ABSTRACT

Three hundred and ninety-seven objectives and related evaluation items for reading in grades kindergarten through three are presented for the teacher and administrator in this collection developed by the Instructional Objectives Exchange (IOX). The objectives are organized into the categories of word recognition, comprehension, and study skills, with each category being further divided into subcategories. Four elements: (1) the objective, (2) measurement items, (3) means of judging the adequacy of student responses, and (4) an IOX rating are included for each objective. In addition each of the objectives is accompanied by a sample measurement item which is designed to test the student's acquisition of the desired behavior. In most cases, specific answers to the sample items have been provided. When a single correct answer is impossible to supply, criteria for judging the adequacy of the student responses are included. The CENTER FOR THE STUDY OF EVALUATION (CSE) is one of nine centers for educational research and development, sponsored by the United States Department of Health, Education, and Welfare, Office of Education. Established at UCLA in June, 1966, CSE is devoted exclusively to finding new theories and methods of analyzing educational systems and programs and gauging their effects.

The Center serves its unique function with an interdisciplinary staff whose specialties combine for a broad, versatile approach to the complex problems of evaluation. Study projects are conducted in three major program areas: Evaluation of Instructional Programs, Evaluation of Educational Systems, and Evaluation Methodology and Services.

INTRODUCTION

Objective Collections distributed by the Instructional Objectives Exchange (IOX) contain objectives and measurement items developed under the auspices of IOX. These objectives were based either upon curricular material submitted to the Exchange by teachers, schools, and school districts, or they were generated by the IOX staff.

Purpose

The staff of the Exchange believes that it will be easier for the busy teacher or administrator to select from among objectives, and to generate only a very few, than it would be for him to formulate an entire set of behavioral objectives and measurement items.

There is no attempt to dictate curriculum through this service. Rather, the goal of the Exchange is to expedite the user's selection of his own objectives.

The user may select from among these objectives those which are consistent with his own curricular goals, since, in many cases, there will be more objectives contained within each Collection than an individual teacher or district will wish to use in a particular instructional situation. In addition, he may generate objectives to fill gaps which he perceives to exist within the set of objectives as they have been developed.
Different Objective Collections will vary as to the number of measures which have been developed to assess the attainment of an objective. In some cases, there is a pool of items (usually six). In others, there is only one sample item per objective. In a very few cases, there are no items at all. Though it is the Exchange's intention to supply a pool of items with which to assess each objective, this goal has not yet been accomplished. As additional items are developed, however, their availability will be made known through the publication of IOX Catalogs.

Differences may be noted in the construction of "correct responses" to specific items developed to assess an objective. In some cases, the Exchange has provided "answers." These serve in instances where a single, correct answer is possible. For example, in mathematics items there often exists only one answer that can be considered correct.

In other cases, the Exchange has included as the "correct response" not a specific "answer," but what are called "criteria for judging the correctness of a response." In these instances, a particular behavior, or process, is being taught. As a group of students apply this process in response to an item, their answers may differ and still be considered correct. However, though there is no single correct response, this does not mean that any response is correct. For this
reason, criteria are provided by means of which the accept-
ability of a learner's answer can be judged. The criteria
are designed to exemplify the process called for in the
objective. An example of this is found in the Collection
of English literature objectives, wherein the process of
evaluating the tone of a poem may permit different answers
which can be judged in terms of both a demonstration of the
process called for and internal evidence to be found in the
poem itself.

As the Instructional Objectives Exchange continues to
develop, it is anticipated that the user will be provided
with classifications of objectives in each Collection. For
example, many objectives can be classified as to whether
they call for learner responses at a higher rather than lower
cognitive level. Further, as users supply the Exchange with
preference data, the degree of preference per objective
reflected by various educational groups can be presented.
These and other classification schemes will be forthcoming
in future IOX publications.

Grade level recommendations for particular Collections
have been supplied by contributors and should be ignored by
users who consider other grade or age levels more appropriate
for their own situation.

III
Quality Control

The objectives and items contained in this Collection have been adapted from curricular material contributed to the Exchange and, generally, have not been used in their present form in the classroom. The names of the contributors can be found on the acknowledgments page.

In the future, IOX anticipates that objectives and measures distributed will have been subjected to rigorous quality control procedures, such as the following: the material itself will be evaluated in the classroom; subject matter experts will examine the objectives and items in terms of whether given units include all essential or important aspects of the course under consideration; teachers will assess the unit objectives to determine whether they constitute goals feasible for groups of children in the classroom; teachers will report under what special conditions they believe the material can be most effective. Such information will be collated and made available to users. Furthermore, the objectives and measures will incorporate suggestions and improvements derived from their use.

