
Designed by Project Africa of Carnegie-Mellon University, these two test instruments have been used to discover what selected American secondary school students know or believe about Africa and other regions of the world. The first instrument, a 30-minute objective test, "Africa South of the Sahara," is comprised of 60 multiple-choice and matching questions. An answer key is provided. The second test, "A World Regions Perception Survey," asks students to match 90 selected vocabulary terms with any of seven regions of the world--North America, South America, Europe, Russia, Asia, the Middle East, and Africa south of the Sahara. A world map and directions for administration of both tests are included. (See ED 023 692 and ED 023 693 for the reports of the projects in which these tests were used.) (RD)
AFRICA SOUTH OF THE SAHARA
AN OBJECTIVE TEST FOR SECONDARY SCHOOLS

This instrument was developed in 1967 by Project Africa, a social studies curriculum project, pursuant to a contract with the U.S. Department of Health, Education and Welfare, Office of Education. It was designed and validated by the Project staff in cooperation with The Ohio State University Test Center. This instrument was one of those used to identify what selected American secondary school students knew and believed to be true about Africa south of the Sahara. The complete report of this survey may be found in Barry K. Beyer and E. Perry Hicks, Images of Africa, Pittsburgh: Carnegie-Mellon University Project Africa, 1968 -- ERIC catalogue #023 693.

This instrument is a 60-item objective test of factual knowledge about the geography, people, history, culture and contemporary events in Africa south of the Sahara. The materials associated with it include a(n):

1. Test booklet
2. Directions for administration
3. Answer key

A second instrument related to Africa--A World Regions Perception Survey--is also available from ERIC. It, too, was used in the nationwide study referred to above and was designed and developed by:

Directions for Administration

1. Distribute the answer sheets and test booklets to the students.

2. Read aloud the directions on the front of the test booklet to the students and have them fill in the information called for on the answer sheet.

3. Emphasize the following:
   - Only ONE choice should be marked for each question.
   - Students should erase COMPLETELY any accidental marks or any answers they wish to change.

4. Direct the students to BEGIN. Allow exactly 30 minutes to complete the test; then STOP.

5. Under no circumstances should you explain any term or any question or any item on the test itself.

6. Collect the test booklets and answer sheets separately.
Africa South of the Sahara
PLEASE DO NOT OPEN THIS TEST BOOKLET UNTIL DIRECTED TO DO SO:

This test is being given to students in junior and senior high schools throughout the United States. It is part of an experimental study to determine how much information and what type of information about Africa south of the Sahara is known by American students today. The results of the test will be used in the development of new instructional materials.

DIRECTIONS: You will have 30 minutes in which to complete this test. You are not expected to know the answers to all of the items. Attempt as many of the items as possible in the time allowed. It is suggested that you do the easy items first, and then come back to the harder items.

1. Use a SOFT LEAD PENCIL only. (DO NOT USE AN IBM ELECTROGRAPHIC PENCIL!)

2. Your answers to the exercises in this test are to be recorded on the separate ANSWER SHEET. Be sure you have filled in the information called for on the answer sheet as follows:
   a) At the top of the answer sheet, PRINT your name, today's date, the name of your school, and the city and state in which your school is located.
   b) Indicate your sex by marking the appropriate blank to the right of the red arrow near the printed identification number.
   c) PRINT the name of this test, AFRICA SOUTH OF THE SAHARA, in the appropriate blank on the answer sheet. Leave the space marked form number blank.

3. Read carefully the directions on the answer sheet. In marking your answer sheet, use a SOFT LEAD PENCIL ONLY. Be careful to notice that the blanks for answering questions are arranged ACROSS the page: items 1, 2, 3, and 4 on the first line from left to right; items 5, 6, 7, and 8 on the next line, etc. When you have chosen the response you think is correct, BLACKEN the appropriate blank neatly and fully. If you change your mind about an answer, erase your first mark completely.

4. Make no stray marks on the front of the answer sheet. Do not wrinkle, fold, or tear the answer sheet.

5. The score on the test will be determined by the number of items answered correctly. Even if you are not sure of an answer, indicate the response which you think best answers the question.

