This document is one of a series describing the background, functions, and utilization of the Regional Information System (RIS) developed by the Michigan-Ohio Regional Educational Laboratory (MOREL). The purpose of this manual is to detail a procedure for performing a productive search of information resources which can satisfy the informational needs of educators. The focus of the manual is upon the individual researcher, but the methodology and materials delineated could be used within an organization as well. The manual is divided into two general sections. Chapter One discusses the searching procedure, covering definition of the question, the information searching procedure, and the bibliographic chain. A search procedure form and a model of the searching process are also included. Chapter Two deals in more detail with the various informational formats included in the bibliographic chain. Specific resources are listed and annotated, including human, institutional, and printed resources and information agencies. The concluding section of the manual provides a listing of existing sources of these resources, the suggested contents of a basic educational reference collection, and a keyword index. A selected bibliography of 14 items on the searching procedure is appended. (Author/JB)

Introduction and Overview

A wealth of informational resources are available today which can be fruitfully applied to almost any education-related reference question. The major deterrent to the meaningful utilization of this information, however, is the absence of an effective, systematic methodology for linking users with relevant resources. All too often the methods used to identify required data are random, inefficient, and ineffective in their concept and execution. The purpose of this manual is to detail a procedure for performing a productive search of information resources which can satisfy the informational needs of educators. The focus of the manual is upon the individual researcher, but the methodology and materials delineated could be used within an organization as well (i.e., as the basis of an information center's searching procedure).

The manual is divided into two general sections. Chapter 1 discusses the searching procedure. A definition of searching is provided together with a sequential explanation of the process involved. Key questions related to delimitation and redefinition of the question asked are given. The relationship of the various sources of information, as expressed in their physical formats, to the chronological flow of information is also discussed. This flow of information through time from its creation to various levels of use is termed the "bibliographic chain." The nature and structure of the bibliographic chain is one of the organizing themes of this manual. Chapter 1 ends with a specific example of the operation of the searching procedure suggested herein and a schematic diagram which the reader can apply to a reference need of his own to test the advocated procedure.

Chapter 2 deals in more detail with the various informational formats included in the bibliographic chain. The particular nature and applications of each link in the chain are discussed and the specific resources which comprise the content of each link are listed and annotated.

The concluding section of the manual provides a listing of existing sources of these resources, the suggested contents of a basic educational reference collection, and a keyword index.

The procedure outlined in this manual will not provide actual information. It will identify the most appropriate resources which should provide it, however. Once this identification has been made the information can be gathered, absorbed, synthesized, analyzed, and appropriate decisions made. The quality of these decisions will depend on many factors, of course, but whatever level of success, accurate and relevant information should materially increase the chance of positive effect. This manual is dedicated to the optimum provision of meaningful information for decision-making.
The Searching Procedure

In any attempt to locate a given place or entity, a map is a very valuable asset. Once one has a map which provides an approximation of the terrain to be traversed, the next step is to plot out the sequence of moves which will lead from where the person is to where he wishes to go with maximum economy. The bibliographic chain mentioned in the next section, and in more detail in Chapter 2, constitutes a map of information resources related to the field of education. Before looking at the nature of this bibliographic map, however, let us look briefly at the sequence by which we shall traverse its intellectual topography.

1. Defining the Question

Defining the question in the personal search sequence includes these steps:

A. A written statement of the question should be made. This statement should be rewritten until it is clear and succinct in relation to the need being satisfied and the area of investigation at hand. It is a good practice to make a separate list of key terms which are descriptive of the content of the question. The question and these key terms should then be compared to check their compatibility and appropriate adjustment made in the question statement as needed.

B. If a library or information center is being utilized, in whole or in part, for the search the polished question should be presented to the appropriate reference personnel. Upon presentation of the question it should be standard practice for the facility's information specialist to ask a series of questions designed to probe the nature of the request and further define the question. This process, well, will include a follow-up “renegotiation” of the question after the information specialist has made an initial attempt to identify and gather relevant resources.

C. If the search is to be mainly a personal one, the following questions should be asked to delimit and redefine the question:

1. What are you looking for? Specifically, what is your topic? What “keywords” are descriptive of the information desired?

2. What type of information resources do you desire? Human resources (consultants)? Institutional resources (agencies and projects)? Printed materials? Media materials?

