The second annual review of Canadian degree research on adult education, this work describes ten master's and doctoral studies completed in 1969, and 22 others still in progress. The degree and institution are noted for each, followed by the date of acceptance or estimated completion, statement of the problem or objective, methods used, findings (where applicable), name(s) of advisor(s), and addresses from which further information and/or copies can be obtained. Such concerns as adult basic and public school adult education, university extension, administration, dropout characteristics, literacy, professional continuing education, human relations training, leadership, vocational counseling, parent education, technical education, and public affairs broadcasting are represented. Four tables and an author and title index are included. (LY)
DEGREE RESEARCH IN ADULT EDUCATION IN CANADA

1969

Compiled by:

James A. Draper
Fausto Yadao, Jr.

An informal publication of the
Department of Adult Education
The Ontario Institute for Studies in Education
FOREWORD

This publication is the second annual review of degree research in adult education in Canada. The time period covered by this survey is the calendar year 1969.

The first review was collaboratively compiled by the departments of adult education at The Ontario Institute for Studies in Education, the University of British Columbia, and the University of Montreal. This present publication began as a cooperative venture of The Ontario Institute for Studies in Education and the University of Montreal. Recently M. Claude Touchette of the University of Montreal advised that circumstances had delayed the collection of the French language theses material. It was jointly agreed that the publication of the English language material should proceed. Regretfully, this publication lacks the scope of the two-language publication of 1968. It is anticipated that reviews of this kind will continue. Already it has been suggested that next year's review will include a two-year coverage of the French language material.

"Degree research" includes any research which has been done, or is being done as partial fulfillment of a university degree. For this reason, research relating to Canada but conducted outside of the country is included in the document. Research-reporting questionnaires were sent to universities and colleges in Canada, to members of the Commission of Professors of Adult Education, and professors of adult education in Canada. Questionnaires were also sent to persons who reported in-progress research in last year's publication. Only meager attempts were made to locate related research conducted by such disciplines as anthropology, social work, sociology, political science, and others. As important as some of this research is to adult education, a systematic coverage of these sources was not within the scope of this publication.

This publication reports 10 completed and 22 in-progress English language studies as compared to last year's survey which covered the period 1968 to March 1969 and reported 11 completed and 24 in-progress studies. Studies which were reported in-progress last year are reported in this publication only if these studies are now completed. Hence, in order to gain a comprehensive view of the current degree research being conducted in Canada, the reader is advised to refer to last year's publication.

The number of studies reported in this survey are summarized in Appendix B according to university and the degree program to which the thesis research is being credited. Note that the French language universities are excluded from the summary. For an overall view of adult education as a field of study conducted by institutions of higher education in Canada, the reader might wish to refer to the March-April 1970 issue of Continuous Learning. With the rapid increase in degree programs in adult education offered by universities in Canada, one can expect a proportionate increase in the number of studies conducted in adult education.
Where omissions of research have occurred in this document, it is hoped that our colleagues will inform us of these so that appropriate amendments can be made in future publications.

Many individuals are to be thanked for the assistance they have given in supplying the information reported in this document. Gratitude is expressed in particular to Professor Claude Touchette of the University of Montreal for his initial collaboration with this survey.

Promotion of Public School Adult Education in the City of Port Coquitlam, B.C.

Degree Obtained: M.A.

Institution: University of British Columbia

Date Thesis Accepted: 1969

Statement of the Problem: To determine factors essential to the effective promotion of Public School adult education in a suburban Canadian community—the City of Port Coquitlam, British Columbia.

Methodology Used: A structured interview schedule was used by the author on 112 adult respondents of households selected at random, from an area survey of the city.

Findings: The City of Port Coquitlam was found to be a very homogeneous community with respect to several selected socioeconomic characteristics, patterns of participation and interest in adult education, and patterns of mass media use.

**Statement of the Problem:**

To identify the characteristics of the present adult basic education teachers; to determine, from interviews with these teachers: their degree of satisfaction with their teaching positions; their attitudes toward program development, the teacher, the learner, and organization and management of the program; the areas in which they felt they could benefit from further training; the methods of teacher-training which would best suit their needs.

**Methodology Used:**

Analytical survey method, utilizing a structured interview schedule to gather data from the adult basic education teachers.

**Findings:**

While half of those interviewed were university graduates with some training or experience in elementary and secondary education, few teachers had more than a minimal amount of preparation for teaching adults. Eighty-seven per cent were interested in participating in programs if they were available, although their time commitment to such programs was limited. Teachers perceived the greatest need for instruction in adult psychology and principles of learning and teaching reading and communications skills although responses varied according to the educational backgrounds, experiences, attitudes and perceptions of those interviewed.

**Name of Advisors:**

Dr. John A. Niemi, Adult Education, University of British Columbia

An Evaluation of A Three-Week Adult Education Program for Commercial Fishermen

Degree Obtained: M.Ed.

Institution: University of British Columbia

Date Thesis Accepted: September 1969

Statement of the Problem: To study the effectiveness of a three-week adult education program for commercial fishermen which had been used as a model by other institutions. The study was confined to the span of presentation of the short course and is concerned mainly with the acquisition of new knowledge and attitude modification. To compare certain results with that obtained by previous graduates of the program.

Methodology Used: Three groups of fishermen were used: 22 participants of the 1969 Fishermen's Short Course; 40 fishermen who had never participated; and 55 fishermen who were former students. Six data gathering instruments were used. Group I was pre- and post-tested on knowledge and attitude.

Findings: Group knowledge scores improved significantly. Group attitude toward governmental function remained virtually unchanged, although there were many individual changes. No relationships were found between knowledge, attitude or socio-economic factors of the fishermen studied. There is an indication that knowledge is retained and behavior is changed by former students.

An Analysis of Certain Factors in the Diffusion of Innovations in Nursing Practice in the Public General Hospitals of the Province of British Columbia.

Degree Obtained: Ed.D.
Institution: University of British Columbia
Date Thesis Accepted: August 1969

Statement of the Problem:
To analyze the process of diffusion as it functions with regard to changes in nursing practice in a selected segment of Canadian hospitals and to relate this to general research and theory about information transmission and the acceptance of innovations. Three aspects of the diffusion process were investigated: the flow of information about new practices in nursing through a network of hospitals; factors affecting the adoption of nursing; and factors influencing delay in the adoption process, rejection of new practices or their discontinuance following adoption.

Methodology Used:
Use of analytical survey method to investigate the process of diffusion by which new information is transmitted in the nursing community of British Columbia. A structured interview technique was employed to gather data from the head of the nursing staff of each hospital.

Findings:
Two cycles of influence were shown to be operating in the flow of information to nurses in the province; the first deriving from the major teaching and research centers in Vancouver; the second, from the larger centrally located hospitals in districts of the Province. The specific characteristics of the population which showed a relationship to adoption included: size, teaching status, geographic location, and accreditation of the hospital; age of the Director of Nursing, her marital status, academic preparation, professional nursing experience, extent of attendance at educational meetings, participation in professional nursing organizations, and subscription to nursing journals; professional preparation and prestige of the hospital administrator; relative age of the nursing staff. Factors influencing delay,
rejection or discontinuance were shown to be related both to characteristics of the new practice and to characteristics of the individuals involved in making the decision to adopt innovations.

An Analytical Survey of Participants in Non-Credit Liberal Arts Extension Courses

Degree Obtained: M.A.

Institution: University of British Columbia

Date Thesis Accepted: April 1969

Statement of the Problem:
To establish a profile of the participants in non-credit liberal arts university extension courses given by the University of British Columbia during the spring of 1968, by investigating the socioeconomic characteristics of the participants as well as some of their psychological traits (motivation, preferences, interests) and their ways of obtaining information about courses. To establish three dichotomies according to sex, previous participation in adult education, and intentions for future participation, and to determine whether or not any statistically significant differences with respect to the established characteristics exist within each of the dichotomies.

Methodology Used:
Analytical survey, based on 1005 interview schedules which were collected during group-interviews of all participants.

Findings:
Participants differed from the general population in that they had a higher ratio of women to men, constituted greater percentages of people in each of the age categories from 25-54 years, possessed higher socioeconomic status and were more actively involved in the formally organized life of their community. Learning-orientation - the desire to seek knowledge for its own sake - emerged as the prime motivator for most participants. Three-quarters of them reported previous involvement in adult education, and a similar proportion indicated strong intentions to enrol in future extension classes. One-half of the clientele were novices in university extension classes. Virtually all respondents resided in the greater Vancouver area, and spent less than thirty minutes traveling to class. Testing of the hypothesis revealed statistically significant differences between male and female
participants with respect to educational level, attendance during specified times of the day, preferences for starting times of classes, attendance on specified days of the week, interest in weekend seminars, and the type of announcement received for the course.

The Ontario High School Program as a Preparation for the Two-Year Diploma Program at the Ontario Agricultural College, University of Guelph

Degree Obtained: M.Sc.
Institution: University of Guelph
Date Thesis Accepted: January 1969

Statement of the Problem:
To illustrate which, if any, of the programs available to students in Ontario high schools is most suitable as a preparation for the two-year diploma program at the Ontario Agricultural College, University of Guelph.

Methodology Used:
Analysis of records of 194 male students from the graduating class of the diploma program.

Findings:
Students from the five-year programs outperformed those from the four-year programs. However, there was no relationship between the students' Grade XII marks and their performance during their first Semester at O.A.C. It was also found that those who had taken chemistry in high school significantly outperformed those who had not. There was no relationship between performance and those who had agriculture as a subject in high school.

An Historical Synopsis of the Concept of Literacy

Degree Obtained: M.A.

Institution: University of British Columbia

Date Thesis Accepted: December 1969

Statement of the Problem: To determine the validity of the notion that the level of literacy is determined by the socio-economic needs of the times.

Methodology Used: Analysis of historical materials.

Findings: Literacy and levels of education have always been related to usefulness of work. This was true of the first schools, and it is true today. Literacy and education for purposes of developing the potential of an individual or for "spiritual values" has been and is a secondary matter. The prime reason for the support of universities has always been, and is today, for their usefulness to society. Such usefulness is not a modern twentieth century development.

Differences in the Expectations of Adults in a Public Adult Night School Regarding the Functions of a Counselor

Degree Obtained: M.A.

Institution: University of British Columbia

Date Thesis Accepted: May 1970

Statement of the Problem: To determine if, as a result of a number of socioeconomic variables, there are differences in the importance which adult credit students in night school assign to counselor functions.

Methodology Used: Individual interview by means of a Q sort administered to 100 adults actively participating in credit night courses in Surrey, British Columbia.

Findings: The following findings were statistically significant at the .05 level: all socioeconomic groups considered educational counseling more important than either personal counseling or counselor-client relationship; all groups considered the combination of educational and occupational counseling more important than the combination of personal and counselor-client relationship; only males in white collar occupations considered educational counseling more important than occupational counseling; males considered occupational counseling more important than did females; working females considered occupational counseling more important than did housewives; housewives considered the counselor-client relationship more important than did employed females.

A Survey of the Functions and Responsibilities of the Director of Adult Education in the Public School System

Degree Obtained: M.Ed.

Institution: University of Calgary

Date Thesis Accepted: September 1969

Statement of the Problem: To conduct a survey of some of the present functions and characteristics of the administrator of adult education in public school systems across Canada, as well as the educational goals of adult programs as perceived by the director himself and the school superintendent.

Methodology Used: Questionnaires mailed to 265 directors of adult education and 183 superintendents of school systems across Canada.

Findings: Many directors are relatively new to the position. Many full-time directors were previously employed by the same school board. There is evidence of lack of training in adult education and lack of strong agreement with respect to goals of adult education. Many tasks listed were considered to be of primary importance. The type of director and the geographic location produced greater differences in points of view regarding goals and tasks than did administrative experience and training in adult education. The views of superintendents are often similar to those of the directors.

