ACKNOWLEDGMENTS

Many people have contributed to this project. In our attempt to name everyone, we may have unintentionally left some names out.

Inquiries which gave rise to this project were begun by Dale P. Crowley, Senior Linguist at the Hilo Peace Corps Training Center, Harry C. Chuck, now Hawaii District Superintendent of Education, Elaine Kono, Hawaii District Language Arts Curriculum Specialist, and Ralph H. Kiyosaki, now Hawaii State Superintendent of Education.

Mr. Crowley designed the project and was the Principal Investigator for two years. Mr. Chuck was Project Coordinator. Arthur P. Coladarci, Associate Dean of Stanford University's School of Education, guided research methodology and data analysis. Elaine E. Sugai, Miyoko Sugano, Jean Matsumura, and David E. Marsters supervised data collection and speech proficiency ratings. Miss Sugai and Miss Sugano wrote the project lesson materials and the teacher's guide. Mr. Marsters assisted with the writing of pattern drills. The entire staff contributed to teacher training. Robert O. H. Petersen assisted with materials development the first two years of the project and served as the Principal Investigator during the final two years. The project teachers were Anna Chow, Lily Inada, Florence Kubota, and Marilyn Nishimoto. Adele Jensen was the secretary for the project and prepared all the masters for this report.

Consultants to the project were: Howard P. McKaughan, Stanley M. Tsuzaki, Charles W. Whitely, and Neil Weintraub, University of Hawaii; Robert W. Politzer, Frederick J. McDonald, and Paul V. Lorton, Jr., Stanford University; Basil Willett, Woodside (California) School District; Andrew MacLeish, Northern Illinois University; and Walter Loban, University of California.

The contrastive analysis was prepared by Gloria Glissmeyer, Teresa Cheng, Stanley Tsuzaki, and Mary Lou Huebi, all of the University of Hawaii, under the direction of Howard P. McKaughan.

Lillian Noda, Alice Fujimoto, Margaret Stearns, and Myrtle Zane administered project tests. Speech proficiency ratings were assigned by Frances de Silva, Mae N. Morita, Edward Hayashi, Ethel Yoshimasu, Nobuko Fukuda, Donna Saiki, Bessie Shindo,
Margaret Gota, Ethel Borges, Dorothy Liu, Akiko Oda, Norman Yoshida, Yuriko Aoki, Margaret Char, Kay Yamauchi, and Leila Kanno. Catherine D. Campainha assisted in teacher training.

Barbara Kim, Program Specialist in Speech Education for the Hawaii State Department of Education, Elaine Kono, Hawaii District Language Arts Curriculum Specialist, Mae N. Morita, Hawaii District Elementary Education Curriculum Specialist, and Shiho Nunes, Associate Director of the Hawaii Curriculum Center, have given the project staff much valuable advice and encouragement.

Robert Hirano and Arthur Leithead, present and past Principals at Keaukaha School, and the school faculty assisted the project in many ways. Violet Henry, Principal of Haaheo Elementary School, Peter Kawahara, Principal of Honokohau Elementary School, and their faculties graciously allowed the project staff to test materials in their classrooms.

The project is grateful for the interest shown by the Hawaiian Homes Commission and their generous contribution of funds in support of project research.

I. TEACHER'S GUIDE

The oral language lessons that are part of this manual were developed and field-tested on kindergarten through third grade children at Keaukaha Elementary School, Hilo, Hawaii.

A. Underlying Assumptions

1. General Assumptions:
   a. Hawaii Islands Dialect (HID) is a respectable, useful tool of communication for its speakers. But because it has a limited range of coverage and usefulness in terms of educational, social, and economic considerations, those who speak HID exclusively need to learn to speak Standard English (SE) as well.
   b. Because instruction in our schools is done in SE and those students who are not familiar with or have not developed some facility with SE are at a distinct disadvantage, early education of these students must focus on the development of skills in the use of SE.
   c. Oral language development precedes and facilitates development in reading and writing. Mere "talking" activities will not suffice to develop skill in oral language use.
   d. Young children in the early elementary grades, because of their love of mimicry and their desire to please the interested adult, are receptive to structured oral language lessons as developed.
   e. The divergence in language usage from SE should be dealt with in terms of contrasts in dialects rather than in terms of correction through remediation. Because HID speakers are native speakers of English, they need to have intensive training and practice in certain, rather than all, SE grammatical and phonological structures of high-frequency occurrence which are either absent from or used differently in HID.
   f. Focusing on a few targets at a time, furthermore, makes learning more efficient and more effective.
   g. Audio-lingual training is the basis for further language development and for this reason exercises need to revolve around speaker-listener situations.
   h. Oral language practice is more meaningful when done in groups since the group situation provides the child with opportunities to listen to and speak with an adult model and his peers and bring into play non-verbal communication behavior - posture, gesture, expression - which are important, natural components of oral communication behavior.
The teacher who uses these lesson materials is one who has been provided with training in understanding the more basic principles of linguistics and language learning of young children directly relevant to these lessons, the essential contrasts between HID and SE, and with training and demonstration in using relevant second-language teaching methods and techniques.

2. Basic Assumptions About the Teacher:

Successful oral language teaching presupposes that the teacher has the qualities that are shared by all effective teachers: interest in and understanding of the interests, needs, capabilities (maturational level, attention span, etc.) of her children and can anticipate possible problems; patience so that when her students stumble, hesitate and need repeated and varied practice, she provides the time and help necessary; and perception, resourcefulness, and flexibility which enable her to create and seize opportunities for learning and reinforcement and readily adapt the conditions and materials to meet the children's needs. She is one who is aware of her own areas of weakness and tries to improve and/or compensate for this.

Above and beyond this, the teacher serves as a good listener and a SE speaker. She listens to the children and herself; she attends to and cares about what is being said and how it is being said. Her attitude toward usage and pronunciation is neither puristic nor "anything goes." Her attitude toward the dialect spoken by the children is not one of scorn but respect. Her intention is not to eradicate the dialect but to add to the children's store of language skills.

Her entire language use is the model - the verbal as well as the non-verbal behavior. She sets the example for her students to mimic consciously and unconsciously. She is the center - the initiator and guide - of language learning activities.

Finally, she is one who has been and is being provided with training and demonstrations necessary for effective presentation and follow-through.

B. Project Lessons

1. Lesson Goals:
   a. An understanding of the responsible roles speakers and listeners play in communicating ideas and feelings and in establishing social contact.
b. A realization that there is another variety of English (SE) and that this variety is appropriate for more formal situations such as the classroom, as opposed to less formal situations such as the playground where HID is appropriate and expected.

c. A progressive control and some degree of mastery of the structural and phonological targets used in meaningful and appropriate context - both conventional formulas of greetings, polite forms of request, and ways of exchanging information.

d. A degree of skill in generalizing and applying learned responses whenever appropriate in as many situations as possible; i.e., internalization of these language skills. Progress toward a kind of automatic control of these features of language that enables the child to manipulate them with some facility and accuracy when the need arises.

e. A growing confidence in speaking SE.

2. General Design of the Lessons:

These lessons were written for kindergarten through third grade children to be presented for approximately 30 minutes per day (for either two 15-minute or three 10-minute language sessions) in classes averaging about 25 students.

The initial language sessions, covering a period of about a month, revolve around the structure lessons alone without the phonology lessons. After five or seven structure lessons have been completed, the phonology lessons and the structure lessons are taught together at each language session. (Refer to the "Sequence of Phonology Lessons.") When the time comes for the two types of lessons to be presented together, the initial portion of the phonology lesson, Part I, (the first time the target sound is introduced), is presented before the structure lesson is introduced; however, the initial portion of the grammar-based phonology lessons on /-s, -z/ - noun plural finals, third person singular verb finals, and noun possessive finals, and on /-t, -d/ - past tense verb finals, are presented after the presentation of the dialogue of those structure lessons. After the initial presentation, the other portions of the phonology lessons are presented either before or after the other presentations of that particular structure lesson.

The structure lessons (one set for each grade) are sequenced in target presentation in that particular targets are presented a few at a time (per lesson) and each succeeding lesson, while focusing on particular targets, gives additional practice for previously presented
targets. The phonology lessons, on the other hand, are not sequenced in this manner. Such a sequence was not possible because of the difficulty in avoiding the use of sounds not yet mastered by the children, the same set of lessons serves all grade levels, the phonology lessons accompany different structure lessons per grade level, and because of the need to afford the teacher some flexibility in using the phonology lessons - with the exception of the grammar-based lessons - whenever she so chose. However, sequencing, in terms of focusing on a target at a time and in terms of holding the children responsible for previously learned targets is maintained.

C. Preparation

1. Classroom Environment:

   The classroom in which the language lessons are presented must have an atmosphere that is conducive to attentive listening and speaking.

   If the classroom atmosphere is one of congeniality and freedom, the student will find it easier to imitate and exaggerate the sounds which seem peculiar to him. Strain or an ill-at-ease feeling prevents development of the flexibility which is essential in learning new patterns of sound and structure.¹

   To the extent that she can exercise control over time and place, the teacher should try to carry on the language sessions when and where disruptions will be minimal; e.g., she may wish to avoid periods just before and after recess and lunch because they may be peak periods of excitability and/or restlessness. She should feel free to carry on the language session at different times of the day as she deems necessary and suitable.

   The teacher should arrange the seating with the following in mind:

a. The ease with which the teacher can move around the room to each child to ensure attentiveness and accuracy in responding.

b. The ease with which each child can hear the teacher and his peers.

c. As the activities progress, the need for the weaker students to be seated near the abler ones who will be additional sources of good models.

2. Teaching Aids:

Whenever possible, the teacher can use appropriate audio-visual aids with appropriate cues to implement and enhance learning, always making sure that they never distract the students nor detract from the aims of the lessons. Examples and detailed explanations of the possible aids are found in a separate section, "Audio-Visual Aids."

3. Pupil Preparation:

At the outset and throughout the entire language session, the children need to understand and learn the following:

a. Any oral communication requires attentive, active listening to the speaker, whoever he may be, and clear, sufficiently loud and natural speaking to enable the listener to understand what is being said and to respond accordingly. The children should be led to understand that when communication breaks down the fault may lie with the speaker or the listener or both.

b. The basic ground rules under which to operate, i.e., what they may and may not do, must be explained clearly and emphatically. Where reasons for the rules can be explained, this should be done to ensure the full co-operation of the children. These rules once set, must be consistently, constantly, and fairly maintained for more efficient use of time and for more productive sessions. The ground rules should include the following among others:

1) Being attentive and alert, listening for a modeled utterance to be completed before responding, and responding as an individual or as part of the group as signaled by the teacher.

2) Responding in a natural, conversational manner at the normal rapid rate of speech.

3) Behaving with respect for others. Showing this through attentive listening and making allowances for mistakes and the need for correction.

However, the most effective learning takes place as a
result of seeing the teacher exemplify the qualities mentioned above.

c. The kinds of activities they will participate in and the ways in which they will respond need to be carefully explained and repeated as needed. The teacher can refer to these activities (role-playing in dialogues, etc.) by name or by hand signals so that only brief and simple signals (verbal and/or visual) need to be used to identify the activity and the required response. For example, for choral repetition, after the teacher models the utterance, she makes a circular motion with one hand or both; for individual repetition, after modeling, she points to an individual so that he alone responds while the rest listen.

D. Presentation

1. Essentials of SE Pronunciation:

As a model and as a teacher of SE pronunciation, the teacher needs to determine what does and what does not constitute standard pronunciation. To arrive at a set of criteria, it is useful to consider the categories and explanations furnished by Robert Politzer as guidelines:

\[ \text{Sociological criteria:} \]
Sociological criteria would be based on the simple recognition that for some strange and often undefinable reasons certain pronunciations are associated with ignorance and are considered substandard while others are not. . . . For purely practical reasons, the teacher of standard English is undoubtedly forced to take into consideration these linguistically rather arbitrary dicta of society. At the same time, however, he must realize that they are arbitrary and not make the old mistake of teaching that standard English is defined by the speaker's avoidance of certain socially unacceptable pronunciations. (p. 8)

---

Phonemic criteria:

Phonemic criteria for establishing standard English would attempt to avoid pronunciations which would, by introducing additional homonyms into standard speech, create problems and misunderstanding in general communication or in reading instruction. (p. 8)

Grammatical criteria:

... a pronunciation must be considered a substandard (and conversely an alternate standard pronunciation must be taught) if it interferes with the possibility of using standard grammar. ... There are various substandard pronunciations which make it impossible to use standard grammar. Principally, these substandard pronunciations consist in the dissolution or complete effacement of final consonants or consonantal clusters, on which much of English grammar depends; e.g., final -s as plural sign or a sign of the possessive or the third person singular; -ed as a sign of the past tense or the past participle. The failure to produce the significant markers of tense or person can hardly be considered a 'surface difference' between standard and dialect and a minimal pronunciation requirement for standard English must necessarily include an adequate pronunciation of final consonants and consonant groups of grammatical significance. (p. 9)

Standard English, like other dialects as well as other languages, has intonation patterns, rhythm patterns, and sounds peculiar to itself. As the principal model and evaluator of SE pronunciation, the teacher of oral language must be aware of some of the essential features that constitute the intonation, rhythm, and sounds of SE; i.e., those acoustical cues that aid in communicating with an SE speaker.

a. Intonation: the sequences of pitch levels and the changes in these levels within an utterance.
Commonly used intonation patterns:

1) The falling intonation:

The falling intonation refers to the pattern that involves the raising of the pitch above the normal level and the lowering of the pitch below the normal level. Frequently the pitch is high on the last stressed syllable or word in the sentence after which the voice glides to the low pitch level and fades quickly away. When the shift from one pitch to another occurs in a one-syllable word, the vowel is prolonged and the voice glides from one pitch level to the next within that word.

a) This pattern is commonly used at the end of statements:

   e.g. My dog's barking.

b) It is also sometimes used in giving commands or making requests:

   e.g. Take this to John.

c) It is also used at the end of questions, especially those that are not answerable by yes or no -- usually those that contain question words such as what, where, who, which, when, how, and why:

   e.g. What's your dog doing?

Note: Since there are questions in English with the same intonation as that of statements, it is important that the children be helped to focus on the signal at the beginning that tells that a question is being asked as well as what his reply should be based on.

* Pitch levels: 1: high, usual stressed tone
   2: normal tone
   3: low, final tone

A vertical line indicates that the pitch changes between syllables. A diagonal or sloping line indicates that the pitch changes within a syllable. A break in the horizontal line indicates a sustained pitch with lessening of volume. An arrow indicates the direction the pitch -- rise or fall -- takes before fading.
2) The rising intonation:
The rising intonation refers to the pattern which involves the shift from the normal pitch level to the high pitch level after which the voice quickly fades away. Again, when the transition from one pitch to another is confined to a one-syllable word, the vowel is prolonged and the voice glides from one pitch level to the next within that word.

a) This pattern is commonly used at the end of questions, having no interrogative word, ordinarily answered by yes or no:

   e.g., "Is your brother hungry?"

Note: Too frequent use of the rising intonation on questions should be avoided since it could create the impression of artificiality or insincerity.

b) This pattern is also used in a series of words or phrases on all members of the series except the last and in series of choices on all members of the series except the last:

   e.g., "I want an apple, a mango, and an orange."

   "Do you want an apple or a mango?"

Special Note on Intonation of Tag Questions:
(1) The falling intonation on the tag question: This pattern indicates that the speaker is not asking for information but is merely "making conversation" and/or asking the listener to confirm his impression.

   e.g., "That book is interesting, isn't it?"

(2) The rising intonation on the tag question: This pattern usually indicates that the speaker is asking for information.

   e.g., "That book is interesting, isn't it?"
Possible method for aiding children in recognizing intonation pattern:

If the children have difficulty in producing the appropriate intonation pattern, it might help to hum or "la-la" the change in pitches:

\[ \text{e.g., } \overline{\text{la}} \overline{\text{la}} \overline{\text{la}}. \]

b. Rhythm:

The regular recurrence of groups of syllables with one stressed syllable in a group. The essential components of SE rhythm include (a) grouping of words into phrases and pronouncing these phrases as a unit; i.e., making smooth transitions between sounds within such groups; and (b) giving sufficient loudness to stressed syllables and words and weakening unstressed syllables and words within such a group.

1) Grouping:

The speaker's idea and intention determine the specific grouping of words; however, established usage does not allow the speaker to separate words that are closely related in meaning or grammar. ("To separate words" refers to making a slight pause between words.) The sentence "My mother told me to read it," contains three such groups - "my mother," "told me," and "to read it"; but in actual pronunciation of the sentence, it would be more natural to group it as either "My mother told me/ to read it," or "My mother/ told me to read it."

Each such group should be pronounced as a unit. When such a phrase contains a sequence in which a final consonant of a word is immediately followed by an initial vowel of another word, the final consonant of the preceding word tends to become the initial consonant of the following word in normal rapid speech. This is referred to by some as phonetic syllabication. For example, in the sentence cited above the phrase "to read it" (/tɔ riyd it/) is actually rendered /tə riyd dit/.

Careful attention to details such as phonetic syllabication will help in the production of more natural SE rhythm because the rhythm pattern would give the listener the impression of a smooth flow of syllables within such phrases.
2) Stressing and Unstressing:
SE rhythm requires that there be marked difference between what is stressed and what is unstressed. For this reason, the stressed syllables should be noticeably louder than the unstressed syllables. This applies to stress in a word and in a sentence.

Stressing:
- **Word stress**: There are many patterns of word stress. A few words have more than one acceptable stress pattern: some change their stress patterns according to the function they serve in a particular sentence.
- **Sentence stress**: Sentence stress as well as degree of stress is determined by the meaning intended by the speaker. Because they usually carry the idea of a sentence, verbs, adverbs, adjectives, demonstratives, and interrogatives are usually stressed.

Unstressing:
Unstressing plays an equally important role with stressing in the rhythm pattern of SE. The vowels in unstressed position tend to be so weak that their quality is frequently indistinct. The schwa /ə/ is the most important vowel in English unstressing. Moreover, because unstressed syllables and words are said so rapidly, they are usually of very short duration.

Certain parts of speech such as determiners, prepositions, personal pronouns, conjunctions, and verb forms used as auxiliaries or helping verbs are usually unstressed. And some of these words have more than one unstressed form, depending on their environment; e.g., the:
- **i)** May be pronounced /ði/ before a vowel: e.g., "the apple"
- **ii)** May be pronounced /ðə/ before a consonant: e.g., "the man"

---

Using unstressed forms is not a sign of carelessness or sloppiness but, on the contrary, is a definite requirement of SE rhythm. Regarding the contrast between the rhythm of SE and that of HID, Gordon and Wong states:

Stress-timed rhythm is an important aspect of spoken English. . . . Pidgin English rhythm, as found in Hawaii is . . . syllable-timed and has the typical staccato quality. 4

To counteract the tendency toward staccato rhythm, the teacher must make a concerted and consistent effort to have the children group words into phrases and pronounce them as single units and to raise the pitch level high on the stressed syllables and lower it on the unstressed syllables.

Possible method for aiding children in recognizing rhythm groups:
If the children have difficulty in producing the appropriate intonation pattern, it might help to tap out the termination of each group of words with a pencil, using the normal rapid rate as the sentence is being modeled and as the children repeat.

C. Pronunciation of Sounds:
Accuracy in pronouncing the sounds of SE is important in differentiating sounds; e.g., between "pen" and "pan." (Since particular sounds which cause most difficulty to the children are treated in the phonology lessons, only those areas that are not specifically covered by the lessons are discussed here.)

Accuracy in pronunciation of a sound does not mean that a particular sound is articulated (pronounced) in just one way regardless of where it occurs in a stream of utterance. A sound is pronounced in a certain way according to its linguistic environment - whether it occurs in initial, medial, or final position; whether it occurs in stressed or unstressed position; whether it occurs before or after certain vowels and consonants.

4 Ibid., p. 25.
The following is an example:

/p/, /t/, and /k/ are aspirated (exploded with a puff of air) when they occur immediately preceding a stressed vowel as in "pin," "tin," and "kin." They are not usually aspirated when they occur in other positions. The pedagogical significance of this is in treating one of these sounds in isolation, the teacher would have to take environmental conditioning into consideration.

**Special Note on Pronunciation of /t/ between Vowels:**

In words such as "letter, better, water, butter, pretty, city, eating, sitting," and phrases such as "let her, write it, get it, eat it, got a lot," it is highly recommended that the "flapped t" pronunciation of /t/ be used. To produce the "flapped t," the tongue, instead of deliberately moving up and touching the upper gumridge, flicks rapidly against the upper gumridge or flicks it as it passes rapidly by.

Aside from the considerations to be noted for pronouncing individual sounds in particular environments, there is the consideration of pronouncing certain consonants when they are syllabic.

**Special Note on Syllabic Consonants:**

Some consonants in unstressed positions are often syllabic; i.e., the consonant itself is the center of a syllable or it is a syllable in itself where the vowel which precedes it is omitted.

Two of the consonants most frequently pronounced as syllabic consonants are /l/ and /n/. /l/ and /n/ may become syllabic when they have a common point of articulation with the preceding consonant; i.e., the placement of the tongue in producing the sound. Since /t/, /d/, /n/, and /l/ all have tongue tip contact on the upper gumridge, it is possible to pronounce /n/ and /l/ as syllabic. The tongue tip is left on the upper gumridge after articulating /t/, /d/, or /n/ and before pronouncing /l/ or /n/. If the tongue tip is removed before pronouncing /l/ or /n/, an extra vowel will be heard.

Below are a few examples of contrasts between two pronunciations of a number of words:

Using syllabic consonants is not a sign of carelessness or sloppiness. It is highly recommended that they be used wherever normal rapid SE pronunciation calls for such use.

Thus, good pronunciation requires that SE intonation, rhythm, and sounds be rendered. Notions about clarity of articulation and ease of hearing should not lead to distortions of any one of these elements. Slowing down the rate of speech, exaggeration of stress or of individual sounds sometimes are made necessary and/or inevitable by the demands of teaching; i.e., in modeling or in correcting; but any such action should be immediately followed by normal rapid pronunciation of that particular utterance.

2. Audio-Lingual Methods:

   a. General Considerations:

   Efficiency depends a great deal on the number of responses which the students make during a given time. The time should not be consumed by silence, hesitancy, or faltering which often indicates lack of understanding of the required response, lengthy explanations or directions or other forms of "teacher talk," and/or inattentiveness.

   A brisk pace throughout the language session would help to maintain attentiveness and interest, keep boredom at a minimum, and result in more efficient use of time. Briskness of pace does not mean that an utterance is given at a speeded-up, unnatural rate; it does mean there should be little or no hesitancy or fumbling on the part of the teacher or the children. Because the teacher is well-prepared and her students know how to respond, she moves quickly from directions to examples, from modeling to response, from response of one child to another, and from choral to individual response, etc.

   Time spent during the language session, however, should be balanced along with productivity and quality of productivity. Time
spent motivating the children is well spent. Abrupt, mechanical leaps into activities will take the children unaware and unprepared and will require more time and effort in the long run to gain and maintain interest and lively participation. Whenever she can re-create normal oral communication situations of face-to-face or telephone conversations between friends, between parent and child, between a storekeeper and a customer ordering something, etc., she should do so. Such situations would tend to approach meaningful situations for language practice and also help to make it more natural for appropriate non-verbal communication behavior to come into play.

As she moves quickly from one activity to another, the teacher should be sure that she has given clear-cut signals as to when the previous activity is completed and a new activity is about to begin. Each shift or change in activity and steps in the activity should be made smoothly and unambiguously by means of some kind of transitional device, perhaps like "You did very well. Now let's try this." In the early stages of the sessions, the children may have to be reminded about changes, but as they become accustomed to interpreting signals, more can be done in less time.

The time to proceed to a new type of drill, or lesson is when the majority of the children have gained a reasonable mastery of the targets given after all the items in the exercise or lesson have been completed. The children should have been given ample opportunity to acquire the materials being taught - a few repetitions do not mean that the materials have been automatically incorporated into the child's repertoire. However, prolonging repetitions of the same exercise or the lesson can lead to mechanical mouthing of words. If the children need more practice, more items conforming to the pattern being practiced should be added and/or new situations created because they want to feel they are progressing from one step to another, from one level to another.

One of the most difficult tasks the teacher of these lessons has to face is the development of sound judgment as to when "reasonable mastery" has been achieved. This is especially true in teaching SE as a second dialect since initial presentation and practice may offer a superficial picture of the children's difficulty or facility. Only thoroughness of treatment and the development of a relevant standard of achievement will aid the teacher in making a sound evaluation. "Reasonable mastery" should take into account the readiness and the capabilities of individual children, the strength of interfer-
ence from HID, among other things; it should not be thought of as "complete mastery" which will take place only after constant normal use stretching over a long period of time.

b. Presentation Techniques:

1) Modeling:
Modeling is the practice of the teacher saying first that which the children imitate for the purpose of giving them an accurate example. Natural, conversational SE intonation, rhythm, stress, and pronunciation of sounds should be consistently maintained. Regardless of whether the modeled utterance is for phonology or the structure lesson, naturalness of the utterances should always be strived for. The teacher will have to guard against allowing the need for stressing certain sound and certain structural features to distort the naturalness of the utterance.

Because the number of syllables that can be retained by the ear is small, the children may stumble over certain "long" sentences. One second-language teaching method used to deal with the problem without distorting the natural rhythm and intonation of the sentence is the "backward-buildup" method. The difficult sentence is separated into short, natural segments, building from the end of the sentence to the beginning. For example, the sentence, "The teacher wanted me to clean the room," can be handled in this manner:

Teacher: Listen to this sentence: 'The teacher wanted me to clean the room.'
Repeat this: 'to clean the room.'
Child: To clean the room.
Teacher: Wanted me to clean the room.
Child: Wanted me to clean the room.
Teacher: The teacher wanted me to clean the room.
Child: The teacher wanted me to clean the room.

Cautionary Note on using "backward-buildup" method:
The segments must be structurally possible and natural and at the same time should not violate the aim of a particular exercise.
Examples:
If the children have difficulty contracting the auxiliary "is" in the following sentence: "A man's singing in the shower," it would be erroneous and misleading to segment the sentence into "a man's" and "singing in the shower." Not only will this practice mislead the children about the
grammatical structure, it may reinforce some children's notion that "man's" is the plural form of "man."

In the phonology lessons on the grammar-based final consonant final /-s/, a number of sentences have the words with the final consonant target sounds in sentence medial position to facilitate practice. If such sentences are segmented at the end of words with such target sounds, the exercise will lose much of its value. For example, if the target was noun plural consonant final /-z/ and the sentence the children had difficulty with was: "I see the ships in the ocean," it would be grammatically possible to separate the prepositional phrase from "ships"; however, because, for the purposes of the phonology target practice, the phrase should be spoken without pause after "ships," the segment would have to be "the ships in the ocean," and then, "I see the ships in the ocean."

2) Responses:
In handling responses, the teacher should (a) speak in a natural manner at a normal rapid rate, using appropriate expression and posture, and (b) indicate by some signal when the children are to respond.

Although it is in keeping with the need for brisk pacing to require quick responses, the children must be allowed sufficient time when they must do more than repeat a given utterance, to think and decide. Other children should not call out responses unless they are asked specifically to help the child. If a child is having difficulty starting his response, the teacher can prompt him as long as she guards against the child's becoming dependent to the extent that he rarely takes the initiative to practice and learn.

To maintain interest, the teacher can help the children gain some sense of achievement by asking a child to help another, to help the teacher by carrying out some task like holding up the cue cards, etc. To maintain attentiveness, the teacher should:

a) Call on the children in a random fashion - not down the row or in any such pre-arranged and fixed order that encourages a child to "tune-off" until his turn comes.

b) Give the cue or stimulus to the class before indicating the type of response (choral or individual) to be made and the person or group that will make the response.
c) Shift from choral to individual responses at random.

d) Have the attention of every student whether she is working with an individual or group.

**Choral and Individual Responses:**

**Choral Responses:**
In conducting choral responses, the teacher should guard against:

i) The children repeating along with the teacher. The children should listen to the entire utterance and wait for their turn to respond.

ii) Accepting a monotone or chant or dragged-out tempo. The children should be asked to repeat the utterance in a natural manner whenever they distort the rhythm, intonation, and stress of an utterance. Not only is such practice unnatural but it quickly becomes a habit that is difficult to break without persistent re-training.

**Individual Responses:**
The teacher should have a pattern of asking for responses that would minimize the chances of a child's making mistakes. Abler students should be called on before those having difficulties. This will enable the weaker students to have added practice and examples before having to produce the utterance themselves.

The teacher should guard against the temptation to rely too heavily on abler students, however. This practice usually results in insufficient practice for those denied an opportunity to respond and inevitably in loss of interest.

In handling volunteers there are a number of factors to consider. Volunteers should be called on often enough so as not to discourage volunteering. The use of volunteers, especially the abler ones, can be very useful especially when the pace is slackening. However, excessive use can lead to the teacher's losing control of the class because of a few volunteers' monopolizing the practice time and making it difficult for others to get involved. This practice can also lead the teacher to make an erroneous evaluation as to the progress being made by the class as a whole.
Note on Exclusive or Excessive Reliance on Either Individual or Choral Responses:
A balance should be kept between choral and individual responses in any given language session. Heavy reliance on only one type of response will cause, aside from monotony, several other problems.

Choral Responses Alone:
Too much reliance on choral responses tends to mask individual errors and cause some students to slacken participation since they know they would not be called on. Those who are making errors will not be aware that they are doing so and will be merely repeating and practicing their errors. The children will tend to merely mouth words without thinking - an easy step to hypnotic chanting and droning.

Individual Responses Alone:
Excessive reliance on individual responses does not enable the weaker or shyer child an opportunity to gain confidence and added practice in speaking as part of a group and of following the lead of the abler students.

Handling Correct and Appropriate Responses and Incorrect and Inappropriate Responses:
It is essential that the teacher be so prepared and confident of her lesson presentation that she is able to devote the necessary attention to what the children are saying and how they are speaking. If she is not totally aware of the responses being made, she cannot discriminate between the correct and appropriate response and the incorrect and inappropriate response and therefore cannot handle the responses adequately and justly.

In handling responses, it is vital that individual differences be considered:

To hold all students responsible for the same standard is an impossibility in something as unpredictable as imitative ability. The teacher needs to discover the utmost capacity of each student in this regard and hold him responsible for that capacity. This will provide a goal for each individual which will not be beyond his reach. 5

5 Lado and Fries, Loc. cit.
Correct and Appropriate Responses:

It is important that the children be given a clear signal that the response is correct and appropriate. This reward of a word, gesture, or smile should be given immediately after the response. If the reward is not immediate or if there is hesitancy or lack of response, the child as well as the class may think that the response was not acceptable or that the teacher is not interested.

The correct and appropriate response is not necessarily the response given in the lesson. Our language allows a variety of responses to suit the same situation, some of which are just as appropriate as others. For this reason, if the child gives a response that is equally acceptable, this should be pointed out to him and to the rest of the class. However, if the child has not used the target in his response and since he needs that practice, he should be asked to give the other way of responding without being made to feel that his original response was inappropriate.

One way of handling this would be to say, "That's good. You've shown us another way to say the same thing (to answer the question). Now, would you say it the way we've been practicing so that you can learn more ways of saying the same thing?" Comments such as this will help to instill the idea that our language allows us a choice and these comments will further help to maintain motivation.

There may be a number of occasions when an appropriate response needs to be repeated by the same child because it was not said loudly or clearly enough or because it is to serve as a model for others to repeat. In asking for a repetition from the same child, the teacher should use a simple explanation for the request. Some children think that being asked to repeat indicates that the response is unacceptable, especially if the request is accompanied by a frown or a look of puzzlement.

Incorrect and Inappropriate Responses:

The children need to have an immediate, unambiguous sign that the response is not acceptable because it is either incorrect in that it does not conform to SE usage and/or pronunciation or because it is an inappropriate response to the particular question or exercise. The incorrect or inappropriate responses will generally fall into the
following categories:

i) Dialect version of usage or pronunciation.

ii) Ungrammatical or, in terms of pronunciation, misleading or incomprehensible because of substitution or omission of certain sounds.

iii) Inappropriateness in word use or choice - which in some cases is a matter of subtle idiomatic use.

If the response comes from a group, the teacher can model the desired response and have it repeated.

(Note: An incorrect or inappropriate response from the entire group may indicate that something other than the group may be at fault. It may be due to imprecision of the directions, lack of adequate explanation and examples, among other things.)

If it comes from an individual child, the desired response can be quickly provided by the teacher, another (abler) child or the whole group. The child can then repeat the corrected response.

However, because these responses may be undesirable for a number of reasons, the teacher should have clearly defined verbal cues to differentiate among the categories. The following examples are proposed as a guideline to possible ways in redirecting the responses:

i) Dialect version:
Child: He playin' outside.
Teacher: When we're 'talking this way,' let's say: 'He's playing outside.'

(If the difference is not clear to the child, say both sentences - the dialect version and the SE utterance - one after each other to check if the child is able to discriminate between the two; then, model the SE utterance and have him repeat it.)

ii) Ungrammatical:
Child: He are playing outside.
Teacher: Let's say: 'He's playing outside.'

iii) Inappropriate:
(a) Teacher: What do we write with?
Child: A bicycle.
Teacher: Listen to the question again: 'What do we write with?'

(b) Child: Does a boy have an apple?
Teacher: Let's change that a little and say: 'Does the boy have an apple?'
(c) Child: I'm going to home.
Teacher: Let's change that a little and say:
'I'm going home.'

As much as possible the child should not be embar-
rassed by frequent reprimands or by having to make
several repeated, unsuccessful attempts at responding.
The amount of time the teacher will spend and the ap-
proach used in correction will depend on the situation and
the child; for example, the child may be interested but
shy, or the rest of the class may be getting restless and
inattentive. Whenever a child is corrected, he should be
given another opportunity at some later time during the
same session to make the same or similar response
correctly.

There may be occasions when the incorrect or inap-
propriate response is given even after a number of at-
ttempts at correction, especially because of the strength
of interference from HID. When this occurs, it may be
sensible and economical for the teacher to move on to the
next utterance or activity and return to the uncorrected
response at some later time. When such an occasion oc-
curs, it should be made clear to the children that the
response was not adequate and will be taken up later.

E. Integration With the Rest of the Curriculum

Whenever and wherever possible, the oral language activities
should be integrated with the rest of the curriculum in order to make
the children aware of the relevancy and usefulness of the language
activities. This can be done either by tapping subject matter sources
for practice material or by incorporating targets into the teaching of
other subject matter areas.
II. AUDIO-VISUAL AIDS

1. Pictures
Pictures in a picture file, indexed, cross-referenced, and keyed to the language activities to be used, will help not only to give the children more meaningful and interesting variation of cues but also to make for more efficient use of time. Three kinds of pictures are useful for both the phonology and structure lessons:

a. Pictures of individual persons and objects.
b. Pictures of situations in which persons are doing something (with or without objects) and in which the relationships of objects and/or people can be clearly seen.
c. A series of pictures on a chart. (A chart with pockets can be readily adapted to handle a variety of pictures and can be used for individual drill when needed.)

Examples of useful sets of pictures:
   a. for use with determiners "a/an."
   b. for use with count and mass nouns.
   c. for use with singular and plural nouns.
   d. for use with minimal pairs in discrimination and production exercises.

Appropriateness:

a. The picture, whether it is an actual drawing or a magazine cutout or drawings on the board, must be large enough to be seen by every child in the class. (Smaller ones can be used for individualized instruction.) It should be clear, simple, and unambiguous.
b. It should represent something that is familiar to the children so that valuable time need not be spent with a new (added) learning task of what the picture represents.
c. The picture should be relevant to the purpose; i.e., it lends itself naturally to eliciting the desired response immediately and with little prompting. For example, if a child is shown a picture of a boy jumping rope and is directed to ask a question about what the boy is doing, using "does" to begin the question, the child would more than likely find it natural to use the progressive form of the verb and say, "Is the boy jumping rope?" When the response is unexpected, it could be that the verbal cue was misleading, but it could also be that the picture was inappropriate.

23
Use of the pictures:

a. It is important that exact and simple directions be given as to how the pictures are going to be used.

b. It is important that the directions and questions actually elicit not only the structures and pronunciation that are desirable but are meaningful, possible SE responses. Regarding the example given in "c" above, if the child had said "Does the boy jump rope?" he would have fulfilled the requirements set by the teacher but his sentence would be meaningless through no fault of his own.

c. A sweeping movement of the hand over the entire picture helps the children realize that the entire picture is the cue, not only the small portion that the teacher happens to be pointing to.

2. Objects

Various objects collected in a box can provide visual as well as kinesthetic experience to enhance language activities. Toy animals, balls of different sizes, paper flowers, containers of cereal, rice, milk, etc., can be utilized for various activities. For example, objects of different sizes can help the children with the comparative-superlative target distinctions; milk cartons, juice cans, etc., can give meaning to practice in mass nouns and their counters, and toys like a ship and a sheep can give added meaning for practice with phonology lessons on minimal pairs.

Felt figures:

Felt figures on a board can be manipulated by the children while practicing various language targets. For example, the children can remove or place pieces that resemble the "character's" belongings while practicing the use of the possessive nouns. They can also be used to differentiate various characters when necessary to some of the phonology sentence production exercises.

3. Puppets

Stick or paper-bag puppets or inexpensive commercial finger and hand puppets are excellent means of not only adding interest and variety to the language session but in helping to minimize self-consciousness of the shy child since the puppet can "speak" for the child. These puppets can be used as a means of introducing particular activities; i.e., certain puppets signal discrimination exercises, or can be characters that take part in the dialogues.

When used properly, the puppets can help to motivate the chil-
dren and also soften the sting of making mistakes. Proper use requires that the puppet be held up facing the listener. The teacher can introduce puppets used as "speakers" in the following manner: The teacher can say, "Listen to what my puppet (preferably using the name of the puppet) can say," and turns to a child and says, "Can your puppet say the same thing?" Thereafter the teacher lets her puppet talk to the child's puppet.

4. Flash cards

Flash cards can be used by the teacher or children for cuing or responding. Flash cards, made beforehand with numbers or different colors, can be used to indicate mass class response to cues; thus enabling the teacher to get immediate feedback as to the degree of accomplishment, etc. These are especially useful in discrimination sections of the phonology lessons.

5. Tapes

For the class:

Tapes can be used to provide a number of opportunities for the class, a group of children, or individual children. These tapes can provide other model speakers (male as well as female voices, child as well as adult voices) for variety as well as a means of freeing the teacher to move around the room to listen to responses from individual children carrying on a drill with the taped speaker. Many parts of the lessons as well as poems can be put on tape. Taped models have a distinct advantage in that the same intonation, rhythm and stress can be maintained in repeated sentences.

For the teacher's own use:

The teacher could use the tape as a means of practicing before presentation to the class.

There is, however, a problem that the teacher should be aware of. This is the problem of the possibility that certain sounds and certain contrasts may not adequately be captured on tape.
III. PHONEMIC SYMBOLS

IV. PHONOLOGY LESSON SECTION
INTRODUCTION TO PHONOLOGY LESSONS

The phonology lessons that follow are intended for HID speakers who require intensive practice in learning to recognize and discriminate and to produce certain SE sounds that are either missing from their repertoire entirely, or in regard to position in words, or are not clearly distinguishable from other sounds.

