To upgrade research and research utilization competence of vocational educators, The Center for Vocational and Technical Education and The American Vocational Association planned four 1-week research training programs on: (1) Planning Vocational/Technical Education Programs Based on Manpower Research, (2) Patterns of Career Development as Applied to Vocational/Technical Education, (3) Evaluation of Vocational/Technical Education Program Effectiveness, and (4) Student Characteristics: A Determinant for Program Planning and Development. Summaries of evaluations of participants and staff are included in this report. Based on feedback from the participants, it is recommended that more research training seminars be held. A related document is available as ED 020 416. (JS)

SUMMARY

The Center for Vocational and Technical Education, in cooperation with the Research Committee of the American Vocational Association, formulated long-range objectives for research training programs. Based upon these objectives, the principal purpose of the 1968 Seminar for Research Training in Vocational Education was to upgrade the research and research utilization competencies of participants employed in or preparing for employment in vocational education positions.

Four one-week training programs were held at selected host universities.

The major content topics covered during each of the seminar programs were as follows:

Program A - Planning Vocational-Technical Education Programs based upon Manpower Research

(a) Scope and function of research in the study of manpower needs.
(b) Assessing manpower requirements by industry and occupation.
(c) Utilizing existing labor market information in local program planning.
(d) Collecting manpower data.
(e) Working with government and community organizations in collecting and utilizing labor market data.

Program B - Patterns of Career Development as Applied to Vocational-Technical Education

(a) Current theories of career development.
(b) Identification of student job images and expectations, and the determination of their relationships to employer's and
vocational educator's job images and expectations.

(c) Predictor variables: success, achievement, tenacity.

(d) Overview of current practices in investigating self concepts of students.

(e) Research and statistics applicable to the identification of the limitations, if any, vocational education imposes upon students future educational and vocational development.

(f) Research and statistics applicable to identifying and employing career development information in the improvement of vocational and technical education.

(g) Articulation of program offerings.

(h) Placement and work adjustment patterns.

Program C - Evaluation of Vocational-Technical Education Program

Effectiveness

(a) Nature and scope of evaluation.

(b) Research and statistics appropriate to evaluation procedures and to the analysis of data.

(c) Types of evaluation in terms of procedures, designs and the outcomes which are evaluated.

(d) Criteria for instrument selection and development.

Program D - Student Characteristics: A Determinant for Program Planning and Development

(a) Student assessment in program planning and development.

(b) Presently used tools and techniques for student assessment.

(c) Research and statistics appropriate to assessment of student aptitude, interests, personality, etc.

(d) Criteria for selection or development of instruments and
procedures necessary for student assessment.

(e) Incorporating student information into program plans and curriculum development.

(f) Research and statistics applicable to measuring the effects of peer groups and other socio-cultural and economic influences on instruction and instructional outcomes.

The individual program objectives were:

(a) "Planning Vocational-Technical Education Programs based upon Manpower Research" program provided group experience in developing a conceptual framework for planning vocational-technical education programs based upon manpower research. Knowledge and skill objectives included: implications of manpower information for vocational-technical program planning; recognition of the difference between the objectives and content of vocational-technical education programs based on manpower data and those programs based on other criteria; increased competence in the use of appropriate research designs and techniques; and, the ability to identify and evaluate resources to facilitate manpower program planning at the local level.

(b) "Patterns of Career Development as Applied to Vocational-Technical Education: provided group experience in developing a conceptual framework for program planning and articulation based upon career development research. Knowledge and skill objectives included: understanding of the process and problems of incorporating career development information into vocational-technical education; increased competence in the use of research methods which can be used for program development based upon realistic career
patterns of students; and, knowledge of selected methods and tools useful in understanding student self concepts and occupational choice making processes.

(c) "Evaluation of Vocational-Technical Education Program Effectiveness" program provided experience in making use of research methodology and results which can be used in evaluation of vocational-technical education programs. Knowledge objectives included: understanding of the objectives and scope of vocational education evaluation; and, acquaintance with selected research designs, methodologies and tools useful in program evaluation.

(d) "Student Characteristics: A Determinant for Program Planning and Development" program provided group experience in developing a conceptual framework or model for program planning and development based upon student characteristics. Knowledge and skill objectives included: recognition of the influence of student characteristics upon vocational-technical education offerings and outcomes; acquaintance with selected designs, methodologies and tools; and, increased competence in the use of research and results which are helpful in determining student characteristics and needs.

Candidates for the training program who were employed in or were preparing for positions in vocational education were given preference. A concerted effort was made to assign the selected participants to the program listed as their first choice, and to balance the programs between researchers and practitioners. The utilization of this procedure facilitated the adaptation of instructional content to participants' needs. Each of the seminar programs was supervised.
and conducted by a director and an associate director from the host university. The instructional staffs consisted of outstanding national leaders and consultants in vocational education and research with particular expertise in their specific research training area. The lecture, group discussion, and use of the practical problem served as the primary instructional vehicles. Staff meetings were held periodically throughout each of the seminar programs to provide feedback to the program coordinators; participant needs served as the basis for determining any program adjustments.