3. What relevant information do you already have?

5. What time limits are appropriate in regard to the age of the information? Current or retrospective information? If retrospective, how far back? How immediate is the need for this information? What “bibliographic formats” will be most useful? (See description of the bibliographic chain below.)

6. What other limitations are there? Geographic location of the desired resource? Financial limitations? What physical formats will be most convenient (i.e., paper copies versus microforms)?

7. What is the final product desired? An overview of all relevant resources available? A referral to selected resources? A synthesis of relevant information? An in-depth analysis of relevant information?

8. How will the resulting information be applied? Administrative decision-making? Classroom needs? Professional growth?
II. The Bibliographic Chain

Like the process of human growth and development, an item of information goes through a process of change from its conception to its ultimate resting place in an encyclopedic summary, or its replacement by an updated concept. It is possible to chart this course of development for a given piece of information as it passes into and through mankind's body of accumulated knowledge. This pattern of movement is called the "bibliographic chain."

The most important aspect of this pattern is its relationship to time. A piece of information is usually conceived as a rather distinct fact or concept, which is parenthetically related to pre-existing integrated knowledge, and appears as such in the first steps of the bibliographic chain. As time passes this fact or concept is modified by the generation of related information and gradually begins to merge into the body of accumulated knowledge. Due to the time lag involved in this process, the resulting integrated information is less current than were the originally separate facts or concepts, but due to the general nature of the body of knowledge, currency is less important and applicable accuracy more significant.

The bibliographic chain itself is composed of a series of information "formats" which represent the various stages of the time-oriented course that a fact or concept follows. Each of the following stages represent a further integration of separate information items into the general knowledge mass.

Information Residing in Human Resources
Information Being Created by Institutions
Work-In-Progress
Unpublished Studies
Periodicals
Reports and Monographs
Indexing and Abstracting Services
Annual Reviews and State-of-the-Art Reports
Bibliographic Reviews
Books
Encyclopedic Summaries

The nature and substance of these categories are discussed more fully in Chapter 2.

There are three distinct but interrelated phases that are represented by the links in the Bibliographic chain just listed.

Phase I: Human and Institutional Resources are "packages" of information only in the most general sense. At this stage the information basically resides within the minds of people, either individually (as with consultants) or in groups (as with the staff of a project). These resources include individual and collective thoughts, observations, deductions, investigations, assumptions, and unplanned discoveries.

Phase II: Printed Materials with Intellectual Content begins with a human idea which has reached the point where it can be committed to print or another information medium. This act produces, in general chronological sequence work-in-progress reports, unpublished studies, periodical articles, reports and monographs, annual reviews and state-of-the-art reports, books, and eventually encyclopedic summaries of the resulting body of knowledge.

Phase III: Printed Materials Which Have No Intellectual Content of their own but which provide access to those Phase II materials which do possess actual information include: indexing and abstracting, services as well as bibliographic reviews. Annual reviews and state-of-the-art reports also may provide the identification function in addition to some actual content. They are therefore included in both Phases II and III. Phase III materials lead to information but do not normally contain information themselves. They are basically location tools.

It should be noted that the relationship of Phases II and III has no direct relation to the time lag inherent in the bibliographic chain. This is because the printed items with no intellectual content of their own often parallel those materials with intellectual content, as the purpose of the former is to provide effective access to the latter. The time lag inherent in the bibliographic chain lies mainly in the movement of ideas through and between Phases I and II.

The schematic diagram on page 2 graphically illustrates the functions of the bibliographic chain when used to locate desired information. The location tools of Phase III which provide access to Phase II materials (and, in special cases, Phase I information as well) are described in detail in Chapter 2.

III. The Search Procedure Form

The Search Procedure Form has been formulated to act as an organizing device for information searches. It follows the logic of the bibliographic chain in its structure. Details on the search alternatives are provided in Chapter 2.
IV. A Model of the Searching Process

The entire information searching process is shown from initial need to final decision and action in the following schematic diagram. The choices shown in the “Primary Information Sources” column are typical of the results of any given search. The page numbers shown on the schematic diagram refer to parts of this manual which provide a more detailed discussion of the section in question.

The example following the schematic diagram shows the specific materials which might be used and selected in relation to a particular question. A blank schematic diagram provided for actual practice in structuring and executing a search on a subject of particular interest to the reader. It is suggested that photocopies of this diagram be made to preserve the original for further use.

3. Question Statement (initial)

What teaching strategies are effective for teaching disadvantaged youth?

4. Delimitation and Redefinition of Question

1. What are you looking for?
2. What type of information do you desire?
3. What relevant information do you already have?
4. What is your level of interest?
5. What time limits are appropriate in regard to the age of the information?
6. What other limitations are there?
7. What is the final product desired?
8. How will the resulting information be applied?

For details, see Section I.c, page 1
5. Redefined Question Statement

What teaching strategies, utilizing educational media, are available to meet the needs of disadvantaged youth? 

Need current data (since 1965) for a background report with recommendations for pilot projects.

2. Searching Resources

The searching process described in Chapter 1 is designed to efficiently link users to a variety of printed resources which may satisfy their needs. An important part of the searching process is the use of the Search Procedure. This is a checklist of most of the major printed handbooks, manuals, directories, indexes, etc., arranged in a logical order for structuring a search for information. The Search Procedure, as presented in this section of the manual, functions as a table of contents for the annotations which follow it. When used independently in the day-to-day operation of a Referral Library, it serves as a convenient form for studying the referral reply to the user as well as a usable guide for the user when he commences his research. When used on a personal basis, it provides a review of those sources available in relation to a given reference question.

The Contents

In pursuing the quest for information, it is important to not overlook human and institutional resources. However, there does not seem to exist presently any agency or organization with the capability of identifying these valuable sources of information.

Human Resources

A human resource is an individual who can supply certain skills and competencies without necessarily speaking for any particular organizational structure. Generally, human resources are identified with consultants that might be connected with universities, state departments of education, and intermediate or county school districts. While these are indeed the principal sources of consultants, one should not limit consideration to that level. Significant resources can often be found in local school districts in the form of administrators, teachers, and project directors who are very close to the activities and details of their program. Personnel of service agencies connected to universities should not be overlooked. These agencies generally work in the areas of accreditation and educational surveys and have access to important educational information. With the advent of federal involvement, many federal projects, regional laboratories, and research and development centers have evolved and have on their staffs individuals with a wealth of experience.

Institutional Resources

Due to the recent proliferation of federal and local school “projects” and “exemplary” programs, a whole new type of resource — institutional in nature — has appeared. These projects, unlike the continuing agencies cited above as sources of human resources, can be identified by their relatively short and circumspect nature. They usually deal with a rather restricted focus and may be one aspect of a larger, more permanent pattern, especially at the local school district level.

To date, little has been done to control these projects. One may contact the resources mentioned in the section on “human resources” (above), or consult the following two items: Research in Education, a monthly abstracting journal of ERIC which has a special current projects section in each issue, or Programs In Progress Encyclopedia (PIPE), which attempts to control projects in the social sciences. For details on these two items, see below.

All this points to the need for consideration of human and institutional resources while undertaking an information search. The steps taken will largely be determined by the searchers’ familiarity with the resource potential in the area in question. The authors suggest that exploration of all available human and institutional resources be attempted to assure maximum exposure to potential information sources.

Regional Educational Laboratories

Description. The regional educational laboratories are private, non-profit corporations which are funded, in whole or in part, under Title IV of the Elementary & Secondary Education Act of 1965. Each laboratory operates under a contract with the Bureau of Research, U.S. Office of Education. Although the informal "boundaries" of the 20 regions often overlap, the laboratories operate cooperatively rather than competitively.
Briefly, the laboratories are designed to take the products of basic research and develop and test programs to link the research with practice in the schools of their respective regions. The national network of regional laboratories was conceived to insure that research findings, once developed and appropriately field tested, did in fact reach the school and find implementation.

Resources. The laboratories normally do not maintain significant collections of materials, but the laboratory staffs represent an outstanding human resource.

Publications. Most laboratories produce reports, newsletters, brochures, and other publications. Contact the appropriate laboratory for specific information.

Information Services. Most of the laboratories do not provide direct services as such, but will answer specific requests for information about programs they have under development.

Research and Development Center in Educational Simulation
University of Georgia
Athens, Georgia
Description. This Center will attempt to determine the extent to which a program of early and continuous stimulation activities for 3 to 12-year-old children will increase their competencies in cognitive, aesthetic, and motor learning; and through this study establish new norms for learning, and provide tested materials.
Resources. The Center's consultants and research staff are excellent human resources.
Publications. The Center publishes its findings in journals, and in reports, reprints, monographs, etc.
Information Services. Normally, a center will respond to specific inquiries about its own programs, but formal information services are rarely available.

Research and Development Center for Teacher Education
University of Texas
Austin, Texas
Description. The Center's activities involve research in the area of inservice teacher education, and developing programs that will evaluate the effects of this research on student and teacher. The Center will also attempt to improve communication and cooperation between schools and colleges.
Resources. As in other R & D Centers, the members of the staff comprise the principal resource.
Publications. The Center publishes reports, monographs, reprints, journal articles, etc.
Information Services. No formal services but — in addition to supplying copies of its publications — the Center will normally respond to inquiries about its own programs.

Research Program in Child Development
Institute for Juvenile Research
232 E. Ohio St.
Chicago, Illinois 60611
Description. The Program is seeking to make contributions to knowledge of the development of human behavior through a series of coordinated programs of basic and clinical research. The maturational and socialization processes of children are of special concern to the Program.
Resources. In addition to the usual library materials, the Program maintains information about its present and past research studies.
Publications.
an annual report
Research News and Notes (quarterly)
a current awareness Research Reports service.
Information Services. Qualified scientists and researchers may avail themselves of the Program's classified library of case studies and other information resulting from its programs. Inquiries from qualified researchers are answered.

Research Utilization Branch, Bureau of Research, USOE
U. S. Office of Education
Washington, D. C. 20202
Description. This is the branch of USOE which is responsible for promoting the application of basic research to practice in the schools. The Branch examines proposals, grants federal funds, and/or makes contracts for educational development studies and programs which it deems worthwhile.
Services. The Branch grants funds to institutions and organizations and makes contracts with organizations
and individuals who present acceptable written proposals for research and development studies and activities. The proposals must be in a prescribed format. Those interested should contact the Branch for details.

School Information and Research Service (SIRS)
100 Crockett St.
Seattle, Washington 98109
Description. SIRS is a private, non-profit corporation funded by voluntary memberships of school districts and county superintendents' offices. Its purpose is to collect and disseminate information on school management problems to superintendents and other chief school officers. SIRS takes surveys, conducts conferences, etc.

School Research Information Service (SRIS)
Phi Delta Kappa
8th St. & Union Ave.
Bloomington, Indiana 47401
Description. SRIS is an information service that collects (through PDK's chapters), classifies, and disseminates local school system reports of educational research and innovative practices.
Resources. Large collection of local school system documents, and all of the ERIC collection, on microfiche and indexed for retrieval.

Publications.
SRIS Quarterly.
Information Services. Accepts inquiries from any interested party. They will conduct a search of their collection and provide abstracts or complete reports in microfiche or hard copy for the cost of materials.

Science Information Exchange (SIE)
209 Madison Bank Bldg.
1730 M St. N. W.
Washington, D. C. 20036
Description. The Exchange is designed to provide timely information concerning ongoing scientific research. The control of "work in progress" information in the sciences is emphasized.
Resources. Thousands of abstracts of current research reports and projects which are indexed by more than 30 different parameters.
Information Services. Inquiries by recognized research organizations and investigators are answered. Data is identified, classified, and stored for retrieval. A subject expert analyzes the request, conducts a computer search of the data, and the user is provided abstracts of the relevant projects, programs, or investigators.

TALENT Data Book
American Institutes for Research
P.O. Box 1113
Palo Alto, California 94302
Description. A massive bank of school and student raw data collected from 1,353 schools in 1960. Regular programs of follow-up data collection are planned.
Resources. The Bank contains over 2,000 items of information per student and over 1,000 per school with plans to add to it regularly.
Information Services. Any qualified researcher may utilize the raw data with the approval of TALENT. The data can be manipulated in numerous ways. Anonymity of subjects is protected and any study that would reveal specific names is refused.

Printed Resources

Next to be considered are the printed resources. Annotations are provided explaining the area and level of interest of each item listed on the Search Procedure Form which follows. A keyword index is included for easy subject identification of these resources.

