BARBERING, A STUDY GUIDE AND PROGRESSION RECORD FOR BARBERING STUDENTS IN A COOPERATIVE TRAINING PROGRAM.

ALABAMA UNIV., UNIVERSITY

REPORT NUMBER UA-FILE-1338

PUB DATE NOV 63

EDRS PRICE MF-$0.50 HC NOT AVAILABLE FROM EDRS.

DESCRIPTORS- STUDY GUIDES, TRADE AND INDUSTRIAL EDUCATION, BARBERS, GRADE 11, GRADE 12, STUDENT RECORDS, COOPERATIVE EDUCATION.

QUESTION-TYPE JOB OR ASSIGNMENT SHEETS IN THIS GUIDE DIRECT THE STUDENT'S RELATED STUDY IN COOPERATIVE TRAINING PROGRAMS. THE MATERIAL WAS DEVELOPED BY TRADE AND INDUSTRIAL COORDINATORS, SUBJECT MATTER SPECIALISTS, AND TEACHER EDUCATORS. IT WAS TESTED BY USE IN HIGH SCHOOL PROGRAMS. THE 61 JOB SHEETS ARE KEYED TO THREE RELATED REFERENCE BOOKS, BUT COORDINATOR MAY SUPPLEMENT THE STUDENT'S STUDY WITH ADDITIONAL MATERIAL. COMPLETED JOB EXPERIENCES AND RELATED READINGS ARE TO BE RECORDED ON THE JOB SHEETS WHICH COVER THE HISTORY OF BARBERING, LADIES' HAIRCUTS, THE VOLUNTARY MUSCLES OF THE HEAD, ACNE FACIALS, ETC. A TRADE ANALYSIS PROGRESS FORM FOR TEACHER AND STUDENT USE IS PROVIDED FOR RECORDING COMPOSITE JOB PERFORMANCE AND REFERENCE READINGS DURING THE 2-YEAR PROGRAM. THE MATERIAL WAS DEVELOPED FOR GRADE 11 AND GRADE 12 STUDENTS IN AREA VOCATIONAL OR COMPREHENSIVE HIGH SCHOOLS. THIS MIMEOGRAPHED DOCUMENT INCLUDES A BIBLIOGRAPHY OF RELATED REFERENCES AND SUPPLEMENTARY MATERIALS. THIS DOCUMENT IS AVAILABLE FOR $1.50 FROM TRADE AND INDUSTRIAL EDUCATION, BOX 2847, UNIVERSITY, ALABAMA 35486. AN ANSWER BOOK (VT 003 115) IS ALSO AVAILABLE, $1.00 EACH. (HC)
BARTBERING

A study guide and progression record for Barbering students in a cooperative training program.

HOW TO USE THIS STUDY GUIDE AND RECORD OF PROGRESS

The following study guide is used as a means of guiding and checking the progress the student makes on the job and in the related class.

The correct way for the student to train is to observe or help do a job in the shop. Then at the next related study period the student looks up that job in the study guide and studies the references given for that job and answers the questions (in writing) asked about that job.

The following symbols will be used by the student to indicate how he was trained on the job:

**JOB PERFORMANCE**

- A dot in center of square indicates that the student observed a job being done.
- A diagonal line in square indicates that the student did the job under instruction.
- Two diagonal lines in square indicate that the student completed the job under supervision without instruction.
- A square filled in solid indicates that the student reached a satisfactory level of accomplishment. On the date this accomplishment level was attained, the student turns to the occupational analysis sheet in the front index section and places this date in the "Job Performance" column opposite this job.

**REFERENCE READING IN THE RELATED CLASS**

The student places a date such as 4/20/58 (in the "date read" column opposite a specific related reference) on a job sheet, to indicate completion of that reference study. When all of the questions have been answered, the student turns to the occupational analysis sheet in the front index section and places the date of this completion in the "Reference Reading" column opposite the job studied.

A quick check of satisfactory attainment in jobs performed and references read can be made by looking through the occupational analysis sheets.
In each instance the job numbers on the occupational analysis index and progression record sheet correspond with the numbers of the pages in the study guide on which the job references and questions appear. For example: Job No. 6 in the Trade Analysis will be Job No. 6 in the study guide with references and questions pertaining to that job.

The questions on a job sheet are to be used as a guide for the student's reading. It gives the student something definite to look for in the reference reading. It points out the more important things that should be found in the reference.

The essay type of answers that are required for most questions have a very definite value as they will help the student to form the habit of giving clear-cut, definite answers or explanations about the jobs.

Only a few references and a few questions have been listed on each job sheet to teach the student how to study the literature pertaining to their occupation. If the student learns how to study according to the plan, a much wider field of study is then open to him. After learning how to study, it is the responsibility of the coordinator to supplement the student's related study with additional material depending on the ability of the student to assimilate it.

The coordinator should stress the importance of the student reading all references on each job sheet.

An examination may be taken on any job at any time the student feels capable of taking it.

</table>

1. Name one indication that proves that barbering is one of the oldest trades.

2. Name two civilizations in which barbering first began.

3. Name an instance in the Bible that shows barbering existed before Christ.

4. What people had natural ability for barbering?

5. From which language was the word "barber" derived? Translated, what is its meaning?

6. Mention at least two historical characters who influenced the vogue through the various centuries.

7. Besides barbering, what else were the early barbers primarily noted for?

8. When and why did the clergy dissolve partnership with the barber-surgeons?

9. Name two reasons that caused the barber-surgeons to relinquish their practice of surgery? When did it occur completely?

10. Contrast the atmosphere of the early barbershops with those of today?

11. Name the four principal functions of the early barber-surgeons.

12. Give briefly either account of the origination of the barber pole.

13. What 14th Century Barber's Guild punished the violators of its laws and is still in existence today?

14. State one tribute paid to barbers because they played such a vital part in community life.

Continued....
15. After which state are the present barber laws of the other states patterned?

16. Name at least four of the provisions in the State Barber Laws.
1. What is the purpose of sanitation in the shop?
2. What is sanitation?
3. Who set up the standards for sanitation in the barber shop?
4. What are the four basic steps that the barber should use in sanitary practices in the shop?
5. Who is responsible for sanitary practices in the shop?
6. How does the barber know the kinds of commercial chemicals or disinfectants that can be used in the shop?
7. Why does close shaving make it easy for pathogenic bacteria to enter the skin?
8. Explain each of the five methods of sterilization.
9. Give some commercial chemical disinfectants that are recommended by the Boards of Health and Barber Examiners.
10. Give six requirements of a good disinfectant.
11. Define:
   (1) Sterilization
   (2) Disinfection
   (3) Antiseptics
   (4) Sterile
   (5) Germicide
   (6) Spatula
   (7) Deodorant
   (8) Sepsis

2. When the neck shave accompanies the standard shave what is done?
3. What sort of lather is used in the neck shave?
4. How should a cut be treated?
5. How should the neck be wiped?
6. In which hand should the comb and brush be held for combing the hair?
7. Why have some shops eliminated the use of the hair brush?
1. Give another name for the short cut.

2. Who should determine any variations that the barber should make in giving the short cut?

3. When is the clipper used?

4. Where should the clipper work begin?

5. What should be done if the hair remains heavy and long after the clipper work is completed?

6. How are the traces of the clipper line removed?

7. What will be the result if the hair is not picked up properly, and the comb is not held the proper distance from the head in certain cuts?

8. How should the short hair held in the comb be cut?

9. Why is little or no finger work necessary when giving the extreme short cut?

10. Why should the teeth of the comb be tilted slightly outward from the head when using it in connection with the shears?

1. In what way does the medium cut differ from the short cut?
2. Where is the clipper used?
3. What points should the barber keep in mind when giving the medium cut?
4. Why is finger work a necessity in giving the medium cut?
5. How is the knack of properly picking up the hair with the comb accomplished?
6. How does the medium cut differ from the medium trim?
7. How does the medium trim differ from the long trim?
1. Describe the pompadour style of hair cut.
2. Give the characteristics of a short pompadour.
3. Give the procedure for starting a short pompadour.
4. How is the shears and comb work accomplished in pompadour cutting?
5. How is hair combed in the medium and long pompadours?
6. Where is the clipper used in the medium and long pompadours?
7. Name two difficult haircuts to create.
8. Give some contrasting points on the pompadour and "butch" haircuts.
1. Why does cutting ladies hair require the use of different techniques?

