Graduate programs in adult education at 24 universities in the United States and Canada are surveyed here. An overall review of program content (mainly surveys of the field, program development in adult education, adult learning, and general administration) is followed by unique features and specialties of several programs: information on internship programs and seminars, required textbooks, program titles, and degrees offered; and data on admission requirements for master's and doctoral programs, numbers of adult education students and faculty, and the number and value of fellowships, assistantships, and internships at given institutions. (The document includes an appendix.)

   a. To understand the role of the adult educator as an agent of social change;
   b. To understand the nature and complexity of potential client systems in contemporary society including the individual, family, group and community;
   c. To understand relevant concepts, theories and principles in the behavioral sciences requisite to affecting programs of change and to acquire proficiency in their application.

3. To understand intensively a specialized area of adult education, e.g., administration, programming.
   a. To understand the concepts, theories and principles contained in education and behavioral sciences that are relevant to the specialized area;
   b. To understand the interrelationship that exists between the above concepts, theories and principles.
4. To develop competence in designing and conducting scholarly research in the field of adult education.
   a. To increase the ability to recognize and analyze significant problems;
   b. To select and define a significant problem for research;
   c. To prepare and execute an effective research design;
   d. To report the research clearly and logically;
   e. To demonstrate the relation of the research to present knowledge in adult education.

5. To develop the competence to identify and evaluate significant scholarly work in adult education and related fields.
   a. To be able to integrate new research findings into the existing body of professional literature in the field of adult education.
   b. To be able to interpret the results of research to other adult educators;
   c. To be able to glean, interpret, and synthesize from other disciplines research findings that have significance for the field of adult education;
   d. To be able to translate pertinent research findings into action-oriented programs.

C. University of Wyoming

The University of Wyoming has designed a program which emphasizes the breadth and variety of the field, the structure and function of adult education agencies, an understanding of the philosophical and psychological principles, and the importance of methods and techniques in educating adults.

The program is geared to the needs of those who are presently engaged in, or who are anticipating being engaged in full-time or part-time educational work with adults. Each student has the opportunity to develop with his advisor a program of study geared to the students' interests and talents.

D. Florida State University

The degree programs are basically designed for persons preparing for the following leadership positions:

1. Administrators of adult education who are responsible for developing, executing, and administering the adult education programs of the various agencies of adult education. Such positions include directors and assistant directors of university extension divisions and cooperative extension services, directors of State and County departments of public school adult education, directors of education divisions in labor organizations and the military services, deans of evening colleges, and directors of education for a variety of voluntary organizations and national associations.