The sounds selected as targets of the lessons are: vowel sounds /i/ in contrast with /iy/, /e/ in contrast with /æ/, /ɔ/ in contrast with /a/, /u/ in contrast with /uw/; consonant sounds /d/ in contrast with /d/, /θ/ in contrast with /t/; and final consonant and final consonant cluster /-s, -z/ as noun plural, noun possessive, and third person singular verb signs, and /-t, -d/ as signs of the past tense.*

Since individual sounds in speech are rarely used in isolation, but are almost always pronounced with other sounds in an utterance and are often modified by surrounding sounds, the target sounds are presented and practiced within the context of words. Moreover, because the difficulty of recognizing and pronouncing these sounds may depend on their positions in words (initial, medial, and final), the words to be practiced have target sounds in these positions whenever possible. The words with the target sounds, furthermore, are presented in larger contexts of phrases and sentences so that the target sounds can be practiced in different, more meaningful environments.

The use of contrasts plays an important role in the lessons for a number of reasons, among which are:

1) minimal pairs (words in isolation and in sentences) help to direct focus on the desired sounds;
2) the use of such pairs in production (pronunciation) exercises makes it easier for the teacher, especially a native speaker, "to react in a normal way to the learners' pronunciations and so test more effectively their productive differentiating of what are phonetically very similar sounds to them";¹
3) "the phonemic principle says that we must teach contrasts

* Consult the "Phonemic Symbol List" for key words that illustrate the sounds.

30/31
not just sounds. ... Teaching sound is important, but teaching sounds alone is not sufficient. We must do more than teach the sound, we must teach our students that one sound is different from the other sounds."²

General Coverage of Lessons

There are ten phonology lessons in all. (The /-s, -z/ final consonant targets are given three times - one lesson for noun plural finals, one for the third person singular finals, and one very brief lesson, intended as simple drill work for any necessary review of /-s, -z/ finals in connection with noun possessives.)

The same set of lessons serves all four grades and the order of the lessons is determined primarily by the order of the structure lessons to which they are an adjunct.* The introduction of the phonology lessons later in the language session series was done for two reasons: 1) the children might be overburdened with having to learn two different sets of instructions in the beginning; 2) the phonology lesson presentation seems to require the establishment of a high degree of control and attentiveness that come after the teacher has had time to develop and consistently maintain the necessary ground rules for her class.

Most of these lessons, except the grammar-based lessons on /-s, -z/ and /-t, -d/, are only loosely linked with the structure lessons and do not necessarily have to be presented with the particular structure lessons designated.

Each part of a lesson is designed to take approximately one-third to one-half of the language session time and the entire lesson is to be presented and reviewed at every session until reasonable mastery has been achieved or until the next structure lesson is to be introduced. If at any time the students need more work on a previously introduced target sound, that lesson or any appropriate portion of it can be repeated.

* See the "Sequence of Phonology Lessons."
It is strongly suggested that initial portion of a lesson, Part I, be presented before the accompanying structure lesson is presented. However, it may be advisable to introduce the lessons on /-s, -z/ noun plural finals, third person singular finals, and noun possessive finals and on /-t, -d/ past tense verb finals after the children have practiced the dialogue of that particular structure lesson in order to provide them with a meaningful and structurally relevant context from which to work. Thereafter the same phonology lesson may be presented at any time during the language session.

If any part of a lesson needs to be shortened, the number of minimal pairs or sentences to be practiced may be limited to a few; but all the steps in a given part should be covered. If any section or exercise needs to be repeated after that part has been presented in its entirety, it may be advisable to review it, concentrating on those words or sentences that caused most difficulty, before moving on to the next part.

Special Notes on Grammar-Based Phonology Lessons

Part I of the grammar-based lessons, except the lesson on the third person singular verb finals, treats the voiced and the voiceless consonant finals separately. This was done to make the initial presentation and evaluation of the children's problems easier and because grades 1 and 2 have structure lessons that treat these targets in separate lessons. The other parts of the lesson treat both the voiced and the voiceless consonant finals together.

If the children seem to confuse the final sounds; i.e., the appropriate sound to add to words ending in certain consonants, concentrate on those words and those sentences that have to do with just one of those target sounds. Once the children indicate a control over each one, have them work on words and sentences that include words that end with both of those target sounds.

Specific Notes for Grades 1 and 2

Grade 1: grammar-based phonology lessons on 1) noun plural finals and 2) noun possessive finals:
Since the structure lessons treat the voiced finals separately from the voiceless finals -- first the /-z/ finals then the /-s/ finals -- the various parts and steps of the phonology lessons will have to be adapted to this end.
For noun plural /-z/ finals: practice only Part I, Step II, and Part II - only those sentences with asterisks.

For noun possessive /-z/ finals: practice only Part I, Step II, and Step III - only the voiced consonant finals exercise.

When the structure lesson with the /-s/ as target (for both noun plurals and noun possessives) is introduced, review Part I, Step II before going through the lesson in sequence.

Special Case of combining past tense verb final and noun plural final /-z/: See "Special Notes for First Grade Phonology Lessons Accompanying Structure Lesson IVb" that follows the sequence chart.

Grade 2: grammar-based phonology lessons on 1) past tense verb finals and 2) noun possessive finals:

Since the structure lessons treat the voiced finals separately from the voiceless finals the /-d/ finals before the /-t/ finals of the past tense verbs and the /-z/ finals before the /-s/ finals of the noun possessive, the various parts and steps of the phonology lessons will have to be adapted to this end.

For past tense verb finals /-d/: practice only Part I, Step II, and Part II - only those sentences with the asterisks.

For noun possessive finals /-z/: practice only Part I, Step II, and Step III - only the voiced consonant finals exercise.

When the structure lessons for /-t/ and for /-s/ are introduced, review Part I, Step II before going through the lesson in sequence.

Make-up of Each Lesson

Each lesson consists of several parts (mini-lessons) to be presented along with the structure lessons at each language session. Each is divided into two distinct but equally important steps:

1) ear training to help the children recognize and discriminate between certain sounds;

2) production (pronunciation) practice of sounds in a variety of drills and activities.

The recognition exercises ("Can you hear the sound ... It's in ____ but not in ____") consist of pairs of words with minimal sound differences. When the children indicate that they have begun to rec-
ognize the sound distinctions, they can begin to actively participate in the exercises such as "same-different." The pronunciation practice is primarily model-repeat exercises to aid the children in producing clear distinctions between sounds.

Preceding each lesson, except the grammar-based lessons on final consonants, is a list of words with the target sound:
List (1): Minimal pairs with target and contrasting sounds or minimal pairs of two target sounds.
List (2): Other words with the target sounds.

Whenever possible the words are listed with the target sounds in different word positions: first in initial position since it is often easier to learn a sound if it appears initially, then in final position since it is less easy in this position and in medial position since it seems to be most difficult to learn the sound in this position.3

Preceding each grammar-based lesson on final consonants is a list of words ending with either voiceless consonants or with voiced consonants to which the target sounds are added.

The exercises utilize some but not all of the words from these lists in isolation and in sentences. The lessons on the grammar-based final consonant lessons contain sentences in which the word ending in a consonant or consonant cluster is immediately followed by a word beginning with a vowel. This was done because urban language studies seem to indicate that there are fewer problems, i.e., fewer omissions and greater facility in learning, when the sound immediately following the consonant or consonant cluster is a vowel.

Following each lesson is a collection of poems to be used in giving the children further practice with the target sounds in more meaningful, varied, and interesting environment.

Method of Presentation

Presentation techniques of accuracy and consistency in modeling, handling responses, handling transition from one exercise to

another, etc., mentioned in the "Teacher's Guide" should be adhered to. It is especially important that briskness of pace be maintained throughout any particular step (exercise) and any relaxation should come between steps. Once instructions and examples have been given and the children understand what is required, model-response pacing should be rapid and precise enough to demand intense concentration and maximum participation from the children.

Important Points to Remember

1. In modeling minimal pairs in isolation and in sentences, the same intonation, the falling intonation, must be kept so that in asking the children to recognize and discriminate between words with minimal sound difference, the children will actually be given only that sound difference. Comparison of two pronunciations:

   a) It's in ["lɪv"] but not in ["lɛv"].
   b) It's in ["lɪv"] but not in ["lɛv"].

   In (a) each word of the pair is given the same falling intonation, but in (b) the intonation on each of the pair is different; thus, the children would have to deal with more than a minimal sound difference.

1b. If any exaggeration of pronunciation of a sound in isolation is felt to be essential, this pronunciation should be immediately followed by normal rapid pronunciation of the sound as part of certain words and whenever applicable as words in sentences.

2. In evaluating before correcting, it is well to try to determine the possible source or sources of the problem:
   a) listening conditions:
      1) Distractions such as outside noise, interruptions by other students or teacher
      2) Speaker's distance to listener
      3) Lack of attentiveness on the part of listener and/or speaker (lack of interest, etc.)
   b) preparation of students:
      1) Lack of clarity, precision, consistency in instructions
      2) Insufficient and/or inappropriate examples and practice
   c) modeling:
      Fluctuation and inconsistency in pronouncing the word or sentence, either in articulating the sound, in stressing, or in the intonation pattern each time the word or sentence was pronounced.
3. In correcting the child:
   a) in recognition and discrimination: be certain that the child can actually hear the SE distinctions. Certain minimal pairs may sound alike to him.
   b) in production (pronunciation): be certain that the child can hear the distinctions before asking him to pronounce the different words. Remember that the child should be able to pronounce the contrasts as well as the words with the target sound.

Further problem in pronunciation:
The children may well have trouble with sounds other than the target sound; either with sounds that will be targets later or those that are not targets. When this happens, have the children repeat the words they have trouble with, but be careful not to shift the focus away from the particular target. If other problems are emphasized or given equal emphasis, the children may become confused and some may even feel defeated by the enormity of the task.

The following is a suggestion for dealing with problems of this sort:
If the phonology lesson is on the vowel sound /i/, for example, and you are proceeding with the production of words which included "with":

1) If the children mispronounce the vowel /i/ and the final consonant /d/, do not call the consonant sound to their attention but model the word and have them repeat it until they can pronounce the word reasonably well. (If the word is still mispronounced in its entirety, follow (2).

2) If the children can pronounce the vowel sound /i/ but have trouble with the final consonant, first reward them for getting the target sound before correcting by saying something like, "Good. You've said that sound we're practicing today right. Now, let's say that word again. Listen very carefully to the whole word and say it exactly the way I say it."

The above method can also be used for similar problems involving the consonant sounds.

4. If children need more intensive drills in hearing, identifying, or pronouncing the minimal pairs, you may wish to utilize the step-by-step exercises utilized in second-language teaching. See the "Basic Steps in Teaching Pronunciation."
BASIC STEPS IN TEACHING PRONUNCIATION
Using Second-Language Teaching Methods

1. Teaching the children to hear the sound:
   a. Say all the words in the contrasting column two or three times.
   b. Say all the words in the target column two or three times.
   c. Say all minimal pairs two or three times.

2. Teaching the children to identify and recognize the sound:
   a. Give two words from the minimal pair list, either the minimal pair or one word from the pair repeated twice, and have the children indicate whether the words are the "same" or "different."
   b. Give three words from the minimal pair list, with one word of the pair repeated twice. The children are to indicate which two words are the same.
      e.g.: "hut, hut, hot" -- one and two
   c. Give word from either minimal pair list and have the children indicate in which column or set of pictures it appears, by holding up one or two fingers to indicate column or set of pictures.

3. Teaching children to produce the sound:
   a. Repetition (Mimicry):
      1) Say each word from one column or one set of pictures (with contrasting sound). Have children repeat each word.
      2) Say each word from the other column or set of pictures (with target sound). Have children repeat each word.
      3) Say minimal pairs. Have children repeat each pair.
   b. Discrimination in pronunciation of minimal pairs:
      1) Teacher - pupil:
         Say one word from a minimal pair. Have individual children give the other word.
      2) Pupil - pupil:
         Have child give one word from a minimal pair and another child give the other word.
   c. Discrimination in pronunciation of contrasting sentences; i.e., sentences with minimal pair differences:
      1) Use minimal pairs in short utterances. Have children listen and repeat each one.
      2) Say one sentence using one word from the minimal pair. Have a child say the sentence using the other word from the pair.
      3) Have a child give one sentence and another child give the contrasting sentence.
POSSIBLE GAMES FOR DISCRIMINATION AND PRODUCTION

Each is initially introduced and practiced with the teacher as the model after which abler children can take turns modeling with or without the teacher cuing.

1. Cross the Street
   Preparation: Teacher pronounces a minimal pair and tells children what each word signals.
   One word (with the contrasting sound) signals it is safe to cross the street; the other word (with the target sound) signals a stop. Small group at a time stand on "sidewalk" and wait for the signal from the J.P.O. Other children can act as cars and if they see some children crossing at the "wrong" time they screech like cars braking to a stop. Other variations of this can be used. Modify the game to minimize cues other than word cue serving as a signal for children who are less certain as to the sound cues.

2. Changing Chairs
   Preparation: Teacher pronounces minimal pair and tells children what each word signals.
   The children are seated in a circle and are to change chairs only when they hear the word with the target sound. When they hear the word with the contrasting sound, they are to remain seated. The caller walks around the circle, pronouncing the words separately and distinctly. Forfeit: Any child who makes a "wrong" move, leaves the game and cannot play until the next round. No words may be called in the middle of chair changing nor should the words be pronounced without an appreciable pause between words.

3. Top of the Mountain
   This game can be a culminating activity for pronunciation of a particular target or as an evaluative exercise for a number of targets. It is played after the children have had a number of practice sessions on pronunciation of words with a particular target sound or of several. The object of the game is to reach the top of the mountain (the front or the back of the room). The climbers must pass through a number of obstacles before reaching the top. Initially the teacher guides the children up the mountain as she models a word with the target sound or models a minimal pair which the children are to repeat. On the next trip, the ones who reach the top will be the guides (cued by the teacher for the others left alongside the mountain). If they say the word or words accurately, they can move up to the next step; those who do not give an accurate pronunciation are told to rest and wait for the next trip. (The teacher has selected words in increasing order of difficulty to use as she guides the children to the top.)

SPECIAL NOTES FOR FIRST GRADE PHONOLOGY LESSONS
Accompanying Structure Lesson IVb

Since the first grade structure lesson IVb covers both the past tense finals /-t, -c/ and noun plural final /-z/ -- two separate phonology lesson targets -- it is recommended that the material to be presented per language session be treated in the manner discussed below.

Present the allotted portions of one phonology lesson (first, the past tense verb finals, then the noun plural finals) on separate days; i.e., upon presenting the phonology lesson the past tense verb finals along with the structure lesson, concentrate on the target sounds of that lesson for a number of successive language sessions, and upon presenting the phonology lesson on the noun plural final /-z/, concentrate on that target sound. Since these two phonology lessons would be repeated and completed along with the structure lessons that follow, mastery of these target sounds need not be the goal at this time.

Because of the combination of the two phonology lessons, it might prove more fruitful if initially the structure lesson exercises for the past tense verbs are practiced separately from those for the noun plurals. Before culminating the structure lesson, both the past tense and noun plural structure exercises may be treated together.

Suggested Guideline in Presenting Both Lessons:
1) Introduce and practice the structure lesson dialogue and Part I of the phonology lesson on the past tense verb finals.
2) Practice Part II of the past tense finals phonology lesson and structure lesson exercises 5-7 and, if time permits, practice the activity mentioned in Note #4.
3) Review and practice structure lesson dialogue and introduce and practice Part I, Step II, of the phonology lesson on the noun plural finals.
4) Practice Part II of the noun plural finals phonology lesson (those marked with asterisks) and practice structure lesson exercises 2, 4, 7 and, if time permits, practice the activity mentioned in Note #10.

* Use "flapped t.*"
PART I:

Step I: Introduction of Target Sound /i/i

Teacher can say:

Can you find the sound that we're looking for today? It's found in only certain words and not in any other. It's found in "ship" but not in "sheep." "chick" but not "cheek." "hill" but not "heal." "live" but not "leave." "pick" but not "peek." "bit" but not "beat." (Remember to use the falling intonation on each word of the pair.)

Step II: Recognition and Discrimination

A. Same-Different

Say the words in pairs: either minimal pairs on the same word taken from either the target column or the contrasting column, twice. The children are to indicate by a method you have chosen (e.g., raising two fingers for "same," fist for "different," etc.) whether the pair is the same word repeated twice or a contrasting pair.

Teacher can say:

I'm going to say two words right after each other. If the two words sound exactly the same, hold up two fingers (etc.). If the two words don't sound exactly the same, hold up your fist (etc.). e.g.: Teachers: ship ship Children: "same" sign bit live live "same" sign "same" sign "same" sign "same" Sign "diff." sign

(Note: Use words from Step I. Vary the order from time to time; e.g., in giving minimal pairs, don't always give the word with the target sound first. Be sure the same intonation is given on both words.

For accuracy in evaluation: How well the children discriminate will depend on the accuracy of response to the "diff." pairs.)

B. Identifying word with target sound:

Concentrate on one minimal pair at a time. Repeat the contrasting word a number of times before saying the word with the target sound. Thereafter, intersperse repetition of con-
trasting word with the word with the target sound. The children are to signal when they hear the word with the target sound.

This can be presented as a flash card "stop and go" game. Children can be policemen or traffic lights signaling with a long strip of paper colored red on one end and green on the other. They are to let all words (cars) with contrasting sound "go" and "stop" only the word (car) with the target sound. e.g.: Teacher can say:

"sheep-ship." These two words sound different, don't they? Listen again: "sheep-ship." When you hear the word "sheep," hold up the green light and let it go. But when you hear the word "ship," hold up the red light. Listen again: "sheep-ship." "Ship" is the word you have to stop.

Teacher: "sheep" green light
"sheep" "
"sheep" "
"ship" red

After about three successful responses by the majority of the class, model and have children repeat, "The sound we're looking for is in 'ship' but not in 'sheep.'" Follow above example for the rest of the minimal pairs in Step 1.

(For smaller group participation, the class can be divided into city blocks with traffic lights at every corner. For other possible games consult "Games for Discrimination and Production" or devise your own games.)

PART II: (Same as Part I except for minimal pairs used.)

Step I: Introduction of Target Sound:
Teacher can say:
Can you find the sound that we're looking for today? it's found in only certain words and not in any other.
It's in "ship" but not in: "sheep."*
"chick" "cheek."*
"slip" "sleep."
"fill" "feel."
"hit" "heat."
"lip" "leap."
"sit" "seat."
"lick" "leak."

(* in Part I.)
For the other steps follow Part I except for use of minimal pairs given in Step I of Part II.

PART III:

(If necessary, review some of the more difficult minimal pairs by using "Can you hear..." before going on to Step I.)

Step I: Say all the words you feel the children need further work on, except this time say all the words in the contrasting column; then, all the words in the target column. Have the children listen to all the words in each column; then, have them repeat each of those words after you.

Step II: Give contrasting word, and have the children give the word with the target sound.
   e.g., "The sound is not in 'sheep' but it's in ______."  

Step III: Minimal Pairs in sentences:
   Use pictures or line drawings on the board to represent the minimal pairs "ship-sheep," "hill-heel," and "chick-cheek."  
   Hold up picture and model the sentences for each pair. Then have the children repeat each sentence after the modeling the second time. 
   Combine discrimination and production by asking each child, "Where's the...?" and having the child pointing to or picking up the appropriate picture, saying "This is the ______."  
   After a number of successful responses, pupil-pupil exchange can be used for the same exercise.
   ship-sheep:
      This is the ship.
      This is the sheep.
   hill-heel:
      This is the hill.
      This is the heel.
   chick-cheek:
      This is my chick.
      This is my cheek.

Step IV: Words with target sound in sentences:
   A. Using pictures or actual objects representing as many of the words listed below, model each word as you hold up the items and have each word repeated by the class.
   B. Have children work in pairs. One child tells the other:  "Pick up the _____," mentioning one of the pictures on
the chalk tray or elsewhere. The other child holds up the appropriate picture and says, "This is the _____."

**Word List:** (Use other appropriate words.)
- fish (starfish, etc.)
- pigeon
- lizard
- shrimp
- zipper
- slipper
- dictionary
- guinea pig
- pig
- pin
- dish
- ring

**PART IV:**

**Step I:** Model minimal pairs: "pick-peek," "hit-heat," "bit-beat," "fill-feel," "slip-sleep" (and "slipping-sleeping") and "chick-cheek" and have the children repeat after you. Then model minimal pairs in sentences with appropriate gestures. Repeat two or three times so that the children will associate gestures with words. Then repeat the sentences a number of times in random order and have the children perform the accompanying action. After the children have learned to discriminate in this fashion, have individual children, able ones first, say the appropriate sentence when you give the gesture cue; then, have each say it to the class and have the class perform the action.

1. Pick at it. (picking, plucking motion)
   Peek at it. (peek through fingers)
2. Hit the pot. (punching or pounding motion)
   Heat the pot. (motion of turning on stove or lighting match)
3. Fill the pot. (pouring motion)
   Feel the pot. (touching motion)
4. The boy beat the dog. (beating motion)
   The boy bit the dog. (biting motion)
5. He's slipping in the mud. (skidding motion with foot, etc.)
   He's sleeping in the mud. (rest cheek on hands)
6. I patted my chick. (peeping sound or flapping motion)
   I patted my cheek. (put hand to cheek)

(#1, #2, #3 can be varied by using "ing" form of verb. One child can act out one of actions and the class can say, "He's ____ ing.")

**Step II:** Using words with target sounds in sentences.

Have class, then small groups stand and repeat both the sentences and actions modeled. Then have one child in each group be the leader (model sentence without gesture) and have others follow-the-leader in action.

Use words listed below in the frame: "Let's _____."
(For work with individual children, you may have each child carry out the action saying: "I'm ______ ing.")

Word List:
- wink
- pitch
- grin
- hit
- blink
- kick
- dig
- skip
- lift
- swim
- fish
- drink
- spin
- sit

PART V:

(This entire part deals with production of words with /i/ in sentences in which the stress changes.)

Model each sentence and in modeling the sentence that the children are to repeat, stress the underlined word and have the children do the same. e.g.:

Teacher: Just listen to this sentence:
The fish fell on the dish.

Answer this question:
What fell on the dish?
The fish.

Now repeat this sentence after me:
The fish fell on the dish.
(Repeat)

Answer this question:
Where did the fish fall?
On the dish.

Now, repeat this sentence after me:
The fish fell on the dish.
(Repeat)

(Once the children have understood the pattern, omit the directions.)

1) Pinky has a ring on his finger.

Who has a ring on his finger? Pinky.

Repeat this sentence:
Pinky has a ring on his finger.

What does Pinky have on his finger? A ring.

Repeat this sentence:
Pinky has a ring on his finger.

Does Pinky have the ring on his toe, or on his finger?

On his finger.

Repeat this sentence:
Pinky has a ring on his ____

(repeat)
Teacher:

2) A shrimp is in the river.
What's in the river?
Repeat this sentence:
A shrimp is in the river.
Where is the shrimp?
Repeat this sentence:
A shrimp is in the river.

A Variation on #2:
A shrimp is in the river.
What's in the river?
A shrimp is in the river.
A little* shrimp is in the river.
What kind of shrimp is in the river?
A little shrimp (one).
A little pink shrimp is in the river.
What kind of shrimp is in the river?
A little pink shrimp.

3) A witch found a squid.
Who found a squid?
Repeat this sentence:
A witch found a squid.
What did the witch find?
Repeat this sentence:
A witch found a squid.

A Variation on #3:
A witch found a squid.
What did the witch find?
A witch found a squid.
A rich witch found a squid.
What kind of witch found a squid?
A rich witch.
Repeat this sentence:
A rich witch found a squid.
PART IV: Poetry and Rhyming

Step I: Introduce and practice a poem.

Step II:

A. Pick out rhymes from the poem practiced and/or words that rhyme from List (2) and model and have the children repeat them.

B. Say two or three rhyming words from the list practiced and have the children add words that rhyme. If the children have too much difficulty, proceed to the next step.

   e.g.: brick - thick - lick (sick, quick, etc.)
   drip - grip - hip (skip, trip, etc.)
   hitch - stitch - ditch (witch, rich, etc.)

After each child adds a word, say those words again, adding the word the child has contributed and have the others pass judgment if all those words rhyme. If those words do rhyme, have the class repeat them after they hear them modeled.

C. Pronounce four words, one of which does not rhyme. Have the children listen to the words two or three times. When the words are repeated again, have the children indicate which word does not rhyme. This can be done by one of the following methods:

   1) Raising hands upon hearing the non-rhyming word.
   2) After hearing the words, indicating by holding up the number of fingers designating the number of the non-rhyming word. This would be made easier if, as each word is pronounced, one finger is held up for the first word, etc.
   3) Four children are seated in the front of the room and the teacher points to or taps each child as she pronounces each word. Someone from the audience points to the child who has the non-rhyming word and he stands up if he agrees. The rest of the class passes judgment. (This activity may be more time-consuming than the others.)

Example of words: (underlined words are non-rhyming)

   Bill - meal - will - hill
   grin - chin - green - win
   stick - reek - pick - quick
   sick - leak - chick - kick
   fill - still - seal - pill
   lip - drip - peep - hip
   tin - pin - fin - mean

D. Practice the same poem again or another poem.

All: Well, I never before saw a pig run a rig!

Boys: "Where are you going you little pig?"
Solo I: "I'm going to the barber's to buy me a wig!"
Girls: "A wig, little pig!
Boys: A pig in a wig!
All: Why, whoever before saw a pig in a wig!"

PART I: 1st Presentation

Step I: Introduction of Target Sound /e/
Teacher can say:
Can you find the sound that we're looking for today?
It's found in only certain words and not in any other.
It's found in "bet" but not in "bat."
"pet"  "pat."
"met"  "mat."
"set"  "sat."
"better"*  "batter."*
"slept"  "slapped."
"pest"  "past/passed."
"pen"  "pan."

* Use "flapped t."
(Remember to use the falling intonation on each word of the pair.)

Step II: Recognition and Discrimination
A. Same-Different:
Say the words in pairs: either minimal pairs or the same word taken from either the target column or the contrasting column twice. The children are to indicate by a method you have chosen (e.g., raising two fingers for "same," etc.) whether the pair is the same word repeated twice or a contrasting pair.
Teacher can say:
Now I'm going to say two words right after each other. If the two words sound exactly the same, hold up two fingers (etc.). If the two words don't sound exactly the same, keep your hands down (etc.).

Teacher:  Children:
  "pet" -  "pet"  "same" sign
  "bat" -  "bat"  "same" sign
  "pan" -  "pen"  "diff. " sign
  "bet" -  "bet"  "same" sign

(Use words from Step I. Be sure to vary the order from time to time; for example, in giving minimal pairs, don't always give the word with the target sound first. Be sure the same intonation is given on both words.
For accuracy in evaluation: How well the children discriminate will depend on the accuracy of response to the "diff." pairs.)
B. Identifying word with target sound:
Concentrate on one minimal pair at a time. Repeat the contrasting word a number of times before saying the word with the target sound. The children are to signal when they hear the word with the target sound.
This can be presented as a flash card "stop and go" game. Children can be policemen or traffic lights signaling with a long strip of paper colored red on one end and green on the other. They are to let all words (cars) with contrasting sound "go" and "stop" only the word (car) with the target sound.

\[\text{e.g.: Teacher can say:} \]
"bat - bet." These two words sound different, don't they?
Listen again: "bat - bet." When you hear the word "bat," hold up the green light. But when you hear "bet," hold up the red light. Listen again: "bat - bet." "Bet" is the word you have to stop.

\begin{tabular}{ll}
Teacher & Children  \\
"bat" & green light  \\
"bat" & "  \\
"bet" & red  \\
(etc.) &  \\
\end{tabular}

After about three successful responses by the majority of the class, model and have children repeat, "The sound we're looking for is in 'bet' but not in 'bat.'" Follow above model for the rest of the minimal pairs presented in Step I.
(Class can be separated into city blocks with traffic lights at every corner.)

\textbf{PART II: 2nd Presentation}

\textbf{Step I:}
Teacher says:
Can you find the sound that we're looking for today?
It's in "hem" but not in "ham."
"ten" "tan."
"lend" "land."
"send" "sand."
"bend" "band."
"led" "lad."
"bed" "bad."
"heed" "had."
"said" "sad."

(Use the falling intonation on each word of the pair.)
Step II: Same-Different (Pairs)

A. Say the words in pairs: either minimal pairs or the same word taken from either the target column or the contrasting column twice. The children are to indicate by the method you have chosen, whether the pair is the same word repeated twice or a contrasting pair.

Teacher can say:

Now I'm going to say two words right after each other. If the two words sound exactly the same, hold up two fingers (etc.). If the two words don't sound exactly the same, keep your hands down (etc.).

</tbody>
</table>

(Use words from Step I. Be sure to vary the order from time to time; for example, in giving minimal pairs, don't always give the word with the target sound first. Use the falling intonation on both words.)

B. Identifying word with target sound:

Concentrate on one minimal pair at a time. Repeat the contrasting word a number of times before saying the word with the target sound. Thereafter intersperse repetition of the contrasting word with the word with the target sound. The children are to signal when they hear the word with the target sound.

This can be presented as a flash card "stop and go" game. Children can be traffic lights signaling with a long strip of paper colored red on one end and green on the other. They are to let all words (cars) with contrasting sound "go" and "stop" only the word (car) with the target sound.

E.g.: Teacher can say:

"sand - send." These two words sound different, don't they? Listen again: "sand - send." When you hear the word "sand," hold up the green light. But when you hear the word "send," hold up the red light. Listen again: "sand - send." "Send" is the word you have to stop.

</tr>
<tr>
<td>&quot;sand&quot;</td>
<td>&quot;&quot;</td>
</tr>
<tr>
<td>&quot;send&quot;</td>

</tr>
</tbody>
</table>

(etc.)
After about three successful responses by the majority of the class, model and have children repeat, "The sound we're looking for is in 'send' but not in 'sand.'" Follow above model for the rest of the minimal pairs presented in Step I.

PART III:

Step I:
Hold up pictures or objects depicting the words in List (2).
Model the words and have the children repeat. Then, follow the procedure below with children taking parts.
Child A: Tell me what you want.
Child B: I want the necklace.
(Note: Use determiner "the" to handle mass and count nouns.)

Step II:
(This exercise deals with production of words with /e/ in sentences in which the stress changes.)
Model each sentence and in modeling the sentence that the children are to repeat, stress the underlined word and have the children do the same.

Teacher:  
Children:
Just listen to this sentence:  
Henry got a letter yesterday.  
Who got a letter yesterday?  
Henry.  
Now repeat this sentence after me:  
Henry got a letter yesterday.  
What did Henry get yesterday?  
A letter.  
Now repeat this sentence after me:  
Henry got a letter yesterday.  
What does Penny have around her neck?  
Penny.  
Now repeat this sentence after me:  
Penny has a bell around her neck.  
What does Penny have around her neck?  
A bell.
Now repeat this sentence after me:  
Penny has a bell around her neck.  
Where does Penny have the bell?  
Around her neck.
Step II: Short Dialogue Practice

A. After initial introduction by the teacher, the children should participate in the short dialogue.
A: I met an elephant yesterday.
B: Was he a friendly elephant?
A: Yes, he was friendly. He let me pet him.
B: I want to pet him too.
A: Okay, let's take him a present.
After practicing the dialogue, each child can add to the dialogue by saying: "My present is a/an ______." 

B. Chain Responses:
One child makes a statement and asks another a question and that child in turn does the same. This continues until a number of children have participated.
1. My best friend is ______. Who's your best friend?
2. I had ______ for breakfast. What did you have?

C. One child thinks of an animal and others have one guess each as to what it is, using the following format:
A: I have a pet. Can you guess what it is?
B: I bet I can. It's a ______.
A: Your guess is wrong. Who's next? (and turns to repeat his first line and has somebody else guess).
When the right answer is given, "A" says, "Your guess is right. Here's a penny."

PART IV: Poetry and Rhyming

Step I: Introduce and practice a poem.

Step II:
A. Pick out rhymes from the poem practiced and model and have the children repeat words that rhyme with those and other rhyming words from List (2).
B. Say two or three rhyming words from the list practiced and have the children add words that rhyme. If the children have too much difficulty, proceed to the next step.
e.g.: thread - led - said (red, dead, head, etc.)
    Ben - den - men (hen, ten, pen, etc.)
    well - fell - yell (sell, tell, bell, etc.)
After each child adds a word, say those words again, adding the word the child has contributed and have the others pass judgment if all those words rhyme. If those words do rhyme, have the class repeat them after they hear them modeled.
C. Pronounce four words, one of which does not rhyme. Have the children listen to the words two or three times. When the words are repeated again, have the children indicate which word does not rhyme.

This can be done by one of the following methods:

1) Raising hands upon hearing the non-rhyming word.

2) After hearing the words, indicate by holding up the number of fingers indicating the number of the non-rhyming word. This would be made easier if, as each word is pronounced, one finger is held up for the first word, etc.

3) Four children are seated in the front of the room and the teacher points to or taps each child as she pronounces each word. Someone from the audience points to the child who "has" the non-rhyming word and he stands up if he agrees. The rest of the class passes judgment. (This activity may be more time-consuming than the others.)

Example of words: (underlined words are non-rhyming)

get - let - net - **bat**
head - **bad** - shred - bread
leg - keg - **tag** - beg
best - test - guessed - **passed**
sled - **glad** - fled - bled
rent - **pant** - tent - sent

D. Practice the same poem again or another poem.

POEMS

Hickety, Pickety
Hickety, pickety, my black hen,
She lays eggs for gentlemen;
Gentlemen come back every day
To see what my black hen doth lay.

---adapted by Frank Haines
Nicholas Ned
Nicholas Ned,
He lost his head,
And put a turnip on instead;
But then oh me!
He could not see,
So he thought it was night,
And he went to bed.

--Laura E. Richards

Was She a Witch?
There was an old woman
Lived down in a dell;
She used to draw picklejacks
Out of the well.
How did she do it?
Nobody knew it,
She never, no never,
No never would tell.

**Pronounce second syllable as a syllabic consonant.**
PART I:

Step I: Introduction of Target Sound \( /\acute{\theta}/ \)

Teacher can say:
Can you find the sound that we're looking for today?
It's found in only certain words and not in any other.
It's found in "pup" but not in "pop."
"puppy"    "poppy."
"dull"     "doll."
"nut"      "knot."
"shut"     "shot."
"hut"      "hot."
"bum"      "bomb."

(Remember to use the falling intonation on each word of the pair.)

Step II: Recognition and Discrimination

A. Same-Different:
Say the words in pairs: either minimal pairs or the same word taken from either the target column or the contrasting column twice. The children are to indicate by a method you have chosen (e.g., raising two fingers for "same," fist for "different," etc.) whether the pair is the same word repeated twice or a contrasting pair.

Teacher can say:
I'm going to say two words right after each other. If the two words sound exactly the same, hold up two fingers (etc.). If the two words don't sound exactly the same, hold up your fist (etc.).

<table>

</tr>
<tr>
<td>puppy - poppy</td>
<td>&quot;diff.&quot; sign</td>
</tr>
<tr>
<td>dull - dull</td>
<td>&quot;same&quot; sign</td>
</tr>
</tbody>
</table>

(Use words from Step I. Vary the order from time to time; e.g., in giving minimal pairs, don't always give the word with the target sound first. Be sure the same intonation is given on both words.

For accuracy in evaluation: How well the children discriminate will depend on the accuracy of response to the "different" pairs.)

B. Identifying word with target sound:
Concentrate on one minimal pair at a time. Repeat the contrasting word a number of times before saying the word with the target sound. Thereafter, intersperse repetition of con-
trasting word with the target sound. The children are to sig-
nal when they hear the word with the target sound.
This can be presented as a flash card "stop and go" game.
Children can be policemen or traffic lights signaling with a
strip of paper colored red on one end and green on the other.
They are to let all words (cars) with contrasting sound "go"
and only "stop" the word (car) with the target sound.
e.g.: Teacher can say:
"poppy - puppy." These two words sound different, don't
they? Listen again: "poppy - puppy." When you hear the
word "poppy," hold up the green light and let it go. But
when you hear the word "puppy," hold up the red light.
Listen again: "poppy - puppy." "Puppy" is the word you
have to stop.

<td>&quot;</td>
</tr>
<tr>
<td>&quot;poppy&quot;</td>
<td>red</td>
</tr>
<tr>
<td>(etc.)</td>
<td></td>
</tr>
</tbody>
</table>

After about three successful responses by the majority of the
class, model and have the children repeat, "The sound we're
looking for is in _____ but not in _____," being certain that
the falling intonation is used on both words and that the con-
trasting sounds are clearly differentiated. Follow the above
element for the rest of the minimal pairs in Step I.
(For smaller group participation, the class can be divided
into city blocks with traffic lights at every corner. For
other possible games consult "Games for Discrimination and
Production" or devise your own games.)

PART II:

(Review Part I, practicing words that caused difficulty and add
other minimal pairs from List (1) minimal pairs.)

PART III:

Step I: Production of Minimal Pairs
Model minimal pairs, including those that are used in the
sentences in Step II, and have children repeat them.

Step II: Production of Contrasting Sentences
Model two contrasting sentences; then ask the questions pert-
taining to those sentences and have the children reply in
phrases. Finally, model the sentences a number of times in random order and have the children repeat those sentences.

**Teacher:**

"duck-dock"
The duck is clean.
The dock is dirty.
What's clean?
What's dirty?

"nut-knot"
A nut is tasty.
A knot is lumpy.
What's tasty
What's lumpy?

"shut-shot"
Billy shut the door.
Annie shot the door.
What did Billy do?
What did Annie do?

"puppy-poppy"
A puppy is nice.
A poppy is pretty.
What's nice?
What's pretty?

"cub-cob"
A cub is friendly.
A cob is rough.
What's friendly?
What's rough?

"bum-bomb"
The bum is lazy.
The bomb is dangerous.
What's lazy?
What's dangerous?

**Children:**

The duck.
The dock.
A nut.
A knot.
Shut the door.
Shot the door.
A puppy.
A poppy.
A cub.
A cob.
A bum.
A bomb.

**For extra practice:**
The hut is hot. What's hot? The hut.
The duck is on the dock. What's on the dock? The duck.
He cut the cot. What did he do? Cut the cot.

A cup hit a cop. What hit the cop? A cup.

For additional practice use the "Additional Exercises" that follow:

ADDITIONAL EXERCISES
For Some Troublesome Minimal Pairs

After previous drill work on these pairs, these exercises can be used to give additional practice for the class or just those that need more intensive work. These exercises require some background preparation concerning the meaning of these words.

I. "bum - bomb":
   Model the sentences and explain the difference in meaning and therefore the difference in the listener's reaction to what is said. Then model the sentences for the children to repeat.
   Choose a child to bring in a message to the class. He is to make his announcement as he comes in the door. The message is either "There's a bum outside!" or "There's a bomb outside!" The teacher may cue him by whispering the word to use or she may let him select it himself.
   The listeners are to react in "fear" by covering their heads, etc., when they hear "bomb." When they hear "bum," they may just look up or say, "Come in."

II. "cub - cob":
   The teacher says, "The pig wants to eat a cob," and "The lion wants to eat a cub." A child is chosen to act as a pig or a lion (whispered cue given by the teacher). The rest of the children listen to what he says he likes to eat so that they can guess what animal he is.
   Child says either: "Who am I? I want to eat a cob." or: "Who am I? I want to eat a cub."
   The others can say, "You're a pig," or "You're a lion," or make squealing sounds for the pig and a growling sound for the lion.