Feedback

At the present time, however, the material is being distributed without these quality control procedures. The principal reason for this is the Exchange's desire to satisfy
immediate needs of classroom teachers. Moreover, there is an additional advantage to this procedure. It will provide the Exchange with information about actual classroom use of this material. To this end, the pages immediately following the introductory material contain a questionnaire, designed to supply the Exchange with information related to the above control procedures. IOX would greatly appreciate your cooperation in this matter. Please remove the questionnaire pages and return them after you have examined, or, preferably, actually used, the contents of this booklet.

The Exchange solicits your patience as you examine these early materials so that the system can, in time, be updated and improved. This first effort, albeit primitive, starts the cycle toward a continually improving collection of instructional objectives which, hopefully, can be of considerable utility to the nation's educators.
The Reading Collection

Contained in the Reading Collection are 397 objectives and related evaluation items for grades kindergarten through three. These objectives are organized into the following categories: Word recognition - phonetic, structural, context; Comprehension - literal, interpretation, critical, vocabulary; Study skills - work habits, alphabetizing, use of references, reading pictorial and graphic material, reading rate, organizing information. The objectives in each category are arranged in ascending grade level.

Four elements - (1) the objective, (2) measurement items, (3) means of judging the adequacy of student responses, (4) an IOX rating - are included for each objective in the Collection. The objectives are stated in operational terms and identified by a Category and a Sub-Category which serve to limit and define them. The behavioral aspect as well as the content of each objective have been carefully selected as a means of requiring the student to master processes and concepts central to the acquisition of reading skills. A wide range of behaviors are required within the total Collection, from the simple recall of knowledge to the analysis and evaluation of given situations.

Each objective is accompanied by a sample measurement item which is designed to test the student's acquisition of the desired behavior. In most cases, specific answers to the sample items have been provided. When a single correct answer is impossible to supply, criteria for judging the adequacy of the
student's response, in the form of possible correct responses, are included.

A few objectives do not contain either criteria for making judgments, or correct answers. In some of these instances, the teacher has been asked to select her own material, making it impossible for us to predict what should constitute an acceptable answer. In others, the student is asked to read something aloud or pronounce something, and the teacher must judge the accuracy of the reading or pronunciation. In all of these instances, we simply include a statement that the answer is "self-evident."

The user of the material should note also that the directions included for the item are always written as directions to the student. It should be understood that in the earlier grades, the teacher might have to read the directions for the students or explain them to the students. Moreover, at times the objective calls for the student to respond to an oral stimulus. Here again, the directions must be read to the students by the teacher.

All objectives included here have been rated by participants of the 1969 IOX Summer Institute for the Preparation of Instructional Objectives. Although ratings ranging from 1 (acceptable) to 5 (unacceptable) were given by the Institute to all objectives, those rated 4 or 5 have been eliminated from the present Collection.

VII
Acknowledgements

While the objectives and items contained in this Collection were developed by the Staff of the Instructional Objectives Exchange, portions of the material are based upon contributions made by the following school districts:

Clark County School District, Las Vegas, Nevada
Johnston Public Schools, Johnston, Rhode Island
Enterprise School District, Redding, California

The following individuals added to, refined and rated the material:

1. Dr. Leonard E. Swenson, Thousand Oaks School District, California
2. Dr. Frank L. Brendemuehl, Hopkins School District, Minnesota
4. Mrs. Mary Eleanor Finley, Palos Verdes School District, California
5. Mrs. Gabriella M. Genske, Cincinnati Public Schools, Ohio
6. Mrs. Vera Gierman, Ionia Public Schools, Ionia, Michigan
7. Mr. Wayne S. Hervi, Rowland School District, California
8. Mr. Donald R. Holliway, Los Alamos School District, New Mexico

The Instructional Objectives Exchange genuinely appreciates the significant contributions of these school districts and individuals.
To the User:

In order to improve the quality of our Collections of objectives and test items, we must have feedback from our users. We anticipate that our Collections will be used by both teachers and administrators, which means they will be utilized in various ways. However, some aspects of the objectives and related test items are important regardless of the user's intent, and we would like to evaluate this Collection with respect to those dimensions. With this in mind, we ask that you take a few minutes to complete and return the following questionnaire.