Program evaluations indicated participant satisfaction with seminar objectives and outcomes. Participants rated the information and materials presented as useable and appropriate to their needs.

Based upon indicated participant benefits and the expressed participant desire for additional training programs, it is recommended that further appropriate research training activities be conducted.
INTRODUCTION

Background of the Vocational Education Research Seminars

In 1961, The Research Committee of the American Vocational Association established as a top priority activity the initiation of an in-service training program for the development of research competencies of persons who were interested in or were engaged in the conduct and/or administration of research in vocational education. It was recognized that researchers in vocational education needed administrative support and adequate funds available to conduct research projects. The Research Committee chose as its major objective to develop within administrators, supervisors, teacher-educators and potential researchers (1) a positive acceptance of research results, and (2) the desire and ability to engage in research activities.

The success of a one week vocational education research seminar on research design, planned and conducted in cooperation with personnel in the U.S. Office of Education and Purdue University for the purpose of achieving these objectives, indicated a definite need for continuing the effort. An identification and description of the efforts which have been most effectively carried out to date follows:

1963

<table>
<thead>
<tr>
<th>Location:</th>
<th>Purdue University</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program:</td>
<td>&quot;Research Design Techniques&quot;</td>
</tr>
<tr>
<td>Purpose:</td>
<td>To achieve the objectives stated by the Research Committee in 1961.</td>
</tr>
<tr>
<td>Participants:</td>
<td>The Research Committee selected vocational educator from each branch of vocational education, representing every region of the United States.</td>
</tr>
</tbody>
</table>
The seminar tended to develop a favorable climate toward research and participants indicated a definite need for continuing the effort. All those persons invited did attend, with travel and subsistence expenses paid by the participants or by their states.

1961

Location: Pennsylvania State University
Program: "Research Design Techniques"
Purpose: To achieve the objectives stated by the Research Committee in 1961.
Participants: The selection was by the same method as that used the previous year.

Location: University of Illinois
Program: "Identification of Research Resources"
Purpose: To emphasize the contribution of the social sciences to vocational education research.
Participants: The participants of the 1963 research design seminar were the invited participants of this seminar.

Location: Ohio State University
Program: "Role of Administration in Research"
Purpose: To generate more interest, and to increase involvement on the part of state vocational education directors and of the various university department heads.
Participants: Administrators of vocational education research selected by the Research Committee.

The three seminars increased the participants' enthusiasm for research in addition to developing and increasing their research knowledge and skill. That a favorable climate toward research had in fact been effected by the 1963 research design seminar is shown by these same participants' enthusiasm to return for a second seminar, "Identification of Research Resources". All of the 1964 participants were selected by the Research Committee and were invited by the host university. The United State Office of Education provided some financial support for the seminars, but participants' travel and subsistence expenses were paid by the participants or by their states.
1965

Location: University of Nebraska
Program: "Interdisciplinary Resources for Research"
Purpose: To analyze the role of the social sciences in vocational education research.
Participants: The participants of the 1964 research design seminar were the invited participants of this seminar.

Location: Michigan State University
Program: "Proposal Evaluation" and "Research Methodology"
Purpose: The evaluation of proposals, research methodology, and the contribution of psychology, sociology and economics to research in vocational education.
Participants: Most of the previous participants from the 1963 Purdue seminar and the 1964 University of Illinois seminar were in attendance.

One major contribution to these seminars was the financial support from P.L. 88-210, Section 4(c). These funds made it possible to obtain more and better consultants for the seminars and to reimburse participants for travel, meals and room. The availability of money for research in vocational education created a significant increase in interest and involvement in research. This interest is reflected in the fact that six research seminars were conducted during the following year.

1966

Location: Colorado State University
Program: "Tests and Measurements"

Location: Cornell University
Program: "Research Design Techniques"

Location: North Carolina State University
Program: "Research In Occupational Mobility and Migration"

Location: Ohio State University
Program: "Operation and Management of Research Coordination Units"

Location: University of Georgia
Program: "Designing Curriculum Development Research Projects"
Overall Purpose: To develop further the research knowledge, competencies and interests engaged in, or soon to become engaged in, research in the field of vocational education.

Participants: Applications were taken on a nation-wide basis and a selection committee composed of the Research Committee and a staff from the United States Office of Education selected participants for each of the seminars on the basis of individual indicated preferences.

Evaluation of the seminars indicated successful accomplishment of the purposes set forth for the seminars. The development of the seminar programs around problem areas provided an effective means of accomplishing the objectives. As a result, it was concluded that seminar programs should be based upon topics or problem areas in vocational education as well as research methodology and statistics. Individual needs of vocational educators could best be met in this manner.

Evaluation of the vocational education research seminars conducted in 1963, 1964, 1965, and 1966, indicated that their purposes had been met. The seminar participants were enthusiastic about the programs and in fact became more active in research project in their various institutions and agencies.