III. Possible culminating exercise using minimal pairs "cub-cob," "puppy-poppy," "nut-knot," and "bum-bomb."
   First model the minimal pair to be worked with. Have the children associate the word with a picture or a succinct explanation of the meaning. Present the two sentences for the particular pair a number of times and have the children provide the word to fit the sentence.
   A: "cub-cob" I'm going to train the ____ (cub).
   I'm going to chew on the ____ (cob).
PART IV:

Step I:
Have pictures or objects representing a number of words containing the target sound. Model each word as you hold up the picture or object and have the children repeat. These pictures or objects can be the prizes for a lucky number game. Have some children pick a number or assign numbers and have one child pick up the "lucky number" slip from a box of numbered slips of paper. This child announces, "The lucky number is ___," and the child who has the lucky number says, "I've got the lucky number. I want the ___." Or you may wish to have the children participate in the following activity, which involves a storekeeper, a parent, and a child:

Storekeeper (pointing to array of stock): I have lots of wonderful things for you.

Parent (to child): Do you want the ___?
Child: No, I don't want the ___. I want the ___.
Storekeeper: You're a lucky boy/girl. Here's the ___.

Step II:
Create an appropriate setting for the following dialogues and have the children participate.

1. A: Do you have some money?
   B: What do you want some money for?
   A: I want to buy some candy. I don't have enough money.
   B: Why don't you buy some gum instead?
   A: That's a wonderful idea!
   C: I have some money. Can I go too?
   A: Oh, boy. Now we can buy some candy ...
   B: ... and some gum. Sure, come along.

2. A: What are you mumbling about?
   B: Nothing.
   A: What are you grumbling about?
   B: Something.
A: You look funny. You look like a bubble gum all blown up.
B: You'd look funny too if you had a stomach ache.

PART V: Rhyming and Poetry

Step I: Nonsensical Dialogue:
Have children participate in the following dialogue:
A: What's in your trunk -- a lot of junk?
B: I don't have junk in my trunk.
A: What's in your trunk -- a funny skunk?
B: I don't have a skunk in my trunk.
A: No junk in your trunk? No skunk in your trunk?
   How's about a drunk skunk in your junk trunk?

Step II:
A. Pick out rhymes from the previous dialogue. Model the words and have the children repeat. Also practice with other rhyming words from List (2).
B. Say two or three rhyming words from the list practiced and have the children add words that rhyme. If the children have too much difficulty, proceed to the next step.
   e.g.: flunk - punk - sunk  (trunk, junk, etc.)
         cluck - stuck - suck  (duck, luck, etc.)
         club - cub - rub  (scrub, sub, etc.)
After each child adds a word, say those words again, adding the word the child has contributed and have others pass judgment if all those words rhyme. If those words do rhyme, have the class repeat them after they hear them modeled.
C. Pronounce four words, one of which does not rhyme. Have the children listen to the words two or three times. When the words are repeated again, have the children indicate which word does not rhyme. This can be done by one of the following methods:
   1) Raising hands upon hearing the non-rhyming word.
   2) After hearing the words, indicate by holding up the number of fingers indicating the number of the non-rhyming word. This would be made easier if, as each word is pronounced, one finger is held up for the first word, etc.
   3) Four children are seated in the front of the room and the teacher points to or taps each child as she pronounces each word. Someone from the audience points to the child who "has" the non-rhyming word and he stands up if he agrees. The rest of the class passes judgment. (This activity may be more time-consuming than the others.)
Example of words: (underlined words are non-rhyming)
sun - fun - rain - gun
dust - last - crust - must
sub - rob - scrub - tub
duck - sock - luck - truck
come - dumb - bomb - gum
shut - nut - cut - hot
mush - gosh - rush - crush
cup - pup - sup - top
hung - rung - lung - song
cuff - rough - cough - stuff

D. Practice a poem.

Old Mother Hubbard
Went to the cupboard,
To get her poor Dog a bone,
When she came there,
The cupboard was bare,
And so the poor Dog had none.

Jump - Jump - Jump
Jump - jump - jump --
Jump away
From this town into
The next, today:
Jump - jump - jump --
Jump over the moon;
Jump all the morning
And all the noon.
Jump - jump - jump --
Jump all night;
Won't our mothers
Be a fright?

Jump - jump - jump --
Over the sea;
What wonderful wonders
We shall see.
Jump - jump - jump --
Jump far away;
And all come home
Some other day.

Tugs
Chug! Puff! Chug!
Push, little tug.
Push the great ship here
Close to its pier.

Chug! Puff! Chug!
Pull, strong tug.
Drawing all alone
Three boat-loads of stone.

Busy harbor tugs,
Like round water bugs,
Hurry here and there,
Working everywhere.

Trucks
Big trucks for steel beams,
Big trucks for coal,
Rumbling down the broad streets,
Heavily they roll.

Little trucks for groceries,
Little trucks for bread,
Turning into every street,
Rushing on ahead.

Big trucks, little trucks,
In never ending lines,
Rumble on and rush ahead
While I read their signs.

**PART I: 1st Presentation**

**Step I: Introduction of Target Sound /u/**

Teacher can say:

Can you find the sound that we're looking for today?

It's found in only certain words and not in any other.

It's found in "pull," but not in "pool."

"full" "fool."

"could" "cooed."

"should" "shoed."

"stood" "stewed."

(Remember to use the falling intonation on each word of the pair.)
Step II: Recognition and Discrimination

A. Same-Different:
Say the words in pairs: either minimal pairs or the same word taken from either the target column or the contrasting column twice. The children are to indicate by a method you have chosen (e.g., raising two fingers for "same," fist for "different," etc.) whether the pair is the same word repeated twice or a contrasting pair.

Teacher can say:
I'm going to say two words right after each other. If the two words sound exactly the same, hold up two fingers (etc.). If the two words don't sound exactly the same, hold up your fist (etc.).

Example:

Teacher: pull pool full
Children: "same" sign "same" sign "same" sign

(Note: Use words from Step I. Vary the order from time to time; e.g., in giving minimal pairs, don't always give the word with the target sound first. Be sure the same intonation is given on both words.

For accuracy in evaluation: How well the children discriminate will depend on the accuracy of response to the "diff." pairs.)

B. Identifying word with target sound:
Concentrate on one minimal pair at a time. Repeat the contrasting word a number of times before saying the word with the target sound. Thereafter, intersperse repetition of contrasting word with target sound. The children are to signal when they hear the word with the target sound.

This can be presented as a flash card "stop and go" game. Children can be policemen or traffic lights signaling with a long strip of paper colored red on one end and green on the other. They are to let all words (cars) with contrasting sound "go" and only "stop" the word (car) with the target sound.

Example:

Teacher can say:
"pool-pull." These two words sound different, don't they?
Listen again: "pool-pull." When you hear the word "pool," hold up the green light and let it go. But when you hear the word "pull," hold up the red light. Listen again: "pool-pull." "Pull" is the word you have to stop.
PART II:

Step I: Production of Isolated Words
Model minimal pairs; have children repeat.

Step II:
Teacher can say:
I’m going to say a sentence. I’ll ask you a question about that sentence and you’ll give the answer. Then, you’ll repeat the sentence that I give you.

Example:
Teacher:
The boys want to hook the fish.
What do the boys want to do?
Now repeat this sentence after me:
The boys want to hook the fish.

Listen to the next sentence:
The girls want to cook the fish.
What do the girls want to do?
Now repeat this sentence after me:
The girls want to cook the fish.

Sentences to be used:
1. The boys pull the wagon.
What do the boys do?
The boys pull the wagon.
The girls push the wagon.
What do the girls do?
The girls push the wagon.

Children:
Hook the fish.
(repeat)
Cook the fish.
(repeat)
Pull the wagon.
(repeat)
Push the wagon.
(repeat)
2. The boys took the cushion. 
   What did the boys do? 
   The boys took the cushion. 
   The girls took the pushcart. 
   What did the girls do? 
   The girls took the pushcart. 

3. The boys look at the hook. 
   What do the boys do? 
   The boys look at the hook. 
   The girls look at the book. 
   What do the girls do? 
   The girls look at the book. 

4. The girls took the crooked bulldog. 
   What did the girls do? 
   The girls took the crooked bulldog. 
   The boys took the crooked bullfrog. 
   What did the boys do? 
   The boys took the crooked bullfrog. 

Step III: Chain Responses
   One child makes a statement and asks another a question and that child in turn does the same; this continues until a number of children have participated.
   1. I like to look at ______. What do you like to look at?
   2. I like books about ______. What books do you like?
   3. My mother (etc.) likes to cook ______. What does your mother (etc.) like to cook?

PART III:

After initial introduction by the teacher, the children should participate in the short dialogues.

1. A: Who took my ______? 
   cushion? 
   football? 
   broom? 
   
   B: I'm not a crook. Look in the bushes. 
   A: Who put it there? 
   B: You put it there.

76
   B: Let's go fishing and hook some fishes.
   A: We should play football.
   B: We should hook some fishes.
   A: We could play football today.
   B: And we could hook some fishes tomorrow.
   A & B: Good idea! (Shaking hands in agreement.)

3. A: There's a witch on the broomstick!
   B: Where? Let me look too.
   A: Quit pushing me. She's on the roof.
   B: What's she doing on the roof?
   A: She just shook the broom and caught a crook.
   B: A witch on a broomstick caught a crook. She must
      be a good witch.

PART IV: Poetry and Rhyming

Step I: Introduce and practice a poem.

Step II:
A. Practice rhyming words from list (2) by modeling and having
   the children repeat.
B. Say two or three rhyming words from the list practiced and
   have the children add words that rhyme. If the children have
   too much difficulty, proceed to the next step.
   e.g.: look - shook - crook                (hook, book, etc.)
         would - should - could              (good, stood, etc.)
         bull - full - wool                   (pull)
   After each child adds a word, say those words again, adding
   the word the child has contributed and have others pass judg-
   ment if all those words rhyme. If those words do rhyme,
   have the class repeat them after they hear them modeled.
C. Pronounce four words, one of which does not rhyme. Have
   the children listen to the words two or three times. When the
   words are repeated again, have the children indicate which
   word does not rhyme.
   This can be done by one of the following methods:
   1) Raising hands upon hearing the non-rhyming word.
   2) After hearing the words, indicate by holding up the num-
      ber of fingers indicating the number of the non-rhyming
      word. This would be made easier if, as each word is
      pronounced, one finger is held up for the first word, etc.
   3) Four children are seated in the front of the room and the
teacher points to or taps each child as she pronounces each word. Someone from the audience points to the child who has the non-rhyming word and he stands up if he agrees. The rest of the class passes judgment. (This activity may be more time-consuming than the others.)

Example of words: (underlined words are non-rhyming)

- cook - took - duck - book
- hoof - woof - roof - goof
- good - should - could - food
- pull - cool - full - bull
- stood - mood - would - could

D. Practice the same poem again or another poem.

NOTES:
In modeling words with this target, first let the children watch the way you pronounce the sound; then, let them concentrate purely on listening for the sound. If listening conditions are good, it is advisable that you go to the back of the room to model or have the children close their eyes as you model.

PART I:

Step I: Introduction of Target Sound /θ/
Teacher can say:
Can you find the sound we're looking for today?
Sometimes it's at the beginning of a word:
It's in "thin" but not in "tin."
"thick" "tick."
"thank" "tank."
"threw" "true."
It's in "thorn" but not in "torn."
"thought" "taught."

Sometimes it's at the end of a word:
It's in "both" but not in "boat."
"bath" "bat."
"booth" "boot."
"fourth" "fort."
"math" "mat."
"path" "pat."

And sometimes it's in the middle of words like
"healthy" and "nothing" and "something."
(Use the falling intonation on each word of the pair.)

Step II: Recognition and Discrimination
A. Same-Different:
Say the words in pairs: either minimal pairs or the same
word taken from either the target column or the contrasting
column twice. The children are to indicate by a method you
have chosen (e.g., raising two fingers for "same," fist for
"different," etc.) whether the pair is the same word repeated
twice or a contrasting pair.*

Teacher can say:
I'm going to say two words right after each other. If the
two words sound exactly the same, hold up two fingers
(etc.). If the two words don't sound exactly the same,
hold up your fist (etc.).

"same" sign
"same" sign
"diff." sign

(Note: Use words from Step I. Vary the order from time to
time; e.g., in giving minimal pairs, don't always give the
word with the target sound first. Be sure the same intona-
tion is given on both words.
For accuracy in evaluation: How well the children discrim-
minate will depend on the accuracy of response to the "diff." pairs.)

* Order of presentation and concentration: Use words with tar-
get in initial position first; then, in final position; finally, words
with target in both positions.
B. Identifying word with target sound and production:

Concentrate on one minimal pair at a time. (*See footnote on preceding page.*) Repeat the contrasting word a number of times before saying word with the target sound. Thereafter, intersperse repetition of contrasting word with target sound. The children are to signal when they hear the word with the target sound.

This can be presented as a flash card "stop and go" game. Children can be policemen or traffic lights signaling with a strip of paper colored red on one end and green on the other. They are to let all words (cars) with contrasting sound "go" and only "stop" the word (car) with the target sound.

E.g.: Teacher can say:

"tank-thank." These two words sound different, don't they? Listen again: "tank-thank." When you hear the word "tank," hold up the green light and let it go. But when you hear the word "thank," hold up the red light. Listen again: "tank-thank." "Thank" is the word you have to stop.

Teacher:

| "tank"    | green light |
| "tank"    |             |
| "thank"   | red         |
| "tank"    | green       |

After about three successful responses by the majority of the class, model and have the children repeat, "The sound we're looking for is in ____ but not in ____." Follow above example for the rest of the minimal pairs in Step I.

(For smaller group participation, the class can be divided into city blocks with traffic lights at every corner. For other possible games consult "Games for Discrimination and Production" or devise your own games.)

PART II:

Say the two sentences for the children and have them just listen the first time. Then ask the questions pertaining to them and have the children answer in a phrase (or a sentence, if you prefer). Finally, model the sentences again and have the children repeat each one after you. (It might be helpful to use puppets or drawings on the board of Joe and Moe.)

Teacher:

1. Joe is a healthy boy.
   Moe is a wealthy boy.
   What kind of boy is Joe?
   What kind of boy is Moe?

Children:

A healthy boy.
A wealthy boy.
2. Joe is in the third grade.
   Moe is in the fourth grade.
   What grade is Joe in?
   What grade is Moe in?
   The third grade.
   The fourth grade.

   Moe lives in the south.
   Where does Joe live?
   Where does Moe live?
   In the north.
   In the south.

4. Joe says, "Thank you."
   Moe says, "No, thank you."
   What does Joe say?
   What does Moe say?
   Thank you.
   No, thank you.

5. Joe found thirty dollars.
   Moe found a thousand dollars.
   What did Joe find?
   What did Moe find?
   Thirty dollars.
   A thousand dollars.

6. Joe grabbed the red cloth.
   Moe grabbed the red moth.
   What did Joe grab?
   What did Moe grab?
   The red cloth.
   The red moth.

7. Joe has a sore thumb.
   Moe has a sore throat.
   What does Joe have?
   What does Moe have?

Teacher can say:

Can you find the sound that we're looking for today? It's found in only certain words and not in any other.

Sometimes it's at the beginning of a word:

- It's in "there" but not in "dare."

PART II: Production

Step I: Use of Determiners with Target Sound

A. Point to some object or person in the room and, using the noun determiners below, model the phrase and have the children repeat after you.

Determiners:  
this/that  
another  
*the  
the other

Possible Items:

pencil  
boy  
girl

(* Because the choice of the vowel sound in this word, /i/ or /a/, is determined by the initial sound of the following word, group the items chosen into words that begin with consonants (/d a/ paper, etc.), and those that begin with vowels (/di/ apple). Once it is evident that the children have no difficulty, mix the items together.)
B. Use the determiners and the same or other items, persons, etc., in question-answer exercises; e.g., "Where's the ruler?" "There's the ruler," etc.

Step II:
Model and have the children repeat; then have groups or individual children, cued by your modeling, speak to each other.

A: Let's go with your father. Let's go without my father.
friend.
brother.
mother.
(etc.)

B: Let's go with your friend. Let's go without my friend.
brother.
mother.
(etc.)

PART III:

Step I:
Go over entire paragraph once. Then model each sentence and have children repeat. Children can take the roles.
Lonesome asked his mother, "Mother, let's play together." His mother said, "Let's play another day. I've got other things to do."
Lonesome asked his father, "Father, let's play together." His father said, "Let's play another day. I've got other things to do."
Lonesome asked his brother, "Brother, let's play together." His brother said, "Don't bother me. I've got other things to do."
Then his friend came to say, "There, there, don't cry. We can play together."

Step II:
Production of words with /t/ in sentences that change in stress: Model each sentence and in modeling the sentence that children are to repeat, stress the underlined word and have children do the same. Work with as many groups of sentences as time and interest allow.

Teacher:
1. Just listen to this sentence:
   Mother is sweeping.
   Who's sweeping?
Repeat this sentence:
   Mother is sweeping.
   Just listen to this sentence:
   Father is painting.

Children:
Who's painting?  
Repeat this sentence:  
Father is painting.  
Just listen to this sentence:  
Brother is sleeping.  
Who's sleeping?  
Repeat this sentence:  
Brother is sleeping.

2. Just listen to this sentence:  
The cowboy has a leather belt.  
What does the cowboy have?  
Repeat this sentence after me:  
The cowboy has a leather belt.  
Listen to this sentence:  
The Indian has a feather belt.  
What does the Indian have?  
Repeat this sentence after me:  
The Indian has a feather belt.

3. Just listen to this sentence:  
Flowers wither.  
What happens to flowers?  
Repeat this sentence:  
Flowers wither.  
Listen to this sentence:  
Snakes slither.  
What do snakes do?  
Repeat this sentence:  
Snakes slither.

POEMS

Little Bo-Peep  
Little Bo-Peep has lost her sheep,  
And can't tell where to find them;  
Leave them alone, and they'll come home,  
Wagging their tails behind them.  
--Mother Goose
Five Toes
This little pig went to market;
This little pig stayed home;
This little pig had roast beef;
This little pig had none;
This little pig cried, "Wee, wee, wee!"
All the way home.
    --Mother Goose

Song to Five Toes
1. Let us go to the wood, said this pig;
2. What to do there? says that pig;
3. To look for my mother, says this pig;
4. What to do with her? says that pig;
5. Kiss her, kiss her, says this pig.
    --author unknown

Finger Play
Up in the tree (Place one forearm on the other with hands outstretched)
Is a little bird's nest. (Cup hands)
Within it two eggs (Place thumb in cupped hands)
Underneath birdie's breast.
Crack-cracking the eggs (Make clicking sound with fingernails)
Both the birdlings come out.
They soon grow quite big, hop-hop-hopping about.
The mother bird says: "Look, I'll teach you to fly!"
So spreading their wings (Stretch two hands with thumbs joined)
They're off -- singing good-bye.
    --Frances E. Jacobs

Sh!
Students:
"Sh!" says mother,
"Sh!" says father,
"Running in the hall
Is a very great bother."

Teacher:
"Mrs. Grumpy Grundy,
Who lives down below,
Will come right up
First thing you know."

Students:
"Sh!" says father,
"Sh!" says mother.
"Can't you play a quiet game
Of some kind or other?"

NOTES:
1. Practice structure lesson dialogue before introducing this lesson.
2. In the production (pronunciation) exercises whenever possible the past tense verbs are immediately followed by words beginning with vowel sounds to facilitate the pronunciation of the consonant cluster. Do not pause between the past tense verb and the word immediately following. Use phonetic syllabication in normal rapid rate.
3. In the pronunciation of words such as "asked," rather than demanding clear articulation of each of the three consonants in the cluster (which does not often occur in normal rapid colloquial speech), notice whether the children reverse the order of the consonants.

PART I:

Step I:
A. Introduction of Target Sound: /-t/
   Listen for the sound we're adding to each word:
   When we add it to "race," we get "raced."
   "wash," "washed."
   "scratch," "scratched."
   "cough," "coughed."
   "slap," "slapped."
   "rip," "ripped."
   "mop," "mopped."
   "pack," "packed."
   "kick," "kicked."
   "peek," "peeked."

(Use falling intonation on both words.)
B. Production of /-t/
Use the words in Step I in random order, asking, "What do we get when we add the sound to _____ ?" and have the children say the word with the added sound. If there is difficulty, determine which word final sound preceding the target seems most difficult and focus on words ending in that consonant. (Use words from list provided.)
e.g.: "What do we get when we add the sound to "pack?"
..."packed"

Step II:
A. Introduction of Target Sound: /-d/
Listen to the sound we're adding to each word:
When we add it to "sneeze," we get "sneezed."
"change," "changed."
"live," "lived."
"clean," "cleaned."
"smell," "smelled."
"climb," "climbed."
"grab," "grabbed."
"nab," "nabbed."
"jab," "jabbed."
"drag," "dragged."
"beg," "begged."
"brag," "bragged."

(Use falling intonation on both words.)

B. Production of /-d/
Use the words in Step II in random order, asking, "What do we get when we add the sound to _____ ?" and have the children say the word with the added sound. Determine difficulty and focus on those words.

PART II:

Step I:
Review Part I, Steps IB and IIB, limiting the number of words to those that caused difficulty in previous presentation.
Should the children need practice in recognition and discrimination, present the following exercise:
Same-Addition Exercise:
Say two words. Say the base form of the verb and the same word again or the past tense form of the same verb. The children are to signal when the second word is the word with the added sound (by nodding, etc.).
Use the following pairs or any other that the children need to focus on:

- skip — skipped
- *rob — robbed
- knock — knocked
- *beg — begged
- kiss — kissed
- *sneeze — sneezed
- cough — coughed
- *live — lived

(* Voiced consonant cluster finals.)

Step II: Production (Generalizing use of /-tt/ with words ending in voiceless consonants and of /-dt/ with words ending in voiced consonants.)

Teacher can say:

I'm going to say a word and I want you to say that word with the added sound that goes with it. For example, if I say "pick," what would you say? ("picked" with /-tt/). If I say "slug," what would you say? ("slugged" with /-dt/).

Then I'm going to use my word without the added sound in a sentence. You will say the same sentence but you'll use the word with the added sound. For example, if I say, "I pick it up," you'll say, "I picked it up." If I say, "They slug us," you'll say, "They slugged us."

Sentences:
(Pronounce the final consonant of the verb as the initial consonant of the following word since it begins with a vowel. This helps the students say the words as a unit and leads to natural rhythm.)

1. They talk about it.  
2. They beg us.  
3. They camp at the beach.  
4. They rob us.  
5. They dance in the park.  
6. They raise a pig.  
7. They laugh at us.  
8. They save us.  
9. They pinch it.  
10. They change it.  
11. They wash it.  
12. They scare us.  
13. They curl it.  
14. They learn it.  
15. They climb up.

(* Voiced consonant cluster finals.)

**PART III:** Narratives using /-tt/ and /-dt/ words:

Narratives A and B can be presented separately if necessary. Narrative A has primarily 2 voiceless final verbs and Narrative B, primarily 2 voiced final verbs. If the children had indicated in previous exercises that they had less difficulty with the voice-
less finals, you may omit A and concentrate on B. Read the narrative through first and have the children just listen. Then call on a child to perform the action as you say one sentence at a time; then, have the rest of the class repeat the sentence after they see the action performed.

e.g.: Teacher: Keiki hooked many fishes and dropped them in a bucket.

Child: (performs action)

Rest of children: (repeat the sentence)

(This is done to enable the children to more readily recall the same verbs when asked to describe the action.)

As a way of tying all the elements together, go over the whole narrative line by line for the children. Then ask the children to tell the story in sequence, trying to use the verbs used in the narrative. The questions that follow the narrative may be asked to elicit the past tense forms used in the narrative.

A: I'm going to tell you about Keiki who went to the beach one day. Listen carefully to what happened to him.

Keiki hooked a lot of fishes. He dropped all of them in a bucket. To keep them fresh, he packed ice around the fishes. Then he galloped home because he wanted to surprise his mother. He peeked into the house and marched into the kitchen. He raised his bucket. He noticed it was filled with water. His mother walked into the kitchen. Keiki sobbed, "Mommy, my fishes are all melted." His mother laughed and mopped up the floor.

That night she cooked and served him a lovely fish dinner.

Possible questions:
1. What did Keiki do when he went to the beach?
2. What did he do with the fishes? How did he keep them fresh?
3. What did he do after that?
4. What did he do when he got home?
5. What did Keiki's mother do? What did Keiki do?
6. What did his mother do after she listened to Keiki?
7. What did she do that night?

B: I'm going to tell you what a naughty boy named Bud did when he saw a mud puddle. Listen carefully to all the things he did and how he was punished.

Bud dived into the puddle. He smeared the mud all over himself. He bragged about how scary he looked. He bragged to his friends. His mother yelled at him. She chased him around and around. Finally she reached him and grabbed him by his shirt. She dragged him over to the garden hose. He screamed and begged. He begged and screamed.
But she scraped off the mud and washed him. After he changed all of his clothes, she picked him up and spanked him. And her naughty wet boy sobbed all the way home.

Possible questions:
1. What did Bud do when he saw the puddle?
2. What did he do with the mud?
3. What happened after he did that?
4. What did his mother do when she first saw him?
   Then, what did she do?
5. What did he do?
6. How did she clean him?
7. What did he do after he was cleaned up?
8. What did he do after his mother washed him?

PART IV: /-	/ and /-d/ to be generalized in sentences:

Teacher can say:
We're going to talk about Moe and Joe. I'm going to say what they do; you'll tell me what they did. I'm going to give you a sentence and you'll say the same sentence except that you'll use the word with the added sound to tell me what they did. For example, if I say, "Moe and Joe pick up sticks," you'll say, "Moe and Joe picked up sticks." If I say, "They bang on the door," you'll say, "They banged on the door."

Teacher:
Moe and Joe live in the forest.
They work hard all day.
They chop down the trees.
They climb up the mountain
and search for food.
Two pigs raise their heads.
They peer at Moe and Joe.
The pigs crash into the bushes.
They squeal and scream.
Moe and Joe race after them
and kill them.
They clean the pigs and
drag them home.
They squeeze into the house.
They burn the wood and
cook a pig.
They save the other for
another day.

Children:
Moe and Joe lived in the forest.
They worked hard all day.
They chopped down the trees.
They climbed up the mountain
and searched for food.
Two pigs raised their heads.
They peered at Moe and Joe.
The pigs crashed into the bushes.
They squealed and screamed.
Moe and Joe raced after them
and killed them.
They cleaned the pigs and
dragged them home.
They squeezed into the house.
They burned the wood and
cooked a pig.
They saved the other for
another day.
Old Dog lay in the summer sun
Much too lazy to rise and run.
He flapped an ear
At a buzzing fly.
He winked a half opened
Sleepy eye.
He scratched himself
On an itching spot,
As he dozed on the porch
Where the sun was hot.
He whimpered a bit
From force of habit
While he lazily dreamed
Of chasing a rabbit.
But Old Dog happily lay in the sun
Much too lazy to rise and run.

NOTES:
1. Practice structure lesson dialogue before introducing this lesson.
2. In the production (pronunciation) exercises whenever possible the noun plurals are immediately followed by words beginning with vowel sounds to facilitate the pronunciation of the consonant cluster. Do not pause between the noun plural and the word immediately following. Use phonetic syllabication in normal rapid rate.
3. In the pronunciation of words such as "masks," or "lists," rather than demanding clear articulation of each of the three consonants in the cluster (which does not often occur in normal rapid colloquial speech), notice whether the children reverse the order of the consonants.

PART I:

Step I:
A. Introduction of Target Sound /-s/ with voiceless consonants.
   Teacher can say:
   Listen for the sound we're adding to each word:
   When we add it to "ship," we get "ships."
   "cat," "cats."
   "chick," "chicks."
   "chief," "chiefs."
   "lamp," "lamps.*"
   "gift," "gifts."*
   "ghost," "ghosts."*
   "shark," "sharks."*
   "mask," "masks."*

(Use the falling intonation on both words.)
(* 3 consonant clusters)
B. Production:
Use the words in Step I in random fashion and ask the children to give the word with the added sound. If certain words, especially the three consonant clusters, cause difficulty, review Step I using those words that cause difficulty and others from the list on the previous page.

E.g.: Teacher can say:
"What do we get when we add it to "ship"?
Child: "Ships."

Step II:
A. Introduction of Target Sound /-z/ with voiced consonants.
Teacher can say:
Listen for the sound we're adding to each word:
When we add it to "crab," we get "crabs."
"squid," 
"pig," 
"stove," 
"lamb," 
"doll," 
"bear," 
"king," 
"fan," 
"bird," 
"worm," 
"barn," 
"farm,"

(Use the falling intonation on both words.)

(* 3 consonant clusters)

B. Production:
Use the words in Step I in random fashion and ask the children to give the word with the added sound. If certain words, especially the three consonant clusters, cause difficulty, review Step I using those words that cause difficulty and others from the list on the previous page.

E.g.: "What do we get when we add it to "crab"?
Child: "Crabs."

PART II:
The following activities are initially conducted on the teacher-pupil (or pupils) basis; then, on the pupil-pupil basis, with Child A being cued by the phrases. (See Note #2.)
1. In this exercise, one person - an older brother, etc. - tells a child to do something and the child gives an excuse for not doing it. Create an appropriate setting.

A:
Get the sheets on the bed.
Get the jacks in the box.
Get the handkerchiefs on the table.
Get the grapes in the bowl.
Get the Halloween masks in the closet.
*Get the dogs in the car.
*Get the crabs in the sink.
*Get the cards on the desk.
*Get the eggs in the refrigerator.
*Get the olives in the kitchen.
*Get the combs on the dresser.
*Get the crayons in the drawer.
*Get the chairs in the garage.
*Get the slippers on the floor.

B:
I can't get the sheets on the bed.
I can't get the jacks in the box.
I can't get the handkerchiefs on the table.
I can't get the grapes in the bowl.
I can't get the Halloween masks in the closet.
I can't get the dogs in the car.
I can't get the crabs in the sink.
I can't get the cards on the desk.
I can't get the eggs in the refrigerator.
I can't get the olives in the kitchen.
I can't get the combs on the dresser.
I can't get the crayons in the drawer.
I can't get the chairs in the garage.
I can't get the slippers on the floor.

(* Contain voiced consonant final nouns.)

2. In this exercise one child tries to "fool" another. Use appropriate expressions.

A:
You have spots on your shirt.
You have ants in your candy.
You have rocks in your crayon box.
You have rats in your desk.

B:
I don't have spots on my shirt.
I don't have ants in my candy.
I don't have rocks in my crayon box.
I don't have rats in my desk.

A: Ha! Ha! April Fool!
A: You have ghosts on your shoulder.

B: I don't have ghosts on my shoulder. Ha! Ha! April Fool!

*You have cobwebs in your hair.

B: I don't have cobwebs in my hair.

*You have centipedes on your jacket.

B: I don't have centipedes on my jacket.

*You have rotten eggs on your chair.

B: I don't have rotten eggs on my chair.

*You have beehives under your desk.

B: I don't have beehives under my desk.

*You have worms in your sandwich.

B: You have worms in your sandwich.

(* Contains voiced consonant final noun.)

PART III:

Generalizing rules for adding the /-s/ and /-z/ to voiceless consonant finals and voiced consonant finals respectively: Each time before practicing the particular sentences, give the singular noun to be used in the sentence; children are to give the plural of that noun, add /-s/ or /-z/ appropriately. Then, model that sentence and have the children repeat it except that they will pluralize the particular noun. See Note #2 concerning these sentences.

1. The following is a situation in which one person says he sees a particular object and the other person, perhaps because he has better eyesight or stronger binoculars, says he sees more than one of the same object.

Teacher: I see the ship in the ocean. I see the boat.

Children: I see the ships in the ocean. I see the boats.

hoop, net, stick, shark, handkerchief, whale, turtle, dolfin, crab, squid, log, can, wave
2. The following is a situation in which one child states what he wants and the other, a greedier child, states he wants more of that same item.

**Teacher:**
I want the bike in the store.
jeep
map
basket
belt
lollipop
cowboy rope
diving mask
bird
dog
racing car
camp stove
Easter egg
toy crab

**Children:**
I want the bikes in the store.
jeeps
maps
baskets
belts
lollipops
cowboy ropes
diving masks
birds
dogs
racing cars
camp stoves
Easter eggs
toy crabs

**PART IV:**

Generalizing rules for adding /-s/ and /-z/ to voiceless consonant finals and voiced consonant finals respectively:
(Note: It is more natural to use the indefinite articles; however, because the omission of these articles necessary in pluralizing the nouns would be an added burden to the children, the definite article is used instead.)

1. Skinny - Chubby:
Teacher can say:
We're going to talk about two boys, Skinny and Chubby. I'm going to tell you what Skinny ate and you'll tell me what Chubby ate. For example, if I say, "Skinny ate the apple," you'll say, "Chubby ate the apples." If I say, "Skinny ate the apple and the carrot," you'll say, "Chubby ate the apples and the carrots."
(Note that for each meal, every item is mentioned separately in each sentence and that the last sentence is a summary of the items given in a series.)

**Teacher:**
For breakfast Skinny ate the grapefruit.
Skinny ate the pancake.
Skinny ate the boiled egg.
For breakfast Chubby ate the grapefuiot, the pancake, and the boiled egg.

**Children:**
For breakfast Chubby ate the grapefruits.
Chubby ate the pancakes.
Chubby ate the boiled eggs.
For breakfast Chubby ate the grapefuiot, the pancakes, and the boiled eggs.
Teacher:
For lunch Skinny ate the pickle.
Skinny ate the olive.
Skinny ate the hotdog.
Skinny ate the hamburger.
For lunch Skinny ate the pickle, the olive, the hotdog, and the hamburger.
For dinner Skinny ate the pork chop.
Skinny ate the salad.
Skinny ate the roast pig.
For dinner Skinny ate the pork chop, the salad, and the roast pig.

Children:
For lunch Chubby ate the pickles.
Chubby ate the olives.
Chubby ate the hotdogs.
Chubby ate the hamburgers.
For lunch Chubby ate the pickles, the olives, the hotdogs, and the hamburgers.
For dinner Chubby ate the pork chops.
Chubby ate the salads.
Chubby ate the roast pigs.
For dinner Chubby ate the pork chops, the salads, and the roast pigs.

Teacher can say:
We're going to talk about two girls, Annie and Janey. Annie lived on a small farm. Janey lived on a big farm. I'm going to tell you what Annie played with on her farm and you're going to tell what Janey played with on her farm. For example, if I say, "Annie played with the chicken on her farm," you'll say, "Janey played with the chickens on her farm." If I say, "Annie played with the turkey and the chick on her farm," you'll say, "Janey played with the turkeys and the chicks on her farm."

Teacher:
Annie played with the chick on her farm.
Annie played with the dog on her farm.
Annie played with the goat on her farm.
Annie played with the toad on her farm.
Annie played with the owl on her farm.
Annie played with the lamb on her farm.
Annie played with the pigeon on her farm.

Children:
Janey played with the chicks on her farm.
Janey played with the dogs on her farm.
Janey played with the goats on her farm.
Janey played with the toads on her farm.
Janey played with the owls on her farm.
Janey played with the lambs on her farm.
Janey played with the pigeons on her farm.

**NOTES:**

1. Practice structure lesson dialogue before introducing this lesson.
2. In the production (pronunciation) exercises whenever possible the 3rd person singular verbs are immediately followed by words beginning with vowel sounds to facilitate the pronunciation of the consonant cluster. Do not pause between the 3rd person singular verb and the word immediately following. Use phonetic syllabication in normal rapid rate.
3. In the pronunciation of words such as "asks," rather than demanding clear articulation of each of the three consonants in the cluster (which does not often occur in normal rapid colloquial speech), notice whether the children reverse the order of the consonants.

**PART I:**

**Step I:**

**A. Introduction of Target Sound: /-s/ and /-z/**

Listen for the sounds we're adding to each word:

When we add a sound to "drop," we get "drops."

- "scrub," "scrubs."
- "cut," "cuts."
- "read," "reads."
- "drink," "drinks."*
- "hug," "hugs."
- "laugh," "laughs."
- "love," "loves."
- "scare," "scares."
When we add a sound to "fall," we get "falls."
"comb,"  "combs."
"turn,"  "turns."*
(Use the falling intonation on both words.)
(* 3 consonant clusters)

B. Production:
Go over above words in random fashion and ask the children to give the word with the added sound. If the children seem to have difficulty, present the words that require voiceless /-s/ final and then present the words that require voiced /-z/ final; and finally mix the two again.
What do we get when we add a sound to "cut?"  "cuts"

Step II:
If the children had difficulty with Step I, present the "Same-Addition" Exercise as in the past tense and noun plural finals lessons. If there was no difficulty, proceed with the following exercise:
Model with appropriate gestures the sentences below and have the children repeat after you. (Appropriate sentences may be chosen and others added if necessary. If you have pictures of one person carrying on a series of activities, use those with simple sentences describing the everyday activities.)

These are some of the things that Happy does every day:

- He wakes up.  /-ks/
- He hops out of bed.  /-ps/
- He takes a shower.  /-ks/
- He combs his hair.  /-mz/
- He eats all his breakfast.  /-ts/
- He puts on his shoes.  /-ts/
- He walks to school.  /-lks/
- He sits in class.  /-ts/
- He writes on the blackboard.  /-ts/
- He asks everybody for help.  /-sks/
- He paints a picture.  /-nts/
- He reads a book.  /-dz/
- He runs all the way home.  /-nz/
- He jumps into bed.  /-mps/
- He thinks about school.  /-nks/
- He rolls over in bed.  /-lzs/
He drops off to sleep.  
He dreams about fishing.

After going over the activities above, the teacher can expand the exercise by using pictures, line drawings on the board, objects, persons, or other visual means for the following: Hold up or point to the visuals as cues. Have the children use the following patterns:

1. He dreams about _____.
   He dreams about catching _____.
   He dreams about buying ______.

2. He thinks about _____.
   He thinks about going ______.

3. He asks about _____.

**PART II:**

**Step I:**

Any one or all three of the following narrations may be used as needed. Your choice will be determined by the selection which gives the children the best opportunity to practice those final consonant clusters that are troublesome. Use the method and instructions given in Part I, Step II.

**A. Father's Activities:**

These are some of the things Father does every day:
- He shaves his face. /-vz/
- He digs in the garden. /-gz/
- He waters the yard. /-rz/
- He works on the car. /-rks/
- He reads the newspaper. /-dz/

These are some of the things Father does sometimes:
- He drives us to school. /-vz/
- He tells us to go to bed. /-lz/
- He scolds us. /-ldz/
- He takes us fishing. /-ks/
- He gives us candy. /-vz/

**B. Mother's Activities:**

These are some of the things Mother does every day:
- She cooks our food. /-ks/
- She scrubs our kitchen. /-bz/
- She sweeps and mops our house. /-ps/
- She dusts our furniture. /-sts/
- She shops at the market. /-ps/
She talks on the telephone.  
She drags us to bed.  
These are some of the things Mother does sometimes:  
She makes us do our homework.  
She sends us to the store.  
She asks us to help her.  
She lets us watch TV.  
She spanks us.  
She takes a nap.

