Terminal resident training available. A division of Career Academy, Inc.

ADVANTAGES OF HOME STUDY

Home study is especially suited for busy people who wish to increase their knowledge and skills.

With home study, you do not have to give up your job, leave home, or lose income. You learn as you earn. The school comes to you. You receive individual attention and work at your own pace.

Older adults do not have to compete with youngsters fresh from school. They can get into the swing of learning again at their own rate. Retired couples may learn new vocations or hobbies.

With home study, you can study subjects you cannot find locally. You can study practically anything: business courses; skilled trades; preparation for professional licenses; profitable hobbies and academic subjects.

Many courses provide complete vocational training. Others prepare you for upgrading in your present job, without losing experience or seniority.

Emphasis is on learning what you need to know. Instructional materials from accredited schools are up-to-date, clearly written and easy to understand.

SUPERVISED HOME STUDY

High school students in 32 states are enrolled in supervised home study courses. School Superintendents, Principals, and Guidance Directors are finding that supervised home study offers many opportunities for curriculum enrichment.

Supervised home study has become an important training tool for business and industry.

Many Adult Education Directors are finding that supervised home study allows them to increase their course offerings.

Courses now offered in supervised programs include vocational subjects, high school courses, and college-level courses for advanced students.

Supervised home study is not a cure-all for the training and education problems facing educators and company training directors. It does provide a low-cost method of adding courses, which could not otherwise be provided, to educational programs.

The establishment of a supervised home study program is not a difficult task, but it does require specialized knowledge. Several of the schools listed in this Directory have personnel trained in helping educators set up those programs. They will be pleased to answer your questions and render any assistance you desire.

HOME STUDY FOR INDUSTRY TRAINING

More than 10,000 companies are helping their employees develop themselves through training offered by accredited home study schools.

Most companies will reimburse all or part of an employee's home study tuition. Others are using supervised home study for employee training.

The National Home Study Council will be pleased to provide a free booklet, Accredited Home Study Courses for Industry Training, to companies that are interested in setting up a tuition refund program.

For further information about home study courses, write to:
