ASCD Yearbook
Combs, Arthur

Perceiving, Behaving, Becoming. ASCD Publication. P. 256.

New insights on one of the three foundations, the psychological, with related implications affecting social and philosophical aspects.

ASCD Yearbook Committee

Learning and Mental Health in the School. ASCD, 1966. P. 176.

The yearbook on the general subject of mental health and personal development in the various social, emotional and intellectual aspects.

Allport, Gordon W.

The book is intended for college students who have little or no background in psychology. It deals with personality entirely - development of, structure of, assessment of, and understanding of.

Ausubel, David P.

Primarily intended as an advanced textbook in adolescent psychology for graduate students in psychology and education. Not recommended for any but advanced undergraduates. Also intended as a reference work for professional workers in child development, clinical psychology, social work, nursing, pediatrics, psychiatry, guidance and education.

Baruch, Dorothy W.

This book is addressed to parents, teachers and doctors in the hope that it may bring to them some of the answers they are seeking in helping children acquire new strengths to meet a new world.
Berelson, Bernard and Gary A. Steiner

Human Behavior is the first comprehensive attempt to summarize what social scientific behavior they have substantiated about the way human beings behave. It should be of value to leaders of all institutions whose success depends on understanding people.

Bernard, Harold W.

This volume emphasizes applicability. Part I defines mental health and mental hygiene and indicates what can and must be done. Part II deals with approaches to mental health through ordinary classroom techniques. Part III shows how some teachers have used art, music, writing, literature and drama as a means of understanding and helping children. Part IV deals with the mental health of teachers themselves.

Bieker, Helen, et al

Every child has problems in growing up. This Yearbook is primarily concerned with the health development with these children who are most often called "normal." It is only incidentally concerned with the deviates, the extremely disturbed or distorted boys and girls.

Bloom, Benjamin, S.

This book examines and interprets a large mass of data on the shaping of human beings from infancy to adulthood.
Breckenridge, Marian S. and Murphy, Margaret N.

Emphasizes interrelationships in the child's physical development, psychologic development and family life, which is the primary environmental influence during the first five years of his life.

Buckley, Isabelle P.

College Begins at Two. Whiteside, Inc. New York. 1965. $4.00.

Buckley puts forth her principles and techniques of teaching as well as the curriculum used in her schools from pre-school through high school.

Carrier, Blanche

A help for parents who want their children to develop individuality and character.

Cole, Luella; Hall, Irma Nelson

Text book - modern, sound view on adolescent psychology based on most recent research. It is comprehensive, evokes interest, covers deviant and normal patterns of growth and development and shares practical applications.

Coleman, James S.

This book relates a study which was conducted by James S. Coleman which dealt with the question "Schools which differed in the kinds and number of activities which brought to a boy or girl status among his fellows."

The study compares ten schools which have varied types of school activities.

Holt, John  \textit{How Children Fail.} Dell Publishing Co. 1964.  2 copies

A discussion of how children fail in our society and how one teacher attempted to correct and/or observe various situations.

Home and school are presented as a team which must supplement each other. The teacher should be a skilled team worker, in constant touch with his coeducators in the home.

This discussion aims to guide so that teacher thoughtfulness will result, not in stalemate, but increasingly in wise action, good for children and for society.

This volume speaks of four steps in the growing process - 1. Children Grow 2. There is a Plan to the Way They Grow 3. Children Want Things Out of Life 4. There is Some Reason Why.

A guide for parents and teachers to better understanding of children.

Describes and illustrates all four basic