Teacher Participation in Continuing Education Activities

Degree Obtained: Ph.D.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Date Thesis Accepted: September 1969

Statement of the Problem: To investigate the continuing education activities in which teachers engaged and to determine where possible: what factors influenced their participation in courses; the kinds of help teachers received from selected continuing education activities; the kinds of help they received from colleagues; and the changes teachers perceived as needed to facilitate their personal and professional growth.

Methodology Used: Questionnaires mailed to 1470 teachers employed in public school system by Windsor Board of Education, Ontario.

Findings: Participation in continuing education activities was related to the factors age, sex, academic qualifications, grade level taught, and length of teaching experience. Membership in Teacher Associations was one of the most important influences on the teacher with respect to both personal and professional development. Skill and competence were most effectively enhanced by workshops, observation-demonstration lessons, and Department of Education courses. Interaction with colleagues contributed significantly to "on-the-job" improvement and frequently stimulated involvement in continuing activities, but could also have an adverse influence.

IN-PROGRESS
RESEARCH
A Study of Post-Laboratory Transfer of Behavioral Learnings in Human Relations Training

Degree Sought: M.A.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Estimated Date of Completion: August 1970

Statement of the Problem: To test the hypothesis that cognitive learning is a greater reinforcement to affective learning when it takes place following the laboratory, rather than prior to or during the laboratory. In other words, the time for an intellectual understanding of the processes and theories involved in the affective learning that takes place in a human relations laboratory is in the follow-up period rather than before or during the laboratory period itself.

Methodology Used: Experimental study of twenty participants in a recent human relations laboratory. These participants were divided into an experimental group of ten and a control group of ten. The experimental group received a three-month follow-up program emphasizing cognitive reinforcement of the affective learnings achieved or desired by the subjects. Assessment made by the subjects and by others at the end of the program.

An Investigation of Certain Factors Contributing to Dropping Out in an Ontario Adult Basic Education Program

Degree Sought: Ph.D.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Estimated Date of Completion: December 1970

Statement of the Problem: To determine whether students who drop out from adult basic education programs in two community colleges have significantly more of such characteristics as limited prior education, deprived environment, low I.Q., maladjusted personality traits, etc.

Methodology Used: Interview of a sample of 100 students from two community colleges in Toronto. Questionnaire and standardized test administered to the sample. Comparisons made between drop-outs and stay-ins. Sub-groups and t-test used to test significant response differences.

**Equal Emphasis: The Community College Response to the Washington State Community College Law of 1969**

**Degree Sought:** Ed.D.

**Institution:** University of British Columbia

**Estimated Date of Completion:** September 1970

**Statement of the Problem:**
To determine the degree to which the new Community College Law of 1969 is interpreted and implemented in the area of Adult Education (and community service) in the State of Washington.

**Methodology Used:**
Descriptive analysis based on questionnaire and interviews carried out with Presidents, Deans and Directors of four Community Colleges. Analysis of budgets and publications of these institutions.

The Artist as Educator: A Philosophical Examination of the Communicative Function in the Arts

Degree Sought: Ph.D.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Estimated Date of Completion: October 1970

Statement of the Problem: To determine the views of some contemporary artists about their role as communicators and educators; to gain an understanding of the methods used to achieve this goal; to define the place of aesthetics in learning.

Methodology Used: Review and integration of some theories of aesthetics and of communications as they relate to the contemporary artist's attempts to function as communicator or influencer; interviews with 15-20 Canadian writers, painters, and film-makers.

Factors Which Influence and Support the Production and Transmission of
Informational Programming on Television

Degree Sought: Ph.D.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Estimated Date of Completion: October 1969

Statement of the Problem:
To identify the forces that operate within the television production environment that influence, support, and confound news commentary from its beginning as an event in the external world to its reception by the television audience.

Methodology Used:
Open-ended interviews with programmers of major "news commentary" programs in two Canadian television networks. Interviewed were programmers invested with the authority to select program items and to decide how they will be developed.

