This guide is designed to provide seventh-grade social studies teachers with materials needed to present instruction in reading skills and to teach those facts, concepts, and attitudes which are the aim of social studies education. Entries on the subject of westward expansion and transportation in New York State are arranged by topics, and material within each topic is arranged according to two texts: "Living in New York" by Flierl and Urell, to be used with modified classes, and "New York: The Empire State" by Ellis, Frost, and Fink, to be used with honors and average classes. The guide presents exercises to promote the development of vocabulary, comprehension, critical thinking, and map skills. Questions are designed to evaluate the student's mastery of these skills and of content subject matter. Some questions are designed to cover collateral chapters in the two texts and are so identified. (RT)

Mr. Howard W. Nordahl, Principal, Sewanhaka High School
This revised edition extends to our newly-adopted seventh grade social studies texts the district's well-known program of developmental reading in the content areas. In publishing this guide, the district reaffirms its belief in the value of developmental reading for secondary school pupils.

This volume represents the cooperative efforts of many participants with special talents whose contributions I acknowledge with appreciation.

Mr. Dan Dramer, District Curriculum Supervisor, Reading and Language Arts

Mr. Ira Wilder, District Social Studies Coordinator

Dr. Harold L. Herber, Project English Demonstration Center, Syracuse University

Mrs. Anne Cosse

Dr. James A. DeSonne, Assistant District Principal, Curriculum and Instruction

For their authorship of the guide in the summer of 1964.

For their work in writing the original edition of this guide and its first revision.

For supervising and organizing the project in its formative and developmental stages.

For suggestions on dividing the content into study units.

For organizing, during his tenure as District Reading Coordinator, the district's developmental reading program and its original study guides, and later, for consulting with the authors of this revised edition.

For voluntarily analyzing and criticizing our trial units, and for sharing her experience in writing and using these guides.

For general supervision of the summer workshop.
ACKNOWLEDGMENTS

Mr. Robert Vincent, Director, Instructional Materials Center For supervision of the production of this guide

Mrs. Madeline Hendrix For editing final copy and for assisting in the supervision of the production of this guide.

Mr. Donald Pross For creation of the cover design and other art work.

Miss Patricia Massey and the typing and production staff For technical production of the guide.

It is expected that the reading departments and junior high social studies departments of the several schools will plan for the inclusion of this material in the social studies program. Teachers using the guide are urged to keep notes on their critical analysis of it. After a suitable period of time, the guide will be evaluated and appropriate action will be taken.

John W. Nicoll
Principal of the District

September 1, 1964

25. New York Becomes the Nation's Cultural Center
32. New York City Has Its Own Government
30. New York Becomes the Empire City
31. New York Becomes a World Capital
TO THE TEACHER

This volume is one of a six-unit series designed to correlate with the two seventh grade social studies textbooks we use in Central High School District No. Two. The textbooks were examined by social studies teachers and organized into the following topical units:

Unit I - New York State Geography: Regions, Resources, and Communities.

Unit II - Early New York History: Settlement to Statehood (Indians; Dutch; English; Revolutionary War)

Unit III - New York State Government and Local Government; Social and Cultural Progress

Unit IV - Westward Expansion and Transportation in New York State

Unit V - Agriculture and Industry Development in New York State. Problems of the Industrial Age

Unit VI - The Local Community: Long Island and New York City

Each of these six units embraces several chapters of each of our two texts. The chart which precedes this page gives the details of this breakdown into units.

This series is based on three assumptions:

1. Teachers cannot take for granted that pupils enter junior high school fully trained for the reading tasks they will encounter.

2. Secondary school pupils need continuing developmental reading instruction which will enable them to cope with the textbooks of constantly increasing difficulty which they will encounter as they progress through school.

3. The person best equipped to teach the special reading skills needed in as specialized a course as social studies is the social studies teacher.

- v -
The purpose of this volume and its collateral material is to provide the teacher of seventh grade social studies with the aids he needs to instruct his students in the skills they require for reading their texts and supplementary books. This volume is designed to accomplish the dual objectives of providing instruction in reading skills, and, at the same time, teaching those facts and concepts, and developing those attitudes which are the aim of social studies instruction.

The following information will help you to use this material more effectively.

1. Nature of the material: All of the pages in this volume are addressed directly to the pupil (except, of course, for these few prefatory remarks), and all can be requisitioned in any quantity desired.

