourne, (1963). 144 p., fig., pl., app. (Modern Education Library). — Practical guide for teaching of drawing in the primary school. Many suggestions in regard to various activities which may be introduced during lessons. Amply illustrated, the chapters deal with the basic material necessary, painting, pasting, fresco and mosaic work, etc. (IBE)

the different ways in which the human body is represented (details of members, head, clothes, setting, etc.). It was initially assumed for the research that such drawings could be used as a quick method of detecting backwardness and abnormality. Conclusion: if there be any longitudinal discrepancy between the child studied and the norms based on the classic work of Luquet, Fay, Goodenough and others (discrepancy probably due to schooling) it is noted that this comparative study gives confirmation to the genetic development of children's graphical representation. (IBE)

375.73 APPELICATION OF FILMS AND TELEVISION
ZIELINSKI, Johannes et al. Der Spielfilm im Schulunterricht. Einführung in eine besondere Unterrichtslehre der Filmereziehung. Ratingen, A. Henk Verlag, (cop. 1959). 236 p., bibl., notes. — Report on work which was carried out by a study circle of the educational seminar at the University of Munster (Westphalia) and which constitutes an important contribution to teaching the appreciation of films at school. How can the teacher make his pupils aware of the phenomenon of "the film" in such a way that they will have a critical attitude in regard to it? Several specialists discuss the matter in relation to the different schooling levels, consider various aspects and methods of such education and comment on some examples of typical films and the problems raised by their appreciation in class. Other matters examined: educational possibilities of films in foreign languages; spontaneous discussions of films; training of the teacher, etc. At the end of the book are suggestions regarding a film course and a questionnaire for teachers. (IBE)

375.75 MUSIC — 375.05:373.15 (494) LOWER SECONDARY SCHOOLS SYLLABUSES (SWITZERLAND)

375.75 MUSIC
COLLINS, Gertrude. Violin teaching in class. A handbook for teachers. London, etc., Oxford University Press, 1962. xiv +185 p., fig., bibl., app. — A violonist shares the benefit of her many years' experience as a teacher of the violin to school classes. Suggestions concerning: the care of instruments; a general scheme of work (including plans for each lesson); fingering, holding the violin, bowing; orchestral playing, etc. (IBE)

375.75 MUSIC
JODE, Fritz. Das schaffende Kind in der Musik. Eine Anweisung für Lehrer und Freunde der Jugend. Neuaufflage anlässlich des 75. Geburtstages des Verfassers. Wolfenbüttel & Zürich, Möseler Verlag, (1962). 325 p., fig. — New edition of a work originally published under the title "Musik und Erziehung" in 1917. From being purely "reproductive", music is endeavouring to become "productive" and appeal to the child's imagination and improvisation. This trend should lead to a consequent revival in elementary instrumentation and is connected with the "Musical youth" movement which developed in between the two wars and produced a renewed attitude to music and its school role. (IBE)

375.75 MUSIC
ŠACKAJA, V.N. Muzika v škole. Moskva, Izdatelstvo Akademii pedagogičeskih nauk RSFSR, 1963. 168 p., bibl., notes. (Institute of Aesthetic Education, The Teachers' Educational Library). — Under the title "Music and the school" and relating to aesthetic education, a guide for music teachers of classes IX to XI. Description of methods designed to arouse interest in the theoretical study of musical means of expression. Passages from works belonging to different types serve to illustrate the detailed explanations concerning the problems of structure and the phenomena of perception. (IBE)

375.75 MUSIC — 377.4 AESTHETIC EDUCATION
Discussion of music education or "musische Erziehung" (music, rhythm, dancing, folklore, poetry), its historical origins (Greek lyricism, German "Wandervögel") and the development of musicalness among contemporary German youth (musical youth movement) and elsewhere. Such education is the opposite of and counterbalances contemporary materialism. Its social and psycho-therapeutical influence is considerable. In international reconciliation the voice of music is more direct than that of speech. The desire for a certain perfection continues to depend upon a discipline and educational principles. Hence the importance of music schools and the various manifestations of choral and rhythmic art as well as the necessity for teachers to be informed, even if aesthetic education still extends beyond the scope of the institution, the school and the group. (IBE)

375.75 MUSIC
STANGE, Hans & KUCERA, Kathrina. Beiträge zur Methodik des Musikunterrichts in den Klassen 5 bis 8. Berlin, Volk und Wissen Volkseigener Verlag, 1961. 215 p., fig., bibl. — Place, aims and content of the programme for music education in classes V to VIII of the general polytechnical school in the German Democratic Republic. Detailed illustrated description of model lessons in the music scale and in singing (notes, keys, times, rests, pitch, tone, rhythm, canon, etc.). (IBE)

375.76 DANCING — 372.1 PRIMARY TEACHING METHODS
MURRAY, Ruth Lovell. Dance in elementary education. A program for boys and girls. 2nd ed. New York, [etc.], Harper & Row, (1963). xii+451 p., fig., tabl., bibl., ind. (Harper's Series in School and Public Health Education, Physical Education and Recreation). — Second edition, revised and enlarged, of a guide on the role of dancing in elementary education as well as on its creative value and the material and games appropriate for developing ability in regard to movement and rhythm in young children. Suggestions as to how dances may be performed after beginning with the different steps or rhythms already learnt, games involving rhythmic responses from the children, popular songs, poems, etc. Description of the various teaching methods applicable in elementary school classes. (IBE)

375.83 HEALTH AND SAFETY TEACHING — 371.12 TRAINING OF PRIMARY AND SECONDARY TEACHERS — 37 N ( =) INTERNATIONAL CONFERENCES
ORGANISATION MONDIALE DE LA SANTÉ. Bureau régional de l'Europe & UNESCO. La préparation des enseignants à l'éducation sanitaire. Rapport sur un Symposium organisé conjointement par le Bureau régional de l'Europe de l'O.M.S. et l'Unesco, Paris, 7-16 décembre 1961. 44 p. ron., fig., tabl., bibli., app. — Report on the symposium (Paris, December 1961) organized jointly by Unesco and the regional bureau for Europe of the World Health Organization. How, in European countries, to stimulate action at local and national level for the promotion of health education in schools and the training of teachers for the subject? Practical aspects of such education mainly considered: (a) health needs of the child; (b) present situation in regard to the problem in Europe; (c) programmes and methods of such education at schools and at teacher training institutions; (d) training of teachers for health education; (e) present possibilities of improving such education at schools. In the appendix: bibliographical references; the working papers for the symposium. (IBE)

375.83 HEALTH AND SAFETY TEACHING
PIRRIE, Denis & DALZELL-WARD, A.J. et al. A textbook of health education. (London), Tavistock Publications, (1962). x+314 p., pl., tabl., bibl., ind., app. — General theory relating to health education — the latter considered as a separate discipline — and intended for teachers and students. Implications which knowledge in the fields of anatomy, physiology and nutrition has for human life. Programmes and methods. I. General principles: study of health education; history; aims; biological and social bases; evaluation. II. Health education in the school: investigation and research; mental health. III. Health services in the school. IV. Youth clubs; food hygiene; foot health; dental hygiene; cancer; accidents. V. Methods and media in health education. (IBE)

375.83 HEALTH AND SAFETY TEACHING
WEGMANN, Rudolf. Der Urfeind der Erziehung. Die Suchtgefährdung unserer Jugend als pädagogisches Problem. Freiburg i.B., [etc.], Herder, (cop. 1962). 145 p., fig., tabl., bibli. (13 p.). (Das pädagogische Gespräch, Aktuelle Veröffentlichungen des Willmann-Instituts, München-Wien). — Responsibility for the intoxication of youth by alcohol, tobacco and all other kinds of excess, by the effect of physical, emotional or mental fanaticism and other narcotics on will-power and the senses, is to be found not only in the individual’s natural propensities but also in the influence of the environment, in the surrounding disorder of the adults’ world. Prevention, healing or control of such intoxication is a matter not only for psychiatry and medical science but also for education. The author systematically investigates the causes of this disorder and suggests remedial procedures and specific educational measures. Before becoming a chronic disease such intoxication can be combated by information and education. The question is that of the limit beyond which the adult’s responsibility is involved to the point of becoming an essential safeguard. (IBE)

375.831 (45) ROAD SAFETY (ITALY)
SAMMARTANO, Nino. Le strade sono piene di sangue. Cinque saggi per l'educazione stradale. Roma, Edizioni " Nuova Rivista pedagogica ", 1961. 95 p., bibli. notes. (Piccola biblioteca pedagogica, N. 10, L'uomo e l'ambiente). — Teaching of road safety having become a necessity, the task is now to introduce it in the curriculum and draw up the programme, which could be combined with that of physical education. In this series of articles the subject is considered from the point of view of its teaching and the school organization as well as even in its legal and civic aspects. (IBE)
375.85 (430.2) VOCATIONAL INITIATION — 372.223 (430.2) SENIOR PRIMARY SCHOOLS (FEDERAL REPUBLIC OF GERMANY)
Roth, Heinrich & Blumenthal, Alfred (Hrsg.). Schule und Arbeitswelt. Hannover, [etc.], Hermann Schroedel Verlag, (cop. 1963). 90 p., fig., bibl. notes. (Auswahl, Grundlegende Aufsätze aus der Zeitschrift "Die deutsche Schule", Reihe A, 2). — Leading articles selected from the periodical "Die deutsche Schule" and which could serve, in the ninth school year, as an introduction to the world of work. Particulars in regard to the experiment conducted at Hamburg schools, where a three-week course of training was introduced in grade IX. I. Theory of technical training (E. Fink). II. Instruction in the subject and in the technical processes (E. Kley). III. Information on the vocational training introduced in the final year of compulsory schooling (G. Kudritzki). (IBE)

375.9 (438) TECHNIQUES TAUGHT AT SCHOOL — 377.33 (438) EDUCATION WITH A VIEW TO WORK (POLAND)

SZCZERBA, Wiktor. O wychowaniu przez pracę. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1961. 176 p., tabl., bibl., notes. — Historical survey, together with the doctrines, problems and some practical examples, of education by work, particularly in Poland. According to Marxist doctrine, work is the source of all wealth and in conformity with socialist morality everyone is required to give to the community all of which he is capable in order that he may in return receive what he needs; this is why work should be given a predominant place in education. It is for the socialist school to provide a harmonious link between school study and the learning of productive work in order to instill in schoolchildren not only practical knowledge but also the habits and "know how" necessary either for becoming workers or for proceeding with studies which lead to production of all types of wealth. The value of work taught simultaneously with study will result in giving to all social activity a meaning in which an awareness of the dignity and importance of work is ever present. (IBE)