Part I of the questionnaire requests information which identifies the user's interest in the Collection. This is important and should be completed by everyone. Parts II and III relate to the objectives and test items, respectively, and should also be completed by all users. Part IV goes into greater detail than the preceding parts, and is optional.

We strongly urge that you look at the questionnaire now so that you may jot down pertinent comments while you are using the Collection. Then complete the questionnaire and return it as soon as possible after use of the Collection. Your cooperation in this matter is extremely valuable and is greatly appreciated.
INSTRUCTIONAL OBJECTIVES EXCHANGE USER QUESTIONNAIRE

Part I: USER information--Please complete the following:

1. Title and Number of Collection:

2. Name: ___________________ Position: ___________________

3. School: ___________________

4. School District: ___________________

5. City: ___________________ State ________ Zip ________

6. Grade level(s) of class(es) using the Collection:

7. Please check the ability level(s) of the class(es) using the Collection:
   □ below average  □ average  □ above average

Part II: INSTRUCTIONAL OBJECTIVES Information--Please check or fill in where appropriate:

1. a. Overall, to what extent are the objectives useful to you?
   □ not useful  □ somewhat useful  □ highly useful
   b. In what way?

2. a. Overall, to what extent are the objectives too specific or too general?
   □ too specific  □ just about right  □ too general
   b. Can you give examples (by objective number) of objectives which are:
      (1) too specific?
      (2) too general?

3. a. Overall, to what extent did your students find the objectives difficult?
   □ too easy  □ just about right  □ too difficult
   b. Can you give examples (by objective number) of objectives which are:
      (1) too easy?
      (2) too difficult?

Part III: TEST ITEM Information--Please check or fill in where appropriate:

1. a. Overall, to what extent do the test items measure the objectives?
   not well               somewhat            very well

   b. Can you give examples (by objective and item number) of test items
      which do not measure the objective?

2. a. Overall, did your students have difficulty reading test items?
   yes                  no

   b. Can you give examples (by objective and item number) of items which
      are difficult to read?

3. a. Overall, how helpful are the 'criteria' provided for evaluating
      answers to items?
   not helpful          somewhat helpful     very helpful

   b. Can you identify factors to make the criteria more useful?

4. Do you have any additional suggestions with respect to this particular
   Collection or the general operation of the Instructional Objectives
   Exchange?

On the following page you will find additional, more explicit questions.
If you have time to answer them, your contribution to the improvement of
IOX will be greatly increased.

Objective 1
IOX Acceptability Rating: 1

Major Category: Comprehension--Interpretation
Sub-Category: Interpreting Story Facts

OBJECTIVE: Given a picture depicting an activity, the student will state what is illustrated.

SAMPLE ITEM: State what is happening in this picture.

ANSWER: Any description which relates to the content is appropriate. Example: Two boys are having a picnic, and they see a butterfly.
Objective 2  
IOX Acceptability Rating: 1  

Grade K

Major Category: Comprehension--Interpretation  
Sub-Category: Predicting Outcomes

**OBJECTIVE:** Given a story whose conclusion is missing, the student will draw a picture illustrating a likely ending based on the contents of the story.

**SAMPLE ITEM:** Read *The Little Engine That Could* aloud to the class, omitting its conclusion. Students are to draw a picture illustrating a likely conclusion based on the story.

**ANSWER:** A likely conclusion drawn would be the little engine finally making it over the steep hill.
Objective 3
Reading
IOX Acceptability Rating: 1
Grade K

Major Category: Comprehension--Literal
Sub-Category: Reading for Details

OBJECTIVE: After listening to a given story, the student will recall its details by drawing a picture to illustrate them.

SAMPLE ITEM: Read Peter Rabbit by Beatrix Potter aloud to the class. Students are to draw a picture illustrating its details.

ANSWER: Details drawn from Peter Rabbit might include Mr. MacGregor's garden; Peter's new clothes; Flopsy, Mopsy, and Cottontail; etc.
Objective 4

IOX Acceptability Rating: 1

Major Category: Comprehension
Sub-Category: Main Idea

Objective:

Given a picture without a title, the student will state a title which relates to the content of the illustration.

Sample Item:
State a title for this picture:

Answer:
Any title which relates to the content is appropriate.
Examples:
1. A Wild Ride
2. Ride-em Bronco
3. Giddy-up Cyclone
Objective 5

IOX Acceptability Rating: 1

Major Category: Comprehension--Literal
Sub-Category: Organizing To Show Sequence

OBJECTIVE: Given a group of pictures depicting a familiar series of events in scrambled sequence, the student will arrange the illustrations in proper order.