C. Big Brother's Activities:
These are some of the things Big Brother does every day:
He eats a lot of food.  
He drinks a lot of milk.  
He feeds our dog.  
He looks at the comics.  
He dumps out the garbage.  
He drags us to school.
These are some of the things Big Brother does sometimes:
He climbs up the tree.  
He swims in the pool.  
He surfs in the bay.  
He treats us to a movie.  
He yells at us.  
He speeds on his bike.  
He snores in his sleep.

After practicing any one of the above, have each child say what his mother or father or brother does every day or sometimes.

Step II:
Teacher can say:
Some little boys like to copy what their older brothers do.  
I'm going to tell you what Harry's brothers do, and you'll tell me what Harry does.  For example, if I say, "They slide," you'll say, "Harry slides."  If I say, "They slide on the grass," you'll say, "Harry slides on the grass."

Teacher:
They leap.  
They leap on the bike.  
They ride.  
They ride on the handlebars.  
They dive.  
They dive into the pool.

Children:
Harry leaps.  
Harry leaps on the bike.  
Harry rides.  
Harry rides on the handlebars.  
Harry dives.  
Harry dives into the pool.
They brag.
They brag around the neighborhood.
They laugh.
They laugh at the cry baby.

Harry brags.
Harry brags around the neighborhood.
Harry laughs.
Harry laughs at the cry baby.

PART III: Generalizing rule for adding /-z/ and /-s/.

(Note: One or both may be presented. Act out if possible.)

A. Teacher can say:
We're going to talk about how a monkey copies what some boys do. I'll tell you what the boys do and you'll tell what the monkey does. For example, if I say, "The boys pound the wall," you'll say, "The monkey pounds the wall." If I say, "The boys jump," you'll say, "The monkey jumps." And if I say, "The boys kick," you'll say, "The monkey kicks." And when I say, "The boys kick and jump," you'll say, "The monkey kicks and jumps."
(Whenever the children have difficulty when the verb is embedded, isolate the subject and verb and have the children add the appropriate sound to the verb before presenting them with the original sentence.)

Teacher:
The boy claps.
The boys wave.
The boys clap and wave.
They peel the bananas.
They pound the bananas.
They peel and pound the bananas.
They sit down.
They turn around.
They sniff around.
They shake the bars.

Children:
The monkey claps.
The monkey waves.
The monkey claps and waves.
The monkey peels the bananas.
The monkey pounds the bananas.
The monkey peels and pounds the bananas.
The monkey sits down.
The monkey turns around.
The monkey sniffs around.
The monkey shakes the bars.

B. We're going to talk about how another monkey copies what some girls do. I'll tell you what the girls do and you'll tell me what the monkey does. For example, if I say, "The girls crawl on the ground," you'll say, "The monkey crawls on the ground." If I say, "The girls hum," you'll say, "The monkey hums." If I say, "The girls whistle," you'll say, "The monkey whistles." And when I say, "The girls hum and whistle," you'll say, "The monkey hums and whistles."
**Teacher:**
The girls laugh.
The girls laugh aloud.
The girls giggle.
The girls wiggle.
The girls giggle and wiggle.
The girls look up.
The girls point.
The girls look up and point.
The girls dig a hole.
The girls bend over and dig a hole.
The girls hug the bars.

**Children:**
The monkey laughs.
The monkey laughs aloud.
The monkey giggles.
The monkey wiggles.
The monkey giggles and wiggles.
The monkey looks up.
The monkey points.
The monkey looks up and points.
The monkey bends over.
The monkey digs a hole.
The monkey bends over and digs a hole.
The monkey hugs the bars.

**NOTES:**

1. Practice structure lesson dialogue before introducing this lesson.
2. This is a very short lesson primarily because the target sounds themselves have been practiced before. However, if the children require more drill work review Part I using different names and other nouns.
3. In the production (pronunciation) exercises whenever possible the noun possessives are immediately followed by words beginning with vowel sounds to facilitate the pronunciation of the consonant cluster. Use phonetic syllabication in normal rapid rate.

4. Use children’s names for practice.

**PART I:**

**Step I: Introduction of Target: Voiceless Consonant finals + */-s/:**

Listen for the sound we’re adding to each word:

When we add it to "Chip," we get "Chip’s."
"Pat," "Pat’s."
"Dick," "Dick’s."
"Cliff," "Cliff’s."
"grown-up," "grown-up’s."
"student," "student’s."
"chief," "chief’s."

**Step II: Introduction of Target: Voiced Consonant finals + */-z/:**

Listen for another sound we’re adding to each word:

When we add it to "Bob," "Bob’s."
"Fred," "Fred’s."
"Peg," "Peg’s."
"Dave," "Dave’s."
"Jane," "Jane’s."
"Pam," "Pam’s."
"Jill," "Jill’s."
"Ginger," "Ginger’s."
"mom," "mom’s."
"girl," "girl’s."
"teacher," "teacher’s."
"librarian," "librarian’s."

**Step III: Recognition and Discrimination**

Use cutouts or line drawings to indicate persons and an object (like an eraser, or others that will elicit words that begin with vowel sounds) that belong to that person. Point to the picture of a person and give his name; then, point to the object and use the possessive form of that name.
(Voiceless consonant finals + /-s/)  
This is Chip. This is Chip's. (eraser or another object)  
This is Pat. This is Pat's.  
This is Dick. This is Dick's.  
This is Cliff. This is Cliff's.  
This is the grown-up. This is the grown-up's.  
This is the student. This is the student's.  
This is the chief. This is the chief's.

(Voiced consonant finals + /-z/)  
This is Bob. This is Bob's. (eraser or another object)  
This is Fred. This is Fred's.  
This is Peg. This is Peg's.  
This is Dave. This is Dave's.  
This is Jane. This is Jane's.  
This is Pam. This is Pam's.  
This is Jill. This is Jill's.  
This is Ginger. This is Ginger's.

1. First have the children just listen as the sentences are modeled and the appropriate associations are made.  
2. Next say each pair of words a number of times in random order and have the children indicate whether a name is being said or an object belonging to that person.  
   e. g.:  
   Teacher: Bob.  
   (Indicate person)  
   Children: Bob.  
   " "  
   Bob's.  
   (Indicate object)

Step III:  
A. Model pairs of sentences in Step II saying the object and have children repeat. (See Note #3.)  
   e. g.: "This is Chip. This is Chip's eraser."
B. Next say only the sentence using the name. Have the children say the sentence using the possessive form and the name of the object.  
   e. g.:  
   Teacher: This is Chip.  
   Children: This is Chip's eraser.

PART II:  
Initially, model and have the children repeat, then cue the children and have children take parts. (See Note #3.)

V. STRUCTURE LESSON SECTION
INTRODUCTION TO STRUCTURE LESSONS

The lessons on structure have been prepared for kindergarten, first, second, and third grade classes. There are thirteen steps into which each set of lessons has been divided. But the number of lessons for each step in the sequence varies for each grade level. Each set of lessons is similar in that each follows the same sequence in introducing the grammatical targets. Each set, however, differs in the specific targets introduced. The reason for the difference in specific targets is to accommodate the difference in levels and in curriculum content.

The lessons presented here are in the form used and accepted by the project teachers of Keaukaha School, Hilo, Hawaii. The revisions were made based on their evaluations of the lessons for two years. However, the revisions of the kindergarten lessons were based on one year's evaluation.

Sequencing

The choice as to what grammatical structures should be taught in these lessons was determined by the contrasts between standard English and Hawaii Islands Dialect. The contrasts were obtained from the contrastive analysis done by the University of Hawaii and by some of the staff members.

Rather than introduce all the targets to be taught at random, they were sequenced so that only a few targets are introduced at a time. It was felt that this would make the learning task a little easier for the children. There was no linguistic base for sequencing.

The project teachers determined the sequencing of the targets. Their judgment was based on their feelings about what structures the children had an immediate need for and the degree of ease with which the children would be able to handle the targets.

Lesson content

The selection of content materials was made through suggestions by the teacher as to what kinds of activities the class would be carrying out through the year. Some of the information was also based on material derived from the science and social studies curriculum guides of the Department of Education, State of Hawaii.
Every effort was made to use language patterns which would be common to natural speech and which would fill the immediate needs of the children. However, because the structures are introduced in small doses to make learning more manageable and because other target structures that would make the language pattern more natural have not yet been introduced, there may be occasions when the teacher might feel that certain constructions are unnatural and stilted.

Each specific target word was selected either because it was useful for the pupil at that particular grade level, because it was needed to expand a language pattern and to make practice meaningful, or because it was a content word from a curriculum area for that specific grade level.

Goal

The specific goal of the structure lessons is the growing ability of the children to use the particular syntactical constructions and/or to make the appropriate morphophonemic changes, etc., that are listed as targets per lesson.

Grammatical notes

Grammatical explanations to the students should be kept to a minimum since they would not give the students a command of the language itself. If it is absolutely necessary to resort to explanations, the teacher should give these explanations after the class has gone through the dialogue and exercises many times. Often after the students have been exposed to the language patterns in various situations, the necessity for explanations is eliminated as the students acquire a "feel" of the language.

Because of time limitations, it was not possible to include all the specific targets. For example, all the irregular past tense verb forms and all the mass nouns have not been introduced. The same reason holds for the exclusion of some high-frequency words for a particular grade level.

A verb with a preposition, or a two-word verb, was not introduced as a new verb if the preposition was previously introduced as a target.

Mass nouns appear as targets with the exception of those used idiomatically. Examples of the latter are expressions such as "at lunch, on T.V., at school."
Prepositions are small but important words. The teacher must be well-acquainted with the various meanings and uses of prepositions in order to avoid confusion.

In these lessons the noun "fish" was treated as having a regular noun plural ending.

There were times when specific targets were used prior to their introduction as targets. The reason for this was to make the language sound as natural as possible.

**Teacher role**

There's a point that can't be stressed enough and it has to do with the importance of the teacher. Mary Finocchiaro addresses herself to teachers on this point. She says:

> You, the teacher, are more important than any method or material. It is what you do with any method or with any piece of material which will determine its effectiveness in helping your students learn. ¹

The lesson materials provided the teacher are really sample lesson plans. The teacher can delete, elaborate, and expand the materials to suit the individual needs of the class. The only limitation placed on the teacher is that she pay close attention to the sequence of grammatical targets. She must be thoroughly familiar with the targets that were introduced in the preceding lessons and those that are to be introduced in the following lessons. The teacher can make changes in the dialogues and exercises to suit her needs. If the subject of the dialogue is unfamiliar to the children, the teacher will need to have a preliminary session to introduce and elaborate on the subject so that the context of the dialogue will be familiar to the children.

**Format**

The following is the format for every lesson in each grade level.

---

A. Targets

In this section the specific targets for the lesson are listed.

B. Notes

Except for technical information about grammatical targets for the edification of the teacher, most of the notes are suggestions to the teacher for the utilization and elaboration of the lessons. There are also suggestions of ways to bring about transfer in which the children are guided to elicit the particular grammatical structures independently. As with all phases of the language lessons, the notes are suggestions and not prescriptions. It is intended that lessons be built from these suggestions based on the needs and purposes of the teacher using the materials.

C. Dialogue/Narrative

Each lesson includes a dialogue or narrative in which the grammatical targets are embedded. Sometimes it was only possible to utilize the specific target just once, primarily to keep the language as natural as possible. This was not always possible when certain targets had to be included. It has been assumed that the concepts introduced in these lessons are familiar to the children. There may have been included some concepts unfamiliar to a particular class. A sincere effort was made to keep these to a minimum.

D. Exercises

The exercises provide concentrated practice with the targets introduced in the dialogue or narrative. It was not always possible to present the targets in a meaningful context. The teacher uses her discretion in deciding which exercises she will use during the language sessions. She may find it necessary to utilize all the exercises or only a few for each target. Her choice depends on the class she is working with and the difficulties that may arise. As with the dialogue or narrative, the teacher is free to make any changes within the framework of the target sequence. If the teacher finds that she needs more exercises than provided, she can build her own exercises using the patterns provided. She can also go back to the exercises from preceding grades on the same target. The teacher's creativity and imagination can be put to full use when utilizing the exercises so that they do not become purely mechanical drills but provide meaningful practice for the students.
Utilization of lesson materials

The teacher's attitude about these lessons is very important. The teacher should approach the language sessions with interest and enthusiasm. Her attitude will be conveyed to the children just as it will be if she feels that the lessons are boring and not very challenging. A skillful teacher can make a lesson come alive and convince the children that what she is presenting is worthy of their complete attention. Her efforts will result in greater learning on the part of the children.

As stated in the teacher's guide portion, it is important that the teacher be thoroughly prepared each time she presents a lesson. She must know what the targets for the lesson are, what targets have already been introduced, and what targets are yet to be introduced. Thorough preparation is a necessity and so is flexibility in altering plans to suit the needs of the children and the occasion. Plans can be altered but it is very difficult to carry out something successfully without a plan.

Because the teacher is the model for the class, it is imperative that she be thoroughly familiar with the material that she is going to present. Preparation involves having all the materials needed on hand so that there will be no fumbling nor any unnecessary pauses. The teacher must have thought through all the directions she will be giving so that they are clear-cut and consistent. The teacher must also anticipate the kinds of responses she will get and the possible difficulties that may arise. The language session must move at a rapid pace with very little time for pauses that may distract the class or that may allow boredom to set in.

The teacher must also establish, at the very beginning, concise and specific signals and cues. She has to diligently adhere to them so that the children can respond immediately without lengthy directions and explanations being given each time a response is required. Once a pattern has been established, it becomes easier for the children and the teacher to work with maximum efficiency.

Nelson Brooks\(^2\) says that the teacher must not accept mediocre

performance in repetition. She must insist that the children imitate the model accurately. This means that the children must use the same rate, intonation, pause, and pitch.

The children must know immediately whether their responses are satisfactory or unsatisfactory. Each teacher will have a different method of conveying the message—facial, verbal, etc., expressions. The important thing is that the children get the message. Then the teacher must be consistent in the method used to get the message across to the children.

A. Dialogue/Narrative

1. Steps in handling a dialogue/narrative

   a. The teacher may use whatever visual aids and other means necessary and appropriate to convey the dialogue's meaning to the children. Appropriate pictures, puppets, and pantomiming can be used to introduce the dialogue. The teacher should try to vary the introduction of a dialogue/narrative.

      Approach A: If the teacher feels that a preliminary explanation is necessary to clarify the concepts or vocabulary in the dialogue, she can do so before she introduces the dialogue in its entirety. This may consist of an explanation of the new concepts or relating previously learned concepts and recalling them. Then the teacher goes through the entire dialogue at a normal, rapid rate and with the appropriate stress and intonation.

      Approach B: The teacher can go into the dialogue without explanations, interrupting whenever necessary with explanations of the concepts and the vocabulary. She can elaborate on the dialogue, use synonyms, and paraphrase certain portions of the dialogue as she goes along. Then she repeats the dialogue all the way through without any interruptions the second time, using normal, rapid rate of speech and appropriate stress and intonation.

   b. The teacher, after using "Approach A" or "Approach B", repeats the dialogue again without any interruption. As a variation, the children can be asked to keep their eyes closed as they listen. This helps them to concentrate and also helps to eliminate a lot of distractions. The impor-
tant point here is that the class is being familiarized with the meaning, the patterns, and the sounds of the language. Note: Whenever the teacher repeats the dialogue, she must keep the stress and intonation pattern constant until that pattern has been learned. Then variations can be introduced. For example, the stress on a word may change with the change in emphasis conveyed.

c. The children can be asked to answer questions about the dialogue. This provides a check on comprehension and also serves as a means of practicing the patterns introduced. To prevent negative reinforcement, the teacher should provide the right response immediately if no response is forthcoming or when the wrong response is given.

d. The teacher models the dialogue line by line and the class repeats each line after the teacher. This procedure can be repeated several times.

e. The teacher divides the class into groups to take different roles. She must set up definite signals to identify whose turn it is to speak. The teacher models each line for each group before the group speaks a line.

f. Individual pupils can be asked to take the different roles.

g. The teacher should alternate between individual repetition and choral repetition. This not only helps to sustain interest but also helps the teacher check on the progress of individual children.

h. The teacher should remember to treat the dialogues as a conversation between persons rather than a series of lines spoken.

2. Follow-through

Whenever a dialogue/narrative is reintroduced at another time, the teacher must refresh the children's memory by some sort of review. It should not be taken for granted that the children will remember the details.
The teacher is free to expand the dialogue once she feels that the children have a good mastery of the structures. More lines or characters can be added and the vocabulary changed. In expanding and adapting, however, the teacher has to always keep in mind the immediate targets, the previous targets, and those that have not yet been introduced. Any alterations within these limits is not only permissible but recommended.

B. Exercises

Mary Finocchiaro states that:

Many repetitions are needed to develop habits. Learning any skill takes place in proportion to practice in that skill.  

The exercises serve this purpose. But the teacher must bear in mind Sibayan's admonition that repeating should be done in spaced periods and in different situations. The children should be encouraged to practice the patterns in various situations.

Before proceeding with any of the exercises, the teacher and the child must have a clear understanding as to what the procedure is for each exercise. The teacher should provide enough examples of how the cues are utilized before the children are asked to respond to the cues. Any shift from one exercise to another must be clear-cut and the directions precise so that the children will not be confused.

The teacher must move through the exercises smoothly and at a fast pace in order to keep up the children's interest and attention. Moving at a fast pace also prevents the necessity of repeating directions because the children's attention has not been permitted to lag. It also makes it easier for the children to adhere more closely to natural rhythm and intonation patterns.

In choosing the exercises to be practiced during a particular language session, the teacher should select with care, especially

3 Finocchiaro, op. cit. (Referring to pp. 33-4).
when a progression exercise is called for. The progression must be adhered to. As an example, in the exercises for the expletive "There" there are separate exercises for "There is" and "There are." Then there is an exercise combining the two where the children must make a choice between the two.

The exercises presented here are stripped of any embellishments. The teacher must provide the proper context and situations to make them meaningful for a particular class. The teacher has more freedom of choice with the exercises than she has with the dialogue or narrative.

Because young children are enthusiastic and eager to please the teacher, the teacher has an advantage. By making certain that the exercises are more than repeating after the model, the teacher can capitalize on the children's enthusiasm and eagerness to please the teacher.

There are several types of exercises included in the lessons.

1. Repetition of model

   The teacher models the utterance and the children repeat it exactly as said. Caution: If used excessively, it can lead to meaningless parroting.

2. Substitution of words or phrases

   In a substitution exercise, the children use another word or phrase (usually of the same class) in place of a word or phrase in the modeled utterance.

   Example:  
   Teacher:  He jumped from the porch. 
   Children: He jumped from the porch. 
   Teacher: fell (pause) He fell from the porch. 
   Children: He fell from the porch. 
   Teacher: leaped 
   Children: He leaped from the porch.

   A variation of this exercise would be the multiple slot substitution. Here the slot where the substitution takes place changes each time or from time to time. When this happens, the teacher must show the children where the
substitution is taking place by modeling the previous pattern, the new word or phrase to be substituted, and the resultant pattern with the substitution made. The lack of correct models may be a source of confusion.

Example:

Teacher: The apple fell on the ground.
Children: (Two possible replies)
         The boy fell on the ground.
         The apple fell on the boy.

To prevent this, the teacher provides adequate models.

Example:

Teacher: The apple fell on the ground.
Children: (pause) boy
Teacher: The apple fell on the boy.
Children: car
Teacher: The apple fell on the car.
Children: coconut (pause) The coconut fell on the car.
Teacher: branch
Children: The branch fell on the car.

In a substitution type of exercise, the substitution may require other parts of the pattern to be changed. The teacher and the class must be aware of these necessary changes.

Example:

Teacher: She lost her dog.
Children: She lost her dog.
Teacher: He (pause) He lost his dog.
Children: He lost his dog.
Teacher: They
Children: They lost their dog.

3. Transformation or conversion

This kind of exercise has the children carry out transformations such as changing a statement to a question, an affirmative statement to a negative statement, a singular noun to a plural noun, or present tense to the past.

Example: Teacher: The boy is fighting. (She then asks a child to change this to a question or
an "asking" sentence.

Child: Is the boy fighting?

It is not necessary to use words like negative, past tense, etc., to explain the desired response.

4. Directed practice.

This type of exercise requires that a child ask another child a question. The second child has to give an answer. Initially, by way of directing the children, the teacher can go through the following steps:

Step I: Teacher tells Child A: "A, ask B 'Do you want to ride with me?"
Child A says: "B, do you want to ride with me?"
Teacher says to B: "Now you answer by saying 'Yes, I do.' or 'No, I don't.'"
Child B says: "Yes, I do."

Step II: Teacher says, "A, ask B again if he wants to ride with you."
Child A: "B, do you want to ride with me?"
Teacher says to B: "B, answer A."
Child B: "Yes, I do."

(If the child is unsure at Step II, the teacher can whisper or model the utterance for him to repeat.)

Step III: Now use the substitution exercise pattern and cue the child for further practice in using the same language structure with different verbs.

5. Expansion

In this type of exercise, the children are cued with the word or phrase to be added to a given sentence.

Example:

Teacher: I walked to school.
Child: I walked to school.
Teacher: yesterday (pause) I walked to school yesterday.
Child: I walked to school yesterday.
Teacher: with my brother
Child: I walked to school yesterday with my brother.
6. Combination or integration

Here the children are asked to combine two short sentences into one.

Example: 
Teacher: Sally has a kitten. It's white.
Child: Sally's kitten is white.
Teacher: (pause) That hat belongs to Mike. It's red.
Child: Mike's hat is red.

7. Free response

The teacher asks a standard question and the children give varied, free responses. The children may be cued by word, picture, or object.

Example: 
Teacher: What's in the box?
Child: There's a frog in the box.

The exercises listed above are often combined in the lessons in a variety of ways. Other variations that seem appropriate and interesting should be used. As the teacher and children become familiar and comfortable with the various kinds of exercises, the teacher should be able to adapt them to particular needs and opportunity.

Drillwork is not an end in itself, but merely a means of intensive, concentrated practice. Only when the drills lead to normal use of language structures in real situations can these be said to have a real value.

C. Transfer

How successful any language program is is measured by how well the learner can independently manipulate the language patterns acquired in varied situations. As stated by J. Donald Bowen:

... the ultimate success of the teaching effort must be judged not on how well students reproduce sentences, but on the skill they show in creating new ones, sentences they have never heard or
used before - or indeed sentences which no
one else has ever heard or used before. 5

The teacher must provide many opportunities throughout the
school day in which the children can utilize, in natural situa-
tions, the language patterns learned. These situations can in-
volve pupil activities and interests in and out of school. This
may sometimes require the teacher to structure the situation
just enough so that it necessitates the use of a particular pat-
tern without a model being given. The only cues would be con-
textual cues. The structuring is also necessary to insure that
the student does not need to use a language pattern that is not
in his repertoire.

The notes section of each lesson provides the teacher with
some suggestions to effect transfer. Many of the suggested
activities bear close resemblance to directed practice exercises.
The ingenious teacher will find many other ways besides those
suggested as much depends on integration with the rest of the
school curriculum.

The writers of these materials feel that the transfer stage
in an oral language development program is of utmost impor-
tance. Loban, Ryan, and Squire summarize the writers' feel-
ings about this phase very well:

Clearly, improvement in language learning, occurs
most surely in situations featuring bona fide com-
munication. Pupils must have something to express,
a desire to express it, and someone to whom they
wish to express it. Only in such circumstances
does instruction have any hope of improving pupils'
facility in expression. 6

5 J. Donald Bowen, "Applications of Grammatical Analysis to
Language Teaching," (Virginia French Allen, editor), (Champaign,
6 Walter Loban, Margaret Ryan, and James R. Squire, Teaching
Language and Literature (New York: Harcourt, Brace and World,
Integration with the rest of the school day

To be most effective, an oral language program should be integrated with the rest of the curriculum areas as much as possible. The alert teacher will take advantage of every opportunity to put into practical use those structures that have been introduced to the children in the language lessons. This reinforces learning and makes it more meaningful.

The children must be helped to understand that standard English is to be used during most of the school day. There must be a clear-cut understanding as to when the use of standard English is appropriate and when the use of dialect is appropriate.

The teacher can contrive situations during the school day which lend themselves well to the practice of current targets. For example, after the present progressive has been introduced, the children can be asked to tell what's happening or what they're doing. When the comparative-superlative forms have been introduced, the children can be asked to compare various things during the arithmetic, science, or social studies periods. There the teacher can take advantage of situations where these structures can be used naturally.

There are many poems and stories that contain the grammatical structures which are treated as targets. These poems and stories can be used by the creative teacher to provide the children with more practice in using the structures being learned. The poems may be used for choral speaking or dramatization. The teacher can use the stories in different ways. Especially effective are those stories that contain repetitive phrases. The stories can be dramatized or read by the teacher with the children repeating those parts that contain the target structures.

Some poems appropriate to a lesson are suggested as extra materials. These and others that a resourceful teacher may be familiar with can be used outside the language periods.

General notes to the teacher

A. When children have difficulty producing a particular language pattern and the teacher suspects that this may be due to dialect interference, the teacher may resort to the same types of recognition and discrimination exercises utilized in the phonology lessons. Refer to the section "Basic Steps in Teaching Pronunciation."

134
Example: Teacher: We'll go to the store now.
Children: We go to store now.

Recognition and discrimination exercises:

1. The teacher repeats both of the above sentences or one of the sentences twice. The children must indicate whether the two sentences are alike or different.

2. The teacher models the language structure being taught. She tells the children that this is the sentence they are to listen for. She can say that this is the sentence that is used in school. She then models both sentences and the children are to signal whenever she repeats the target sentence.

B. Often the teacher may be so involved in listening just for the specific target that she fails to evaluate the child's complete response. Since the teacher is working towards the control of standard English, she must be alert to all the language structures the child uses. By listening carefully, the teacher can prevent negative reinforcement caused by approving inappropriate responses.

If the child's response contains a structure that has not yet been introduced as a target, the teacher can provide the appropriate response without any comment and have the child repeat the response. If the child's response contains a structure that had previously been introduced as a target, the teacher can call the child's attention to the fact. She can encourage the child to recall what had been introduced or provide the appropriate response. At this point the teacher should feel flexible enough to shift back to previously introduced exercises if she feels that the situation warrants it.

C. There may be occasions when contractions cause difficulties for the students. When this does occur, the teacher may introduce the full form first and then gradually work towards contracted forms, remembering that the use of the contracted forms is the ultimate goal.

One of the difficulties arising may be the students contracting but still not dropping the word contracted.
Example: "She's is going."
Another difficulty may be the confusion between the singular contracted form and the plural noun.

Example: Teacher: The boy's sleeping. 
Child: The boys sleeping.

The difficulties mentioned above seem to be stages that the students go through in acquiring a mastery of standard English. There is a growing awareness of a difference between their dialect version and the standard version. But there is still confusion as to exactly where the difference is or where changes belong. The teacher should not feel frustrated nor feel that the children are being obstinate. Patient and consistent efforts will bring about the mastery of the standard version. Here again, recognition and discrimination exercises can be utilized.

D. The teacher may refer to the sequence chart for that particular grade level to check what targets have been introduced prior to a certain lesson and what targets come after this lesson. The sequence chart can also help the teacher locate where a similar target appears in a preceding grade. She may need this information when she wants to give the students more exercises than what is provided for her grade level or when she needs to do some reviewing with her students.

As stated before, the purpose of these lessons is to help children acquire a command of standard English. As the teacher works with these lessons, it may help her to keep Virginia Allen's definition of "command" in mind:

To command something is not merely to have a vague notion of it, but rather to be able to summon it up at will. The student must be given the ability to summon up the standard dialect whenever he himself wants to use it, in any situation where fluency in that dialect would be to his advantage. 7

I ate the bugs in your garden.

The monkey's tail is very long.
I'd collect the giraffe's leaves.
We would have fun.
And I'd be the one to feed the animals.

He also saw Charles' mother.
I'll get another gallon of milk and a pound of butter.
I have to buy a lot of food.
We don't have much milk left.
I found them.

It's friendlier than a cat.
I saw the cutest dog yesterday.
Some people like other animals better.
The dog is the best pet of all.
It had black, curly hair and a short tail.
Each person's pet is the best pet to him.

So the two frogs sang and sang.
I can jump to the farthest log.

LESSON Ia - Kindergarten

TARGETS: 1. Nominative pronouns: I, we, you, he, she, they  
2. Linking verbs: am, is, are (contracted), be  
3. Determiners: a/an

NOTES: 1. Use names of children.  
2. A child makes a sound. Another child tells what he/she is: "He's/She's/You're an owl."  
3. Two or more children go up. They decide on an animal. Each child tells about himself: "I'm big and strong. I say, 'Grr-rr'. I'm a lion." Then together they say: "We're big and strong. We say, 'Grr-rr'." Class, pointing to individuals, can say: "He's/She's/You're a lion."  
4. Teacher holds up a picture and cues: "...apple"  
C: I see an apple.  
5. Have objects in a pillowcase -- things with names beginning with vowel or consonant sounds. Child pulls out an object and identifies: "This is a ball."

DIALOGUE:

Pretending  
Pretending is fun. I'm a little gray kitten today. I say "meow." You be an animal today, too.  
A: I'm a fuzzy brown and white dog.  
   He's a shaggy black dog.  
   We run around.  
   We say "bow-wow-wow."  
B: She's a big, proud turkey.  
   He's a proud turkey also.  
   They strut around proudly.  
   They say "gobble, gobble, gobble."  
A: You're an old and tired donkey.  
   You hang your head.  
   You say "hee-haw."  
B: She's a baby chick.  
   I'm a baby chick.  
   We're fluffy and yellow.  
   We scamper around.  
   We say "peep, peep, peep."  
A: You be an animal next and make an animal sound.
EXERCISES

1. An orange is a fruit.
   apple
   avocado
   apricot

2. A pear is a fruit.
   banana
   pineapple
   lemon
   mango

3. Draw an eraser.
   airplane.
   arrow.
   island.
   onion.
   umbrella.
Now draw a pencil.
   wagon.
   cookie.
   bicycle.
   house.

4. A: B: C:
   We need a pet. I have a dog. I have an owl.
   (Repeat) cat.
   horse.
   pig.
   rabbit.
   (Repeat) eel.
   elephant.
   octopus.
   eagle.

5. You be my partner.
   the captain.
   the leader.
   the mother.
   the teacher.
   the giant.
   the witch.

6. She's tall.
   pretty.
   nice.

   big.
   smart.
   my brother.
8. We're hungry.
    They're angry.
    late.
    tired.
    happy.
    sad.

(Children can pantomime for "We're . . ." When "They're" is used, the class can be divided into two groups facing each other.
As they say the sentences, each can point to the other group.)

9. I'm five.
    fine.
    full.
    hungry.
    sleepy.

LESSON 1b - Kindergarten

TARGETS: 1. Nominative pronoun: it
          2. Determiners: the, another
          3. Lexical item: have

NOTES: 1. Children make believe they're toads. They can hop to their places and sit and stare.
        2. Pronunciation of "the": Because the choice of the vowel sound in this word, /i/ or /ə/, is determined by whether the word that follows begins with a vowel or a consonant.
            be sure to group the items chosen into those words that begin with the vowel and those that begin with a consonant.
            Once the students have gotten the conditioning pattern, use the determiner with words beginning with vowels and with consonants.
            Examples:
            /di/: the apple the elephant the orange
            /də/: the green apple the monkey the bird
        3. Teacher holds up an animal picture or an object and tells what it is. Children describe the animal or object using the pronoun "it" for the noun.
            T: I have a ball.
            A: It's red.
            B: It's round.
                (etc.)
        4. Variation of above. Have the actual object. Child closes his eyes. He feels the object and tells about it, using the
pronoun because he may not have guessed what it is.

5. Have pictures of two similar things or have actual objects. A child holds up one and says: "Here's a kitten." Then holds up the other and says: "Here's another kitten."

DIALOGUE:

Two Toads
I see something.
It's an ugly-looking thing.
It's brown and bumpy.
It's a toad.
I see another toad.
The second toad is big and fat.
The first toad and the second toad meet.
They sit and stare.
They wait and wait.
Soon they see a caterpillar.
Then they see another caterpillar.
The first toad and the second toad have a meal.
"We're still hungry," they say.
So they sit and wait again.

EXERCISES:

1. I have a dog. It's fuzzy.
   naught.
   brown and white.
   always hungry.

2. The kitten's sad. It's wet.
   cold.
   hungry.
   tired.

3. Look, I have a toy. It's new.
   book.
   sleeping bag.
   apr on.
   airplane.

4. It's a good pet.
   book.
   kite.
   bat.
   glove.
   wagon.

154
5. They're hungry.
   You're sad.
   We're happy.
   He's lonely.
   She's sleepy.

6. Take another ball.
   turn.
   color.
   book.

   guava's
   cookie's
   muffin's

B: Have another apple.
   guava.
   cookie.
   muffin.
LESSON IIa - Kindergarten

TARGETS: 1. Interrogative linking
2. Negative declarative linking
3. Predicate substitutes
4. Prepositions: on, like

2. Children tell what they are like and what they do:
   "I'm like a rabbit. I hop like a rabbit."
3. One child holds up something and asks another child:
   A: Is this a pencil?
   B: Yes, it is. or No, it's not.
   Teacher can ask a third child to give a complete answer:
   "It's a pencil." or "It's not a pencil."
4. Teacher asks a child to give another child directions as to where to place an object. Give a clue:
   CUES: table desk chair
   shelf floor book
   "Please put the pencil on the table."
5. Use stick puppets of dogs. Give the children the puppets. The puppy goes up to each dog and asks:
   "Are you my mother?"/"Am I your little dog?"
   Each dog in turn answers:
   "No, I'm not. /No, you're not.
   You're too little. /You're not spotted. /
   You're not big enough. /You're not black. /
   You're not pretty."
   The last dog can be the puppy's mother and answers:
   "Yes, I am. You're my little lost puppy."
6. Give a child the name of another child whom he is to find:
   He goes to several children to ask,
   "Are you (Name)?"
   to which the reply would be,
   "No, I'm not." or "Yes, I am."
   Or to ask,
   "Is your name ______?"
   to which the reply would be,
   "No, it's not." or "Yes, it is."
DIALOGUE:

Part 1 - A Toy
A: We see a toy on the table. It's not a ball. It's not a block.
B: Is it a top?
A: Yes, it is.
B: Is it a green top?
A: Silly. No, it's not. It's blue.
B: I'm like the top. I go round and round.

Part 2 - A Spider
A: Look! I see an ugly bug on the floor. It's not long. So it's not a centipede.
B: Be careful. Is it a spider?
A: Yes, it is. Is it dangerous?
B: No, it's not.
C: You're right. That spider's like a lizard.
A: Why?
C: They're not dangerous. They're both helpful.

EXERCISES:

1. I see a lizard on the table. desk. floor. chair. book. shelf.

2. A: I see a bug. B: Is it a spider? (Repeat) A: Yes, it is (a spider).
   fly? centipede? beetle? caterpillar?

3. I'm not a spider. centipede. ball. block. top. lizard. rabbit. pencil.

5. It's not a spider. It's a crab.
   beetle. bee.
   pen. pencil.
   horse. donkey.

6a. You look like my brother.
    sister.
    friend.
    (Name).

6b. I'm like a giant. I'm tall.
    flower. pretty.
    teacher. smart.
    policeman. strong.

*********

LESSON IIb - Kindergarten

TARGETS: 1. Prepositions: for, in
2. Noun substitute: mine
3. Objective pronoun: it

2. Let one child ask another child where something is. The second child answers that the object is "on" or "in" something:
   A: Where's your ball?
   B: It's on the table; in box.

3. One child asks another child if an object belongs to him. The second child answers.
   A: Is this your ball?
   B: Yes, it's mine. or No, it's not mine.
   (Use stick puppets of the different dogs also.)

4. One child tells another to "look for" something: "Let's look for your ball."

DIALOGUE:

Part 1 - A Lost Ball
A: Where's my ball? It isn't in my toy box.
B: Is this red ball yours?
A: No, it isn't mine. Mine is blue and yellow.
B: Let's look for it out in the yard.
A: Oh, look. I see it. It's on the roof.

Part 2 - The Raincoat
A: Where's your raincoat? (Substitute another item of clothing.)
B: It isn't in my bedroom. Please help me find it.
A: Is that red coat yours?

Utilization of lesson materials

The teacher’s attitude about these lessons is very important. The teacher should approach the language sessions with interest and enthusiasm. Her attitude will be conveyed to the children just as it will be if she feels that the lessons are boring and not very challenging. A skillful teacher can make a lesson come alive and convince the children that what she is presenting is worthy of their complete attention. Her efforts will result in greater learning on the part of the children.

As stated in the teacher’s guide portion, it is important that the teacher be thoroughly prepared each time she presents a lesson. She must know what the targets for the lesson are, what targets have already been introduced, and what targets are yet to be introduced. Thorough preparation is a necessity and so is flexibility in altering plans to suit the needs of the children and the occasion. Plans can be altered but it is very difficult to carry out something successfully without a plan.

Because the teacher is the model for the class, it is imperative that she be thoroughly familiar with the material that she is going to present. Preparation involves having all the materials needed on hand so that there will be no fumbling nor any unnecessary pauses. The teacher must have thought through all the directions she will be giving so that they are clear-cut and consistent. The teacher must also anticipate the kinds of responses she will get and the possible difficulties that may arise. The language session must move at a rapid pace with very little time for pauses that may distract the class or that may allow boredom to set in.

The teacher must also establish, at the very beginning, concise and specific signals and cues. She has to diligently adhere to them so that the children can respond immediately without lengthy directions and explanations being given each time a response is required. Once a pattern has been established, it becomes easier for the children and the teacher to work with maximum efficiency.

Nelson Brooks\(^2\) says that the teacher must not accept mediocre

---

125
performance in repetition. She must insist that the children imitate the model accurately. This means that the children must use the same rate, intonation, pause, and pitch.

The children must know immediately whether their responses are satisfactory or unsatisfactory. Each teacher will have a different method of conveying the message--facial, verbal, etc., expressions. The important thing is that the children get the message. Then the teacher must be consistent in the method used to get the message across to the children.

A. Dialogue/Narrative

1. Steps in handling a dialogue/narrative

   a. The teacher may use whatever visual aids and other means necessary and appropriate to convey the dialogue's meaning to the children. Appropriate pictures, puppets, and pantomiming can be used to introduce the dialogue. The teacher should try to vary the introduction of a dialogue/narrative.

      **Approach A:** If the teacher feels that a preliminary explanation is necessary to clarify the concepts or vocabulary in the dialogue, she can do so before she introduces the dialogue in its entirety. This may consist of an explanation of the new concepts or relating previously learned concepts and recalling them. Then the teacher goes through the entire dialogue at a normal, rapid rate and with the appropriate stress and intonation.