Malmöquist, Eve. Skrivmaskiner i den elementära lär- och skrivundervisningen. En experimentell studie. (Stockholm), Kungl. Skolöverstyrelsen, (1962). 105 p., fig., tabl., bibl. (Summary in English). (Forskningsrapporter från Statens Försökskola i Linköping, Nr 2). — Report on an experiment conducted at the National School for Educational Research in Linköping (Sweden), involving two classes in an experimental group and two classes in a control group. The investigation was concerned with the use of typewriters in the teaching of reading, writing and spelling to pupils in the experimental group (first two primary grades); the control group received the same tuition but did not use typewriters. The results of the experiment, which it is considered should be continued, were positive from several points of view: (1) learning by the first group of an additional skill (typing) with the same number of lessons of the same length; (2) progress in spelling slightly greater than in the case of second group; (3) better punctuation; (4) equal quality of handwriting; (5) slightly less speed in writing; (6) slightly more accuracy; (7) pupils' interest unabated throughout the experiment. (IBE)

375.95 AGRICULTURE — 371.388 PRODUCTIVE WORK AT SCHOOL

use of teachers who are responsible for instruction in rural studies at all levels. Educational value of this subject which is intended to ensure a connection with practical life and living things as well as with other subjects in the curriculum. Organization of rural studies at school; lay out of necessary ground; growing of plants, vegetables and fruit trees; livestock breeding; necessary tools and equipment; role of young farmers' clubs, etc. (IBE)

375.95 (47) AGRICULTURE (USSR)
SOLOV'EV, A.F. Vospitanie usil'nych v processe truda. Moskva, Gosudarstvennoe uchebo-pedagogicesko izdatel'stvo Ministerstva prosvescheniya RSFSR, 1961. 212 p., fig., tabl. — Description of the methods adopted in the work at a general education school situated in a rural environment and of the procedures employed not only for instilling in the schoolchildren a love of agricultural work but also for developing their initiative and their sense of social responsibility. To convince the pupil that study and work are inseparable it is important that the agricultural activities do not constitute just a game or a school exercise but that they be of use to all, allow of rivalry and help to develop both the capacity of the organization and the habit of serving the collectivity. 376.1 EDUCATION OF GIRLS
LUCKER, Elisabeth. Die praktisch-intellektuelle Begabung der Mädchens in ihrer Bedeutung für ihren Berufseinsatz. [See 377.94]

376.1 (439) EDUCATION OF GIRLS — 37 B (439) HISTORY OF EDUCATION (HUNGARY)
OROSZ, Lajos. A magyar nőiskolás útmutat. Budapest, Tankönyvkiadó, 1962. 386 p., pl., notes. (Pedagógiai Tuományos Intézet). — Accompanied by ample documentation, this study on "The pioneers of education for women in Hungary" retrace the history of girls' education from 1777 to 1867. The analysis of the pioneers' work also shows the close connection which the movements for the emancipation of women and the education of girls have with the struggles for national independence. (IBE)
376.1 (54) EDUCATION OF GIRLS (INDIA)

SENGUPTA, Padmini. Women’s education in India. (Delhi), Ministry of Education, Government of India, 1960. ii+30 p., tabl. — History and nature of women’s education in India. The pattern of such education is traced from nursery school to university, including social education, literacy classes, community centres, youth movements, teaching. Brief review of requirements for the future education of Indian women. (BIE)

376.3 (73) CO-EDUCATION — 376.7 (73) ADOLESCENCE (UNITED STATES)

LODUCHOWSKI, Heinz. Teenager und Koedukation? Jugend der freien Welt in Gefahr. 2. Aufl. mit einem Nachwort... Freiburg i.B., [etc.], Herder, (cop. 1960-61). 125 p., tabl., bibl. (Das pädagogische Gespräch, Aktuelle Veröffentlichungen des Willmann-Instituts, München-Wien). — Study on the moral crisis affecting present-day youth in relation to school and out-of-school co-education in the United States. Dangers which such education involves for “teenagers” (13 to 19 years of age) as well as for the spirit in which this co-education should be understood. The author protests strongly against the commercialisation of young people’s ways and emphasises its harmful effect. This study is partly based on the findings of the Kinsey report and on views of noted anthropologists, sociologists and educators. The “pros” and “cons” of co-education considered from the economic, pragmatic, historical, political, social and biological points of view. (IBE)

376.3 CO-EDUCATION

MAZZEO, Arturo. La coeducazione. (Classi maschili, femminili e miste). Urbino, Armando Argalia Editore, (1962). 92 p. (“Collana Saggi di Pedagogia”, 3). — Believing that life is “a school with a co-education system” Arturo Mazzeo takes up the case against separation of the sexes in education and teaching. He cites from educators who have considered the question of co-education and mentions the opinions of such authors as Plato, Vittorio Rambaldoni, Paul Geheeb, Cécile Reddie, Gabriel Campayre, Ferrière, Giovanni Calò and Elisabeth Huguenin. His conclusion is that although there may be some drawbacks in the system of co-education which already exists (for practical reasons) in country areas, it has on the other hand many advantages from the standpoint of character training. (IBE)

376.5 EARLY CHILDHOOD — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

SPIONEK, Halina. Rozwój i wychowanie małego dziecka. (Warszawa), “Nasza Ksiągarnia”, 1963. 384 p. + 30 pl., fig., tabl., bibl. (Biblioteka wiedzy pedagogicznej). — Description, based on already known data relating to the education of the very young and on the author’s long experience, of the psychic and physical changes in children until the age of five years. Individual, anatomical and physiological factors involved in growth and in psychic development from birth as well as in the influence of education. (IBE)
376.5 EARLY CHILDHOOD — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 377.24 CHILDREN'S FAULTS
ZULLIGER, Hans. Kinderfehler im Frühalter. Zürich & Stuttgart, Werner Classen Verlag, (cop. 1961). 125 p., bibl. (Angewandte Psychologie). — Most frequent faults in youthful behavior: rebellion, fabulizing, stealing, lying, shameless imagination, etc. Origin of sentiment from earliest age onwards, the thought process, the motives for incongruous words and actions. How to avoid these undesirable tendencies and, in persistent cases, to seek the psychologist's help. (IBE)

376.6 CHILDHOOD — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 377.1 RELIGIOUS EDUCATION
BAGOT, J.-P. et al. Les 12-14 ans, un âge charnière. Paris, Editions Fleurus, (cop. 1963). 159 p. (Cahiers d’éducateurs, 3). — In eight chapters, written by different authors, a portrait is given of the child 12 to 14 years old (the “awkward age”) and certain problems relating to pre-adolescence are discussed. These questions are of interest both to parents and to educators anxious to understand this “turning point” not only in its physical aspect, involving the physiological changes at puberty but also in regard to the family and the conflicts arising between parents and children. Discussion, in particular, of the development of the adolescent’s nascent personality in relation to his environment, religious feeling, faith, ethics and growth in responsibility. (IBE)

376.7 ADOLESCENCE
BABIN, P. (sous la direction de). Dieu et l’adolescent. [See 377.1]

376.7 ADOLESCENCE — 371.02 EDUCATION AT HOME — 371.450 CHRISTIAN EDUCATION
BABIN, P. & VIMORT, J. Avec nos adolescents. [Lyon], Editions du Chalet, 1963. 123 p. — Thoughts and advice which, on some essential questions involved in the education of adolescents, are offered to help parents in regard to their heavy responsibility when the adolescent is becoming of adult age. Testimonies and thoughts of adolescents and parents concerning certain current problems (passion for life, youth “gangs”, religion, first love). (IBE)

376.7 (81) ADOLESCENCE — 37 P (81) RESEARCH AND INQUIRIES (BRAZIL)
BAQUERO, Godeardo & FRANTZ, P. Theobaldo. Assim falam Ales e elas. Pesquisa dos problemas do adolescente brasileiro realizada em Porto Alegre. (Porto Alegre), Centro Regional de Pesquisas Educacionais do Rio Grande do Sul, INEP, Ministério de Educação e Cultura, (1962). xii+187 p., fig., tabl., app. (Summary in English). (Publicações do C.R.P.E. do Rio Grande do Sul, Série I — Pesquisas e Monografias — Volume II). — Report of an inquiry on typical problems of Brazilian adolescents and on their lives as students. A questionnaire consisting of 330 items (“Mooney Problem Check List” translated into Portuguese) was presented to over 1,400 pupils 13 to 17 years old (half of them girls, half of them boys) at 15 urban secondary schools (both public and private) in the city of Porto Alegre. Among the matters examined (according to age and sex): living conditions; physical development; adjustment to school and to school work (as regards syllabuses and teaching methods); personal, family, psychological and social relationships; group activities, leisure; moral and religious life, etc. (IBE)

376.7 ADOLESCENCE — 377.1 RELIGIOUS EDUCATION
BARBEY, Léon. L’orientation religieuse des adolescents. (Paris), Editions de l’Ecole, (1963). 140 p., fig., tab., bibl. (No. 807). — Having found that, in adolescents, individual differences due to temperament, character and sex do not in any way affect the fundamental Christian vocation, the author explains that these differences nonetheless govern the various ways in which the religious life is expressed. The environment in which the child has lived and still lives also has its influence. This twofold observation should encourage Catholic educators to study the general characteristics of the adolescent without however losing sight of the individual characteristics of each young person with whom they come into contact. The book includes a section on adolescent psychology and one on the religious training of adolescents in a Catholic context. (IBE)

376.7 ADOLESCENCE — 37 P (44) RESEARCH AND INQUIRIES (FRANCE)
FÉDÉRATION FRANÇAISE DES MAISONS DES JEUNES ET DE LA CULTURE. Enquête de l'Unesco sur les valeurs auxquelles les jeunes sont attachés en Orient et en Occident. Rapport. Paris, F.F.M.J.C., s.d. 129 p. ron., fig., tabl. — Report on an inquiry conducted by Unesco in 1962, among young people 16 to 25 years of age in several French localities, on the values to which the young in the East and the West are attached. Examination of the 1000 questionnaires completed (500 by girls and 500 by boys) shows the values on which the young base their lives. Statistical analysis of the replies in relation to age, vocation, residence, order of birth in the family. Need of human relationships; hopes in humanity, science, etc.; views about marriage, race, the sexes, suffering, materialism, etc. Consideration of the significant common features revealed by the replies, indicating the particular values of young people in the West. (IBE)

376.7 ADOLESCENCE — 373.5 (492) VOCATIONAL AND TECHNICAL EDUCATION — 37 P (492) RESEARCH AND INQUIRIES (NETHERLANDS)
GALAN, C. de & NELISSEN, H. Onze technische schooljong. [5th ed.]. Haarlem, [etc.], De technische uitgeverij H. Stam, (1960). 196 p., tabl., bibl. — Study relating to pupils attending Dutch technical and vocational schools and to the behaviour of these pupils from the age of puberty to adult age. This fifth edition of the book has been rearranged as a result of fundamental changes in the names and organization of technical and vocational schools in the Netherlands. (IBE)