SAMPLE ITEM: Arrange the events of these pictures in proper order.

1. ANSWER: 2, 3, 1.
Objective 6
Reading

Grade K-1

Major Category: Word Recognition - Phonetic Analysis
Sub-Category: Auditory Discrimination--General Sounds

**OBJECTIVE:**
The student will demonstrate his attention to a presentation by answering questions based on it.

**SAMPLE ITEM:**
Use a game situation such as Who Am I?. Student identifies the voice of the hidden caller after hearing three or less calls.

**ANSWER:**
Correct name of the hidden caller.
Objective 7

IOX Acceptability Rating: 1

Major Category: Word Recognition - Phonetic Analysis
Sub Category: Auditory Discrimination-General Sounds

OBJECTIVE: Given a situation in which his eyes are closed and a familiar sound is made within his hearing, the student will name the sound.

SAMPLE ITEM: The student identifies the sounds of:

1. A knock on a door
2. A ball bouncing
3. A window being closed

ANSWER: Self-evident
Objective 8

Major Category: Word Recognition - Phonetic Analysis
Sub-Category: Auditory Discrimination - General Sounds

OBJECTIVE: Given sounds in varying rhythmic patterns, the student will reproduce the sounds heard.

SAMPLE ITEM: Listen to these sounds and repeat them.

1. triangle struck four times
2. triangle struck twice, a pause, then struck twice again.

ANSWER: Self-evident
Objective 9
IOX Acceptability Rating: 1

Major Category: Word Recognition - Phonetic Analysis
Sub-Category: Auditory Discrimination - General Sounds

OBJECTIVE: After listening to sounds with varying intensity and pitch on instruments, the student will distinguish among these sounds by describing each as loud, soft, high or low.

SAMPLE ITEM: Teacher plays different notes of varying intensity on piano. Student describes each one.

ANSWER: Self-evident

1. 2. 3. 4.

ANSWER: 1, 3, 4.
Objective 12

IOX Acceptability Rating: 1

Major Category: Word Recognition: Phonetic Analysis
Sub-Category: Auditory Discrimination--Rhyming Words

OBJECTIVE: After listening to a group of words, some of which rhyme and some of which do not, the student will orally designate the rhyming and non-rhyming words.

SAMPLE ITEM: Listen to each of the following lists. After each one, state which words do not rhyme.

1. make, big, fake, take
2. fill, bill, kite, mill
3. sat, cat, tell, mat

ANSWERS:

1. big
2. kite
3. tell

**OBJECTIVE:** Given reading material of suitable difficulty and length, the student will state its main ideas, facts or concepts.  

**SAMPLE ITEM:** Read this passage and state its main facts.  

The Alaskan fur seal, a mammal who was in danger of becoming extinct and whose fur pelt sells for more than mink, has reappeared for the first time in 130 years off the California coast. This is the first time biologists have found northern fur seals breeding south of Alaska, although colonies may have occurred here prior to about 1830. The fur seal's present home is 3,000 miles away in the Bering Sea.  

An assistant professor of biology and an assistant professor of psychology have established an observation post near the colony on San Miguel Island to study its size and behavior. They are receiving support from the U.S. Fish and Wildlife Service. They will be studying the seals to find how rapidly the populations of seals grow, and what factors limit growth. They are measuring the reproductive rate, the mortality rate, the number of young born per lifetime to each female, and the breeding activities of the males.  

**ANSWER:** The Alaskan fur seal of the Bering Sea nearly became extinct. It has just reappeared in colonies off the California coast for the first time in 130 years. Two professors have established a post on San Miguel Island to study these seals. They will be measuring their factors of population growth and decline.

OBJECTIVE: Given a segment from an unfamiliar story, and a set of sentences stating what may happen next, the student will identify the sentence whose prediction appears most accurate.

SAMPLE ITEM: Read this edited segment from The Five Chinese Brothers to the class.