There still remained, however, a serious shortage of qualified and available researchers, and vocational educators recognized the need to increase their knowledge of and competence in research. States had difficulty filling available Research Coordinating Unit positions with persons meeting the minimum desired qualifications. Institutions
of higher learning throughout the nation were experiencing similar staffing problems. The necessity of continued in-service assistance in developing and expanding research competencies of vocational educators became increasingly apparent.
Purpose of Seminars

The long-range objectives of the research training programs were established in a cooperative effort between the American Vocational Association and The Center for Vocational and Technical Education. These have become the major objectives of these research training programs and are:

- to further the efforts for developing the research knowledge and competencies of individuals now engaged in or soon to become engaged in research activities in the field of vocational education

- to develop and strengthen research training staffs

- to encourage and stimulate the efforts of institutions striving for greater excellence in education research training

- to increase the number of persons qualified to do vocational education research

- to provide means of in-service training that will enhance the research competencies of vocational education staff members across the nation without foregoing their services to educational agencies for long periods

- to stimulate research activity in priority vocational education problem areas

The principal purpose of these programs was to upgrade the research and research utilization competencies of participants who are employed or preparing for employment in vocational education positions. To accomplish these purposes, four problem-centered areas were selected:

1. Planning Vocational Education Programs Based upon Manpower Research
2. Patterns of Career Development as Applied to Vocational Education
3. Evaluation of Vocational Technical Education Program Effectiveness
4. Student Characteristics: A Determinant for Program Planning and Development.
Development of Seminar Project for 1968

Four training programs were planned in a cooperative effort between the American Vocational Association and The Center for Vocational and Technical Education, and a proposal was submitted by The Center for Vocational-Technical Education. The proposal outlined a special training project for the coordination and conduct of four, one-week research training programs with the focus of each on vocational education. Four host universities were selected in terms of their physical, education and research facilities, as well as their staff competencies.

All programs were organized with the same basic format. The programs were five days in duration, beginning Sunday evening and concluding Friday noon. The individual programs were supervised and conducted by a director and an associate director from the host institution.

The individual program development in terms of administrative staff, location, dates, specific objectives and major content topics follows:

Program A

**PLANNING VOCATIONAL-TECHNICAL EDUCATION PROGRAMS BASED UPON MANPOWER RESEARCH**
Pennsylvania State University
University Park, Pennsylvania
October 26-31, 1969

**Director:** Dr. Jacob J. Kaufman
Professor of Economics
Director, Institute for Research in Human Resources
Pennsylvania State University
University Park, Pennsylvania
Participant Objectives

. Recognition of the difference between the objectives and content of vocational-technical education programs based on manpower data and those programs based on other criteria.
. Understanding of the influence and implications of national, state, and local manpower information in determining needs for specific vocational-technical programs.
. Increased competence in the use of research designs, tools, and techniques which will be useful in studying manpower needs.
. Ability to identify and evaluate selected resources available to local program planners which can facilitate vocational education program planning based upon manpower data.
. Group experience in developing a conceptual framework or model for planning vocational-technical education programs based upon manpower research.

Major Content Topics

The scope and function of research in the study of manpower needs. Assessing manpower requirements by industry and occupation: Projecting historical trends, effects of national and state influences, estimating the effects of changing employment. Utilizing existing labor market information in local program planning: sources, types and forms of data, validity and usability of data.

Collecting manpower data:
   a. development of instruments for collecting data for use in educational planning.
   b. criteria for selecting among available instruments and procedures in manpower research (prediction, occupational statistics, occupational data requirements for educational planning, etc.).
   c. research methodologies and statistics appropriate to the collection and analysis of labor market information (employment forecast surveys, measurement and interpretation of job vacancies, etc.).
   d. utilizing the results of occupational and testing research programs, data on placement, counseling and other present manpower services.

Working with government and community organizations in collecting and utilizing labor market data.
Program B  PATTERNS OF CAREER DEVELOPMENT AS APPLIED TO VOCATION TECHNICAL EDUCATION
University of Missouri
Columbia, Missouri
August 3-8, 1969

Director: Dr. Norman C. Gysbers
Associate Professor of Education
University of Missouri
Columbia, Missouri

Associate Director: Wilbur R. Miller, Chairman
Department of Practical Arts and Vocational-Technical Education
University of Missouri
Columbia, Missouri

Participant Objectives

. Understanding of the objectives, content, and outcomes of vocational-technical education which takes into account career patterns of students.
. Familiarity with the interrelation of research and the process and problems of incorporating career development information into vocational-technical education.
. Increased competence in use of research methods and results which can be used for program development based upon realistic career patterns of students.
. Acquaintance with selected designs, methodologies and tools which are considered useful in understanding student self concepts, reality testing, occupational images, and choice making processes.
. Group experience in developing a conceptual framework or model for program planning and articulation based upon career development research.

Major Content Topics

Current theories of career development.

