This report details the extent of adoption of specific instructional innovations in the community colleges of Alaska, Idaho, Montana, Oregon, Utah, Washington, and Wyoming. In summer 1968, questionnaires were sent to 49 colleges; 45 responded. They were asked to give information on 82 items labelled innovative in the literature and to add any others from their own knowledge. This produced a total of 92 technological, ideational, and organizational innovations, on which the colleges reported present use, present consideration, past use, and extent of use. The results are shown in tabular form for nine main categories of innovation: (1) technological aids, (2) faculty use, (3) facilities use, (4) course and program planning, (5) instructional patterns and programs, (6) instructional organization, (7) scheduling, course or program completion, and calendar arrangement, (8) evaluation of student and program, (9) three additional innovations—(a) a college exploratory program, (b) a prison rehabilitation program, (c) non-computerized information storage and retrieval. Appended are (1) a list of colleges offering information and the name of the individual from whom to request it, (2) a list of participating colleges, (3) a model memorandum on procedures for the staff to use for suggesting innovations or experiments, (4) state-funded research projects in Washington July 1, 1968 to June 30, 1969. (HH)
EDUCATIONAL INNOVATION IN COMMUNITY COLLEGES
OF THE NORTHWEST AND ALASKA

Henry M. Reitan, Associate Director
Richard E. Lander, Research Associate

UNIVERSITY OF WASHINGTON
FREDERIC T. GILES, DIRECTOR

Occasional Paper Number 8
August, 1968
Seattle, Washington
FOREWORD

In an era of rapid and unprecedented change in higher education, new programs and practices affecting the instructional mission of the community college must be expected. Answers to three questions about new programs and practices are of particular interest to community colleges and to their clients: What is being adopted? What is the extent of the adoption? What is the impact of adoption?

This report for the first time provides details on the extent of the adoption of specific instructional innovations in the community colleges of the Northwest and Alaska. In addition, it lists college officers from whom information on the impact of a particular innovation can be secured. The addenda include a procedure used by one community college for encouraging experiment and list instructional experiments now under way in one state system of community colleges in the Northwest.

By publishing this report, the Center is attempting to provide comprehensive and current information not before available to those interested in or responsible for the planning of community college instructional programs.

Frederic T. Giles, Director
Center for the Development of Community College Education
Description of the Survey

This report comes from the returns of an inventory on educational innovation circulated in the community colleges of the Northwest and Alaska in July and August, 1968. Forty-nine colleges in Alaska, Idaho, Montana, Oregon, Utah, Washington, and Wyoming were polled and forty-five responded.

The inventory asked the chief instructional officers whether any of eighty-two items labelled innovation in the literature was presently in use, under study, or had been used by the college. In addition, the officers were asked to add to the list of innovations derived from the reading. Thus from the field and the literature, this report gives data on the use of ninety-two technological, ideational, or organizational innovations in the community colleges of the area. In addition, the officers reported the extent of the use of each innovation within each college.

In order to facilitate the diffusion of knowledge about the innovations, each officer was asked on what innovation he would be able to provide information through reports, inquiries, observation, or other means. Approximately half of the respondent colleges make known through this report their availability as sources of information on various items.

Using the Survey

The innovations are grouped arbitrarily in the nine categories listed in the Table of Contents and are listed alphabetically in the Index. Each innovation is reported by a separate table in the following format:
<table>
<thead>
<tr>
<th>Name of innovation</th>
<th>Number of colleges using innovation</th>
<th>Percent extent of use in the forty-five participating colleges</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>All or most of college</td>
</tr>
<tr>
<td></td>
<td></td>
<td>□</td>
</tr>
</tbody>
</table>

Total percent of use in participating colleges

Percent of participating colleges studying use

Percent no longer using

Names of colleges offering information on innovation

By observation
By report
By inquiry

Appendix I gives brief current descriptive material on the colleges offering information on an item, along with the name of the officer with whom to get in touch. Appendix II is an alphabetical listing of the participating colleges.

*The Addenda*

Two addenda contain additional information for those interested in educational innovation in community colleges. Addendum I is a procedure used by Oregon's Portland Community College which allows a member of the staff to obtain consideration of a new proposal. Addendum II lists current (1967-68) instructional experiments funded by the Washington State Board for Community College Education in the colleges of that system.
ACKNOWLEDGMENTS

At least one person in each participating college gave his time to completing the questionnaire on which this report is based. Particular thanks go to each of these people and to their colleges for prompt report-cont and for making information available to the field.