376.7 ADOLESCENCE
GEISSLER, Erich E. Der Gedanke der Jugend bei Gustav Wyneken. [See 37 C]

376.7 ADOLESCENCE — 377 EDUCATION OF THE PERSONALITY
Hence as a teacher the author offers, in brief notes written in a confidential tone for young people, certain explanations and suggestions concerning some fifty current problems which interest or worry them. He is beside them in the classroom, shares with them when they dream as heroes or imagine exceptional lives and accompanies them in all the small details of daily life in order to help them find their path. He has confidence in the young, boys and girls, knows the resources which they harbour, their idealism as well as their sense of justice and realities. (IBE)

376.7 ADOLESCENCE — 370.47 SOCIOLOGY AND EDUCATION — 371.02 EDUCATION AT HOME

KAUFMANN, Richard. Gebrannte Kinder. Die Jugend in der Nachkriegszeit. Düsseldorf, Econ-Verlag, (1961). 377 p., bibl. notes. — Factors responsible for the revolt of young people belonging to the post-war period: conditions of existence within the physical, psychic and emotional setting of the family; housing conditions and social life in general; dangers due to over-rapid industrialisation and to the unlimited freedom characteristic of modern education; emotional shortcomings of educators. In addition, too much money and power in the hands of today's young people during a period of buoyant economy as well as the needs of too shortsighted productivity have sapped morality and resulted in the sense of values being lost. While identifying the causes which set society against a certain section of youth which is thus sometimes driven to crime, the author explains the duty which adults have to provide the child with security and help the young to preserve their own existence during a period when technical progress is outstripping the law. (IBE)

376.7 (73) ADOLESCENCE (UNITED STATES)

LODUCHOWSKI, Heinz. Teenager und Koedukation? [See 376.3 (73)]

376.7 ADOLESCENCE — 371.02 EDUCATION AT HOME

REINPRECHT, Hansheinz. Liebe, Jazz und bange Eltern. Graz, [etc], Verlag Styria, (1962). 352 p., fig. — Informative work on relationships between parents and children, especially at the period of the latter's adolescence. Research undertaken by Dr. Reinprecht (educator at the "S.O.S. children's village" at Hinterbrühl near Vienna) enables him confidently to show parents and teachers how practical solutions, in the fields of psychology and education, may be sought for psychopathological and other problems in adolescents. Some essential questions are dealt with, explaining among other things the phenomenon of revolt in young people. Assuming that all, parents and children alike, have inherent abilities the author proposes a method of education which he calls "educational optimism", based on very positive criteria, in particular on an essential understanding between generations. (IBE)

376.7 ADOLESCENCE — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

376.7 ADOLESCENCE — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 371.86 SCHOOL-CHILDREN'S LEISURE

RÖßNER, Lutz. Jugend im Erziehungsbereich des Tanzes. Bern & Stuttgart, Gemeinschaftsverlag Hans Huber — Ernst Klett, cop. 1963). 100 p., bibl. notes. (Abhandlungen zur Pädagogischen Psychologie, Band V). — Based on observations made at a youth centre called "Heim der offenen Tür" (House of the open door) for boys and girls free to spend their leisure time, this study considers various psychological and social aspects of dancing. How dancing, considered as a communal pastime, fulfils young people's need to relieve their tensions, aggressivity, anxiety, etc. Worked out on the basis of experience, the "pedagogy of dancing" contributes to the full development of the youthful personality and gives young people some ideas of behaviour, social life, courtesy, culture, aesthetic and musical education, relationships between the sexes, international understanding, etc. (IBE)
376.7 Adolescence — 370.47 Sociology and Education

Tenbruck, Friedrich H. Jugend und Gesellschaft. Soziologische Perspektiven. Freiburg i.B., Verlag Rombach, (1962). 127 p., notes. ("Soziologie", Schriftenreihe zu grundsätzlichen und aktuellen Fragen). — Examination of the factors which are responsible for today's youth as it is, ill prepared for passing from family and communal life into modern society. Necessity of helping the adolescent overcome this stage and adjust himself to new situations very different from those of the child's life in a group. In order to aid young persons it is important first to know them and, in particular, study the problem of their relations with society. (IBE)

376.7 (42) Adolescence — 37 P (42) Research and Inquiries (United Kingdom)

Veness, Thelma. School leavers. Their aspirations and expectations. London, Methuen & Co., (1962). xxv+252 p., fig., pl., tabl., bibl., notes, ind., app. — Results of a research carried out among several hundred British schoolchildren (boys and girls) concerning their aspirations in regard to the following: marriage, children, a home, etc.; future work; preoccupations (health and appearance, possessions and leisure, world affairs); motivations (desire for advancement, attitudes to ambition, etc.). (IBE)

377.1 Religious Education — 376.7 Adolescence — 136.7 Child and Adolescent Psychology

Babin, P. (sous la direction de). Dieu et l'adolescent. [Lyon]. Editions du Chalet, 1963. 319 p., tabl., bibl. (Collection "Chemins de la foi"). — Report on an inquiry held for studying what sense of God and thus what religious state of mind is possessed by adolescents among Catholics. Nearly 2,000 boys and girls attending both public and private schools replied to a questionnaire in which they were first asked "For you, what is God?" From the replies, broken down firstly according to age group (11 to 13 years, 13 to 15 years, 16 to 19 years, corresponding respectively to pre-adolescence, adolescence,
full adolescence) and then according to sex and the school setting, it is possible to draw conclusions regarding the nature of the changes in the concept of God during the period preceding adult age. With the aid of tables, graphs and statistics the present study, if not enabling the adolescent’s religious faith to be assessed, should nevertheless serve to guide educators in their religious instruction. As an indication, the first question was put to some hundred young Protestants. (IBE)

377.1 RELIGIOUS EDUCATION

377.1 RELIGIOUS EDUCATION
BARBEY, Léon. L’orientation religieuse des adolescents. [See 376.7]

377.1 RELIGIOUS EDUCATION — 371.02 EDUCATION AT HOME
GODIN, André. Le Dieu des parents et le Dieu des enfants. (Paris), Casterman, 1963. 121 p., bibli. notes. — Three studies dealing on the basis of religious psychology with the concerns which occupy Catholic educators in their preparation of the child for a genuine relationship with God. In his meeting with the mystery of divinity, man looks through the image he has formed of God and the priest. Such inner visions are formed under the influence of environmental factors, particularly the relationship between the child and his parents. Parents and educators should be given the capacity of discerning the dominant features of psychic development and made to understand how, at each stage in the unfoldment of emotional life, religious consciousness either awakens or risks becoming distorted. The book contains illustrative examples of conversations and exchanges of view with parents. (IBE)

377.1 RELIGIOUS EDUCATION — 371.92 MENTALLY HANDICAPPED — 37 P (∞) RESEARCH AND INQUIRIES (VARIOUS COUNTRIES)
PAULHUS, E. L’éducabilité religieuse des déficients mentaux. Lyon, Emmanuel Vitte, 1962. 390 p., tabl., bibli. (Animus et anima). — Is it worth while teaching religion to mentally handicapped children? An endeavour to answer this question is made by a priest who is principal of a school for specialist teachers. From a point of view which is psychological as well as social and educational he makes a careful examination of the many studies carried out in several European countries and French-speaking Canada concerning the religious lives of the mentally handicapped. This comprehensive survey indicates that the mentally handicapped are educable in the matter of religion and worthy of so being. Although receptive particularly in regard to the intuitive and symbolical aspects of religious life they are able to reason and explain or to make abstractions. Hence the educator’s difficult task since he must find educational methods appropriate to the mentality of such children. Research should consequently be continued in particular on the teaching of the catechism to the mentally handicapped. (IBE)

377.2 MORAL EDUCATION
ECKSTEIN, Ludwig. Stufen der Gewissensbildung. Stuttgart, Calwer Verlag, (cop. 1961). 60 p. (Calwer Hefte zur Förderung biblischen Glaubens und christlichen Lebens, Heft 42). — The training of conscience in children is the central task of education at present and constitutes one of the most delicate problems in all education. This booklet examines in a Christian context a certain number of concrete situations connected with moral education. (IBE)

377.2 MORAL EDUCATION
FRIEBEL, Horst. Die Bedeutung des Bösen für die Entwicklung der Pädagogik Schleiermachers. [See 370.3]
377.2 (47) MORAL EDUCATION (USSR)

KOLBANOVSKIJ, V.N. & KRUTECKIJ, V.A. (Ed.). Voprosy psihologii naravstvennogo razvitija škol'nikov. Moskva, Izdatel'stvo Akademii pedagogičeskikh nauk RSFSR, 1962. 196 p., tabl., bibl. notes. — Six articles together with accounts of actual observation concerning schoolchildren’s psychological problems and the various stages of moral development. Educational guidance of pupils in upper classes is considered in the light of data obtained among a large number of pupils. Examination of tendencies and desires in regard to their future activity shows that their intentions depend largely upon the planning of their work with a view to production. The articles on moral training describe the effect of discussions based on knowledge about the development of ethical concepts. (IBE)

377.2 MORAL EDUCATION — 377 EDUCATION OF THE PERSONALITY — 370.46 EDUCATIONAL PSYCHOLOGY

RIVERSO, Michele. Psicologia funzionale e problemi pedagogici. Napoli, Libreria Scientifica Editrice, (1960). 176 p., bibl. notes. (Filosofia e Pedagogia). — In the training of moral, religious and social values in children consideration must be given to the specific function of childhood, that is to its importance as regards adult status. The author discusses in turn James’ pragmatism, Claroépé’s functionalism and Piaget’s genetics, in all of which theories experimentation with children is seen as essential aid for the learning of mental operations by children and thus as the basis of all educational action. He then suggests adaptations of these theories for the training of values in children. (IBE)

377.2 MORAL EDUCATION

SPENCER, Herbert. Essays on education and kindred subjects. [See 371.301]

377.2 MORAL EDUCATION

SVADKOVSKIJ, I. F. Naravstvennoe vospitanie detej. Moskva, Izdatel'stvo Akademii pedagogičeskikh nauk RSFSR, 1962. 179 p., bibl. notes. — Account of the author’s theory regarding the moral qualities of the child and the methods to be used to encourage its development. This theory is illustrated by many examples applied to modesty, courage, sincerity, courtesy, love of work, etc. (IBE)