      **Approach B:** The teacher can go into the dialogue without explanations, interrupting whenever necessary with explanations of the concepts and vocabulary. She can elaborate on the dialogue, use synonyms, and paraphrase certain portions of the dialogue as she goes along. Then she repeats the dialogue all the way through without any interruptions the second time, using normal, rapid rate of speech and appropriate stress and intonation.

   b. The teacher, after using "Approach A" or "Approach B", repeats the dialogue again without any interruption. As a variation, the children can be asked to keep their eyes closed as they listen. This helps them to concentrate and also helps to eliminate a lot of distractions. The impor-
tant point here is that the class is being familiarized with the meaning, the patterns, and the sounds of the language. **Note:** Whenever the teacher repeats the dialogue, she must keep the stress and intonation pattern constant until that pattern has been learned. Then variations can be introduced. For example, the stress on a word may change with the change in emphasis conveyed.

c. The children can be asked to answer questions about the dialogue. This provides a check on comprehension and also serves as a means of practicing the patterns introduced. To prevent negative reinforcement, the teacher should provide the right response immediately if no response is forthcoming or when the wrong response is given.

d. The teacher models the dialogue line by line and the class repeats each line after the teacher. This procedure can be repeated several times.

e. The teacher divides the class into groups to take different roles. She must set up definite signals to identify whose turn it is to speak. The teacher models each line for each group before the group speaks a line.

f. Individual pupils can be asked to take the different roles.

g. The teacher should alternate between individual repetition and choral repetition. This not only helps to sustain interest but also helps the teacher check on the progress of individual children.

h. The teacher should remember to treat the dialogues as a conversation between persons rather than a series of lines spoken.

2. Follow-through

Whenever a dialogue/narrative is reintroduced at another time, the teacher must refresh the children's memory by some sort of review. It should not be taken for granted that the children will remember the details.
The teacher is free to expand the dialogue once she feels that the children have a good mastery of the structures. More lines or characters can be added and the vocabulary changed. In expanding and adapting, however, the teacher has to always keep in mind the immediate targets, the previous targets, and those that have not yet been introduced. Any alterations within these limits is not only permissible but recommended.

B. Exercises

Mary Finocchiaro states that:

Many repetitions are needed to develop habits. Learning any skill takes place in proportion to practice in that skill.³

The exercises serve this purpose. But the teacher must bear in mind Sibayan's admonition that repeating should be done in spaced periods and in different situations.⁴ The children should be encouraged to practice the patterns in various situations.

Before proceeding with any of the exercises, the teacher and the child must have a clear understanding as to what the procedure is for each exercise. The teacher should provide enough examples of how the cues are utilized before the children are asked to respond to the cues. Any shift from one exercise to another must be clear-cut and the directions precise so that the children will not be confused.

The teacher must move through the exercises smoothly and at a fast pace in order to keep up the children's interest and attention. Moving at a fast pace also prevents the necessity of repeating directions because the children's attention has not been permitted to lag. It also makes it easier for the children to adhere more closely to natural rhythm and intonation patterns.

In choosing the exercises to be practiced during a particular language session, the teacher should select with care, especially

³ Finocchiaro, op. cit. (Referring to pp. 33-4).
when a progression exercise is called for. The progression must be adhered to. As an example, in the exercises for the expletive "There" there are separate exercises for "There is" and "There are." Then there is an exercise combining the two where the children must make a choice between the two.

The exercises presented here are stripped of any embellishments. The teacher must provide the proper context and situations to make them meaningful for a particular class. The teacher has more freedom of choice with the exercises than she has with the dialogue or narrative.

Because young children are enthusiastic and eager to please the teacher, the teacher has an advantage. By making certain that the exercises are more than repeating after the model, the teacher can capitalize on the children's enthusiasm and eagerness to please the teacher.

There are several types of exercises included in the lessons.

1. Repetition of model

   The teacher models the utterance and the children repeat it exactly as said. Caution: If used excessively, it can lead to meaningless parroting.

2. Substitution of words or phrases

   In a substitution exercise, the children use another word or phrase (usually of the same class) in place of a word or phrase in the modeled utterance.

   Example: Teacher: He jumped from the porch.
   Children: He jumped from the porch.
   Teacher: fell (pause) He fell from the porch.
   Children: He fell from the porch.
   Teacher: leaped
   Children: He leaped from the porch.

   A variation of this exercise would be the multiple slot substitution. Here the slot where the substitution takes place changes each time or from time to time. When this happens, the teacher must show the children where the
substitution is taking place by modeling the previous pattern, the new word or phrase to be substituted, and the resultant pattern with the substitution made. The lack of correct models may be a source of confusion.

Example:  
Teacher: The apple fell on the ground.  
(pause) boy  
Children: (Two possible replies)  
The boy fell on the ground.  
The apple fell on the boy.  

To prevent this, the teacher provides adequate models.

Example:  
Teacher: The apple fell on the ground.  
(pause) boy (pause) The apple fell on the boy.  
Children: The apple fell on the boy.  
Teacher: car  
Children: The apple fell on the car.  
Teacher: coconut (pause) The coconut fell on the car.  
Children: The coconut fell on the car.  
Teacher: branch  
Children: The branch fell on the car.  

In a substitution type of exercise, the substitution may require other parts of the pattern to be changed. The teacher and the class must be aware of these necessary changes.

Example:  
Teacher: She lost her dog.  
Children: She lost her dog.  
Teacher: He (pause) He lost his dog.  
Children: He lost his dog.  
Teacher: They  
Children: They lost their dog.

3. Transformation or conversion

This kind of exercise has the children carry out transformations such as changing a statement to a question, an affirmative statement to a negative statement, a singular noun to a plural noun, or present tense to the past.

Example: Teacher: The boy is fighting. (She then asks a child to change this to a question or
an "asking" sentence.)

Child: Is the boy fighting?

It is not necessary to use words like negative, past tense, etc., to explain the desired response.

4. Directed practice

This type of exercise requires that a child ask another child a question. The second child has to give an answer. Initially, by way of directing the children, the teacher can go through the following steps:

Step I: Teacher tells Child A: "A, ask B 'Do you want to ride with me?'"  
Child A says: "B, do you want to ride with me?"  
Teacher says to B: "Now you answer by saying 'Yes, I do.' or 'No, I don't.'"  
Child B says: "Yes, I do."

Step II: Teacher says, "A, ask B again if he wants to ride with you."  
Child A: "B, do you want to ride with me?"  
Teacher says to B: "B, answer A."  
Child B: "Yes, I do."

(If the child is unsure at Step II, the teacher can whisper or model the utterance for him to repeat.)

Step III: Now use the substitution exercise pattern and cue the child for further practice in using the same language structure with different verbs.

5. Expansion

In this type of exercise, the children are cued with the word or phrase to be added to a given sentence.

Example:  
Teacher: I walked to school.  
Child: I walked to school.  
Teacher: yesterday (pause) I walked to school yesterday.  
Child: I walked to school yesterday.  
Teacher: with my brother  
Child: I walked to school yesterday with my brother.
6. Combination or integration

Here the children are asked to combine two short sentences into one.

Example:  
Teacher:  Sally has a kitten. It's white.  
(pause) Sally's kitten is white.
Child:  Sally's kitten is white.
Teacher:  That hat belongs to Mike. It's red.
Child:  Mike's hat is red.

7. Free response

The teacher asks a standard question and the children give varied, free responses. The children may be cued by word, picture, or object.

Example:  
Teacher:  What's in the box?
Child:  There's a frog in the box.

The exercises listed above are often combined in the lessons in a variety of ways. Other variations that seem appropriate and interesting should be used. As the teacher and children become familiar and comfortable with the various kinds of exercises, the teacher should be able to adapt them to particular needs and opportunity.

Drillwork is not an end in itself, but merely a means of intensive, concentrated practice. Only when the drills lead to normal use of language structures in real situations can these be said to have a real value.

C. Transfer

How successful any language program is is measured by how well the learner can independently manipulate the language patterns acquired in varied situations. As stated by J. Donald Bowen:

... the ultimate success of the teaching effort must be judged not on how well students reproduce sentences, but on the skill they show in creating new ones, sentences they have never heard or
used before - or indeed sentences which no one else has ever heard or used before. 5

The teacher must provide many opportunities throughout the school day in which the children can utilize, in natural situations, the language patterns learned. These situations can involve pupil activities and interests in and out of school. This may sometimes require the teacher to structure the situation just enough so that it necessitates the use of a particular pattern without a model being given. The only cues would be contextual cues. The structuring is also necessary to insure that the student does not need to use a language pattern that is not in his repertoire.

The notes section of each lesson provides the teacher with some suggestions to effect transfer. Many of the suggested activities bear close resemblance to directed practice exercises. The ingenious teacher will find many other ways besides those suggested as much depends on integration with the rest of the school curriculum.

The writers of these materials feel that the transfer stage in an oral language development program is of utmost importance. Loban, Ryan, and Squire summarize the writers' feelings about this phase very well:

Clearly, improvement in language learning, occurs most surely in situations featuring bona fide communication. Pupils must have something to express, a desire to express it, and someone to whom they wish to express it. Only in such circumstances does instruction have any hope of improving pupils' facility in expression. 6

---

Integration with the rest of the school day

To be most effective, an oral language program should be integrated with the rest of the curriculum areas as much as possible. The alert teacher will take advantage of every opportunity to put into practical use those structures that have been introduced to the children in the language lessons. This reinforces learning and makes it more meaningful.

The children must be helped to understand that standard English is to be used during most of the school day. There must be a clear-cut understanding as to when the use of standard English is appropriate and when the use of dialect is appropriate.

The teacher can contrive situations during the school day which lend themselves well to the practice of current targets. For example, after the present progressive has been introduced, the children can be asked to tell what's happening or what they're doing. When the comparative-superlative forms have been introduced, the children can be asked to compare various things during the arithmetic, science, or social studies periods. There the teacher can take advantage of situations where these structures can be used naturally.

There are many poems and stories that contain the grammatical structures which are treated as targets. These poems and stories can be used by the creative teacher to provide the children with more practice in using the structures being learned. The poems may be used for choral speaking or dramatization. The teacher can use the stories in different ways. Especially effective are those stories that contain repetitive phrases. The stories can be dramatized or read by the teacher with the children repeating those parts that contain the target structures.

Some poems appropriate to a lesson are suggested as extra materials. These and others that a resourceful teacher may be familiar with can be used outside the language periods.

General notes to the teacher

A. When children have difficulty producing a particular language pattern and the teacher suspects that this may be due to dialect interference, the teacher may resort to the same types of recognition and discrimination exercises utilized in the phonology lessons. Refer to the section "Basic Steps in Teaching Pronunciation."
Example: Teacher: We'll go to the store now.
Children: We go to store now.

Recognition and discrimination exercises:

1. The teacher repeats both of the above sentences or one of the sentences twice. The children must indicate whether the two sentences are alike or different.

2. The teacher models the language structure being taught. She tells the children that this is the sentence they are to listen for. She can say that this is the sentence that is used in school. She then models both sentences and the children are to signal whenever she repeats the target sentence.

B. Often the teacher may be so involved in listening just for the specific target that she fails to evaluate the child's complete response. Since the teacher is working towards the control of standard English, she must be alert to all the language structures the child uses. By listening carefully, the teacher can prevent negative reinforcement caused by approving inappropriate responses.

If the child's response contains a structure that has not yet been introduced as a target, the teacher can provide the appropriate response without any comment and have the child repeat the response. If the child's response contains a structure that had previously been introduced as a target, the teacher can call the child's attention to the fact. She can encourage the child to recall what had been introduced or provide the appropriate response. At this point the teacher should feel flexible enough to shift back to previously introduced exercises if she feels that the situation warrants it.

C. There may be occasions when contractions cause difficulties for the students. When this does occur, the teacher may introduce the full form first and then gradually work towards contracted forms, remembering that the use of the contracted forms is the ultimate goal.

One of the difficulties arising may be the students contracting but still not dropping the word contracted.
Example: "She's is going."
Another difficulty may be the confusion between the singular contracted form and the plural noun.

Example:  
Teacher:  The boy's sleeping.  
Child:  The boys sleeping.

The difficulties mentioned above seem to be stages that the students go through in acquiring a mastery of standard English. There is a growing awareness of a difference between their dialect version and the standard version. But there is still confusion as to exactly where the difference is or where changes belong. The teacher should not feel frustrated nor feel that the children are being obstinate. Patient and consistent efforts will bring about the mastery of the standard version. Here again, recognition and discrimination exercises can be utilized.

D. The teacher may refer to the sequence chart for that particular grade level to check what targets have been introduced prior to a certain lesson and what targets come after this lesson. The sequence chart can also help the teacher locate where a similar target appears in a preceding grade. She may need this information when she wants to give the students more exercises than what is provided for her grade level or when she needs to do some reviewing with her students.

As stated before, the purpose of these lessons is to help children acquire a command of standard English. As the teacher works with these lessons, it may help her to keep Virginia Allen's definition of "command" in mind:

To command something is not merely to have a vague notion of it, but rather to be able to summon it up at will. The student must be given the ability to summon up the standard dialect whenever he himself wants to use it, in any situation where fluency in that dialect would be to his advantage.

LESSON Ia - Kindergarten

TARGETS:  
1. Nominative pronouns: I, we, you, he, she, they  
2. Linking verbs: am, is, are (contracted), be  
3. Determiners: a/an

NOTES:  
1. Use names of children.  
2. A child makes a sound. Another child tells what he/she is: "He's/She's/You're an owl."  
3. Two or more children go up. They decide on an animal. Each child tells about himself: "I'm big and strong. I say, 'Grr-rr'. I'm a lion." Then together they say: "We're big and strong. We say, 'Grr-rr'." Class, pointing to individuals, can say: "He's/She's/You're a lion."  
4. Teacher holds up a picture and cues: "...apple"  
C: I see an apple.  
5. Have objects in a pillowcase -- things with names beginning with vowel or consonant sounds. Child pulls out an object and identifies: "This is a ball."

DIALOGUE:

Pretending  
Pretending is fun. I'm a little gray kitten today. I say "meow."  
You be an animal today, too.  
A: I'm a fuzzy brown and white dog.  
   He's a shaggy black dog.  
   We run around.  
   We say "bow-wow-wow."  
B: She's a big, proud turkey.  
   He's a proud turkey also.  
   They strut around proudly.  
   They say "gobble, gobble, gobble."  
A: You're an old and tired donkey.  
   You hang your head.  
   You say "hee-haw."  
B: She's a baby chick.  
   I'm a baby chick.  
   We're fluffy and yellow.  
   We scamper around.  
   We say "peep, peep, peep."  
A: You be an animal next and make an animal sound.
EXERCISES

1. An orange is a fruit.
   apple
   avocado
   apricot
2. A pear is a fruit.

LESSON Ib - Kindergarten

TARGETS: 1. Nominative pronoun: it
2. Determiners: the, another
3. Lexical item: have

NOTES: 1. Children make believe they're toads. They can hop to their places and sit and stare.
2. Pronunciation of "the": Because the choice of the vowel sound in this word, /i/ or /ə/, is determined by whether the word that follows begins with a vowel or a consonant, be sure to group the items chosen into those words that begin with the vowel and those that begin with a consonant. Once the students have gotten the conditioning pattern, use the determiner with words beginning with vowels and with consonants.
Examples:
/i/: the apple the elephant the orange
/ə/: the green apple the monkey the bird
3. Teacher holds up an animal picture or an object and tells what it is. Children describe the animal or object using the pronoun "it" for the noun.
T: I have a ball.
A: It's red.
B: It's round.
    (etc.)
4. Variation of above. Have the actual object. Child closes his eyes. He feels the object and tells about it, using the
pronoun because he may not have guessed what it is.

5. Have pictures of two similar things or have actual objects. A child holds up one and says: "Here's a kitten." Then holds up the other and says: "Here's another kitten."

DIALOGUE:

Two Toads
I see something.
It's an ugly-looking thing.
It's brown and bumpy.
It's a toad.
I see another toad.
The second toad is big and fat.
The first toad and the second toad meet.
They sit and stare.
They wait and wait.
Soon they see a caterpillar.
Then they see another caterpillar.
The first toad and the second toad have a meal.
"We're still hungry," they say.
So they sit and wait again.

EXERCISES:

1. I have a dog. It's fuzzy.
   naughtly.
   brown and white.
   always hungry.

2. The kitten's sad. It's wet.
   cold.
   hungry.
   tired.

3. Look, I have a toy. It's new.
   book.
   sleeping bag.
   an apron.
   airplane.

4. It's a good pet.
   book.
   kite.
   bat.
   glove.
   wagon.
5. They're hungry.
    You're sad.
    We're happy.
    He's lonely.
    She's sleepy.

6. Take another ball.
    turn.
    color.
    book.

    guava's
    cookie's
    muffin's

    B: Have another apple.
    guava.
    cookie.
    muffin.
LESSON IIa - Kindergarten

TARGETS: 1. Interrogative linking
2. Negative declarative linking
3. Predicate substitutes
4. Prepositions: on, like

2. Children tell what they are like and what they do: "I'm like a rabbit. I hop like a rabbit."
3. One child holds up something and asks another child:
   A: Is this a pencil?
   B: Yes, it is. or No, it's not.
   Teacher can ask a third child to give a complete answer: "It's a pencil." or "It's not a pencil."
4. Teacher asks a child to give another child directions as to where to place an object. Give a clue:
   CUES: table desk chair shelf floor book
   "Please put the pencil on the table."
5. Use stick puppets of dogs. Give the children the puppets. The puppy goes up to each dog and asks:
   "Are you my mother?"/"Am I your little dog?"
   Each dog in turn answers:
   "No, I'm not. /No, you're not.
   You're too little. /You're not spotted. /
   You're not big enough. /You're not black. /
   You're not pretty."
   The last dog can be the puppy's mother and answers:
   "Yes, I am. You're my little lost puppy."
6. Give a child the name of another child whom he is to find:
   He goes to several children to ask,
   "Are you (Name)?"
   to which the reply would be,
   "No, I'm not." or "Yes, I am."
   Or to ask,
   "Is your name ______?"
   to which the reply would be,
   "No, it's not." or "Yes, it is."
DIALOGUE:

Part 1 - A Toy
A: We see a toy on the table. It's not a ball. It's not a block.
B: Is it a top?
A: Yes, it is.
B: Is it a green top?
A: Silly. No, it's not. It's blue.
B: I'm like the top. I go round and round.

Part 2 - A Spider
A: Look! I see an ugly bug on the floor. It's not long. So it's not a centipede.
B: Be careful. Is it a spider?
A: Yes, it is. Is it dangerous?
B: No, it's not.
C: You're right. That spider's like a lizard.
A: Why?
C: They're not dangerous. They're both helpful.

EXERCISES:

1. I see a lizard on the table.
   desk.
   floor.
   chair.
   book.
   shelf.

2. A: I see a bug. Is it a spider? (Repeat)  
   B: Yes, it is (a spider).
   A: No, it's not (a spider).

3. I'm not a spider.  
   centipede.

5. It's not a spider. It's a crab.
   beetle. bee.
   pen. pencil.
   horse. donkey.
6a. You look like my brother.
   sister.
   friend.
   (Name).
6b. I'm like a giant. I'm tall.
   flower. pretty.
   teacher. smart.
   policeman. strong.

LES S ON IIb - Kindergarten

TARGETS: 1. Prepositions: for, in
   2. Noun substitute: mine
   3. Objective pronoun: it

   2. Let one child ask another child where something is. The second child answers that the object is "on" or "in" something:
   A: Where's your ball?
   B: It's on the table; in the box.
   3. One child asks another child if an object belongs to him. The second child answers.
   A: Is this your ball?
   B: Yes, it's mine. or No, it's not mine.
   (Use stick puppets of the different dogs also.)
   4. One child tells another to "look for" something: "Let's look for your ball."

DIALOGUE:

Part 1 - A Lost Ball
A: Where's my ball? It isn't in my toy box.
B: Is this red ball yours?
A: No, it isn't mine. Mine is blue and yellow.
B: Let's look for it out in the yard.
A: Oh, look. I see it. It's on the roof.

Part 2 - The Raincoat
A: Where's your raincoat? (Substitute another item of clothing.)
B: It isn't in my bedroom. Please help me find it.
A: Is that red coat yours?
B: No, that red coat isn't mine. Mine is yellow.
A: Let's look for it in the kitchen.
B: It isn't on the chair.
A: Oh, there it is.
B: Where?
A: Over on the table. That isn't the right place for it.
B: I know.

EXERCISES:

LESSON IIc - Kindergarten

TARGETS: 1. Objective pronouns: him, her, them, me, you
          2. Preposition: with
          3. Lexical item: like

NOTES: 1. Substitute names of children. (Teacher provide names.)
          2a. One child asks the whereabouts of another child or children. Next child answers using the objective pronouns:
              A: Where's Nancy?
              B: I see her. She's on the slide.
          2b. A child tells who another child is with:
              "Nancy's with Mary."
          3. One child asks another child to do something with him:
              "Run with me." Or the child suggests that they do something with another child or children:
              "Let's play with him/her/them."
          4. Use pictures for Part 2.
5. Teacher can hold up pictures of similar objects with identifying characteristics. Each child tells which object he likes: "I like the red ball."

DIALOGUE:

Part 1 - A New Ball
A: Where's (Name)?
B: I see him/her. He's/She's on the slide. (Name) and (Name) are with him/her.
A: Let's call them. I have a new ball. Watch me throw it.
B: I know a game. We throw the ball up. Then we catch it. The catcher's the next tosser.
A: Let's play that game. I like it. (Name), you be the first tosser.

Part 2 - A Guessing Game
A: Are you a boy or a girl?
B: I'm not a boy/girl. I'm a girl/boy. You're silly. Now I have a question for you. Tell me, is this a rooster or a hen?
A: That's not a hen. It's a rooster. I like this game. I like playing with you. Is this an apple or an orange?
B: It's not an orange. It's an apple.
A: Now you ask me a question.
B: Are we little? Are we big?
A: Silly. We're not big. We're little. My daddy and your daddy are big.

EXERCISES:

C: I could tie my shoelaces last year.

6. Children pretend that there's a pet shop. The teacher can provide pictures of different kinds of animals suitable for pets. Children can take turns being shopkeepers and customers:

Shopkeeper: Would you like to buy a parrot?
Customer: Does it talk? (Ask whether the animal can do something.)
Shopkeeper: Yes, it talks.
Customer: I'll buy it. /I don't want a parrot.

DIALOGUE:

Pinky Rabbit

Boys and girls, do you help your mothers? Sometimes you may not be able to help. You may be busy. Pinky Rabbit wanted to play first. But he changed his mind. He decided to help his mother.

Mother: Pinky, would you help me clean our yard?
Pinky: I would, Mother, but I can't. Timothy Rabbit's coming to visit me. Could I help you later?
Mother: Yes, you could. Would you please throw this empty box away now?
Pinky: I may need it later. Could I keep it in my room instead?
Mother: You can. What will you and Timothy do?
Pinky: We could play hide and seek. But we might go looking for some carrots.
Mother: Would you like some cookies to take with you?
Pinky: I'd like that. We may not go. We might stay here to help you. Would you like us to do that?
Mother: Yes, I would. That would be nice.

LESSON VIg - Kindergarten

TARGETS: 1. Modals:
   a. would - negative declarative, negative predicate substitute
   b. will - negative declarative (contracted)
   c. shall - interrogative with the first person pronouns

NOTES: 1. Let each child tell about a naughty child they know of (without naming names). Tell why the child was naughty: "He/She wouldn't share his toys." Or each child can tell about someone breaking a rule: "He/She wouldn't wait for the green light."

2. Let each child ask another child if he would do or like something. Ask each child to answer truthfully:
   A: Would you like an apple?
   B: Yes, I would. /No, I wouldn't.

3. Each child asks another child or the teacher if he can bring or do something for that person:
   "Shall I help you now?"

4. "Shall" is seldom used as a predicate substitute, so the answer to the question in #3 may be:
   "No, you don't have to."
   "Yes, will you please."
   "No, you won't have to."
   "Yes."
   "No."

5. Have the children make believe that they're being very naughty. Their father or mother wants them to do something but they don't want to do it: "I won't go to bed now."

DIALOGUE:

Pee Wee

Pee Wee was such a naughty boy. He wouldn't listen to his parents. He wouldn't listen to anyone.

Mother: Pee Wee, please hurry. You'll be late for school.

Pee Wee: All right. But I won't eat my breakfast. I don't like papayas.

Mother: Shall I cook an egg for you?

Pee Wee: You can, but I won't eat it.

Mother: What would you like? Would you eat some pancakes?

Pee Wee: No, I wouldn't. Could I have a cupcake?

Mother: No. It wouldn't be good for you.

Pee Wee: Then I won't eat anything.

Mother: I won't let you go to school hungry. You must eat something.

Pee Wee: Then I won't go to school.

Mother: Yes, you will. You have to go to school.

Pee Wee: All right. Shall I finish my papaya first?

Mother: Yes, please do. You're a good boy.

LESSON VIh - Kindergarten

TARGETS: 1. Negative imperative
          2. Irregular plural: teeth
          3. Strengthening the use of noun determiner "many"

        2. Ask a child to make believe that he is a teacher/JPO/
           parent/principal and have him tell another child not
           to do or say something: "Don't run on the porch."
           Give sentences with "tooth/teeth/child/children." Each
           child is asked to change the sentence to use plural/
           singular forms of these nouns depending on the form of
           the noun used. They can also say funny things:
           T:  I gave my tooth away.
           C:  I gave my teeth away.
T: I saw a child.
C: I saw many children.
Examples: I have many baby teeth.
         The children sat down.
         My front tooth is new.
         A child saw me.
4. Give a sentence using the singular form of a noun and have children change it to the plural form using the determiner "many":
T: I see an apple.
C: I see many apples.
Examples: I met a child yesterday.
          He took a block from the shelf.
          She gave me a banana.
          I put a button in the basket.
5. For extra material use "Mice" by Rose Fyleman.

DIALOGUE:

Teeth
Children ought to brush their teeth after every meal. Clean teeth are healthy teeth. Healthy teeth are important. They help us chew things.
A: Don't forget to brush your teeth.
B: I won't. I brush them after every meal.
A: Children should take care of their teeth. The dental hygienist talked to us. She taught us the right way to brush our teeth.
B: Children ought to remember other things. Don't eat too many sweet things.
A: That's right. And don't bite hard things. You might crack a tooth.
B: Don't be afraid of the dentist. Don't yell and cry. He takes care of our teeth.
A: My dentist pulled a tooth last week. He didn't hurt me.

EXERCISES:

1. Don't play with matches.
   centipedes.
   strange dogs.
   firecrackers.
2. Don't swim alone.

LESSON VIIa - Kindergarten

TARGETS: 1. Mass nouns: flour, bread
2. Irregular past: brought, caught, ate
3. Irregular plural: loaves
4. Preposition: of
5. Strengthening the use of modals

NOTES: 1. Children can take parts. They could make believe they're Miss Wobblechin and her animals and act the parts out. Paper bag puppets could also be used.
2. Teacher can ask each child to answer these questions in complete sentences:
   a. "What did you bring to school today?"
   b. "What did you catch in your net/trap? We can make believe."
   c. "What fruits did you eat this week?"
3. Each child can pretend that it's Christmas morning. He'll act surprised and tell what Santa Claus brought him: "Look. Santa brought me a new bicycle."
4. Each child can ask for his favorite kind of bread at the make-believe store: "May I have a loaf of sweet bread?"
   Second child asks for more than one loaf of the same kind of bread.

DIALOGUE:

The Helpers

One day, Miss Wobblechin baked some bread. She had two loaves of brown bread and one loaf of raisin bread. The bread smelled so good. Her animal friends sat on the back steps. They wanted to have some of that good bread.
Bingo the Dog: Mmm. May I have a slice of your raisin bread?
Miss Wobblechin: You may. But first you must work for it.
Bingo: I'm too tired. I just brought in the cows from the pasture.
Miss W.:
Snip the Cat: Can I have a piece of bread, too?
Miss W.:
Snip: Oh, but I caught two rats for you this morning.
Miss W.:
Pick-Peck the Hen: Cluck, cluck. What about me? May I have some bread?
Miss W.: What can you do for me, Pick-Peck? Bingo brought the cows to me. Snip caught some rats.

Pick-Peck: I ate the bugs in your garden.

Miss W.: Good. You may have a slice of brown bread. Oh, oh. I need some flour. I used all of it to make the bread. Who will go to the store to buy two pounds of flour?

Snip: I will.
Bingo: I will.
Pick-Peck: I will, too.
Miss W.: What good helpers. You can all go. You can take turns carrying the bag of flour.

EXERCISES:

1. Flour is usually white.
   always soft.

13. The monkey ate a peanut, banana, cookie, sandwich, an apple, orange, everything.

LESSON VIIb - Kindergarten

TARGETS: 1. Noun possessives: /-z, -s/ endings
2. Mass noun: fun
3. Irregular plural: leaves
4. Noun substitute: one
5. Strengthening the use of modals "would, could"

NOTES: 1. The pronunciations of the possessive endings are dependent on the same conditions as those for the noun plural. Refer to the Notes Section of Lesson IVc.
2. Only use names ending in those sounds to which /-z/ and /-s/ can be added. Ask each child to tell about something that belongs to children or animals, or ask the children to put something belonging to them in a circle. Another child comes up and picks an item and identifies the owner: "This is Brenda's shoe." Examples: "Kay's dress is pretty." "The goat's whiskers are long."
3. Ask each child to tell about something he had a lot of fun doing: "I had a lot of fun swimming."
4. Teacher can talk about something that belongs to someone. A child transforms the sentence using the possessive form:
   T: That dog belongs to Leroy.
   C: That's Leroy's dog.
5. Teacher can use pictures, mounted on felt, of animals with distinctive parts missing. Use flannel board: "Whose tail is this?"

227
6. One child whispers to his neighbor about something that belongs to him. Then his neighbor shares the secret with the rest of the class:
Kay: (whispering) My dog has puppies.
Ernie: Kay's dog has puppies.
(Children whose names require a /-az/ to form the possessive—such as Charles, James, Constance—should only tell someone else's secret since this possessive allomorph will not be a target until the next lesson.)

7. Use pictures of animals for the dialogue.

8. Have a picture of a person or animal. Teacher points to a certain part. Ask the question:
T: What am I pointing at?
Children are asked to give answers using the possessive:
A: You're pointing at the bear's nose.
B: You're pointing at the boy's shoes.

DIALOGUE:

Animals at the Zoo
Come with me to the zoo. I'll tell you about the animals. We can have a lot of fun.
A: I see a naughty brown monkey. He sits in his cage. He sticks his tongue out at people. The monkey's tail is very long.
B: I like elephants. An elephant's ears are very big. He swings his trunk to and fro.
C: The zebra's stripes are very pretty. I like them.
D: I'd like the zoo keeper's job. I'd fill the elephant's water bucket.
B: And I'd be the one to feed the animals. I'd collect the giraffe's leaves.
C: We could help clean the animals' cages. We would have fun.

EXERCISES:

1a. Teacher Cues:  
Brenda has a puppy. It's brown. Ernie has a kitten. It's black. (Name) has a colt. It's funny. " has a calf. It's clowny. " has a guinea pig. It's soft. " has a canary. It's yellow.

LESSON VIIc - Kindergarten

TARGETS: 1. Noun possessive: /-az/ ending  
2. Lexical item: also  
3. Mass nouns: bubble gum, food, milk, butter, cereal, lettuce, celery, meat  
4. Irregular past: found  
5. Noun determiner: much

NOTES: 1. In the dialogue, substitute children's names which end in /-s, -z, -c, -j, -l/.
2. Show pictures of parts of animals -- ears, tails, faces, etc. Ask each child to identify the animals, using the possessive forms. Let children give a complete sentence: ...a pig's tail "I see a pig's tail."
3. Children pretend they're at the store. Each child asks for different amounts of the following items: "gum, food, milk, butter, cereal, lettuce, celery, meat": "May I please have a can of cat food?"
Prior to this, there can be a discussion of how these things can be purchased. Show actual items or pictures.
4. Have each child tell what he found at the beach or on a trip: "I found a pretty shell at the beach."
5. Each child can drop an item that belongs to him. Another child walks around the room and pretends to find the item. He announces his "find" to the class. The owner of the item claims it.
A: I found this bracelet.  
B: That's mine. /That's my bracelet.

DIALOGUE:

Part 1 - At the Store
James' mother took him to the store with her. He saw a lot of food there. He also saw Charles' mother.
James: Mother, will you buy me a package of bubble gum?
Mother: I'm sorry, James. You'll have to wait. I have to buy a lot of food.
James: What do you have to buy?
Mother: We don't have much milk left. I'll get another gallon of milk and a pound of butter.
James: Don't forget the box of cereal.
Mother: Oh, yes. Where are the vegetables? I want to get a head of lettuce and a bunch of celery.
James: I found them. Here they are. Don't you need some meat?
Mother: Yes. Please get a pound of meat.
James: Charles' mother is shopping also. I don't see Charles. He must be at home.

Part 2 - A Visiting Game
I'm going to my grandmother's house. I'm taking a basket of food. What shall I put in the basket?
A: I'll put in a pound of butter.
B: I'll put in a pound of butter and a cup of flour.

NOTES:
1. Go around in a circle. Each child repeats each item that has been named and adds another. If this is too difficult, each child can name only the new item.
2. Suggest mass nouns and count nouns by having pictures of these items. This will also help to limit the mass nouns to only those that have been introduced.

EXTRA MATERIAL:

This Little Cow
1st Child: This little cow eats grass
2nd Child: This little cow eats hay
3rd Child: This little cow drinks water
4th Child: This little cow runs away
5th Child: This little cow does nothing
All: But just lies down all day.

--Mother Goose
(Taken from CHORAL SPEAKING, Department of Education, Honolulu, Hawaii, 1964.)

EXERCISES:

1. Teacher models all the changes first. Then the children can practice them, repeating after the teacher. Finally, only the cues below can be given.
T: A tortoise has a large shell. A tortoise's shell is large.
C: A tortoise's shell is large.
CUES:
A walrus has black whiskers.
A starfish has a rough covering.
A mongoose has short legs.
A finch has pretty feathers.
A mouse has long whiskers.
A horse has a long tail.
A goldfish has gold scales.
2. T: James has a yellow pencil.  James' pencil is yellow.  
   C: James' pencil is yellow.  
   CUES:  
   My friend Phyllis has red hair.  
   My cousin Rose has a nice doll.  
   My neighbor Frances has a brown kite.  
   Charles has brown eyes.  
   Constance has a pretty dress.  
   James has long hair.  
   (In #2, continue using names of friends, cousins, etc., to which  
   /-a z/ can be added.)

3. Teacher can choose items around the classroom which belong to  
   each of the students:  
   T: James, whose umbrella is that?  
   C: That's Terrie's umbrella.  
   T: Josephine, whose drawing is that?  
   C: That's Ernie's drawing.  

4. Teacher may begin by giving the entire sentence as a cue for  
   repetition. After that, phrases may be used as below:  
   T: ...fun to chew.  Bubble gum is fun to chew.  
   C: Bubble gum is fun to chew.  
      hard to chew at first.  
      easy to chew later.  
      fun to blow.  
      sweet and sticky.  
      hard to blow.  

   Variation:  
   Bubble gum costs a penny.  
   makes my jaws tired.  
   tastes good.  
   comes in a wrapper.  
   makes a loud noise.  
   lasts a long time.  

5. T: I gave a piece of bubble gum to Ernie.  (Teacher models  
   whole sentence response for students first.)  
   What did you do, Flora?  ...to Paul  
   C: I gave a piece of bubble gum to Paul.  
      to Rupert.  
      to Josephine.  
      to Constance.  
      to Charles.  
      (etc.)

6. Teacher can model several or all responses for the children  
   before giving the following short cue:
T: Brenda, ask Faye.
A: Do you have some gum, Faye?
T: ...a few pieces of
B: Yes, I do. I have a few pieces of gum.
    a lot of
    a few sticks of
    one stick of
    two pieces of
    two sticks of

7. T: ...a stick of
A: Would you like a stick of bubble gum, "B"?
B: Yes, I would. I'd like a stick of bubble gum. OR
A: Would you like a stick of bubble gum, "B"?
B: No, I wouldn't, but "C" would.

8. Let children practice "would you like" first. When they are working easily with the construction, repeat with "do you want".
Storekeeper: How much milk would you like (do you want)?
Teacher: ...a quart of
Shopper: I'd like a quart of milk, please. (I want ...)
    one quart of
    a carton of
    a gallon of
    two quarts of

C:  I sang "Jack and Jill" yesterday.

DIALOGUE:

Two Frogs in a Pond

Two frogs sat on a log enjoying the warm sun. They talked with each other. No people were around. They were very happy.
Freddie Frog: Percy, I must tell you something. I saw the best jumper yesterday.

Percy Frog: Was he a better jumper than me?

Freddie: Yes, he was. He has the longest jump around here.

Percy: Oh, dear me. I can jump to the farthest log in this pond. That makes me the best jumper here. Can he jump farther?

Freddie: He probably can. But don't worry. He's a younger frog. He does move faster than you. But you still have a louder croak.

Percy: That's right. I have the loudest croak in the whole pond.

Freddie: That comes from eating so many bugs. Let's sing a song together.

So the two frogs sang and sang. "GUNK, GUNK, GUNK."

EXERCISES:

1. Yesterday we sang a new song. We sang about hats. He sang about umbrellas. She sang about birds. His friend sang about food. (etc.)

DIALOGUE:

The Old Woman and the Cat

There was once an old, old woman. She lived in a little old house behind a big hill. There were many animals living around her.

The old woman was very kind to the animals. They went to visit her often. There usually wasn't much food in her house. But she always had a little food to share with her animal friends.

Old Woman: Good morning, Mrs. Cat. How are you this morning?
Mrs. Cat: Good morning. I'm fine, thank you.
Old Woman: There's a little milk left in this bottle. Would you like to have it?
Mrs. Cat: Yes, I would. There was no food for my kittens this morning. Here they are. They'll be glad to have the milk.
Old Woman: There was a mouse behind my stove last night. Can you catch it for me?
Mrs. Cat: I'll try. Is there any cheese in the house?

LESSON XIIa - Kindergarten

TARGETS: 1. Tag questions

2. It will be difficult to elicit tag questions independently. Teacher can provide questions with tags as models. They can be tag questions about where the children live or what they like or dislike. If the statement is affirmative, the attached question is negative; if the statement is negative, the attached question is affirmative. The person asking a question that begins with an affirmative statement usually expects the other person to agree with him. The person asking a question beginning with a negative statement expects a negative answer. However, the person responding may either agree or disagree.

Examples:
T: You live on Pua Street, don't you?
C: Yes, I do. or No, I don't live on Pua Street.
T: John isn't here, is he?
C: No, he isn't. or Yes, he's here.

3. Refer to the Pronunciation Section of the Manual for intonation patterns to use with tag questions.
4. The dialogue is marked with intonation patterns. The teacher should adhere to these patterns until the children are familiar with them. Then she may vary the emphasis but the intonation on the tag questions should not be varied.

DIALOGUE:

Tadpoles

There are tadpoles in the kindergarten aquarium. Some are toad tadpoles. Some are frog tadpoles. Tadpoles are fun to watch, aren't they?

A: These aren't all frog tadpoles, are they?

B: No, they aren't. Those big ones are frog tadpoles.

Those tiny ones are toad tadpoles.
A: Frogs and toads have four legs, don't they?

B: Yes, they do.

A: But these tadpoles don't have legs, do they?

B: No, they don't. But their legs will come out later. Their tails will get smaller and smaller.

A: I like to watch the tadpoles. Don't you?

B: Yes, I do. They move their tails back and forth. It's a funny way to swim, isn't it?

A: No, it isn't. That's the fastest way for them to move.

EXERCISES:

Notes:
1. If the children have difficulty, have them first say the sentences without the tag and then add the tag.
2. Go through the exercises using the falling intonation first. When the children are familiar with this pattern, go through the exercises again using the rising intonation. Then finally combine both patterns.

