BORROWING FILMS

Requests for films should be addressed to the proper distributor. The Sale and/or Distributor code numbers located below each film description correspond to the numbers in the Distributor List at the back of the guide. Refer to the corresponding numbers for name, address, etc.

Policies vary widely among producers and distributors concerning the sale and/or loan of their films. For this reason, specific information is not given concerning fees.

HOW TO USE THIS GUIDE

READ FILM DESCRIPTIONS BEFORE ORDERING

1. Title

2. Producer/sponsor, country of origin, year of release (when unknown, an asterisk appears), revision information

3. Physical description in abbreviated form:
   a. Running time and/or number of frames when a filmstrip
   b. Sound (sd)/silent (si)
   c. Color (c)/black and white (b&w)
   d. Film size (16mm, 35mm, etc.)
   e. Tape/disc. (disc 13 in. 33\(\frac{1}{2}\) rpm)
   f. Kinescope (kine)
   g. Accompanying materials, i.e. guide, etc.
   h. Motion picture (MP), Filmstrip (FS), Audiotape (AT), Videotape (VT), Slides (S)

4. Language versions when other than English (Lang: Spanish, etc.)

5. Series reference

6. Technical description of film content

7. Sale source—Sale: 04391

8. Distributor—Dist: 06398
MENTAL RETARDATION FILM LIST is sponsored by the Division of Mental Retardation, Social and Rehabilitation Service, to provide a resource of selected audiovisu als for use in mental retardation education programs. Films intended for use by the general public are grouped under the heading of “Nonprofessional” in the guide and concern the nature of mental retardation, its causes, general treatment, and prevention. Other films dealing with the more specific aspects of diagnosis, clinical treatment, rehabilitation, and control are listed in the “Professional” section of the guide. Films are listed alphabetically in the descriptive sections and in the Title Index.

ADVANCED PERCEPTUAL TRAINING
Thorne Films, Inc., in cooperation with Laradon Hall for Exceptional Children, U.S.A. 1964
9min sd c 16mm guide MP
Series: Aids for teaching the mentally retarded

Experiences are provided that aid the students in making decisions and drawing conclusions. The child learns to manipulate devices that are adjusted to his level of dexterity and can be altered to challenge his increasing skill. Other devices promote friendly competition among students and encourage rapid decision making. The working knowledge of words and numbers gained will help the child to meet problems encountered in his environment and to communicate in better ways.

Sale: 86490 (U.S.A.); 25267 (Canada); 42315 (International)
Dist: 17185; 63892; 72380; 17082

ANOTHER KIND OF SCHOOL
Produced by the Rotherham Corp. Health Dept., England
25min sd c 16mm MP

Demonstrates modern methods of teaching and training mentally handicapped children between the ages of five and sixteen.

Dist: 17688

ARTS AND CRAFTS FOR THE SLOW LEARNER
U.S.A. 1953
27min sd b&w 16mm MP

Crafts activities in a public school class for the educable mentally retarded. Eighteen types of arts and crafts employing free or inexpensive materials are depicted, including finger painting, woodwork, leathercraft, potato carving, wet chalk drawing, glass painting, and woodburning. Many crafts depicted could be carried on at home.

Sale: 84812
Dist: 13499, 84812
BOB AND HIS FRIENDS ON THE PLAYGROUND
MGS Productions. Released by Educational Materials Distributors, U.S.A. 1964
5min sd c 16mm guide MP
Series: MGS educational
Shows how desirable concepts are developed in a special elementary-level classroom for the educable mentally retarded child. A young boy and his classmates are shown exercising, playing games, and participating in sports.
Dist: 25550

BOB AT HOME
MGS Productions. Released by Educational Materials Distributors, U.S.A. 1964
5min sd c 16mm guide MP
Series: MGS educational
Shows an educable mentally retarded child in his home environment. Tells how a positive relationship helps the child develop various practices like telling time, crossing a street with care, helping at home, having fun with his family, and thinking of the needs of others.
Dist: 25550