2. List the techniques involved in cutting ladies hair.

3. Modern haircuts are styled to bring out and conceal what features of customers?

4. In selecting the proper hair style, what features of the customer should the barber take under consideration?

5. How is the hair combed before cutting? Why?

6. What does the term slithering mean?

7. If the hair is to be shortened only a little, when is the length cut?

8. If the hair is to be cut to a considerably shorter style, when is the thinning done?

9. What does one need to know in order to do women's hair cutting?

10. List the neck-edge styles on women.
1. Define the straight bob.
2. Give another name for the straight bob.
3. Distinguish between the straight bob and the shingle bob.
4. Why should the hair be cut longer if it is to be curled?
5. Why is the straight bob considered to be the simplest women's or girls' haircut?
1. Where do you begin the shingle bob?
2. What are the three types of neck lines?
3. May the "V" line vary?
4. Where is it best to start these hair lines?
5. When is the hair thinned?
6. What is the shingle bob sometimes called?
7. Give six helpful hints on shingling for the boyish bob.
8. Describe the natural or feather edge neck line.
9. Describe the round neck line.
10. How close to the scalp should the hair be cut?
1. What happens when a razor is passed over a hone?
2. How should the razor be stroked across the hone and why?
3. What must be done to insure that the teeth on both sides of the blade are at the same angle?
4. Why must the razor be stroked with equal pressure on both sides of the blade?
5. In what position must the razor be kept on the hone? Why?
6. What technique is necessary in mastering the honing process?
7. What is the first step in the honing process?
8. What is stroke no. 1 in the honing process?
9. What is stroke no. 2 in razor honing?
10. What characteristics should the strokes possess?
11. Describe a perfect cutting edge?
12. What does too much pressure along the outer portion of the cutting edge cause?
13. In what place should the pressure be exerted?
14. The third time the razor's position is moved where should it be?
15. Where should the pressure be exerted after the razor has been moved the third time?

1. What quality or characteristic does stropping give a razor's edge?
2. Of what do the strops consist?
3. How is the razor stroked in stropping?
4. How is the razor held for stropping?
5. What part of your arm is not to be moved?
6. After honing, where should the razor be finished?
7. How is the razor edge tested?
1. What is shaving?
2. How long has this process been in existence?
3. Give three reasons for the shaving habit being so firmly established?
4. State some characteristics a barber must develop performing a professional shave.
5. Give the three major phases of a shave.
6. Name a few preparation steps preceding shaving.
7. State the "major processes" in the actual routine of shaving the "first time over".
8. Give the procedure used in the routine of shaving the "second time over".
9. Describe the routine steps of finish given to a patron after a shave.
1. What is bacteriology?
2. What are bacteria?
3. Give two types of bacteria.
4. How do bacteria reproduce?
5. What are non-pathogenic bacteria?
6. What are pathogenic bacteria?
7. Where do bacteria multiply or thrive best?
8. Name two types of bacteria that form pus.
9. Name the three general shapes of bacteria.
10. What kind of bacteria causes pimples, boils and carbuncles or pus?
11. What kind of bacteria causes blood poisoning, sore throat, lung diseases, erysipelas, and appendicitis?
12. What kind of bacteria causes syphilis?
13. Name three ways in which bacteria get into the human body.
14. What contribution did the following persons make to science?
   (a) Louis Pasteur
   (b) Leeuwenhoek
15. Define and learn to spell:
    (a) Parasites
    (b) Saprophytes
    (c) Spore
1. What is digestion?

2. What are the main organs of the digestive system?

3. What is the main function of the digestive system?

4. Why is it important for the barber to understand the process of digestion?

5. What are the functions of enzymes in connection with digestion?

6. Name the glands that aid in digestion.

7. Name some aids to digestion.

8. Where are the parotid glands located?

9. Where are the sublingual glands located?

10. Where are the submaxillary glands located?

11. What digestive activities take place on the food in the stomach?

12. What purpose does the liver serve in digestion?

13. What purpose does the pancreas play in digestion?

14. What digestive activities take place in the small intestine?
1. Why should the barber know the circulatory system of the body?