2. Ordering material: Material should be requisitioned through your department chairman, who, in turn, will order it from the I.M.C. Order all the material for an entire chapter at one time. Allow two weeks for delivery.

3. Format: This material follows a consistent format. It is arranged by topics, and within each topic arranged according to the two texts; the Ellis book for honors and average classes, and the Flierl book for modified classes. (If you are teaching only modified classes, for example, you may want to fold under the pages of Ellis material until next year, and vice versa.) The material corresponding to a chapter in either text consists of the following:

   A. A list of new vocabulary words and a separate list of the proper nouns in the chapter. Asterisks mark words which the authors of the textbooks themselves indicate need explanation. Some of the words have been underscored to show they appear in context immediately below. This provision of a context in which the word's real meaning is revealed is an important part of the guide.

   B. A test of the new vocabulary words.

   - vi -
C. A reading guide which, by directing the student's reading to the salient features given under each bold-faced sub-heading of the text, provides purpose and direction.

D. An exercise designed to develop a specific reading skill.

E. Questions designed to evaluate the pupil's mastery of the chapter's reading, critical thinking skills and the subject matter content of the chapter. NOTE: SOME QUESTIONS ARE DESIGNED TO COVER COLLATERAL CHAPTERS IN THE TWO BOOKS (ELLIS AND FLIERL) AND ARE SO IDENTIFIED.

4. Page identification  Each page is marked to indicate:

A. The book on which it is based (whether Ellis or Flierl).

B. The chapter number and title of the text to which it corresponds.

C. The function (reading skills taught, etc.) of the material presented on the page.

D. The type of class (honors, average or modified) for which the exercise is intended.

E. The page numbers in the text to which it corresponds.

A specimen page showing the labeling and coding of each page follows.
FLIERL, CHAPTER 1, REGIONS OF THE EMPIRE STATE

WORDS TO LEARN

Purpose of page

SPECIMEN PAGE SHOWING LABELING AND CODING

- viii -
The letter in the lower left hand corner of each page designates the type of class for which the exercise is geared: A - average class; H - honors; M - modified.

Sometimes when some of the questions on a sheet are intended for the average group and others for the honors group, only, they will be so coded. The lower left hand corner designation \( A: 1-6 \), for example, indicates that in the opinion of the person who composed the exercise, average pupils should be able to handle only the first six questions, but honor pupils should be able to handle all ten.

This material, if made a vital part of the daily structure of your teaching, should be a valuable aid in improving reading skills generally and social studies skills particularly.

M SS7 Unit IV p.1 162-177 F
Words Used in Context

ceded The Indians ceded the land to the settler only after they were paid for it. When they ceded it, they gave up their right to the land.

tract That large tract of land was bought from the Indians and farmed by the pioneer who lived there. Some tracts consisted of hundreds of acres.

subdivided Mrs. Smith divided the cake and gave half to Barbara. Barbara subdivided it to share it with her sister Joan.

real estate We went to the real estate office in order to buy a house. The real estate agent showed us houses and property.

agent The agent, sent by the head of the company, spoke to the workers and promised them that their wages would be raised. They believed the agent, because he represented their boss.

navigable I would like to sail the boat on that small river, but it is not navigable. Some day, if they widen it and make it navigable, I may get my wish.

fatal Pneumonia was once a fatal disease. Since antibiotics have been used people seldom die from pneumonia.

peddler Mrs. Brown welcomed the monthly visit of the peddler and purchased all the things she would need for the month. The peddler, by going from farm to farm, saved the farm people from making a long and sometimes impossible trip to the store.

bartered The two boys bartered their possessions. Jimmy traded his pen knife for Tom's harmonica. Jimmy liked bartering. Not only did he save his money; in this case, he got rid of something he didn't need.

livestock The farmer fed his livestock every morning. He brought food to all the animals, the cows, hogs and chickens.