Identification of student job images and expectations, and the determination of their relationships to employer's and vocational educator's job images and expectations.

Predictor variables: success, achievement, tenacity.

Overview of current practices in investigating self concepts of students, their reality testing, career patterns, choice-making and vocational development.

Research and statistics applicable to the identification of the limitations, if any, vocational education imposes upon student's future educational and vocational development.
Research and statistics applicable to identifying and employing career development information in the improvement of vocational and technical education.

Articulation of program offerings.

Placement and work adjustment patterns.

Program C  EVALUATION OF VOCATIONAL-TECHNICAL EDUCATION PROGRAM EFFECTIVENESS
University of California
Los Angeles, California
August 17-22, 1969

Director:  Dr. Melvin L. Barlow
Professor of Education
Director, Division of Vocational Education
University of California
Los Angeles, California

Associate Director:  Dr. Bruce A. Reinhart
Associate Professor of Education
Division of Vocational Education
University of California
Los Angeles, California

Participant Objectives

- Understanding of the objectives and scope of vocational education evaluation.
- Knowledge of the interrelation of research and evaluation.
- Acquaintance with selected research designs, methodologies and tools which are considered useful in developing systems for evaluating the effectiveness of vocational-technical education programs.
- Experiences in making use of research methodology and results which can be used in evaluation of vocational-technical education programs.

Major Content Topics

Nature and scope of evaluation.

Research and statistics appropriate to evaluation procedures and to the analysis of data.

Types of evaluation in terms of procedures, designs and the outcome which are evaluated (follow-up, etc.)

Criteria for instrument selection and development
Program D

STUDENT CHARACTERISTICS: A DETERMINANT FOR PROGRAM PLANNING AND DEVELOPMENT
University of Minnesota
Minneapolis, Minnesota
October 6-10, 1969

Director: Dr. Howard F. Nelson, Chairman
Department of Trade and Industrial Education
University of Minnesota
Minneapolis, Minnesota

Associate Director: Jack C. Mevin, Assistant Dean
Professor of Education Psychology
University of Minnesota
Minneapolis, Minnesota

Participant Objectives

. Understanding of the differences between vocational-technical education programs planned and developed upon the basis of student characteristics and those programs based on other criteria.
. Recognition of the relative influence of student characteristics upon vocational-technical education offerings and outcomes.
. Acquaintance with selected designs, methodologies and tools which are utilized to develop systems and procedures for determining student characteristics and needs.
. Increased competence in the use of research methods and results which are helpful in determining student characteristics and needs.
. Group experience in developing a conceptual framework or model for program planning and development based upon student characteristics.

Major Content Topics

The place and function of student assessment in program planning and development.

Presently used tools and techniques for student assessment.

Research and statistics appropriate to assessment of student aptitude, interests, personality, etc.

Criteria for selection or development of the instruments and procedures necessary to assess student characteristics and needs.

Incorporating student information into program plans and curriculum development.
Research and statistics applicable to measuring the effects of peer groups and other sociocultural and economic influences on instruction and instructional outcomes.

Research and statistics applicable to identification of student images and expectations for vocational and technical education.
Selection of Participants

An eleven page seminar program announcement listing the host institution, dates, content and enrollment quota was developed along with an application form for nation-wide distribution. The announcement was mailed to state directors of vocational education (with a letter requesting that it be distributed to staff), to participants of previous programs, to directors of Research Coordinating Units, to the federal and regional offices of the United States Office of Education, to deans of schools of education, to city or other vocational supervisors, as well as to agencies and individuals named by any of the above. In addition to researchers and potential researchers, invitations were also extended to vocational educators who were in positions (e.g. city supervisors, curriculum directors, etc.) to make use of research results but who need training to utilize research tools, techniques, methodologies, and results to the best advantage. The American Vocational Journal carried an announcement of the seminar offerings and suggested that those interested could write for more information and an application form.

Factors that were considered in the selection of applicants included: education, experience, previous training, demonstrated or expressed interest in education research, current employment responsibilities, and potential for the use and application of competencies acquired at the programs. All applicants were asked to state first, second, third and fourth choice programs.

Applications were received by the project director, Dr. Neal E. Vivian, and Dr. Aaron J. Miller, both of whom were staff members of
The Center for Vocational-Technical Education at The Ohio State University. The applications were sorted into groups, and a concerted effort was made to assign the selected participants to the program listed as their first choice, and to balance the programs between researchers and practitioners. The appropriate group of applications were then submitted to the specific program directors for approval.
Information on Participants in the Four Seminars

Pertinent information was tabulated from the application forms of participants selected for each of the four vocational education research seminars. These data provide specific background information concerning institution or agency of employment, branch of vocational education and current positions of the participants.

Table 1 contains information pertaining to the affiliations or positions of participants by seminar. Substantial percentages of the participants in all four seminars were in universities affiliated with vocational education. One or more members of various state Research Coordinating Units were represented in each of the seminars.