The reader will notice that full order information is not provided with the annotation. It is assumed that interested educators will prefer using the items in libraries rather than purchasing them. For those interested in purchase however, Appendix A provides a list of "source" resources where complete and current order information may be obtained. Those readers who are considering establishing such a reference library can utilize Appendix B which includes the basic reference collection necessary to effectively operate a reference library in the area of education.

WORK IN PROGRESS
This refers to those resources which give access to the current work of educational researchers. This work could be at various stages, but not to the point where it is ready for publication within the next links in the bibliographic chain. This type of information often aids people working in complementary areas and helps avoid unnecessary duplication of effort.
Contemporary Authors (semi-annual)
Designed to give an up-to-date source of information about authors working in all fields — including education. One section of each biography lists the author’s "work in progress." (Gale Research Co., Detroit)

Pacesetters in Innovation (annual)
Annual index to the specialized microfiche collection of the Educational Resources Information Center (ERIC). This collection includes project descriptions and microfiche copies of the reports of innovative projects funded by Title IV of the Elementary and Secondary Education Act. Institution and subject indexes are provided. (Government Printing Office, Washington, D. C.)

Programs in Progress Encyclopedia (PIPE) (quarterly)
This new quarterly publication will attempt to index those ephemeral projects, committees, programs, commissions, etc. that are valuable sources of work in progress information, but which are too transitory in nature to be included in more permanent indexing media. (Gale Research Co., Detroit)

Research in Education (monthly)
The monthly abstracting journal that indexes the documents fed into the Educational Resources Information Center's microfiche collection by ERIC's 19 clearinghouses. The publication also has a "projects" section which supplies abstracts of educational projects just funded by the U. S. Office of Education. (Government Printing Office, Washington, D. C.)

Science Information Exchange
see "Information Agencies" section.

UNPUBLISHED STUDIES
Unpublished studies are research materials that have reached a completed state but which are not intended for formal publication, at least in their present form. This category includes an organization's internally produced reports, informally circulated items, and graduate essays, theses, and dissertations.

DATRIX
DATRIX (Direct Access to Reference Information — A Xerox Service) is a method whereby one can, for a fee, search the complete file of doctoral dissertations maintained by University Microfilms in Ann Arbor, Michigan. Users should request a keyword booklet and a search form which allows one to structure the subject search of the computer, thus gaining efficient access to the largest body of unpublished studies in the U. S.

Dissertation Abstracts (monthly)
A monthly abstracting service which controls the doctoral dissertations stored by University Microfilms. Most of the universities in the U. S. send their dissertations to University Microfilms. The publication presents lengthy abstracts but, until recently, the indexing system left something to be desired (see also DATRIX, above). (University Microfilms, Ann Arbor, Mich.)

Masters Abstracts (quarterly)
A selected list of abstracts of masters essays from various universities which are microfilmed by University Microfilms. Classified arrangement but no indexes. (University Microfilms, Ann Arbor, Mich.)

TALENT Data Bank
see "Information Agencies" section.

PERIODICALS
Periodicals refer to magazines, journals, newsletters and similar, serial items which appear at regular intervals. These publications contain articles of various lengths and levels of interest. Journals may publish lengthy and sophisticated articles that are de facto reports. Magazines and newsletters may publish only descriptions, abstracts, condensations, etc. Periodical articles usually appear simultaneously with the unpublished materials or shortly thereafter. Please note that this category includes serial publications such as loose-leaf services and other frequently updated items which are "periodical" in nature.

This annual compilation of papers on current educational research topics is the result of Phi Delta Kappa’s annual symposium co-sponsored by various universities. (PDK, Bloomington, Ind.)

**Annual Review of Information Science and Technology**
An annual series of state-of-the-art compilations designed to give constructive reviews of the literature to people interested in the generation, design, storage, retrieval, and use of information. Sponsored by the American Society of Information Sciences. (Wiley and Sons, New York, N. Y.)

**Association for Supervision and Curriculum Development Yearbook** (annual)
The ASCD’s yearbook is focused on a different topic in educational administration or curriculum each year. It constitutes a state-of-the-art in that field. (ASCD, 1201 16th St. N. W., Washington, D. C.)