377.2 MORAL EDUCATION — 371.02 EDUCATION AT HOME

WHYTE, Dorothy K. Teaching your child right from wrong. London, Frederick Muller, (1963). 192 p., ind., app. — Even if corruption seems an accepted part of the adult world most parents are eager for their children to acquire the notions of right and wrong as well as a sense of their responsibility to society. Discussion accompanied both by advice and directives on the various aspects of the question and by many examples showing how essential it is for parents and children to trust each other. (IBE)

377.21 CHARACTER EDUCATION — 377.91 MEDICO-PSYCHOLOGICAL AND EDUCATIONAL AID — 137 CHARACTER STUDY

377.21 CHARACTER EDUCATION

DANCY, J.v.a. The pupils schools and the future. [See 373.109 (42)]

377.21 CHARACTER EDUCATION — 371.43 SYSTEMS DISTINGUISHED BY THEIR EDUCATIONAL PROCEDURE: NEW EDUCATION — 37 C LIFE AND WORK OF EDUCATIONISTS

HAHN, Kurt. Erziehung zur Verantwortung. Reden und Aufsätze. Stuttgart, Ernst Klett Verlag, s.d. 100 p., 1 phot. (Aus den deutschen Landerziehungsheimen, Heft 2). — Selected addresses and articles by Kurt Hahn, one of the pioneers of “new education” and founder of the famous school at Gordonstoun (Scotland) as well as of
the first school having a short course for the training of courageous men, namely the Outward Bound Sea School in Wales. I. Thoughts on education (thoughts inspired by Plato). II. Salem: the task of new education (training to produce that humanity which we need). III. Gordonstoun: (a) the crisis in May 1940; (b) lay sermon on compassion; (c) education by the sea and for the sea (education by action for character training); (d) retrospection. IV. Return to Germany: (a) education for responsibility; (b) hopes and concerns of new education. At the end of the volume is a short biographical note and a list of German "new education" schools. (IBE)

LAENG, Mauro. F.W. Foerster. [See 37 CI

377.21 CHARACTER EDUCATION — 377.22 EDUCATION OF THE FEELINGS — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 371.02 EDUCATION AT HOME
MAUCO, Georges. L'éducation affective et caractéristique de l'enfant. Paris, Editions Bourrelier, (cop. 1963). 175 p. (Cahiers de pédagogie moderne). — Practical book which, intended for parents and educators, describes the stages in the child’s emotional development, including the formation of his character, and discusses the factors which may hinder this development (complexes, feeling of insecurity, perversion, emotional claims, anxiety, lack of self-confidence, school failure, etc.). Emphasis on the decisive influence of the social, home and school environment in this development. Importance for parents and educators to have emotional maturity and formed characters since on this depend the parent-children, teacher-pupil and parent-teacher relations. Nature of family relationships and a warning against their impairment; relationships between the family and the school and between the teacher and the pupil when the latter encounters school difficulties. Information on the facilities for psycho-pedagogical aid (consultation centres, schools for parents). (IBE)

377.22 EDUCATION OF THE FEELINGS
MAUCO, Georges. L'éducation affective et caractéristique de l'enfant. [See 377.21]

377.24 CHILDREN'S FAULTS — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY
MALEWSKA, Hanna E. & MUSZYNSKI, Heliodor. Kłamstwo dzieci. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 220 p., fig., tabl., bibl. — Analysis of lying in children based on data collected for the most part in various Polish primary schools in 1958-1959. The evolution of the child's moral sense passes through one or more stages in which the degree and frequency of lying are related to his sex, psychological type, social conditions and the type of education. Methods of investigation and of prophylactic and remedial treatment must take all these factors into account and detect the motives both in the general tendency to lie and in each particular case. Practical advice on how to obtain the child's confidence while acting with consideration for his feelings and preventing him from taking refuge by dissimulation and withdrawal. (IBE)

377.24 CHILDREN'S FAULTS
VIMORT, J. Avec nos enfants. 1. La vie de famille. 2. Leurs défauts. [See 371.02]

377.24 CHILDREN'S FAULTS
ZULLIGER, Hans. Kinderfehler im Umgang. [See 376.5]

377.25 EDUCATION FOR FAMILY RELATIONSHIPS — 371.02 EDUCATION AT HOME
TOBLER, Gustav. Mein Helm - Meine Welt. Zürich, Advent-Verlag, s.d. 254 p., pl., bibl. — Discussion concerning some of the most common problems connected with married and family life. It is shown that health in regard to marriage and such life depends as much on mental and spiritual state as on physical state. Home life is not only a right of human nature but also a bastion of culture such as the author sees it in our heritage of Christian morality. (IBE)

377.255 SEX EDUCATION
BOVET, Th. & SAUSSURE, Y. de. Pour devenir homme. Lausanne, Payot, (cop. 1963). 71 p., fig. — Suitable for adolescents "looking for real love"; a frank and clear introduction in sex education. At this time when the young have unlimited possibilities
of learning all and knowing all it is essential to help them see clearly in order that they may continue to have respect for themselves and others. While the seriousness of the problems is not minimised, these are presented in a natural and simple way. No moralising but a firm line of conduct, showing the young man that true freedom resides in gaining a sense of responsibility based on a personal and living faith. (IBE)

377.255 SEX EDUCATION — 376.7 ADOLESCENCE

377.255 SEX EDUCATION

DUCET, Michel. Problèmes sexuels des jeunes gens et jeunes filles. Les initiations nécessaires. Soissons (Aisne), La Diffusion nouvelle du Livre, (cop. 1962). 220 p., fig. — Survey of present knowledge concerning introduction to the facts of sexual life in their physiological, psychological and moral aspects. The matter is considered from the Christian point of view for the benefit of boys and girls as well as parents and educators. Account of the whole sexual process (this "eternal function"), its positive facets and its negative facets (abortion, birth control, contraception, venereal disease). The book offers to young people reliable information and an opportunity to prepare for accepting the responsibilities and joys of genuine love. (IBE)

377.255 SEX EDUCATION

HEGELEH, Stan. Wie ist das eigentlich Mutter? Acht Gespräche des fünfjährigen Peter mit seiner Mutter über geschlechtliche Fragen. Translated from Danish by Edmund Bickel. München & Basel, Ernst Reinhardt Verlag, (cop. 1961). 39 p., fig. — German translation of a Danish work "Hvordan, mor?" originally published by Branner og Korchs Forlag, Copenhagen. This small picture book presents eight dialogues between a five-year-old boy and his mother. The author admits neither falsehood nor compromise in the replies given to children's questions. The difference between the sexes, pregnancy, birth, conception, are treated in a Nordic spirit of frankness which will perhaps be found astonishing in other countries. (IBE)

377.255 SEX EDUCATION

KENT, Edith. Die Liebeserziehung im Kindesalter. Sexuelle Aufklärung leicht gemacht. Wien & Stuttgart, Wilhelm Braumüller, Universität-Verlagsbuchhandlung, (cop. 1961). 162 p., fig. — Sex education which is healthy and simple and in which the instruction given by parents completes what the child learns by observing makes possible an essential educational task which consists of achieving a balance between instinct and reason. Results of science and of medical practice made available for all by a woman doctor who, by employing some examples and developing certain arguments borrowed from confidences she has received, criticises the evasive or "poeticised" answers too often given by parents to a child who is merely seeking accurate information. (IBE)

377.255 SEX EDUCATION

GuilLeN, E. Loisirs d'aujourd'hui. [See 371.86]

377.26 EDUCATION FOR LEISURE — 37 N (ο) INTERNATIONAL CONFERENCES

PROHASKA, Leopold (Hrsg.). Mensch und Freizeit. Als pädagogisches Problem. Wien & München, Österreichischer Bundesverlag, (1962). 167 p. (Veröffentlichungen des Instituts für Vergleichende Erziehungswissenschaft, Salzburg, Band XV). — Reports on the value of leisure time (how to use it for enriching the human personality), presented at the 11th international congress (July 1961) of the Institute for Comparative Education, Salzburg. In these papers, prepared by university professors, a course adviser, a tutor and a council minister, an endeavour is made to place the concept of leisure on an anthropological foundation and to appraise it as an educational problem in its relation to man's composition as well as to his education, activity, mental and physical health, family and social responsibilities. Particular attention is given to the role of leisure in the general and religious development of youth living in industrialised regions. (IBE)

377.3 (430.2) SOCIAL EDUCATION (FEDERAL REPUBLIC OF GERMANY)

BREUER, Hubert. Du und die Gemeinschaft. [See 375.82 (430.2)]

377.3 SOCIAL EDUCATION

CZARNIEWICZ, Maria. Aktywność społeczna dziecka 12-14 letniego. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 204 p., bibl., notes. — The problem of children’s and young people’s social activities concerns not only educators and parents but the whole community. The political sense of such activities at school has its source in the ideology by which they are prompted. Hence the necessity for an examination of the different types of actual situation in which the educators, environment, social relationships and their repercussions on the school regime are all concerned. Individual emotional characteristics constitute a complex and uncertain element of which account must be taken in the organizing of social activities. In the case of occupations directly suggested to children in this connection the educator must also be presumed to possess a knowledge of all the factors and motives which condition the child’s social activities. (IBE)

377.34 (430.2) POLITICAL EDUCATION — 377.3 (430.2) SECONDARY GENERAL CULTURE EDUCATION (FEDERAL REPUBLIC OF GERMANY)
BONN. BUNDESZENTRALE FÜR HEIMATDIENST. Möglichkeiten und Grenzen der politischen Bildung in der Höheren Schule. (Bonn, Bundeszentrale für Heimatdienst, 1960). 201 p. (Schriftenreihe der Bundeszentrale für Heimatdienst, Heft 52). — Political education in secondary general culture schools, its usefulness, its limitations, etc., constituted the theme of a conference held at Tutzing. Reports concerning political education in the eleven federated States, followed by seven accounts dealing with particular aspects of the question: subject matter; definition of the State’s role; practicability of political education in secondary schools; means of expression; training of professors and teachers; examination of curricula in the federated States, etc. (IBE)

377.34 (430.2) POLITICAL EDUCATION — 377.34 (430.2) POLITICAL EDUCATION — 373.1 (430.2) SECONDARY GENERAL CULTURE (FEDERAL REPUBLIC OF GERMANY)
BONN. BUNDESZENTRALE FÜR HEIMATDIENST. Moglichkeiten und Grenzen der politischen Bildung in der Höheren Schule. (Bonn, Bundeszentrale für Heimatdienst, 1960). 201 p. (Schriftenreihe der Bundeszentrale für Heimatdienst, Heft 52). — Political education in secondary general culture schools, its usefulness, its limitations, etc., constituted the theme of a conference held at Tutzing. Reports concerning political education in the eleven federated States, followed by seven accounts dealing with particular aspects of the question: subject matter; definition of the State’s role; practicability of political education in secondary schools; means of expression; training of professors and teachers; examination of curricula in the federated States, etc. (IBE)

377.34 (430.2) POLITICAL EDUCATION — 377.34 (430.2) POLITICAL EDUCATION — 373.5 (430.2) VOCATIONAL AND TECHNICAL EDUCATION (FEDERAL REPUBLIC OF GERMANY)
BONN. BUNDESZENTRALE FÜR HEIMATDIENST (Hrsg.). Politische Bildung in der Berufsschule. (Bonn, Bundeszentrale für Heimatdienst, 1961). 180 p., fig. (Schriftenreihe der Bundeszentrale für Heimatdienst, Heft 56). — Ten reports on various aspects of political education and civic training in vocational schools (pupils aged 17 to 20 years), presented at a conference convened in Tutzing in 1960 by the Ministries of Education in the Federal Republic of Germany. Such political education, broadly defined as general information or, in the contemporary restricted sense, as a means of defending democracy, is difficult to give for the following reasons: (a) range of topics to be dealt with; (b) limitations set by the syllabus and time-table; (c) biological and social differences among pupils. It is consequently necessary to make use of aids such as the radio, television and films. (IBE)

377.34 (430.2) POLITICAL EDUCATION — 377.34 (430.2) POLITICAL EDUCATION — 375.42 (430.2) HISTORY — 375.825 (430.2) INTERNATIONAL TEACHING (FEDERAL REPUBLIC OF GERMANY)
BUCHHEIM, Max. Arbeitsmaterial zur Gegenwartskunde. 2. Aufl. Hannover, [etc.], Hermann Schroedel Verlag, (1962). 376 p., tabl., ind., app. — Work intended for teachers of history and political economy to enable them to inform present-day youth as objectively as possible about the humanitarian and political consequences of national socialism and the war. Material taken from archives, periodicals and information bulletins is arranged and annotated for a study to be made of contemporary history relating to Germany and, more generally, to Europe and the world. The facts relate mainly to the period preceding the first world war, the intervening years, the Hitler period, the Third Reich, the Federal Republic, including the Berlin question and international relations. The material is arranged with reference to two major contexts: (a) the Jewish question in the national socialist state; (b) the school under the Third Reich. The final part of the volume deals with Europe and European institutions, the United Nations and its specialised organizations. (IBE)

377.34 (43+430.2) POLITICAL EDUCATION — 37 B (43) HISTORY OF EDUCATION (GERMANY & FEDERAL REPUBLIC OF GERMANY)
HORNUNG, Klaus. Etappen politischer Pädagogik in Deutschland. Bonn, Bundeszentrale für Heimatdienst, (1962). 76 p., bibl. notes. (Schriftenreihe der Bundeszentrale für Heimatdienst). — Historical survey of the different stages of “political pedagogy” in Germany under the monarchy and under constitutional government. National socialism and the training of individuals in accordance with predetermined types. The work of Foerster, Kerschensteiner, Becker, Richert, Spranger and Stapel in the field of political education. Need for reappraisal of political education since such education is determined by the prevailing political circumstances themselves. (IBE)

377.342 (430.2) DEMOCRATIC EDUCATION (FEDERAL REPUBLIC OF GERMANY)

182
The difficulties which were encountered and those which are still to be faced by educators. Leading German and American persons endeavour to show the achievements, shortcomings and prospects of such education and make it possible for the reader to realise the true extent of the problems which, in their different aspects, affect the federal Republic as a whole. 377.9 AID FOR THE YOUNG — 136.7 CHILD AND ADOLESCENT PSYCHOLOGY

BECK, Ludwig Maria. “Antworte, bitte, gleich”. Kinder schreiben ihre Sorgen an den grossen Kameraden. Freiburg & München, Karl Alber, s.d. 167 p. — These letters from children to an unknown but kindly friend reveal the existence of problems which they do not dare — or are not able — to confide to those directly responsible for their education and show their need to be helped. Such problems, whether they concern family, school or even morals, are all part of early training for life and should not be minimised since children are conscious of them and troubled by them. The publication of these letters is intended to acquaint parents and educators with an unsuspected aspect of child and adolescent thought and to help them in counselling and guiding those who are entrusted to their care. (IBE)

377.9 AID FOR THE YOUNG

FRANKE, Hans & GÜNTERH, Friedrich. Der Daseinkampf beginnt in Sexta. [See 371.82]

377.9 AID FOR THE YOUNG

BERDIE, Ralph F. et al. Testing in guidance and counseling. New York & London, McGraw-Hill Book Co., (1963). XIII+288 p., tabl., bibl., ind. (McGraw-Hill Series in Education, Guidance, Counseling, and Student Personnel Education). — Practical information, based on experience and research, for students taking courses in guidance, as well as for school counsellors and psychologists, to assist them in the use of testing as an intrinsic part of their work. Relation which guidance has to the child's physical, mental and social health. Testing in general (validity, reliability, evaluation, norms, advantages and disadvantages); organizing a testing programme for evaluation; national testing programmes. Useful information concerning the importance of the counsellor's interview with the pupil, his relation with pupils, parents, teachers and school principals, his knowledge of occupational and educational opportunities. Research on counselling; professional improvement. Tests used in educational guidance (intelligence, ability, interest and personality, educational achievement). (IBE)

377.9 AID FOR THE YOUNG — 372 PRIMARY EDUCATION

DETJEN, Ervin Winfred & DETJEN, Mary Ford. Elementary school guidance. 2nd ed. New York & London, McGraw-Hill Book Co., (1963). ix+240 p., tabl., bibl., ind. (McGraw-Hill Series in Education, Guidance, Counseling and Student Personnel Education). — Second and completely revised edition of a work dealing, from the standpoint of mental health, with the general significance of guidance as well as with the functions of guidance staff and services at elementary schools. Consideration, in connection with the various topics treated, of the techniques and activities available to future and serving teachers in elementary schools. Place of educational guidance at elementary level; the teacher's role; tests; keeping the child's record; recommendations. Influence of the teacher's personality on the pupils, pupil-teacher relations and the classroom at
mosphere. Influence of the home environment on child behaviour and parent-teacher relations. The pupil's physical health; detection of his handicaps and needs; his mental health; importance of his social adjustment. Main problems of behaviour; development of individual qualities and good habits. Guidance at pre-school level; guidance at the time of proceeding to secondary school. (IBE)

377.9 AID FOR THE YOUNG — 371.824 SOCIOLOGY AND EDUCATION

GLANZ, Edward C. Groups in guidance. The dynamics of groups and the application of groups in guidance. Boston, Allyn and Bacon, 1962. 385 p., fig., bibl. (36 p.), gloss., ind. — Group techniques, psychological testing and individual counselling constitute the three conceptual tools which help school counsellors to individualise educational goals. I. Definition of the basic elements of a group, how groups relate to guidance and education, description of a philosophy of the use of groups in guidance. II. Principal factors involved in understanding group operation [formation and functioning of groups, the leaders, members and structure of groups, problems of relationships, words and meanings in groups, human behaviour in groups]. III. Employment of groups in guidance programmes, particularly in connection with the following: human relations and group training; student activities; articulation and orientation; psychological testing; educational planning; vocational development; counselling; organized guidance classes. 377.922 EDUCATIONAL GUIDANCE — 377.94 VOCATIONAL GUIDANCE — 158.1 PSYCHOTECHNICS

PASQUASY, R. Une méthode de contrôle en orientation scolaire et professionnelle. Bruxelles, Editest, 1962. 52 p., tabl., bibl., app. — With the rational organization of education the role of guidance, both educational and vocational, is becoming increasingly important for ensuring that a child's career correspond as far as possible to his tastes and aptitudes, while taking into account the country's economic and vocational needs. Although the methods and techniques for measurement and diagnosis of the child's aptitudes and interests have been refined and perfected, there are still no satisfactory methods of checking in order to avoid errors in guidance. This study, based on results obtained in Belgium, seeks the most objective means of control and proposes a so-called functional method which, setting aside a mere qualitative appraisal, tries to determine the child's over-all functional potential as well as its principal component parts. Methods of Selection — 377.94 (6+ oo) VOCATIONAL GUIDANCE — 37 N (6+ oo)
Conferences (Africa and Various Countries)

TAYLOR, A. (Ed.). Educational and occupational selection in West Africa. London, Oxford University Press, 1969. x+219 p., tabl., ind. — In countries which need to recruit and train qualified personnel quickly, the problem of guidance and selection, both educational and vocational, is urgent. A conference of experts was held in 1960 in order to compare the procedures employed in West Africa, notably in Ghana and Nigeria, with those employed elsewhere, whether in other African countries or else in Great Britain or the United States. Recommendations were drawn up for encouraging both research in this field and the employment of methods which are more systematic and better suited to the different countries. It was also urged that examinations be standardised and that vocational guidance and selection be developed. (IBE)

PIGNATARI, Marziola (Ed.). L'orienteamento professionale come educazione civica. V. Convegno nazionale dell'Opera Montessori. Messina, 19-20-21 settembre 1959. Roma, Ed. " Vita dell'Infanzia ", s.d. 413 p., pl., bibl. notes, app. — By choosing vocational guidance as topic for its 1959 congress the Italian Montessori Association wished to emphasise the need for an up-grading of work and show that the choosing of a vocation should be considered as a civic responsibility. The papers presented at the congress drew attention to the important role which schools play in this connection as they can guide pupils as regards both citizenship and vocation by training future citizens who are able to assume their responsibilities and appreciate the value of work. Schools should consequently be given the means of fulfilling their guidance role and, particularly, of founding their methods on those of Montessori by keeping in view the example of that educator who found in pupils' practical work at school a means of revealing and developing their abilities as well as of ensuring their social education at the same time. 378 (73) HIGHER EDUCATION — 379.32 (73) FINANCING OF EDUCATION — 378.91 (73) FINANCIAL ASSISTANCE (UNITED STATES)
HARRIS, Seymour E. Higher education: resources and finance. New York & London, McGraw-Hill Book Co., 1962. xxviii+713 p., tabl., bibl., ind. — Comprehensive study relating to the resources and financing of higher education establishments in the United States. Statistics (period 1889 to 1960), inquiries and questionnaires showing in perspective a certain number of economic problems which can be solved by examining the different sources of income in order of their importance (students, the federal and state governments, endowment income, private gifts, economies). Among the many questions exposed and discussed: (1) history of higher education, a budget plan (extending to 1970), faculty structure, general development; (2) the budget (including scholarships, loans and pre-financing); (3) contributions of governments; (4) financial administration (how to raise and manage the necessary funds); (5) the faculties (economic and social status of the teachers as compared with that of other professions and with the competing offers made by industry). The instructional staff should be involved and assisted as much as possible. Moreover, throughout his long investigation the author always has in view an
ultimate aim, namely to encourage progress in higher education, organize its financing on a solid basis and thus increase the return for the dollar invested in "human capital" and in the education institutions. (IBE)

378 (73) HIGHER EDUCATION — 379.96 (73) EDUCATIONAL STATISTICS (UNITED STATES)

1. Democratic principles underlying its organization and the diversity in the authorities responsible: (a) administration and financing of both public and private universities and colleges; (b) role of the federal Government. II. Instructional programmes (according to type of course): (a) course length; (b) university degrees; (c) status and training of the instructional staff. III. Academic environment: (a) different types of establishment; (b) both American and foreign student characteristics and numbers; (c) student services (scholarships, student loans, social welfare, etc.). IV. Services to the community: (a) scientific research; (b) medical, dental and hospital services available to the public; (c) agricultural extension services, etc. V. Activities of federal agencies. 378 (oo) HIGHER EDUCATION — 37 E (oo) REFERENCE BOOKS — 37 P (oo) RESEARCH AND INQUIRIES (VARIOUS COUNTRIES)

193
In connection with a series of discussions on necessary steps for improving the quality of higher education in the United States, a conference of the ICSS (Inter-University Committee on the Superior Student) was held to consider both the honours approach and honours programmes for attracting superior students into the field of teacher training. I. Definition of theory and practice in a complete honours programme. II. Place of honours in the quest for quality in talent, ability and work. III. Reports presented by the study committees of the university members; plans and proposals. IV. Impact of the honours system on teaching in the schools, the quality of which depends first and foremost on the quality of the teachers.

Publication resulting from a meeting of a group of economists called by the Office of Education, Washington, for the purpose of stimulating economic research in regard to American higher education and for making some recent research findings available to those concerned. These findings relate to very many matters, which may be arranged under four main headings: (1) needs of the United States in college-trained personnel; (2) higher education regarded as an investment in human capital; (3) financial resources for higher education; (4) economic research, the progress made and the matters in which further research is necessary. Many statistical tables are provided by way of illustration.

Inquiry on higher education in Australia, prompted by the growing number of failures recorded at the University of Queensland. From 1930 to 1962, time specialists in educational psychology made a careful study of approximately 1,500 students by administering group tests and examining each case with regard to individual problems (home background, financial situation, scholastic preparation, choice of studies in relation to aptitudes, emotional factors, health, etc.). They also examined the situation as regards the teaching staff (number of teachers, their training, material, methods, teaching techniques, etc.). The authors' practical experience provides the basis for the summary of their inquiry and for the conclusions and recommendations on how to solve the problem of numerous university failures and to help students meet their individual difficulties.

Organized in order to ensure the
development of higher education in Africa the conference — a complement to the Conference of African States held in Addis Ababa in May, 1961 — dealt with problems relating to the planning of higher education, its financing, content and the needs in staff. Consideration was also given to the question of cooperation not only between the countries of Africa but also between these countries and non-African governments and organizations. Included in the volume is a selection of papers constituting the background material. (IBE)

378.2 (73) UNIVERSITY ORGANIZATION AND ADMINISTRATION (UNITED STATES)

DODDS, Harold W.; ROBB, Felix C. & TAYLOR, R. Robb. The academic president — educator or caretaker? New York & London, McGraw-Hill Book Co., 1962. vii + 294 p., sibl. notes, ind. (The Carnegie Series in American Education). — A university college president is both the head of several faculties — he may even give lectures himself — and the caretaker of an establishment whose running costs amount to millions. Is it possible for one man to carry out such duties without neglecting some aspect? Should a president give up his role of educator, his academic prerogatives, in order to devote himself entirely to the administrative side? Should the responsibilities of a president be divided between a faculty head and an administrative head? The author favours the appointment of one man who, responsible for both functions, is capable of selecting the faculty members and administrative staff with discrimination which extends to the apportionment of expenditure and who, knowing that he has reliable collaborators, can purposely delegate responsibilities to them. JAHOUDA, Marie. The education of technologists. An exploratory case study at Brunel College. (London), Tavistock Publications, (1963). xiii + 226 p., tabl., bibl., app. — Study on one of the most recent types of higher technical education introduced in the United Kingdom, the course for the diploma in technology at Colleges of Advanced Technology. Known as "sandwich education" in the United Kingdom and as "cooperative education" in the United States, this type of training combines with practical training received in industry the theoretical and academic instruction equivalent to that provided by the universities. In the light of experiments carried out at Brunel College the author analyses the process of education such as experienced and seen by the students, the college staff and the education and training officers in collaborating firms. The presentation of this empirical data is accompanied by a discussion of the more general problems of higher education. Due to rapid development in the pure and applied sciences, reform is needed in the various types of university course and is the concern of educators, industrialists and policy makers. (IBE)

LIMA, J. Pinto et al. Técnicos para o desenvolvimento da agricultura. Formação profissional - Mercado de trabalho. Rio de Janeiro, Associação Brasileira de Crédito e Assistência Rural, 1961. xv + 402 p., fig., pl., tabl., bibl. — In contrast with the rapid industrial expansion in Brazil the development in the agricultural sector is very slow. Hence the urgent need for qualified technical personnel in the fields of agronomy, veterinary science, domestic economy and rural social welfare. As part of a campaign to intensify training of such personnel the Brazilian Association for Credit and Rural Assistance appointed a group of specialists (a) to effect a comparative study, on a regional and national scale, of the present situation and possibilities of higher education in regard to training for the four professions concerned, (b) to assess the index figure and the rate of absorption of such personnel by the labour market, (c) to study the allocation and utilisation of personnel according to previous record of service, type of work undertaken and changes in salary level. (IBE)
SLAUGHTER, F. Design and the education of mechanical engineers. London, Sir Isaac Pitman & Sons, (1963). xiv+274 p., fig., tabl., bibl., ind., app. — Book intended mainly for engineers, educators and industrialists but also for politicians, economists, etc. in the United Kingdom and other western countries. Its object is that of drawing attention to foreign competition as well as to the reforms necessary for ensuring progress in the engineering sciences and in industrial civilisation as a whole. The first section presents a philosophy in regard to study plans in pure and applied mechanics. Then follows a review of the curricula adopted at several higher polytechnical establishments throughout the world in the training of mechanical engineers. Comparison of these particulars shows that the training of engineers and the teaching of machine design cannot be complete unless at least the larger part of the course is devoted to study plans and machine design. Some practical suggestions are offered for reform in higher technical education accordingly. (IBE)

GARIÉPY, Gilles. Étudiant et journaliste. Les Escholiers Griffonneurs. Montreal, Centre de psychologie et de pédagogie, (1962). 214 p., fig. — Survey of the work and research undertaken since 1943 by French-Canadian student journalists of the "Corporation des Escholiers Griffonneurs". Brief dissertation on the role of student journalism, followed by more specific proposals regarding (a) editing (editorial styles and policy, qualities which editors should possess, etc.), (b) details of presentation (printing techniques, lay-out, importance of headlines, illustrations, etc.), (c) administration (finance, circulation, advertising, secretarial work), (d) the team (structure of the editorial team, recruiting and training, rules). 379 SCHOOL ADMINISTRATION

AMERICAN ASSOCIATION OF SCHOOL ADMINISTRATORS. Inservice education for school administration. Report of the AASA Commission on Inservice Education for School Administration. (Washington, AASA, 1963). xi+208 p., bibl. notes, ind. — Report of the commission on in-service education appointed by the American Association of School Administrators. The following are the commission's objectives: (1) to institute a continuous programme of in-service training in school administration; (2) to lay down principles which could serve as a guide for school committees,
departments of education, colleges, universities, individuals and professional associations
desirous of improvement or change in various aspects of school administration; (3) to
indicate by means of examples the resources required for instituting such a programme;
(4) to show the role which could be played by education authorities, colleges, etc. in
establishing the programme; (5) to furnish guide-lines which, intended for evaluation of
the various parts of the programme, could also provide a basis for its improvement.
One chapter contains a review of the different experiments at present being conducted in
this field. (IBE)

(71) SCHOOL ORGANIZATION (CANADA)
CHEAL, John E.; MELSNESS, Harold C. & REEVES, Arthur W. Educational
xxi+277 p., fig., tabl., bibl., ind. — The principal aim of educational administration is to
improve the curriculum and assist in its application. By way of contribution to the task
the teachers should make use of the particular services of administrators. For maximum
efficiency in education, close cooperation between the school management and the teach-
ers is essential. Intended for student teachers and for teachers taking courses of further
training, this guide deals also with the role of the teacher as sole administrator of his
class and emphasises the necessity for him to have a proper understanding of the adminis-
trative process and its meaning. (IBE)

EDUCATORS (AUSTRALIA & UNITED STATES)
CUNNINGHAM, K.S. & RADFORD, W. C. Training the administrator. A study
with special reference to education. (Hawthorn, Victoria), Australian Council for Educa-
tional Research, (1963). 135 p., tabl., bibl., app. — Australia has been the scene of notable
progress in the training of administrators in all fields except that of public education. It is
consequently considered necessary that in this field the training of teachers be given a
more dynamic character and that they be encouraged to learn the techniques of adminis-
tration in order to be ready for appointment as headmasters. But how? After carefully
examining the methods and content of the training received by administrators in the
Commonwealth, as compared with the programmes adopted and progress achieved in
the United States and Canada, the investigators provide a pertinent answer to the ques-
tion by recommending certain measures which would ensure the competent administra-
tion of Australian schools. (IBE)

LADD, Edward T. & SAYRES, William C. (Ed.). Social aspects of education. A casebook. Englewood Cliffs (N.J.), Prentice-Hall, 1962. xi+388 p., fig., tabl., bibl. (Prentice-Hall Education Series). — Social aspects of education in the United States, including their legal implications for families, education authorities, etc. Authentic reports of twenty-two actual cases which, although of a frequent kind, raised complicated and difficult issues for decision by the authorities. These reports, to which nothing has been added by way of comment or imagination, provide material for study and comparison by the student of social science, who will be able to analyse, comment and judge for himself and thus obtain practice in reasoning by analogy, induction and deduction. An inquiry among teachers showed in fact that by study of authentic case histories the future teacher learns not to rely on mere evidence when investigating a case but, by inference from the facts, to seek their still hidden cause which, if it were known, would alter the final judgment. 379.5 (42+ oo) EDUCATIONAL POLICY IN GENERAL — 37 A (42) EDUCATIONAL SYSTEMS (UNITED KINGDOM & VARIOUS COUNTRIES)

BROGAN, Colm. The nature of education. London. Oldbourne, (1962). 123 p. — Education is not the solution of all problems, not even of all those apparently related to education. Both the over-sentimentality of some persons and the over-ambitious aims of others must be avoided since they hide the real meaning of education. The author emphasises the justice of his remarks concerning the national programme in regard to (a) multilateral schools, educational experimentation, etc., (b) adult education, (c) education for the maladjusted and handicapped. Owing to the shortage of teachers there must be better distribution of the teaching staff and material available. In education the authority and control must be assumed by the state, that is by politicians and officials; they have a duty to understand how the future is affected by the education given today and thus to meet the most urgent need, namely to give Great Britain an educational system with due consideration to the coming generations. 379.635 (∞) ILLITERACY — 374.1 (∞) FURTHER EDUCATION (VARIOUS COUNTRIES) — 370.48 COMPARATIVE EDUCATION RESEARCH
Literacy and education for adults. Research in Comparative Education. Geneva, International Bureau of Education & Paris, Unesco, (cop. 1964). lxvii+179 p. (Publication No. 266). — This comparative study was carried out on the basis of 88 replies which different countries furnished for a double inquiry covering both literacy education and
primary and secondary education for adults. Often included in a general programme of education or of economic and social development, literacy education may be dealt with at national, regional or local level and the costs shared. An important role is played by public opinion and private effort particularly in mitigating the effects of the teacher shortage and in convincing illiterates of the advantages offered by education. There is an increasing tendency to go beyond the teaching of basic knowledge and to adapt the instructional methods and material to adult mentality and the local environment. It is only nature that the endeavour to retain and improve the acquired knowledge should lead to the possibility of providing adults with opportunities of normalising their education by study at primary or secondary level for the corresponding certificates. The primary level syllabus for adults is not usually a copy that for children; made lighter or enriched, it is often more practical and utilitarian in nature and has an immediate social value. On the other hand the syllabus at secondary level is little or no different from the one for ordinary schools. The education for adults is provided outside the working hours, usually in the evening, and employers are encouraged to grant the necessary facilities.

379.635 ILLITERACY — 374.8 COURSES FOR THE ILLITERATE

MAZZETTI, Roberto. Alfabeto e società. Piccolo discorso per 700 milioni di analfabeti. (Napoli), Istituto editoriale del Mezzogiorno, (1963). 151 p. — Educational, sociological and economic aspects of the problem of illiteracy in today’s world. With the support of psychological data and while remaining aware of the difficulties and problems involved in making persons literate, Professor Mazzetti discusses the situation and behaviour of the illiterate person. A method, based on the theories of both Montessori and Decroly, is proposed for leading the adult from the deciphering of letters and figures to learning the rudiments of history, geography, civics, aesthetic and moral education.

PRAWIRODIHARJO, Tarib & KRISHNAMURTHY, T. Community education in Indonesia. [See 371.08 (92)]

379.635 (498) ILLITERACY (ROMANIA)

ROMANIA. COMMISSION NATIONALE DE LA R.P. ROUMAINE POUR L’UNESCO. La liquidation de l’analphabétisme dans la République populaire roumaine. (Bucarest, Enterprise Polygraphique No. 4, 1962). 23 p., fig., tabl., app. — In 1930 the proportion of illiterates in Romania was found to be as high as 62% according to the region. In 1944 the Central Council of Trade-unions organized courses as part of a literacy campaign designed as a palliative measure to meet the urgent need for workers of high quality from the vocational, cultural and artistic point of view. In 1948 the struggle against illiteracy was considered as a state matter and a literacy service was established. The resulting plan for eliminating illiteracy has necessitated a general mobilisation of the population although without resort to any compulsion. The action undertaken is twofold, being on the one hand to make literate all illiterates aged from 13 to 55 years, on the other to bring within the school network all children aged from 7 to 12 years.

BEALES, A.C.F. Education under penalty. [See 371.452 (42)]

379.7 (42) SCHOOL POLICY FROM THE DENOMINATIONAL POINT OF VIEW — 379.4 (42) RELATIONS BETWEEN THE SCHOOL AND THE STATE — 37 B (42) HISTORY OF EDUCATION (UNITED KINGDOM/ENGLAND)
CRUICKSHANK, Marjorie. Church and state in English education. 1870 to the present day. London, Macmillan & Co. & New York, St. Martin's Press, 1963. xvi+200 p., tabl., bibl., ind., app. — To understand the English dual system of education involving the Churches and the State it is necessary to go back to the industrial age when the schools were controlled by the Churches. Because of the numbers of needy children roaming the streets, philanthropists opened Sunday schools; later on Lancaster (a Quaker) and then Bell (an Anglican) founded elementary schools in order that such children might receive education. Only as from 1833 did the State make any provision for education. The author traces, within this country's political and social setting, the conflict leading to reforms (1832 and 1867) in the electoral system, under which the people became entitled to vote for the first Education Act, gazetted in 1870. After that the State was to increase the number of undenominational schools and even substitute them for denominational schools but it had also to reach a settlement with the Churches, hitherto the only and de facto education authority. Thus the dual system of education became established and it still remains, reflected in bills and enactments, a thorny problem. In 1942 Mr. R.A. Butler was responsible for the drafting of a bill to provide for agreement between the Churches and State and after two years of negotiation this bill was finally passed in 1944. The author concludes by explaining what the Butler Act means, how its provisions are applied and how in 1959 the agreement between the Churches and State was revised. (IBE)

379.7 (73) SCHOOL POLICY FROM THE DENOMINATIONAL POINT OF VIEW — 37 B (73) HISTORY OF EDUCATION (UNITED STATES)
I'EALEY, Robert M. Jefferson on religion in public education. New Haven & London, Yale University Press, 1962. xi+294 p., bibl., ind., notes. (Yale Publications in Religion, 3). — In connection with the recent controversy in the United States over the place of religion in public education, an examination of Thomas Jefferson's thought on the question of the separation of church and state is of very current interest. Critical study of this great statesman's ideas and of his concept of the role of education in inculcating moral values. (IBE)

379.75 (42 + 73) SECULAR EDUCATION — 37 B (42 + 73) HISTORY OF EDUCATION (UNITED KINGDOM & UNITED STATES)
KURDYBACHA, Łukasz. Z dziejów laicyzacji oświaty. II. Anglia — Stany Zjednoczone am pn. Warszawa, " Nasza Księgarnia ", 1962. 356 p., ind., notes. (Summaries in Russian and English). — The history as seen by a Polish author of the secularization of the primary school in England and the United States, with a brief survey bearing on the middle ages, puritanism, the influence of Comenius and the movements for separation of Church and school. The facts on secularization itself relate to the 19th and 20th centuries. (IBE)
379.8 (73) SCHOOL POLICY AND STATE PROBLEMS — 379.32 (73) FINANCING OF EDUCATION (UNITED STATES)

BAILEY, Stephen K. et al. Schoolmen and politics. A study of State aid to education in the Northeast. Syracuse, N.Y., Syracuse University Press, 1962. xv + 111 p., tabl., ind. (The Economics and Politics of Public Education, 1). — Report based on a study of political practices in eight north-eastern states of the American federation and showing how education is a very political enterprise in United States life. The authors examine in turn the following matters: historical development of the educational institutions; post-war issues and trends; activity of groups which on the whole favour increased state aid to schools and of those which are opposed to any interference by the state in school affairs; some examples of political and legislative action actually taken during the last few years in regard to schools. It is concluded that the future of public education will be determined not solely by community needs but rather by those who can give political expression to these needs, that is by educators and school administrators who are aware of political problems and have influence in the matter. Hunnicutt, Clarence W. (Ed.). America's emerging role in overseas education. (Syracuse), Syracuse University School of Education, 1962. vn+148 p., fig., bibl. — Ten papers presented at Syracuse University in 1962 by American educators who had served in various under-developed areas of the world. The central theme: the programmes under which these countries receive assistance regarded as a social investment; the procedures and content of these programmes with consideration given to the cultural contribution of the countries aided. Of two subsidiary themes, one relates to the particular problems in Asia, Africa and Latin America and to the education of handicapped children, while the other is constituted by the problem of American students studying overseas and that of foreigners who flock to the American "campus". The return of these latter to their countries of origin creates a need for a guidance programme if benefit is to be derived from their studies. (IBE)

Council for Cultural Co-operation of the Council of Europe. Youth and development aid. Proceedings of the Symposium. Strasbourg, 1963. 114 p., tabl., notes, app. (Series III - Out-of-school Education - No. 1). — Proceedings of the symposium organized by the Council of Europe and the Organization for Economic Co-operation and Development on the contribution of young Europeans to technical assistance programmes. Urgent action is found to be necessary if the young in European industrialised nations are to contribute more effectively in satisfying the needs of the developing countries. The young could, in fact, provide the middle-level personnel and operational personnel required by these countries and the shortage of which constitutes one of the major obstacles to economic and social development. Addressed to the member governments of the Council of Europe and of the O.E.C.D. as well as to all the private bodies concerned, the present report contains the two working papers of the symposium, a summary of the discussions, together with the conclusions and recommendations adopted. 379.91 (87) EDUCATIONAL LEGISLATION — 37 B (87) HISTORY OF EDUCATION (VENEZUELA)
MUDARRA, Miguel Angel. Historia de la legislación escolar contemporánea en Venezuela. Caracas, Ediciones del Ministerio de Educación, 1962. xvi+331 p., bibl. (Biblioteca Venezolana de Cultura). — Historical study of the legal, doctrinal, administrative and material changes in the Venezuelan educational system. An objective appraisal, supported by documentation, is made of the factors involved in these changes; it shows that an obvious antinomy is ever present between the national situation and the system of law governing education in this country. This antinomy is due to the way in which the educational system or order has many times been established or dismantled by violence regardless of the previous work accomplished. As a result of such changes, often sudden, irregular and arbitrary, there has been lack of gradual "canalisation" and rational policy in the Venezuelan system of education. Starting with a definite goal which respects constructive traditions and integrates them in a dynamic continuity, educational legislation should, by taking into account the country's real situation and its economic planning, manifest less formalism and consequently more functional value in the solution of problems. BORK, Arnold. Praktische Jugendspsychologie für Lehrer und Eltern. (Deutsche Jugend seit 1900). Ratingen (Rhld.), A. Henn Verlag, (cop. 1962). 216 p., bibli. notes. — Comparative examination of the behaviour of young people respectively during the period from 1900 until the first world war, during the period intervening before and that following the second war. The years 1933 to 1945 and the present emergence of a new mentality. (In the appendix the years 1950 to 1960). Practical advice to young educators and to parents on how to understand the adolescent; the inner and general behaviour manifested by youth of all times; the mentality of a period (Greek ephebus, mediaeval knight, 19th century middle class); superficial behaviour (fashion) depending on which a discussion is possible. From his experience the author casts doubts upon the effectiveness of employing tests and statistics to acquire a deep understanding of today's youth. (IBE)