Name of Advisors:
Dr. F. Rainsberry, Curriculum, OISE
Dr. A. Marcus, Applied Psychology, OISE
Dr. J. A. Draper, Adult Education, OISE
Dr. J. R. Kidd, Adult Education, OISE

Inquiries:
Richard G. A. Mackie
Department of Adult Education
The Ontario Institute for Studies in Education
252 Bloor Street West
Toronto 5, Ontario
27. MORRIS, John F.

An Investigation of the Early Activities of a Learning Project by An Individual Adult Learner

Degree Sought: Ph.D.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Estimated Date of Completion: October 1970

Statement of the Problem:
To examine the learning behavior of a selected group of continuous learners; to develop a taxonomy and typology of planning events by self-directed learners; to see what correlation, if any, exists between these planning categories and an individual's conceptual level.

Methodology Used:
Interviews of a selected group of professionals and testing.

Name of Advisors: Dr. J. R. Kidd, Adult Education, OISE

Inquiries:
John Morris
Department of Adult Education
The Ontario Institute for Studies in Education
252 Bloor Street West
Toronto 5, Ontario
28. POLVI, Mervin B.

A Survey of the Technical Training Program Conducted by the British Columbia Telephone Company

Degree Sought: M.A.

Institution: University of British Columbia

Estimated Date of Completion: Fall 1970

Statement of the Problem: To try and determine the effectiveness of the technical training program conducted by the British Columbia Telephone Company for installation and repairmen as related to on-the-job performance.

Methodology Used: An interview questionnaire submitted to about 75 journeymen directly in charge of the trainees following the training sessions. The questionnaire will be based on the course content of the training sessions.

Name of Advisors: Dr. John A. Niemi, Adult Education, University of British Columbia
Dr. S. Lee, Educational Psychology, University of British Columbia

Inquiries: Mervin B. Polvi
1251 Dunlop Avenue
North Burnaby, British Columbia
Name of Advisors: Dr. H. C. Abell, Urban and Regional Planning, University of Waterloo
Dr. W. Shalinsky, Environmental Studies, University of Waterloo
S. G. Rich, Urban and Regional Planning, University of Waterloo

Inquiries: Dr. H. C. Abell
School of Urban and Regional Planning
Division of Environmental Studies
University of Waterloo
Waterloo, Ontario
30. RUSNELL, Dale A.

The Relationship Between Occupation and Adult Education Participation for Rural, Non-farm, British Columbia Residents

The Development and Pilot Evaluation of an Instrument to Teach Differential Diagnosis to Veterinary Practitioners

Degree Sought: M.C.Ed.

Institution: University of Saskatchewan (Saskatoon)

Estimated Date of Completion: November 1970

Statement of the Problem: To develop an instrument to teach differential diagnosis to veterinary practitioners in Canada and to evaluate the effectiveness of this instrument.

Methodology Used: Sample drawn from delegates to the Canadian Veterinary Association Convention. Experimental form with control group given simulated literature and experimental group given instrument to be evaluated.

Name of Advisors: Dr. B. Whale, Extension, University of Saskatchewan (Saskatoon)
Dr. G. Farrell, Extension, University of Saskatchewan (Saskatoon)
Dr. N. Nielsen, Pathology, University of Saskatchewan (Saskatoon)

Inquiries: (Mrs.) J. A. Abramson Acting Head Department of Continuing Education Kirk Hall University of Saskatchewan Saskatoon, Saskatchewan
32. WARD, Muriel A.

Some Factors Related to the Mobility of Teachers in Diploma Schools of Nursing in the Province of Ontario

Degree Sought: M.Ed.

Institution: The Ontario Institute for Studies in Education
University of Toronto

Estimated Date of Completion: May 1970

Statement of the Problem: To determine the factors which influence the mobility of nursing teachers in Diploma Schools of Nursing in Ontario.

Methodology Used: Interview of 34 nurse teachers who resigned during the two-year period September 1, 1961 to August 31, 1963, whose reasons for terminating employment were within the limitations of the study.

Name of Advisors: Dr. A. M. Tough, Adult Education, OISE

Inquiries: Miss Muriel A. Ward
3192 The Credit Woodlands
Mississauga, Ontario