A WORLD REGIONS PERCEPTION SURVEY

This instrument was developed in 1967 by Project Africa, a social studies curriculum project, pursuant to a contract with the U.S. Department of Health, Education and Welfare, Office of Education. It is a manipulative type of exercise designed to identify secondary school student impressions of Africa and other world regions.

This instrument was one of those used by Project Africa in 1967 to identify what selected American secondary school students believed to be true about Africa south of the Sahara. A complete description of this instrument and the ways in which it was designed and used may be found in Barry K. Beyer and E. Perry Hicks, Images of Africa. Pittsburgh: Carnegie-Mellon University Project Africa, 1968 -- ERIC catalogue #023 693.

A WORLD REGIONS PERCEPTION SURVEY is a 90-item instrument that requires students to identify selected stimulus terms with any of seven regions of the world. The materials associated with it include (a/n):

1. Map of the world
2. 90 stimulus cards
3. 7 envelopes
4. Directions for administration

A second instrument designed to test secondary school students' knowledge about Africa's history, geography, culture and society is also available from ERIC. It, too, was used in the nationwide survey referred to above and was designed and developed by:

Directions for Administration

Read these directions carefully before you administer the test. Allow at least thirty minutes for the administration of the instrument. Also be sure that there are no strong drafts or breezes blowing from open doors or windows or from fans because a strong puff of wind might scatter the cards used in the test.

It is important that the students do not know that this instrument is designed to measure their perceptions of any specific world region. Stress that this is an attempt to find out what their impressions are, not how much they know. Assure them that there are no right or wrong answers and that they will not be graded in any way on the results. It is advisable to avoid the use of the term "test" if possible.

When you read the directions for the instrument to the students, demonstrate each item to the class. For example, when you mention the pack of cards, hold a pack up for the class to see.

PROCEDURE

1. Pass out the instrument and tell the students not to open it until they are so instructed.

2. When each student has his test packet, read aloud the following directions:

A university is conducting an experiment to find out what impressions of various areas of the world are held by American students. It has designed an instrument which measures these impressions and this class has been selected to help in collecting the data. Let me emphasize that this is not a test to find out how much you know. There are no right or wrong answers. You will not be graded in any way on the results.

Each of you should have a manila envelope (show). Fill in the information that is asked for in the upper left hand corner of the manila envelope.
Directions for Administration
Page 2

Now open the manila envelope (show). Remove the contents of the envelope and check to see that nothing is missing. There is a list of the contents on the front of the envelope. You should have the following: a map of the world (show); a pack of cards with a rubber band around them (show); seven white envelopes (show).

Unfold the map and place it on your desk. Place the manila envelope beside it. Place the white envelopes on top of the manila envelope. Place the package of cards on the white envelopes.

Look at the map of the world. Notice that it is divided into seven sections by red lines. As I read the names of each section, notice where it is on your map. (Read and point to each section on the map you are holding for all to see!) North America; South America; Europe; Middle East; Africa south of the Sahara; Russia Asia.

When I tell you to begin, you are to do the following. Do not start until I tell you. When I give the word, remove the rubber band from the package of cards and read the word that I printed on the first card. Decide which area of the world is best described by the first word and place the card on that area of the world map. Then read the second word and do the same with it. Keep this up until you have gone through all of the cards and have piled them all on the map in the areas that they best describe. If you do not know the meaning of a word, place it on your desk beside the map. If a word seems to describe more than one area, decide which area it describes best and place it there. When you finish, sit back and wait for the others to finish.

Are there any questions? (Answer any questions that are raised.) Remove the rubber band from the package of cards and BEGIN.

3. When all of the students have finished, continue with the following directions:

Take the white envelope with the word North America written on it (show) and place the cards you piled on the North America section of the map inside the envelope. Seal the envelope. Take the second envelope, which says South America, and do the same thing. Continue until you have put each of the piles into the proper envelope.

If you have some cards left with words you do not know the meaning of, drop them loose into the manila envelope. Fold the map and put it back into the manila envelope. Put the white envelopes back into the manila envelope. Seal the manila envelope.

4. Collect the manila envelopes, be sure they are sealed and properly filled out.