FLIERL, CHAPTER 11, SETTLING WESTERN NEW YORK

DIRECTED READING

READ TO FIND THE ANSWERS TO THESE QUESTIONS:

1. What major factor discouraged early settlement?
2. How did the Fort Stanwix Treaties help settlement?
3. Did the Indians give the land away?
4. How did New York set an example which helped solve the problem of rival claims?
5. Why did New York resist Vermont's claim to independence?
6. What was the Pre-emption Line?
7. Why did people move west?
8. What was a speculator?
9. What is the Military Tract?
10. Why did Phelps and Gorham purchase the land?
11. What was the purpose of the Holland Land Company?
12. What was the name of the biggest single sale of land in New York State?
13. How was land sold in early New York?
14. Who was the best known land agent?
15. How did these early settlers travel?
16. What is a batteaux?
17. What were some of the hardships that the travelers faced in the wilderness?
18. Where were the two important routes to the St. Lawrence River?
19. Where did the Young's obtain their home and furniture?
20. How was the forest a help to the pioneer?
21. How was the forest a hindrance to the pioneer?
22. How did frontiersman support themselves?
23. How did pioneer families obtain necessities that they could not produce themselves?
24. Who did the work on a frontier farm?
25. What did pioneers eat?
26. How did pioneer families spend their evenings?
p. 175, There Were Many Kinds of Bees
27. What was a "building bee?"
28. What made the husking bee popular?
29. Why did they have "bees"?

p. 176, Education and Religious Training
30. How were children educated in the early settlements?

REVIEW THE CHAPTER BY ANSWERING THE QUESTIONS ON PAGES 167, 171, and 177.
FLIERL, CHAPTER 11, SETTLING WESTERN NEW YORK

Understanding Pictures

Pictures can give you a great deal of information. You should develop the habit of examining illustrations closely in order that you may obtain the maximum benefit from them. There are many things to look for in a picture. Pictures are always included for a specific purpose.

Look at the four pictures on pages 170, 171, 172, and 173 and answer the following questions about these pictures.

1. Why are these pictures included in this chapter?

2. What does the author want you to learn from these pictures?

3. What can you learn from the background in each picture?
   a. Does the forest tell you anything?
   b. Do the animals tell you anything?
   c. What can you learn from the ground near the farm house?

4. The words under a picture are called the caption. It is important to read it. Write down the additional facts which you learn from the caption which cannot be determined from the photograph.
FLIERL, CHAPTER 11, SETTLING WESTERN NEW YORK

QUESTIONS FOR REVIEW

Fill in the blanks

1. The ________ was the first attempt to establish a boundary between English and Indian territory.

2. The ________ was land set aside to be given to men who joined the American army during the Revolutionary War.

3. Phelps and Gorham were ________________ who bought land to resell at a higher price.

4. The best known land agent was ________________.

5. ________________ is the name of the illness that the settlers called "Genesee fever".

6. A frontier gathering was called a ________________.

7. The most popular "bee" among young people was the ________________.

8. Frontier children were educated at ________________.

9. A ________________ was a flat boat specially built for travel.

10. ________________ was admitted to the Union as the 14th state.

Words Used in Context

speculator The speculator in land, invested his money in the hope of gaining a large profit when he sold it. If he had not speculated in western lands much of the settlement would have been delayed.

H & A SS7 Unit IV p.8 E 183-194
leasehold The land held by a farmer under a rental arrangement was called a leasehold. When tenant farmers sold the leasehold they would have to give the landowner a portion of the money received.

tenancy system Under the tenancy system farmers only received the land under an agreement to pay rent. As a tenant, paying a yearly amount for the use of land he could not own. A farmer did not have the desire to improve the land under this system.

militia The militia, is an army composed of ordinary citizens rather than professional soldiers. In times of emergency, when soldiers were not available, the governor could use the militia to keep order.

military law Governor Wright had to place the country under military law, replacing civilian government temporarily with martial rule. After the antirent disturbances had quieted down, he withdrew the order of martial law.

migration The first migration was from Europe to America, with large groups of people moving and settling in the Hudson-Mohawk area shortly after the Revolutionary War. The migration to western New York began, aided by the speculators who sold the land for profit.

down payment The settlers made a small down payment in cash to buy the land, promising to pay the balance in installments in the future. The early settlers had little cash so the down payments were small.

girdling The farmers would girdle a tree by cutting a ring of bark out of it. The girdling would cause the tree to become diseased and die, thus slowly clearing the trees off the land.

scientific agriculture Today, farmers receive information on scientific agriculture from the State Department of Agriculture and Markets, and thus learn the methods of getting better production from the soil. In the days before experiments and experience had taught the value of scientific agriculture the farmer used up all the good soil and then moved on to a new location.

scythe He used the scythe with its long blade attached to the bent wooden handle, to cut the tall grass. As he swung the scythe, and the grass fell before it, he opened a path through the field.

reaper Today a mechanical reaper is used to cut the grain and bind it together after it is harvested. The first horse-drawn reaper machine was invented by Cyrus McCormick.

