Bibliography of Research Studies in Elementary School and Pre-School Mathematics.
Georgia Univ., Athens.
Pub Date Jan 66
Note: 55p.
EDRS Price MF - $0.25 HC - $2.85

This bibliography is divided into seven sections. The first includes studies on students at various elementary levels, grouping procedures, practices and implications for teaching mathematics, and attitude improvement by effective teaching. Studies in the second section cover teacher training, attitudes, abilities, and level of achievement. Another section provides research information on textbooks, topics for programs, and program comparison (foreign and American). Within this section, feasibility studies on separate elementary levels and appropriateness studies are included. A fourth section deals with studies on different teaching methods at specific levels and in elementary school in general. Reports on instructional aids are included in this section. Studies on curriculum development are grouped along with those on the philosophy, history, and future of teaching mathematics. Evaluation literature is in the sixth section. A final section gives reviews of research and bibliographies. Most entries are dated in the late 1950's and early 1960's; some are listed more than once, but none are annotated. (JS)

# TABLE OF CONTENTS

## I. STUDENTS

### A. Status of Achievement

1. Pre-school and Kindergarten ........................................... 1
2. First, Second, and Third Grades ..................................... 2
3. Fourth and Fifth Grades ............................................... 3
4. Sixth and Seventh Grades ............................................. 4
5. General ............................................................................ 5

### B. Grouping for Instruction

1. Grouping Procedures Comparison ........................................ 6
2. Variables with Implications for Grouping ............................ 7
3. Grouping Practices, Implications, etc. ............................... 9
4. Special Education ......................................................... 10

### C. Attitudes

1. Improving Attitudes ...................................................... 11
2. Effect of Teaching Method ............................................. 11
3. Relationship to Other Variables ..................................... 11

### D. Environment ............................................................ 11

## II. TEACHERS

### A. Training

1. Pre-service ................................................................. 13
2. In-service ....................................................................... 14
3. Relationship to the School Program .................................. 15
B. Status of Achievement
1. Prospective Teachers ........................................... 16
2. In-service Teachers ............................................. 17
3. Understandings Needed ........................................ 17
4. Teacher Attributes Related to Effectiveness .............. 18
C. Attitudes ......................................................... 18

III. CONTENT
A. Program Evaluation or Comparison
1. General ............................................................ 20
2. Program Comparisons ........................................ 20
3. Topic Comparison ............................................... 22
4. Textbook Characteristics ..................................... 24
5. American and Foreign Program Comparisons ............. 25
B. Feasibility Studies
1. Kindergarten - Third ......................................... 26
2. Fourth ............................................................ 26
3. Fifth and Sixth Grades ....................................... 27
C. Appropriateness Studies ...................................... 27

IV. METHODS AND MATERIALS
A. The Instructional Period ....................................... 29
B. Homework ....................................................... 29
C. Instructional Aids
1. General ........................................................... 30
2. Variable Base Abacus ......................................... 32
3. Calculators ...................................................... 32
4. Cuisenaire Rods ........................................... 32
5. Programmed Instruction ................................ 33
6. Television .................................................. 34
7. Workbooks ................................................... 34

D. Methodology
1. Kindergarten and First Grade .............................. 35
2. Second and Third Grades .................................. 35
3. Fourth and Fifth Grades .................................. 36
4. Sixth Grade .................................................. 38
5. Discovery ..................................................... 40
6. General ....................................................... 41

V. PHILOSOPHY
1. General ....................................................... 44
2. Curriculum Development .................................. 45
3. Areas of Research .......................................... 46
4. History and Future ........................................ 46

VI. EVALUATION
1. General ....................................................... 47
2. Test Development .......................................... 48

VII. BIBLIOGRAPHIES AND REVIEWS OF RESEARCH
1. Reviews of Research ....................................... 48
2. Bibliographies .............................................. 50

iv
BIBLIOGRAPHY OF RESEARCH STUDIES IN
ELEMENTARY SCHOOL AND PRE-SCHOOL MATHEMATICS

I. Students

A. Status of Achievement...

1. Pre-school and Kindergarten

2. First, Second and Third Grade

3. Fourth and Fifth Grades

4. Sixth and Seventh Grades

5. General

B. Grouping for Instruction

1. Grouping Procedures Comparison

2. Variables with Implications for Grouping

3. Grouping Practices, Implications, etc.

308. McMeen, George H. "Differentiating Arithmetic Instruction for Various Levels of Achievement," THE ARITHMETIC TEACHER, 6: 113-20, April, 1959.

4. Special Education

C. Attitudes

1. Improving Attitudes

2. Effect of Teaching Method

3. Relationship to Other Variables

D. Environment

II: Teachers

A. Training

1. Pre-Service

2. In-Service

3. Relationship to the School Program

305. Davis, Catherine L. "Highlights of a Summer Conference," THE ARITHMETIC TEACHER, 8: 14-8, Jan., 1961.

B. Status of Achievement

1. Prospective Teachers

2. In-Service Teachers

3. Understandings Needed

4. Teacher Attributes Related to Effectiveness

C. Attitudes

III. Content

A. Program Evaluation or Comparison

1. General

2. Program Comparisons

3. Topic Comparison

4. Textbook Characteristics

5. American and Foreign Program Comparisons

B. Feasibility Studies

1. Kindergarten - Third

2. Fourth

3. Fifth and Sixth Grade

C. Appropriateness Studies

IV. Methods and Materials

A. The Instructional Period

B. Homework

C. Instructional Aids

1. General

2. Variable Base Abacus

3. Calculators

4. Cuisenaire Rods

5. Programmed Instruction

6. Television

7. Workbooks

D. Methodology

1. Kindergarten and First Grade

2. Second and Third Grades

3. Fourth and Fifth Grades