Under the direction of Mrs. Ginger Losee, the secretarial staff of the Center has worked accurately to bring this report to the field as quickly as possible. The staff has our gratitude.

Henry M. Reitan
Richard E. Lander
# TABLE OF CONTENTS

FOREWORD .................................................. i
PREFACE .................................................. ii-iii

INNOVATIONS IN USE ....................................... 1-52

## Section A—Technological Aids to Learning

- A-1 Open circuit television ......................... 1
- A-2 Closed circuit television ....................... 1
- A-3 Computerized instruction ....................... 2
- A-4 Other mechanically programmed instruction .... 2
- A-5 Audio-visual center ............................... 3
- A-6 Wired carrels, audio ............................ 4
- A-7 Printed instructional programs .................. 5
- A-8 Wired carrels, video ............................. 5
- A-9 Tape storage, audio ............................. 6
- A-10 Tape storage, video ............................. 6
- A-11 Telelectures ...................................... 7
- A-12 On-campus film library ....................... 7
- A-13 Language laboratories ......................... 8
- A-14 Other technological aids ...................... 9

## Section B—Faculty Utilization Practices

- B-1 Machine marking of tests ....................... 9
- B-2 Pooling of examination items ................. 10
B-3 Student tutors ................................... 10
B-4 Adult paraprofessionals. ............................. 11
B-5 On-campus media production facilities. .......... 11
B-6 Media specialist ..................................... 12
B-7 Officer for institutional research .................. 12
B-8 Funds for faculty involvement in summer  
    curriculum development ............................. 13
B-9 Released time for faculty involvement in  
    curriculum development ............................. 13
B-10 Funds for faculty consultation with  
    outside curriculum or instructional  
    experts ............................................... 14
B-11 Instructor exchange with (a) high school;  
    (b) other community college; (c) senior  
    college ........................................... 14
B-12 Reflex or thermal process production  
    of spirit master .................................... 15
B-13 Other innovations affecting faculty  
    utilization ........................................... 16

Section C—Facilities Utilization Practices

C-1 Joint use of facilities with other institutions  
    ..................................................... 16
C-2 Off-campus center(s) for continuing  
    education ............................................ 17
C-3 On-campus center for continuing  
    education ............................................ 18
C-4 Weekend "regular" classes .......................... 19
C-5 Weekend short courses or seminars ............... 19
C-6 Formal arrangement for exchange of  
    materials with libraries of area .................. 20
C-7 Outdoor educational facilities .............................................. 21
C-8 Community use of library .................................................. 21
C-9 Other innovations in facilities utilization .................................. 22

Section D--Course and Program Planning

D-1 Program consortium with other community colleges, senior colleges, high schools .................. 22
D-2 Joint program planning with government, industry, etc. .......................... 23
D-3 Counselor involvement in curriculum decisions .................................. 24
D-4 Community involvement in continuing education planning .................. 25
D-5 Student involvement in curriculum decisions .................................. 26
D-6 Community involvement in general education planning .................. 26
D-7 Library staff involvement in curriculum decisions .......................... 27
D-8 Adoption of a taxonomy of educational objectives .......................... 27
D-9 Adoption of instructional systems or other curriculum model .................. 28
D-10 Other innovations in course or program planning .......................... 28

Section E--Instructional Patterns and Programs

E-1 Non-disciplinary instruction in political, social, and cultural concerns .......................... 29
E-2 "Teach-in" instruction in political, social, and cultural concerns .................. 29

vii
E-3 Group counselling coupled with subject instruction ........................................ 30
E-4 Core curriculum, general education ............................................................... 30
E-5 "Non-traditional" offerings .............................................................................. 31
E-6 Core curriculum, clusters of related technologies ......................................... 32
E-7 "Ombudsman" for academic matters ............................................................... 32
E-8 Academic grievance committee ..................................................................... 33
E-9 "Inquiry" or "problem-centered" instruction .................................................... 33
E-10 Other newer instructional patterns and programs ......................................... 34

Section F--Instructional Organizations

F-1 Tutorial ............................................................................................................. 34
F-2 Independent study ............................................................................................ 35
F-3 Inter-departmental study .................................................................................. 35
F-4 Team teaching ................................................................................................ 36
F-5 Concurrent work-education programs ........................................................... 37
F-6 Student participation for credit in community activities or organizations .... 38
F-7 Shortening or lengthening daily student-teacher contact ............................... 38
F-8 Shortening or lengthening regular courses .................................................... 39
F-9 Student-led instruction .................................................................................... 39
F-10 Provision for individually paced student progress ...................................... 40
F-11 Divisional or broad area rather than departmental organization ............... 40
Section G--Scheduling, Course or Program Completion, and Calendar Arrangement