1. A: He's smart, isn't he? B: Yes, he/she is.
   She's...
   They're...
   (Name's)

2. A: It's fun to ride on the merry-go-round, isn't it? B: Yes, it is.
   ride on the swings,
   climb the monkey bars,
   pile up the blocks.
   have a party,

3. A: A cat can catch a mouse, can't it? B: Yes, it can.
   bird,
   rat,
4. We should clean up our room, shouldn't we?
    pick up our toys,
    stack up the blocks,
    put the crayons back,

5a. T: (Name) doesn't have blue eyes, does he? C: No, he doesn't.
    blond hair, she? she
    green eyes, she
    long hair,
    blue socks,

5b. (After response to #5a, ask:) C: He has (color) eyes, doesn't he?
    She hair, she? she
    (etc.)

6. T: Puppies can't shake hands, can they? C: No, they can't.
    Kittens color pictures,
    Bunnies stack blocks,
    Cubs play with dollhouses,

7. (Two types of patterns can be practiced. When "A" is a timid child, "a rising intonation pattern is used for the tag questions. When "A" is a "bold child," a falling intonation pattern is used for the tag questions.)

A: Mr. Bear, you don't eat children, do you?
    Lion, bunnies,
    Tiger, kittens,
    puppies,

B: No, I don't. I'm a n: e bear. What are you doing in the forest?

A: I'm lost, Mr. Bear. You can show me how to get home,
    Lion. can't you?
    Tiger.

B: Yes, I can. Come with me.
TARGETS: 1. Irregular plural: sheep, feet
2. Complex sentences
3. Irregular past: flew, came
4. Reflexive pronoun: himself

NOTES: 1. Each child tells what a boy in the class or a baby brother did/can do "by himself":
   "My brother can walk home by himself."
2. Each child tells what he can do with his foot or feet:
   A: I can jump on one foot.
   B: I can kick with my feet.
3. Children can sing "Baa, Baa, Black Sheep" and "Little Bo Peep".
4. Each child can tell about someone who came to visit him:
   "My uncle came to visit us. He came from Kona."
5. Teacher can choose some children to be mynah birds and one child to be a cat. She can say that the mynah birds have names. The rest of the class can do the talking:
   "Five little mynah birds were playing in the yard. Along came a mean old cat, creeping very quietly.
   (Name) saw the cat and flew away.
   (Name) saw the cat and flew away. (etc.) They all flew away."
   (Continue until all the birds are gone.)
6. To elicit some of the complex sentences, have children tell:
   a. What they would do if they had a magic ring or an unusual pet or toy:
      "If I had a magic ring, I would change myself into a giant."
      "If I had a donkey, I would ride him."
   b. What they do or must do when they go home from school or wake up in the morning, or after they brush their teeth or eat their supper:
      "I play with my dog when I go home from school."
      "I rinse my mouth after I brush my teeth."
   c. What their favorite TV program, game, or other activity is, and give the reason:
      "I like to watch 'The Three Stooges' because they act crazy."
7. For extra material:

DIALOGUE:

The Pig Who Liked Corn

There was once a little pig who lived all by himself. He thought he was better than all the other pigs. But he had other animal friends.

This little pig liked to eat corn. So he planted a lot of corn in his garden. He thought that corn was the most delicious food. He liked to share his corn with his friends.

One day he was working in his cornfield. Something fell and hit him on his head. He thought the other pigs were throwing things at him.

Little Pig: Someone wants to steal my corn. I wonder who it is. Could it be the other pigs? Mongoose, did you see any strange pigs around?

Mongoose: No, I didn't. Maybe a nut fell from that tree and hit you.

Pig: I don't think so. There are no nuts on that tree right now. Mynah Bird, did you see any strange pigs around?

Mynah Bird: No, I didn't. Are you looking for someone who hit you?

Pig: Yes, I am. Someone hit me on my head.

Mynah: I was the one that hit you. I found a kernel of corn so I was taking it to my nest. Then I dropped it. It fell and hit you on your head. I'm sorry.

Pig: Don't worry. It wasn't your fault. I'm glad no one was trying to take my corn.

Three Roosters 
Once there were three roosters. Their names were Cocky, Doodle, and Doo. Each rooster was very proud of himself. Each thought he was the best rooster of all. They were always arguing with each other.

Cocky: I'm the most beautiful rooster in the world. 

Doodle: No, you're not. My tail feathers are more beautiful than yours. 

Doo: But mine are more colorful. They're the brightest feathers any rooster could have. 

Cocky: Your feathers may be brighter than mine, but my comb is redder. 

Doodle: The reddest comb isn't always the best comb. Mine stands up better than your comb. /yours. 

Cocky: I'm more useful than you are. I have the loudest crow. I wake people up every morning. I'm the most useful rooster on this farm.
Doo: My crowing is more wonderful than yours. Listen to this.

Doo started to crow. Cocky thought he had a better voice. So he started. Then Doodle started. He thought he had the best voice of all.

LESSON 1a - Grade 1

TARGETS: 1. Nominative pronouns: he, she, we, they, I, you
2. Determiners: the, a
3. Linking verbs: is, are, am (contracted)
4. Lexical item: like

2. Pronunciation of "the": Because the choice of the vowel sound in this word, /i/ or /ə/, is determined by whether the word that follows begins with a vowel or a consonant, be sure to group the items chosen into those words that begin with the vowel and those that begin with a consonant. Once the students have gotten the conditioning pattern, use the determiner with words beginning with vowels and with consonants.
Examples:
\[\text{/æi/}: \text{the apple} \quad \text{the elephant} \quad \text{the orange}\]
\[\text{/ər/}: \text{the green apple} \quad \text{the monkey} \quad \text{the bird}\]
3. Have pictures of workers and other people. Ask a child to tell who each worker is: "She's a nurse."
4. Child tells the class how it feels: "You're all sad."
   Class replies: "We're sad," and pantomimes.
5. Child says that he sees others and tells how they feel:
   "I see (Name) and (Name). They're happy. /sad./ etc."
6. Show pictures of animals or children. Each child describes the appearance of the animal or child, not the action. Give animals names so that children can use pronouns "she/he": "He's furry." "She's tall."
7. Each child stands up and tells about himself (age-grade):
   "I'm six. I'm a first grader. I'm a boy."
8. Each child can tell which of his classmates is a relative, neighbor, or friend: "Dick's my cousin."

DIALOGUE:

Part 1 - A Friend

A: The new girl's my friend. She's nice. Her name is _______.
   We play kickball together. We're happy together.
B: (Name) and (Name) play together, too. They're very friendly.
   They're nice.
A: You're nice and friendly, too. You're a good kickball player. I like kickball.
B: Thank you. I'm glad. John's a good player, too. He's smart.
A: We're all happy. We play together every day.
Part 2 - School
I'm a student.
You're a student, too.
We know Mrs. Minemoto.
She's the other first grade teacher.
We know Mr. Hirano, too.
He's the principal.
We know Mr. Kawate.
He's the custodian.
They're here every day.
We're here every day, too.
They like school.
We like school, too.

EXERCISES:

1. John's my friend.
   He's my classmate.
   She's my cousin.
   You're my neighbor.

2. They're nice.
   We're happy.
   He's good.
   You're smart.
   She's friendly.
   I'm (etc.)

3. They like swimming.
   I like school.
   We like our teacher.
   playing kickball.

4. I'm a girl./boy.
   He's/she's girl./boy, too.

5. The dog's friendly.
   He's big.
   She's tired.
   (etc.) brown and white.
   frisky.
   small.
   cuddly.

6. The dog's very friendly.
   The cat's hungry.
   They're tired.
   You're good.
   We're excited.
7. 

* Tiger's my pet.
He's a cat.
(Use your discretion and substitute more familiar names, if necessary.)

Each child is given cues as to the name and animal:
Snoopy -- dog
Red -- pony
Cock -- rooster
Bobo -- chimp
Donald -- duck
Clarence -- lion
Flipper -- dolphin
Moby Dick -- whale
Sylvester -- cat
Ben -- bear

LESSON Ib - Grade 1

TARGETS:
1. Nominative pronoun: it
2. Determiner: an
3. Lexical item: have

NOTES:
2. In Part 2, children can pantomime: sing, pet a cat, etc.
3. Teacher or another child can name an object or animal.
   A child tells something about it:
   A: This is a ball.
   B: It's round, etc.
4. Teacher can name an animal or object and then call on a child. The child says that he's that object or animal, using the right determiner:
   T: Egg.
   C: I'm an egg.
   CUES: doll, elephant, umbrella, pig, owl, monkey, horse, octopus, apple, pear, orange
5. Grab Bag: Teacher can have a bag filled with toys and other objects. Each child gets to pull something out with his eyes closed. He tells the class what he has by feeling the object. Class tells him whether he's right or wrong:
   Child: I have a ball.
   Class: You're right. / You're wrong.
6. A/An: A pocket chart with two columns (a/an) could be used. Pictures of objects and animals could be placed in the appropriate column for children to have a visual and auditory association.
   Example: Teacher will say "elephant" and will place the picture of the elephant in the "an" column. Then she can say "gray elephant" and shift the picture to the "a" column.

301
DIALOGUE:

LESSON IIIa - Grade 1

TARGETS: 1. Present progressive
2. Prepositions: under, on
3. Lexical item: stay

NOTES: 1. Use fingerplay (Part 1).
2. Substitute names of children (Part 2).
4. Use live fish in aquarium, insects in jars, etc., and have children describe what it's/they're doing; i.e., describe action using present progressive.
5. A child can be doing something "on" a chair or "under" a table, and the class can tell what's happening.
6. Let children imagine they're "under" something, and tell what it is:
   A: I'm hiding under the house.
   B: I'm playing under the tree.
7. One child at a time goes to the front of the room. (Table and 2 boxes needed.) Child is given a bean. Without being obvious, he manipulates the bean so that it's under one box. Child asks: "Where is the bean?" Calls on another child. Child called has to guess, using this pattern: "Is it under the red box?" Child answers: "Yes, it is. /No, it isn't. It's under the green box." (Left and right hand may be substituted if children have mastered the concept.)
8. Teacher or a child can be doing something. Another child can tell what the teacher or the child is doing:
   A: She's writing on the chalkboard.

DIALOGUE:

Part 1 - My Hand
This fat thumb's walking to the beach.
This wiggly pointer's looking under a table.
This tall fellow and this ring finger are standing straight.
This little man's rolling on the floor.
"I'm staying right here and so are you," Mr. Right Hand's saying.
   "We're staying here. We belong together."
Every finger and thumb is sad.
Part 2 - Running an Errand

Fred: Hi, Bill.
Bill: Hi, Fred. I'm going to the store for my mother. Come with me on your bike.
Fred: I'm going to the park. I'm meeting Tom and Jim there. We're playing ball today. We're staying at the park all morning. Come on over.
Bill: Okay. My mother's baking a cake. I'm getting something for her cake at the store. I'm coming right back.
Fred: Okay. Tom and Jim are practicing now. I'm practicing with them. Hurry over. Park your bike under the tree.

           T: ...jump
           A: Are you jumping?
           B: Yes, I am.

3. Show pictures of action going on. Rather than telling what's happening, one child can ask a question: "Is he feeding the dog?" Another child can give a short answer.

4. Each child can tell what he plans to do the next day (to use infinitive): "I'm going to swim tomorrow." Another child can join in and say, "I want to swim too," using the infinitive phrase used by the first child.

5. Children can ask the teacher whether the class is going to participate in an activity: "Are we going out to play?"

6. Have several objects on a table. Have children name them first. Then play a guessing game, using this format:
   A: I'm wishing for something on this table.
   B: Are you wishing for the rabbit?
   A: Yes, I'm wishing for the rabbit. or
   No, I'm not wishing for the rabbit.
7. Child can be behind the bulletin board or anywhere out of sight of the class and can be doing something that can be identified by the sound. Example: singing. Other children ask each other what that child’s doing:
   A: Is he singing?
   B: Yes, he is.

8. Scrambled Fruit Basket: "It" turns his back to the class. Children exchange places and one child leaves the room. "It" has three guesses. Class says, "It, It - someone’s missing." "It" guesses: "Is (Name) missing?"
   Class: "Yes, he is. /No, he isn’t."

DIALOGUE:

LESSON IVb - Grade 1

TARGETS: 1. Noun plurals: /-z, -əz/ endings
          2. Noun determiner: another
          3. Prepositions: like, of
          4. Regular past: /-t, -d/ endings
          5. Irregular past: saw

        2. The pronunciations of the plural endings are determined
           by the following conditions:
           /-əz/ after stems that end in /s z ʃ ʒ ʃ ʒ j/, e.g.,
           classes, watches;
           /-əz/ after stems that end in /p t k f θ/, e.g., hops,
           hits; (not a target for this lesson)
           /-z/ after all other stems, viz. those ending in
           /b d g v ṭ m n ɳ ɭ r/, vowels, and semivowels,
           e.g., bids, goes.
        3. The pronunciations of the regular past tense endings are
           determined by the following conditions:
           /-əd/ after stems that end in /t d/, e.g., melted;
           /-t/ after stems that end in /p k c' f θ ɬ/, e.g., stopped;
4. After giving clues, have children give you a sentence in the regular past tense with /-t/ or /-d/ endings:
   car - stop
   boy - knock
   bug - crawl

5. Using the same sentences, ask the children to tell about more than one thing or person.

6. Give the singular noun and the base form of the verb as clues. Ask children to change noun to the plural form and say that it happened yesterday: "I/We/They see a horse/a new house/ a big box/ an orange rose/ a match."

7. Have children give similes: "He's as big as an elephant."

8. Each child holds an actual object or a picture -- tells teacher: "I need another ..." (another of same object).

9. Children can recite, "This Little Pig Went to Market":
   "This little pig went to market;
    This little pig stayed home;
    This little pig lost an apple;
    This little pig picked oranges;
    This little pig cried, 'wee-wee', all the way home."

10. Have pictures of objects that have the /-z, -az/ endings in their plural forms. Children can talk about these objects.

11. Flash a picture or an object at one child. Child tells what he saw.

**DIALOGUE:**

The Praying Mantis
Did you ever see a praying mantis? It's a large insect. Sometimes it's as long as your hand.

The mantis is usually rubbing its front legs together. It isn't praying but we call it a praying mantis. It's waiting to catch another insect.

Gardeners like mantises. They catch flies and beetles with their strong front legs.

A: Did you see that ugly bug?
B: No, I didn't. Where was it?
A: There on that bush. I never saw a bug like that before. It looked like a twig. It didn't move. Then suddenly it grabbed a beetle.
B: You mean a green and brown thing?
A: Yes. Did you see it?
B: No, I didn't see it, but I saw another bug like it before. It looked
like part of the bush.
A: It looked mean. What's its name?
B: That's a praying mantis.

LESSON IVc - Grade 1

TARGETS: 1. Irregular past: heard, crept, ran, came, were
2. Regular past: /-ed/ ending
3. Preposition: out of

NOTES: 1. Children can pretend that they're the mongoose.
2. Ask children to tell about something that has already happened using the following words: "nod, hunt, plant, end, count, want".
3. Give the following sentences as models. Ask children to change them to say that it happened yesterday or last week: They hear a dog. /creep outside.
   We/I run fast. /come to school every day. (etc.)
4. The children can be asked to illustrate the story after they've heard the teacher model it.
5. Tell children that there was a magic barrel in class. Each child tells what came out of the barrel:
   A: A purple giraffe came out of the barrel.
6. Make-Believe: One child makes believe he's a magician. Child pantomimes; he pulls something out of a magic hat:
   A: What did you pull out of your hat?
   B: I pulled a rabbit out of my hat.
7. A child is blindfolded. The teacher or another child makes a sound. The blindfolded child tries to guess what he heard: "I heard a tapping sound."

DIALOGUE:

Part 1 - An Adventure

One day last summer, a little mongoose looked out of his door. His home was a hole under a big rock.

The little mongoose looked this way and he looked that way. He heard the birds singing and the leaves rustling. He didn't hear or see anything dangerous. Slowly he crept out of his hole.

The little mongoose was outs. He lifted his nose and sniffed. He smelled something. It smelled so good. He wanted to find it.

The mongoose hunted and hunted. Suddenly he saw it. It was a sandwich lying right on the road. The little mongoose looked all around. He didn't hear or see anything dangerous. He ran to the sandwich and picked it up.

Just then the little mongoose saw a red monster. It came straight at him. Its two eyes were bright. VROOM! The little mongoose was so frightened. He dropped the sandwich and ran to his hole. He scooted inside.
What was the monster? Did you guess? Yes. It was a car. But the little mongoose didn't know that.

Part 2 - A Lost Pet

Special Notes:
1. Targets are the regular past tense endings: /-t, -d, -ed/, plus irregular past tense forms: "heard, crept, ran, came, were, lost, was, went".
2. Lesson may be used to check the children's mastery of these past tense forms.
3. Each child is given a numbered slip of paper. Each child is assigned a sentence. Teacher models and child repeats for practice.
4. Teacher holds up identical slips of paper with numbers. Child with the matching number gives his sentence.
5. Whole class can do the introduction together.

One day a little boy lost his pet. He went out to look for it. He walked along. He came to a forest. It was a dark forest. The boy crept on his hands and knees.

He heard something.
It sounded scary.
The boy saw an owl.
The owl hooted.
It slapped its wings.
The boy stamped his foot.
The boy clapped his hands.
The owl went away.
The boy wanted to run.
But he walked along.
Then he saw an animal.
The animal rubbed its stomach.
It scratched its head.
It wrinkled its nose.
The boy jumped up and down.
He shouted at the animal.
He clicked his fingers.
The animal ran away.
The boy walked along.
He tooted his horn.
He wiggled his toes.
He clapped his hands.
A dog came running to him.
It was his pet.
The boy laughed. He was so happy.
He hugged his dog and they walked home together.

LESSON Vb - Grade 1

TARGETS: 1. Third person singular present tense /-s, -z/ endings
   2. Noun determiner: these
   3. Preposition: through
   4. Irregular third person singular verb: has

   2. The pronunciations of the 3rd person singular present
tense verb endings are dependent on the same conditions as those for the noun plural. Refer to the Notes Section of Lesson IVb.

3. Teacher gives a word clue. A child tells how another child performs this action by using this word:
   T: ...jump
   C: Brenda jumps down.
   CLUES: kick, pull, tap, run, drag, throw, knock, shut, dig, build, paint

4. Give each child a picture with several of the same items. Child tells something about the items using "these" and indicating with a sweeping motion of his hand:
   A: These oranges are ripe.

5. Each child tells what his baby sister or brother does that bothers him.

6. Tell what a child's mother or father does every day.

7. Make up sounds that things make or tell what people say, using the following patterns:
   A: The horn on my car goes "beep, beep, beep."
   B: My baby brother says "da, da, da."

DIALOGUE:

Part 1 - Magnets
   A: I have a new magnet. It's a horseshoe magnet. It looks like a horseshoe.
   B: I have a magnet, too. My magnet is a bar magnet. Mrs. Nishimoto has a giant magnet. It's a Munster magnet.
   A: Magnets are fun to play with.
   B: A magnet picks up some things. It attracts these things. Does a magnet attract this wooden toothpick?
   A: No, it doesn't. It doesn't attract a rubber ball or a wooden block. A magnet attracts nails, paper clips, and pens. It pulls these things. Magnets even attract through things.
   B: Yes, they do attract through things. I like playing with magnets.

Part 2 - Helping at Home
   A: Hi, (Name). What are you doing?
   B: Do you want to go to the beach with us?
   C: I'm busy now. My mother wants me to pick up all these cans/sticks in our yard.
   A: Do you want us to help you?
C: No, thank you. I don't want you to be late. Besides, my sister needs me afterwards. She has a job for me.
B: What does she want you to do?
C: She wants me to drill holes through her shells. She's going to make a necklace.

EXTRA MATERIAL:

How Creatures Move
The lion walks on padded paws.
The squirrel leaps from limb to limb.
While flies can crawl straight up a wall.
And seals can dive and swim.
The worm he wiggles all around.
The monkey swings by his tail.
And birds may hop upon the ground,
Or spread their wings and sail.
But boys and girls
Have much more fun;
They leap and dance
And walk and run.

LESSON Ve - Grade 1

TARGETS: 1. Third person singular present tense: /-az/ ending
2. Negative interrogative "do-does"
3. Noun determiner: many

2. Teacher gives a word clue. A child tells how another child performs this action by using this word:
   T: ...snatch
   C: The dog snatches my purse.
3. Show pictures of action going on. Ask children to tell what the person pictured does every day, using the picture as a clue: "She walks to the store."
4. Lesson is long. The introduction may be used at one time and the dialogue at another time.
5. Teacher can ask each child: "How does a _____ move?"
   CLUES: rabbit, turtle, fish, bird, boy, etc.
6. Use pictures of objects:
   C: I have one apple. But John has many apples.
7. Teacher asks a child what each monitor does:
   C: The shelf helper wipes the tables.
8. Boasting: One child tells another he has one thing. Second child boasts and says he has many of the same thing.

DIALOGUE:

Helpers at School

A school is a busy place. Boys and girls go there to learn. A school has many helpers. A teacher teaches the boys and girls. The principal runs the school. The secretary answers the telephone. She does many other things.

Boys and girls eat at school. The cafeteria workers cook the lunches. They serve and clean up, too. The custodian keeps the yard clean. He also washes the lavatories. Everybody's busy at school.

A: Don't you want to walk home with me?
B: I do. But I'm a monitor this week. I have to sweep our room.
A: Doesn't Mr. Kawate clean your room?
B: No, he doesn't. Does he clean your room?
A: Yes, he does. He helps the kindergarten classes, too. We're still too little for the brooms.
B: We clean our own room. One monitor erases the chalkboards. Then he claps the erasers. Other monitors sweep the room.

5. How many chairs do you see in this room? boys girls erasers wastebaskets windows doors clocks

   (Teacher gives cue word. One child asks. Another gives an appropriate answer.)
LESSON VIa - Grade 1

TARGETS:
1. Modals: can, could
   a. Affirmative and negative interrogative
   b. Affirmative and negative declarative
   c. Affirmative and negative predicate
      substitute ("not" contracted)
2. Noun determiner: those
3. Prepositions: by, behind
4. Irregular plural: children

NOTES:
1. Substitute names in dialogue and exercises.
2. Use a flashlight for a shadow play. One child says what kind of shadow figure he can make with his hands and does it. Then he asks another if he can do the same. He in turn replies and performs, or, if he can't duplicate it, the first child shows him:
   A: I can make a rabbit. (Name), can you make a rabbit?
   B: Yes, I can.
   (If "B" says "No, I can't," then "A" would say, "Can't you make a rabbit? I can show you how." When "B" learns to do it, he'll say, "Now, I can.")
3. Use a box, etc., with objects in it. Box should have a peephole on one end and a larger paper-covered opening on the other end to let in enough light for objects to be barely discernible. Have children take a quick look and have them report on what they could see. After the child tells what he could see, he should ask another child if he could see the same thing; if not, what he could see:
   T: You peeked into the box. What could you see?
   A: I could see a worm. (Name), could you see a worm?
   B: Yes, I could.
   (If the answer is "No, I couldn't," "A" should then say, "Couldn't you see a worm? What could you see?"
   "B" tells what he could see.)
   (Same thing can be done with the sense of hearing.)
4. Have children tell what they couldn't do last year and what they can do now:
   A: Last year I couldn't ride a bike. Now I can.
5a. Point to someone or something and say, "That boy."
   Point to several of the same and elicit, "Those boys."
5b. Have children sort things and say, "These _____ are mine. Those _____ are yours."
6. Provide children with phrases using "by" and "behind", indicating location, and have them add an activity which
they or someone else or some others performed:
"...by the sea I walked by the sea."
"...behind the house The dog ran behind the house."

7. Because of the length of the dialogue, you may wish to vary your presentation. For example, for the first few times you can just read the introductory paragraph to them and have the children go through the dialogue proper or just certain portions of it.

8a. Children tell what they can do on a rainy day and what they can't do.

8b. Have pictures of things to eat or name some things to eat (limit to count nouns). Each child tells what he can eat and what he can't eat.

DIALOGUE:

Part 1 - Shadows

Your shadow is a funny thing. It can be long or short. It can be fat or skinny. You can see it on sunny days. You can't see it on very cloudy days. Your shadow needs light*. The light shines on you. Your body blocks the light. It can't go through your body. This makes a shadow.

A: Yesterday I couldn't see my shadow. (Name), could you see your shadow yesterday?

B: I couldn't. I couldn't see it all day.

C: Couldn't you see your shadow? I could. I could see it. My teacher turned on the lights.

A: Today is sunny. I can see many shadows. See, those children have shadows and those buildings have shadows, too.

C: I have a shadow, too. (Name), can you see your shadow?

B: No, I can't.

C: Come to the window.

B: I'm standing by the window. But I still can't see it.

A: Can't you see it? It's behind you.

B: Look, my shadow can walk. (Name), what can your shadow do?

C: My shadow can wave. What can your shadow do?

(* "light" - mass noun, not target at present.)

Part 2 - Baby Brothers and Sisters

Can you hear those children talking? You can't? Well, let's get behind them. Now we can hear the children. They seem very serious. What can they be saying?

346
A: Do you have baby sisters and brothers?
B: Yes, I have a baby sister.
A: Where is she? Couldn't she come with you?
B: No, she couldn't. She's playing with the other children. Where's your baby brother?
A: He couldn't come. He's at home.
B: We have to help our baby sisters and brothers. They can't do many things. My sister can't put on her dress.
A: Can't she dress herself? My brother can put on his shirt. But he can't button it. Can your sister talk?
B: Now she can. She couldn't talk last year.
A: Could she sing?
B: Yes, she could. She could sing two songs. Now she can sing ten songs.
A: Oh, oh. My brother's looking for me.
B: My sister's coming too. Let's hide.
A: Let's stand by those cars. Then they can't see us.
B: They can see our heads. Let's hide behind those bushes.
A: Can't they see us now?
B: No, they can't. Oh, oh, yes they can. They're right behind us!

EXERCISES:

   B: Yes, they can. No, she can't. Yes, he can. (etc.)

   B: Yes, I could. No, I couldn't. (etc.)
3. (Another child can transform each of the following to an interrogative sentence.)

I don't want these apples. I want those oranges.
bananas. cookies.
shoes. slippers.

These guavas are sour. Those guavas are sweet.
pencils flat. pencils sharp.
boys studying. boys playing.
girls running. girls sitting.
dogs fighting. dogs sleeping.

You can't play with these trains. You can play with those trucks.
cans. boxes.
You can't have these leis. You can have those flowers.

TARGETS: 1. Modals:
   a. shall - interrogative with the first person pronouns
   b. will - interrogative, predicate substitute, affirmative declarative (contracted)
   c. may - interrogative (to ask permission), predicate substitute ("Yes, you may.")
   d. would - interrogative, predicate substitute, affirmative declarative (contracted)

2. Irregular past: found
3. Possessive pronoun: their

NOTES: 1. Insert names of children in dialogue and exercises.
2. You may wish to read the introductory paragraph to the children and have them go through just the dialogue proper. Later, as they become more facile, they can be asked to repeat that too. Once you have read through the whole dialogue, you may want to have the children name the ants in Part 1 and the people in Part 2.
3. Ask children to offer help in doing something for someone else. The others may reply, "Yes, please," or "No, thank you."
   Examples: "Shall I open the window for you?"
             "Shall I wait for you?"
4. The children can ask each other what they plan to do in the future (Saturday, Sunday, on a holiday). Answers will be in the present progressive.
   Examples: "What will you do this afternoon?"
             "I'm going to play kickball."
5. Either verbally, or with visual aids, present stressful situations and ask, "What would you do?"
   Examples:
   "Harry is hitting Tom. You're Tom. What would you do?"  (Reply: "I'd ... ")
   "Your cat is up in the tree. He doesn't want to come down."
   "You're playing baseball. The ball smashed a neighbor's window."
6. Have children use "may" in questions for permission only. Have them ask the teacher and others for permission to do something. (If the request is reasonable, let them perform the desired action.)
   If the children have difficulty in generating these questions, they may be prompted by questions such as:
"You want to leave the room. How would you ask for permission?"
Or, if they're still having difficulties, you may say, "How would you ask for permission to leave the room?"
Reply would be: "May I leave the room?"

7. Have the children look for something you've hidden and ask: "What did you find?"
Or have the child who's found something ask: "What did I find?"
Sample reply: "I/You found a pencil."

8. Have "ants" actually discover a "cookie." Use a paper cookie. It can be torn into bits and offered to Group 2.

9. Each child pretends to be using the telephone. He asks to speak to a particular person. Party asked for isn't in, so child leaves his name.

10. For extra material refer to the song "It's a Pumpkin."

DIALOGUE:

Part 1 - The Discovery of the Ants
Let's look in on these ants by the banyan tree. We can't see the queen ant. She's in the nest. But we can watch the worker ants hunting for something to eat. Oh, they're running back and forth, wiggling their antennas. Shall we tiptoe over to those ants and listen to them?
Group 1 Ants: A cookie! A cookie!
We found a broken cookie!
Ant 1: May I have a bite? I'm hungry.
Ant 2: No, you can't eat now. We have to carry it to the queen.
Ant 3: We can't carry the whole cookie.
Ant 4: We can break it up. We'll carry the cookie crumbs.
Ant 3: Shall I signal the others?
Ant 4: No, I'll signal them. I can run fast. Hey, fellows, we found a broken cookie. Would you like to help us carry the cookie crumbs?
Group 2 Ants: Yes, we would. We'd like to help you. OK, everybody, forward MARCH!
Ant 2: Here's one crumb for you, and a crumb for you. Here's another crumb for you.
Ant 1: Would you please hurry? I'm hungry.
Ant 2: Will you please be quiet?
Ant 3: May I rest for a minute? The cookie crumb is very heavy.
Ant 4: Yes, you may. But would you be careful with the cookie crumb?
Ant 3: Yes, I will. Ant 1, would you like to go first?
Ant 1: Yes, I would. I'd like to reach the nest first. Maybe the queen would let me eat first.

Part 2 - The Lost Mother
The little boys can't find their mother. She's lost. Poor mother.
Where can she be? Will they find her?
Little Boys: Mister, would you help us look for our mother? She's lost.
Mr. A: Yes, I will. I'll help you.
Mrs. A: I'd like to help you. May I help too?
Little Boys: Yes, you may. You'll have to look very carefully.
Mr. & Mrs. A: We will. Will you lead us?
Little Boys: We'll go to the candy counter first. Then we'll look in the toy department.
Mr. A: Would she go to those places?
Little Boys: Yes, she would. She'd be there. She's buying us lollipops and toys.
Mr. A: Shall I call the policeman?
Mrs. A: He'll be nice to her. Officer, would you help these boys look for their mother?
Policeman: Yes, I'd be glad to help.
Little Boys: Oh, mommy's here. Thank you, everybody. We found her. Mommy, we found you at last. Would you like to go now?
Mother: Yes, I would.

DIALOGUE:

Part 1 - A Summer Trip

Would you like to go on a trip this summer? You'll have to make plans.
Father: We must make plans for the summer. It'll be here soon.
Mother: We could go to Honolulu.
Children: Yes, Daddy, could we go?
Helen: Would you take us to the zoo? We won't be naughty.
Joseph: Could we ride the jet plane?
Roy: You might cry. The stewardess and the passengers will laugh at you.
Joseph: No, they won't. You might. The pilot might stop the
plane and tell you to get off.

Roy: That's silly. You must be crazy.
Joseph: You mustn't say naughty things.
Mother: Now, now. Daddy might not take us. He might tell us to stay at home.
Helen: He wouldn't do that. He just wouldn't.
Father: I may. I may change my plans. I may not take you.
Children: You must be teasing.

Part 2

Father: We'll travel this summer. But we must plan carefully.

How much do you have?

Helen: I have 25¢. But I may have 50¢ soon. I won't spend it.
Joseph: I have 10¢ now. I might get another 10¢ for washing cars. Then I'll have 25¢ all together.
Roy: No, you won't. You can't add. You'll have 20¢ all together.
Joseph: You're so smart. How much do you have?
Roy: I have 15¢. I can ride the bus.
Helen: You must pay 25¢. The bus driver may not let you ride.
Mother: Children, you mustn't fight. Otherwise you might not go. Would you like to stay at home?

Children: No, we wouldn't.
Father: We must save our pennies and nickels. Then we'll be ready for our trip.

Leroy: Should we go fishing today?
Helen: No, we shouldn't. We might get wet.
Henry: Wouldn't mommy let us go?
Helen: No, she wouldn't. The yard's flooded now.
Jean: People should stay at home today.
Leroy: Girls, phooey. They're always spoiling things.
Henry: We'll have enough to do. We ought to think of something. We shouldn't sit here and fight.
Helen and Jean: But what can we do?
Henry: We'll fish from the window. The leaves floating in the yard are fishes.

Leroy, Helen and Jean: That ought to keep us busy.
Leroy: That big mango leaf is an aku.
Helen: And that yellow leaf is a humuhumu.
Jean: Shouldn't we invite mommy? She might want to join us.
Helen, Leroy and Henry: Yes, we should.
Part 2

Mommy: Look at those people across the street from us. They shouldn't be outside today.
Jean: No, they shouldn't. They'll catch a cold.
Helen: Mommy, wouldn't you like to fish with us?
Mommy: Yes, I would. But daddy should be home soon. I ought to finish cooking.
Henry: Oops, I hooked a crab.
Mommy: Shouldn't you have a bucket? You might wet the floor.
Leroy: Look! I hooked a mother whale! Should I bring it up?
Henry: Sure, you should. I like whales.
Jean: No. We shouldn't separate the mother from her babies.
Daddy: What's going on here?
Children: Shhh. You'll scare the fishes away.

DIALOGUE:

Part 1 - Fire Drill Rules

The first graders have a new student in class. They're teaching him the fire drill rules.

New Student: I can't learn the rules by myself. You must help me with them.

Children: Don't worry. We'll teach you. You should repeat them to yourself.

Arlene: Don't run. You must walk.
Roy: You must walk quickly. Don't play.
Brenda: Don't push and shove. You might get hurt.
Roy: Don't talk to your neighbors. You must be quiet.
Michael: Don't run around in the yard. You must stay in line.
Arlene: Don't go back to the classroom by yourself. Wait for the teacher.
Brenda: Listen for the second bell. Then you can go back to the room.
Michael: Don't forget these rules. They will help you in a real fire.
New Student: These rules are too hard to remember. I'm going to forget them.
Children: Don't be silly! We learned them. You can too.

Part 2 - Goodbye, Wild Ducks

The wild ducks in the Wailoa State Park are getting ready to fly home. They must fly across the Pacific Ocean. They must fly back to the mainland. But Bernard doesn't want them to leave.

Bernard: Won't you stay and play with me?
Ducks: We'd like to stay, but we can't.
Bernard: Don't leave me. I don't want to play by myself.
Leader Duck: We should be leaving right now.
Bernard: How will you find your home? You don't have maps.
Duck I: We don't need them.
Bernard: The mainland is very cold. You'll catch a cold.
Duck II: Don't worry. We won't.
Bernard: Would you think of me some time?
Leader Duck: Don't cry. We won't forget you. We'll come back to you next year.
Bernard: I'll be waiting for you. I'll collect water plants and water bugs for you. I'll remind myself to keep them fresh.
Ducks: Thank you, Bernard.
Bernard: Don't forget to wave goodbye. I'll watch you disappear.
Ducks: Goodbye.
Bernard: Goodbye, Bernard.

DIALOGUE:

A Search for a Birthday Present
Here's a story of a little boy. He wanted to get something for his father's birthday. He decided to search for Santa Claus' toy shop.
Boy: Santa Claus has Christmas presents for children. He must also have birthday presents. I'll look for his toy shop and find out for myself. A giraffe's neck is long. He must see far. Mr. Giraffe, do you know the way to Santa Claus' toy shop?

Giraffe: I'm sorry, little boy. I can't see that far. Ask Mr. Hawk. The hawk's eyes can see far. He also flies everywhere. He might be able to help you.

Boy: Thank you. Yoo, hoo, Mr. Hawk. Do you ever fly to Santa Claus' toy shop?

Hawk: That's too far away and too cold. Besides, I really don't know the way. But Mrs. Witch might know. The witch's broom can take her anywhere. Ask her.

Boy: Thank you. Oh, Mrs. Witch. Will you take me on your broom to Santa's toy shop?

Witch: Why do you want to go there?

Boy: I need a present for my father's birthday.

Witch: Why don't you make a present yourself? You can make a present out of many kinds of things.

Boy: You're right. I can paint an empty cigar box and make it pretty. I found a parakeet's blue feather yesterday. I'll put that in the box. My father can wear the feather in his hat. He can put all kinds of things in the box. Thank you, Mrs. Witch.

Witch: You're welcome.

LESSON XIIa - Grade 1

TARGETS: 1. Tag questions.

NOTES: 1. It will be difficult to elicit tag questions independently. Teacher can provide questions with tags as models. They can be tag questions about where the children live, what they like or dislike, or what they did. If the statement is affirmative, the attached question is negative; if the statement is negative, the attached question is affirmative. The person asking a question that begins with an affirmative statement usually expects the other person to agree with him. The person asking a question beginning with a negative statement expects a negative answer. However, the person responding may either agree or disagree.

Examples:

T: You live on Pua Street, don't you?
C: Yes, I do. /No, I don't live on Pua Street.
T: John isn't here, is he?
C: No, he isn't. /Yes, he's here.

2. Children can take turns being parrots, always repeating things.

3. Translate into SE those sentences children use in HID as tag questions -- those sentences usually ending in "huh?" or "yeh?"

4. Notes for Part 2:
   a. Substitute names of children.
   b. If there is no new student in the class, ask children to make believe that one of them is new to the class.

5. Have children ask tag questions by using pictures to help: "He's a pretty dog, isn't he?"
   "They're busy, aren't they?"
   "The fruits look good, don't they?"
   "It makes you hungry, doesn't it?"

6. Refer to the Pronunciation Section of the Manual for intonation patterns to use with tag questions.

7. The dialogue and exercise 8 are marked with intonation patterns. The teacher should adhere to these patterns until the children are familiar with them. Then she may vary the emphasis but the intonations on the tag questions should not be varied.
DIALOGUE:

Part 1 - A Funny Pet

A parrot is a beautiful bird, isn't it? It has beautiful colored feathers. Parrots come from jungles. They make good pets. You can teach a parrot to talk.

Here's a story about a little girl with a pet parrot. The parrot's name is Mike.

Patty: I like your new pet, Ann. He's so colorful.

A parrot can learn to talk, can't it?

Ann: Yes, it can. Mike can say some words. You can, can't you, Mike?

Mike: You can, can't you, Mike?

Patty: He sounds funny, doesn't he?

Mike: He sounds funny, doesn't he?

Ann: Oh, Mike, stop it!

Mike: Oh, Mike, stop it!

Part 2 - New Boy at School

Being a new boy in a school can be lonely, can't it?

We try to help new students at Keaukaha School feel welcome. Having a friend in a strange place makes you feel good inside, doesn't it? What can we say to make a new student feel welcome? Let's make believe.

406
Mark: Good morning. You're a new boy here, aren't you?
My name is Mark.

Nelson: Good morning. My name is Nelson. Yes, I'm new at Keaukaha School.

Mark: What school did you come from?

Nelson: From a school in Honolulu.

Mark: Don't you miss your friends there?

Nelson: Yes, I do. But the children here are friendly, aren't they?

