In an effort to discover the number of migrant children that leave the migrant stream and enter the urban area of Rochester, New York, the State University College at Geneseo, New York, sponsored this 1968-69 study. The purpose was to determine if the migrant child is adequately cared for when he enters the urban area and if the educational institutions adequately provide for him. It was believed that the study would also give a picture of the approximate number of migrant children entering other urban areas of New York State. Interviews were conducted among approximately 433 migrant families. Teachers of the migrant children were also interviewed, and contacts were made with local agencies that provided aid to families. General findings are reported in terms of demographic data, and the migrant child's school grades (reading and mathematics), behavior, and attendance. Special projects (Federal, state, foundation, and experimental) available to the migrant are described in the document, and 10 conclusions are cited. (EL)
OPERATION:
MIGRANT FOLLOW-UP

NEW YORK STATE CENTER
FOR MIGRANT STUDIES

STATE UNIVERSITY COLLEGE
GENESEO, NEW YORK

Thomas M. Hamlin
[1969]
I. DEFINITION OF A MIGRANT

For the purpose of this study, a migrant child is:

"A migratory child of a migratory agricultural worker is a child who has moved with his family from one school district to another during the past year in order that a parent or other members of his immediate family might secure employment in agriculture or in related food processing activities."

Public Law 90-247 amended the definition by adding "...with the concurrence of his parents, a migratory child of a migratory agricultural worker shall be deemed to continue to be such a child for a period, not in excess of five years, during which he resides in the area served by the agency carrying on a program or project under Title I, as amended by Public Law 89-750."
II. STATEMENT OF NEED

To discover if the migrant child is adequately cared for when he leaves the migrant stream and enters our urban areas. Does our educational institution adequately provide for these youngsters? Does our urban community meet the needs of this youngster and his family? This study will attempt to answer these questions.
III. DESCRIPTION OF PROPOSED STUDY

A. To discover the number of migrant children that leave the migrant stream and enter the urban area of Rochester, New York, for the school year, 1968-1969. (This may give us a picture of the approximate number that are entering other urban areas of New York State.)

B. To follow these children throughout the school year to discover how they fit into urban life
   1. School grades (reading and mathematics)
   2. Behavior
   3. Attendance
   4. Contacts with agencies (welfare, Family Courts, etc.)

C. To discover how many Title and OEO Programs they automatically come under as they become a part of the inner city.
IV. PROCEDURE

Step 1. Screened approximately 8000 new entrant forms
   A. Check the last place of residence to see if it might be a migrant pocket
   B. Check parent's occupation (only 2 families indicated on this form that the occupation was fruit or harvest picker).

Step 2. Interviewed approximately 433 families that were possible migrants. (This was the most difficult step because most interviews had to be conducted in the evenings or week ends because parents worked; also most families were reluctant to admit they had been in the migrant stream.)

Step 3. Discovered the schools in which the migrant children were enrolled. (This step was also difficult due to the fact that the majority of the migrant families that remained moved at least once, and, in several cases, moved several times during the school year.)
IV. PROCEDURE

Step 4. Interviewed the individual teachers of these children as to grades, behavior, and attendance.

Step 5. Contacted local agencies to determine if any of these families were active with them. This was difficult because agencies keep all information confidential to protect their clients. I was able to find the number on welfare because during the interviews the people were asked this question and answered quite willingly.

Step 6. Searched all special projects (Title I, OEO, etc.) to determine which ones were available to these new entrants from the migrant stream.
V. FINDINGS

A. 443 probable migrant families were interviewed

B. 195 school-age migrant children were discovered living in Rochester, New York, and attending public school for the school year 1968-1969.

C. 73 school-age migrant children moved back down South before the first semester ended. The two major reasons for returning South were: (1) housing, (2) Rochester winter weather (not necessarily in that particular order).

D. 122 school-age migrant children remained in Rochester, New York, for the entire school year.

E. The above 195 school-age migrant children came from 9 States and 57 localities within those 9 States. The largest contributer was the State of Florida with 19 communities represented. The State of Georgia was second with 14 communities represented. These States and the communities within the States are listed on the following page.
| Florida     | DeLand      | Lakeland     |
|            | Orlando     | Ocala        |
|            | Bradenton   | St. Petersburg|
|            | Green Cover Springs | Chattahoochee |
|            | Perry       | Inverness    |
|            | Monticello  |             |
|            | Taft        |             |

| Georgia     | Augusta     | Fitzgerald   |
|            | Montezuma   | Sole City    |
|            | Calvary     | Lumpkin      |
|            | Dawson      | Pochelle     |
|            |             | Damascus     |

| Alabama     | Anniston    | Union Springs|
|            | Eutaw       | Abbeyville   |
|            |             | Camden       |

| South Carolina | Williamsburg | Kingstree |
|                | Orangeburg   | Lancaster  |

| Mississippi   | Coahoma      | McComb     |
|               | Tippo        |            |

| North Carolina | Rocky Mountain | Wilmington |

| Virginia      | Accomac      |             |

| Arkansas      | West Memphis |             |

| Louisiana     | (?)          |             |
V. FINDINGS

F. School Grades - September 1968

1. Reading:
   a. 59.4% entered the City School System of Rochester below grade level.
   b. 37.8% entered on grade level.
   c. 2.8% entered above grade level.

2. Mathematics
   a. 62.1% entered the City School System of Rochester below grade level.
   b. 35.1% entered on grade level.
   c. 2.8% entered above grade level.

In the case of kindergarten above, the New York State Readiness Tests were used.

G. School Grades - June 1969

1. Reading
   a. 20.3% showed marked improvement (1 year or better).
   b. 59.4% showed some improvement (under 1 year).
   c. 20.3% showed no improvement.

2. Mathematics
   a. 18.9% showed marked improvement (1 year or better).
   b. 56.7% showed some improvement (under 1 year)
   c. 24.4% showed no improvement.
H. Behavior
   a. 94.6% of the children were reported by their teachers to have excellent behavior.
   b. 5.4% of the children were reported by their teachers to have poor behavior.

I. Attendance
   a. 81.1% of the children were reported by their teachers to have excellent attendance.
   b. 13.5% of the children were reported by their teachers to have fair attendance.
   c. 5.4% of the Children were reported by their teachers to have poor attendance.

J. Contacts with local agencies
   a. Welfare - approximately 30% of the children were in families that had applied or were in the process of applying for welfare. This information was gathered when the families were interviewed. All the above families in this category were separated from the father for one reason or another. It should be noted here that the remaining 70% of the children had a father in the home who worked a steady job, usually construction:
b. **Family Court** - None of the families included in this study were involved with Family Court up to the time of this writing.

c. **Police (Juvenile)** - None of the children included in this study were accused or arrested for a juvenile crime up to the time of this writing.

K. Special Projects - Federal, State, Foundation, Experimental

The Special Projects on the following pages were available during the school year 1968-1969 to the Migrant children included in this study.
ART ACTION
A center in each of six inner-city public elementary schools and one parochial school provides opportunities for elementary school students to create in the area of sculpture and constructions. A variety of three-dimensional materials and appropriate tools are used to develop creative expression, help children who have difficulty expressing themselves verbally, and reduce emotional tensions in these children.

Schools: 2, 5, 6, 9, 14, 27, and the School of Holy Childhood

Mr. Burt Towne
Telephone: 232-4860

CLASSES FOR EMOTIONALLY DISTURBED CHILDREN
Four classes, each with ten children, have been formed to educate children whose emotional problems make it impossible for them to function in a regular classroom.

School Number 5, 555 Plymouth Avenue North

Mr. Robert Lays
Telephone: 647-1221

Mr. Calvin Lauder
Telephone: 454-5360

INSTRUCTIONAL MATERIALS
Fully equipped and staffed libraries are provided in nine inner-city elementary schools. A variety of instructional materials such as books, filmstrips, records, and the like are used to stimulate interest in reading as well as in independent study.