136.7 CHILD AND ADOLESCENT PSYCHOLOGY
BOURJADE, Jean. Etudes de psychologie de l'enfant. Paris, Société d'Édition "Les Belles Lettres", 1962. 232 p. (Bibliothèque de la Faculté des Lettres de Lyon, Fascicule VII). — Studies dealing with the changes which occur in the structure of the child's mind with age, social adjustment, etc. I. Structure of the child's mind: analysis of syncretic thinking and sub-rational thinking. II. Child egocentricity, defined as "the symmetrical opposite of reflective thinking", in its moral and intellectual aspects. III. Beginnings of logical thinking in the child: (1) The concept of beginnings and the prospect of interpretation in relation to fundamental systems of reference; (2) the beginnings of practical thinking and the building up of substructures; (3) the beginnings of rational speculative thinking and the building up of superstructures. IV. Review of child psychology in its present state. (IBE)

BOVET, Pierre. L'instinct combatif. Problèmes de psychologie et d'éducation. 3e éd. rev. et compl. Neuchâtel & Paris, Delachaux & Niestlé, (cop. 1961). 245 p., notes bibli., ind. (Actualités pédagogiques et psychologiques). — New edition of a work, originally published during the first world war, dealing with various manifestations of the combative instinct. Experience during each of the intervening years has only emphasised the timeliness of the comments which the first head of the J. J. Rousseau Institute made on children's combativeness and on the necessity of refining this deeply human instinct in the interest of education for peace. (IBE)

136.7 CHILD AND ADOLESCENT PSYCHOLOGY
CHALONER, Len. Feeling and perception in young children. (London), Tavistock Publications, (1963). ix+110 p., bibli., ind. — The development of feelings and attitudes in the child is discussed in relation to his perception of the outside world (beings, objects, events, etc.), his satisfaction of daily needs (feeding, sleeping, etc.) and his capacity for play, speech and social behaviour. The young child's attitude to different events (birth,
death, pain); his growing awareness of himself; the development of his independence. In order to ensure normal emotional development it must be borne in mind that his ability to express and communicate certain less apparent feelings and sensations develops only gradually with the coordination of muscular and nervous functions. (IBE)

136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 376.5 EARLY CHILDHOOD
EHRLE, Clara Maria. Das geistige Erwachen des Kindes. Aufgaben der Erziehung in den kindlichen Entwicklungsphasen. Freiburg i.B., [etc.], Herder, (1963). 136 p., bibl., ind., notes. — Discussion of the child's mental awakening (emotional and intellectual) and of the part to be played by the educator, particularly the mother, from the moment of birth and during the first ten years. Educational influence (presence, contact, security) is decisive during early childhood at times of first mental contacts, motor activity, language efforts, first consciousness of others, the beginning of school. The shaping of the child's personality is largely determined by his environment. On the attention paid to the phases (rate of growth, then of adjustment) depends the child's later behaviour. (IBE)

136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 376.7 ADOLESCENCE
ELL, Ernst. Die Jugendlichen in der seelischen Pubertät. Freiburg i.B., Lambertus-Verlag, 1963. 186 p., fig., bibl. (Praxis der Jugendhilfe, 7). — This essay on psychic puberty (sequel to one on physical puberty) deals with the soul and with the stages in the development of the " ego " (" Ich-selbst "). Following the procedure of logical analysis (subject — attribute — object), the author considers successively: (1) the soul, subject of psychic actions and reactions and the changes it undergoes during puberty; this is the discovery of the individuality, birth of the " spiritual ego " dissociated from the " physical ego "; (2) the three essential conditions (sensitivity, knowledge, will) in order to clarify, with reference to childhood, the 'behaviour of the " Ich-selbst " of which the specific faculties are emotion, cognition and volition; (3) " Ich-selbst " and its universe, i.e. the outside objects considered by the " ego ", which it uses its faculties to attain. It is not a " universe in itself " but rather a " universe for myself " or perhaps too the image of a universe as conceived at the moment by the " Ich-selbst " . (IBE)

136.7 CHILD AND ADOLESCENT PSYCHOLOGY — 376.7 ADOLESCENCE
ELL, Ernst. Junge und Mädchen in der leiblichen Pubertät. Freiburg i.B., Lambertus-Verlag, 1962. 150 p., tabl., bibl. (Praxis der Jugendhilfe, 6). — Puberty passes first of all through a phase of physical, bodily development leading to a psychic phase which it
conditions. This first phase is characterized by an "incompleteness" in all fields, which raises great problems for the educator. It has to be lived entirely as preparation for a future in which many of these problems will solve themselves of their own accord. The bodily phenomena experienced by the adolescent lead him to sexual consciousness, relationships with those around him and eventually to a spiritual life. "Physical puberty" is thus a period worth considering on its own account and not merely as a transition between two states of existence. From this observation emerges the importance of the psychological and educational aspects of this period of evolution. (IBE)

JUUBLINSKAJA, A.A. Besedy s vospitelem o razvitiiребёнка. Moskva, Gosudarstvennoe učebno-pedagogičeskoe izdatel'stvo Ministerstva prosvojenija RSFSR, 1962. 279 p., fig., notes. — These "Talks with an Educator about the Child's Development" are concerned with the development of the child's personality from birth until when he begins his compulsory education as well as with the role which adults play in influencing his activity and psychic state. Features of child development after the age of three years: perception of objects; nature of memory; enrichment of language; manifestations of thinking; acquiring of habits; distinctions made between games; occupations requiring a mental effort, etc. In the author's view the most favourable conditions for laying the early foundations of moral and aesthetic education are to be sought in collective activity and hence the importance of showing the pleasure to be derived from cleanliness, order, good manners, etc. Later on will come education for intellectual activity (curiosity, pleasure in knowing, joy in recognising, etc.). The great diversity in temperaments and abilities demands of the educator many different types of approach prompted by and suited to the child's spontaneous attitudes. (IBE)

15 PSYCHOLOGY — 616.89 PSYCHIATRY — 131 PSYCHOANALYSIS

ENGEL, George L. Psychological development in health and disease. Philadelphia and London, W.B. Saunders Co., 1962. xxxi+435 p., bibl., ind. — Discussion of the various psychological problems and factors connected with health and disease. In the author’s view there is no duality between the so-called “psychiatric” diseases and the organic diseases as far as their clinical manifestation or their causes are concerned. Need for attention to be directed to the patient and not only to the disease. However important be the role of the researcher the clinical worker must not undervalue the opportunity which in his daily observations he has of contributing to an understanding of the human being whether the latter’s state be one of health or illness. (IBE)

15 PSYCHOLOGY

GERÉB, György. Pszichológia atlasz. Harmadik, bővített kiadás. Budapest, Tankönyvkiadó, 1961. 222 p., fig. (German summary). — Collected articles, diagrams, etc. illustrating the bases of psychology and intended for university students of the subject. The illustrations relate to (a) basic concepts concerning the nervous system, (b) essential components of the sense organs, (c) an outline of the main experimental means and procedures, (d) a short account of the symptoms which characterise various anom-
lies, (e) artistic reproductions illustrating external manifestations of emotional phenomena such as mimicking, pantomime, etc., together with some written material on child psychology. (IBE)

155 IMAGINATION — 370 THEORY OF EDUCATION
RUGG, Harold. Imagination. With a foreword and editorial comments by Kenneth D. Benne, New York. [etc.], Harper & Row, Publishers, (1961). xxii+361 p., bibl., notes, ind. — This posthumous work is a synthesis of the author’s thought evolved during thirty years' teaching experience as professor of education at Teachers College, Columbia University (New York). Alying to a vast culture his unceasingly alert philosophical thinking, he turned to psychology, sociology and aesthetics in formulating a theory of education based on the creative process. What is the nature of the "flash of insight" which brings a sudden grasp of new dimensions? How can this creative power be released? It does not consist in mere logical thought but in a state of receptivity which is on the borderline of the conscious and the unconscious. The analysis of the complex process involved in the creative imagination and the search for means of fostering it constitute the core of this study which embraces all aspects of the human personality. 362.7 (430.2) CHILD WELFARE — 778.53 (430.2) CINEMA — 621.388 (430.2) TELEVISION
(FEDERAL REPUBLIC OF GERMANY)
KALB, Werner. Der Jugendschutz bei Film und Fernsehen. Probleme, Geschichte, Praxis. Berlin, Hermann Luchterhand Verlag, (1962). xxviii+367 p., bibl. notes, ind. (Jugend im Blickpunkt). — Rights and duties of parents and of the state as regards the protection of the young against certain films and television broadcasts. All of the texts reproduced here are based on the law relating to child and youth welfare. Next follows an account retracing, from 1920 to the present, the protection provided in this connection by the Federal Republic of Germany. Subsequent chapters deal with (a) problems connected with the influence of films and its consequences, (b) various measures taken in such countries as Switzerland, England and the United States, (c) the principles on which the examination and censorship of films is based, (d) critical appraisal of films by the press, etc. (IBE)

612.821 EXPERIMENTAL PSYCHOLOGY
DEBOT-SEVRIN, M.-R. Etude du sens du regard. Liège, Vaillant-Carmanne, 1962. 76 p., fig., pl., tabl., bibl. (Centre national de Recherches de Psychotechnique scolaire (Psychologie appliquée à l'éducation), Document No. 11). — Starting from the hypothesis that there may exist a visual clumsiness which could have repercussions on the efficiency of the child's work in school, the author studies the significance of the child's look. Technical account of the research, presentation of dioscope photographs (one-second exposures) and analysis of results obtained with children 5 to 9 years of age. From these results the following conclusions may be drawn: there does not exist a significance of the look depending on constitution; the look centers initially on the middle of a graphic complex extending horizontally and then developing progressively towards the left extremity; the non-preferred eye fulfills a passive function but the lateralization of the eye does not affect the child's visual behaviour. (IBE)

613.86 MENTAL HYGIENE
DĄBROWSKI, Kazimierz. Higiena psychicza. Warszawa, Państwowe zakłady wydawnictw szkolnych, 1962. 420 p., bibl., gloss., ind. (Summaries in Russian, English and French). — Introduction to the history and basic problems of mental hygiene. Discussion of the characteristics found in the normal child and adult and in cases bordering on psychic disorder. Description of the various categories of problem children, highly strung children, oligophrenics, the abnormal, delinquents and those suffering from somatic disorders and handicaps. Analysis of the social nature of mental hygiene.