BOB COMPLETES HIS MAP
MGS Productions. Released by Educational Materials Distributors, U.S.A. 1964
5min sd c 16mm guide MP
Series: MGS educational
Demonstrates how desirable concepts are developed at home and in a special elementary-level classroom for the educable mentally retarded child. Shows a young boy working on a school map project and bringing the completed work home to his family. Stresses the importance of completing assigned work and checking for accuracy. Shows how a positive relationship with family and peers helps a child's development.
Dist: 25550

BOB'S SPECIAL CLASS
MGS Productions. Released by Educational Materials Distributors, U.S.A. 1964
6min sd c 16mm guide MP
Series: MGS educational
Demonstrates how desirable concepts are developed in a special elementary-level classroom for the educable mentally retarded child. Shows a young boy and his classmates working with their teacher at various learning activities—reading, writing, numbers, art—and developing various concepts in self-identification and orientation.
Dist: 25550

CARE OF THE YOUNG RETARDED CHILD
International Film Bureau, Inc., U.S.A. 1965
18min sd c 16mm guide MP/VT
Shows how knowledge of normal child progress provides valuable information and guidance in the care of the young retarded child. Normal children ranging in age from a few months to six years are shown and the observation made that retarded children follow the same pattern but at a much slower growth rate. A series of feeding sequences comparing a normal child, a retarded child of the same chronological age but lower developmental level, and a normal younger child of the same developmental level, illustrates the value of early assessment of the infant in order to insure a proper feeding and training program.
Sale: 42315
Dist: 42315; 56875

A CASE OF HYPOTONIA AND PURPOSELESS MOVEMENT IN A MENTALLY DEFECTIVE CHILD AGED 5 YEARS
Produced by Department of Medical Illustration, Guy's Hospital Medical School, England 1951
3min si c 16mm guide MP
Illustrates abnormal movements seen in mentally defective children. The case shown is a girl of five years. Sequences of a normal six-months-old baby are included for comparison. (Printed clinical history of the case is included with the film.) Professional use only.
Dist: 11832

CHILDREN WITH SEVERE BRAIN INJURIES
U.S.A. 1961
23min sd c 16mm MP
A pictorial presentation of an article written by a group of doctors from the Rehabilitation Center at Philadelphia which shows a new system that has been developed for the treatment of children with severe brain injuries. Based on neurological organization, the concept is aimed at the injured central nervous system rather than at the resultant peripheral symptoms.

*Dist: 42420*

**CLINICAL STUDY OF MENTAL DEFICIENCY—ENDOCRINE TYPES**
Leavesden Hospital, England
15min si 16mm MP

This film covers the range of the grosser forms of mental deficiency of endocrine type.

*Dist: 49212*

**CLINICAL STUDY OF MENTAL DEFICIENCY—MONGOL TYPES**
Leavesden Hospital, England
15min si b&w 16mm MP

Covers the range of the grosser forms of mental deficiency of mongol type. Professional use only.

*Dist: 49212*

**CLINICAL TYPES OF MENTAL DEFICIENCIES**
Louis Belinson, M.D., and William T. Sloan, M.D., U.S.A. 1945
40min sd c 16mm MP

Presents illustrations of the main institutionalized types of mental deficiency.

*Dist: 72380*

**CLINICAL TYPES OF MENTAL DEFICIENCY**
40min sd b&w 16mm MP

Summarizes brain conditions causing mental deficiency. Demonstrates, through performance testing, classification of mental deficiencies into morons, imbeciles, and idiots. Describes the eight major patho-
logical groups of mental deficiency, using typical cases to illustrate each type.

Sale: 72380
Dist: 72380 (Showings restricted; contact 72380); 50947; 56875

COMPREHENSIVE TREATMENT IN MENTAL RETARDATION
34min sd b&w 16mm MP
Reviews a three-month study of a comprehensive therapy program at the Pineland Hospital and Training Center, Pownal, Maine. Dr. Peter Bowman, superintendent of the hospital, comments on the concept of treatment of mental illness emphasizing a therapeutic rather than a custodial approach, and its application in the field of mental retardation. He discusses results of a study, intended to evaluate a therapeutic program, of 144 female patients, half of whom received chlorpromazine (Thorazine) and half placebo; and describes vocational, educational, recreational, psychological, and other therapies administered, showing details of the therapeutic program, and summarizing results of comprehensive therapy.

