Comprised of 191 items, this bibliography on the disadvantaged children in Canada is principally concerned with younger children. It is recommended that this bibliography should be used in conjunction with an earlier one of the series, Number 2, "School Dropouts." The compilation covers the period of the decade of the sixties, and is arranged alphabetically by author in three categories: books and papers, articles and excerpts from books, and theses and unpublished material. Citations encompass items in "Canadian Education Index," "Canadiana," "Cumulative Book Index," "Education Studies in Canadian Universities," "Directory of Education Studies in Canada," and holdings of books, pamphlets, conference papers and bibliographies in the Canadian Teachers' Federation (CTF) Library. Material available in the CTF Library are denoted by an asterisk in the bibliography. (RJ)
