MR. WAYNE SHIRLEY, cmp.

For
THE STATE COMMITTEE
FOR TECHNICAL EDUCATION
COLUMBIA, S.C. 29201
The State Committee for Technical Education in South Carolina seeks to develop quality libraries in each Technical Education Center in the belief that an appreciation for and use of books and journals is of great importance in the education and training of skilled workers and technicians for industry. Moreover, the future advancement of graduates and their ability to remain current in a rapidly changing technological world will depend to a large degree upon their continued study of technological books and journals.

Good technical and vocational bibliographies are scarce, and the State Committee has used all the conventional approaches to secure or develop reliable book lists. During the summer of 1967, the State Committee employed Mr. Wayne Shirley, Librarian of Wentworth Institute, as a consultant to develop a list of outstanding works that should be in every institution.

Mr. Shirley's bibliography of approximately 1,100 titles proved quite helpful to our librarians, and news of its existence began to spread. The supply of internal working copies was quickly exhausted by requests from institutions throughout the Southeast. We have replenished our supply of working copies in order to share this worthwhile bibliography with other institutions. We hope that you will find it helpful.
BIBLIOGRAPHIES

ACCOUNTING

AGRICULTURE

Bowers, Wendell & B. A. Jones. Engineering Applications in Agriculture. Stipe, latest ed. (10-12 Chester Street, Champaign, Illinois 61820)