Dist: 80422

CONGENITAL HEMIPLEGIA WITH ATHETOSIS OF THE UPPER LIMB
England 1952
5min si c 16mm guide MP
Shows a girl of 3½ years with atonic diplegia: responses when limbs are handled; plantar responses; intellectual sub-normality. (A printed leaflet with clinical history and some teaching points is included with the film.) Professional use only.

Dist: 11832

THE DEVELOPMENT OF A CHILD WITH PHENYLKETONURIA UNDER TREATMENT
Drs. J. D. Blainey, R. F. Fletcher, and J. R. Squire, England 1957
20min si c 16mm MP
Records experience with a mentally defective child with phenylketonuria fed on a phenylalanine restricted diet over a period of
The program stresses the magnitude of the problem of mental retardation in the United States, the prenatal and perinatal etiologic factors, and the environmental and psychiatric problems. Types of mental retardation responding to specific treatment are discussed by six panelists.

Dist: 72490 (M-664)

EARLY DETECTION OF PKU IN THE HOSPITAL NURSERY
Produced by Designs for Medicine, U.S.A. 1963
20min sd c 16mm MP

The procedures used in the Guthrie test for phenylketonuria are demonstrated step by step. Professional use only.

Sale: 21830
Dist: 21830

THE EARLY DIAGNOSIS OF PHENYLKETONURIA
Dr. Hudson, Alder Hey Children's Hospital, England 1962
25min sd c 16mm MP

Stresses the importance of diagnosing the disease in very early infancy. It is directed mainly to health visitors.

Dist: 61332

EDUCATION OF EXCEPTIONAL CHILDREN
U.S.A. 1960
25min sd c 16mm MP

All phases of a well-rounded program for the education of exceptional and handicapped children, in operation to aid the hard-of-hearing, speech-handicapped, mentally retarded, and those with impaired sight are shown.

Dist: 42420

EYE ON RESEARCH: ANOTHER CHILD'S POISON
British Broadcasting Corporation Television, England 1959
30min sd b&w 16mm MP
Tells how a recently discovered cure for phenylketonuria, a mental disease caused by faulty metabolism, is being successfully undertaken in British hospitals.

**Sale:** 11675  
**Dist:** 11675

**THE FARTHEST FRONTIER**  
CBS News, U.S.A. 1967  
47min sd b&w 16mm MP

A report on the revolutionary new “mind drugs.” The I.Q. of a hopelessly retarded child is brought to normal. A psychotic patient is returned to health. Shows that the drugs can improve memory and concentration, or induce abject fear or superhuman courage.

**Sale:** 14173  
**Dist:** 14173

**THE FEEBLEMINDED**  
Audio-Visual Education Service, University of Minnesota, U.S.A. 1933  
42min sd b &w 16mm MP

Mentions briefly brain conditions causing feeblemindedness. A sequence on performance tests explains the classifications of the feebleminded into morons, imbeciles, and idiots. Describes the eight major pathological groups: hypertelorism, oxycephaly, microcephaly, hydrocephaly, cretinism, mongolism, epilepsy, and cerebral palsy. Typical cases illustrate each type. Includes encephalograms in some cases to explain the pathology.

**Dist:** 92830

**FUNCTIONAL TEACHING OF NUMBERS**  
Spencer Nelson Film Productions, U.S.A. 1965  
30min sd c 16mm MP

Covers the main aspects of teaching numerical skills to the mentally retarded, including the naming and recognition of number symbols, the sequential order of numbers, number value, and number application. This was filmed at Laradon Hall in Denver, Colorado.

**Sale:** 81912

**GROUP THERAPY FOR THE SEVERELY RETARDED**  
National Association for Retarded Children, U.S.A.*
15min sd b&w 16mm MP

Depicts an experiment in therapy and demonstrates the progress made by severely retarded children who were placed in an unstructured group situation.