ELLIS, CHAPTER 14, FRONTIERSMEN BECOME FARMERS

Recalling Events in Chronological Order

Methods and products changed as farming developed in New York State. To show that you understand how this development took place, rearrange them in the order in which they happened.

**Events**

- a. New farm machinery speeded up the work of planting and harvesting.
- b. Those crops needed to feed cattle and manufacture beer were in demand.
- c. The farmers needed cash to pay for land and other things they needed.
- d. Farmers made no effort to conserve the soil, but moved on when the land wore out.
- e. Wheat was the important early cash crop.
- f. Farm papers distributed scientific knowledge about crop rotation, breeding, etc.
- g. Dairying became most important due to the rise in demand for cheese, butter and milk from the city.
- h. Watson decided to "show Americans how to farm" by exhibiting the best specimens of farm animals.
- i. They obtained potash to sell by burning trees.
- j. The raising of sheep and cattle for food became a profitable business.
- k. Sheep raising for wool became popular between 1830 and 1845.

ELLIS, CHAPTER 14, FRONTIERSMEN BECOME FARMERS

DIRECTED READING

READ TO FIND THE ANSWERS TO THESE QUESTIONS:

p. 184-186, Landlords and Tenants Fight in Eastern New York
1. What was the attraction that eastern New York had for settlers?
2. What happened to Tory estates in New York?
3. Why did most of the large landholders sell parts of their estates rather than lease them?
4. What were the rental terms of Stephen Van Rensselaer?
5. In what three counties was the tenancy system mainly used?
6. What was the objection to the tenancy system?
7. What started the antirent "war"? Who was Smith Boughton?
8. How did the landlords react?
9. What change in the law prevented further antirent disputes?

p. 186-188, Central and Western New York are Opened Up to Settlement
10. What hindered settlement of central and western New York? How was this changed?
11. What was the Military Tract?
12. What problems did William Cooper meet in founding the village of Cooperstown?
13. What did Joseph Ellicott do to make things easier for the settlers?
14. Why did the Holland Land Company buy a large tract of land in western New York?
15. Why did northern New York attract only a few settlers?
16. How did land agents help in the development of New York?

p. 188-190, Pioneers Build a New Society
17. What type of land did the farmer look for in choosing a place for settlement?
18. What tasks did the pioneer family have to do in order to survive?

p. 190-192, Pioneer Agriculture Gives Way to Grazing and Dairying
19. What did the pioneers do to earn cash?
20. What were the first big crops? How did location affect this?
21. Why were oats, hay and corn important crops?
22. In what three grains did New York lead in production?
23. How is New York suited for animal husbandry?
24. What caused the decline of sheep raising in New York?
25. What was the most important development in agriculture in New York? Why was this so?
26. Why was the milk industry smallest at this time?

p. 192-193, New York Farmers Adopt Better Methods and Machinery
27. Why were farmers disinterested in new methods of farming?
28. How did Elkanah Watson improve the practice of farming?
29. What is the purpose of our State Fair at Syracuse?
30. Who was Jesse Buel?
31. Who invented the iron plow?
32. What other improvements were made in farm machinery?

REVIEW THE CHAPTER BY ANSWERING THE QUESTIONS ON PAGE 194.
Questions for Review

1. What happened to the land owned by the Tories in New York State?
   a) The Tories kept their land after the war.
   b) The Tories were forced to sell their land to Patriots.
   c) The Tories sold their land to the New York State government.
   d) The state government took the land from the Tories and then sold it.

2. What did most large landholders do with their lands after the Revolutionary War?
   a) They sold their land to small settlers.
   b) They rented to tenants, but would not sell the land.
   c) They gave their land to settlers.
   d) They kept their land to themselves.

3. If you were a tenant of Stephen Van Rensselaer, you would have to do ALL of the following EXCEPT:
   a) Pay a certain amount of wheat as rent.
   b) Provide a day's work with a team for the landlord.
   c) In case you sold your land, pay one-fourth of the selling price to the landlord.
   d) Belong to the church of the landlord.

4. If you were a visitor to New York State in 1842 and were at a meeting where the people were shouting "Down rent!" you would know that:
   a) This was a meeting of farmers trying to get rid of their rents.
   b) This was a meeting of landowners trying to crush their tenants.
   c) This was a group of sheriffs and deputies getting ready to go after tenants.
   d) This was a group of city people who were against the landowners and their tenants.