Mark: Yes, they are. And Mrs. Nishimoto's a good teacher, isn't she?

Nelson: Yes, she is. I'm going to like this school.

Mark: I'm glad to hear that. Come on. There's the bell.

EXERCISES:

(Notes:
1. If the children have difficulty, have them first say the sentences without the tag and then add the tag.
2. Go through the exercises using the falling intonation first. When the children are familiar with this pattern, go through the exercises again using the rising intonation. Then finally combine both patterns.)

8. (Short dialogue based on "The Three Bears" to be acted out.)
   a. Papa Bear: (Speaking doubtfully)

      You didn't smash my chair, did you?
      eat my bread,
      wrinkle my bed,
      stretch my slippers,

      Mama Bear: No, I didn't.
      Baby Bear: No, I didn't.

      (Goldilocks, hidden, says to audience: "Yes, I did."
      after both Mama and Baby Bear reply.)

   b. Papa Bear: (Speaking angrily, accusingly)

      You smashed my chair, didn't you?
      ate my bread,
      wrinkled my bed,
      stretched my slippers,

      Mama Bear: No, I didn't.
      Baby Bear: No, I didn't.

      (Goldilocks does same thing as in (a).)

   c. Papa Bear: Then, who did?

      Goldilocks: I did. You won't punish me, will you?
      Mama Bear: You won't punish her, will you?
      Baby Bear: You won't punish her, will you?

      (Goldilocks, Mama and Baby speak pleadingly.)
Papa Bear: Well ... Goldilocks, you won't do it again, will you?

Goldilocks: No, I won't.

Papa Bear: Then I won't punish you.
LESSON XIIIa - Grade 1

TARGETS: 1. Complex sentences
          2. Irregular plural: men, equipment

        2. One child tells something about a man. Second child uses
           the same sentence but tells about more than one man:
           A: I saw a man run into the store.
           B: I saw two men run into the store.
        3. Teacher can give cues and children are asked to tell what
           happens:
           CUES: When the alarm rings . . .
                 When the school bell rings . . .
                 When I go home from school . . .
                 When there's a fire drill . . .
                 When summer comes . . .
           (Ask children to use complete sentences.)
        4. "Equipment" is not a high frequency word in the first
           grade but has been used here since it is appropriate for
           the dialogue. Too much time need not be spent on the
           word.
        5. Each child tells what he would do "... if he had a hundred
           dollars." Children are to use the clause in their
           sentence: "If I had a hundred dollars I would . . ."
        6. For extra material refer to Rasmussen, Carrie, Let's
           Say Poetry Together. Minneapolis, Minnesota:
           Burgess Publishing Company, 1962:
           a. "There's a Big Fat Turkey", p. 56.

DIALOGUE:

Firemen
Fire, Fire! A house is burning.
A man rings the fire alarm.
Did you know that firemen are always ready for fires? When the
alarm rings, they jump on their trucks. They sometimes put on their
coats and hats as they ride along.
A: People should help firemen get to a fire fast.
B: How can they do that?
A: They should get out of the way when they hear the sirens.
B: How do firemen get to their trucks so quickly?
A: There are always some firemen at the station.
B: Oh. Do they take turns working?
A: Yes, they do. The men take care of their trucks and equipment when they aren't at a fire.

   behind him. Teacher points to another child who tip-
   toes to steal the bone. When "thief" returns to his
   seat, class says:
   "Doggie, doggie, someone took your bone."
   Dog faces class, has three guesses. Asks three people:
   "Did you take my bone?"      Answers will be:
   "Yes, I did.  No, I didn't."
   If guesses are wrong, Dog can ask: "Who took my bone?"
   Thief answers: "I took your bone."
   The person with the bone is the next Dog.
6. The teacher can ask each child: "Did someone ever make something for you? Tell us about it."

C: My father made me a kite.

DIALOGUE:

At the Airport

It's always fun to go to the airport. There are many planes flying in and out of the Hilo Airport.

A: I went to the airport late last night to meet the United Airlines jet.
B: Was that the one that came from the mainland?
A: Yes, it was. My aunt came from California to visit us. I took leis that I made to give her. She got many leis from us. There were many tourists at the airport. I gave my extra leis to some tourists. They also got leis from the tour drivers.
B: Did you go into the airplane?
A: No, I didn't.
B: My cousin is a stewardess. She took me into a jet once. The pilot showed me all the instruments/things that were in the plane. I had a lot of fun looking around. I even got into the pilot's seat.
A: You were lucky. If we can save our money, my father's going to take us to the mainland.
B: Maybe when you go, the pilot will invite you to look around inside.
A: I hope so.

EXTRA MATERIAL:

My Shadow

I have a little shadow that goes in and out with me,
And what can be the use of him is more than I can see.
He is very, very like me from the heels up to the head;
And I see him jump before me, when I jump into my bed.

The funniest thing about him is the way he likes to grow--
Not at all like proper children, which is always very slow;
For he sometimes shoots up taller like an india-rubber ball,
And he sometimes gets so little that there's none of him at all.

One morning very early, before the sun was up,
I rose and found the shining dew on every buttercup;
But my lazy little shadow, like an arrant sleepyhead,
Had stayed at home behind me and was fast asleep in bed.

TARGETS: 1. Determiners: a/an
2. Nominative pronouns: I, you, he, she, we, they
3. Linking verbs: am, is, are (contracted)
4. Lexical item: have

2. Use names of children in exercises as substitutes for pronouns.
3. Each child can introduce self. Give name and age: "My name is ______. I'm seven."
4. Children can be asked to make believe. Choose a character for self and another child. Tell what self is and what the other child is: "I'm a goat. He's a monkey." Story characters can also be used.
5. One child tells about the other child or how another child or several children feel after these children pantomime: "You're old." "They're tired."
6. Hold out articles and ask a child to say: "You have a/an ______." Children can also hold articles and say: "I have a/an ______.
7. Teacher can use her judgment as to when to contract and when not to because of the beginning sound of the word following, or because of the length of the noun with which contraction is being formed.

DIALOGUE:

Part 1 - A New Student
A: Hello. I'm a new student here. My name's ______. I'm a second grader.
B: Hi, (Name). I'm (Name). I'm a third grader. Come and meet my brother. He's a second grader. His friend's a second grader, too. They're very nice.
A: I'm glad. I miss my old school. I have a special friend there.
B: You're welcome here. We're all very friendly. Your teacher's (Name). She's an awfully nice teacher.

Part 2 - A Brownie and a Scout
Kawehi: Hi, Iwalani. Wait. This is Alice. She's my new neighbor. Alice, this is Iwalani.
Alice: Hello, Iwalani.
Iwalani: Hello, Alice. You have a pretty pin.
Alice: Thank you. This is a Brownie pin. I'm a Brownie.
Iwalani: You're lucky. Kawehi's a Brownie and my sister's a Brownie, too. They have a good time.

Alice: I'm glad.

Kawehi: We're always busy. We have a meeting every week. We learn something new each time.

Alice: My brother's a Boy Scout. He's a fifth grader. His friend is a Scout, too. They learn a safety rule every week. They're very careful.

EXERCISES:

1. I'm sad.

LESSON 1b - Grade 2

TARGETS: 1. Determiner: the
2. Nominative pronoun: it
3. Lexical item: like

2. Pronunciation of "the": Because the choice of the vowel sound in this word, /i/ or /ə/, is determined by whether the word that follows begins with a vowel or a consonant, be sure to group the items chosen into those words that begin with the vowel and those that begin with a consonant. Once the students have gotten the conditioning pattern, use the determiner with words beginning with vowels and with consonants.

Examples:

/iː/: the apple, the elephant, the orange
/əː/: the green apple, the monkey, the bird

3. Hold up an object or a picture of an object. A child tells what he sees and describes it, using the pronoun: "I see a ball. It's red."

Also ask the child to use a noun to describe it: "The ball's red."

4. Children tell about a pet or toy they have and describe it.

5. Grab Bag: Have a pillowcase filled with objects. Child puts hand in, pulls out object and says: "It's a ball, etc."

6. Teacher can hold up pictures of the same thing in different colors. Each child tells which he likes: "I like the red kite." Real objects may be used.

DIALOGUE:

A New Game

(Telephone conversation):

A: Hi, (Name). This is (Name). Come on over. I have a new game.

B: Wait awhile. My mother's out. I'm the baby sitter right now.

(LATER)

B: Hi, I'm here.

A: Come in. This is my new game. It's a racing game. We choose a car and we have a race.

B: I choose the silver car. It's a snazzy car. It's a Cougar.

A: I pick the red car. It's a Mustang. It's a beautiful car. You pick a card first. Then you move.

B: I like this game. It's an exciting game.

LESSON IIa - Grade 2

TARGETS: 1. Interrogative linking
2. Negative declarative linking
3. Objective pronoun: me

2. Children pantomime, then guess what each person is.
   Give full answers:
   A: Are you a tiger?
   B: No, I'm not a tiger. /Yes, I'm a tiger.
3. Pair off and one child pantomimes. Third child asks partner: "Is he/she a tiger?" Partner gives long answers: "No, he's/she's not a tiger," or "Yes, she's/he's a tiger."
4. Teacher names an object. A child asks another child to "give" or "pass" her the object:
   T: ...ball
   C: Please give me the ball.

DIALOGUE:

Part 1 - Good Health*
(* Mass noun, but not introduced as a target here.)

A: Are you strong and healthy?
B: Yes. We're strong and healthy. We exercise every day and we eat a good breakfast.
A: I'm strong and healthy, too. I work hard every day and I play very hard. Feel me. I'm very tough.
B: Is Daniel strong and healthy, too? He's a good eater. Kawehi's not a good eater. Is she strong?

        3a. Children describe different books. Teacher gives example: "It's a story of ________".
        3b. Have children say what they're "afraid, scared, proud, ashamed, tired of".
        4. Have a cup, a box, a can, and three small toys to fit into these containers. One child places objects in containers without the other children seeing which object goes into which container. Then child asks:
            A: Where is the ball?
            B: Is it in the box?
            A: Yes, it is. /No, it isn't.
            He chooses three children to make guesses. If the guesses are wrong, he gives the right answers: "The ball's in the cup, etc." Next, another child is chosen to place the objects in the containers.
        5. Each child tells where someone else is for situations where the use of the preposition "at" is appropriate.
DIALOGUE:

Part 1 - A Good Book
A: Are Mary and Jane at the Bookmobile?
B: Yes, they are. Is that book from the Bookmobile?
B: Is it a funny book?
B: Is it a story of a real boy and an elephant?
A: Yes, it is. The boy's the trainer of the elephant.
B: Is the elephant in a zoo or a circus?
A: No, it isn't. The elephant and the boy live in a far-away country. They work in a forest. I like this story.
B: I have a funny storybook. It's a story of a monkey and its owner. They aren't real. Please let me read your book later.
A: All right.

Part 2 - A Book and a Truck
A: Where's Ira? Is he at home?
B: Yes, he is. His cousin from Kona's here. They're in the garage.
A: They sound busy. Are they busy?
B: No, they're not. They're noisy but they aren't busy.
A: Are my book and dump truck here?
B: No. Go out and ask Ira. This truck's mine and that's an arithmetic book.
A: Mine is a red truck. In the book is a story of Abraham Lincoln.

A: Oh. Is he the driver?
B: Yes, that's him.
A: Your friend and my friend are very brave. They have a dangerous job. They work hard.
B: Yes. They help us get out of a burning house safely. They hold a fire drill at school every month.
A: They help me a lot, too. A fireman's a good helper.

Part 2 - A Birthday
A: Where's everybody?
B: Father isn't at home yet and your brother's in the yard. Go outside and help him.
A: I see a present on the kitchen table. Is it for me?
B: Yes, it is. Happy Birthday. It's from all of us. Open it later.
A: Okay. I'm so happy. I want a new baseball glove. Is the present a glove?
B: Never mind. Please take the dog out of his pen and feed him. I'm busy right now.

LESSON IIIb - Grade 2

TARGETS:
1. Interrogative present progressive
2. Negative declarative present progressive
3. Infinitive
4. Lexical item: want to

NOTES:
1. Children ask each other questions about what a parent or sibling is doing at the moment: "Is your mother cooking?" Second child gives the full answer.
2. Each child tells what he is not doing at the moment.
3. Children tell what they want or are going to do the next day or weekend: "I want to play at the beach."
4. In Part 2, "Junior Police Officer" may be deleted if children understand what the letters "J.P.O." stand for. Reason for insertion: mispronouncing of letter "J".
5. Use questions pertaining to the dialogue to vary practice. Examples: "What are the cat and puppy learning?" "Who's learning to talk?" This also helps children master sentences that they may be having difficulty with.
6. Use pairs of snails, ladybugs, pillbugs, etc., to run an obstacle race. Children can take turns being "sport-casters" to announce ongoing activities, using present progressive.
7. "Twenty Questions": One person goes before the class and says, "I'm thinking of something/someone. What/Who is it?" Class has twenty guesses. Each guesser uses the pattern: "Is it ______?"
8. Teacher asks the question: "What do you want to be when you grow up?" Each child answers: "I want to be ______." 

DIALOGUE:

Part 1 - A Pet Show
Daniel, Philip, Kihei, and Ronion are busy. They're planning to have a pet show. Daniel's painting a sign. Philip and Kihei are building a table. Ronion's making a show ring. They're talking and working.
Daniel: I'm teaching my mynah bird to talk. It's not learning very fast. Are you training your dog to do anything, Philip?
Philip: My brother and I are teaching him to sit up. He's funny.
Kihei: My dog's learning to carry a basket.
Ronion: My cat and puppy are learning to ride in a baby buggy. They're not enjoying it. Kihei, is your cat learning to carry the basket very well?
Kihei: No. I have to give her a treat all the time.
Daniel: We want to have a good pet show.

Part 2 - The Junior Police Officer

John and Grace are walking to school. They see a friend. He's wearing a red band and a white helmet.

John: Good morning, Dick. Are you going somewhere?
Dick: Good morning, John. Good morning, Grace. I'm a J.P.O., a Junior Police Officer, this year. I'm not going anywhere. I'm helping at that crosswalk. Are you crossing the street there?
Grace: Yes. We cross there every day. We want to obey every school rule. That boy at the crosswalk is wearing a red band. He's not wearing a helmet. Is he helping you?
Dick: No. He's watching the playground. We're helping in the schoolyard and at the crosswalk. A J.P.O. is a helper at school.
John: My sister's going to be a J.P.O. next year.

EXERCISES:

2. Preposition: about
3. Irregular past: read
4. Lexical item: tell

NOTES: 1. The pronunciations of the noun plural endings are determined by the following conditions:
/-əz/ after stems that end in /s z ʃ ʒ ʃ j/, e.g.,
glasses, watches;
/-s/ after stems that end in /p t k f θ/, e.g., hops, hits;
/-z/ after all other stems, viz. those ending in
/b d g v ð m n ŋ l r/, vowels, and semivowels,
e.g., bids, goes.
2. Show pictures of single objects. Let a child tell what he sees. Then give a number and ask the child to pluralize:
C: I see a dog.
T: ...two
C: I see two dogs.
3. Teacher names an object. Child tells about more than one of that object:
T: ...kite
C: I have three kites.
4. Teacher tells what she reads every day. The child changes the sentence to the past tense at the right cue:
T: I read the newspaper every day.
...yesterday/last week
C: I read the newspaper last week.
5. Each child tells about a book he has read:
"I read a book about dwarfs."

DIALOGUE:

The Sun
John's asking his teacher some questions. They're questions about the sun. He's curious.
John: Is the sun our friend? Is it far away? What is the sun?
Please tell me. I want to know.
Teacher: Yes, the sun's our friend. It's 93 million miles away.
The sun's a great ball of burning gases.
John: Is the sun really burning?
Dick: Sure it is. I read about it in my book at home. It's very far away.
Teacher: You're right. Some planets are very close to the sun. They're very hot.
Dick: And some planets are very far away. They're very cold.
John: Then we're lucky. We're not too close to the sun and we're not too far away.
Teacher: Yes. The plants on our earth need the sun. We need the sun. Animals need the sun.
Dick: Then the sun is shining all the time. Our side of the earth is facing the sun now. The other side of the earth is dark now.

LESSON IVb - Grade 2

TARGETS:  1. Interrogative "did"
         2. Predicate substitute "did/didn't"
         3. Declarative "did" (negative)
         4. Irregular past: rang
         5. Prepositions: before, after
         6. Regular past: /-d/ ending

         2. The pronunciations of the regular past tense endings are determined by the following conditions:
            /-əd/ after stems that end in /t d/, e.g., melted -- (not target for this lesson);
            /-t/ after stems that end in /p k Ḟ ŋ s/, e.g., stopped -- (not target for this lesson);
            /-d/ after stems ending in voiced sounds except /-d/, e.g., climbed, played.
         3. Children ask each other questions about what they did.
            Give short answers:
            A:  Did you go to the beach yesterday?
            B:  Yes, I did. /No, I didn't.
         4. Teacher gives a sentence in the present tense. Child changes to the past:

VERBS: pull, call, plow, play, receive, rub, plug, dodge, slam, beg, prepare, try, fill.

5. Children tell what they do before or after school, etc.
6. Tell what two letters come before or after each other:
   T: "d"
   C: "b" and "c" come before "d".
   "e" and "f" come after "d".
   (Reason for two letters: 3rd person singular present tense hasn't been introduced.)

DIALOGUE:

A Fire Drill
A: Did you have a fire drill yesterday?
B: Yes, we did. The alarm rang before recess. The teacher didn't have to remind us about anything. We remembered all the rules.
A: Did the fire drill make you late for recess?
C: No, it didn't. We didn't have to go back in after the drill. We stayed out for recess.
B: Fire drills are a bother.
A: Oh, no, they aren't. A fire drill is important. We learn to get out of a building quickly and quietly.
C: Fire drills protect lives. They help us learn safety rules.
B: I know the rules. Walk quickly and quietly. Walk with your hands down.
A: You're right. The rules help to protect us.

LESSON IVc - Grade 2

TARGETS: 1. Past tense: /-ed, -t/ endings  
          2. Irregular past: told, was, were, became  
          3. Preposition: off

        2. Teacher gives the base form of the word. The child uses the correct past tense form in a sentence: 
           T: ...watch 
           C: I watched the baseball game yesterday. 
        CLUES: slap, wish, heat, load, visit, taste, miss, laugh, lock, scold. 
        3. Teacher gives the present tense forms of "was, were, told" in sentences. Children change to the past tense when clues like "last night," etc., are given: 
           T: He's sick. ...last night 
           C: He was sick last night. 
        4. Children make believe that an insect or animal is on something. Each child angrily tells another child to get it off: "Get the cat off my chair!" 
        5. Each child can take turns performing an action. Teacher can ask another child to tell what action was performed: 
           T: What did John do just now? 
           C: He hopped on one foot. 
        6. "Became" is not a high frequency word. Too much time need not be spent on it.

DIALOGUE:

Part 1 - The Columbus Story 
A: Did you read this book? 
B: What book is it? 
A: It's a story about Columbus. 
B: No, I didn't. Did you like it? 
A: Yes, I did.
B: We celebrated his birthday last month. The teacher told us about him.
A: That's right. Christopher Columbus was the son of a weaver. He helped his father.
B: But he didn't want to be a weaver. He wanted to be a sailor and go to sea.
A: He read books about different places.
B: And he listened to sailors. They were good storytellers.
A: He worked hard to learn to be a sailor. He studied maps. He became a sailor. He wanted to find a new way to India.
B: The King and Queen of Spain helped him with three ships. They were the Nina, the Pinta, and the Santa Maria.
A: Columbus and his crew sailed and sailed. Finally they landed on an island. It wasn't India, but he didn't know that.
B: He was a brave man. He didn't give up. We remember him for that.

Part 2 - A Good Story
A: Hi. I stopped at your house yesterday. You were out.
B: Yes, my mother told me. I was at the beach with my cousins. What did you want to see me about?
A: I just wanted to let you borrow this book. I read it and enjoyed it a lot. It's a story about an elephant. It was such a funny story. The elephant became a mother to a bird.
B: Oh, I know that story. My teacher told us that story. The elephant's Horton.
A: That's right. The mother bird liked flying around. She didn't want to sit on her egg.
B: I enjoyed that story, too. Thank you for thinking about me.

Part 3 - Good Table Manners
A: I borrowed this book from the library yesterday. It's a book about manners. Did you ever read it?
B: My teacher read it to us last year. I liked the part about using good table manners. I remember the funny boy with the puffy cheeks. He stuffed his mouth.
A: He reminded me of a boy with mumps. The teacher told us never to do that.
B: I was embarrassed today.
A: What happened?
B: My elbows were on the table. My friend became angry. I almost spilled his milk. I learned a lesson.
A: What was the lesson?
B: Keep your elbows off the table.
* Irregular plural but not introduced as a target in this lesson.
** Mass noun not introduced as a target in this lesson.
Special Notes for Part 3:

DIALOGUE:

Part 1 - Running an Errand

Do you go to the store for your mother sometimes? Do you remember to buy everything? Sometimes we need a list. We can't remember everything.

Mother: Ronion, would you go to the store for me? I need a few things.

Ronion: Yes, I will. What shall I get for you?

Mother: Let me see. I need a pound of stew meat and a quart of milk. I also need a box of cereal and a small bag of rice.

Ronion: Shall I return these empty bottles to the store?

Mother: Yes, please do. I don't have much syrup left. Will you get a bottle of syrup? We can have pancakes.

Ronion: Can I buy a carton of ice cream? I want to try these new colored ice cream cones.

Mother: Yes, you can. Please get me a head of lettuce, too. Oh, yes, and a small bag of poi. Here's a list. You'll need your wagon to carry all those things. Don't forget anything.

Ronion: Don't worry. I won't. But I'm going to have a lot of food.
Part 2 - The Supermarket

Let's visit the supermarket and talk to the manager. He's a busy man. He has to order many things for his store.

A: I know. The manager can't order too much meat or milk at one time. Those things spoil quickly. He can't order too many loaves of bread. No one wants to buy a loaf of old bread.

9. Pull an object out of a bag and give the class a quick glance at it. (Pictures can be used.) Then ask, "What did you see?" Child gives a complete sentence in reply: "I saw a ____________ ."

DIALOGUE:

The Telephone Lineman

Kihei wanted to borrow Victor's baseball bat. He tried all morning to call Victor on the telephone. He would only hear a busy signal. He couldn't get Victor.

Then Kihei remembered something. Victor's family might not be using the telephone. It might not be working. So Kihei called the operator. She thanked him for calling.

Later he rode over to Victor's house. He saw a lineman there.

Kihei: Hi. Is something wrong with my friend's telephone?
Lineman: I don't know. I'm checking the wires now. Do you know these people?
Kihei: Yes, I do. Isn't anyone at home?
Lineman: No. The lines seem to be all right. I'll go to the neighbor's house. I want to use the phone.
Kihei: Did you find out anything?
Lineman: Yes, I did. Your friend's telephone is off the hook. People should be careful about that.

7. If there are any new students, they can tell where they came from.

DIALOGUE:

The Farmer

Mrs. Cook got a lot of fresh vegetables yesterday. She washed them. Then she cut and cooked them for our lunch yesterday. Where did the vegetables come from? That's right. They came from a farm. Listen to Caroline and Renwick talk about farmers.

Caroline: Look at all the vegetables. Where did they come from?
Renwick: From a farm. A farmer worked hard every day to grow our vegetables.

Caroline: What did he do?
Renwick: He cleared and plowed the land with a tractor first.

Caroline: Did he use much fertilizer?
Renwick: Oh, yes. He used a lot. He planted the seeds and watered them. He also pulled the weeds.

Caroline: The water and fertilizer helped the plants grow.
Renwick: Yes, they did. Later he picked and cleaned the vegetables. Then he sent them to the store.

Caroline: And the store sold them to Mrs. Cook for our lunch.

   B: He had a magnet in his hand.
8. Other words that take "more - most" for their comparative-superlative forms: "careful, delicious, useful, powerful, painful, careless, polite".

DIALOGUE:

Electricity

We can't see the wind. But we can see the things the wind does.* It pushes the sailboats. It rustles the leaves of a tree. And it plucks a leaf now and then. It also helps to fly a kite.

Electricity is the same way. No one can see electricity either. But electricity helps people work more quickly. It helps make work easier for people.
A: I saw the most beautiful color TV program last night.
B: Was it more beautiful than a real movie?
A: It was just as beautiful.
B: Is a color TV set more expensive than a black and white one?

LESSON Xa - Grade 2

TARGETS: 1. Past progressive
2. Expletive: it
3. Irregular past: swam, left, heard, went
4. Mass nouns: noise, honey
5. Preposition: around

NOTES: 1. Children can take the parts of narrator, bear, duck, horse, and dog.
2. Variation: Teacher reads the selection and asks questions about the story to elicit complete sentences from the children.
3. If children have difficulty pronouncing the final cluster in "went", concentrate practice on Exercise 23 where "went" is followed immediately by a vowel sound.
4. Teacher asks everyone to perform an action; then asks everyone to stop at once:
   A: What were you doing?
   B: I was rubbing my hands. What were you doing?
   A: I was tapping on the desk.
   (Continue with the next two children.)
5. Do the same thing by asking the children to think about something funny: "What were you thinking about?"
6. Since the use of the expletive "it" is limited, practice will be limited to exercises. Teachers can also elicit the use of "it" by asking about the weather.
7. To elicit the past tense forms, "swam, left, heard, went", teacher can ask questions:
   "Where did you swim last week?"
   "Where did you leave your toys?"
   "What did you hear a while ago?"
   "Where did he go after that?"
8. "Noise" can be both a count noun and a mass noun:

9. Each child can ask another child to move around the room, a particular person, or equipment in a certain way:
   "Tiptoe once around the teacher's desk."

DIALOGUE:

Some Animals Do and Some Don't

It was a beautiful day. A little bear was out alone in the woods. He was looking for something to do. The other little bears were
taking naps.
  First the little bear listened to the sounds around him. The leaves were rustling and a cardinal was chirping.

  The little bear jumped into a pond. He swam and splashed. He made a lot of noise. A duck was swimming in the pond, too. But the duck wasn't noisy.

Little Bear: How do you swim so quietly?
Duck: Some animals do and some animals don't.

  So the little bear left the duck's pond. He trudged along. Soon he heard a horse's neigh.

Little Bear: That's a good sound.

  He tried to make a neighing sound.

Little Bear: Nn-grr. How do you make that neighing sound?

Horse: Some animals do and some animals don't.

  The little bear walked on. It was getting late. Soon he came to a tree with honey in it. He climbed the tree and was eating the honey.

A dog saw him.

Dog: How do you find honey?

Little Bear: Some animals do and some animals don't.

  Then he went on eating.

LESSON Xb - Grade 2

TARGETS:
1. Irregular plural: scissors
2. Mass nouns: fun, paste
3. Strengthening the use of the past progressive

NOTES:
1. Substitute names of children.
2. Each child can either describe his scissors or tell what he uses them for, or ask another child where his scissors are (or where his "pair of scissors" is).
3. Each child tells what is fun to do: "Swimming is fun."
4. Ask each child the question: "What was your father/mother/etc., doing when you got home from school yesterday?" (To elicit past progressive.)
5. "Scissors" takes a plural verb, whether referring to one or more than one. But when the determiner phrase "pair of" is added, the word takes a singular verb and a singular pronoun.
6. Let's Go Back in Time: Each child tells what he or his family was doing at a particular time in the past. Teacher can give the cue:
   T: ... 2 o'clock last Saturday.
   C: My brother and I were swimming at Onekahakaha Beach.

DIALOGUE:

Making Puppets

The second graders were making puppets one day. They were using scissors, paste, colors, and paper bags. They were planning to give a puppet show. They were going to do the story of the three bears.

   T: What did you eat last night?
   C: I ate a bowl of cereal.
   (The reason for the pictures is to limit the use of mass nouns to only those that have already been introduced.)
3. Teacher asks each child: "Where are all the______?"
   C: John has most of them. Mike has some. I don't have any.
4. Using the same pictures as #2 cues, children can practice these patterns: "I don't have any cereal left in my bowl. I ate most of it."
5. Teacher shows pictures of count nouns as cues:
   A: I have one banana. But Victor has several bananas.
   B: They are different kinds of bananas.
Dialogue:

Buying Food

There are many different kinds of food to eat. We buy most of our food at the supermarket.

The man at the supermarket buys the food from different places. Some of the food comes from the mainland by jet. Some of the vegetables come from Waimea by truck. So does some of the meat. Most of the canned food comes by boat. It comes from several different places.

Mother: Victor, will you please get ready. I'm going shopping. I want you to come with me.

Victor: Okay. What will you buy?

Mother: I'm making a list now. Come and help me. Is there enough milk left for supper?

Victor: No, there isn't. There's only half a quart in the refrigerator.

Mother: Then we'll need to buy a carton of milk. How much lettuce is there in the refrigerator?

Victor: There isn't any left. And there aren't any oranges left. We ate all the lettuce and oranges at lunch.

Mother: There's a sale at the supermarket today. I can buy lots of food.

Exercises:

1. A: Do you have any pets? B: No, I don't have any.
   marbles?
   balloons?
   puppets?

    B: I ate four crackers.
       two guavas.
       a piece of raisin bread.
       a bowl of hot cereal.
LESSON XIIa - Grade 2

TARGETS: 1. Tag questions
2. Noun substitute: much
3. Mass noun: air

NOTES: 1. It may be difficult to elicit tag questions independently. Teacher can provide questions with tags as models. They can be tag questions about where the children live, what they like or dislike, or what they did. If the statement is affirmative, the attached question is negative; if the statement is negative, the attached question is affirmative. The person asking a question that begins with an affirmative statement usually expects the other person to agree with him. The person asking a question beginning with a negative statement expects a negative answer. However, the person responding may either agree or disagree.

Examples:
T: You live on Pua Street, don't you?
C: Yes, I do. /No, I don't live on Pua Street.
T: John isn't here, is he?
C: No, he isn't. /Yes, he's here.

2. Refer to the Pronunciation Section of the Manual for intonation patterns to use with tag questions.

3. The dialogue and Exercise 6 are marked with intonation patterns. The teacher should adhere to these patterns until the children are familiar with them. She may then vary the emphasis, but the intonations on the tag questions should not be varied.

4. Have children ask tag questions by using pictures to help:

A: He's a pretty dog, isn't he?
B: They're busy, aren't they?

5. A Game: Teacher gets an object from each child, mixes them all up and then gives one to each child. The children address the persons they think are the owners of the articles:

A: This is your eraser, isn't it, Philip?
B: Yes, it is. /No, it isn't.
(Three guesses are allowed.)

Or have a "shadow play," using a flashlight. Child casts a shadow of an animal, etc., by using hands. Another guesses what figure is depicted:
"It's/That's a rabbit, isn't it?"
The first child replies, "Yes, it is," or "No, it isn't."
6. Ask children to talk about "air": properties, uses, and importance to living things.

7. Each child asks another child the question:
   A: How much meat do you need/have/eat?
   B: I don't need/have much.

CUES: milk ice cream water
      food lettuce cereal
      rice paper honey

DIALOGUE:

Water in the Air

There's much water all about us. There's water in the ocean and water underground. There's a lot of water in the air. Much of the water in the air comes from the ocean. Some of it comes from plants. Water from rain puddles goes into the air.

A: It rained hard last night, didn't it?
B: It sure did. There are a lot of puddles outside now, aren't there?
A: Yes. But they'll disappear in no time, won't they?
B: I don't know. Where does the water go? Do dogs drink up all the water in the puddles?
A: No, they don't. Some of the water goes underground. Much of it changes into a gas and goes into the air.
B: Oh. That's interesting, isn't it?
A: Yes, it is. We learned all about water and clouds during our science periods.

EXERCISES:

(Notes:
1. If the children have difficulty, have them first say the sentences without the tag and then add the tag.
2. Go through the exercises using the falling intonation first. When the children are familiar with this pattern, go through the exercises again using the rising intonation. Then finally combine both patterns.)

1a. A: It's hot today, isn't it?  B: Yes, it is.
   cold
   windy
   sunny

LESSON XIIIa - Grade 2

TARGETS: 1. Complex sentences
2. Irregular past: fell, drank, thought, found
3. Mass noun: kerosene
4. Reflexive pronoun: himself

2. Have an overturned box on the table with objects under it. One child goes up to look under it, chooses something, and tells the class: "I found a ______ under the box." Next child goes up.
3. One child asks another child the question: "How much milk/water did you drink yesterday?" Second child gives an appropriate answer: "I drank two glasses of milk yesterday."
4. Teacher can use the same objects as #2 and can drop one object at a time. Children tell what fell:
   T: Did something fall off the table?
   C: Yes, a pencil fell off the table.
5. Children are asked to make believe a situation where they see or hear something weird. They tell the class about it, using this pattern:
   "I heard a buzz. I thought it was a bee. But it wasn't. It was a giant fly."
6. Since "kerosene" is not a high frequency word, too much time needn't be spent on it. Children can talk about kerosene--its properties and its uses:
   A: Kerosene looks like water. It has a strong smell. Water doesn't.
   B: Kerosene burns.
   C: We use kerosene in lamps.
7. For eliciting complex sentences:
   a. Ask children to say what they would wish for if they had a wishing ring. Or where they would go if they could fly: "If I could fly, I would go to the moon." "If I had a wishing ring, I would wish for a boat."
   b. Ask children to say what they'll do when they grow up: "When I grow up, I'll be a nurse."
   c. Ask children what TV show they like best: "The TV show I like best is 'Bewitched.'"
   d. Ask children to say why they like or don't like to do something: "I like to go to the fair because I can ride the Ferris wheel."

546
8. Each child tells what his little brother can do by himself: "My brother can dress himself."
Or pictures of a little boy performing various tasks can be shown. Each child tells what the little boy can do by himself: "He can take a bath by himself."

9. For extra material refer to the following:

DIALOGUE:

Safety at Home

There are many rules we follow in school. There are safety rules and behavior rules. There are also safety rules to follow at home. But we don't always remember them.

A: We like playing with toys but we don't leave them on the steps.
B: Yes, that's right. When I left my toy truck on our steps, my father tripped over it.
A: Did he hurt himself?
B: No. He fell down but he didn't hurt himself.
A: My little brother got sick when he drank from a bottle in the closet. He thought it might be good, but it wasn't.
B: What was it that he drank?
A: It was kerosene. We had to take him to the doctor when we found out.
B: If we don't know what something is, we mustn't drink or taste it.
A: That's a good rule to remember.

EXERCISES:

   B (to "A"): Yes, he made it himself.  
   found  
   (etc.)  
   No, he didn't make it himself.  
   (etc.)
LESSON XIIIb - Grade 2

TARGETS: 1. Mass nouns: grass, hair  
2. Preposition: through  
3. Strengthening the use of complex sentences  
4. Strengthening the use of the expletive "there"

NOTES: 1. The complex sentences are underlined in case further practice is needed.  
2. The teacher can ask questions to vary practice in using the sentences:  
   "What does the story explain?"  
   "What does the spider tell the people?"  
   "Where does a spider like to walk?" (etc.)  
3. Each child says whose hair he likes and why:  
   "I like Brenda's hair because it's curly."  
4. Can You Do It?: One child asks another if he can walk or see "through" something. The reply must be a short and a long answer. If the reply is negative, the child adds what he can walk or see through:  
   A: Can you see through the window?  
   B: Yes, I can. I can see through the window.  
   A: Can you walk through a wall?  
   B: No, I can't. But I can walk through a spider web.  
5. Each child tells what he would do if he ever met a ferocious animal face-to-face. Teacher can give the names of the animals:  
   T: What would you do if a lion walked into this room?  
   C: I would jump into the closet if a lion walked into this room.  
   (Ask children to repeat the condition so that they will use complex sentences.)  
6. Each child tells what he could do if he could be something or someone else:  
   "If I could be a plane, I could look down from the sky."  
7. Each child tells what he does or should do when he or his pet is sick (has a cold, stomach ache, etc.):  
   "When I'm sick, I sleep all day."  
8. A child can pantomime the story to make it more meaningful.
An African Tale

There's an African story that many children like to hear. It explains why the spider has a bald head.

In the story, the spider is a greedy fellow. He likes to eat.

One day the spider's helping to plant rice. The smell of beans cooking makes him hungry. He creeps into the house to steal some beans. He puts the hot beans into his hat to carry away. Suddenly many people come in. So he places the hat full of beans on his head. The beans are hot so he hops up and down. He tells people that he's doing the hat-shaking dance.

The beans are so hot the spider finally has to take off his hat. The beans spill on the ground. All the people laugh at the spider. Now there's no hair on his head. It's as bald as an egg. He's so ashamed that he crawls in the grass. That's why the spider is bald and still likes to walk through grass.

EXTRA MATERIAL:

On An Island (Tune: "Clementine")

On an island, in a valley
In a farmhouse far away
Lives a farmer and his daughter
And I often hear him say:

"Oh, my daughter, oh my daughter
Oh my daughter, Clementine.
If you ever leave this island
I will miss you, Clementine."

In a ship, on the water
Clementine now sails away
As she sails upon the ocean
We can hear her softly say:

"Oh my father, oh my father
I'm so sorry I can't stay
I'm going off to see the city
I'll come back again some day."

LESSON 1a - Grade 3

TARGETS:
1. Nominative pronouns: I, he, she, it, we, they, you
2. Linking verbs: am, is, are (contracted)
3. Determiners: a, the
4. Lexical item: like

NOTES:
1. Substitute names of children.
2. Pronunciation of "the": Because the choice of the vowel sound in this word, /i/ or /ə/, is determined by whether the word that follows begins with a vowel sound or a consonant sound, be sure to group the items chosen into those words that begin with the vowel sound and those that begin with a consonant sound. Once the students have gotten the conditioning pattern, use the determiner with words beginning with vowel and with consonant sounds. Examples:
   /iː/: the apple  the elephant  the orange
   /əː/: the green apple  the monkey  the bird
3. Children can play a guessing game. First child describes a person or thing by saying, "It's fat and bumpy," etc. The second child guesses what it is, using a declarative sentence such as, "It's a toad." Or, the first child pretends he's another person or an object by saying, "I'm fat and bumpy." The second child guesses, "You're a toad." In either case the first child can reply to the second by saying, "You're right," or "You're wrong."
4. Show a picture of a person or a thing. Have children describe the picture or thing.
5. Substitute names in exercise #2. Example: "Mr. Kawate's a custodian. He's the Keaukaha School custodian."
6. Have children talk to each other in exercise #2:
   A: That's a new book.
   B: Yes, that's the science book.
7. Use your discretion in the use of contractions. If the children have difficulty contracting, use the uncontracted form until they feel very comfortable, then attempt it again.
8. Each child tells what his father's, mother's, or other relative's occupation is: "My father's a tour bus driver."
DIALOGUE:

Part 1 - A New Boy

A: Hello, I'm a new boy here. My name's _______.

B: Hi, my name's _______. I'm a third grader. Mrs. Kubota's my teacher. She's a third grade teacher.

A: Mrs. Yamanaka's my teacher. I'm a third grader, too.

B: She's the other third grade teacher.

A: My brother and sister are new here, too. He's a second grader and she's a first grader. We're all new here.

B: They're lucky. Mrs. Chow's the second grade teacher and Mrs. Nishimoto's the first grade teacher. Mrs. Nishimoto and Mrs. Chow are very friendly. They're very helpful.

A: You're friendly and helpful, too. I like this school. It's really nice.