G-1 Matching student and teacher personality at registration.............. 41
G-2 Credit by "challenge" examination without course registration........ 41
G-3 Credit by examination at any point in course...................... 42
G-4 Full-time early admittance from high school....................... 78
G-5 Part-time early admittance with cooperation of high school......... 43
G-6 Dropping of traditional prerequisites in certain fields............. 44
G-7 Dropping of traditional courses................................. 44
G-8 Grouping of students at registration (a) interest; (b) achievement level........ 45
G-9 Graduation on basis of skills rather than credits.................... 45
G-10 Scheduled inter-semester or inter-quarter involving both students and faculty........ 46
G-11 Other new scheduling, calendar, graduation, course completion practices........ 46

Section H--Evaluation of Student and Program

H-1 Pass-fail......................................... 47
H-2 No marks or grades.................................... 47
H-3 Written evaluation other than grade.................................. 48
H-4 Joint evaluation of graduate with employer......................... 48
H-5 Departmental or area examination.................................. 49
H-6 Evaluation of varying course approaches to same material........... 49

I-1. ADDITIONAL EDUCATIONAL INNOVATIONS

1. College Exploratory Program—one program reported.
   
   A program designed for students who are unprepared for college studies but who wish to improve their study skills and prepare themselves to enter degree programs or occupational training. All college sponsorship. The design of the program may be obtained by direct inquiry to Shoreline Community College.

2. Prison Rehabilitation Program—one program reported.
   
   Six occupational programs in office machine repair, EDP, and auto repair are offered together with a college parallel program on demand in Washington State Penitentiary. Inquiry may be made to Walla Walla Community College.

3. Information Storage and Retrieval—one program reported.
   
   Non-computerized system for retrieval of vertical files and audio-visual materials as well as personnel information is in use. Inquiry may be made to Bellevue Community College.
APPENDIX I

ALPHABETICAL LISTING OF COLLEGES OFFERING INFORMATION

The colleges listed below have offered information on one or more items. Brief descriptive estimates for the 1968 setting of the innovation are included. Please contact the officer listed for further information.

BELLEVUE COMMUNITY COLLEGE
4333 - 128th S.E.
Bellevue, Washington 98004
Contact: Dr. Merle E. Landefholm, President

1027 FTE; 60% full time; 27% vocational-technical. Instruction 62% full time. Division of three or more subject areas. Separate divisions for adult education. Quarter. Approximate 1967-68 operating estimates per FTE: 935.

BIG BEND COMMUNITY COLLEGE
P. O. Box 1547
Moses Lake, Washington 98837
Contact: Wells Allred, Dean of Liberal Arts Education

671 FTE; 75% full time; 30% vocational-technical. Instruction 80% full time. Division-department organization. Separate divisions or departments for adult education and vocational-technical education. Quarter. Approximate 1967-68 operating estimates per FTE: 900 college parallel; 1800 vocational-technical.

COLUMBIA BASIN COMMUNITY COLLEGE
2600 North Chase Street
Pasco, Washington 99301
Contact: Dr. K. Marking, Dean of Instruction

1800 FTE; 60% full time; 35% vocational-technical. Instruction 85% full time. Divisions of three or more subject matter areas. Quarter. Approximate 1967-68 operating estimates per FTE: 2993.
APPENDIX I - Continued

EVERETT COMMUNITY COLLEGE
801 Wetmore Avenue
Everett, Washington 98201

Contact: Dr. Marvin Lieske, Dean of Instruction

2370 FTE: 60% full time; 37% vocational-technical. Instruction 75% full time. Divisions of three or more subject areas. Separate divisions or departments for adult education and vocational-technical education. Quarter. Approximate 1967-68 operating estimates per FTE: 800.

GRAYS HARBOR COLLEGE
College Heights
Aberdeen, Washington 98520

Contact: J. R. Frost, Dean of Instruction

1000 FTE: 90% full time; 18% vocational-technical. Instruction 90% full time. Divisions of three or more subject areas. Quarter. Approximate 1967-68 operating estimates per FTE: 850.

GREEN RIVER COMMUNITY COLLEGE
12401 S. 320th
Auburn, Washington 98002

Contact: Dr. Melvin Lindbloom, President

1900 FTE: 75% full time; 40% vocational-technical. Instruction 75% full time. Divisions of three or more subject areas. Quarter. Approximately 1967-68 operating estimates per FTE: 883.