5. In the early 1840's, signs reading "Down Rent" were likely to appear in the
   a) Hudson-Mohawk Valley region.
   b) Southern Tier.
   c) North Country.
   d) Long Island.

6. What was the result of the "antirent war" of the early 1840's?
   a) The landholders won, and the tenants were defeated.
   b) No land could be rented in New York State.
   c) Agricultural land could not be leased for a longer period than twelve years.
   d) All leases of land were done away with.
7. What was the Military Tract?
   a) land on which some of the important Revolutionary War battles were fought
   b) the series of forts in the Champlain Valley
   c) land set aside by the state for Revolutionary War veterans
   d) the plan for the defense of New York State in case of war

8. The contribution to the development of New York State made by land agents was that
   a) they attracted many settlers to New York
   b) they gave free land to settlers
   c) they charged very high prices for land
   d) they tricked the Indians out of much of their land.

9. If you were a pioneer, in the Genesee County, looking for a place to live, you wanted all of these things EXCEPT
   a) land with a good water supply
   b) land that was close to a road or a river
   c) land in the rolling hill country
   d) flat land along a river

10. What was the most important cash crop of New York farmers after the Revolutionary War?
    a) wheat
    b) oats
    c) flax
    d) hops

11. The most important change in New York agriculture was
    a) the raising of Merino sheep by New York farmers
    b) the growth of the hop industry
    c) the rise of the dairy industry
    d) the raising of beef cattle

12. Potash is:
    a) a crop raised in western New York
    b) the name of a mineral used in construction work
    c) a product made from ashes that was used in fertilizers
    d) the name of a small community in the Adirondack country

13. Hops:
    a) a product used in the manufacture of beer
    b) a square dance popular in rural New York
    c) a grain used as a feed for cattle
    d) early name for agricultural fairs in New York
14. Antirenters:
   a) a person who favored paying rents to the landlord
   b) a person who opposed paying rents to the landlord
   c) a landlord who did not believe in renting lands
   d) an Indian who did not want to sell land to the whites.

Match the statement in Column II with the name in Column I. There will be one extra statement.

M SS7

Unit IV, p.16 178-195F
right of way  The right of way was a strip of land granted or sold to the railroad so it could build the track. The land on either side of the right of way still belonged to the original owner.

lotteries  Lotteries or games of chance are used by many organizations to raise money. Our state, however, frowns upon the use of state lotteries to raise money.

constituent  The constituents of the first district were glad that they had elected Mr. Wilson to Congress. He pleased his constituents a great deal by getting more money for local industry.

turnpikes  When we think of turnpikes today we think of long modern roads. In the 1800’s the term had two meanings. On the one hand turnpike meant a toll road and on the other it was the gate in the road were the toll was paid.

shunpike  Shunpikes were used when people did not want to pay the tolls. These short side roads around the toll gates were often traveled more than the turnpikes themselves.

ferryboats  The ferryboats charged a fee to carry freight and passengers across the water. Today bridges have replaced ferryboats in many cases.

packet boat  Packet boats were faster than freight boats on the canals. Packet boats were given the right of way over freight boats on the canal because speed was so essential.

aqueduct  Wooden troughs which carried canal waters over streams were called aqueducts. You can still see the ruins of some of these aqueducts in many western cities, looking like bridges over a stream.

escarpment  In most Tarzan movies he returns to his home by climbing a steep escarpment that separates his jungle home from the outside world. His escarpment is so steep that no other white man can climb this huge cliff.

cargo  The cargo on the ship consisted of many different types of freight. The cargo on one ship consisted entirely of wheat from the Genesee Valley.

FLIERL, CHAPTER 12, ROADS AND WATERWAYS IN EARLY NEW YORK

DIRECTED READING

READ TO FIND THE ANSWERS TO THESE QUESTIONS:

p. 178, New York's Early Roads
1. What was wrong with roads before 1800?

p. 178, The Genesee Road
2. Where was the Genesee Road?

p. 178, Traveling on the Genesee Road
3. What were some problems that faced travelers on the Genesee Road?

p. 179, The Turnpikes
4. Who paid for most of the early roads?

p. 181, Albany Becomes a Turnpike Center
5. Why did Albany become a turnpike center?

p. 181, To Buffalo
6. On what four turnpikes would you have traveled in 1820 going from Albany to Buffalo?