Dist: 82928

THE HEADBANGERS
Produced by the U.S. Public Health Service in cooperation with the Sonoma California State Hospital, U.S.A. 1965
30min sd b&w 16mm MP

Describes a treatment program for retarded, severely self-destructive children. Pictures several institutionalized children who manifest such behavior through the symptom of headbanging, one of whom blinded herself and was subsequently placed in a special study unit. Emphasizes the persistent, cooperative effort of the staff and therapist as the primary mode of treatment.

Sale: 23402
Dist: 72490 (AM-1411)

INITIAL PERCEPTUAL TRAINING
Thorne Films, Inc., in cooperation with Laradon Hall for Exceptional Children, U.S.A. 1964
8min sd c 16mm guide MP
Series: Aids for teaching the mentally retarded

In the second phase of the Laradon Hall Training program, devices are used that provide exercises involving various sensory areas to help improve perceptual skills. In matching cards, nuts and bolts, and sound and weight boxes, the child learns to discriminate with respect to sight, touch, weight, and sound. Exercises with the nail board and pattern column help develop manual dexterity and improve hand-eye coordination.

Sale: 86490 (U.S.A.); 25267 (Canada); 42315 (International)
Dist: 17185; 63892; 72380; 17082

INTEGRATED MOTOR-PERCEPTUAL TRAINING
Thorne Films, Inc., in cooperation with Laradon Hall for Exceptional Children, U.S.A. 1964
6min sd c 16mm guide MP
Series: Aids for teaching the mentally retarded
In another phase of the Laradon Hall Training Program the primary concern is to improve coordination of perceptual and motor processes. Hopscotch, roller skating, folk dancing, singing, and varied craft activities often point the way toward vocational aptitudes that may be developed by further training. Children participating in activities such as these usually react favorably to the climate of cooperation.

Sale: 86490 (U.S.A.); 25267 (Canada); 42315 (International)
Dist: 17185; 63892; 72380; 17082

I.Q. AND CRIME
National Educational Television. Produced by KQED-TV, U.S.A. 1958
30min sd b&w 16mm kine MP
Series: The criminal man
Discusses psychic problems and their relationship to criminality. Deals primarily with the mentally deficient individual. Explains congenital and developmental problems, organic brain damage, and deterioration.

MENTAL DEFICIENCY DUE TO BIRTH INJURY, SPASTIC AND ATHETOID TYPES
Training School, U.S.A. 1930
15min si b&w 16mm MP

Demonstrates the motor handicaps resulting from intracranial birth injuries contrasting the spastic and athetoid types. Differences between the patients and their movements and that of a normal person learning a novel motor act of some difficulty may be pointed out.
Most useful when accompanied by a narrator.

**MENTALLY HANDICAPPED CHILDREN GROWING UP: THE BROOKLANDS EXPERIMENT**

Produced by Basil Wright, Realist Film Unit, Ltd., England 1960
21min sd b&w 16mm MP

Covers an experimental study of sixteen children living in the Fountain Hospital. Each pair was matched for sex, age, non-verbal intelligence, and clinical diagnosis. One member of each pair was transferred to a small residential unit at Brooklands and given a different pattern of care. This is contrasted with the care given in the large, understaffed Fountain Hospital. Shows the marked and significant rise in the verbal and mental age of the Brooklands children during their two years' residence in the unit.

**MICHAEL—A MONGOLOID CHILD**

England 1960
14min sd b&w 16mm MP

Provides an intimate study of a mongoloid teen-ager living on a farm in rural England. A straightforward commentary is provided by his mother, who explains how Michael has fitted into their home and village life. Film will help minimize the near superstition still surrounding the victims of mental defects.