Part 2 - A New Girl

A: Hi, (Name). This is my friend (Name). She's new here. She's a third grader.

B: I'm a third grader, too. My name's _______. Come and see our school. We like this school. We're happy here. Keaukaha's a very nice school. This is our cafeteria.

C: Oh, it's big.

B: That's Mrs. Cook and there's Mrs. Okimoto. They're very busy every day. They cook and clean up. The other woman is Mrs. Shiraishi. She's a helper, too.

A: That's the office. The principal's there. The secretary and her aides are there, too. Our principal's Mr. Hirano. Mrs. Yanagi's the school secretary. That man's Mr. Kawate. He's the custodian.

B: This is the third grade classroom. We have the same teacher. This is our room.

C: Oh, it's a big room. It's so pleasant. You're right. Keaukaha's a very nice school. You're so friendly.

EXERCISES:

LESSON Ib - Grade 3

TARGETS: 1. Determiner: an

2. Teacher gives a noun. Children use it with the right determiner: "a/an" (owl, egg, Easter basket, basket, animal, airplane, tree, book, etc.)
3. Have children tell what occupations different people have. For example: "My sister's a waitress."
4. Teacher and children talk about different people or things in the manner of exercise #2 in Lesson Ia.
5. Have pictures from magazines and catalogues of single objects and animals. Have a basket or box for "a" and another for "an". Have two teams. Each child gets a chance to pick out a picture and deposit it in the right basket, using the proper determiner: "a ball". A point is given for each right response. The team with the most points wins.

DIALOGUE:

Part 1 - Baseball
A: That boy's a baseball player. He's an excellent pitcher.
B: The other boy's pretty good, too. He's our catcher.
A: Mr. Silva's our coach. He's that man there.
B: He's so big.
A: He's a good coach. He's a good baseball teacher. Our team's really great. We have a winning team every year.
B: Yes, I know. I watch the team play every game. Every player is good.
A: Yes, they play well together. They're a real team.

Part 2 - An Electrician
My brother's a hard worker.
He's an electrician.
He's a good electrician.
My uncle's an electrician, too.
They work together.
They do a good job.
They sometimes wire a new house.
Sometimes they repair an old broken switch. And sometimes they fix a stove or a refrigerator.
An electrician's an important man.
My uncle and my brother keep our house safe. They're always busy.

LESSON IVb - Grade 3

TARGETS: 1. Interrogative "did"
2. Declarative "did" (negative)
3. Noun determiner: another
4. Possessive pronoun: their
5. Prepositions: about, under
6. Lexical item: ask

NOTES: 1. Each child asks another child a question beginning with "did". Second child answers with a simple "yes" or "no".
2. One child names an object. Second child says he wants or has another of the same:
   A: ... apple
   B: I want another apple.
3. Tell about something that belongs to other people using possessive pronoun "their":
   A: It's their book.
   B: Their car is new.
4. Have book jackets which suggest the books' contents. Let each child tell what each book is about:
   "That book is about planets."
5. Missing bean game: Have 3 different containers. Place a bean under one container. Children guess where it is:

597
A: Is it under the red cup?
B: Yes, it is./No, it isn't. (Give three guesses.)

6. Underlined words may cause difficulty and teacher may have to discuss these concepts with the children beforehand.

7. Each child asks another child a "Did you ever...?" question. Answer with simple "Yes" or "No".

8. Each child tells about something he failed to do this morning or last night: "I didn't fix my bed this morning."

9. Have children say what they "dream, think, worry about" and are "happy, sad, careful, careless, mad, sorry about."

DIALOGUE:

Fire Prevention
The third graders watch a movie on fire prevention. It's an important movie. Two boys talk about it later.
A: Did you like the movie?
B: Yes. Fires are costly and dangerous. I didn't think about that before. Did you learn anything from the movie?
A: I didn't know about the different causes of fires.
B: Did you understand that part about bad wires causing fires?
A: Yes. We have dirty, oily rags under our house. They sometimes cause fires, too.
B: In the movie the rags begin burning. Did you catch the big words for that?
A: Yes. We call this spontaneous combustion.
B: Spon-ta' - ne - ous com-bus' - tion?
A: That's right. Often another cause of fires is boys and girls playing with matches.
B: Let's ask the teacher to talk to the class about causes of fires tomorrow. I'm going to check under our house for dirty, oily rags.
A: Let's ask the boys and girls to check under their houses, too.

LESSON IVc - Grade 3

TARGETS: 1. Past tense: /-t, -d/ endings
          2. Irregular past: went, was, were
          3. Predicate substitute "did-didn't"
          4. Lexical items: want to, stay
          5. Strengthening the use of interrogative "did"

NOTES: 1. The pronunciations of the regular past tense endings are determined by the following conditions:
          /-ed/ after stems that end in /t d/, e.g., melted --
          (not target of this lesson);
          /-t/ after stems that end in /p k ç t ð s/, e.g., stopped;
          /-d/ after stems ending in voiced sounds except /-d/,
          e.g., climbed, played.
          2. Substitute names of children.

600
CLUES: burn, cook, learn, close, answer, fill, wish, laugh, live, study, believe, watch.

4. Teacher uses "go, is, are" in sentences. Ask children to change to the past tense at cues: "yesterday, last week, last summer," etc.

   T: I go to the zoo every day. ... last summer
   C: I went to the zoo last summer.
   T: I'm hungry. ... last night
   C: I was hungry last night.

5. Use magazine pictures for clues to elicit "did" questions:
   Example: Picture -- Boy swimming.
   A: Did you ever go swimming?
   B: Yes, I did. /No, I didn't.

6. Let each child answer this question: "Where did you go yesterday?/last Sunday?" etc.

7. If the children have difficulty pronouncing the final cluster in "went", concentrate practice on exercises 13 and 14 where "went" is followed by a word beginning with a vowel sound.

DIALOGUE:

Part 1 - The County Fair
A: Did you go to the County Fair last night?
B: No, I didn't. Did you go?
A: Yes, I did. We stayed there about an hour.
B: Did you ride the Ferris wheel?
A: No, I didn't. I went to see the main show. It was interesting.
B: Oh. Did you see the fat lady and the midget?
A: Yes, I did. They looked funny. They were so different.
B: Did they act?
A: No, they didn't. We looked at the exhibits afterwards. I tried to ride the ponies but the line was too long.

Part 2 - The Bicycle
A: Hi, (Name). Did you fix your bicycle yesterday?
B: No, I didn't. I'm working on it now. We went to visit my uncle in Panaewa yesterday. I played with my cousins. Did you finish your model airplane?
A: Yes, I did. I finished painting it last night. Where's your big brother?
B: He was here a short time ago. He helped me take off this wheel. Did you want to see him?
A: No, I didn't. Let me help you. What's wrong with your bike?
B: The screws were loose and the brakes didn't work.
EXERCISES:

LESSON IVd - Grade 3

TARGETS: 1. Past tense: /-ed/ ending
          2. Irregular past: read
          3. Noun determiner: a lot of
          4. Noun substitute: two
          5. Preposition: by

NOTES: 1. Let different children take the roles.
        2. Give the present tense form of a verb with /-t, -d, -ed/ endings. Ask children to use it in the past tense in a sentence.
        3. One child tells about what he reads. Another child uses the same sentence in the past with the use of clues like: "last week, yesterday," etc.
        4. Teacher names a singular count noun. Children use the plural form in a sentence with determiner "a lot of".
        5. Use illustrations of different kinds of cells, or actually examine cells under a microscope.
        6. Ask children to provide answers to these questions. They can make up answers. Ask them to use complete sentences:
           a. What did the hunter hunt?
           b. What story did you read?
           c. What did the lion chase?
           d. What did the magician show you?
           e. What did you count?
        7. Variation of "Simon Says": Each child gets a turn to be "It". He can give three commands. He must use the word "by" in his command, and he can order not more
than three people around at one command. When he pre-
cedes his command by "Simon says," he is obeyed.
Otherwise no one makes a move:
"Simon says: Daniel and Kihei, stand by the door."

DIALOGUE:

Cells
Mildred, Emmett, and Wakeland wanted to learn about body cells. They visited the library. They read books. They talked with the teacher. Then they reported to the class.
Mildred: Plants and animals are made up of cells. A cell is a tiny thing. All living things have cells. One plant cell is different from another plant cell.
Emmett: Mildred's right. A blood cell is different from a skin cell. Our bodies contain a lot of cells. Some are bone cells. Some are muscle cells. And some are blood cells.
Wakeland: Cells grow. We eat to help cells grow. They multiply/increase by splitting in two. Then they grow again. So our bodies grow, too.
Emmett: Cells are always working to protect our bodies.
Wakeland: They're working to repair and to build parts of our bodies, too.

5. Each child tells what he doesn't like and what he likes.
   Each child tells what a third person doesn't like.
6. Teacher places about a dozen objects on a table beforehand and covers the table with a piece of paper. She uncover the table, gives the class about five seconds to see what's on the table. Then she quickly sweeps everything off the table and into a box or sack. Then each child is asked to name one object on the table in answer to her question:
   T: What did I have on the table? (A complete sentence is required.)
   C: You had a block on the table.
DIALOGUE:

Part 1 - School
A: Does your little brother like nursery school now? Mine does.
B: Yes, he does, too. He doesn't cry every morning any more. He cried and cried for a whole week. I had to sit in the classroom with him.
A: Do you walk with him to nursery school?
B: No, I don't. My parents drop him off on their way to work. I don't ride with them. I like to walk to school with my friends. Do you ride to school?
A: Sometimes I do and sometimes I don't. My father doesn't go to work at the same time every day.
B: Oh. Does he work on different shifts?
A: Yes, he does. He's a hotel worker.

Part 2 - Hula Lessons
A: Hi, (Name). Where are you going?
B: Hi, (Name). I'm going for my hula lessons. Do you want to come along?
A: Does your teacher allow you to bring friends?
B: Yes. She doesn't mind having visitors. We had some tourists watching us last week.
A: Oh. Does your group entertain at the hotels?
B: Sometimes we do. We danced at the Naniloa Hotel last year.
A: Do you have a hula recital every year?
B: No, we don't. We had a recital two years ago. We didn't have a recital last year.
A: Do you learn Tahitian dances, too?

LESSON Vb - Grade 3

TARGETS: 1. Lexical item: also
          2. Third person singular present tense: /-z, -s, -əz/ endings

NOTES: 1. The pronunciations of the third person singular present tense verb endings are dependent on the same conditions as those for the noun plural. Refer to the Notes Section of Lesson IVa.
          2. Substitute names of children.
          3. Children tell about other rules on good manners:
             A: A polite person listens to others.
             B: A polite person doesn't push.
          4. Children tell about different members of their family and what each does to help with chores:
             A: My sister irons the clothes.
             B: A fireman keeps his truck clean.
          5. One child tells what he does or likes. Another child says he likes or does the same thing:

611
A: I like dogs.
B: I like dogs also.

6. After the complete dialogue is presented, teacher can ask for examples of "thinking of others."

7. Each child tells what sound an animal makes or how it moves. The teacher can name the animal as a cue:
T: ...a mouse
A: A mouse squeaks.
B: A mouse scampers.

DIALOGUE:

Part 1 - Good Manners Are Important
A: Do you always remember to use good manners? I don't. I sometimes forget. Then my mother reminds me.
B: I sometimes forget also. Let's talk about some rules to remember. What's a polite person like? What does a person do to be polite?
A: That's a good idea. A polite person always thinks of the other person. He shares his things and takes his turn.
B: He doesn't whine and cry. And he doesn't show off. He remembers to say "Please" and "Thank you."
A: He watches for ways to be helpful. He listens to his parents. He's a good visitor. He uses good table manners.
B: My little brother smashes things and touches things on visits. That isn't very polite. He has to learn good manners.
A: Let's try to help him learn.

Part 2 - The Library
A: I like to go to the library.
B: So do I. The librarian helps us. She also teaches us the proper way to care for books.
A: Yes. A book's our friend. It needs proper care.*
B: The librarian never puts an open book face down. She uses a proper book mark. She never uses a pencil or a ruler.
B: A page tears easily. So I turn each page carefully. I never fold down the corner of a page. I use a bookmark instead.
A: The librarian keeps the books clean. We help her by following rules.

(* Mass noun. Not introduced as a target yet, but used here because of necessity.)

LESSON Vc - Grade 3

TARGETS:
1. Affirmative declarative "do-does"
2. Negative interrogative "do-does"
3. Noun substitute: one
4. Preposition: around
5. Lexical item: tell
6. Strengthening the use of the third person singular

NOTES:
1. Children can dramatize the story.
2. Children can take different parts of the dialogue.
3. Children can be asked questions about the dialogue for further practice in using the targets.
4. "He doesn't find anything," can be substituted for "He finds nothing at all."
5. Illustrations of the solar system could be used to make Part 2 of the lesson more meaningful to the children.
6. Have children ask questions using these patterns: "Doesn't/Don't _____ like to/want to/have to _____?"
(Cues can be the single and multiple cutouts or pronouns on flash cards -- "they, we, I, you, he, she".)
7. The children can make up a movie roll by illustrating the story. They can tell the story in their own words.

DIALOGUE:

Part 1 - A Fable - The Goose With the Golden Eggs
1st C: Do you know the story about the greedy farmer?
2nd C: No, I don't. Tell me the story.
1st C: One day a farmer goes to the nest of his goose. He doesn't expect to find anything. But to his great surprise, he does find something there.
2nd C: What is it?
1st C: It's an egg. Not an ordinary egg. One of solid gold. He rushes into his house and tells his wife about the egg.
They're so happy. They dance around the kitchen.

2nd C: What do they do then?

1st C: Every day they go back to the nest. Each day the goose lays one golden egg. But the farmer grows greedy.

2nd C: Doesn't he think that one golden egg a day is enough?*

1st C: No, he doesn't. He kills the goose and cuts it open.

2nd C: Why does he do that?

1st C: He's looking for all the golden eggs at once.

2nd C: Does he find a lot of golden eggs?

1st C: No. He finds nothing at all. He doesn't even have the goose any more.

2nd C: The story teaches us not to be greedy.

(* Complex sentence - not introduced as a target yet, but included here for expediency.)

Part 2 - The Earth

A: The earth revolves around the sun. Did you know that?

B: Yes, I did. Does the moon revolve around the sun also?

C: No, it doesn't. The moon goes around the earth.

A: Do the other planets revolve around the sun, too?

C: Yes, they do. The earth is just one of the planets.

B: Don't the planets ever bump into each other?

C: No, they don't. Each planet travels its own orbit around the sun. An orbit is a path. The sun pulls each planet to keep it in its own orbit.

A: Do all the planets move in the same direction?

B: Yes. The planets do move in the same direction. They also go around the sun at different speeds. So at certain times, two planets appear close together.

A: All this is interesting. Just think. Right now we're moving around the sun.

EXTRA MATERIAL:

Poor Old Lady (Author unknown)

Poor old lady, she swallowed a fly,

LESSON VIc - Grade 3

TARGETS: 1. Modals:
   a. would - interrogative, predicate substitute, affirmative and negative declarative
   b. could - interrogative, predicate substitute, affirmative and negative declarative

2. Irregular plural: people

3. Noun determiners: those, these

4. Preposition: without

NOTES: 1. Teacher gives each child a number of the same object, or a picture of a number of the same objects. Each child uses the determiners "those" and "these" to tell about their objects and those of others:
   A: I'll buy those apples on the table.
   B: I'll buy these apples here.

2. Let each child tell about going to school last year, minus a necessary item, or tell about a toy with a missing part:
   A: I went to school without a sweater.
   B: I have a truck without tires.

3. "Would" and "could" may be used interchangeably in a question like this: "Could you help me with this?" (Meaning may be different, or about the same.)
   a. Children ask questions beginning with "would" or "could". Others give a reply in the affirmative or negative declarative:
      A: Could you see the jet?
      B: I could see the jet. /I couldn't see the jet.
      A: Would you ride a jet? (etc.)
   b. Give a sentence in the affirmative declarative and have a child transform it into the interrogative form, using the appropriate pronoun. Another child
gives the reply:
T: Darren could help Jon with his work.
A: Could he help Jon?
B: Yes, he could.

4. Exercises: Use "these" and "those" with "kinds of" -- a target in previous lesson:
"I want those/these kinds of apples."

5. One child asks another if he could perform a particular task in the past. Child answers with the predicate substitute.

Children describe what people are doing:
"The people are watching a ball game."

DIALOGUE:

A New House

The Wessels are building a new house in Panaewa. Many people are helping to build the house. Would you like to hear about these workers? We wouldn't be able to have homes without these helpers.

A: Dad, could we go to Panaewa to see our new house?
Dad: Yes, we could. Tomorrow's Saturday. I could plant some fruit trees. We wouldn't be in the way of the carpenters and electricians. Those workers are very busy right now.

A: I'd like to watch them work. I could make a report in school. Those people are important workers.
Dad: You're right. Could you name other workers?
A: Well, we talked about them in school. We couldn't build a house without a plumber.
Dad: No, we couldn't. What other helper would we need?
A: We would need a painter. He'd be about the last worker to finish the house.
Dad: Yes, he would. Building a house today is very different. In the early days, the pioneers did everything. Each man could do many different things.

   b. Each team takes a part: "A" asking the question, "B" giving the predicate substitute response, and "C" giving the complete statement.
   c. Individuals shift positions within the group after each round.
4. Modals are often interchanged with each other with only a slight difference in meaning: "That must be/ought to be/should be interesting."
5. Have children ask someone for advice: "Should I buy this doll or that troll doll?"
   Someone else can change it to an affirmative statement: "You should buy the troll doll."
   Or negative statement: "You shouldn't buy the troll doll."
   Or to make it stronger: "You must/mustn't buy the troll doll."
6. Let children tell about something they have to do which needs immediate attention. Teacher can perhaps make up a situation: (It's beginning to rain. Mother looks at her clothes hanging outside and says,) "I must bring the clothes in."
7. Have pictures of children in action. Let class tell what the children are doing: "The children are dancing."

8. Have the children tell what or whom they should obey, and why: "I should obey my mother. Then she won't scold me."

DIALOGUE:

School Rules
We must obey school rules. School rules protect children. Not obeying school rules might cause accidents. We should listen to the J. P. O. s. They help to protect us.

A: Should we always listen to the Junior Police Officers? Some of them are always yelling at us.

B: We mustn't talk back to a J. P. O. He's a school helper. He's trying to do a job. But he shouldn't be rough with little children. He should explain the rules to them.

A: Should he report naughty children to the principal?

B: Yes, he should. That's his job.

A: Should a J. P. O. punish naughty children?

B: No, he shouldn't. He can talk to the children and explain the rule. He must try to be polite. He mustn't be mean.

A: A J. P. O. certainly has an important job. It isn't an easy job. I'm going to try to obey the rules. Then the J. P. O. s won't have to remind me.

EXERCISES:

1. A: Should the children study today.
   B: Yes, they should.
   No, they shouldn't. They should do it later.

2. I must study today.

LESSON VIIf - Grade 3

TARGETS:  1. Objective pronoun: them (referring to inanimate objects)

2. Negative imperative

3. Irregular past: gave

2. Teacher or a child can say that he had several things. (Use count noun plurals.) Use the following pattern:
A: I had three marbles yesterday. I don't have them now.
B: Did you give them to someone?
A: Yes, I did. I gave them to Jon.
Variation: Children sitting next to each other can form pairs and have a dialogue.

3. Children tell about safety rules, school rules, and good manners. Encourage this use of the negative imperative.

4. Teacher makes up a sentence with "give". A child is asked to phrase it in the past. Use "every day" with present tense and "yesterday", or some other adverb to signify the past.

5. Teacher can have pictures of count nouns. (Each picture must contain more than one of the same thing.) A child gets to choose one picture and he names what he sees; then tells what he can do with the objects pictured, substituting the pronoun "them":
C: Oranges. I can eat them.

6. Use the same pictures as above. Have the children respond to the question:
T: Who did you give the ______ to?
C: I gave them to my mother.

7. Set up two teams. Each team takes turns setting up
object cues for the other team to use in a sentence:
Team A: Guavas
Team B: I'm going to take them home.
The teacher can be the judge. A team gets a point whenever it gives a correct sentence.

DIALOGUE:

Bicycle Rules
Should we have rules for bicycle riders? Car drivers have rules. They must obey them. Bicycle riders should obey rules also. Let's talk about these rules.
A: (Name) has a new bike. His aunt gave it to him for his birthday.
B: That's great. Now we all have bikes. Let's ride them to the beach on Saturday.
A: We should talk about safety rules. My dad won't let me ride around with careless riders.
B: That's a good idea. What are some things to remember?
A: We should obey all traffic lights and signs. Don't ignore them.
B: Don't carry passengers on your handlebars.
A: Don't weave in and out. And don't swerve from side to side.
B: Don't forget to keep to the right.
A: We shouldn't ride on sidewalks.
B: Don't do stunts or race on the highway.
A: And don't ride at night without lights or reflectors. Car drivers might/may not see you without them.

      do plants/do animals need food?"
      Sample replies: "Food makes our bodies/body cells grow."
4. Let each child think of all the different ways we can ask
   for or talk about meat, rice, milk, and water.
DIALOGUE:

A Picnic Lunch

The third graders are planning a picnic at Onekahakaha Beach. They want to surprise Mrs. Kubota. They're planning the menu.

A: How much food should we bring to the picnic?
B: Let's bring a lot of it. I get hungry at the beach.
C: We know that. We're talking about different kinds of food.
D: Barbecue meat is tasty. Let's bring some. We can cook it on the grill.
E: Then we need a big pot of rice. Rice tastes good with meat. Could your mothers cook it for us?
F: Sure, my mother can. She'll cook a pot of rice.
G: My mother can too. Let's have several pots of rice.
H: We'll get thirsty and hot. Let's bring a thermos of water. I always have a glass of water with my meal.
I: Water isn't nourishing. We should bring some milk. Shouldn't we bring a quart of milk?
J: Maybe we need two quarts of milk. Does Mrs. Kubota drink milk?
K: Sure she does. Milk is good for grownups too. Let's bring a gallon of milk.

Mrs. Kubota: What kind of food are you going to serve me at the picnic?
Children: We won't tell you now. The picnic food is going to be very delicious. It'll be a surprise.

LESSON VIIb - Grade 3

TARGETS: 1. Noun possessive: /-s, -z/ endings 2. Irregular verbs: lost, found 3. Noun determiner: whose

NOTES: 1. The pronunciations of the possessive endings are dependent on the same conditions as those for the noun plural. Refer to the Notes Section of Lesson IVa. 2. Substitute children's names in the dialogue and the exercises. 3. Have children talk about things they have lost and found: "Did you lose anything last year?/last week?" "Did you find it?" "Where did you find it?" ANS: "Last year I lost my slippers. I found them in a hole." Have children talk about having helped someone look for something that someone had lost and found: "Did your friend, brother or sister ever lose anything?" "Did you ever help him find it?"

4. Hold out or point out work done by children or articles belonging to the children and ask, or have a child ask another: "Whose _____ is this?" ANS: "That is Willoughby's _____." Have each child ask another for the name of a relative/friend/pet:

A: Do you have a brother/sister/cousin/uncle/friend/aunt/pet? Tell me his/her name.
B: My brother's name is _______. (Note: Do not use names ending in sounds to which /-əz/ should be added, since this is a target for the next lesson.)

A: And whose sweater is this?
B: That red one is Larna's.
Derek: I'll take mine now. Thank you for finding it.
Larna: I'll take mine also. I'm glad to find it. It's really my aunt's sweater.
C: I lost a brown sweater yesterday. Did you find it?
A: We found a blue and a red sweater. We didn't find a brown one.
C: That sweater isn't really mine. It's my brother's. He might scold me for losing his sweater.
Children (except C): Would you like us to help you look for your brother's sweater?
C: Yes, please. I must find it.

   A: I'm sorry. I don't have lots of oranges. I just have one.

5. For extra material use:

DIALOGUE:

Shelter From the Rain

People and animals need food and water to live and grow. But they need shelter also. They need some protection from different kinds of weather.

John: The weather isn't good today. That dark cloud's bringing lots of rain.
Michael: The rain's coming! It's coming now! Quick, we mustn't get wet.
John: Where can we go? We must find some shelter.
Michael: We're near James's house.
John: James! James! May we come in? We're cold.
James: Come in quickly! A lot of rain's coming in the door.
James's mother: Do you need some help with your wet things?
John: No, thank you. I don't need any help.
James's mother: Isn't Michael with you?
John: He was here a minute ago.
James: He's talking to a horse! He must be crazy! He's pulling the horse's tail! Oops, he just fell down.
John: Did the horse fall down?
James: No, silly. Michael fell down. Oh, he just picked himself up.

James's mother: He was trying to lead the horse to the shed. But the horse didn't need Michael's help. He went to his house by himself.

John: Is the shed the horse's house?
James's mother: Yes, a horse needs some protection from the weather just like us.

James: Michael, you ought to come in now and get warm.
James's mother: Michael, you can wear James's jacket.

Michael: I'm all right. I can wear the horse's blanket. We're pals now.

LESSON VIIIa - Grade 3

TARGETS: 1. Comparative-superlative suffixes: -er, -est
          2. Irregular comparative-superlative: better, best
          3. Mass noun: sound

        2. Give a lot of models using the comparative and superla-
           tive forms before asking the children to produce these
           forms independently.
        3. Have articles of different sizes. Have children compare
           them.
        4. Children can compare themselves with each other:
           "I'm taller than you are."
        5. Children are asked to use the superlative suffix to
           describe an object or person:
           "Joan has the cutest puppy. It's fluffy and white."
           CUES: "small dog/friendly girl/smart baby"
        6. Children ask each other why they like one animal better
           than another. Second child gives a reason why, using
           the comparative suffix:
           A: Why do you like a cat better than a dog?
           B: Because a cat is cuter.
        7. "A Boast Fest" - Tell each child that he's going to be
           allowed to brag. Let each child tell what skill he sur-
           passes another person in and he can even claim to be
           the best in that skill: "I'm a better runner than
           Daniel. I'm the best runner in Keaukaha."
        8. For more practice, the teacher might go back to the
           second grade set of lessons.
        9. For extra material use "Taking Off" by Mary McB.
           Green. Arbuthnot, May Hill, Time for Poetry.
           Chicago, Illinois: Scott, Foresman and Company,
           1952, p. 73.

DIALOGUE:

Transportation

The pioneers had to travel very slowly. They used covered
wagons, horses, and rafts. They didn't have trains or trucks. They
didn't have airplanes.
A: What is the fastest way to travel today?
B: By jet. Some jets can travel faster than sound.
A: Is going by jet the best way to travel?
B: It depends on people. For some people, traveling by boat is a
better way.

A: Going by ship is a slower way to travel. Some people like that better.
B: The slowest way to travel is to walk. A lot of pioneers did that.
A: We're lucky. We have better ways of traveling today.
B: To me, riding a jet is the best way to travel. You can get anywhere very quickly.

TARGETS:
1. Expletive: there
2. Prepositions: onto, up
3. Mass noun: work

NOTES:
1. Names of children may be substituted.
2. Since preposition "onto" is not used too frequently, practice will probably be limited to the exercises.
3. Teacher can ask questions to elicit "there" as an expletive:
   a. How many desks are there in this room?
   b. How much food is there in the supermarket?
   c. How many girls/boys are there in this class?
   d. What animals are there in our zoo?
4. Children can also play a guessing game and ask each other questions:
   A: Is there a toy in this room?
   B: Yes, there is. There's a doll.

DIALOGUE:

Simple Machines

There are many different kinds of machines. Machines helped to make the United States a rich country.

There are huge machines and there are very tiny machines.

There are simple machines. There are complicated machines. People aren't strong enough to do many things by themselves. So machines help people do many things.

Three men wouldn't be able to load an 800-pound piano onto a truck by themselves. They can push it up a ramp. This will make their work easier. A ramp is an example of a simple machine. There's another name for a ramp. It's an inclined plane.

Edna: Are there any examples of simple machines in this school?
Mike: Yes, there are. One example is a venetian blind. The venetian blind works on a pulley. And a pulley is a simple machine.

Erlene: That's right. We learned about pulleys. Many small pulleys together can raise something heavier and bigger than the pulleys themselves.

Mike: A pulley has a grooved wheel for a cord or a chain. The cord or chain moves in the groove.

Edna: Is there another example of a pulley here?
Erlene: Yes, there is. The flag pole has a pulley.
Edna: We're lucky to have machines to help us. They do much of our work for us. There are a lot of machines in our homes. We should think about them.

    - arithmetic work
    - spelling work
    
    B: Yes, it is.
    - No, it isn't. It's in my bag.
TARGETS: 1. Preposition: near
2. Reflexive pronoun: yourself
3. Strengthening the use of the expletive "there"

2. Teacher can place a number of objects on the table (ball, book, jacks, pencil, crayons, etc.) with a cover over them. She uncovers them for a few minutes to let the children see what's there and covers them again. Children guess and tell what there was on the table:
   A: There was a ball.
   B: There were some jacks. OR One child asks another child and second child answers:
   A: Jon, was there a ball?
   B: Yes, there was.
   (A picture can be used instead. Children try to remember what things were in the picture.)
3. Teacher can say to the child:
   "There's a park/beach/school/shopping center/sewer plant. You live close by it. What can you say to tell us that it's close by?"
   C: There's a park near my house. OR
   (Use the Playskool Village set. Have children tell about a location in the village in relation to another location:
   "The church is near the park.")
4. Teacher can ask each child: "Who lives/sits near you?" or "Who's near you now?"
   C: Darius lives near me.
5. Another more appropriate event may be substituted if the teacher wishes to do so. (Armed Forces Day, Kamehameha Day, etc.)

DIALOGUE:

The Merry Monarch Festival

There was a parade downtown one Saturday. It was the Merry Monarch Festival parade. There were many beautiful floats. There were lots of people watching the parade. It was a lovely day.

A: There was a parade last Saturday. I went to see it by myself.
B: Weren't you scared to go by yourself?
B: So do I. But I missed that parade. Our family went to Kona. Were there a lot of floats in the parade?
A: Yes, there were. There were marchers and people on horses. There was a band also.

B: What kind of parade was it?

A: It was in honor of the Merry Monarch.

B: And who was the Merry Monarch?

A: He was King Kalakaua.

B: There's a Kalakaua Park near the post office. Did people name the park after the same king?

A: Yes, they did. And every year there's a Merry Monarch Festival in Hilo. Oh, I forgot to tell you something else. There was a float for the king and queen of the Festival.

LESSON XIIa - Grade 3

TARGETS: 1. Tag questions  
2. Mass nouns: wool, hair  
3. Irregular plurals: sheep, clothes  
4. Irregular past: came

2. Teacher can translate into SE those sentences that children use in HID as tag questions. These are HID sentences usually ending in "huh?" or "yeh?"  
   HID: "You going, yeh?"  
   SE: "You're going, aren't you?"  
3. Children can ask tag questions about where someone lives, or what they like or dislike:  
   A: You live on Pua Avenue, don't you?  
   B: Yes, I do.  
4. Refer to the Pronunciation Section of the Manual for intonation patterns to use with tag questions.  
5. To elicit other tag questions, have the children:  
   a. Guess what someone is drawing on the chalkboard:  
      "It's a house, isn't it?"  
      Child drawing can reply:  
      "Yes, it is," or "No, it isn't."  
   b. Guess what thing or things are in the closet, desk, or box:  
      "There's a broom in the closet, isn't there?"  
      "There are pencils in the desk, aren't there?"  
      Others can look in the closet, desk, or box and reply:  
      "Yes, there is/are," or "No, there isn't/aren't."  
   c. Ask about the time indicated on clock set by teacher:  
      "It's 8 o'clock, isn't it?"  
   d. Ask about today's or yesterday's, etc., weather:  
      "It's sunny today, isn't it?"  
      "It was raining yesterday, wasn't it?"  
      To which others will reply:  
      "Yes, it is/was," or "No, it isn't/wasn't."  
6. Tag Questions: If the statement is affirmative, the attached question is negative; if the statement is negative, the attached question is affirmative. The person asking a question that begins with an affirmative statement usually expects the other person to agree with him. The person asking a question beginning with a negative statement expects a negative answer. However, the person responding may either agree or disagree.
7. Children tell each other what they know about sheep.
8. Each child can describe his own or someone else's hair: "My hair is long."
9. Teacher can ask a child: "Did you ever have a visitor? Tell me about someone who came to visit you or the school."
10. The dialogue and exercise 21 are marked with intonation patterns. The teacher should adhere to these patterns until the children are familiar with them. She may then vary the emphasis, but the intonations on the tag questions should not be varied.

DIALOGUE:

Wool

Do you have a wool sweater? Some of you may have other woolen clothes. Wool comes from sheep. Sheep grow wool the same way your dog or cat grows hair.* The sheep's wool is sheared in spring.* This doesn't hurt the sheep. They go right out to the pasture and start growing another coat of wool.

The wool from many sheep helps to make woolen clothes.

A: That's a new sweater, isn't it?
B: Yes, it is. It was a birthday present.
A: It feels so soft and cuddly. It keeps you warm, doesn't it?
B: Yes, it does. Would you believe it? This used to be on a sheep.
A: You don't mean the sweater, do you?
B: No, I don't. Silly. I'm really talking about the wool.
It came from a sheep.

A: You're right. The people at the mill clean and comb out the wool, don't they?

B: Yes, they do. They use big machines.

A: There are machines to do almost everything now, aren't there?

B: Yes, there are.

* Not introduced as a target yet but used here out of necessity.

EXERCISES:

1. The milkman comes to our house almost every day.
   T: ...yesterday

TARGETS:
1. Complex sentences
2. Mass nouns: sight, paper, smell, candy, taste, touch

NOTES:
1. Let children take parts.
2. Use pictures, objects, realia, and ask children what sense is being used. The children use the pattern from the dialogue:
   T: (... dog)
   C: When I pet a dog, I'm using my sense of touch.
      When I hear a dog barking, I'm using my sense of hearing.
3. Since the mass nouns "sight, smell, taste, touch" are not used very frequently, it isn't necessary to spend too much time trying to elicit them independently.
4. Have each child state:
   a. What he would do if he had a hundred dollars:
      "If I had a hundred dollars, I would . . ."
   b. What we should/must do or shouldn't/mustn't do if there's a fire:
      "If there's a fire, we should/must or shouldn't/mustn't . . ."
5. Have each child state what book, activity, etc., he enjoys/enjoyed best of all and the reason for his choice:
   "I enjoy going to the beach best of all because I like to swim."
6. For extra material use "Curious Something" by Winifred Welles. Arbuthnot, May Hill, Time for Poetry. Chicago: Scott, Foresman and Company, 1952, p. 120.

LESSON XIIIb - Grade 3

TARGETS: 1. Mass nouns: sleep, posture  
2. Strengthening the use of complex sentences  
3. Strengthening the use of the irregular past "told"

2. Ask each child to tell about what he does when he goes to the beach/goes camping, or what he'll do when he grows up. Ask him to use the clause beginning with "when".  
3. Each child can ask another child a serious or funny question beginning with: "Did you know that/where __________?"

4a. To elicit the complex sentence structure use of "because" ask children questions about the dialogue: Examples: 
"Why is good posture important?"
"Why is it that we can bend over and not break our backs?"
"Why should we exercise?"
"Why should we eat proper food?"

4b. Ask children to tell why they like or dislike certain things or certain holidays:
"I like Halloween because I like to go trick or treating."

5. The use of the mass nouns "sleep" and "posture" will be very limited. Practice can be limited to the exercises.

6. For extra material:
   a. "Hush Little Baby", collected by Jean Ritchie. From Music in Our Town, (c) 1956, 1962, Silver Burdett Company. (Children can be encouraged to make up their own words to the song.)

DIALOGUE:

Posture

"Sit up straight." "Don't slouch." How often do you hear these words? Do your parents often remind you about your posture? They do it because they want you to grow up tall and straight.

Good posture means standing and sitting up straight. Good posture makes you look and feel better.

A: Did you know that your backbone isn't one bone? Did you know that many small bones make up your backbone? These small bones join together to make up your backbone.

B: I didn't know that. Who told you that?

A: My teacher did.

B: Now I know why I can bend over and touch my toes. I can bend over because my backbone isn't one bone.

A: But I wonder what keeps our backbone straight?

B: I think that muscles do that. That's why we need strong muscles.

A: How do we develop strong muscles?

B: My father told me that exercises build strong muscles. To have strong muscles, we also need to eat proper food.

A: Is sleep important?

B: It's good for healthy bodies. It must be good for strong muscles.

A: You're right.

GLOSSARY OF TERMS

aspiration: Strictly speaking, the explosion of English voiceless plosives, /p/, /t/, and /k/ with a strong puff of air.

backward build-up: A technique for teaching utterances of more than six or seven segments. Breaking them from the end into small logical segments helps teachers and children maintain the appropriate intonation. Each segment is modeled by the teacher and repeated by the students. After the individual segments are learned, the entire utterance is repeated.

consonant cluster: A consonant cluster is a combination of two or more consonants which are pronounced in close succession. A cluster may occur at the beginning of words, in the middle, or at the end.

cue: A word, picture, or gesture that stimulates the desired response.

dialect: "A variety of a language, regional or social, set off (more or less sharply) from other varieties by (more or less clear) features of pronunciation, grammar or vocabulary." (Defined by Raven I. McDavid in "The Dialects of American English," The Structure of American English by W. Nelson Francis, Ronald Press, New York, 1958, p. 480.)

idiolect: "...the speech pattern of one individual at one particular time of his life." (Dialects - U.S.A., Jean Malmstrom and Annabel Ashley, N.C.T.E., Champaign, Illinois, 1963, p. 3.)

internalize: Learn to manipulate automatically.

intonation: The melody of a language produced by the rise and fall of the voice.

minimal pair: Two words that sound alike except for one phonemic (sound) difference; e.g., bag/back; sheep/ship; bit/pit.

model: A basic utterance or pattern spoken by the teacher or a native speaker either live or on tape which the children imitate.
native speaker: A person born in the language community or one who has learned the language (including its gestures) so thoroughly that he could be mistaken for a native.

pattern practice: A drill or exercise designed to give learners intensive repetition of a language item. The practice may consist of repetition of a model, or it may involve substitution, additions, deletions, or combinations of words in the model or pattern being learned.

phoneme: The smallest unit of sound which distinguishes one word from another, that is, which makes a difference in meaning between two words; /p/ and /b/ are phonemes because they make a meaning difference in words like pit/bit or pat/bat. (Allophone: One of the variant sounds of a phoneme. For example, the different "p" sounds in "pill," "spill," "cup" are all variants, or allophones, of the phoneme /p/.)

repertoire: Fund of responses that are automatically available for use at will.

rhythm: The regular repetition in speech of stressed syllables or words.

segment: A syllable of a word, or a meaningful group of words in an utterance; e.g., mean/ing/ful; box/es; I went/ to the store.

stress: The prominence of syllables in speech. In English, we distinguish word stress, phrase stress, and sentence stress. The stressed syllable in English is a little longer and louder than others.

structure: 1) The recurring patterns of the language as they occur in forms of words and in arrangements of words in utterances. 2) The grammar of the language.

voiced sound: A sound made with the vocal cords vibrating as in all vowels and certain consonants such as /b/, /d/. The vibration of the /z/ can be felt by putting a finger on the Adam's apple.

voiceless sound: A sound made while the vocal cords are not vibrating; e.g., /p/, /t/.
