INSTRUCTIONAL LOAD STUDY.  
FOOTHILL COLL., LOS ALTOS, CALIF.

PUB DATE 1 MAR 66

EDRS PRICE MF-\$0.25 HC-\$0.88 22P.

DESCRIPTORS- \*JUNIOR COLLEGES, \*TEACHING LOAD, \*STUDENT  
TEACHER RATIO, \*CLASS SIZE,

FACULTY INSTRUCTIONAL LOADS AT FOOTHILL COLLEGE ARE COMPUTED BY MEANS OF A FORMULA WHICH INCLUDES (1) TIME SPENT IN CLASSES, (2) TIME FOR PREPARATION AND EVALUATION OF TEACHING MATERIALS FOR EACH DIFFERENT PREPARATION, (3) DUPLICATE PREPARATIONS, (4) ACTIVITY OR QUIZ SECTIONS, (5) CLASS SIZE, AND (6) FACULTY-STUDENT CONTACTS OUTSIDE OF THE CLASSROOM SITUATION. APPLICATION OF THE FORMULA, HOUR MEASURE, RESULTS IN WIDE VARIATIONS IN COMPUTED LOAD AMONG DEPARTMENTS AND INDIVIDUAL INSTRUCTORS. QUESTIONS RAISED BY THE STUDY INVOLVE (1) METHODS OF ACCOUNTING FOR NONINSTRUCTIONAL ACTIVITIES, (2) PREVENTION OF OVERLOAD, ESPECIALLY AMONG NEW INSTRUCTORS, (3) USE OF UNDERLOADED INSTRUCTORS ON SPECIAL PROJECTS, (4) EQUATING OF LABORATORY AND LECTURE COURSES, (5) EVALUATION OF COURSES REQUIRING MUCH INDIVIDUAL STUDENT CONTACT, (6) EQUATING OF LARGE AND SMALL CLASSES, AND (7) EVALUATION OF READER AND ASSISTANT SERVICES. TABLES SHOW DETAILS OF THE LOAD SURVEY FOR INSTRUCTIONAL DIVISIONS, FOR INDIVIDUAL FACULTY MEMBERS, AND IN COMPARISON WITH SELECTED COLLEGES. (WD)

FOOTHILL COLLEGE • 12345 EL MONTE RD., LOS ALTOS HILLS, CALIFORNIA • 948-8590

FTE STUDENT/FTE INSTRUCTOR RATIOS  
FOR THE THREE SEGMENTS OF HIGHER EDUCATION IN CALIFORNIA

(Data taken from the 1963 CCHE Study)

<u>Percentile</u>	<u>Junior Colleges</u>	<u>State Colleges</u>	<u>University Branches</u>
99	35.3	30.5	29.5
75	29.1	29.0	23.9
50	27.1	26.7	22.1
25	24.8	25.9	21.1
Foothill, '65	24.3		

Institutions in the lowest quartile are generally the very small and the very new schools.

COMPARISON OF FOOTHILL FTE STUDENT PER FTE INSTRUCTOR  
RATIO WITH SELECTED COLLEGES

(Data taken from the 1963 CCHE Study)

<u>College</u>	<u>FTE Students/FTE Instructor</u>
Junior College A*	30.9
Junior College B*	30.5
State College A	30.5
Junior College C*	30.3
Junior College D	29.9
State College B	29.3
State College C	29.0
Junior College E*	28.9
Junior College F	28.3
Foothill College '63	28.2
Junior College G	28.1
Junior College H	27.5
Junior College J*	27.1
Foothill College '64	25.2
Foothill College '65	24.3

\*Indicates one of the five highest paying junior colleges in 1965.

State colleges are located in the Bay Area.

Foothill Junior College District  
Office of Institutional Research and Planning

TEACHER LOAD INDICATORS

Fall, 1965

Division	FTE Stu. Per FTE Inst.	Service Units Per FTE Inst.	Average Class Size			
			Lect.	Lab	Act.	Total
Biological & Health Science	19.3	44.6	46	20	-	33
Business	30.0	48.8	36	16	-	35
Engineering & Technology	13.0	44.1	20	13	-	18

FOOTHILL COLLEGE

SIX-FACTOR FORMULA FOR COMPUTING INSTRUCTIONAL LOADS FOR FACULTY

The normal work week is forty-eight service units.

1. Factors:

- a. Time spent in class
- b. Time to prepare and evaluate teaching materials for each different preparation.
- c. Duplicate preparation.
- d. Activity or quiz section (no new materials presented, but group organization and direction, discussion outlines, and test papers).
- e. Class size (bookkeeping on students, number of papers-to grade),
- f. Faculty-student contacts (office hours to help students, confer on grades, give make-up tests).

2. Methods of computing class load.

- a. Lecture. For each course-credit hour in lecture-type classes there is allowed 2-1/2 service units. If the lecture is repeated to other sections, 2 service units are allowed for each successive section.
- b. Laboratory. For a 3-hour laboratory, 5 service units are allowed. For repeated laboratories, 4 service units are allowed.
- c. For Physical Education activity (or quiz sections), 2 service units are allowed or 1-1/2 service units, if repeated.
- d. Student load. The enrollment in each class is multiplied by the number of course credits (except P. E. activity is computed at 1 unit). From the scale presented in Table I, the number of service units to be allowed is computed from the total student enrollment (student credit hours). Enrollment in a laboratory is counted as 1 hour, not 3.

TABLE I

<u>Teacher's Total Enrollment</u>	<u>Service Hours per Week</u>	<u>Teacher's Total Enrollment</u>	<u>Service Hours per Week</u>
50-74	1/2	450-474	8-1/2
75-99	1	475-499	9
100-124	1-1/2	500-524	9-1/2
125-149	2	525-549	10
150-174	2-1/2	550-574	10-1/2
175-199	3	575-599	11
200-224	3-1/2	600-624	11-1/2
225-249	4	625-649	12
250-274	4-1/2	650-674	12-1/2
275-299	5	675-699	13
300-324	5-1/2	700-724	13-1/2
325-349	6	725-749	14
350-374	6-1/2	750-774	14-1/2
375-399	7	775-799	15
400-424	7-1/2	800-824	15-1/2
425-449	8	825-849	16

- e. Office hours. Office hours for conferring with students on class work is determined by the scale presented in Table II.

TABLE II

If total under Lecture or Activity is:

0-5	allow 1 office hour
6-15	allow 3 office hours
16-35	allow 5 office hours

If total under Laboratory is:

0-12	allow 1 office hour
13-	allow 2 office hours

If total under Student Load is:

400-600	add 2 additional hours
601-	add 3 additional hours

### Some Questions Raised by the Study

1. While a six-factor formula such as we use probably measures teaching load better than the traditional single factor contact-hour or credit-hour measure, does the service unit approach measure very accurately the instructional load? If so, then loads among instructors are quite uneven and should be corrected. If it does not, then what steps should be taken to weight the factors better or to introduce new factors?
2. The present load formula considers only "instructional" load. Should some attempt be made to evaluate activities on committees, student extracurricular activities, community services, etc.?
3. How can instructors be protected from overload -- especially new instructors? Can we use underloaded instructors for special projects?
4. Can loads containing only laboratory courses be equated with those containing lectures?
5. Can teaching fields within a division have equal loads by the formula? See engineering and electronics, English and foreign languages for wide discrepancies.
6. Can courses requiring a great deal of individual work with students be evaluated better?
7. Do large classes receive enough credit?
8. Should the first hour in a lab be counted as a lecture?
9. How should reader assistance be evaluated?
10. Should division chairmen estimate the probable service unit load as the semester schedule is being prepared?