**MODERATE RETARDATION IN YOUNG CHILDREN**

Produced by Edward Feil Productions in cooperation with the Mental Development Center, Western Reserve University, U.S.A.
43min sd b&w 16mm MP

Demonstrates behavioral functioning of children with moderate mental retardation (55 to 75 I.Q. range). The children are seen in various individual and group activities which point out some of the similarities and differences between retarded and average individuals. Seven children are followed intensively, showing their developmental level on several tasks. The film specifically notes the quality of the relationship between teacher and child.
MOTOR TRAINING
Thorne Films, Inc., in cooperation with Laradon Hall for Exceptional children, U.S.A. 1964
11min sd c 16mm guide MP
Series: Aids for teaching the mentally retarded
Improvement of impaired motor skills is the aim of the first phase of functional teaching at Laradon Hall. Unique devices and special exercises are used to stimulate the passive child to initiate activities and to help him understand cause-and-effect relationships. The crawling maze, stepping ladder, table swing, balance beam, and swimming tables improve locomotion, coordination, spatial orientation, and balance. Climbing obstacles, sinking tires, and off-center tires introduce the child to a variety of sensations and experiences through which he can increase and control his motor abilities.

PINE SCHOOL
Produced by State University of Iowa, Television Center, U.S.A. 1965
30min sd b&w 16mm MP
Shows part of a research program devoted to the study of mentally retarded children, ages 3-6 years, from underprivileged homes where facilities for mental stimulation are lacking. The school attempts to provide the necessary materials for giving the children group experiences, opportunities for psychological and physical growth, and activities for the development of muscular control.
Dist: 72380

PKU DETECTION IN OREGON
U.S.A.*
Phenylketonuria (PKU) patients were photographed by the Maternal and Child Health Section of the Oregon State Board of Health to observe their progress after they were placed on a special diet. In addition to the actual cases, detection, treatment, and laboratory techniques are shown.

PKU MENTAL DEFICIENCY IS PREVENTABLE
15min sd b&w 16mm MP

The biochemistry, genetics, symptoms, diagnosis, and management of phenylketonuria (PKU) are reviewed in this film. The point that testing for PKU must become as routine and as standard for general practitioners and pediatricians as shots for DPT, polio, and smallpox is emphasized. The case histories of two siblings, both with PKU, are presented. One, a child now institutionalized with an I.Q. of 40, was not diagnosed until his third year. The other was diagnosed at two weeks, was placed on a special dietary regimen, and now, at age 4, has an I.Q. of 106. Diagnostic tests, such as Phenistix, ferric chloride, 2,4 dinitrophenylhydrazine, bacterial inhibition, and quantitative plasma analysis are described.

PKU--PREVENTABLE MENTAL RETARDATION
(PKU-Retardo mental evitable)
Produced by Richard Koch, M.D., U.S.A. 1961
15min sd c 16mm MP
Lang: English, Spanish (42315)

PKU, phenylketonuria, is one of the few forms of preventable mental retardation. Unless detected in time and properly treated, PKU, a liver enzyme deficiency, may cause severe brain damage to a child. The film shows how PKU can be detected with a simple chemical "diaper test" which can be made in hospitals, clinics, the physician's office, or at home by the parent. In a series of actual case histories, the need for universal screening of large populations of children is pointed up. Early testing—at 4 to 6 weeks—before retardation begins is a national obligation.
PKU—PREVENTABLE MENTAL RETARDATION (SECOND EDITION)
International Film Bureau, Inc., U.S.A. 1967
16min sd c 16mm MP
Shows how mental retardation due to phenylketonuria (PKU) can be prevented by early diagnosis immediately after birth. Information concerning new data on incidence of the disease, reports on the effectiveness of present procedures (including the Guthrie Blood Test), and new techniques for testing urine in the home have been included. Emphasizes the need for universal checking of all infants for PKU.

AND CROWN THY GOOD
Produced by Zenith Cinema Service, Otto Hangartner, Jr., U.S.A.  
35min sd c 16mm MP

A 6-year report of one community's accomplishment in providing for their severely retarded children. Training procedures and teaching techniques used in Orchard School are demonstrated. The team approach to the total program, progressing from the nursery child to the useful adult in a sheltered workshop is shown.

Dist: 68415

BACK TO CLAREMONT
Bristol Department of Public Health, England 1963
11min sd c 16mm MP

This film was made to show the progress made by some of the children who appear in the film “Claremont” (1959). The ability of the cerebral-palsied children at the special school is demonstrated in shots from the original film and compared with the muscular and academic progress made in three years. The message is that the help given is producing results, but slowly. Sudden cures and dramatic improvements can rarely be achieved. Parents and others may expect improvements if therapy and teaching are begun early enough, but the road is long and hard.

Dist: 14665

BEYOND THE SHADOWS
Colorado State Department of Public Health. Produced by Western Cine Productions, U.S.A. 1959
26min sd c 16mm MP

Reveals some of the problems and causes of mental retardation. Demonstrates how a community, through self-initiated effort, can unite in a program to help its mentally handicapped. Focuses on the city of Colorado Springs, and uncovers the step-by-step action by which a few community members assisted mentally retarded children who were unable to benefit from existing institutions. It shows how the community effort was assisted by numerous state and local agencies to establish a complete health program for the retarded children.

A CLASS FOR TOMMY
Produced by Los Angeles City Schools, U.S.A. 1950
20min sd b&w 16mm MP

This film tells the story of a class conducted for the instruction of mentally retarded children, and centers around Tommy, a boy of six. It shows how classes and activities are especially developed to aid in overcoming both mental and physical handicaps. Watching the daily activities, the audience learns about planning sessions, block play, nutrition periods, room environment, attitude development, the work of the school nurse and dentist, and the creation of reading readiness by the teacher through the use of picture stories. Stresses the importance of teacher preparation, of teacher-parent planning, and of whole-hearted cooperation between the parent and the school.

INTRODUCING THE MENTALLY RETARDED
Missouri Division of Health and Welfare, U.S.A. 1964
30min sd b&w 16mm MP
Three classifications—educable (I.Q. 50-70), trainable (I.Q. 25-50), and custodial (cannot be taught anything); and two degrees of retardation—primary, which is of hereditary origin, and secondary, which has been caused by external forces, are described. Shows serious mental retardation is often accompanied by physical disability. The need for
stimulating environment, wholesome play activities, attractive housing facilities for those who must be institutionalized, adequate hospital and laboratory accommodations is demonstrated. Job opportunities within their capabilities are depicted.

Dist: 72380

JEUNESSE DESEMPAREE (YOUTH ADRIFT)
England*
25min sd b&w 16mm MP
Lang: French

Shows the education and care of mentally handicapped children at a provincial institution in Belgium. The older children receive vocational training in preparation for an independent life as adults. This institute also helps the inmates to obtain positions with carefully selected employers and remains in contact with them after they leave the institute.

Dist: 55277 (U.S.A. only); 55285 (U.S.A. only); 55292 (Canada only)

THERE WAS A DOOR
Green Park Productions, England 1959
Deals with the care and treatment of the mentally retarded. It emphasizes the trend in Great Britain today toward treatment, training, and social services within the general community rather than in large and remote institutions. Presents a point of view, not an overall solution. Concerns a mentally retarded son, now a young man and an increasing burden upon his parents.

**THIS IS SLARC (ST. LOUIS, MISSOURI)**
U.S.A.*
17min si c 16mm script MP
Parent-council activities from primary classes to adult workshop, including recreation. Emphasis is placed on the trainable mentally retarded.

**THIS OLD HOUSE**
Produced by Religious Television Associates, U.S.A.*
29min sd b&w 16mm MP
Documents a day at a small community workshop for retarded children in Charlottetown, Prince Edward Island: parents and members of the staff discuss problems; shows the children involved in various projects.

**THURSDAY’S CHILDREN**
Beloit Association for Retarded Children. Produced by Robert Thompson, U.S.A. 1966
17min sd c 16mm MP
Shows the establishment of a day-care center for the mentally retarded by parent and community efforts. Tells why the mentally retarded should be trained and uses one child as an example of the value of the program.

**TIME IS FOR TAKING**
Stuart Finley, U.S.A. 1964
23min sd c 16mm MP
Keyed toward encouraging parents of the retarded child, this film was made at Camp Kentan, Middleburg, Virginia, a residential camp for retarded children. Everyday actual events are recorded. The viewer sees youngsters and their skilled counselors overcome problems as they develop in a natural, uninhibited environment.