Part two of Table 1 identifies participants by affiliate branch of vocational education. Largest representation in terms of total numbers was found in the following vocational service areas: Guidance and Counseling, Technical, Trade and Industrial, and Agriculture. Those participants listed under "Other" represented such categories as researcher, Research Coordinating Unit director, and vocational education administrator. Participating in the seminars at Pennsylvania State University and The University of California at Los Angeles were a number of persons listed as non-vocational. Representative individuals in the non-vocational listing were persons with program planning and/or evaluation responsibilities in educational, business and governmental agencies.

An analysis of the degrees held by participants indicates that the greatest number had a masters degree. Within this category, a high percentage had taken additional coursework and many of these same individuals were pursuing a doctoral degree.
Evaluation of the Program

Eighty-six of the participants completed useable evaluation sheets at the termination of the training programs. Summaries of these evaluations are included in this Final Report. The following program assessment is based upon the participant's evaluation and the observations of the training program staff.

1. Program Factors

a. Objectives

Items four and five on the participant's evaluation sheet relate to program objectives and program outcomes. Forty-two percent of the responding participants felt their prior expectations had been well met or exceeded by the program outcomes. Another forty-two percent rated program outcomes as adequate in terms of their prior expectations. The program outcomes were considered barely adequate by nine percent of the participants and to have failed completely in terms of prior expectations by seven percent of the respondents. (Table 4, page 28)

Ninety-two percent of the trainees rated the realism and attainability of the seminar objectives and outcomes as from very realistic and easily attainable to adequate. The specific percentages for each of the scale categories were: sixteen percent thought the objectives very realistic and easily attainable; forty-seven percent indicated that the objectives were capable of being accomplished by most participants; and thirty percent rated the objectives as adequate in terms of being realistic and attainable. Only three percent of the respondents rated the objectives as completely unrealistic. (Table 4, page 28)
b. **Content**

The participants indicated their satisfaction with the content of the four research training programs. Items six and seven on the participant's evaluation sheet relate to the content of the program. Sixty-six percent of the eighty-six responding trainees felt that the program was well related to their needs. Twenty-four percent indicated that the program could perhaps have been better in some respects, but was very adequate in their estimation. Ten percent of the respondents rated the content as being only slightly related to their needs. The fifth choice on the scale of complete unrelatedness to personal needs was not selected by any of the participants. (Table 4, page 28)

Seventy percent of the responding participants rated the content level as just about right. Twelve percent felt that the content level, while high, was acceptable and another twelve percent thought the content level to be low, but acceptable. Only six percent thought the content was either too far above or entirely too low for their needs. (Table 4, page 29)

Seventy-seven percent of the participants indicated on item eleven of their evaluation form that the program was or would be helpful or of great value in increasing their job competencies. Only one percent indicated that the program was of little or no value to the end of increased job competencies. (Table 4, page 29)

c. **Staff**

Items eight, nine and ten on the participant's evaluation form related to staff effectiveness and adequacy of instructional methods and aids. In a general evaluation of instruction, seventy-four
percent of the participants judged the instruction as from good to excellent. Twenty percent of the trainees thought the instruction satisfactory, and only six percent found it inadequate or poor.

(Table 14, page 29)

Seventy-three percent of the trainees rated the instructional materials or texts as from good to excellent. Only two percent of the participants checked these instructional materials as being inadequate. Responses to item eight indicated that seventy-one percent of the trainees felt the opportunity for questions and discussion to be very ample. Only three percent deemed the opportunity rare and none of the participants selected the 'never' category.

(Table 4, page 29)

d. Participants

The participants in the four research training seminars were involved in or interested in becoming involved in some phase of vocational education research. This common background of interest and/or experience contributed to the overall success of the programs. There were, however, wide ranges of research skills represented among the seminar participants. This situation presented a problem in arriving at a level of instruction in the course work that was challenging to all participants.

e. Organization

Ninety-eight percent of eighty-six responding participants indicated on item two that the program was adequate to excellent in terms of organization. In specific terms, nineteen percent deemed the organization excellent and in meaningful sequence, sixty-one
percent rated the program as well organized and eighteen percent thought it adequate. Only two percent thought the organization to be inadequate, and none thought it confused and unsystematic. (Table 4, page 28)

Fifty-one percent of the trainees felt that the program length was just right, according to their responses on item three. Two percent indicated that the program was much too long and six percent that the program was too short to cover the content. (Table 4, page 28)

The individual programs were evaluated by the participants in attendance. (Tables 5, 6, 7, and 8, pages 30, 31, 32, and 33)

Employment Responsibilities

Briefly describe the nature of your present position -

What current or recent research and/or program development efforts in vocational education have you been involved in?

Do you wish to be considered as a researcher or practitioner (consumer of research)?

Researcher_____  Practitioner____

The four training programs are described in the attached brochure. Indicate your first, second, third and fourth choices in the appropriate blank space.