Schools: 5, 6, 9, 14, 27, 29, 30, 36, 39

Mrs. Betty Graff
Telephone: 544-3030
**ELEMENTARY**  
**SCHOOL**  
Full-time counselors have been provided in four elementary schools to work with teachers, parents, and children to develop within youngsters a clearer awareness of who they are, and the opportunities available to them in the world of work. Specific efforts are made with underachievers who, because of limited cultural background and other factors, currently are not making maximum use of their potential. Emphasis is on relating school activities to work and to the training required for future careers.

**Schools:** 3, 6, 14, 27

*Mr. John T. McGurie  
Telephone: 454-5360*

---

**ENGLISH AS A SECOND LANGUAGE**  
Trained instructors teach English to those pupils who are not able to read, write, or speak the language well enough to function in English-speaking classes. Instruction is in small groups.

**Schools:** 9, 14, 20, 27, 5, 17, 8, Franklin, Monroe, St. Bridget's, Mt. Carmel, St. Francis Xavier, St. Michael's

*Mrs. Eleanor Burgess  
Telephone: 454-5360*

---

**FAMILY NURSERY SCHOOL**  
The Family Nursery School consists of 18 groups of 15 three and four year olds, each of which meets half-a-day five days a week. Parents are encouraged to participate as teacher aides or as part of a Father Corps.

**Office:** No. 26 School, 135 Bernard Street

*Mr. Paul Moore  
Dr. Joseph Wagner  
Telephone: 544-7480  
Telephone: 544-7520*
IMPROVING BASIC READING SKILLS
This program is designed to help children learn to read better and to help teachers learn to teach reading more effectively through inservice training. It is in operation in eleven parochial and nine public inner-city schools.

Schools: 4, 9, 14, 19, 20, 27, 29, 15, 17, Corpus Christi, Holy Redeemer, Immaculate Conception, Mt. Carmel, St. Boniface, St. Bridget's, St. Francis Xavier, St. Lucy's, St. Michael's, St. Peter & Paul and St. Theresa.

Mrs. Olga Vauhn
Telephone: 325-7760

INCREASED PROVISION FOR FIELD TRIPS
Many inner-city children know little about the world outside their immediate neighborhood. The Field Trip program is planned to introduce these children to different modes of life, different ways to make a living, and to bring to them live drama and music.

Schools: 3, 4, 6, 9, 14, 19, 2, 20, 27, 5, 15, 17, 13, Madison, Franklin, West, Corpus Christi, Holy Redeemer, Immaculate Conception, Mt. Carmel, St. Boniface, St. Bridget's, St. Francis Xavier, St. Lucy's, St. Michael's, St. Theresa and St. Peter & Paul.

Mr. Harvey Granite
Telephone: 325-7510

IMPROVING EDUCATION OF HIGH SCHOOL UNDER-ACHIEVERS
By reducing the class load of eight teachers of low achieving seventh, eighth, and ninth grade students at Franklin High School, adding special materials, and giving the part-time assistance of an expert teacher-coordinator, more time will be available for team-planning, materials preparation, and individualized help for students. A teacher aide from the community helps in parent and agency support for the program.

STRENGTHENING This project is intended to improve INSTRUCTION writing, reading, and general school IN COMPOSITION performance for disadvantaged students of Madison High School by strengthening their instruction in composition. Four classroom teachers have been added to the English department, thus reducing the class load of all English teachers. A variety of supplementary reading material has also been provided. A coordinating teacher aids this program as well as other disadvantaged secondary school students.

TITLE III, ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

WORLD OF The World of Inquiry School is designed INQUIRY to involve all of the resources of the SCHOOL entire metropolitan community in planning and implementing an innovative, exemplary, integrated school. The School has a multi-facial, multi-age, non-graded student body. In providing for continuous progress for each student and in offering frequent opportunities for dynamic interaction, it is anticipated that racial attitudes and self-image will be improved. Incorporated into this project is a plan for demonstrating and disseminating the exemplary aspects of this program to area schools and teachers.