NORTHWEST COMMUNITY COLLEGE
Powell, Wyoming 82435

Contact: Administrative Assistant Bill Woods

435 FTE: 100% full time; 10% vocational-technical. Instruction 90% full time. Divisions of three or more subject areas. Semester. Approximate 1967-68 operating estimates per FTE: 1000.
OLYMPIC COMMUNITY COLLEGE
16th and Chester
Bremerton, Washington 98310
Contact: Dr. James L. Bemis, Acting Dean of Academic Instruction

1973 FTE; 40% full time; 20% vocational-technical. Instruction 90% full time. Departments of one or two subject areas. Separate divisions or departments for adult education and vocational-technical education. Quarter. Approximate 1967-68 operating estimates per FTE: 1065.

SEATTLE COMMUNITY COLLEGE
1625 Broadway
Seattle, Washington 98122
Contact: Dr. Jesse J. DeFore, Vice President

7700 FTE; 50% full time; 60% vocational-technical; 20% adult or continuing education. Instruction 70% full time. Divisions of three or more subject areas. Separate divisions for adult education and vocational-technical education. Quarter. Approximate 1967-68 operating estimates per FTE: 1100.

SHORELINE COMMUNITY COLLEGE
16101 Greenwood Avenue North
Seattle, Washington 98133
Contact: Executive Vice President George Douglas

2182 FTE; 70% full time; 20% vocational-technical; 5% adult education. Instruction 75% full time. Divisions of three or more subject areas. No separate adult or vocational-technical divisions. Quarter. Approximate 1967-68 operating estimates per FTE: 831.

SKAGIT VALLEY COMMUNITY COLLEGE
2405 College Way
Mount Vernon, Washington 98273
Contact: Dr. James Ford, Dean of Instruction

1200 FTE; 84% full time including vocational-technical; 16% adult education. Instruction 84% full time. Associate Dean of Instruction responsible for divisions and departments in subject area, vocational-technical, and adult instruction. Quarter.
APPENDIX I - Continued

SOUTHERN IDAHO, COLLEGE OF
149 Third Avenue East
Twin Falls, Idaho 83301

Contact: Dr. Paul T. Smith, Academic Dean

1100 FTE; 90% full time; 5% adult education; 40% vocational-technical. Instruction 99% full time. Divisions of three or more subject areas. Semester and eight week summer session. Approximate 1967-68 operating estimates per FTE: 1074.

SOUTHWESTERN OREGON COMMUNITY COLLEGE
Coos Bay, Oregon 97420

Contact: Dr. John Rulifson, Dean of Instruction

655 FTE; 32% full time; 10% adult education; 33% vocational. Instruction 75% full time. Divisions of three or more subject areas. Separate divisions for vocational-technical education.

SPOKANE COMMUNITY COLLEGE
E3403 Mission Avenue
Spokane, Washington 99202

Contact: Dr. Alvin B. Danielson, Dean of Applied Arts

Quarter. Departments of one or two subject areas. Separate divisions or departments for adult education and vocational-technical education.

TACOMA COMMUNITY COLLEGE
5900 South 12th
Tacoma, Washington 98465

Contact: Dr. Paul Jacobson, Dean of Instruction

1882 FTE; 62% full time; 25% adult education. Instruction 77% full time. Divisions of three or more subject areas. Separate division for adult education. Quarter. Approximate 1967-68 operating estimates per FTE: 800.
APPENDIX I - Continued

TREASURE VALLEY COMMUNITY COLLEGE
650 College Boulevard
Ontario, Oregon 97914

Contact: E. D. Haynes, Dean of Instruction
925 FTE; 80% full time; 50% adult education; 47% vocational-technical. Instruction 95% full time. Divisions of three or more subject areas. Separate division for adult education and vocational-technical education. Quarter. Approximate 1967-68 operating estimates per FTE: 1115.

UMPQUA COMMUNITY COLLEGE
P. O. Box 967
Roseburg, Oregon 97470

Contact: Bill Peckham, Director of Counseling
550 FTE; 65% full time; 25% adult education; 40% vocational-technical. Instruction 40% full time. Divisions of three or more subject areas. Quarter. Approximate 1967-68 operating estimates per FTE: 1000.

WALLA WALLA COMMUNITY COLLEGE
364 South Park
Walla Walla, Washington 98362

Contact: Dr. Eldon J. Deitrich, President
650 FTE: 60% full time; 10% adult education; 45% vocational-technical. Instruction 80% full time. Departments of one or two subject areas. Separate divisions or departments for adult education and vocational-technical education. Quarter.