Program A - PLANNING VOCATIONAL EDUCATION PROGRAMS BASED UPON MANPOWER RESEARCH
October 26-31, 1969  ( )

Program B - PATTERNS OF CAREER DEVELOPMENT AS APPLIED TO VOCATIONAL EDUCATION
August 3-8, 1969  ( )

Program C - EVALUATION OF VOCATIONAL-TECHNICAL EDUCATION PROGRAM EFFECTIVENESS
August 17-22, 1969  ( )

Program D - STUDENT CHARACTERISTICS: A DETERMINANT FOR PROGRAM PLANNING AND DEVELOPMENT
October 6-10, 1969  ( )

I agree that if accepted to participate in one of the above programs I will be in attendance for the entire five-day period. Further, I understand that no reimbursement for travel, per diem or other expenses incurred as a result of my participation can be provided by this training project.

Notice of Acceptance to the AVA Research Training Program

Dear

The selection committee is pleased to announce that you have been selected to participate in the Special Program for Research Training in Vocational Technical Education which will be held on October 26-31 at Pennsylvania State University, University Park, Pennsylvania. You have been specifically selected for Program A which will be devoted to the study of Planning Vocational-Technical Education Program Based Upon Manpower Research.

Individual program materials may be mailed to participants by your instructor for preparation purposes. A small registration fee may be charged.

If for any reason you are unable to attend the program, let us know as early as possible.

The director of your program may be contacting you and supplying other information concerning that program. If you have any specific questions concerning the program, please write directly to Dr. Jacob J. Kaufman, Professor of Economics and Director, Institute for Research in Human Resources, Pennsylvania State University, University Park, Pennsylvania.

Thank you for your interest and willingness to participate in this research training effort.

Very truly yours,

Dr. Neal E. Vivian, Director
Research Training Seminars

In cooperation with the Division of Comprehensive and Vocational Education Research, United States Office of Education
Notice of Acceptance to the AVA Research Training Program

Dear

The selection committee is pleased to announce that you have been selected to participate in the Special Program for Research Training in Vocational Technical Education which will be held on August 3-8, 1969, at the University of Missouri, Columbia, Missouri. You have been specifically selected for Program B which will be devoted to the study of Patterns of Career Development as Applied to Vocational-Technical Education.

Individual program materials may be mailed to participants by your instructor for preparation purposes. A small registration fee may be charged.

If for any reason you are unable to attend the program, let us know as early as possible.

The director of your program may be contacting you and supplying other information concerning that program. If you have any specific questions concerning the program, please write directly to Dr. Norman C. Gysbers, Associate Professor of Education, the University of Missouri, Columbia, Missouri.

Thank you for your interest and willingness to participate in this research training effort.

Very truly yours,

Dr. Neal E. Vivian, Director
Research Training Seminars

NEV/mec
Notice of Acceptance to the AVA Research Training Program.

Dear

The selection committee is pleased to announce that you have been selected to participate in the Special Program for Research Training in Vocational Technical Education which will be held on August 17-22, 1969, at the University of California, Los Angeles, California. You have been specifically selected for Program C which will be devoted to the study of Evaluation of Vocational-Technical Education Program Effectiveness.

Individual program materials may be mailed to participants by your instructor for preparation purposes. A small registration fee may be charged.

If for any reason you are unable to attend the program let us know as early as possible.

The director of your program may be contacting you and supplying other information concerning that program. If you have any specific questions concerning the program, please write directly to Dr. Melvin L. Barlow, Professor of Education and Director, Division of Vocational Education, University of California, Los Angeles, California.

Thank you for your interest and willingness to participate in this research training effort.

Very truly yours,

Dr. Neal E. Vivian, Director
Research Training Seminars
Notice of Acceptance to the AVA Research Training Program

Dear [Name],

The selection committee is pleased to announce that you have been selected to participate in the Special Program for Research Training in Vocational Technical Education which will be held on October 6-10, 1969, at the University of Minnesota, Minneapolis, Minnesota. You have been specifically selected for Program D which will be devoted to the study of Student Characteristics: A Determinant for Program Planning and Development.

Individual program materials may be mailed to participants by your instructor for preparation purposes. A small registration fee may be charged.

If for any reason you are unable to attend the program, let us know as early as possible.

The director of your program may be contacting you and supplying other information concerning that program. If you have any specific questions concerning the program, please write directly to Dr. Howard F. Nelson, Chairman, Department of Trade and Industrial Education, the University of Minnesota, Minneapolis, Minnesota.

Thank you for your interest and willingness to participate in this research training effort.

Very truly yours,

Dr. Neal E. Vivian, Director
Research Training Seminars

July 8, 1969
APPENDIX C

PARTICIPANTS EVALUATION OF PROGRAM AREAS
Please complete this form and return it to the Program Director, Neal E. Vivian, at the end of the Seminar.

Please indicate by checking the blank, the program you participated in during the Research Training Program.