The First Chinese Brother could swallow the sea. Everyday he went fishing in the sea and sold his catch at the market. One day as he was leaving the market, he met a little boy who wanted to go fishing with him. The First Chinese Brother agreed with one condition—that the little boy would obey him. Next morning, the two went down to the sea to fish. The First Chinese Brother reminded the little boy of his promise to come in from the sea when told to. Next he swallowed the sea. All the fish were left high and dry at its bottom and its treasures lay uncovered. The little boy was delighted and ran everywhere stuffing his pockets with pebbles and shells. On the shore, the First Chinese Brother gathered some fish while he kept holding the sea in his mouth. He soon grew tired and signaled to the little boy to come in. The little boy paid no attention. The First Chinese Brother made great motions with his arms for the little boy to come back, but the boy ignored him. Then the First Chinese Brother felt the sea swelling inside him and made desperate gestures to call the little boy back. But the little boy made faces at him and ran even farther out. The First Chinese Brother held the sea until he thought he would burst.

Ask students to identify which of these sentences most accurately predicts the outcome of the above segment.

1. Just then, the little boy decided to obey. He came running in to shore before the sea burst from the First Chinese Brother's mouth.

2. The First Chinese Brother could hold the sea no longer. It burst from his mouth and went back into its bed. And the little boy disappeared.

3. To save the little boy, the First Chinese Brother turned his head inland to let the sea out, and it flooded the village.

ANSWER: 2
OBJECTIVE: After reading only part of a given story, the student will write one sentence predicting its outcome.

SAMPLE ITEM: Read this story. Then write one sentence telling how you think it will end.

"Magic Doors"
(from Uptown, Downtown, The Bank Street Reader, Macmillan Co.)

Johnny's mother asked him to go to the big new store at the corner. His little brother Howie wanted to come with him. So Johnny took his little brother to the big new store. There were two big doors. One door had the word IN on it. The other door had the word OUT. Johnny and Howie went to the IN door. Whish! The door opened all by itself!

Howie said, "Look at that! It's magic!"

"You are silly!" said Johnny. "It isn't magic. The new doors work by electricity." Johnny started looking for cheese for his mother. He looked for a long time until he found the cheese. But where was Howie? Johnny started to look for his little brother. He looked for him around the food and toys. But Howie was not there. Johnny ran up and down the big store. He called "Howie, where are you." He asked a man in the store, "Have you seen my little brother?" The man said no. Johnny ran to the OUT door. Whish! The door opened all by itself. Johnny ran out. He looked all around the street. But he could not find Howie. Then Johnny went back to the IN door. Whish! The door opened all by itself. Johnny looked around the store again. No Howie! Johnny was mad and sad at the same time. Just then Johnny saw Howie. The man from the store came out. He had Howie by the hand.

"Is this your little brother?" he asked.

"Oh, yes! Thanks a lot!" said Johnny. "But where did you find him?"

ANSWER: Possible answers might include:

1. Howie was hiding behind a checkout counter and no one saw him.
2. Howie was hiding in the parking lot.
3. Howie was making the doors open by themselves and he kept missing Johnny.

OBJECTIVE: Given a short story, the student will state how the main character felt at the beginning and at the end of the story.

SAMPLE ITEM: Read this story. State how the main character felt at the beginning and end of the story.

Herman was a little fly who was afraid to fly. The other flies made fun of him, but Herman would not fly.

One day, while Herman was walking along, he saw a funny-looking thing on the ground. It was just a kite, but to a fly it seemed big and strange. Herman got on the kite and walked around. Before he had time to get off, a little boy came and picked up the kite. Herman didn't know what to do! He took hold of the kite string and just hoped he would not fall off. If he could just fly! But he was afraid.

Up, up, up went the kite, high over houses and trees. After what seemed like a long, long time, the kite began to go down again.

Herman was very happy that he would soon be on the ground. Just then the kite bumped into a tree! It bumped into the tree so hard that Herman could not hold on to the kite.

Now Herman was really afraid. Down he went, faster and faster! Without thinking, Herman began to move his wings very fast.

"Why, I am flying!" said Herman. "This is not so hard to do. And I'm not afraid."

Sub-Category: Maps

OBJECTIVE: Given the assignment of drawing a map of the block and cross streets on which his home is located, the student will organize his layout with a North-South-East-West orientation, mark the position of his house, and name the streets.

SAMPLE ITEM: Draw a map of the block your home is on and the closest cross streets at each end of the block. Use N-S, E-W orientation.

ANSWER: For example:

```
     N
    /   \
   /     \_____________________
  W   E   Ocean Ave.
 /     /       \     \       \
S     S       Maple Ave.
```

OBJECTIVE: Given several graded paragraphs and a group of titles, the student will match each paragraph with its appropriate title.

SAMPLE ITEM: Read each paragraph and match it with the appropriate title.

Titles:
A. The Rusty Skates
B. The Surprise Cake
C. The Broken Kite
D. The Water-Clogged Skates
E. An Unsigned Letter

Paragraphs

(1) Jenny wanted to go outside to try her new skates. She went to the window and saw that it was raining. Jenny wanted the rain to stop. She decided to go outside and use her skates anyway. She sat on her porch and carefully put on each skate. Then she stood up and skated down the slippery street. Poor Jenny! She had only gone a few feet when the rain water clogged the wheels of her skates and she fell down. Her clothes were all wet and her skates were ruined.

(2) Jimmy wanted to make a surprise birthday cake for his mother. He got out a cookbook and looked for the section on cakes. Jimmy decided to make a chocolate cake, and followed the directions. The recipe called for one bar of chocolate. Jimmy went to the cupboard. He saw what looked like a chocolate bar. He melted it and put it in the cake. As he was mixing the cake he saw that the batter didn't turn brown. Jimmy had used cocoa butter instead of chocolate.

(3) Tom wanted to write a letter to his friend in New York. He took out a sheet of paper and carefully printed his letter. Tom told his friend about all his adventures at school. Then Tom looked for an envelope. He folded his letter and put it in the envelope and sealed the flap. Suddenly Tom started laughing. He remembered that he had forgotten to sign his name to the letter!

OBJECTIVE: Given a short story, the student will locate and list the words which identify the main characters' feelings.

SAMPLE ITEM: Read this story. Locate and list the words which identify the main characters' feelings.

Betty Jackson and John King were both in Miss Grant's class, and their birthdays came on the same day. When Betty's birthday came, her cousin Sally sent her a pen and pencil set. Betty was very much pleased with it, and the next day she took the pencil to school. When she came into the classroom she saw John showing some other children a pen and pencil set which he had received for his birthday. It was exactly like the one Betty had.

"I won't show him my pencil now," thought Betty. "I'll bring the pen to school this afternoon and show him the set. Won't he be surprised that we have sets just alike!"

During the morning John had some writing to do. He couldn't find his new pencil. He felt in all his pockets and looked in his desk, but no pencil. Suddenly, he noticed the pencil that Betty was drawing with.

"That's my pencil, Betty," said John. He held his pen beside it. "See, they match exactly."

"I know," said Betty. "I got a set just like yours for my birthday."

"Then where's the pen?" asked John.

"It's at home," Betty replied.

"I don't believe it," said John. "That's my pencil."

Betty realized that John thought she had stolen his pencil. She was all ready to cry. But by this time Miss Grant had heard what was going on.

"Now, just a minute, John," said Miss Grant. "You mustn't be in such a hurry to accuse anyone of being a thief. I've never known Betty to tell anything that wasn't true or to touch anything that didn't belong to her. Let's all look around and see whether we can find John's pencil."

At last Ann cried, "Here it is on the floor under John's desk."

When John had his pencil back, he turned to Betty and said, "I'm sorry I accused you of taking it."

Objective 306

IOX Acceptability Rating: 1

Grade 3

Major Category: Comprehension--Critical

Sub-Category: Distinguishing Fact and Opinion

OBJECTIVE: Given a reading selection, the student will identify which paragraphs contain fact and which contain opinion.

SAMPLE ITEM: Read this selection. Identify which paragraphs contain opinion and which contain fact.

(1) Far out on the sandy plains stands a huge rock. Some people call it Shiprock, because they imagine that it looks like a big ship.

(2) On a bright day, the sunlight makes the sandy plain look like a big lake with a rocky shore.

(3) The Indians who live near Shiprock call it the Winged Rock, and they tell this story of how the rock came to be there.

(4) These Indians say that long ago one of their chiefs and his people were in great danger. They were being chased by unfriendly Indians. At last they stopped on some rocky ground to rest. The unfriendly Indians came closer and closer.

(5) Suddenly, the rocky ground on which they were standing began to rise. Higher and higher it went, until the chief and his people were standing on top of a high rock.

(6) The sides of the rock were so straight that the other Indians could not climb up. Wings appeared on the rock and it sailed away with the chief and his people.

(7) The next day, the winged rock came to rest on the sandy plain. The chief and his people built new homes at the foot of the rock.

(8) If anyone says he doesn't believe it, the Indians point to the Winged Rock and say, "There stands the rock to show that our story is true."