2. Who discovered that blood had a continuous circulation?

3. What is the function of the circulatory system?

4. Give the two divisions of the circulatory system.

5. What purpose does the heart serve in blood circulation?

6. What is the function of the capillaries?

7. What is the function of the veins?

8. What is the function of the arteries?

9. Describe the function of the lymph?

10. How and where does nourishment enter the blood stream?

11. What is the function of the lungs?

12. What are the purposes of the red and white corpuscles?

13. Give the functions of blood plasma.

14. What is the purpose of the platelets in the blood?

15. What is the function of hemoglobin?

16. Give the two systems that take care of blood circulation.

17. Describe the interior structure of the heart.

18. Name the main arteries that supply blood to the head, face, and neck.

Continued....
19. Where are the two main branches of the common carotid arteries?

20. Locate and name six arteries of the scalp.

21. Locate and name nine arteries of the face, scalp and neck.
1. Why should the barber study the bones of the head, neck and face?

2. Give a definition for a bone.

3. How do the bones serve the body?

4. What is the composition of the bones?

5. What kind of blood vessels are found in the bones?

6. What kind of blood cells are formed in the marrow of the bones?

7. How do the bones get their nourishment?

8. Name and give the location of the divisions of the head.

9. Name the bones found in the cranium.

10. Where is the parietal bone located?

11. Where is the frontal bone located?

12. Locate the occipital bone.

13. Locate the temporal bones.

14. In what part of the cranium is the sphenoid bone located?

15. Locate the ethmoid bone.

16. Describe and give the location of the facial bones.

17. Locate the hyoid bone.

18. From the chart on page 317 and fig. 557 in the Art and Science of Barbering, be able to spell and identify the principal bones of the head.
1. Why should the barber know the muscles?
2. What are the functions of the muscles?
3. What effect do unhealthy muscles have upon a healthy body?
4. Explain how muscles are attached to the bones and to each other.
5. What is the less movable end attachment called?
6. What is the more movable end attachment called?
7. Name the three types of muscles.
8. Where is the epicranius muscle located?
9. What is the function of the occipitalis muscles?
10. What is the function of the frontalis muscles?
11. What is the function of the temporalis muscles?
12. Locate and give functions of the posterior auricular.
1. Why is it essential that the barber know the muscles of the face?

2. Locate and give the function of the corrugator muscle.

3. Locate and give the function of the orbicularis oculi.

4. Name and give the function of the muscles of the nose.

5. Give the name and function of the muscles of the mouth.

6. Give the location and functions of the masseter muscle.

7. Give the purpose of the temporalis muscle.

8. How do the muscles of the face get their nourishment?

9. What type of muscle controls the movement of the lower jaw?

10. What type of muscles does the barber massage?
1. What is the function of the omohyoid muscle?

2. Locate the sternocleidomastoid muscle and give its purpose.

3. Give the name of the muscle that depresses the lower jaw and draws down the lower lip.

4. Give name and description of the muscle that draws the head to one side or backward and rotates shoulder blade.

5. Which muscle is supplied by the cervical branch of the facial nerve?

1. Why should the barber study the skin?
2. Name the two divisions of the skin.
3. How much of the total blood supply of the body is found distributed to the skin?
4. Why is it that the skin regains its former shape almost immediately after expansion?
5. Upon what does the color of the skin depend?
6. Name the two types of glands found in the skin and tell what material each extracts from the skin.
7. Explain how the principal functions of the skin are:
   (a) protection
   (b) sensation
   (c) heat regulation
   (d) absorption
   (e) secretion and excretion
8. What is the function of the sebaceous glands with regard to the hair?
9. Sweat glands are largest and found most on what parts of the body?
10. How many sebaceous glands are usually attached to each hair follicle?
1. Why should the barber have a knowledge of the ingredients and uses of the various cosmetic preparations that he uses?

2. Name the principal cosmetic preparations used by barbers.

3. Define cosmetic.

4. List five uses of cosmetic preparations in barbering.

5. List three classifications of cosmetics used in barbering.

6. Give three examples of each class of cosmetics.

7. What is the most widely used cosmetic?

8. Define soap.

9. Name four kinds of soaps.

10. Name four kinds of creams used by the barber.

11. What is soft water?

12. What is hard water?

13. Identify the following symbols: (1) H₂O (2) HCl (3) NaCl (4) O (5) H
1. How can the barber serve the public without fear of contracting diseases?

2. Define disease.

3. Describe dandruff.

4. What are some of the causes of dandruff?

5. Define trichology.

6. What is meant by canities? Name three types.

7. Give several causes of acquired canities.

8. Define the following terms:
   (a) Dermatology
   (b) Dermatologist
   (c) Etiology
   (d) Diagnosis
   (e) Lesion

9. What is the most common disease of the oil gland?

10. Give the common name for the following medical terms:
    (a) Pediculosis capitis
    (b) Tinea sycosis
    (c) Tinea favosa
    (d) Tinea tonsurans
    (e) Scabies

11. What can the barber do to prevent the spread of syphilis?
Give a Plain Shampoo

1. What is a plain shampoo?
2. Give two major reasons for giving a shampoo.
3. Give points that favor the shampoo as given by the barber.
4. Give methods of applying the neck piece.
5. Give the standard outline for liquid soap shampoo.
6. Give five examples of liquid soap shampoo.
7. Give two sources of instruction for shampoo procedures.
8. Explain the procedure for rinsing the hair.
9. Describe the reclined method of giving a shampoo.
10. Explain the proper method to dry the hair.
1. What is meant by the term hair tonic?
2. What are the general purposes of hair tonic?
3. Why should the barber be familiar with the nature of each type of hair tonic?
4. Why should the scalp be massaged before applying the tonic?
5. Give the specific purposes of tonics.
6. Why are tonics recommended to keep the scalp healthy?
7. Why is the alcohol used in tonics?
8. Name some beneficial ingredients used in tonics.
9. What aids are given in the movements of applying tonics?
10. What ingredients are antagonistic to the growth of disease producing germs?
11. What are the three apropos times to suggest tonics?
12. When is a barber not supposed to suggest a tonic?

8. Where should the barber stand while trimming the beard?
9. In what part of the country are beards worn for seasonal festivities?
1. Define electricity.

2. Explain how electricity may be chemically or mechanically produced.

3. Define the following terms:
   (a) current
   (b) conductor
   (c) non-conductor
   (d) electrode
   (e) magnetism
   (f) ohm

5. Can one type of current be changed to the other? Explain.

6. How are electrical measurements expressed?

7. What is galvanic current and for what is it used?

8. The process of destroying tissues by passing a negative galvanic current through them is known as what?

9. For what is cataphoresis used?

10. List the three types of high-frequency current, and tell how each received its name.

11. List the three methods of using the Tesla current.

12. When is the general electrification method used?

13. List the benefits derived by the consumer when the vibrator is used for giving a massage.

14. How may the vibrator be used?

15. For what is faradic current principally used?
1. What is light therapy.

2. List the three types of light rays with which the barber should be concerned.

3. Name the general types of ultra-violet lamps.

4. How should the eyes of the customer be protected when using ultra-violet rays?

5. The ultra-violet rays are used effectively in the treatment of what diseases?

6. What type heat results from the use of the infra-red rays?

7. Give the use and effect of infra-red rays.

8. Explain how the lamp is applied.

9. What is one thing that must be done for the protection of the customer when using any type of light rays?

10. List at least one use and effect of each of the following lights: white, blue and red.
1. What is a massage?

2. What part of the body does the barber massage?

3. What was Hippocrates' theory of massage?

4. What effect does the proper massaging have on the face, neck, and head?

5. For what specific purpose is the stroking movement used?

6. What are the major purposes of massaging?

7. (a) How is the percussion massaging movement given?
   (b) How many tappings per minute should be given to each area covered?

8. How is a vibratory massage movement given?

9. What physiological effects do massages have upon the patron?

10. What is the difference between manipulation and movement?

11. What is the theory in giving a stimulating massage?

12. What is the theory in giving a relaxing massage?

13. Why should the barber have a systematic way in giving a massage?

14. What movements may be used to improve the following facial expressions:
   (a) drop mouth
   (b) double chin
   (c) hollow in the neck
   (d) wrinkled face and neck
   (e) a youthful look

15. When is massaging not recommended for a patron?
1. What are the three general purposes of facials? Explain.

2. List five specific purposes of facials.

3. Define the following terms:
   (a) Petrissage
   (b) Effleurage
   (c) Percussion
   (d) Vibratory
   (e) Rotary

4. Name three things customers like most about facials.

5. List five things to avoid in giving facials.

6. What is the chief purpose of a rest facial?

7. List the twelve rest facial movements.

8. How should rest facial movements be executed?

9. What are the standard times for the completed series of movements to be given?

10. What should the attitude of the barber be during a rest facial?