- Program A PLANNING VOCATIONAL EDUCATION PROGRAMS BASED UPON MANPOWER RESEARCH
- Program B PATTERNS OF CAREER DEVELOPMENT AS APPLIED TO VOCATIONAL EDUCATION
- Program C EVALUATION OF VOCATIONAL-TECHNICAL EDUCATION PROGRAM EFFECTIVENESS
- Program D STUDENT CHARACTERISTICS: A DETERMINANT FOR PROGRAM PLANNING AND DEVELOPMENT

I. Program Evaluation - Congruence Between Program and Stated Objectives

The objectives for all four programs are stated below. After each objective please indicate how successful the program was in accomplishing the stated objectives.

1. Organization and Facilities

   Yes No
   21 2 Did you obtain sufficient advance information about the conference?
   22 1 Did you receive "sufficient" information soon enough for making travel plans?
   1 22 Did you have any difficulty with the application and registration procedures?
   22 1 Did the program "run off smoothly"?
   21 2 Were the break periods spaced properly?
   20 3 Did you have enough opportunity for informal conversations?
2. ORGANIZATION OF THE PROGRAM

   5  Excellent organization in meaningful sequence
   5  Well organized
   3  Adequate, but could be better
   2  Inadequate organization
   0  Confused and unsystematic

3. PROGRAM LENGTH

   11 Program length was just right
   8  Program was long, but acceptable
   3  Program was short, but acceptable
   1  Program was much too long
   1  Program was too short to cover the content

4. DEGREE TO WHICH PROGRAM OUTCOMES MET MY PRIOR EXPECTATIONS

   10  Program exceeded my prior expectations
   10  My prior expectations were well met
   6  Program was adequate in terms of prior expectations but could have been better
   2  Program was barely adequate in this respect
   0  Program completely failed to meet my expectations
5. HOW REALISTIC AND ATTAINABLE WERE THE OBJECTIVES AND OUTCOMES OF THE SEMINAR?

 5  Very realistic and easily attainable
10  Capable of being accomplished by most participants
 6  Adequate, or average
 0  Lacking in realism considering time involved and type of participants
 0  Completely unrealistic

6. APPLICABILITY OF CONTENT TO NEEDS

 5  Content was exceptionally well related to my needs
12  Content was moderately well related to my needs
 5  Content was adequate - could be better
 1  Content was only slightly related to my needs
 0  Content was completely unrelated to my needs

7. LEVEL OF CONTENT

 17  Content level was just about right
 0  High, but acceptable
 4  Low, but acceptable
 1  Content was far above level needed for my work
 0  Level was entirely too low
8. OPPORTUNITY FOR QUESTIONS AND DISCUSSION

20  Ample opportunity

4   Moderate opportunity

0   Occasional opportunity

0   Rare opportunity

0   Never

9. GENERAL EVALUATION OF INSTRUCTION

7   Outstanding

10  Good

4   Satisfactory

0   Inadequate

0   Poor

10. TEXTS OR OTHER PRINTED INSTRUCTIONAL MATERIALS

5   Texts and materials excellent

12  Good

6   Adequate, but could be better

0   Text and materials need modification

0   Text and materials entirely inappropriate

11. CONTRIBUTION OF PROGRAM TO INCREASED JOB COMPETENCIES

3   Program will be of great value in increasing job competencies

17  Program will be helpful

2   Program will be of moderate value only

0   Program will be of little value

0   Program will be valueless

-59-
12. **MEETING ROOMS OR ACCOMMODATIONS**

19 **Excellent**
14 **Good**
0 **Barely adequate**
0 **Poor**
0 **Completely inadequate**

13. **EVALUATION OF THE SPECIFIC MAJOR TOPICS**

Please indicate how valuable the treatment of each of the major topics was to you.

7  Adequate, but could be better
1  Inadequate organization
0  Confused and unsystematic

3. PROGRAM LENGTH

13 Program length was just right
0  Program was long, but acceptable
2  Program was short, but acceptable
1  Program was much too long
2  Program was too short to cover the content

4. DEGREE TO WHICH PROGRAM OUTCOMES MET MY PRIOR EXPECTATIONS

0  Program exceeded my prior expectations
5  My prior expectations were well met
9  Program was adequate in terms of prior expectations but could have been better
2  Program was barely adequate in this respect
2  Program completely failed to meet my expectations
5. **HOW REALISTIC AND ATTAINABLE WERE THE OBJECTIVES AND OUTCOMES OF THE SEMINAR?**

   - 1. Very realistic and easily attainable
   - 10. Capable of being accomplished by most participants
   - 5. Adequate, or average
   - 1. Lacking in realism considering time involved and type of participants
   - 1. Completely unrealistic

6. **APPLICABILITY OF CONTENT TO NEEDS**

   - 3. Content was exceptionally well related to my needs
   - 5. Content was moderately well related to my needs
   - 7. Content was adequate - could be better
   - 3. Content was only slightly related to my needs
   - 0. Content was completely unrelated to my needs

7. **LEVEL OF CONTENT**

   - 10. Content level was just about right
   - 2. High, but acceptable
   - 4. Low, but acceptable
   - 0. Content was far above level needed for my work
   - 2. Level was entirely too low
8. OPPORTUNITY FOR QUESTIONS AND DISCUSSION

CENTER FOR VOCATIONAL-TECHNICAL EDUCATION

RESEARCH TRAINING PROGRAM
PARTICIPANT'S EVALUATION

Please complete this form and return it to the Program Director, Neal E. Vivian, at the end of the Seminar.