Mr. William Pugh
Program Administrator
Telephone: 436-9370
The Downtown Satellite School is housed on the fourth floor of Sibley's in the heart of the business area of the city. It functions as an adjunct of the World of Inquiry Interim School. Both schools will utilize identical agencies and community resources and will employ similar teaching methods. The Downtown Satellite School will provide contact and experience with the world of business and commerce. The public, too, will be given the opportunity to see quality integrated education in action.

172 Genesee Street

Mr. Albert Mellican, Administrator
Telephone: 436-1500

Project SPAN provides fourteen School Parent Advisers for the Neighborhood in economically distressed areas of Rochester. The major purpose of these School Parent Advisers is to open lines of communication between the school and home and to enlist the help of the community on behalf of children who live in these neighborhoods. The Parents Advisers give advice and encouragement to parents, increase community involvement in urban problems, and assist teachers in gaining insights into urban educational problems.

172 Genesee Street

Mr. Bobby Saucer, Administration
Telephone: 436-1500

In order to offer financial assistance to needy students in the Rochester area this project will gather, compile and keep all current information regarding available funds for scholarship purposes. The Fund Administrator will work closely with the Rochester City School District, the Center for Cooperative Action and various business, industrial, cultural and social organizations to realize the potential which exists in the economically distressed areas of the city.

172 Genesee Street

Mr. Paul Pierce, Fund Administrator
Telephone: 436-1500
COMMUNITY

The Community Teachers program is designed to develop a positive relationship between home and school. Parents, child and teacher are involved in learning experiences in the home throughout the school year. It provides some instruction for the suspended youngster. The exempt child has experiences in group learning. Headstarters have a continuation of their summer program; and preschoolers engage in specific play-learning patterns required to participate successfully in school. The families who will participate in the program will be those recommended by the schools, settlement houses, social agencies and the School-Parent Adviser for the Neighborhood.

172 Genesee Street

URBAN-SUBURBAN TRANSFER PLAN

The overall objective for the Urban-Suburban Transfer Plan is to implement and administer programs designed to reduce racial isolation within and outside the City School District of Rochester. Three suburban school districts and one college campus school participated in this program during the 1967-68 school year. Ten districts and two colleges have been involved during the 1968 summer session.

P.P.S. Division, City School District
Mr. John T. McGuire, Guidance Director
Telephone: 454-5360
VI. CONCLUSIONS

A. The majority of migrant children leaving the migrant stream are below grade level in the areas of reading and mathematics.

B. The majority of migrant children enrolled in the City School District of Rochester, New York, showed improvement in the areas of reading and mathematics the first year enrolled.

C. Educationally, the migrant child fairs quite well his first year in an urban setting. The reasons for this are: (1) even though the migrant child is a minority within a minority, he is a part of the majority in an inner-city setting, (2) the migrant child is exposed to many special projects and innovations in teaching that are not found in smaller areas.

D. There is a strong carry-over in respect for adults and authority during the migrant child's first year in an urban setting. This is pointed out by their excellent behavior in school and the absence of any juvenile crimes committed.
VI. CONCLUSIONS

E. The excellent school attendance records of the migrant children shows tremendous concern on the part of the parents for their children to get an education.

F. This study points out the fact that migrants are a hard-working group of people. Only those families where there were no fathers applied for welfare.

G. The term "migrant" is frowned upon by migrants.

H. Most migrants will not admit they have been in the migrant stream. This is due to the fact that many of them are taken advantage of when they move into an urban setting. (The "city slicker" selling the "country cousin" the Brooklyn Bridge.)

I. The migrant family does not fair well with housing when they enter the urban community. Because housing is a tremendous problem to begin with in urban areas, the migrant must take what is left. Quite often this housing is as bad as what they had while in the migrant stream. This housing problem was one of the main reasons for so many of the migrant families returning South.
VI. CONCLUSIONS

J. There are more migrant families leaving the migrant stream and entering urban areas than people realize. I discovered 195 migrant children this year. I know that at least 100 more migrant children entered as well, but, because the parents would not admit to ever having been in the migrant stream, I could not honestly include them in this report.