p. 181, The Great Western Turnpike
7. What was the Great Western Turnpike?

p. 181, Turnpike Charges
8. What was the average charge on New York's first turnpikes for a ten mile trip?

p. 181, Freight on the Turnpikes
9. What was a drover?

p. 184, Stagecoaches and Steamboats
10. Why was the stagecoach driver so important 150 years ago?

p. 184, Travel In a Stagecoach
11. How can you tell that the early stagecoaches were built for service and not comfort?

p. 184, Stagecoach Routes
12. What was the second most important road center in New York?

p. 185, Stagecoaches and the Canals
13. Why were stagecoaches still used even after canals were built?

p. 185, The Steamboat comes to New York
14. Who was John Fitch?

15. Who was Robert Fulton?

16. Who was Robert Livingston?

p. 185, Steamboats on the Hudson
17. What were two important results of using steamboats on the Hudson?

p. 186, Lake Steamboats
18. What was the first steamboat used on the Great Lakes?

p. 186, Building the Erie Canal
19. How wide and deep was the Erie Canal?

p. 186, Reason for building the Erie Canal
20. Why was the canal needed?

p. 187, Problems In Building the Canal
21. What problems had to be overcome before the canal could be finished?

p. 189, What the Canal Meant to New York
22. What was the "Marriage of the Waters"?

p. 190, Effects of the Canal
23. How did the canal help western farmers?

24. How did the canal affect population?

p. 191, What the Erie Canal Meant to N.Y.C.
25. How did the Erie Canal help New York City?
DIRECTED READING (Continued)

p. 192, Traveling On The Canal
26. What was the difference between a packet boat and a freight boat?

p. 192, Other New York Canals
27. Name three canal in New York other than the Erie Canal.

p. 192, Two Private Canals
28. What two companies were constructed by private companies?

29. What is the only major canal left in the state?

REVIEW THE CHAPTER BY ANSWERING THE QUESTIONS ON PAGES 183, 186, 189, 194 and 195
You are to identify the shortest stagecoach route for traveling between certain cities. Identify your route by listing in order the cities through which you would travel to reach your destination. Use the map on pages 180 and 193.

Example: Cities through which you would travel for the shortest route...
1... to Cherry Valley from Kingston
   1.) Kingston  2.) Catskill  3.) Albany  4.) Cherry Valley

Cities through which you would travel for the shortest route...
1.... to Buffalo from Utica

2.... to Monticello from Bath

3.... to Binghamton from New York City

4.... to Rome from Middleport

5.... to Catskill from Jamestown

6.... to Rochester from Binghamton

7.... to Carthage from New York City
QUESTIONS FOR REVIEW

1. The city of [Blank] was the center of commerce between the western and eastern parts of New York State.

2. The old [Blank] were similar to the Thruway in the way tolls were paid.

3. A [Blank] was a short side road that led around the tollgate to avoid the tolls.

4. Another name for the Erie Canal was [Blank].

5. [Blank] built the Clermont, a steamboat, which steamed up the Hudson River and proved to be better than a sailboat.

6. [Blank] was the governor of New York when the Erie Canal was built.

7. The Erie Canal was a ditch approximately [Blank] miles long.

8. The Erie Canal stretched from Troy to [Blank].

9. The most important canal that still operates in New York today is the [Blank].

**Words Used in Context**

mony _opoly The company of Robert Fulton was given exclusive rights or a _opoly, to use steamboats in New York. While this company had the _opoly, no one else had the right to operate a steamboat in any of the waters of the state.

**H & A SS 7** Unit IV p. 23 E 195-205
Words Used in Context

packets  Packets were ships which carried goods and passengers on a regular schedule. Businessmen preferred to ship by packets, because they were more reliable.

tramp steamer  A steamship which followed no set route or timetable was called a tramp steamer. The tramp steamer lost business to the packet.

sloop  A sailboat having one mast was called a sloop. Much of the trade on Long Island Sound and the Hudson River was carried on by sloops.

schooner  The schooner was larger than the sloop and had two masts. Schooners were able to sail along the Atlantic Coast.

full-rigged ship  The full-rigged ship was a merchant ship with at least three masts. The Ocean Monarch was the largest full-rigged ship.

corduroy roads  Corduroy roads were made of cut logs (cord) laid across swampy places. These corduroy roads were very bumpy.

railroad terminal  Either end of the railroad is called the railroad terminal. The Erie Railroad had trouble at first because its terminals were poorly located.

suspension bridge  A suspension bridge is hung on cables between towers. A suspension bridge was built across the Niagara Gorge.