Please indicate by checking the blank, the program you participated in during the Research Training Program.

Program A PLANNING VOCATIONAL EDUCATION PROGRAMS BASED UPON MANPOWER RESEARCH

Program B PATTERNS OF CAREER DEVELOPMENT AS APPLIED TO VOCATIONAL EDUCATION

Program C EVALUATION OF VOCATIONAL-TECHNICAL EDUCATION PROGRAM EFFECTIVENESS

Program D STUDENT CHARACTERISTICS: A DETERMINANT FOR PROGRAM PLANNING AND DEVELOPMENT

I. Program Evaluation - Congruence Between Program and Stated Objectives

The objectives for all four programs are stated below. After each objective please indicate how successful the program was in accomplishing the stated objectives.

1. Organization and Facilities

Yes No

22 1 Did you obtain sufficient advance information about the conference?

25 0 Did you receive this information soon enough for making travel plans?

5 22 Did you have any difficulty with the application and registration procedures?

25 2 Did the program "run off smoothly"?

26 1 Were the break periods spaced properly?

22 2 Did you have enough opportunity for informal conversations?
2. ORGANIZATION OF THE PROGRAM

   6 Excellent organization in meaningful sequence
   20 Well organized
   2 Adequate, but could be better
   0 Inadequate organization
   0 Confused and unsystematic

3. PROGRAM LENGTH

   9 Program length was just right
   15 Program was long, but acceptable
   1 Program was short, but acceptable
   1 Program was much too long
   1 Program was too short to cover the content

4. DEGREE TO WHICH PROGRAM OUTCOMES MET MY PRIOR EXPECTATIONS

   5 Program exceeded my prior expectations
   4 My prior expectations were well met
   18 Program was adequate in terms of prior expectations but could have been better
   1 Program was barely adequate in this respect
   0 Program completely failed to meet my expectations
5. HOW REALISTIC AND ATTAINABLE WERE THE OBJECTIVES AND OUTCOMES OF THE SEMINAR?

- 0 Very realistic and easily attainable
- 16 Capable of being accomplished by most participants
- 6 Adequate, or average
- 4 Lacking in realism considering time involved and type of participants
- 0 Completely unrealistic

6. APPLICABILITY OF CONTENT TO NEEDS

- 4 Content was exceptionally well related to my needs
- 18 Content was moderately well related to my needs
- 4 Content was adequate - could be better
- 1 Content was only slightly related to my needs
- 0 Content was completely unrelated to my needs

7. LEVEL OF CONTENT

- 17 Content level was just about right
- 7 High, but acceptable
- 0 Low, but acceptable
- 0 Content was far above level needed for my work
- 0 Level was entirely too low
8. OPPORTUNITY FOR QUESTIONS AND DISCUSSION

14 Ample opportunity
8 Moderate opportunity
4 Occasional opportunity
1 Rare opportunity
0 Never

9. GENERAL EVALUATION OF INSTRUCTION

7 Outstanding
16 Good
4 Satisfactory
0 Inadequate
0 Poor

10. TEXTS OR OTHER PRINTED INSTRUCTIONAL MATERIALS

6 Texts and materials excellent
16 Good
5 Adequate, but could be better
0 Text and materials need modification
0 Text and materials entirely inappropriate

11. CONTRIBUTION OF PROGRAM TO INCREASED JOB COMPETENCIES

14 Program will be of great value in increasing job competencies
17 Program will be helpful
5 Program will be of moderate value only
0 Program will be of little value
0 Program will be valueless
12. **MEETING ROOMS OR ACCOMMODATIONS**

- **9** Excellent
- **16** Good
- **2** Barely adequate
- **0** Poor
- **0** Completely inadequate

13. **EVALUATION OF THE SPECIFIC MAJOR TOPICS**

Please indicate how valuable the treatment of each of the major topics was to you.

APPENDIX D

PARTICIPANT'S PLANS FOR APPLICATION OF SEMINAR OUTCOMES
RESEARCH TRAINING PROGRAM PARTICIPANT'S EVALUATION

Please indicate in the space provided below two or three ways that you plan to apply the outcomes that you have obtained from attending this program.

Responses are categorized to indicate frequency of choice.

Planning and augmenting research activities 21%
Counseling and classroom use 17%
Evaluation of ongoing vocational and research programs 16%
Manpower survey 16%
Vocational program planning and development 15%
Curriculum development 12%
Writing exemplary projects and programs 12%
Stimulating vocational student follow up 10%

Others include:
- Development of evaluation strategies
- Teacher education (pre and in service)
- Stimulate follow up of vocational students