WENATCHEE VALLEY COMMUNITY COLLEGE
Fifth Avenue
Wenatchee, Washington 98801

Contact: Dr. Gerald Merrill, Dean of Instruction
1150 FTE; 63% full time; 5% adult education; 22% vocational-technical. Instruction 90% full time. Divisions of three or more subject areas. Quarter. Approximate 1967-68 operating estimates per FTE: 1100.
YAKIMA VALLEY COMMUNITY COLLEGE
16th and Nob Hill
Yakima, Washington 98901

Contact: Dr. Orville D. Carnahan, Vice President

2444 FTE; 71% full time; 3% adult education; 18% vocational. Instruction
80% full time. Divisions of three or more subject areas. Quarter.
Approximate 1967-68 operating estimates per FTE: 800.

FROM: Amo De Bernardis
TO: Staff
SUBJECT: Innovations and Experimentation

To make it possible for any staff member to implement his ideas and plans for change, I am setting up the following procedures:

1. Ideas or suggestions may originate with any employee of the college.
2. A written plan will be presented.
3. The plan will be sent to the dean via the department chairman or immediate administrative superior who will endorse the proposal and send it to the president. They may make recommendations and suggestions, but are not to hold the proposal more than 10 days.
4. The president will act on the proposal within two weeks and notify the originator of the action taken.

Below is a copy of the outline to be followed in presenting the proposal:

1. Statement of the Problem Proposed for Experimentation
   . Give a brief summary of the need, setting, background for the program.
2. Objectives
   . State the objective of the project
   . State proposed instructional improvement
3. Outline of Plan (Methodology)
   - Organizational design
   - Methods utilized in accomplishing objective
   - Personnel involved (clerical, instructional, administrative, and consultants)
   - Facility needs
   - Equipment and material needs
   - Length of project (time schedule)

4. Budget
   - Detail of funds needed

5. Evaluation
   - Procedures to be used in the evaluation of project

6. Reporting
   - Report of results
The following proposals, listed in alphabetical order by college, will be funded.

Bellevue Community College will conduct a project to establish a multiple-course learning center for mathematics. This program will utilize a more thorough learning situation for the college mathematics program thereby enabling the student to proceed through the course more quickly and with greater confidence. Nilmar L. Molvik, Director.

Centralia College will conduct a study to offer a grading system in which all students in a class would find it to their advantage to participate to their fullest capabilities. Kellis A. Hamilton, Director.

Columbia Basin College will investigate the feasibility of a pre-apprentice carpentry training program to satisfy the need of training at a higher level to fulfill the demands of industry. Don McInnis, Dr. Fred Esvelt, and Dr. Kasper C. Marking, Directors.

Green River Community College will conduct a study to provide knowledge regarding characteristics of students enrolled in the three types of programs (technical, vocational, and academic) offered on the community college campus. Aptitudes, interests, attitudes, and self-concepts of the students will be investigated. Sandra Gallaher and Arthur Binnie, Directors.

Seattle Community College will develop a research proposal to study the "Fishing, Maritime, and Allied Occupations" within the Seattle Metropolitan and Puget Sound Region, to determine occupational needs and industrial employment requirements. Dr. Jesse J. Defore, Mr. C. A. Bradley, Mr. Bryce Hanning, and Mr. Donald Smith, Directors.
Shoreline Community College will coordinate a research team to evaluate the differences between videotaped instruction versus the conventional teaching of special skills. Donald R. McVay, Director.

Skagit Valley College will do experimental research to test the hypothesis that take-home open-ended laboratory problems with emphasis on individual investigation will improve non-major students (in physical and earth sciences) in their ability to meet problem solving situations and in appreciating science as a human enterprise more effectively than the traditional two-hour fixed group laboratory exercises. James P. Pierce, Director.

Spokane Community College will conduct a study to determine the effects of the cognitive vs. lecture-discussion method in teaching introductory sociology classes. Richard B. Halvorson, Director.

Tacoma Community College will conduct a study, the purpose of which is to determine if the modular format for chemistry laboratory instruction is more effective than traditional format in achieving the generally accepted goals of chemistry laboratory instruction. Donald R. Gaignes, Edgar L. McNeal, and Robert D. Rogland, Directors.

Walla Walla Community College will design and carry out experimental research to new approaches to instruction which will be superior to present methodology used in many community college courses.

Yakima Valley College will conduct a study to determine characteristics of the student drop-out at Yakima Valley College. Gary A. Rice and William Scofield, Directors.

The total amount funded for the above projects is $55,070.