**Biennial Survey of Education**
A compilation of U. S. school statistics, such as enrollment, number of instructional personnel, funding data, etc. Covers public and private, K through college. (Government Printing Office, Washington, D. C.)

**Bowker Annual**
An almanac-type work that supplies library statistics and annual review articles about important topics in the field of library science. Statistics, awards, association activities, etc., are also included. (R. R. Bowker Co., New York, N. Y.)

**Britannica Book of the Year**
Annual updating volume for the Encyclopedia Britannica. It contains articles on all current topics including those of education. Good for updated statistics, new federal legislation, etc. (Encyclopedia Britannica, Chicago, Ill.)

**Digest of Public General Bills and Selected Resolutions with Index** (annual)
Produced by the U. S. Congress each session since the 74th Congress. It is the best general compilation of law digests for the year covered. (Government Printing Office, Washington, D. C.)

**International Yearbook of Education** (annual)
This is a compilation of the annual reports of the education officials of nations participating in the International Conference on Public Education each year in Geneva. Each report covers all aspects of education in the nation in question and an overall comparative study is written of all reports. (UNESCO, Paris)

**National Council for the Social Studies Yearbook** (annual)
Each year this department of the National Education Association publishes a yearbook which summarizes the recent research and literature on a particular topic relevant to the scope of the NCSS. (NCSS, 1201 16th St. N. W., Washington, D. C.)

**National Society for the Study of Education Yearbook** (annual)
Compilation of scholarly papers on various topics currently important to education and its related fields. Two volumes are issued on different topics each year. (SSE Yearbook, University of Chicago Press, Chicago, Ill.)

**BIBLIOGRAPHIC REVIEWS**
Bibliographic reviews are bibliographies in a given field, usually annotated and selective, which list all major publications in that field over a given span of time. These may be published irregularly in book form or at regular intervals in journals or annual reviews.

“Outstanding Education Books of 19 Today’s Education, the Journal of the NEA. (annual, May issue)
An annual annotated bibliography reviewing the educational publications of the year and selecting the outstanding books of the period. (NEA, 1201 16th St. N. W., Washington, D. C.)

**The Teachers Library: How to Organize it and What to Include** (1968)
In addition to explaining the organization of a professional teachers’ library, this volume supplies a basic book list, arranged by format, for the compilation of same. (National Education Association, 1201 16th St. N. W., Washington, D. C.)
BOOKS

The time lag is generally great in the areas of scholarly books on research topics, especially in education. Books are usually a revised version of formal report literature which reflects further study with additional background and historical data added. It should be noted that the titles which follow are location tools for books, not the books themselves.

*American Book Publishing Record* (monthly)

This is, in effect, an author and title index to *Publishers Weekly*. They are reproductions of the Library of Congress Catalog cards. This is not only an excellent index to the year's publishing but a useful library cataloging tool as well. (R. R. Bowker Co., New York, N. Y.)

*Bibliography on Knowledge Utilization and Dissemination* (1968)

This extensive bibliography, compiled by the Center for Research on the Utilization of Scientific Knowledge (CRUSK) of the University of Michigan, represents a year-long search to identify all relevant literature relating to the topic of knowledge utilization in all fields. The bibliography is preceded by a short description of the searching process used and a model of knowledge utilization as a process. Relevance statements are also included. (CRUSK, Institute of Social Research, University of Michigan, Ann Arbor, Michigan)

*Books in Print* (annual)

Author-title index to the books listed in the annual *Publishers' Trade List Annual* which includes virtually all books still "in print" with commercial publishers in the U. S. Full order information is provided. (R. R. Bowker Co., New York, N. Y.)

*Cumulative Book Index* (11x yr)

This serial is an author-subject-title index to virtually all commercially published English-language books in the world. It does not cumulate so the book appears in the year it was published or reissued. (H. W. Wilson Co., Bronx, N. Y.)

*Forthcoming Books* (6x yr)

An author-title list of forthcoming books. This publication indexes books before publication. Order information and publishing date are provided. (R. R. Bowker Co., Bronx, N. Y.)

The most comprehensive compilation of reference works in existence. It arranges them by subject with a complete index. Brief descriptive annotations are provided. Annual supplements are issued between editions. (American Library Association, Chicago, Illinois)

*Paperbound Books in Print* (monthly)

A monthly subject arranged list of most of the paperback books commercially issued in the U. S. Author and title indexes are provided as well as order information. (R. R. Bowker, New York, N. Y.)

*Publishers' Trade List Annual*

This large, 4 volume work consists of the catalogs of most commercial U. S. publishers bound together in alphabetical order. *Books in Print* and *Subject Guide to Books in Print* constitute the author, title, subject control of the PTLA. (R. R. Bowker Co., New York, N. Y.)

*Reference Books in the Mass Media* (1963)

A comprehensive listing of basic reference works related to the mass media. They are arranged by field, i.e. publishing, broadcasting, newspapers, etc., and detailed abstracts are included. (University of Illinois Press, Urbana, Ill.)

*Scholarly Books in America* (quarterly)

A quarterly bibliography of the publications of the nation's major university presses. Most of these items are not included in the commercial publication indexes. (American University Press Services, Room 802 1 Park Avenue, New York, N. Y. 10016)

*Subject Guide to Books in Print*

This constitutes a subject index to the *Publishers' Trade List Annual* and its companion, *Books in Print*. Gives subject control to most of the publications of commercial U. S. publishers. (R. R. Bowker Co., New York, N. Y.)

*Subject Guide to Forthcoming Books* (monthly)

Subject guide to the publication mentioned above.

*Textbooks in Print* (annual)

An author and title index to commercially published elementary and secondary textbooks and related teaching materials. (R. R. Bowker Co., New York, N. Y.)

ENCYCLOPEDIC SUMMARIES

This is the last major link in the bibliographic chain and the one in which the time lag is greatest. Encyclopedic summaries are designed to give a broad overview of a whole field. Due to the infrequent publication and updating policies of encyclopedic works, the material is usually three, five, or more years out of date.

*Encyclopedia Britannica*

International in scope, this scholarly encyclopedia has major articles on education and most of its fields. Excellent source for historical surveys and basic philosophical statements. (Encyclopedia Britannica, Chicago, Ill.)
Encyclopedia of Educational Research (decennial)

The basic encyclopedic work in the field of education; has scholarly articles on all relevant topics in education and lengthy bibliographies. Published every ten years, it is updated by the Review of Educational Research (see “Periodicals” above). Sponsored by the American Educational Research Association. (Macmillan, New York, N. Y.)

Encyclopedia of Library and Information Science

At this writing only one volume of an 18-volume set has been published. The coverage of volume one is broad and international in scope with long, scholarly articles written by recognized authorities. The encyclopedia will fill a needed void in the fields of library and information sciences. (Marcel Dekker, Inc., New York, N. Y.)

Source Resources

The resources listed below are "source" resources; that is, the places you go to get complete and current order information for the printed resources listed in this manual. The column at right tells the reader what type of item may be located by utilizing that particular resource. If, for example, a newsletter listed in Chapter 2 of this manual interests you and you wish to subscribe to it, you should consult the National Directory of Newsletters and Reporting Services. Individuals can locate these resources (or information about them) in any substantial library. Those wishing to establish a reference collection, such as the one listed in Appendix B, should purchase (or contact) all appropriate "source" resources and thus obtain order information for all items in this manual.

Suggested Materials for a Basic Referral Library Collection in Education

The following is a comprehensive listing of a basic materials collection necessary for a Referral Library operation as described in Chapter 2. The list is divided into items essential for referral operations, and items desirable if funds permit. It should be noted that a library offering traditional reference services would need a considerably larger collection. It is therefore advantageous for such a Referral Library to be located physically close to a large research library.

In this listing, U.S. government documents are listed separately unless they fit into another category (indexes, magazines, etc.) The latter have been placed into the appropriate category and noted: "(GPO)". Many indexes published by the H.W. Wilson Co. are sold on the "service basis" which computes a unique subscription price for each library. The H.W. Wilson Co. should be contacted about indexes noted "(price arranged)". Many valuable newsletters, published by the regional educational laboratories, research and development centers, and ERIC Clearinghouse, are not listed here. The addresses of these organizations are available in the Standard Education Almanac (annual; Academic Media, Los Angeles, California; $19.95).

An approximate price for the remaining items (or one year's subscription in the use of serials) is supplied to aid in estimating cost; but for current prices and other order information, consult the appropriate resources listed in Appendix A.