T-rail  Solid iron rails shaped like the letter "T" were found to be safer. Formerly, rails were made of wood with a covering of iron. A law was passed requiring all railroads to use T-rails only.

READ TO FIND THE ANSWERS TO THESE QUESTIONS:

1. What were the most important means of transportation up to the Civil War?
2. What was the advantage of having the monopoly on steam vessels?
3. What was the decision of the Supreme Court relating to this monopoly?
4. Why did we need the Steamboat Inspection Act?
5. How did steamboat transportation develop?
6. What contribution was made by Commodore Vanderbilt?
7. What is a tramp? a trader? a packet?
8. What is the difference between a sloop and a schooner?
9. What was a full-rigged ship?
10. Why were the builders so proud of the clippers?
11. Why was the change finally made to the steamboat?
12. Why were the British able to control the best trade routes?
13. Give two reasons why roads were so bad in 1791?
14. Why did the need for better roads increase?
15. What two ways were found to meet this demand?
16. Why did Albany become the turnpike center?
17. What were the routes of the main turnpikes?
18. What two other means of transportation forced the decline of the turnpikes?
19. What three important changes were brought about as a result of the turnpikes?
20. What was it like to travel by stagecoach?
21. Why did plank roads turn out to be a disappointment?
22. Describe the development of bridges
23. How did farmers transport heavy freight?
24. What caused New York City to fear that it would lose the trade of the interior?
25. What were the reasons for constructing the Erie Canal?
26. What part did De Witt Clinton play in the construction of the canal?
27. What were some of the more serious problems in connection with the building of the canal? How were they solved?
28. What points were connected by the Champlain Canal?
29. What proof do we have that the canal was a success?
31. What other canals were built?
32. Which canal was owned by a private company?
33. What happened to most of the canals off the Erie?
34. What two cities were connected by the Mohawk and Hudson Railroad?
35. Why did businessmen want more railroads for New York?
36. How did Troy try to become a strong trade center?
37. What did Albany do?
38. How did New York enter the competition for railroads?
39. What other cities were connected by railroads?
40. What problem was created by these chains of railroads?
41. Why was the ban lifted on freight transportation by railroads?
42. Which railroads were acquired by Vanderbilt?
43. What problems were faced by the builders of the Erie Railroad?
44. Which cities linked the New York Central and Erie Railroads?
45. What two engineering changes improved railroads?
46. What other changes resulted in a safer and more comfortable train ride?

REVIEW THE CHAPTER BY ANSWERING THE QUESTIONS ON PAGE 208.
Assuming you were alive back in 1859, tell what railroads or canals you would use to make the following trips. Use map 24 on page 202.

1. Carthage to Utica

2. Corning to Batavia

3. Rochester to Hornellsville

4. Binghamton to Albany

5. Lockport to Auburn

6. Whitehall to Albany
The establishment of various types of transportation (causes) caused certain changes (effects) in New York State. Below is a scrambled list of the effects brought on by these causes. Write each effect under the underlined cause (type of transportation) to which it belongs.

1. Became the most important means of transportation.
2. Provided the first great reduction in freight cost.
3. Made possible the use of larger bodies of water for transporting freight and passengers.
4. Provided cheaper transportation for passengers, but not for freight.
5. Provided cheap transportation for freight and passengers.
7. Took business away from the three other means of transportation.
8. Made possible round trips from west to east by water.
9. Provided income for road building companies.
10. Helped the growth of middle-west population.

H & A SS7 Unit IV, p. 29 E 195-205
**REVIEW TEST**

1. What was the chief advantage of the clipper ship?  a) It carried more cargo than other ships.  b) It was very fast.  c) It could carry more passengers than other ships.  d) It was a very safe vessel.

2. Turnpikes had all of the following effects on New York State EXCEPT:  
   a) New regions of the state were opened up for settlement.  b) The cost of shipping goods was reduced.  c) Many New Yorkers became wealthy from the profits of turnpike companies.  d) Travel became faster.

3. Why did turnpikes decline in importance?  
   a) It cost too much money to keep them in good condition.  b) Turnpikes cost too much money to build.  c) Railroads offered a better means of transportation.  d) The turnpikes were too rough for comfortable travel.

4. All of the following were advantages of plank roads EXCEPT:
