This guide presents up-dated information, on a world-wide basis, on training facilities in documentation and information work. Only data relating to the formal training of documentalists, information workers and special librarians are included, except for those countries in which only short courses or seminars are available. Forty-seven countries are listed in alphabetical order, with a total of 159 institutions, listed under these countries, arranged alphabetically by the English version of place-name locations within the countries. The level of training, post-graduate, graduate, non-graduate, or special, available at each location is listed. A list of courses for users and potential users and a list of more specialized courses are appended. (AB)

Part III - LIST OF SPECIAL COURSES

294
INTRODUCTION

Four years have already elapsed since the first edition of this Guide was published. In the meanwhile information activity has been expanding rapidly in many countries, international co-operation keeping a steady pace with it. New services and information centres are coming into being in developing countries, and scientific and technical information problems occupy more and more the interest of inter-governmental organizations, such as UNO, UNESCO, COMECON, OECD. A UNESCO/ICSU Central Committee is considering the creation of a World Science Information System - UNISIST. In Moscow, in 1969, an International Center of Scientific and Technical Information was called into being. FID activity has been expanding considerably, its members growing in number and its international role intensifying.

Forms and methods of processing, storing and disseminating information are changing along with the development of informational activity. Rapid progress is to be seen in this field. Modern technical means, such as computers and new techniques in the reproduction of documents, and their transmission to distant places, are being introduced with growing speed.

The development of information has close interrelationships with the problems of training documentalists. Training programmes have to take into account the qualifications required of documentalists by information centres willing to employ them. Consequently training programmes need to include new forms and methods in information processes and sometimes should go ahead of introducing them into practice.

The strengthening of international co-operation requires the correlation of training between one country and another, and this is particularly valid for countries co-operating by way of exchange of information materials and services. So exchange of experience relevant to methods of training has a great importance too, and it allows for raising training levels and effects. For this reason the first edition of the Guide to the world's training facilities in documentation and information work, published in 1965 by FID in co-operation with CIINTE and under the auspices of the FID Training Committee, was welcomed both by FI D members and information services interested in training documentalists.

Opinions coming from various countries, and an exchange of views within the FID Training Committee itself, crystallized in a decision to publish a second updated and enlarged edition of the Guide. This work has been taken up by CIINTE and carried out by the Secretary of the FID Training Committee. Materials from respective countries were collected, then arranged according to the Guide's general programme and prepared for print.

At the meeting of FID/TD at Lausanne, in May 1969, training problems were thoroughly discussed along with training programmes, having regard
to anticipated developments in information work. In this connection al-
so the second edition of the Guide came under review.

The present edition, no doubt better than the first one, will be
of use to all organizations, institutions and persons active in training
documentalists and interested in this problem. It will, undoubtedly,
contribute to an improvement of training and its results, as well as to
the development of international co-operation.

I wish to thank the FID Training Committee Members for all their
efforts on behalf of the Guide, for their advice and counsel given at
meetings or addressed directly to the FID/SD Secretary. Particular ac-
knowledgement is due to Mr. F. Liebesny for his share, i.e. the final
shaping of the text and giving it proper form, and for the time he gene-
rously offered to accomplish this task.

I warmly thank Dr. F. Svirilov, the FID Secretary General, and Mr.
W. van der Brugghen for supplying us with documents and assisting in
the completion of the task.

I also thank all National Members of FID and all training institu-
tions who supplied us with necessary materials. Among them particular
thanks are due to Dr. Ch. Shilling for information on training informa-
tion scientists in the USA, which he helpfully gathered.

Preparing the second edition of the Guide for print called for
much work: the exchange of hundreds of letters and fitting the informa-
tion received into the general outlines of the publication. For accom-
plishing all this thanks are due to Miss K. Ostrowska, the Secretary of
FID/SD.

Finally I wish to express the simple hope that the Guide will prove
serviceable to all its users.

W. Piróg
Director of CHINTE
A MESSAGE FROM THE FID/TD CHAIRMAN

"A Guide to the World's Training Facilities in Documentation and Information Work" may be regarded as a good example of FID Training Committee work.

Beside its importance for the users, in particular for the establishments concerned with training, the Guide plays an important part in the provision of information for the FID Training Committee itself. The materials it contains make possible to follow the progress in training documentalists throughout the world and draw conclusions regarding the programmes of work and kinds of elaborations to be done by the Committee.

One of the nearest tasks of the FID/TD is the establishment of model programmes for training both documentalists and information users, the other is elaboration of a survey of the world's methods and forms of training documentalists. Also in this respect the present edition of the Guide and the information it contains is of great use.

The comparison of the merits of the materials which have been registered in the present edition of the Guide with those from the first issue testifies to a considerable progress in the training of documentalists throughout the world. FID has no doubt a share in it.

Here is the right place to express warm thanks to all who contributed to the Guide, to members of the FID Training Committee for valuable guidance submitted individually or at the Committee meetings, and last but not least, to the editors of the Guide for the great effort they put into accomplishing the work.

Acknowledgement is also due to the Central Institute for Scientific, Technical and Economic Information, in Warsaw, whose contribution allowed for the speedy compilation of the Guide.

Any constructive criticism coming from users of the Guide will be welcomed and should be addressed to the FID/TD Secretariat.

Dr. Adam Górski
Chairman of FID/TD
The aim of this Guide is to present the fullest up-to-date details about the training facilities in documentation and information work in the World. Since the publication of the first edition of this Guide in 1965, many developments in this field have taken place at all levels of training. Firstly, the number of educational establishments concerned with this discipline has increased considerably, several universities have created chairs specially concerned with information science and many new degree courses have been introduced. Secondly, the increasing demands for specialists in information work, in academic institutions and in industry, have led to the setting-up of more specialized training programmes. This expansion is also reflected in the fact that this edition covers 11 more countries than the previous edition.

The information presented in this volume has been collected from several sources:

1. from the replies received to a questionnaire sent out by the FID/TD Secretariat in 1968. Unfortunately not all recipients replied so that some of the data are far from complete;
2. from prospectuses received from training establishments, though not all were as up-to-date as could have been wished;
3. from the published literature, such as review articles and conference proceedings (e.g. of the "International Conference on Education for Scientific Information Work", London, 1967, published by FID).

The collected material was collated and edited according to principles laid down by the FID Training Committee, so that only data relating to the formal training of documentalists, information workers and special librarians are included. In general, information about courses in traditional librarianship and short courses or seminars has been excluded from the Guide; however, some brief information is presented in respect of those countries where no other form of training is known to exist.

In this Guide the relevant information is presented in the following manner:

a) alphabetical by country;
b) for each country, alphabetical by location (using the English version of place-names, e.g. The Hague and not 's-Gravenhage);
c) for each location, by level:
   - postgraduate (where a university degree is the condition of admission to studies or courses leading to the degree or sometimes only to professional qualifications),
   - graduate (where a secondary school education is required and training leads to Bachelor, Master or Doctor title),
   - non-graduate (where a secondary education is required, and the training does not lead to a university degree, the trainee being
granted only a diploma or certificate of professional qualifications),
- special (special courses are those in some speciality, such as classification, patents, mechanization, etc.)

For some courses, the level of training is not marked, because of lack of adequate information. Some courses, both introductory and advanced, admit graduates as well as non-graduates, and it has therefore not been possible to define the level clearly.

Two new features have been added at the end of the Guide: 1) a list of courses for users and potential users (students in various faculties) of information, and 2) a list of more specialized courses.

The part dealing with information users is incomplete; no doubt users are trained in many countries besides those enumerated in the Guide. Lacking information, we could not insert more data but we hope to be able to fill this gap by publishing supplements to the Guide in the FID News Bulletin. This will be possible if the relevant data reach the FID/TD Secretariat.

159 training institutions in 47 countries are dealt with in detail in the Guide, to say nothing of various training facilities mentioned in "Additional information". In 11 countries information users are trained (according to data at our disposal).

K. Ostrowska
FID/TD Secretary

*The Secretariat is located in Warsaw, at the address stated. A general information bulletin will be published periodically.
Part I - TRAINING IN DOCUMENTATION AND INFORMATION
ARGENTINA

Apart from the courses organized by the Centre of Scientific Documentation there are no separate courses in documentation and information science in Argentina. The subject is only taught in library schools. There are 9 library schools in Argentina. Condition of admission to the schools is, in principle, a leaving certificate of a secondary school. Language of lectures is Spanish.

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

BUENOS AIRES

Centro de Documentación Científica - CNICT (Centre of Scientific Documentation), Rivadavia 1917 - R 25, Buenos Aires

Programme
1. Concept of documentation
2. Problem of sources of documentation
3. The library and the centres of documentation
4. The documentalist as auxiliary worker or participant in research work
5. Problems deriving from the current growth of scientific literature
6. Current solutions in information handling, Automation
7. Bibliographical study and searching
8. Investigation or searching of data
9. Evaluation of reference and bibliographic repertories
10. Criteria for an encyclopaedia
11. Function of research in the application of results of investigations for utilitarian purposes
12. Documentation research
13. Localization and selection of information sources
14. References, repertories, bibliographies
15. Catalogues
16. Union catalogues
17. Classification
18. Bibliography
19. Criteria for bibliographies
20. Preparation of a bibliography for individual use
21. Services of documentation
22. The centre of scientific documentation
23. Forms of scientific papers (literature)
24. Components of scientific papers
25. Bibliographical citations

Type of training
Course in documentation for research workers

Conditions of admission
Status of a research worker in fields of medicine, chemistry or biology; age limit of 40 years; application for admission with
Duration of training: 26 days (3 times a week)

For what kind of work are the students being trained: Information workers in medicine, chemistry and biology

Examinations: None

Degrees or other qualifications granted: None

Language of lectures: Spanish

Number of trainees: Limited to 45 participants (15 for each special field)

List of library schools offering courses in library science and documentation

BUENOS AIRES

Universidad del Museo Social Argentino, Facultad de Servicio Social, Escuela de Bibliotecología (University of the Argentine Social Museum, Faculty of Social Service, School of Library Science), Corrientes 1723, Buenos Aires

Programme

1. Bibliography (general and special)
2. Cataloguing
3. Classification
4. Abstracting
5. Administration and organization
6. Theory and history of science
7. Elements of law and economics
8. Psychology of reader and development of reading

Duration of training: 2 or 3 years

Degrees or other qualifications granted: After two years: Bibliotecario
After 3 years and presentation of Master's thesis: Licenciado en Bibliotecología y Documentación

BUENOS AIRES

Universidad de Buenos Aires, Facultad de Filosofía y Letras, Carrera de Bibliotecología (University of Buenos Aires, Faculty of Philosophy and Letters, Chair of Library Science), Reconquista 572, Buenos Aires

Programme

1. Bibliography
2. Cataloguing
3. Classification
4. Abstracting
5. Documentation
6. English
7. French

Duration of training: 3 years
Degrees or other qualifications: Bibliotecario

BUENOS AIRES

Escuela Nacional de Bibliotecarios, Biblioteca Nacional, Dirección General de Cultura, Ministerio de Educación y Justicia de la Nación
(National School of Librarians, National Library, General Directorate of Culture, Ministry of Education and State Justice), Málito 564, Buenos Aires

Programme:
1. Administration
2. Advisory services
3. Cataloguing
4. Classification
5. Psychology and aesthetics of reader
6. Foreign language

Duration of training: 2 years
Degrees or other qualifications: Bibliotecario

CORDOBA

Universidad Nacional de Cordoba, Facultad de Filosofía y Humanidades, Escuela de Bibliotecarios (National University of Cordoba, Faculty of Philosophy and the Humanities, School of Librarians), Ciudad Universitaria - Pabellón España

Programme:
1. Cataloguing and classification
2. Organization and administration
3. Bibliography and abstracting
4. Assistance to readers
5. Foreign language

Duration of training: 2 years
Degrees or other qualifications: Bibliotecario
LA PLATA

Universidad Nacional de la Plata, Facultad de Humanidades y Ciencias de la Educación, Carrera de Bibliotecología (National University of La Plata, Faculty of the Humanities and Pedagogics, Chair of Library Science),
Calle 6 No 775, La Plata (Prov. Bs.As.)

Two courses are organized:

A. For librarians of university libraries

Programme
1. Cataloguing and classification
2. Foreign language
Candidates having university diploma are only admitted.

Duration of training 1 year
Degrees or other qualifications Bibliotecario Universitario granted

B. For librarians of technical libraries

Programme
1. Cataloguing and classification
2. Abstracting and bibliography
3. Foreign language

Duration of training 2 years
Degrees or other qualifications Técnico Bibliotecario granted

LA PLATA

Escuela Superior de Bibliotecología, Dirección de Enseñanza Superior media y Vocacional, Ministerio de Educación de la Provincia de Buenos Aires (Higher School of Library Science, Directorate of Advanced and Vocational Training, Ministry of Education of the Province of Buenos Aires),
Calle 46 No 483, La Plata (Bs.As.)

Programme
1. Cataloguing and classification
2. General bibliography and abstracting
3. Introduction to philosophy
4. History of culture
5. Introduction to modern culture
6. Foreign language
Duration of training: 2 years

Degrees or other qualifications granted:

**Bibliotecario**

**ROSARIO**

Universidad Popular de Rosario, Departamento de Extensión Universitaria - Section Rosario, Universidad Nacional del Litoral, Escuela de Bibliotecología (The People's University of Rosario, Department of Extension Studies - Rosario Section, National University of Litoral, School of Library Science), Santa Fé 2085, Rosario (Santa Fé)

Programme:
1. Cataloguing and classification
2. Abstracting and bibliography

Duration of training: 2 years

Degrees or other qualifications granted:

**Bibliotecario**

**ROSARIO**

Escuela de Bibliotecarios, Instituto de Profesiones Técnical "20 de Junio" - Ministerio de Educación y Cultura de la Provincia de Santa Fé (School of Librarians, Institute of Technical Professions "20th June" - Ministry of Education and Culture of the Province of Santa Fé), Moreno 965, Rosario (Santa Fé)

Programme:
1. Bibliography and abstracting
2. Cataloguing and classification (theory and practice)
3. Literature
4. English
5. French

Duration of training: 2 years

Degrees or other qualifications granted:

**Bibliotecario**

**SAN MARTIN**

Escuela de Bibliotecología, Consejo General de Educación, Ministerio de Educación y Cultura de la Provincia de Santa Fé (School of Library Science, General Council of Education, Ministry of Education and Culture of the Province of Santa Fé), San Martin 3459 (Santa Fé)
Programme

1. Cataloguing and classification
2. Bibliography and abstracting
3. French
4. English

Duration of training 2 or 3 years

Degrees or other qualifications granted
After 2 years: Bibliotecario
After 3 years: Bibliotecólogo

#### Type of training
School of Library Science.

The training is conducted along two lines: 1) librarianship, and 2) documentation, depending on the specialization chosen by the student after the first year of study, which is general for all students.

Apart from the lectures the training also includes practical exercises, visits, the Royal Library, the public library, the children's library, the university library, printing works, bookbinding works, documentation centres, document reproduction institutions, etc.

#### Conditions of admission
1) at least 18 years old;
2) leaving certificate of a secondary school

#### Are foreign participants allowed
Yes

#### Conditions of admission
Same as for Belgian students.

#### Duration of training
3 years. The fourth year of studies is optional; it is generally devoted to seminars, adaptation of the most recent methods and the preparation of a master's thesis.

#### For what kind of work are the students being trained
Technical librarians, assistants in information centres, librarians of public libraries, employees of publishing houses.

#### Examinations
Oral in: 1) Cataloguing  
2) Bibliography  
3) Classification after each year and a final examination

#### Degrees or other qualifications granted
Gradué en Sciences Bibliothéconomiques et Bibliographiques or Bibliothéconomiques.
thécaire Documentalistes (depending on the selected line of studies) after three years. A Masters' Diploma may be conferred after the fourth year.

**Language of lectures**
French, Dutch

**Tuition fees**
An entrance fee of 100 BF is obligatory and 100 BF for each year of studies.

**Number of trainees**
French 10, Dutch 6

b) Option: Science
1. Statistics  36
2. Physics and mathematics  108
3. Chemical sciences  72
4. Industrial technology  72
5. Natural sciences  72
6. International law  36
7. Physical geography  36

II. Technical course
1. Library science - theory  108
2. Practical exercises  72
3. Organization of documentation services  72
4. Reference work and bibliographies  90
5. Seminaries on special subjects  36

III. Languages
1. Dutch  72
2. English: option Humanities  108
3. English: option Science  108
4. German  72
5. Russian or Spanish or Italian  72

IV. Practical training: 1 month

Third year
During the third year the students continue to improve their languages and go deeper into various questions relevant either to centres
of scientific and technical documentation or to general libraries devoted to the humanities.

Courses and practical training interchange in order to permit the drafting of a final report of the studies on a question on library science.

I. Common course

</table>

Are foreign participants allowed? Yes

Conditions of admission Same as for Belgian students

Duration of training 3 years (full-time)

For what kind of work are the students being trained Scientific and technical librarians
Examinations
Oral and written examinations after each year of study and final examination

Degrees or other qualifications granted
Diplôme de Bibliothécaire-Documentaliste

Language of lectures
French

Tuition fees
500 BF/year

Number of trainees
In September 1967: 9 graduates
In September 1968: 10 graduates

Other data
Lectures on automatic documentation are intended.

LIEGE
Université de Liège, Bureau d'Organisation Technique (B.O.T.) (University of Liège, Bureau of Technical Organization),
55 Avenue des Tilleuls, Liège
Director: (Mme) E. Sauvenier-Goffin
Year of foundation of the course: 1964

Programme
1. The organization of documentation: international, national and specialized institutions
2. Conventional files and bibliographies: principles, terminology, advantages and disadvantages; updating, production, dissemination, and translation problems
3. Mathematical and physical bases for documentation techniques
4. Traditional indexing - key-words and descriptors
5. Classification systems
6. Thesaurus - documentary languages
7. General principles of "file" organization
8. Types of "file" organization, conventional and new storage devices (various types of card, punched tapes and cards, magnetic storage devices, films)
9. Data storage for various devices, equipment used, advantages and disadvantages
10. Searching
11. Storage of text
12. Automatic searching (by computers, by photographic selectors): general principles, types of memory system, sample programmes
13. Mechanized production and printing of bibliographic tools - machines for handling tapes and cards, photo-listing machines, and computers. Examples of indexes and current bibliographies
14. Automatic reading - prospects
15. Mechanized systems applicable to library and documentation work in a university
16. Modern reproduction systems
In addition to the lectures, practical exercises are given to show how to handle the various types of file, as well as the machines used at the B.O.T., such as:

1. An IBM 870 Document Writing System (with 836 control unit, 866 typewriters, and 961 tape punch). This machine can produce punched-card, 8-channel paper tape, and printed document output; it can convert paper tape to card and vice-versa; it can be programmed by card punch keyboard; function and format are determined by control panel wiring.

2. A Flexowriter 2201 (8-channel paper tape) with auxiliary reader, formats and selective printing can also be programmed.

<td>Other information</td>
<td>The Computation and Information Processing Centre of the University (&quot;Centre de Calcul et de Traitement de l'Information&quot;, &quot;CECTI&quot;) has organized its own advanced courses in computer technology, FORTRAN programming and machine language. Its team of computer engineers and mathematicians co-operate with the various university departments in solving their specific problems. In its task of organizing the gradual conversion of the university libraries into documentation units, the staff of B.O.T. work in close connection with the staffs of the various documentation units and provide practical training.</td>

BRAZIL

Besides the courses organized by the Brazilian Institute of Bibliography and Documentation there are no separate courses in documentation in Brazil. The subject is only taught in library schools. There are 14 library schools in Brazil which are listed below: 12 schools in universities, two independent. They provide training in library and documentation. "Documentation" is one among ten disciplines that all schools are obliged to teach since 1962. "Documentation" is taught in one year, generally in the third year.

The Ministry of Education and Culture obliges all universities to have a "curriculum minimum". Schools, therefore teach other disciplines but respect the "curriculum minimum". All library schools in Brazil have a three-year curriculum with daily attendance from 1st March to 15th December.

"Curriculum minimum"

1. History of books and libraries
2. History of literature
3. History of art
4. Introduction to historical and social studies
5. Evolution of philosophy and scientific thought
6. Libraries, organization and administration
7. Cataloguing and classification
8. Bibliography and reference
9. Documentation
10. Palaeography

Programme of documentation

1. Library science and documentation
2. Concepts of documentation and documents
3. Documentation, bibliography, study of archives and museums, etc.
4. Documentation and information, theory of information
5. Classification of documents
6. Graphic documentation, origin, objectives, importance and concepts
7. Documentation and bibliographic organization
8. Documentation as production, assembly and diffusion of graphic records
11. Preparation of documents. Format of the paper. Editing
12. Assembly of documents
13. Universal Decimal Classification. FID/CCC and IBBD/CDU
14. Essential elements of documentation: library, archives, film files, disc files, map files
15. Diffusion of documents

ERI
16. Bibliographies and bibliographic indexes. Microfilms and microcards. Translations
17. Reproduction of documents
19. Mechanical selection of documents
20. Storage and retrieval of information
21. Abstracting, reference, cataloguing, etc., services
22. Applied bibliographic research
23. Documentation on the national plane. IBBD
24. Documentation on international plane. FID
25. Organization and administration of documentation services and centres
26. Specialized bibliography on documentation

Universidade do Paraná, Curso de Biblioteconomia e Documentação,
Rua General Carneiro 460, Curitiba, Paraná
Library science and Documentation
Degrees or other qualifications: Diploma de Bibliotecario-Documentação granted

FORTALEZA

Universidade de Ceará, Curso de Biblioteconomia e Documentação,
Fortaleza, Ceará
Library science and Documentation
Degrees or other qualifications: Diploma de Bibliotecario granted

NITERÓI

Universidade Federal do Estado do Rio de Janeiro, Escola de Biblioteconomia,
Rua Coronel Gomes Machado 74, Prédio da Reitoria da Universidade Federal
do Estado do Rio de Janeiro, Niterói, Estado do Rio de Janeiro
Library science
Degrees or other qualifications: Diploma de Bibliotecario granted

PÔRTO ALEGRE

Universidade do Rio Grande do Sul, Escola de Biblioteconomia e Documentação,
Avenida João Pessoa 52, Porto Alegre, Rio Grande do Sul
Library science and Documentation
Degrees or other qualifications: Bacharel em Biblioteconomia granted

RECIFE

Universidade do Recife, Curso de Biblioteconomia e Documentação,
Avenida Conselheiro Rosa e Silva 1350, Recife, Pernambuco
Library science and Documentation
Degrees or other qualifications: Diploma de Bibliotecario-Documentação granted
Instituto Brasileiro de Bibliografia e Documentação - IBBD (Brazilian Institute of Bibliography and Documentation), Av. General Justo 171, térreo, 3º e 4º andares, Rio de Janeiro, Guanabara

President: Prof. C. Ribeiro Zaher

Course in scientific documentation

Programme

Academic subjects:
1. Philosophy and history of science
2. Cultural anthropology
3. Introduction to social sciences
4. Communication theory

Technical subjects:
1. Information analysis and control
2. Techniques of bibliographical research
3. Mechanization of information systems
4. Classification
5. Cataloguing
6. Organization and administration of information services
7. Reprography

Type of training
Course of scientific documentation

Conditions of admission
University degree

Are foreign participants allowed
From South American countries

Duration of training
9 months

For what kind of work are the students being trained
Documentalists, information workers, research workers, librarians

Examinations
Practical work, monthly. Two final examinations

Degrees or other qualifications granted
Certificate of specialization in scientific documentation

Language of lectures
Portuguese

Tuition fees
Free

Number of trainees
Since 1955: 285

The course of scientific documentation was created in 1955, and since then has had the following specializations: technology, medical sciences, physics and mathematics, agricultural sciences, geology, chemical sciences, social sciences, natural sciences.
RIO DE JANEIRO
 Curso de Biblioteconomia da Biblioteca Nacional,  
Avenida Rio Branco 219/239, Rio de Janeiro, Guanabara
Library science
Degrees or other qualifications: Diploma de Bibliotecário

RIO DE JANEIRO
Pontifícia Universidade Católica de Rio de Janeiro, Escola de Biblioteconomia e Documentação "Santa Ursula",  
Rua Farani 75, Botafogo, Rio de Janeiro, Guanabara
Library science and Documentation
Degrees or other qualifications: Diploma de Bibliotecário-Documentalista

SALVADOR
Universidade da Bahia, Escola de Biblioteconomia e Documentação,  
Avenida Aradjo Pinho 22, Salvador, Bahia
Library science and Documentation
Degrees or other qualifications: Bacharel em Biblioteconomia

SAO CARLOS
Escola de Biblioteconomia e Documentação de São Carlos,  
Avenida Dr. Carlos Botelho 1465, São Carlos, São Paulo
Library Science and Documentation
Degrees or other qualifications: Diploma de Bibliotecário-Documentalista

SAO PAULO
Universidade de São Paulo, Escola de Biblioteconomia da Fundação Escola de Sociologia e Política de São Paulo,  
Rua General Jardim 522, Caixa Postal 7656, São Paulo
Library science
Degrees or other qualifications: Bacharel em Biblioteconomia

Two years

Librarians of university and college, public, school and special libraries
Master of Library Science

English

$640 (including library visits)
$300 for students from McGill University

Scholarships:
1) Two annual scholarships of $400 each in honour of Dr. G.B. Lomer, former Director of the Library School
2) The Groller Society Scholarship, $250 alternate years
3) The Ethelwyn M. Crossley Scholarship Fund, founded in honour of a former student of the school. Women students are given preference
4) The Elizabeth G. Hall Scholarship Fund, founded in memory of a former member of the McGill University Library staff
5) McGill University Library School Alumni Scholarship, $300

These awards are made, after due investigation and recommendation, to deserving students who require financial assistance to take the course. Application should be made to the Director of the School before May 1.

MONTREAL

Université de Montréal, Ecole de Bibliothéconomie (University of Montreal, School of Librarianship),
C.P. 6128, Montreal 3
Director: L.-G. Denis
Year of foundation of the courses: 1961

POSTGRADUATE

The School of Librarianship provides one or two year full-time courses
Course of one year

Programme

1. Librarianship 45
2. Library internal services:
   selection of documents 45
3. Library internal services:
   classification and cataloguing 45
4. Library external services 45
5. Cultural role of the book and of libraries 45

Optional courses
A 1. Reference and bibliography - basic sciences and applied sciences 45
A 2. Reference and bibliography - social sciences 45
A 3. Reference and bibliography - human sciences 45
B 1. Public libraries 30
B 2. Public libraries for children 30
B 3. School libraries 30

B 5. University libraries 30
B 6. Special libraries 30
B 7. Organization and work of the cataloguing service 30
B 8. Audio-visual documents 45
B 9. Official documents 45
B 10. Books and reading for children 30
B 11. Books and reading for adolescents 30
B 12. Books and reading for adults 30
B 13. Indexing 15
B 14. Electronic systems for processing of information in libraries 30

Course of two years

Programme

First year
1. Librarianship 45
2. Cultural role of the book and of libraries 45
3. Library internal services 45
4. Economic and social development of Canada 30
5. Introduction to Canadian-French literature 15
6. Practical work on Canadian literature 15
7. Structure and methods of sciences 30
8. Elements of administration and organization 45
9. Fundamentals of sociology 30
10. Social organization and culture of the Province of Quebec 30
Second year
1. Internal services of the library: selection of documents 45
2. Internal services of the library: classification and cataloguing 45
3. Introduction to Canadian-English literature 15
4. Canadian political institutions 30
5. Introduction to computers 45

Optional courses
C 1. Reference and bibliography - basic sciences and applied sciences 45
C 2. Reference and bibliography - social sciences 45
C 3. Reference and bibliography - humanities 45
D 1. Public libraries 30
D 2. Public libraries for children 30

D 6. Special libraries 30
D 7. Organization and work of the cataloguing service 30
D 8. Audio-visual documents 45
D 9. Official documents 45
D10. Books and reading for children 30
D11. Books and reading for adolescents 30
D12. Books and reading for adults 30
D13. Indexing 15
D14. Electronic systems for processing of information in libraries 30

Type of training
Academic study in Library Science, Information Science is offered as part of the Library Science curriculum

Conditions of admission
B.A. or acceptable higher university degree

Are foreign participants allowed
Yes

Conditions of admission
Knowledge of French and English and graduation from a university

Duration of training
One or two years full-time

For what kind of work are the students being trained
Scientific and technical librarians, specialists in classification

Examinations
During the education and final written examinations from most subjects listed in the programme
Degrees or other qualifications: B.Bibl. (Baccalauréat en Bibliothéconomie)

Language of lectures: French

Tuition fees: $430 per year

Financial aid for trainees: 4 scholarships of $400 to $450 each

Number of trainees: 53 graduates (1967/68)

OTTAWA

University of Ottawa, Library School,
Ottawa, Ontario

Director: A.-M. Morisset, O.M.I., B.A., L.D.C., B.L.S. (Col.), M.L.S.

Year of foundation of the School: 1938

POST-GRADUATE

The Library school offers two programmes: one leading to the Bachelor of Library Science degree; the other to the Master of Library Science degree.

Programme

A. leading to the B.L.S. degree

1. Introduction to library science
2. Cataloguing and classification
3. Reference work and bibliography
4. History of books, printing and libraries
5. Communication and the library
6. Technical services
7. Bibliographical and research methods
8. School, children's and youth libraries
9. College and university libraries
10. Hospital libraries
11. Special libraries
12. Literature of the humanities
13. Literature of the social sciences
14. Literature of the sciences
15. Library organization and administration
16. Book selection and reading interests
17. Serials and government publications

Practical work:
- Each student is required to undertake supervised library work for one hour a week.
- Each student taking the full-time course is required:
  a) to have acquired approximately four weeks of supervised library experience before the end of the second semester
  b) to have completed during the second semester two continuous weeks of supervised practice work in a library before graduation.
B. Leading to the M.L.S. Degree

1. Palaeography E*
2. Archives E
3. Bibliography and biblio-sociology
4. Cultural development of Canada
5. Research in librarianship E
6. Documentation E

Aims and procedures, indexing, abstracting, information of bibliographical work, utilization of recorded knowledge

Type of training

Academic study in library science

Conditions of admission

A. Bachelor's degree or its equivalent, obtained from a recognized university or college
   - Each candidate must submit to an interview with a representative of the School
B. Master of Library Science - a Bachelor of Library Science is a prerequisite
   - Some knowledge of Latin and other languages is desirable

Are foreign participants allowed

Yes

Same as Canadian students but candidates whose mother language is neither English nor French must undergo special tests.

Duration of training

B.L.S. - two semesters
M.L.S. - one year

For what kind of work are the students being trained

Librarians, special librarians, documentalists

Examinations

B.L.S. - semester and final written examination
M.L.S. - Master's thesis

Degrees or other qualifications granted

Bachelor of Library Science, Master of Library Science

Degree requirements:

a) Requirements for degrees are based upon the point or credit system of describing the student's course work. A credit is allotted to each semester-hour of lecturing (15 one-hour lectures)

b) The Bachelor of Library Science degree requires 30 credits and

---

*Two elective courses are required. These are indicated by the letter E following the course number.
The Master of Library Science degree requires 36 credits including the 30 taken for the Bachelor of Library Science degree. In addition, the candidate must present a thesis.

The time limit allowed for part-time students for the completion of requirements for the degree of Bachelor of Library Science is five years.

The time limit allowed for the completion of requirements for the degree of Master of Library Science is three years.

Language of lectures

French and English

Tuition fees

For B.L.S. - $518,
for M.L.S. - $418
Direction of theses $100

Financial aid for trainees

Scholarships and Bursaries:

a) The Grolier Society of Canada Ltd. - $100
b) Les Editions Francaises Inc. (Larousse) - $300 (three bursaries of $100 each)
c) Luxfer Ltd., London, England - $100
d) Morrison-Lamothe Bakery Ltd. - $100
e) Ontario Department of Education Provincial and Dominion-Provincial Student-Aid Bursaries, Type B. Maximum value $500. Apply after registration in September.
f) Government of the Province of Quebec Bursaries. Maximum $500, renewable for candidates resident in the Province of Quebec for 5 years (60% grant, 40% loan). Applications concerning the bursaries are obtainable at: Le Service de l'Aide à la Jeunesse, Section des bourses, 30 rue Saint-Louis, Quebec, P.Q. Application for renewal should reach the Office of the Registrar before August 15.
TORONTO

University of Toronto, Library School, Ontario College of Education,
371 Bloor Street West, Toronto 5
Director: Prof. B. Bassam
Year of foundation of the School: 1928

POST-GRADUATE

Course leading to the degree of Bachelor of Library Science

Programme

Required subjects
1. Library collections
2. Library collections in special fields
3. Bibliography and reference materials
4. History of books and printing
5. Cataloguing
6. Classification
7. Library records and methods of procedure
8. Contact with readers and advisory services
9. Library service
10. Library administration

Elective subjects
1. Literature for boys and girls
2. Story telling
3. Literature for young people
4. Modern fiction
5. Bibliography
6. Advanced cataloguing
7. Advanced classification
8. Libraries for boys and girls
9. College and university libraries
10. Public libraries
11. School libraries
12. Special libraries

Course leading to the degree of Master of Library Science

Programme

1. Bibliography and reference service: books and materials
2. Bibliography and reference service: methods
3. Cataloguing and classification
4. College and university library collections
5. College and university library administration
6. Public library collections
7. Public library administration
8. Special libraries
9. Government publications
10. History of books and printing
Type of training
Graduate library school

Conditions of admission
1) A candidate for the degree of B.L.S. must be a graduate of an approved university
2) A candidate for the degree of M.L.S. must hold the degree of B.L.S. from this University, or its equivalent from an accredited library school
A reading knowledge of one modern language is required

Duration of training
1) B.L.S. - one year
2) M.L.S. - one year

For what kind of work are the students being trained
University, school, business, science, technical, government, hospital, newspaper and public librarians

Examinations
During the studies and final examinations. A research project must be presented for the M.L.S. degree

Degrees or other qualifications granted
Master of Library Science (M.L.S.)

Language of lectures
English

Tuition fees
B.L.S. - men $303, women $278
M.L.S. - men $475, women $455

Financial aid for trainees
Scholarships:
1) The Winifred G. Barnstead Scholarship
2) The Grolier Society of Canada Scholarship
3) The Anne Hume Bursary
4) The Ontario Federation of Home and School Associations
5) The Ontario Dept. of Education
6) The George H. Locke Memorial Scholarship

### Type of training

Academic study in library science. Information science is offered as part of the library science curriculum.

### Conditions of admission

- For Bachelor of Library Science programme: graduation with satisfactory standing from a regular university degree course approved as to entrance requirements and course content.
- For the Master of Library Science programme: B.L.S. degree from the University of Toronto with at least second-class standing or its equivalent from an approved library school.

* = Half-year courses
Are foreign participants allowed

- A limited number of foreign students is accepted.

Conditions of admission

- Reference is given to those who have high academic standing and who do not have facilities for library education in their own countries.

Duration of training

- B.L.S. programme: full-time, Sept.-May (35 weeks) (no part-time students).
- M.L.S. programme: full-time, Sept.-April (30 weeks) (part-time students accepted).

For what kind of work are the students being trained

- Subject information specialists, specialists in classification, cataloguing, reference, bibliography and the mechanization of library processes and procedures. Special librarians including scientific and technical librarians.

Examinations

- Written examinations (depends on individual course) and final examinations for half-year courses.

Degrees or other qualifications granted

- Bachelor of Library Science degree.
- Master of Library Science degree.

Language of lectures

- English.

Tuition fees

- B.L.S. programme: men $303, women $278.

Financial aid for trainees

- Various scholarships, fellowships, and government loans and bursaries are available for Canadian students and landed immigrants. Financial assistance is not generally available to newly-admitted overseas students. Foreign students should be prepared to meet their expenses from their own resources.

Number of graduates

1967/68:
- B.L.S. graduates 191
- M.L.S. graduates 886
VANCOUVER

The University of British Columbia, School of Librarianship,
Vancouver B

Director: Dr. S. Rothstein

</tr>
</tbody>
</table>

Type of training

Academic study in library science. Information science is offered as part of library science curriculum. Courses are offered in the School of Librarianship, a department of the Faculty of Arts

Conditions of admission

Graduation from a recognized university with second class standing and two years of a foreign language at the university level

Are foreign participants allowed

Yes

Duration of training

One academic year

For what kind of work are the students being trained

Scientific and technical librarians

Examinations

Written final examinations in all courses taken

Degree or other qualifications granted

Bachelor of Library Science

Language of lectures

English

Tuition fees

$503/year
Financial aid for trainees

Government of British Columbia scholarships, Government bursaries, Canada student loans, National Research Council of Canada fellowships, Civil Service Commission fellowships

Number of trainees

1967/68 - 84 degrees awarded

Other data

Occasional workshops and seminars for working librarians have been offered. No more than one or two per year

Plan for other types of course in 1969-1970:

Expansion to a two-year curriculum leading to the Master of Library Science degree (M.L.S.) is in the planning stages, with a target date of 1970/71
COLOMBIA

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

MEDELLIN

Escuela Interamericana de Bibliotecologia, Universidad de Antioquia (Interamerican School of Library Science, University of Antioquia), Medellin

GRADUATE Programme

1. Documentation and its aims
2. Scope of documentation
   a) special documentation
   b) the library
   c) documentational, administrative and historical archives
   d) museums
   e) bibliographies and non-bibliographical material
   f) encyclopedias
3. Methods of documentation
4. Documentation centres
5. History of documentation
   a) origin
   b) documentation in Europe and North America
   c) documentation in Latin America
   d) documentation in Colombia
6. International organizations of documentation
   a) FID
   b) IFLA
7. The document, its kinds and forms
8. Classification and document retrieval
9. Bibliographical service and writing of information reports
   a) kinds of indexes
   b) information publications
   c) translations
   d) information service
10. Reproduction of documents and their production
    a) typography
    b) secondary documents
    c) other methods
11. Mechanical selection
    a) perforated cards
    b) cards with perforated edges
    c) other methods
12. National bibliography and information centres
13. Sources of documentation in Latin America
   a) present state
   b) means of utilization
14. Stages of work in documentation
15. Teamwork
   a) organization
   b) work standards

</tbody>
</table>
La Biblioteca Conmemorativa Orton del IICA, in Turrialba offers each year course for persons working in the libraries of national institutions as for example, Ministry of Agriculture, Faculty of Agricultural Sciences, experimental stations of other agricultural institutes.

Director: O. Lenvayova

Duration of training: 6 months
Number of trainees: 8 per annum
The Institute of Documentation and Scientific and Technical Information (IDICT) organized a series of conferences in 1964 for the personnel of information centres. The subjects covered by the lectures were as follows:

1. Information and documentation, their significance to the development of science and technology
2. Actual problems of the methodology of information and documentation
3. Primary sources of information:
   - scientific and technical literature
4. Secondary sources of information:
   - abstracts journals

Additional Information

The IDICT and the "José Martí" National Library organized training courses in 1965 for the personnel of information services and librarians of special libraries.

The opening of a Library School at the University of Havana is also being planned, at which lectures are to be held on documentation and information.

**Type of training**  
Post-graduate extra-mural study

**Conditions of admission**  
The course is intended for graduates in other branches than librarianship. Previous activity in the field of scientific information is required.

**Are foreign participants allowed?**  
No

**Duration of training**  
Two years (four terms)

**For what kind of work are the students being trained?**  
Information specialists and technical librarians

**Examinations**  
During the training and final

**Language of lectures**  
Slovak

**Number of trainees**  
30

**Other data**  
Besides post-graduate studies at the Charles University in Prague, Chair of librarianship and scientific information, and the Comenius University in Bratislava, Chair of librarianship and scientific information, lectures on information science are also included in the programmes of full-length five-year courses of librarianship, such as "Theory and history of bibliography of scientific information" and "Theory of scientific information" (total 30 hours with a final examination after the third term).

**BRATISLAVA**

**Střední knižnictví škola (School of Librarianship), Bratislava**

Year of foundation: 1966/67
NON-GRADUATE

Programme

1. Elements of Marxism-Leninism
2. Russian
3. English
4. Third modern language
5. Librarianship
6. Bibliography
7. Organization of book collections and catalogues
8. Economics and organization in special areas
9. Elements of production processes
10. Practical training in a library
11. Office work techniques
12. Physical training

Optional
- Latin
- Conversation in a modern language

Practical training course
- 1st year: 4 weeks in a scientific library
- 2nd year: 4 weeks in special libraries and information centres;
  4 weeks of vacation course in scientific and special libraries

Compulsory
- Librarianship, Bibliography, Economics and organization in special areas

Optional
- Organization of book collections and catalogues
- Elements in production processes

Type of training: School of Librarianship including courses in technical and economic information

Conditions of admission: Secondary or technical school certificate
Entrance examination in Slovak and mathematics

Are foreign participants allowed: No

Duration of training: Two years, full-time course

For what kind of work are the students being trained: Information workers

Examinations: During the training and final

30

PRAGUE

Strojirenský Informační Ústav (Engineering Information Institute), Jungmannova ul., Praha 1
Director: J. Kugler, Dipl. Eng.
Year of foundation of the courses: 1961

Programme

First degree course
1. Organization of the Czechoslovak industry
2. Organization of scientific, technical and economic information in heavy industry
3. History of librarianship in Czechoslovakia
4. Types and evaluation of sources of information
5. Acquisition of information holdings
6. Handling of information holdings (library type handling)
7. Introduction to classification and Universal Decimal Classification
8. Handling of information holdings (cataloguing of documents)
9. Work with the user of information
10. Organization of work in departments of technical and economic information
11. Equipment for departments of scientific, technical and economic information
12. Final discussion
Total number of hours: 42

Second degree course
1. Tasks of the development of science and technology
2. Elements of organization of technical and economic information under the Ministry of Heavy Industry
3. Organization of scientific and economic information abroad
4. Experiences in the organization of scientific, technical and economic information in some foreign countries
5. Systems of the classification of information
6. Literature searching, writing technical and analytical reports
7. Patents and standards as sources of information
8. Industrial technical liaison work
9. Exploitation of economic propaganda
10. Publishing activities
11. Reproduction devices for scientific, technical and economic information
12. Mechanization and automation of scientific, technical and economic information
13. Final discussion

Total number of hours: 44

Third degree course

1. Tasks of the information network system under the Ministry of Heavy Industry
2. Concept of the Czechoslovak system of scientific, technical and economic information
3. Authors and copyright law
4. Scientific, technical and economic information and technical development
5. Authors and copyright law in scientific, technical and economic information
6. Reproduction techniques
7. Marketing
8. Acquisition of non-commercial literature
9. Theory of scientific and technical information
10. Writing technical reports
11. Orthographic and morphological subtleties
12. Style in the Czech language
13. Management Information
14. Effectiveness of information in regard to the user
15. The state of art of Universal Decimal Classification
16. Theory of thesauri
17. Psychology of management
18. Computer-type devices
19. Psychology of scientific, technical and economic information
20. Punched cards in the special information centre of the State Institute of Material and Technology
21. Dissemination of scientific and technical information
22. The KWIC System used in the Research Institute of Ferrous Metallurgy
23. Programming for computers
24. Explanation of the ARDIS system
25. Visits
26. Final discussion and evaluation of the course

Total number of hours: 200

Type of training: Courses of scientific, technical and economic information

Conditions of admission: Higher school certificate and practical experience in information work

Are foreign participants allowed? Yes

Type of training: Courses of scientific, technical and economic information

Conditions of admission: Higher school certificate and practical experience in information work

Are foreign participants allowed? Yes
Duration of training: First and third level courses in scientific, technical and economic information, organized in five 5-day sessions at monthly intervals.

For what kind of work are the students being trained: Information workers.

Examinations: During the training and final.

Degrees or other qualifications granted: Certificate.

Language of lectures: Czech.

Number of trainees: 90.

PRAGUE

Ústřední Vedeckých, Technických a Ekonomických Informací, Státní Technická Knihovna (Central Office of Scientific, Technical and Economic Information, State Technical Library), Klementinum, Praha 1

Director: A. Derfl, Ph.D.

Year of foundation of the course: 1968.

Programme: hours

1. Development of science and technology and principles of organization and economics of the Czechoslovak Industry 5
2. Organization of scientific, technical and economic information in CSSR and abroad 10
3. Organization of the Central Office of Scientific, Technical and Economic Information 5
4. Sources of Information, their types and nature 5
5. Acquisition of Information 5
6. Registration, establishment and storage of Information holdings and their protection. Revision of library collections 5
7. Descriptive cataloguing of Information 10
8. Classification of Information 30
9. Elements of bibliography 5
10. Methodology and techniques of documentation work 5
11. Use of sources of Information 5
12. Patent and standard literature 15
13. Methods and techniques of literature searching 10
14. Writing technical reports and analytical activities 5
15. Marketing of scientific and technical information 5
16. Internal editorial activities of information centres 5
17. Copyright law in scientific, technical and economic information 5
18. Use of reproduction techniques in scientific, technical and economic information
19. Use of computers in scientific, technical and economic information
20. Visits

The visits are intended to cover:

1) the overall activity in scientific, technical and economic information:
   - The Centre of Scientific, Technical and Economic Information - State Technical Library - The Specialized Branch of Centre
   - The specialized field information centre

2) patent documentation:
   - The Office for patents and inventions or selected patent information centres

3) reproduction techniques
4) mechanization and automation

Type of training: Course in information science
Conditions of admission: Higher school certificate and practical experience in information work
Are foreign participants allowed: No
Duration of training: One year (185 hours)
For what kind of work are the students being trained: Information workers
Examinations: During the training and final

Language of lectures: Czech
Number of trainees: 50
Other data: State Technical Libraries in Plzeň, Liberec, Hradec Králové, České Budějovice, Brno and Ostrava organize courses with syllabuses provided by the Central Office of Scientific, Technical and Economic Information - State Technical Library; these courses on scientific, technical and economic information are for information workers in their respective fields.
Plans for other type of courses in 1969-70:

The Central Office for Scientific, Technical and Economic Information (State Technical Library) also prepared a proposal for a syllabus for a three-months course for workers in technical libraries:

Total 58 hours

Visits:
- State Technical Library
- Specialized branch or field centre of scientific, technical and economic information

Specialized advanced courses are organized for holders of the general certificate who have already passed the one-year course (in exceptional cases also for other suitable workers in information work). They will be specialized:

a) according to professions (technical analysts, documentalists)

b) according to the subject.

These courses are to have a special syllabus prepared for each individual course. They can be organized either as extra-mural studies, as a series of lectures or intensive course. They will always meet the needs of information practice and aim at topical problems. The content of the courses of this type, their organization and the lectures will be chosen individually for each course.
DENMARK
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION
COPENHAGEN

Dansk Teknisk Litteraturselskab (The Danish Society for Technical Literature),
Øster Voldgade 10, Copenhagen K

Course in scientific and technical documentation

Programme
1. Library service in industrial enterprises and institutions
2. Bibliography and technique of bibliographical searching
   subdivided into:
   a) Mathematics, physics
   b) Chemistry, chemical technology
   c) Mechanical technology
   d) Electronics, electrical technology
   e) Materials handling
   f) Biology, bio-technology
   g) Medicine, pharmacology, veterinary science
   h) Agriculture
   i) Economics, administration
3. Information and documentation. Systems of Information
4. Storage and retrieval of information
5. Communication of information by such means as report writing, reprography, oral communication
6. Visiting information centre
7. Study tour of a European country with advanced information centres

Type of training
Course

Conditions of admission
Academic degree in various fields of study
3-5 years professional practice
Knowledge of two foreign languages

Duration of training
240 hours for a period of 9 months
Lectures and exercises two full days every three weeks

For what kind of work are the students being trained
Documentalists

Examinations
A compulsory final examination

Degrees or other qualifications granted
A diploma

Language of lectures
Danish

Tuition fees
3500 DKr

Number of trainees
20 per year
COPENHAGEN

Denmark's Library School,
Birketinget 6, 2300 Copenhagen S

Course for industrial librarians and assistants

Programme
1. The purpose of a library and its place in an enterprise
2. Contents of library collections
3. Handling of the library material
4. Utilization of the library
5. Public libraries and documentation centres
6. Reference and information collections

Type of training
Instructive course

Conditions of admission
For staff members of industrial and institutional libraries

Duration of training
90 hours for a period of 19 days

For what kind of work are the students being trained
Librarians of special libraries

Examinations
None

Degrees or other qualifications granted
None

Language of lectures
Danish

Tuition fees
250 Dkr

Number of trainees
Approx. 25 a year
FINLAND
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

HELSINKI

Suomen Kirjallisuuspalvelun Seura - Samfundet för Litteraturtjänst i Finland (The Finnish Association for Documentation), Lännenrätintaka 37, Helsinki

Courses are arranged to train documentalists

**Type of training**
- a) Bibliography courses - with emphasis on theoretical and practical knowledge of bibliography, and
- b) Classification courses with emphasis on the use of the UDC

**Duration of training**
1-2 weeks

**For what kind of work are the students being trained**
Information service personnel and staff of technical and special libraries

**Language of lectures**
Finnish

ADDITIONAL INFORMATION

Finnish information service personnel also take part in the courses arranged by the Scandinavian Council for Applied Research.
FRANCE

Type of training

- School of documentation techniques

Conditions of admission

- Leaving certificate of a secondary school (baccalauréat) or its equivalent
- Entrance examination (except for candidates having a leaving certificate from a university)
- at least 18 years old

Are foreign participants allowed?

Yes

Duration of training

Two years
For what kind of work are the students being trained

Information scientists, subject information specialists, specialists in the particular part of information processes, e.g., specialists in classification, abstracting, mechanization etc., scientific and technical librarians

Examinations

Entrance, during the course, and final

Degrees or other qualifications granted

A diploma

Language of lectures

French

Tuition fees

600 F. per year

Number of trainees

98 graduates in 1967

PARIS

Ecole de Bibliothécaires-Documentalistes (School of Librarians - Documentalists), 21, rue d'Assas, 75 Paris 6ème

Director: (Mme) M. Raffy

Year of foundation of the School: 1935

NON-GRADUATE

Course for librarians and documentalists

Programme

1. History of books and printing
2. History and administration of libraries
3. Cataloguing
4. Classification
5. Information and reference services:
   a) organization of materials for use
   b) photoreproduction of library materials
   c) selection of documents
6. Bibliography
7. General knowledge
8. Visits to libraries and modern special libraries

Practical work:
- During the first year of training, students are engaged in the practical work in libraries 2 or 3 times a week
- Practical work in special libraries is compulsory during the second year

Type of training

School of Librarianship and Documentation
Conditions of admission

Are foreign participants allowed?
- Yes

Conditions of admission

Duration of training
- Two years (one year for graduates)

For what kind of work are the students being trained?
- Librarians, special librarians and documentalists

Examinations
- Entrance, after first year of course and final

Degrees or other qualifications granted
- Diplôme de l'Ecole

Language of lectures
- French

Tuition fees
- 1500 F. per year

Number of trainees
- 30

Course for assistant librarians or documentalists

Year of foundation: 1967

Programme
1. Information, its evolution
2. Libraries and special libraries
3. Different types of documents
4. Technique of books and different types of documents
5. Bibliography
6. Cataloguing of different types of documents
7. Classification
8. Selection of documents
9. Organization:
   a) equipment of premises
   b) filing of documents, loan
   c) reprography
   d) microfilms and microcopies
10. Public relations
11. History of the book

Type of training
- Evening course (3 times a week)

Conditions of admission
- Baccalauréat or equivalent and entrance examination

Duration of training
- One year

Examinations
- Entrance, after first year and final
Union Francaise des Organismes de Documentation (UFOD) (French Union of Documentation Organizations), 16, rue Jules-Clarté, 75 Paris 16ème
Director: J. de Laclemandiere and (Mme) F. Cestac
Year of foundation of the courses: 1944

A. Training course

Programme

First year

UFOD's teaching is based on five functions of documentation:

1. Detection
   Characteristics of the times we live in. The limits of information - The concept of information - Group communication - Creativity and research, etc.

2. Identification
   Image - Reading - The notion of "document" - Cataloguing - Filing, etc.

3. Abstracting
   Indexing - Abstracting - Data synthesis - Linguistics - Translation

4. Dissemination
   Temporary communication - Circulation of documents - Loans - Exchanges - Permanent communication - Operational survey of the users' needs - Reprography - Printing techniques, etc.

5. Storage and retrieval
   Classification - Retrieval - Computer technology - Storage - Human engineering - Documentation sciences - Criteria of documentary efficiency

In 60 lessons, totalling 6400 pages of mimeographed text with 335 tables, 1340 figures and 5430 bibliographical references, the above points are studied. All topics are connected with studies and practical exercises which constitute the real and positive elements of a dialogue between the students and the school management.

Type of training
Training course

Conditions of admission
No certificate is required (though the baccalauréat level is necessary), but a knowledge of foreign languages is obligatory.

Are foreign participants allowed
Yes
Conditions of admission
Good knowledge of French language

Duration of training
1. Paris oral courses: two semesters per year including:
   a) three times a week for eight months
   b) three weeks "on the job" period organized in member firms of UFOD
   c) visits to documentation centres
2. Correspondence courses: two semesters per year including:
   a) studies and practical exercises
   b) a ten-days period at the Cercle Culturel de Royaumont in the UFOD Library

For what kind of work are the students being trained
Information scientists, subject information specialists, specialists in the particular part of information processes, e.g.: in classification, in abstracting, in mechanization, etc. In principle, courses are for students or people already working in documentation centres, who wish to improve their knowledge of documentation techniques

Examinations
Final and selective examination as a condition of receiving a degree in documentation

Degrees or other qualifications granted
Brevet de Documentation

Language of lectures
French

Tuition fees
1. Paris oral courses: 1800 F. per semester
2. Correspondence courses: 1800 F. (including the ten-days stay in Royaumont)

Number of trainees
350 for two semesters per year including the Paris courses and correspondence courses

Second year
Advanced studies in information science
1. Behavioral and social sciences
   a) psychology (individual and group behaviour)
   b) psychotechnics
   c) sociology
2. Information technology
   Computers:
   - applications
   - programming
   - mathematics of computation
   - design and construction
   - analogue computers

3. Graphical arts
   a) image
   b) typography
   c) advertising
   d) semiotics - semiology

Type of training: Training (advanced level)

Conditions of admission: Graduate - 1st year "Brevet de Documentation"

Are foreign participants allowed: Yes

Conditions of admission: Good knowledge of French language

Duration of training: One year - once a week (evening courses only)

Examinations: Final and selective examination as a condition of receiving a higher diploma in documentation

Degrees or other qualifications granted: A higher diploma in documentation

Language of lectures: French

Tuition fees: 250 F.

Number of trainees: 50 per year

B. Junior introductory course

Programme:
1. Documentation and tasks of an assistant documentalist
2. Identification of documents
3. Classification:
   a) kinds of classification
   b) technique of classifying documents
4. Principles of selecting documents
5. Dissemination of documents
6. Reproduction of documents
7. Storage of documents
8. Sources of documentation
9. Visiting documentation centres

Type of training: Continuation course including lectures and discussions after lectures and practical work in documentation
C. Senior Introductory Course

Programme
1. Tasks and functions of a documentalist
2. Kinds of documents:
   a) primary
   b) secondary
3. Documentation as a science
4. Reading
5. Translations
6. Publishing techniques and reproduction of documents
7. Dissemination of documents
8. Storage, classification and selection of documents
9. Sources of information and documentation
10. Achievements in documentation in other countries
11. Visiting documentation centres

Type of training
Continuation course including lectures and discussions, and practical documentation work

Conditions of admission
Employment in a documentation centre

Duration of training
Six days: 4 days at the Cercle Culturel de Royaumont in the UFOD's Library; 2 days in Paris

For what kind of work are the students being trained
Senior personnel who wish to obtain or improve their knowledge of documentation

Language of lectures
French

Tuition fees
1200 F.

Number of trainees
25 per session (6 sessions per year)

SPECIAL

D. Special Course for "Documentation Secretaries"

Programme
The Documentation Secretary: his functions
1. Mail - identification - translation - analysis - answer
2. Telephone - telex
3. Reception - public relations - visitors - suppliers
4. Data integration
5. Work planning
6. Meetings - conferences - seminars - congresses, etc.
7. Travel organization
8. Writing techniques - administrative, commercial - style - dictating - machines, etc.
10. Filing equipment

30 per session (6 sessions per year)

SPECIAL

F. Special course "Graphical design"

programme

1. The notion of "image" - images and signs
2. Tools: pencils, pens, paint-brushes, drawing-pens, etc.
3. Geometrical tracing: linear, logarithmic scales, etc.
4. Graphical design: for an exhibition, a series, a book etc.; different types of diagram
5. Nomograms
6. Statistical analysis: Student's law, Poisson's law, Pearson's law, etc.
7. Matrixes, graphs, trees, sociograms, etc.; semantic maps, stereographic grids
8. Mapping - time, movement, projections, etc.
9. Trade mark
10. Letter: lay-out, graphical art, symbols, writing and drawing standards
11. The role of graphical images in the field of documentation, advertising, packaging, public relations and information
12. Image transmission
13. Relationship between graphical images, photographic, cinematographic and television pictures and all systems of signs

Type of training

Employment in the design department of a firm

Designers, desirous to utilize the "graphical function" in documentation techniques as a real means of dissemination

500 F.

20 per session (6 sessions per year)

**Type of training**
Academic study in the field of documentation and information science

**Conditions of admission**
Baccalauréat and passing entrance examination

**Duration of training**
Two years, full-time

**For what kind of work are the students being trained**
Assistant-documentalists and documentalists

**Examinations**
Entrance, during the course and final examination

**Degrees or other qualifications granted**
Diplôme universitaire de technologie de documentation

**Language of lectures**
French

**Tuition fees**
Registration fee paid by any student of the university

**ADDITIONAL INFORMATION**

**GRENOBLE**
1. Université de Grenoble, Institut Polytechnique, Section Mathématiques Appliquées. Lectures on mechanized data processing are held by Prof. Peccaud during one semester in the third year of study.

**NANCY**
2. At the Faculté des Lettres et Sciences Humaines, Université de Nancy the courses on documentation are included in the programme of education. The Faculty grants a Diplôme de licence de documentation.

**PARIS**
3. Faculté des Lettres et Sciences Humaines, Centre des Sciences Humaines Appliquées, Université de Paris, 47, rue des Ecoles, 75 Paris 5ème, provides lectures on documentation.

4. Faculté des Lettres et Sciences Humaines, Laboratoire de Psychologie Sociale, 16-18, rue de la Sorbonne, 75 Paris 5ème. In the framework of the Laboratoire exists the Centre de Documentation. Prof. Pages conducts a seminar on psycholinguistic problems and the analysis of contents of documents for the scientists employed by the Centre. Seminars are held once a week and their aim is to improve the qualifications of the personnel.

5. Fondation Nationale des Sciences Politiques, 27, rue Saint Guillaume, 75 Paris 7ème, organizes every year a series of lectures and seminars in the field of information and documentation for candidates of Masters and Doctors degrees in the field of social and political sciences. Lectures are delivered by M. J. Meyriat (Director of the Centre de Documentation de la Fondation).
6. **Association Française des Documentalistes et Bibliothécaires Spécialisés** conducts since 1968 a series of lectures on informatics techniques in documentation services. The first series was devoted to an introduction into techniques of automatic documentation.

**STRASBOURG**

7. **Faculté des Lettres et Sciences Humaines, Section de Journalisme, Université de Strasbourg**, conducts lectures in the field of documentation (3 hours lectures are held every week during the first and second year of education).
GERMAN DEMOCRATIC REPUBLIC

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

BERLIN

Humboldt Universität, Institut für Bibliothekswissenschaft und Wissenschaftliche Information (Humboldt University, Institute for Library Science and Information Science),
Universitätsstrasse 7, 108 Berlin
Head: Dr. J. Koblitz

Year of foundation of training in the field of Information Science: 1966

Studies in the field of information science and documentation are carried out together with studies in the given discipline, both lasting 5 years. Only a combination of social sciences and information and documentation sciences is possible at present. A combination of information and documentation studies with natural science and engineering studies is under consideration.

GRADUATE

Programme

1st year
1. Role of the social sciences in the GDR 15
2. Fundamental problems of information and documentation with special reference to the social sciences 45
3. Practical work 45
4. Planning, managing and organization of information in the GDR with special reference to the social sciences 15
5. Information needs and flow of information 15
6. Library science: functions and structures of libraries 15
7. Library science: theory and practice of acquisitioning 15
8. Methods of scientific work 15
9. Russian (readings of Russian writings) 60

2nd year
1. Written and other sources of information 30
2. Library science: handling of collections, cataloguing 15
3. Introduction to bibliography 15
4. Practical work 30
5. Russian 30
   Practical training - 6 weeks in a branch information centre

3rd year
1. Classification and other methods of identifying characteristics necessary for organizing collections and retrieval of information, building up of thesauri,
other aids in this respect
Practical work 45
2. Information systems, methods and means
Practical work 15
3. Technique of arranging information, and technical
means for manual or semi-manual storage and retrieval
Practical work 30
4. Library science: fundamental problems of library
equipment
15
5. Economic problems in information and documentation
Practical work - 3 weeks in a special library, and
3 weeks in a scientific library
Visits 15

4th year
1. Planning information according to subjects
15
2. Science of science
45
3. Introduction to mechanical data processing
Practical work 45
4. Management, office management, small-scale printing
30
5. Information liaison work
15
6. Problems of training and further education of in-
formation and documentation workers
15
7. International co-operation in the field of informa-
tion
15
8. Introduction to the history of information, docu-
mentation and modern librarianship
15
Practical work - 6 weeks at a computer centre

5th year
1. Science of science
15
2. Introduction to the theory of communication
30
3. Outline of cybernetics and introduction to the theory
of information
30
15
5. Patents, Innovations and rationalization
15
6. Standardization
15
7. Technique of translating
15

Type of training
Academic study in the field of information science, along with other academic study

Conditions of admission
Secondary school education

Are foreign participants allowed
No

Duration of training
5 years, 930 hours

For what kind of work are the students being trained
Subject information specialists, special librarians

Examinations
Entrance, during the course, final
**Degrees or other qualifications granted**

Graduates get professional titles both in the given speciality and in information and documentation science, e.g. Diplom-Ökonom für Information.

**Language of lectures**

German

**Tuition fees**

Free

**Number of trainees**

10 to 15

**Plan for other types of course in 1968-70:**

An extra-mural course lasting 2 - 2½ years is planned which is intended for actual information and documentation workers who have completed higher studies or for very talented people with a secondary education.

**BERLIN**

**Fachschule für Bibliothekare an wissenschaftlichen Bibliotheken** (Professional School for Scientific Librarians), Charlottenstrasse 40, 108 Berlin

Director: H. Klimpel

Year of foundation: 1963

**NON-GRADUATE**

**Programme**

**Type of training**

Professional school for scientific librarians and documentalists

**Conditions of admission**

A 10-year secondary professional school course or other secondary school certificate

**Duration of training**

3 years, full-time

**For what kind of work are the students being trained**

Librarians for scientific libraries and documentalists
Degrees or other qualifications granted: Dokumentalist

Language of lectures: German

Tuition fees: Free

Number of trainees: About 35 per year

BERLIN

Zentralinstitut für Information und Dokumentation (Central Institute for Information and Documentation), Unter den Linden 8, 108 Berlin

Director: Dr. B. Winde

Basic course in scientific information

Programme

1. Relations of scientific and technical information and other domains of human activity, role of a special library 2
2. National scientific, technical and economic information systems and their social importance 2
3. Sources of information and tools (characteristics and values of various sources) 2
4. Ordering systems 4
5. Ordering techniques 2
6. Patent information and documentation 4
7. Bibliographical description 2
8. Transliteration and transcription 2
9. Catalogues and files 2
10. Subject processing of documents (selection of subject headings) 2
11. Methods for retrieval 4
12. Manual and mechanical selection 2
13. Punched cards 2
14. Apparatus and technique for duplicating documents 2
15. Information needs (information flow, information subject planning, information methods) 2

Type of training: Basic course in information science

Conditions of admission: Scientific and professional workers are admitted

Duration of training: 10 days

For what kind of work are the students being trained: Information workers

Examinations: During the course

Degrees or other qualifications granted: None
Language of teaching
German

Tuition fees
Tuition is payable by employers sending their workers to the course

Number of trainees
About 1,000 persons in 1967

Other data
Basic courses with similar programmes are also organized by branch and industrial information centres and the Chamber of Technology in all parts of the country. Besides basic courses there are also advanced courses lasting 1-2 weeks, and refresher courses for information centres workers. Courses are also organized for workers in special fields, such as chemistry or agriculture. Those courses started in 1964. In 1967 420 information workers were trained at those courses.

**ILMENAU**

Technische Hochschule, Institut für Informationswissenschaft, Erfindungs-wesen und Recht (Technical University, Institute for Information Science, Inventions and Law), Strasse der Jungen Techniker 26, 64 Ilmenau

Head: Prof. Dr. F. Weber

Year of foundation: 1968

POST-GRADUATE

**Post-graduate Study in Information Science**

**Programme**

1. Informatics and documentation
2. History of information and documentation
3. Fundamentals of the theory of information communication
4. Outlines of cybernetics (covering information theory, theory of systems, and electronic data processing)
5. Fundamental problems in operational research
6. Tasks for information and documentation
7. Organization of information in GDR, other socialist countries, capitalistic countries, international, and international cooperation
8. Socialist management, planning and economics of information
9. Sources of information, collecting, storing and disseminating information
10. Bibliography
11. Standards, patents, designs and trade marks
12. Marketing
13. Documentational processing of information sources
14. Selective dissemination of information
16. Copyright
17. Technical means for creation of holdings, information retrieval and communication
18. Reprography
19. Technical means for rationalization of administrative work
20. Methods of identifying and categorizing informational needs of research, scientific and industrial users
21. Fundamentals of psychology
22. Fundamentals of sociology
23. Fundamentals of mathematical logic
24. Fundamentals of semiotics
25. Fundamentals of linguistics

Type of training
Post-graduate study in information science

Conditions of admission
a) University degree or, where applicable, completion of higher professional studies
b) work in an information centre

Duration of training
2 years, part-time

For what kind of work are the students being trained
Information scientists, subject information specialists, special librarians

Examinations
During the course and final examination

Degrees or other qualifications granted
Fachinformator

Language of lectures
German

Tuition fees
Free
GERMANY

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

BERLIN

Deutscher Normenausschuss (DNA), Ausschuss für Klassifikation (German Committee for Standardization (DNA), Classification Committee), Burggrafenstrasse 4-7, D-1000 Berlin 30

Director: Dipl.-Ing. N. Ludwig

Year of foundation of the course: 1953

SPECIAL

Seminar in Universal Decimal Classification

Programme
1. Basic course on use of UDC
2. History of UDC
3. The contemporary development level of UDC
4. Working tools of UDC
5. Methods of classifying with the UDC
6. Various applications and limitations of UDC
7. Practical exercises in classifying of given publications

Type of training
Seminar in UDC

Conditions of admission
Sufficient general education and, as a rule, activity in documentation and information centres, libraries, etc.

Are foreign participants allowed
Yes

Conditions of admission
Sufficient knowledge of German language

Duration of training
16 hours, one seminar per year

For what kind of work are the students being trained
Seminar for managers and other personnel of documentation centres and libraries, e.g. information scientists, subject information specialists, specialists in classification, scientific and technical librarians, assistants, and also users of information

Examinations
None

Degrees or other qualifications granted
None

Language of lectures
German

Tuition fees
DM 75
Number of trainees

35

C. Training of assistant documentalists

Programme
The training is extended over 2 years on the job, including:

1. Theoretical instruction at the documentation centre

Subjects:
1. Cataloguing
2. Simple library routine work to be met within documentation centres
3. Elements of classification including storage techniques
4. Introduction to UDC, including file techniques
5. Reproduction techniques
6. Usage of manually operated punched cards
7. Introduction to mechanized processes in documentation
8. Introduction to administration and statistics
9. Office equipment

11. Visits to documentation centres, libraries, etc.

III. Special course on reproduction techniques at the Documentation Training Institute

IV. Intermediate course at the Documentation Training Institute (subjects as above mentioned)

V. Final course at the Documentation Training Institute (subjects as above mentioned)
Type of training
Course in documentation

Conditions of admission
Secondary school education (6 years), knowledge of English

Duration of training
2 years training on the job, including 5 weeks at the Documentation Training Institute (full-time)

For what kind of work are the students being trained
Assistants (persons performing auxiliary functions in documentation work)

Examinations
Intermediate and final examination (oral and written)

Degrees or other qualifications granted
Dokumentationassistent

The themes of the 20-30 hrs information short courses will be fixed by OMKDK on basis of current special problems.

**Plans for other types of course:**

In 1969: application of manual punched cards, 30 hrs
preparation of permuted index, 20 hrs

**SPECIAL Courses on information in foreign languages**

1. French course, organized by OMKDK and UFOD (1967):
   - Techniques of handling special French literature, 30 hrs
2. Russian course, organized by OMKDK and VINITI (1968):
   - Expedient forms and means of special information for different groups of users

</table>

**Plans for other types of course:**

Short courses in English and German.
INDIA

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

BANGALORE

Documentation Research and Training Centre (DRTC), The Indian Statistical Institute,
112 Cross Road 11, Malleswaram, Bangalore 3
Director: Prof. A. Neelameghan
Year of foundation of the course: 1962

POST-GRADUATE

Course in Documentation, Information science, Special librarianship

Programme

The total number of hours for the course leading to the Associate-ship of the DRTC is about 2250, excluding the post-course trend report. For the preparation of the trend report, residence in the DRTC is not obligatory. The approximate percentage of lectures and tutorial hours for each of the subjects is as follows:

Group I
1. Universe of subjects, its development and structure 3%
2. Depth classification (theory and practice) 30%

Group II
1. Library cataloguing 12%
2. Documentation 25%
   a) mechanical aid in document retrieval
   b) reprography
   c) evaluation of documentation work
3. Research and technical library systems 15%

Group III
1. Post-course apprenticeship in documentation 15%
2. A project in the survey of trends in current literature: six months after the formal course 15%

Type of training

Special school for research and teaching documentation
Course in documentation, Information science and special librarianship

Conditions of admission

1. A university degree in one or other of the natural, applied or social sciences, and a university degree or diploma in library science, or an equivalent; or
2. M.A., M.Sc., or an equivalent degree in one or other of the natural, applied or social sciences, or a degree in engineering, technology, agriculture, animal husbandry or medicine, and some practical experience in documentation.

Admission to the course is strictly based on the merit of a candidate as judged by his academic record, and if necessary, performance in a special admission test held for the purpose, or personal interview by a selection committee.

<table>

</tbody>
</table>
Tuition fees

No tuition fees. Residence in the hostel attached to the Centre is obligatory during the first fourteen months of the course. A monthly seat rent of Rs 25/- and a monthly hostel mess charge of about Rs 85/- are collected from each student. Cost of books and stationery articles: about Rs 300/- for the course.

Financial aid for trainees

Stipends for non-deputed candidates on merit-cum-means basis; and research scholarships.

Number of trainees

A maximum of 6 students are admitted for each course. Two research fellows are also taken.

Other data

1) Senior documentalists are given facilities to reside at this Centre and work on a specific project for a period of 2-3 months.
2) An annual seminar on specific subjects in the field of documentation forms an integral part of the programme of the Centre. The trainees in the Documentation Course have to participate in this seminar.
3) The teachers and research fellows of the Centre are continuously engaged in research in documentation and the technique of teaching in documentation.
4) Since its inception in 1962, the staff and students of the Centre have published over 300 research papers. The teaching and the research staff have also published seven books during the same period.
5) The Centre publishes the "Library science with a slant to documentation", a learned periodical, in collaboration with the Sarada Ranganathan Endowment for Library Science. It also publishes the volume of papers and proceedings of the annual DRTC seminars.

Plans for other types of course in 1968-1970:

Application of management science to library and documentation work.
Indian Association of Special Libraries and Information Centres (IASLIC), Albert Hall 15, Bankim Chatterjee Street, Calcutta - 12

Director: Shri S. Ghoshal, Honorary Registrar

Year of foundation: 1966

POST-GRADUATE

Advanced course for librarians of scientific and technical libraries

Programme          hours
1. Patterns of subject formation         50
2. Research and technical library services      50
3. Depth classification
   a) theory                          35
   b) practical                      35
4. Cataloguing and indexing
   a) theory                         35
   b) practical                      35
5. Documentation                      35
6. Bibliographical services           35
7. Information services                50
8. Reprography                        25
9. Translation services                25
10. Project report (covering items 3, 4 and 5)     50

Type of training                            Course of librarians of scientific and technical libraries
Advanced course senior personnel

Conditions of admission
1) Membership of IASLIC
2) Graduation with Degree or Diploma in Librarianship
3) Preference to candidates working in special libraries, especially if nominates

Are foreign participants allowed: Yes

Equivalent qualifications

Duration of training                One-year, part-time

Scientific and technical librarians

Examinations: Written for items 1-9;
Written and oral for report 10

Degree or other qualifications granted: Diploma in Special Librarianship and Documentation

Language of lectures: English
Tuition fees
Rs 150/-

Financial aid for students
1) Gift copies of CC and CCC available through the generosity of
the Sarada Ranganathan Endowment
2) IASLIC President's medal to the
best student

Number of trainees
6 (4 first class and 2 second class)

Other data
Extension lectures by specialists
scientists are arranged

NEW DELHI

The Indian National Scientific Documentation Centre (INSDOC),
Hillside Road, New Delhi - 12
Scientist-in-charge: Mr. S. Parthasarathy
Year of foundation: 1964

POST-GRADUATE

Course in documentation and reprography

Programme

1. Organization and administration of special libraries

Organization
a) Libraries. Purpose and functions. Different types of library
b) Origin of special libraries and their growth
c) Different kinds of special libraries: libraries attached to
  industrial, commercial and research organizations
d) Functions of special libraries in relation to their parent
  bodies and outside agencies
e) Physical lay-out and equipment of special libraries
f) Library co-operation
g) Public relations

Administration
a) Principles of scientific management
b) Functions and organization of the different sections of a
  library
  - acquisition: book-selection, ordering, donation and exchange
  - processing: classification, cataloguing and preparation for
    use
  - readers services: reference and information service, circula-
    tion
  - personnel administration
c) Personnel administration
d) Finance and budget
e) Maintenance

2. Reference service and bibliography

Reference service
a) Definition: reference, book and reference service
b) Reference books; types and use
   - dictionaries
   - encyclopaedias
   - yearbooks
   - bibliographical dictionaries
   - geographical dictionaries
   - directories, handbooks, manuals and guides
   - bibliographies, indexes and abstracts
c) Reference service: short and long range
d) Literature searching techniques

Bibliography
a) Definition of bibliography
b) Evolution of the concept of bibliography and the emergence of different types of bibliography
c) Bibliographic organization and control
d) Methods of compilation of a bibliography
e) Physical bibliography: types, qualities and size of paper

3. Pattern of knowledge and classification

Pattern of knowledge
a) Main trends in the history of science: major contributions made by Greece, Rome and other European countries in the field of science from the early ages to modern times
b) Evolution of research methods: application of scientific methods to social sciences
c) Pattern of development of knowledge: modes of formation of knowledge; study of the universe of knowledge as a dynamic continuum; study of the pattern of development of knowledge in relation to library classification

Classification
a) Need and purpose of classification
b) Theory of classification
   - canons of classification
   - subject analysis
   - fundamental categories and their sequence
c) Notation
   - functions and qualities
   - zone and sector analysis
d) Introduction to major schemes of classification
   - DC, UDC, BC, LC and CC
e) Comparative study of UDC and CC
f) Schemes of classification for special collections and for special purposes
g) Principles of designing classification schedules
h) Relation of classification to subject cataloguing and indexing
i) Classification, its role in information storage and retrieval
4. Cataloguing
   a) Definition, purpose and functions of the catalogue
   b) Forms and types of catalogues:
      - physical form: card, sheaf and book forms
      - inner form: author, title, alphabetical-subject, dictionary,
        classified, alphabetical-classed catalogues
   c) Different kinds of entry: main and added entries and their
      functions
   d) Subject cataloguing and chain indexing
   e) Catalogue codes. Principles relating to the preparation of
      cataloguing codes. Comparative study of ALA and CCC
   f) Selective and simplified cataloguing
   g) Cataloguing of special types of material
   h) Union catalogues
   i) Catalogue maintenance. Featuring, filing, etc.

5. Documentation: organization
   a) Development of the concept of documentation
      - documentation as a new discipline
      - scope and purpose
   b) Experiments at international level
      - Royal Society, London; IIB and FID; Concilium bibliographicum;
        International Institute of Intellectual Cooperation; IFLA;
        UNESCO
   c) Documentation centres in developing countries
      - promotion and coordination of documentation services
      - role of UNESCO and FID
   d) Scope for future development
   e) Types of documentation centre
      - international, regional, national, local
      - general and subject coverage
   f) Problems of centralization and decentralization of documentation
      services
   g) Sources of Information
      - learned and professional societies, government departments,
        industries and firms, and research establishments
   h) Kinds of documents
   i) New trends in scientific communication
      - short communications and letters to the editor
      - data type periodicals
      - previews and reporting type periodicals
      - other forms of communication
   j) Control of scientific literature
      - Davis's plan, Bernal's plan, Woke's plan, etc.
   k) Procurement of documents. Organization of service, flow of work,
      copyright problems, etc.
   l) Translation service
      - indexes and bibliographies of translations
      - cover-to-cover translations
      - language dictionaries
      - organization of translation work
6. Documentation techniques
   a) Various kinds of documentation lists, their evolution, purpose and functions
   b) Documentation lists on demand, in anticipation; retrospective and current. National and international coverage
   c) Bibliographical citation and their uses
   d) Compilation of documentation lists
      - standards for bibliographical references including citations
      - abbreviation of titles of periodicals
      - transliteration
   e) Information indexing
      Special indexes: Co-ordinate index
      Permutation index
      Patent index
      Molecular formula index
      Citation index, etc.

f) Abstracting
   - principles of abstracting
   - types of abstract
   - personnel
   - use of author's synopsis
   - slant in abstracting
   - national and international coordination of abstracting services

7. Modern methods of information storage and retrieval
   a) Information flow system
   b) Information analysis and selection: description of documents, descriptor language, generic and specific descriptors, thesaurus.
   c) Information storage: recording media like cards, tapes, etc.; coding; file organization, etc.
   d) Information retrieval: search procedure
   e) Comparative study of information retrieval systems

8. Reprographic methods
   a) Basic reprographic systems: silver halide photography, diazo- graphy, thermography, electrography, hectography, mimeography and graphic arts processes
   b) Processes, techniques, equipment and materials
      - facsimile copying: contact methods, projection methods
      - microcopying
      - duplicating processes
   c) Standards and quality control
   d) Managerial aspects
      - storage, servicing

9. Project report: a detailed trend or documentation report on a special topic

10. Class work: written assignments, participation in colloquia and practical work at INSDOC

The total number of hours for the course leading to the Associate- ship in Documentation and Reprography of INSDOC, is about 2000, excluding the time devoted to the completion of the project report.
The approximate percentage of lectures and tutorial hours for each of the subjects is as follows:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Organization and administration of special libraries</td>
<td>15%</td>
</tr>
<tr>

<td>15%</td>
</tr>
</tbody>
</table>

| Total                                        | 100%       |

**Type of training**
Course in documentation, information science, special librarianship and reprography

**Conditions of admission**
Only candidates who have at least a second class Master's degree will be admitted to the course, and exceptionally candidates who are already working in the national laboratories and research institutions, provided their record of service achievements justify their admission.

**Are foreign participants allowed?**
Yes

**Conditions of admission**
Same as for Indian students

**Duration of training**
One year (full-time): August to July of the following year, excluding the three months given after the completion of the project when staying at INSDOC is not obligatory.

**For what kind of work are the students being trained?**
Documentalists, documentalists with special subject background, specialists in classification, specialists in abstracting, specialists in mechanization, etc. Scientific and technical librarians, information specialists.

**Examinations**
Assessment based on the written examination at the end of each term, performance on written assignments, participation in colloquia and practical work, and satisfactory completion of the project report.

**Degrees or other qualifications granted**
Associateship in Documentation and Reprography

**Language of lectures**
English

**Tuition fees**
Rs 240/- for the whole course plus maintenance charges.
Number of trainees
16 with distinctions

Other data
INSDOC undertakes to train practising documentalists, information officers and librarians for smaller periods, on request from the organization, depending upon the type of training requested.

ADDITIONAL INFORMATION

BANGALORE

The Documentation Research and Training Centre (DRTC) is sponsored by the Indian Statistical Institute for the purpose of conducting research and to provide advanced training to postgraduates in documentation work and service. One of the objectives of the DRTC is to convene annual seminars on specific topics in the forefront of thought in documentation, for example the subjects of the seminar of DRTC organized in December 1968 were:

I. Subject analysis
II. Quantification
III. Translation services

NAGPUR

Nagpur University, Faculty of Arts, Department of Library Science provided a regular one-year training course for graduates leading to the examination for the Diploma in Library Science.
There are as yet no training courses in Indonesia. There is, however, a Library School, Medan Merdeka 11, Djakarta.

Dr. W. Lorch, a UNESCO expert in documentation, was assigned in 1962 to the Council for Sciences in Indonesia to assist in setting up a documentation centre. One of his duties is to train future documentists.

The series of lectures he held included:
1. Collecting and selecting scientific information
2. Storage and retrieval of information
3. Bibliographical work, annotating and abstracting
4. Dissemination of information and publishing
5. Scientific translation
6. Document reproduction
IRAN

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

TEHRAN

University of Tehran, College of Education, Department of Library Science,
78 John F. Kennedy Avenue, Tehran

Bachelor's Degree Programme
1. Introduction to libraries and librarianship
2. Basic reference sources
3. Book selection
4. Basic cataloguing and classification
5. School and public librarianship
6. Academic and special librarianship
7. Children's and young adults' literature
8. Library internship
9. Audio-visual services in libraries

Master's Degree Programme
1. Advanced cataloguing and classification
2. Library materials for children and young adults
3. Library services for children and young adults
4. Special, public and university library service
5. Advanced reference sources
6. Information science
7. Research papers
8. Library internship

Conditions of admission
- for Bachelor's Degree Programme: University undergraduates, ability to read English
- for Master's Degree Programme: Bachelor's Degree from an accredited University, ability to read English

Duration of training
Three semesters

For what kind of work are the students being trained
To organize and manage modern university, special, school and public libraries

Degrees or other qualifications granted
Bachelor's Degree in Library Science
Master's Degree in Library Science
Bachelor's Degree Programme: Farsi
Master's Degree Programme: English

Language of lectures
Bachelor's Degree Programme: Farsi
Master's Degree Programme: English

Tuition fees
According to University schedule

Financial aid for trainees
Scholarship aid and part- or full-time library positions available
IRAQ

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

BAGDAD

A course in librarianship is conducted at the University of Bagdad

Programme includes:
1. Bibliographical research
2. Cataloguing
3. Classification
4. Acquisition of documents

Duration of training 6 months
IRELAND

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

DUBLIN

School of Librarianship, University College Dublin,
Earlsfort Terrace, Dublin 2
Director: Ellen Power, M.A., F.L.A.
Year of foundation: 1928

POST-GRADUATE and NON-GRADUATE

Programmes

1. Bibliography, including historical bibliography and book production
2. Book selection
3. Reference and information work
4. Statistics
5. Systems analysis
6. Cataloguing and classification
7. Administration
8. Research methods
9. Psychology of reading
10. Palaeography
11. Archives

The subjects of the course are conveyed in approx. 12 formal classes, tutorials, practice work, visits to libraries, printing works, bindery etc., which are an essential part of the Course.

Type of training
Course in librarianship and information science

Conditions of admission
1. A university degree for one year course
   A reading knowledge of 2 modern languages (1 only for public library option)
2. Non-graduates must be at least 19 years of age and have had two years experience in an approved library. They must hold the Matriculation Certificate of the National University of Ireland
   A reading knowledge of 2 modern languages

Are foreign participants allowed
Yes

Conditions of admission
As above
| Duration of training          | One-year full-time course for graduated students  
|                             | Two years for non-graduates  
| For what kind of work are the students being trained | Librarians for University, special and public libraries, archivists  
| Examinations                | The Diploma Examination consists of Papers in bibliography, book selection, reference work, cataloguing and classification and administration, archives  
| Degrees or other qualifications granted | University Diploma in Librarianship  
| Language of lectures        | English  
| Tuition fees                | £ 40  
| Financial aid for trainees  | None  
| Number of trainees          | Non-English speaking students only. Approximately one student each year  
| Other data                  | The School has access to the computer in the Science Faculty. It is fully integrated into the other teaching departments in the University  

ISRAEL
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION
TEL-AVIV

Center of Scientific and Technological Information, Department of Documentation,
84 Hachashmonaim St., Tel-Aviv

Director of the course: (Mrs) L. Vilentchuk

Year of foundation of the course: 1968

POST-GRADUATE

Course in information science

Programme

1. Sources of information
   a) Basic reference sources and search techniques. Principal reference tools including sources of publications (commercial, professional, governmental, etc.). Selection and acquisition of documents

2. Information processing
   a) Cataloguing:
   b) Principles of classification:
      Introduction to the main library classification schemes: Dewey, LC, Bliss, Colon; detailed study of UDC
   c) Advanced classification and indexing:
   d) Editing, proof-reading, technical translations, transliteration. Preparation of bibliographies and reviews. Abstracting. Publishing (in Hebrew and English)

3. Use of machines in information processing
   a) Reprography:
      Printing. Contact and optical reproduction methods. Equipment, materials, processes and costs
b) Computers - hardware and software:
- Computerized information storage and retrieval.
- Computer programming. FORTRAN. Simple IR examples. Seminar project.

4. Information science 150 hours

Organization, administration and management of scientific and technical information:

b) National and international information and library networks. History, institutions, cooperation. Literature of information science and librarianship.

c) Information centers, data banks and special libraries: subject versus mission orientation. National, academic, industrial, commercial, governmental, public and research institutions, their objectives and special problems of organization, administration and management. Organization and methods (O&M). Introduction to operations research (OR). Survey techniques.

d) Design and management of information centers, data banks and special libraries. Physical planning, services and routines, preparation and dissemination of information bulletins and reports. SDI. Staffing, budget and evaluation of performance and costs. Information searches: scope and factors affecting plan and conduct of search.

e) Introduction to business and government archives.

Visits will be organized to important information centers, libraries, publishing houses, computer installations, research institutes and industrial plants.

Type of training Course in Information science

Conditions of admission Candidates for the course must be holders of a B.Sc. or B.A. degree.
Duration of training
For what kind of work are the students being trained
Examinations

Examinations consist of:
1) A paper of 3 hours duration in each of the four subject groups of the course
2) A special study, selected in consultation with a lecturer and carried out individually under his supervision. This will provide each student with an opportunity for some intensive work on any topic in the field of information work which is of particular interest to him.

Degrees or other qualifications granted
Diploma in Information Science

Language of lectures
Hebrew and English

Tuition fees
Every year decided ad hoc

Number of trainees
15

in the natural sciences, mathematics, statistics, engineering, agriculture, medicine or economics, or its equivalent.
Candidates who have special qualifications but have not completed all their degree requirements may be admitted under certain circumstances. Special emphasis will be placed on good knowledge of the English language (reading, writing and speaking) as well as an adequate knowledge of at least one other foreign language.

One academic year
Professional information specialists

Candidates who have special qualifications but have not completed all their degree requirements may be admitted under certain circumstances. Special emphasis will be placed on good knowledge of the English language (reading, writing and speaking) as well as an adequate knowledge of at least one other foreign language.
ITALY
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

MILANO

Istituto Superiore di Tecnologia Industriale (Higher Institute of Industrial Technology),
Piazza Tito Lucrezio Caro 8, Milano

SPECIAL

Course on documentation and planning studies

Programme
1. Theoretical bases of planning
2. Tools for planning: philosophical instrument, mechanics of thinking and principles of mechanizing the activities of an intelligent human being, composition of a correlational network, the mathematical instrument, the cooperation
3. Planning: dimensional and metric analysis of the obstacle to be surmounted
4. Documentation activities: collecting data for planning which are adequate for the obstacle to be surmounted, criteria for analysis of documents, classification of documents, correlation between various classifications, methods of supplying information, mechanical translation
5. Planning: choice of material, technical synthesis, technological synthesis, control

Type of training
Evening course for advanced training of industrial workers

ROME

Scuola di Tecnica dell' Informazione, Universita degli Studi di Roma,
Facolta di Scienze Statistiche, Demografiche e Attuariali (School of Information Techniques at the Faculty of Statistical, Demographic and Actuarial Sciences of the University of Rome),
Citta Universitaria, Rome

Director: Prof. F. Fattorello

Year of foundation of the School: 1949

NON-GRADUATE

Programme
First-year students who passed all the compulsory examinations may obtain permission to take subjects of the second year. Since the lectures of the first and second year are held on alternate days, it is practically possible to go through both years at the same time.
1st year of studies (lectures)
1. General sociology
2. Theory of studying public opinion
3. Social theory of information
4. History of means of publication
5. Technique of sounding public opinion
6. Legislation concerning journalism

2nd year of studies (lectures)
A. General subjects
   1. General methodology of organization
   2. Methodology of planning

B. Techniques in relation to means of information
   1. Techniques of journals and bulletins
   2. Techniques of graphic art and posters
   3. Film technique
   4. Techniques of oral, radio broadcasting and television propaganda
   5. Techniques of reproduction and automatic documentation

2nd year of studies - specialization (seminars)
1. Technique of ideological propaganda
2. Technique of commercial publications
3. Technique of scientific documentation
4. Technique of tourist propaganda
5. Technique of the organization of exhibitions
6. Technique of insurance propaganda
7. Public relations (maintaining relations with other institutions)
8. Technique of military journalistic organizations

assistant and work in state administration after receiving their diploma
- employees of state and private enterprises who would like to make their work more efficient
- persons who would like to obtain managing jobs in the press or in propaganda
- persons who intend to work in documentation centres, research centres, or in the information service. Special training indispensable to a documentalist's work, including the most recent achievements in the methodology of scientific documentation, is being arranged for the last group

The school also confers a degree qualifying graduates to fill the post of press attaché.

Examinations

No entrance examinations. Students take examinations every year. Students who have passed all the examinations required for the second year are admitted to the final examination (diploma).

All students who intend to obtain a degree of "information techniques expert" must take examinations in all the subjects which are general or special of the 2nd year. They must also pass examinations in journalistic information, graphics, film, oral, radio broadcasting and television propaganda techniques and finally in the techniques of reproduction and automatic documentation.

Degrees or other qualifications granted
Information techniques expert

Language of lectures
Italian

Tuition fees
- for the entire course 20,000 lire
- for the final examination 10,000 lire
- for each examination taken during the course 400 lire

**Rome**

Consiglio Nazionale delle Ricerche (National Research Council),
Piazzale delle Scienze 7, Rome

Director: Prof. P. Bisogno

Year of foundation of the course: 1968

Course of documentation

Programme

**Theoretical part**

1st day:
1. Introduction
2. Documentation and Information: definitions and entity. Activity of a documentalist
3. The document and its various parts
4. Availability of documentation for chemists in US university libraries
5. Types of information and collections relevant to them, with special reference to bibliographies, scientific books and other scientific literature
6. A brief survey of principal systems of cataloguing: Italian specifications of the Ministry of Industry, the Vatican and ALA

2nd day:
1. Brief information on principal systems of classification: Dewey, UDC, LC
2. System of classification with facets and keywords
3. Availability of documentation for chemists in libraries of Australia and Paris
4. Electronic devices for automatic information retrieval
5. Terminology and problems relevant to linguistics
6. Xerography and microfilm as media for disseminating information
7. Electronic devices for automatic information retrieval

All lectures end with a discussion on the lectured subject between lecturers and students

**Practical part**

3rd day:

Compilation and comparison of catalogues. Exercises according to specifications of the Ministry of Industry and the Vatican with the following examples:
a. work by one author
b. work by two authors
c. work by more authors
d. work according to title
e. periodicals (when the title changes, or fusion with another periodical occurs, or when publishing stops)
f. articles from a periodical
g. collections
h. governmental documents
i. congresses, conventions, symposia, conferences
j. patents

4th day:
Classification of the above publications by UDC, facets and key-words

5th day:
1. Analysis of possible compatibility among the principal universal classification systems
2. Visit to the Electronic Centre of the Bank of Rome

Discussion

6th day:
1. Practical work
2. The functions of information in research and industry in Italy
3. Methods of meeting the users' needs by information and documentation services, and editorial dissemination of their results
4. How to organize a documentation service with regard to cooperation of various services

Type of training
Refresher course of documentation

Duration of training
6 days

For what kind of work are the students being trained
Workers of experimental stations of the Italian industry, scientific and technical librarians

Examinations
None

Degrees or other qualifications granted
None

Language of lectures
Italian

Number of trainees
20

Plans for other types of course in 1969-70:
A course on dissemination of information is planned.
ROME

Istituto Nazionale per l'Incremento della Produttività,
Piazza Indipendenza, 11/8 - 00185, Rome

Director: A. Lusignoli
Year of foundation of the courses: 1964

SPECIAL

Course on organizational and structural problems of documentation and information

Programme

1. Collecting of documents
   a. scope of collection
   b. information material

2. Classification of documents
   a. subject catalogues
   b. classification systems
   c. cataloguing and kinds of catalogue
   d. patent classification

3. Cataloguing of documents

4. Preservation of documents

5. Selection and analysis of documents

Type of training

Special course

Duration of training

5 days

For what kind of work are the students being trained

The course is intended for persons employed in libraries, documentation and information services, offices, etc. who wish to deepen their knowledge and bring it up-to-date

Examinations

Tuition fees  50,000 lire
Number of trainees  Not more than 20 persons may attend the course at a time

SPECIAL
Course on photodocumentation and microreproduction

Programme
1. The photographic process, its origin and development
2. Knowledge of physics and chemistry, photographic technique, preservation and checking of equipment
3. Practical exercises in a photographic laboratory
4. Microphotography of documents
5. Microphotographic system, microphoto technique
6. Equipment of a laboratory
7. Defects and shortcomings of microfilms
8. Practical exercises in microphotography

Type of training  Special course
Duration of training  Two weeks
For what kind of work are the employees of photographic and microphotographic laboratories being trained
Examinations  None
Degrees or other qualifications granted  None
Language of lectures  Italian
Tuition fees  30,000 lire
Number of trainees  Not more than 15 persons may attend the course at a time

SPECIAL
Course on mechanization of documentation

Programme
1. Structure and functioning of a documentation and information centre
2. The technique of document reproduction
3. The technique of preserving documents
4. Checking the microfilms archive
5. Automatic documentation
   a. equipment for automatic reproduction of documents
   b. document retrieval by means of electronic apparatus
   c. automatic indexing of literature

Type of training: Special course
Duration of training: 5 days
For what kind of work are the students being trained: Librarians and personnel of documentation and information centres
Examinations: None
Degrees or other qualifications granted: None
Language of lectures: Italian
Tuition fees: 30,000 lire
Number of trainees: Not more than 15 persons may attend the course at a time

ADDITIONAL INFORMATION

TORINO

The Centro di Studi ed Applicazioni di Organizzazione Aziendale della Produzione e dei Trasporti (Centre for Studies and Applications of Production and Transport Management) sporadically arranged courses in documentation and information techniques.

The first one was held in 1963 - "Refresher course on documentary and information techniques", the second in 1965 - "Training and re-training in the field of documentary techniques". 
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

J A P A N

Keio University, School of Library and Information Science, Faculty of Letters
Mita, Minoto-ku, Tokyo
Director: Prof. T. Sawamoto
Year of foundation: 1951 as Japan Library School, 1967 Graduate Program started, 1968 name of School changed to School of Library and Information Science

GRADUATE

A. Undergraduate programme of training

Requirements for graduation:

To receive the Keio University Degree of Bachelor (Faculty of Letters) or Bungakushi, students must - in addition to the general education course requirements - meet the following requirements:

1) Students who are candidates for the degree will complete a total of not less than 72 units noted below, over and beyond general education studies:
   - 36 units of required courses in library and information science
   - at least 10 units of elective courses in library and information science
   - at least 26 units of elective courses from the list of approved courses of the Faculty of Letters

2) Students will have practical work counting for 8 units over and above the 72 units noted above. Students should plan to spend two weeks in the observation and practice assignment. This is carried on in certain outstanding libraries or information centres. The assignment includes directed, individual study and thesis based on the practice and observation.

3) Students may take other courses which are not listed as required or elective; however, the units of these courses are not to be counted in the 72 units required for the degree.

B. Graduate programme

Requirements for graduation:

To receive the Keio University Degree of Master or Bungaku-shushi, students must meet the following requirements:

1) Students shall reside on the campus for at least 2 years
2) Students shall complete a total of not less than 32 units of credit noted below:
   - 22 units of required courses
   - at least 10 units of elective courses
3) Students shall submit a thesis to the Graduate School Committee and pass the final examinations

Programme:

Required courses

1. Information science: introduction (4)
2. The structure of information (1) (2)
3. Information systems (4)
4. Research methods (1) (4)
5. Research methods (1) (4)
6. Information storage and retrieval (1) (4)
7. Mechanization in information handling (4)

Elective courses

1. The structure of information (1) (2)
2. The structure of information: seminar (2)
3. Information systems: seminar (1) (2)
4. Information systems: seminar (II) (2)
5. Information storage and retrieval (II) (2)
6. Information storage and retrieval (II) (2)
7. Information storage and retrieval: seminar (1) (2)
8. Information storage and retrieval: seminar (II) (2)
9. Information storage and retrieval: seminar (III) (2)

Type of training

Conditions of admission

Academic study in Library science and Information science

1) The second-year programme
- those who have acquired at least a total of 32 units of credit of general education studies in a reputable college or university
- those who have finished their second year in an old system higher school or in the preparatory course of an old system university, or in an old sermon gakko
- those who are graduates of a junior college
- those who are certified to have completed courses which are equivalent to or are beyond the levels noted above
- entrance examinations

2) The third-year programme
- those who have graduated from a new system college or university
- those who have graduated from an old system university
- those who are certified to have finished courses which are equivalent to or are beyond the levels noted above
- entrance examinations

3) The graduate program
- those who have graduated from a new system college or university
- those who have graduated from an old system university
- those who are certified to have finished courses which are equivalent to or are beyond the levels noted above
- entrance examinations
**Duration of training**

1) Undergraduate programme - 4 years including general education study
2) Graduate programme - at least 2 years

**For what kind of work are the students being trained?**

Information scientists, information officers, scientific and technical librarians, special librarians, teacher librarians

**Examinations**

1) Keio University Degree of Bachelor (Faculty of Letters)
2) Keio University Degree of Master

All graduates of the School are entitled to a librarian certificate

**Language of lectures**

Japanese

**Tuition fees**

1) Undergraduate programme: Y 179,150
2) Graduate programme: Y 70,900

**Financial aid for trainees**

- **Entrance examination**
  1) Keio University Degree of Bachelor (Faculty of Letters)
  2) Keio University Degree of Master

All graduates of the School are entitled to a librarian certificate

- **Scholarships:**
  1) Japan Scholarship Association Scholarship Funds
  2) Keio Scholarship and Loan Funds
  3) SUS Scholarship Funds

The funds have been established to assist excellent Keio students in need. One scholarship will carry a monthly stipend of Y 5,000 or 3,000. Loans of Y 3,000 or 2,000 a month will be considered. Inquiries may be made to the Dean of Students on the Mita campus.

In addition to the foregoing, the following scholarships have been made available for the 1968-69 academic year. They will be granted to students already enrolled and studying in the School of Library and Information Science Program through the School's Committee on scholarship.

- **Founding Director's (RLG) Scholarship** Y 36,000
- **Budayu Kogure Memorial Scholarship** - two for graduate students Y 80,000 each
- two for undergraduate students
  Y 40,000 each
  Onuma Scholarship Y 50,000
  Children's Librarianship Scholarship Y 50,000

1) To the second-year programme: 50
   and several transfers
2) To the third-year programme: 50
   and several transfers
3) To the graduate programme: 10-20

Since 1951 the School of Library and Information Science has organized various seminars and workshops in order to reach and assist in-service personnel in the field of Library Science and Information Science all over Japan.
BAMAKO

The Ministry of Information in Bamako has organized introductory courses in documentation since 1963.

Programme includes:
1. Acquisition of documents
2. Cataloguing
3. Classification
4. Loans, etc.

Duration of training: 1 or 2 months

Total hours of first course: 668, total: 611
Second course: training for management functions

Programme

1. Document, management and function
   a) incunabula
      - hours
   b) history of the book
      - hours
   c) bibliography: history, theory, practice
      (introduction and practical work)
      - hours
   d) collection building:
      - public libraries
      - special libraries
      - scientific libraries
      - introduction and practical work
      - hours
   e) antiquarian book-trade
      - hours
   f) availability of literature
      - hours
   g) documentation and literature searching
      - hours
   h) mechanical aids
      - hours
   i) patent law
      - hours
   j) standardization
      - hours
   **Total:** 97 hours

2. Management and organization
   a) internal organization and planning, library building and installation:
      - public libraries
      - special libraries
      - scientific libraries
      - the Royal Library
      - the University Library of Amsterdam
      - the Public Library in Amsterdam
      - introduction and practical work
      - hours
   b) financial management of the public library
      - hours
   c) industrial sociology (incl. personnel management)
      - hours
   d) legal status of public library staff
      - hours
   e) personnel management and internal communication
      - hours
   f) policy matters
      - hours
   g) publicity and public relations
      - hours
   **Total:** 113 hours

3. Library science and related subjects
   a) centralized services to public libraries at home and abroad
      - hours
   b) public library work in relation to religious and philosophical backgrounds
      - hours
   c) co-operation and division of tasks in the Dutch library system
      - hours
   d) generalities and scientific libraries
      - hours
   e) library organizations in the field of public libraries
      - hours
   **Total:** 14 hours
- provincial library centres
- the library for young people in the public library
d) public libraries and government
e) library systems abroad and international co-operation:
  - public libraries
  - special libraries
  - scientific libraries
f) documentation at home and abroad
g) archives
h) copyright, etc.
i) organization of scientific research
j) history of library science

Type of training
Professional day library and documentation school

Conditions of admission
Graduates from secondary schools (e.g., gymnasium)

Duration of training
3 years (the programme consists of a basic and an advanced course, totalling three years)

For what kind of work are the students being trained
Librarians and documentalists

Examinations
At the end of the two-year course there will be an examination in assistant- and junior-level librarianship. At the end of the third year there will be examinations in chief- and senior-level librarianship, librarianship for young people, the blind, music, etc.

Degrees or other qualifications granted
Assistant-librarian and librarian
The Hague

Gemeenschappelijke Opleidingscommissie van NIDER, NVB, NVBA (Joint
Training Committee of the Netherlands Institute for Information, Docu-
mentation and Filing, the Netherlands Association of Librarians and
the Netherlands Association of Business Archivists),
19 Burg. van Karnebeeklaan, The Hague

Secretary: A. van der Laan

Year of foundation of the course: 1951

The Joint Training Committee organizes a number of different
courses known by the letters A1, A2, A3, B, C, D and E:
- the three A courses are intended for library staff working in respec-
tively:
  A1 - technical libraries
  A2 - non-technical libraries (such as libraries of non-technical
government agencies)
  A3 - university libraries and libraries of learned societies;
- the B and E courses are intended for business archivists;
- the C course is intended for literature searchers (information offi-
cers);
- the D course is an advanced course for participants of the courses
  after some years of experience.

In addition the Joint Training Committee organizes a special cor-
respondence course in classification, alphabetical indexing and bibli-
ographical description.

POST-GRADUATE

C - Course for literature searchers (information officers)

Programme

1. Introduction to course
2. Communication, information, documentation
   a) Position and task of the documentation officer
   and literature searcher
   b) Functional organization of a documentation service
3. Sources of knowledge
   a) External organization:
      - organization of research, science, industry
      and government
      - external organization of libraries, archives
      and information/documentation centres

Total hours: 12
b) Internal organization:
- libraries: organization and technique 2
- archives: organization and technique 2
- information services 2
- activities of international organizations (FID, ISO) and Netherlands Standards Institute and Netherlands Institute for Information, Documentation and Filing (NIDEK) 2

c) Knowledge of documentation sources:
- types and kind of sources, bibliographical knowledge 2
- sources on various subjects 7
- patents: bibliographical knowledge and enquiries 4

4. Information techniques
a) Abstracting

b) Critical judgement and logical interpretation of sources

c) Literature searching

d) Reporting:
- preparation of literature reports 8
- cataloguing, alphabetical indexing 4

e) Principles and use of classification schemes:
- key-word system 5
- principles of classification and planning of a classification scheme 5
- introduction to the Universal Decimal Classification and the practical use of this system 18
- the use of an abridged UDC 3

f) Selection methods

g) Storage media for data and image recording:
- documentary reproduction 2
- training with technical aids

h) Automation and mechanization of information processing

Preliminary examination and tests 12
Preparation of special report 4
Visits 6
Final review 2

Total 124

ADDITIONAL INFORMATION

At the University of Amsterdam, Faculty of Letters, there exists a Chair of Library Science which conducts the two-year academic programme for academic staff of learned libraries. During the second year practical work has to be done in at least one large library. Training in library science is intended only for students of a university, holding a university degree, and is at post-graduate level.

Library professional day-schools are planned for Arnhem, Eindhoven, Groningen, Tilburg and The Hague.

Conditions of admission

- a) Graduates with a good B.A. and B.Sc. degree
- b) Non-graduates with two years' library experience with either
  - FPE, and one part of Library Association Registration examination, or
  - two subjects at General Certificate of Education Advanced level, and one part of Registration examination, or
  - two subjects at General Certificate of Education Advanced level and pass in the "Entrance" examination

Duration of training: One year

For what kind of work are the students being trained:

Librarians and documentalists

Degrees or other qualifications granted:

University of Ibadan Diploma

Tuition fees:

£ 90 per session of three terms

Financial aid for trainees:

Carnegie scholarships, normally available only to graduates
NORWAY

The education and training of documentalists and information officers are not organized in Norway. Personnel working in the field are generally self taught or have attended short courses. Others have received in-service training in Norway or have studied abroad on scholarships from the Royal Norwegian Council for Scientific and Industrial Research.

The whole system of documentation and information services and education are under debate at present, and it is expected that radical changes will take place in the future.
PAKISTAN
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

KARACHI

The University of Karachi,
Karachi

Year of foundation of the course: 1962

GRADUATE

Pakistan National Scientific and Technical Documentation Centre (PANSDOC), the FID National Member, co-operates with the University of Karachi in the teaching of students to a Master's degree in library science. The Master of Library Science course includes one complete paper on scientific documentation and information techniques. The students attend lectures and practical work at PANSDOC once a week.

Programme

1. Scientific documentation
   1. Scope of scientific documentation and its relation to librarianship. Techniques and principles
   2. Position and future of scientific documentation and information services in Asian countries
   3. Scientific documentation and economic development
   4. Co-operation in scientific documentation
   5. Possibilities of combining scientific documentation with parallel activities
   6. Role of documentation centres in the exchange of scientific publications
   7. Use of UNESCO coupons in operating documentation services
   8. Selection and training of document procurement personnel
   9. General survey of PANSDOC services
   10. Level of organization for documentation:
       a) International: FID, UNESCO
       b) national: Aslib, etc.

11. Survey of major scientific and technical documentation centres and special libraries: UK, the Continent, USSR, Japan, India, Pakistan

12. Scientific literature and its search techniques
   1. Historical background. Early scientific societies and their role in the development of scientific literature; 18th and 19th century scientific literature of the Indian Sub-Continent
   2. The place of the periodical in scientific literature; the scientific article and its component parts
   3. Form classification of technical literature:
       a) Original sources (unorganized)
       b) secondary sources (organized)
   4. Bibliographical aids in science and technology. Methodical assessment of bibliographical tools in specific fields
5. Procedure for searching the sources of information
6. The bibliographical unit. Methods of setting out references to articles in journals, books, patents, theses, etc.
7. Preparation and presentation of information in bibliographies
8. Organization of translation services - details
9. Actual work of translation. Techniques
10. Typists: recruitment, selection, training
11. Practical: the aspects of the well-organized translation section of PANSDOC in detail

III. Document procurement. Principles and practice
1. Importance of document procurement service and its organization in a documentation centre
2. Procurement of documents from local sources (with special reference to Pakistan)
3. Procurement from foreign sources: policies and problems in procuring different types of documents, e.g. papers from periodicals, patents, standard specifications, theses, research material, conference proceedings, etc. Sources of information and locating tools, etc.
4. Procurement of ready-made translations: locating tools and sources of information relating to the availability of ready-made translations, e.g. Translation Index, Translation Monthly, cover-to-cover English translation of Russian scientific journals, etc.
5. Routine procedure in a document procurement section: receipt and registration of orders, verification of bibliographical data, identification of documents as to their availability in local and foreign libraries. Processing of orders for the photo-reproduction section, disposal of documents to clients
6. Abbreviation of journal titles
7. Abstracting and indexing
8. Information retrieval: definition, basic operations of information retrieval, e.g. recording, storage, identification and dissemination of information of pertinent interest, various devices and systems of information retrieval: a) conventional methods (indexing and classification, e.g. alphabetical subject index, classified index, UDC and faceted classification) b) co-ordinate indexing c) edge-punched cards, feature or aspect cards (peek-a-boo system) either based on Uniterms, key-words, or thesaurus, etc. d) automatic retrieval of information - IBM and ICT punched cards - electronic computers - Rapid Selector - Filmorex
9. Programming, input and output collating, coding and decoding

IV. Translation service - the practical aspects of the organization of the translation service of a documentation centre - particularly of a scientific documentation centre
1. Importance of translation services
2. Translation services in foreign countries: United Kingdom, France, Germany, Netherlands
3. Essentials of a translation service - general:
   translation work from outside; staff translators, editors plus panel of external part-time translators
4. Training of translators:
   under a senior experienced translator abroad
5. Translation section library:
   essential books; dictionaries, reference books of scientific subjects, standard of these books
6. Record system:
   processing of translations, recording of translations; recording of data on translations and translators, etc.
7. Utilization of the work of a translation service:
   national service to scientists; technical clients; exchange service with foreign countries, pooling of work; national, international; publications of lists, etc.

V. Document reproduction
1. Methods of producing and copying documents, including printing
2. Photographic laboratory
3. Library applications of (micro)photography
4. Selection and training of staff
5. Document reproduction services at PANSDOC

Type of training

Post-graduate study in library science intended for students advanced in studies at various faculties, graduates from higher schools, teachers and librarians

Conditions of admission

Intermediate and final degrees

Duration of training

2 years; 1st year 2 days a month for 6 months, and 10 consecutive days; 2nd year: 2 days a month for 5 months, and 10 consecutive days

For what kind of work are the students being trained

Scientific librarians

Examinations

6 examinations during the study

Degrees or other qualifications granted

Diploma of specialization in library science

Language of lectures

Polish

Tuition fees

Free
POZNAŃ

Uniwersytet im. Adama Mickiewicza w Poznaniu, Biblioteka Główna, Miedzywydziałowe Studium Bibliotekarstwa (Adam Mickiewicz University in Poznan, Central Library, Interdepartmental Study in Library Science), 38-40 Ratajczaka, Poznań

Head: Assistant Prof. Dr. S. Kublak
Year of foundation: 1968

GRADUATE

Programme hours
1. Cataloguing and classification of publications 45
2. Bibliography 90
3. Scientific documentation and information 60
4. Cultural policy of Poland - selected problems 15
5. Library practice - 2 weeks after 1st year of studies, and 2 weeks after 2nd year

Type of training
Interdepartmental study in library science - lectures on information are included in the library science curricula

Conditions of admission
Students from various faculties are admitted after the 3rd year of studies

Duration of training
2 years

For what kind of work are the students being trained
Subject information specialists and special librarians

Examinations
5 examinations during the studies

Degrees or other qualifications granted
Master of Arts degree in the discipline plus specialization in library science obtained on satisfactory basis

Language of lectures
Polish

Tuition fees
Free

WARSAW

Uniwersytet Warszawski, Wydział Filologiczny, Podyplomowe Studium Informacji Naukowej (Warsaw University, Faculty of Philology, Post-graduate Study in Information Science), Krakowskie Przedmieście 26-28, Warsaw

Head: Prof. Dr. T. Wójcik
Year of foundation: 1969
POST-GRADUATE

Programme

1. Logic
2. Science of science
3. Linguistics - selected problems
4. Foreign languages - selected problems
5. Psychology - selected problems
6. Sociology - selected problems
7. Pedagogics - selected problems
8. Mathematics
9. Introduction to problems of scientific information
10. Modern publishing
11. Library science, librarianship and bibliography
12. Subject indexing of documents
13. Methods of studying users' needs
14. Information retrieval systems
15. Technical means of information
16. Organization and economics in information
17. Dissemination of information

Type of training
Post-graduate study in information science, evening study (courses)

Conditions of admission
Admitted are students who:
- are graduates (Masters degree or an equivalent
- know 2 foreign languages (with an active knowledge of one of them)
- were employed for at least 2 years by a scientific or research institution in their special subject
- are sponsored by their institutions

Are foreign participants allowed
Yes

Conditions of admission
Same as for Polish students

Duration of training
2 years; study takes place in the evenings and students attend 3-4 times a week

For what kind of work are the students being trained
Information scientists, lecturers in the field of information science, subject information specialists

Examinations
Examinations during the course and final examination

Degrees or other qualifications granted
Certificate

Language of lectures
Polish

Tuition fees
Free
The establishment of an Institute for Library Science and Information Science is being planned.

GRADUATE PROGRAMME

1. Logic
2. Political economy
3. History of Poland against the background of general history - selected problems
4. Main problems of Marxist philosophy and Marxist theory of development of the society
5. Introduction to library science
6. History of books and libraries
7. Library science and librarianship
8. Bibliography
9. Main areas of science; organization of sciences and scientific writing:
   a) humanities
   b) natural and applied sciences
10. History of literature in general - selected problems
11. Contemporary literature
12. Selected problems of modern culture
13. Assistance to readers
14. Problems, methodology and organization of research in palaeography
15. Foreign language (I)
16. Foreign language (II)
17. Specialization (one of the following):
    a) Organization of libraries
    b) special
    c) national and university
    - Publishing and book selling
    - Scientific and technical information and documentation

Programme of documentation

1. Outline of the theory and technique of scientific information and documentation
   a) Fundamental features of the flow of information. General characteristics of scientific and technological activities. Characteristics of information activities
b) Documentation and information. Role of information in the development of science and technology. Principal objects of information.

2. Scientific and technical literature
   a) Types of written document and their information value (up-to-dateness)
   b) Other sources of information, their form and significance in information.

3. Fundamental knowledge of methods of document processing
   a) Analysis of the text of a document
   b) Forms of documentation processing
   c) Methods and forms of preparing translations

4. Adapting information to the needs of various groups of users
   a) Types of user and characteristics of their needs
   b) Kinds of information from the viewpoint of source and type of user.

5. Structure of the descriptive language
   a) Structural studies. Formalized and artificial languages
   b) Indexing methods. Index systems. Subject entries and denominators, relations between concepts
   c) Defects and merits of systems from the viewpoint of usefulness

6. Elements of classification theory
   a) Universal systems and analysis of their structure (Bliss, UDC, CC and others)
   b) Universal Decimal Classification, its characteristics and structure, trends of its development and present state of research
   c) Method of classification according to UDC
   d) Special classifications and their structure

7. General knowledge of mechanization and automation of the information process
   a) Linguistic problems, technical problems and their correlation
   b) Principles of mechanization and automation of information.

Organization of information

1. Organizational systems of scientific and technical information

2. International co-operation in information
   - International Federation for Documentation (FID)
   - International Association of Subject Studies and Information Officers (AID)
   - ASLIB
   - International Organization for Standardization (ISO)
   - ISO/TC 46 "Documentation"
   - UNESCO

Organization of information in national and regional centers.
3. Historical outline of the development of information activities in Poland

4. Organizational structure of information services in Poland
   a) Centres of information
      - industrial centres
      - branch centres
      - centres in ministries
   b) Central Institute for Scientific, Technical, and Economic Information
   c) Special libraries as a fundamental component part of an information centre
   d) Organization of information service in the Polish Academy of Sciences
   e) Organization of information service in the Ministry of Higher Education
   f) Organization of information service in the Ministry of Health and Social Welfare
   g) Co-operation among information centres

5. Planning information activities
   a) Connection between plans for information centres and for the development of technology and economy
   b) Plans of information activities as a component part of the plan of technical development

6. Financing information activities

7. Employment. Features of the profession, qualifications, training conditions, academic degrees

8. Survey of legislation concerning scientific, technical, and economic information

9. Co-operation between the information services and scientific, technical, and professional organizations

10. Co-operation among information services of the socialist countries

11. Public relations. Training of users of information

12. Economic effectiveness of information activities

Reprography

1. Historical survey of reprographic techniques

2. Needs of information centres

3. Modern printing and methods of rapid duplication of documents
   a) Small-scale polygraphy, photo-reproduction, xerography, etc.
   b) Modern apparatus and technical equipment
   c) Material, descriptions, characteristics, etc.

4. Equipping information centres with printing, photoreproduction, and other apparatus
5. Organizing a centre for small-scale printing and a centre for photoreproduction in the information centre
a) Organization of the work and utilizing the equipment
b) Co-operation between printing services

6. Economic aspects of reprography in information centres
a) Analysis of costs
b) Calculating the cost of services

7. Practical work in small-scale printing laboratory

Notes:
1. The following practical training is obligatory:
   - After 1st semester - Acquisition of material 1 week
   - After 2nd semester - Alphabetical catalogue 4 weeks
   - After 4th semester - Subject catalogue 4 weeks
   - After 6th semester - Information work in a library 4 weeks
   - After 7th semester - Practical training according to chosen specialization 2 weeks

   Total time of practical training 15 weeks

2. During the 1st, 2nd and 3rd year of studies, 3-days visits are planned to libraries or other institutions or organizations (paper mills, printing works, information centres, publishing houses, etc.)

Type of training
- Scientific information

Conditions of admission
- Graduate diploma from a secondary school

Are foreign participants allowed
- Yes

Conditions of admission for foreign participants
- Same as for Polish students

Duration of training
- 4 years

Examinations
- Entrance, during the course and Master's degree examination as a final

Degrees or other qualifications granted
- Magister Bibliotekoznawstwa (Master of Library Science)

Language of lectures
- Polish
Tuition fees: Free
Financial aid for trainees: State subsistence grants for outstanding students
Number of trainees: About 25 graduates yearly. Some 10 persons of them with specialization in scientific information

WARSAW

Pomaturalne Studium Dokumentacji i Informacji Technicznej i Ekonomicznej
(Professional College in Documentation and Technical and Economic Information),
Zeromskiego 81, Warsaw
Director: Mrs A. Tabor
Year of foundation: 1958
Until 1969 the College existed under the name of the State School for Scientific and Technical Documentation

NON-GRADUATE

Programme

1. Fundamentals of political sciences: 240 hours
2. Sociology, psychology, organization of work - selected problems: 240
3. Russian: 480
4. A second foreign language: 960
5. Political economy: 720
6. Selected legal problems: 480
7. Technical drawing: 360
8. Organization of national economy: 720
9. Archive studies: 360
10. Selected problems in technology: 840
11. Technical and economic information: 240
12. Classification of documents: 480
13. Collecting and processing of documents: 600
14. Dissemination of Information: 600
15. Typing: 240
16. Practical training
(practical training of 4 weeks is obligatory, after the 2nd and 3rd semesters):
17. Physical training: 720

Type of training: Professional study in documentation and technical and economic information

Conditions of admission: Completion of a secondary school and entrance examination

Are foreign participants allowed: No

Duration of training: 2 years (4 semesters), Full-time
For what kind of work are the students being trained?

Assistants in information centres

Examinations

Entrance, during the course and final examinations

Degrees or other qualifications granted

Technician-documentalist

Language of lectures

WARSAW

Centralny Instytut Informacji Naukowo-Technicznej i Ekonomicznej (CIINTE) (Central Institute for Scientific, Technical and Economic Information),

Al. Niepodległości 188, Warsaw

Director: W. Pirog
Head of Training Department: Prof. Dr. J. Marchlewski

Year of foundation of the course: 1950

The Central Institute for Scientific, Technical and Economic information is the leading organization for professional education and training in the field of information. The responsibilities of the Institute include:

a) preparation of programmes, methods, training material and instructional aids for courses, seminars, etc., held by CIINTE and other organizations, and aimed at improving the qualifications of information workers;

b) education and training of lecturers, instructors and other specialists with particular reference to programmes and methods of training in the field of scientific, technical and economic information;

c) co-ordination of programmes and methods for the continuous education and training of information workers, giving opinions on drafts of courses to be organized by various ministries and branch centres, and giving expert assistance on their behalf;

d) methodical and direct assistance to centres, organizations and institutions engaged in training and advancement of information workers.

**Type of training**
Extra-mural advanced course for information workers

**Conditions of admission**
- Information workers who have completed the basic course organized by CINTE, or equivalent, one, and have been employed for at least 2 years of which one year must be in information work,
- are graduates from a higher school or a secondary school,
- have a good command of at least 2 foreign languages (one language active and one passive-command).

**Are foreign participants allowed?**
Yes

**Duration of training**
18 months, 1,200 hrs., i.e. 200 hrs of lectures and exercises and 1,000 hrs of home-work

**For what kind of work are the students being trained?**
Subject information specialists, scientific and technical librarians, information workers

**Examinations**
Entrance oral examination obligatory for students who have not attended the basic course; examinations during the training; final examination.

**Degree or other qualifications granted?**
Certificate obtained to examine in mathematics 3rd class A an educated individual in mathematics to obtaining degree B to limit an individual to investigate individual.

**Language of lectures**
Polish

**Tuition fees**
Free textbooks to be bought, expenses are met by the employers.
Number of trainees

About 250 per course (from all over the country)

Other data

CIINTE organizes also courses lasting 3-6 days, conferences of 1-3 days, and seminars for information workers, heads of special libraries, and particularly for librarians employed by libraries attached to information centres.

Subjects of courses and conferences:

1. Selected problems in special librarianship and scientific, technical and economic information (6-days course)
2. Patent documentation and information (2-days conference)
3. Standards documentation and information (2-days conference)
4. Documentation and information of trade literature (1-day conference)
5. UDC as means for systematization of press photographic collection (40 hrs course, extra-mural, 2 times 2 hours in a week during 10 weeks)
6. Collecting information material in a technical library, and circulating periodicals (2-days conference)
7. Dissemination of unpublished information
8. Reprography - selected problems
9. Mechanical recording and retrieval of information in the Institute of Zootechnics
10. Introduction to mechanization and automation of information process
11. Mechanization of information retrieval
12. Automation in information processing
13. Organization and keeping of edge-notched card files

**Tuition fees**

Free; textbooks to be bought

**Number of trainees**

90
PROGRAMME

A. Information
1. An outline of information work as an activity
2. Elements of Information work as part of traditional librarianship
3. Information activities and the profession of Librarian
4. Factors influencing an increased demand for scientific, technical and economic information
5. The information activities of libraries and kinds of information
6. Organization of the information services in Poland and abroad
7. The role of Information in a planned economy
8. Co-operation and co-ordination of library work in Information activities
9. Using technical methods in Information work

B. Documentation
1. The concept of "documentation" and its relation to "Information"
2. Kinds of documents
3. Collecting, collating and disseminating documents in certain fields of knowledge

Since 1967 there is also a 5-years extra-mural study course in Library Science at the Wroclaw University, including 20 hours of lectures on an "Outline of problems in scientific information and documentation" in the 4th year.
PORTUGAL
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

LISBON

Centro de Documentação Científica Ultramarina (The Centre of Scientific Documentation for Overseas Territories),
Av. Ilha da Madeira (Restelo), Lisbon 3
Director: Dr. Z. Ferreira Paulo

NON-GRADUATE

Preparatory course for documentalists
(The course has been held in Portugal and Brazil)

Programme
1. Introduction
2. Documentation
   a) history
   b) elementary concepts
   c) scientific documentation, with some examples from physics, chemistry; natural sciences, economy, agriculture, engineering, medicine
   d) economics of information
   e) terminology
   f) scope and purpose
   g) co-operation in documentation
      - internal
      - external
      - international
   h) co-ordination
      - centralized
      - directed
      - spontaneous
   i) standardization of scientific management
   j) organization of documentation
      - at home
      - abroad
      - international
   k) flow of documentation
   l) centralization or decentralization advantages and disadvantages
   m) documentation centres and their organization
      - internal regulations
      - activity
      - functional connections
      - technical equipment
      - scientific, technical and auxiliary personnel
   n) elementary differences between an information centre and a library
   o) types of information centres
p) documentation and information (scientific, etc.)
   - absolute and relative scope
   - basic purposes and means
q) evaluating the output of information centres
r) economics of information centres
3. Documentation and information documents
   a) cards
   b) analyses
   c) information without supplying material
d) card index
e) archives
4. Methods and techniques of documentation
   a) acquisition
   b) selection
c) recording
d) making an inventory
e) standardization (standards in documentation)
f) bibliography
g) classification
h) cataloguing and catalogues
i) reproduction
j) dissemination
k) exchange
5. Scientific and technical information
   a) organization of information
   b) co-ordination and co-operation
6. Methodology of scientific information
   a) planning
   b) retrieval of information
c) selection
d) translations
e) documentation analysis
f) circulation of documents
g) informational functions
h) mechanization of the information process
7. The technique of scientific information
8. Documentation and scientific information as instruments of progress

Type of training: Preparatory course for documentalists
Duration of training: Four months
For what kind of work are the students being trained: Documentalists
Language of lectures: Portuguese

Course for documentalists

Programme

Theoretical sessions: Lectures
1. Curriculum for assistant documentalists
2. Classification
III. Practical work

III. Visits, exhibitions, audio-visual sessions and lectures

Course for assistant-documentalists

Programme

I. Theoretical sessions. Lectures
1. The Centro de Documentación Científica Ulramarina and other documentation services
   a) legal basis of organization
   b) structure and functions; diagrams
   c) publication
2. Documentation work
   a) types of document
   b) acquisition
   c) filing, recording
   d) cataloguing; documentation cards; files
3. Bibliography
4. Union catalogues
5. Lending
6. Reference books

II. Practical work

III. Visits, exhibitions, audio-visual sessions and lectures

Type of training

Course for documentalists and assistant-documentalists (on-the-job training)

Conditions of admission
Participants of the course for documentalists should be university graduates.

Duration of training
3 months

Degrees or other qualifications granted
Diploma
SPECIAL

Introductory course to the Universal Decimal Classification
(the course has been held in Portugal, Brazil, Angola and Mozambique)

Programme

1. Introduction to the classification of documents
   a) characteristics of some systems
   b) advantages and disadvantages of subject classification
   c) techniques of subject classification
   d) some basic principles of the practical use of subject classification

2. Chief principles of using the UDC system
   a) history of UDC
   b) principles of the structure of the system
   c) using UDC
   d) UDC tables

3. Definitions and symbols
   decimal symbols and their use

4. Structure of the Universal Decimal Classification
   a) citation order (structure of composite decimal symbols)
   b) filling order (structure of the card index)

5. Use of the UDC system
   a) integral use
   b) partial use
   c) UDC users in Portugal

6. Practical principles of using UDC tables
   a) examples of UDC illustrating the practical use of subject classification
   b) rules limiting the multiplicity of solutions for the construction of a UDC number
   c) analysis of improper methods of using UDC tables

7. Criticism of the UDC system
   a) basic criticism of the system
   b) specific criticism of certain sections of the principal and auxiliary tables

8. Present problems of the UDC system
   a) difficulties and limitations
   b) differences and anomalies
   c) the evolution of UDC
   d) methods of procedure

9. Future of UDC
   a) increasing criticism and the need of a fundamental alteration of the system in accordance with modern concepts in humanities and the social, exact and applied sciences
   b) deliberations on some documents, facts and commentaries
   c) immediate decisions taken by FID
   d) actual state of the problem
   e) synthesis of the criticism of "The Future of UDC"

10. Modern trends of the evolution of the classification of documents
    a) special classifications
b) mechanization of documentation and information and its use in the classification of documents

c) basic stages in the development of the classification of documents

Of the 24 lectures 16 are theoretical and 8 connected with practical work.

**Type of training**

- Special course on classification

**Duration of training**

- Lectures are held 3 times a week for a period of 2 months

**For what kind of work are the students being trained?**

- Documentalists

**Language of lectures**

- Portuguese

---

**Course on organization of documentation and scientific information**

(The course has been held in Portugal and Brazil)

**Programme**

1. **Methods of documentation**
   - a) fundamental concepts and their use in science and technology
   - b) International Institutions
   - c) National institutions
   - d) co-operation
   - e) co-ordination

2. **Fields of documentation**
   - a) bibliography
   - b) standardization
   - c) classification
   - d) mechanization
   - e) automation
   - f) preparing scientific works

3. **Training of documentalists**
   - International and National Institutions

4. **Organization of documentation centres and scientific information services**
   - a) libraries, card indexes, map collections, photographic and gramophone record collections

5. **Methodology**
   - planning, organizational diagrams, work timetables
   - Methods of research, information and dissemination
   - International and National information
   - studies on output, efficiency and economics of information

6. **Documentation techniques**
   - a) bibliographical searching
   - b) analysis of documentation
   - c) classification (UDC system)
   - d) selection
e) reproduction  
f) dissemination  
g) exchange  
h) standardization in documentation

Type of training  
Special course on organization of documentation

Duration of training  
Classes are held 3 times a week for one month

For what kind of work are the students being trained  
Candidates for scientists, lecturers, special librarians

Examinations  
None

Degrees or other qualifications granted  
Certificate of attendance

Language of lectures  
Portuguese

SPECIAL

Course on standardization of documentation  
(the course has been held in Portugal and Brazil)

Programme

1. Introduction

2. History, structure and functioning of some standardization institutions:
   a) international
   b) foreign (mainly Brazil)
   c) Portuguese

3. Conferences and co-ordination in standardization
   a) international
   b) Portuguese-Brazilian
   c) in Portugal

4. Operational phases and specific terminology of standardization:
   a) ISO TC 46 standards and national legislation
   b) standards of the Brazilian Documentation Commission
   c) CT 7 standards

5. Structure and technical problems of the Commission of Standardization of documents
   a) ISO TC 46 (international)
   b) the Brazilian Documentation Commission
   c) CT 7 (Portuguese)

6. Types of standards

7. Standard documents of interest in documentation. Specifications:
   a) international recommendations and projects of recommendations
   b) foreign
   c) Portuguese
   d) equivalents (international, Brazilian and Portuguese)

8. Subjects of documentation standards:
   a) critical study of subjects
   b) classification of standards
c) study of the structure of analytical indexes (key-words)

9. Comparative study of the principal documentation standards
   a) bibliographic cards, standardization cards, etc. (formats),
      recording of bibliographic cards
   b) publications (documents), a general index, numeration
   c) bibliographic references
   d) periodical publications; format A4; conventional abbreviations
      of titles; bibliographic reference; general index; presentation
      of titles
   e) microcopies; terminology and definitions; dimensions; scales
      (of reduction)

10. Methods of dissemination of standards
    a) meetings, operational commissions, contact with the public
    b) periodicals
    c) standards
    d) files of cards for documentation standards
    e) catalogues of standards

11. Present state of work in the field of standardizing documents
    a) on an international scale
       - ISO
       - UNESCO - operational groups
       - national institutions not affiliated to ISO
    b) in Brazil
    c) in Portugal

12. Subjects of research. Programming standardization of documents

13. Other aspects of standardization in the organization of intellectual work
    a) statistics and standardization
    b) nomenclature in bibliography
    c) Universal Decimal Classification (UDC) as a standard
    d) public relations and the organization of intellectual work

14. Present problems of standardization of documentation
    a) at the international level: a real co-ordination of various fields
       of standardization; greater dissemination of standardization at
       all levels and fields of intellectual work
    b) at the Portuguese level: standardization and freedom of thought;
       dangers connected with overstandardizing or with premature
       standardization; development of work in standardization and the
       results of standardization; shortening the operational phases;
       programming for short periods; adaptation to scientific activities,
       solutions and material already confirmed in technical and indus-
       trial activities; the Brazilian-Portuguese operational group in
       the field of standard terminology

**Type of training**
Special course on standardization

**Conditions of admission**
University diploma

**Duration of training**
Classes are held twice a week during two months

BUCAREST

Institutul Central de Documentare Tehnica - IDT (The Central Institute for Technical Documentation),
Str. Cosmonautilor 27-29, Bucarest
Director: Mr. V. Taraboi

Year of foundation of the course: 1955

The Central Institute for Technical Documentation (IDT) organizes the further education of medium- and high-level staff of technical information and documentation departments in institutes and industrial enterprises and technical libraries.

The training courses last 4-6 days and include theoretical lessons and seminars.

Types of course organized by IDT in 1968:
A. three types of course designed for the further training of documentation engineers;
B. a special course for patent documentation engineers;
C. two types of further training course for technical librarians.

Programmes

A. Introduction to technical and scientific information and documentation

1. Method and organization problems of the information and documentation activities within an enterprise
2. Documentary media
3. Identification of sources and acquisition of documentary materials
4. Data processing
5. Current awareness services and information for executives
6. Subject information
7. Organized study of publications
8. Organization and functioning of a technical library
9. Bibliography

10. Introduction to the Universal Decimal Classification
11. Liaison within an enterprise

Seminars

Introduction to technical and scientific information

1. Theory of technical and scientific information
2. Secondary sources of information
3. Identification and use of documents of restricted circulation
4. Document indexing
5. Co-ordinate indexing
6. Improvements in the Universal Decimal Classification
7. Abstracting
8. Documentation regarding patent literature
9. Classification systems of patents
10. Equipment used in information and documentation. Reprography and duplication
11. Storage and retrieval by computers. Component parts, functioning, programming (optional)

Seminars

**Basis of information and documentation**

1. Method and organization problems in information and documentation (introductory lesson)
2. Organization of technical and scientific information and documentation, at home and abroad
3. Role and organization of technical libraries
4. Sources of information
5. Documentary media
6. Identification and acquisition of documentary materials
7. Identification, acquisition and use of documentary materials of restricted circulation
8. Universal Decimal Classification
9. Data processing (analysis of the needs of information, selection processing forms)
10. Bibliographical work
11. Analytical processing. Abstracting
12. Preparation of reviews
13. Current awareness services and information for executives
14. Organized survey of publications
15. Subject information
16. Documentation regarding patent literature
17. Classification systems of patents
18. Mechanization and automation applied to information and documentation
19. Reprography and duplicating machines and equipment

Seminars

**SPECIAL**

**Information and documentation in patent literature**

1. Utilization of patent literature in documentation problems of applied research and technical development
2. Identification and acquisition of patents
3. Classification systems of patents
4. Organization of a patent collection. Cataloging of patents
5. Retrospective searching of patent literature
6. Defining novelty and progress in examining an invention
7. Patent legislation. Technical, economical, administrative aspects of various countries
8. Juridical problems occurring in drafting claims. Protection of patents
9. Exploitation of patents. The problems of technical and market literature
10. Checking of the validity of the patents concerning installations or products

Seminars
**Introductory course for technical librarians**

1. Technical libraries. Basic documents. Functions
2. Documentary media in a technical library
3. Growth of the library stock
4. Stock maintenance
5. Filing of documents on the shelves
6. Rules for catalogue entries
7. Library catalogues
8. a) Bibliography
   b) Readers' services
9. Universal Decimal Classification
10. Documentation methods

Seminars

**Advanced course for technical librarians**

1. Library catalogues
2. Secondary information sources: structure, utilization
3. Bibliographical work
4. Active information
5. Universal Decimal Classification
6. Publicity of technical literature within institutions and enterprises

Seminars

**Type of training**

Short further training courses

**Conditions of admission**

A and B courses can be attended only by engineers and technicians. The C course can be attended by graduates working in a technical library.

**Duration of training**

4-6 days

**For what kind of work are the students being trained?**

Documentation engineers and technical librarians

**Examinations**

None

**Degrees or other qualifications granted**

None

**Language of lectures**

Romanian

**Tuition fees**

Charges are met by the enterprises whose engineers and librarians attend the courses.

**Number of trainees**

In 1968 the courses were attended by 570 engineers and 200 librarians.

**Plans for other types of course in 1968-1970**

Long-term courses for documentation engineers are envisaged for 1969-1970.

**Type of training**

Courses in library science

**Conditions of admission**

Baccalauréat and at least 3 years of practical work in a library

**Are foreign participants allowed?**

Yes, young girls and boys speaking French, from tropical African countries

**Duration of training**

One year

**For what kind of work are the students being trained?**

Librarians

**Degrees or other qualifications granted**

Certificat d'aptitude à la profession de bibliothécaire
SOUTH AFRICA

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

No courses are run in South Africa in documentation and information, but the subject is included in library training courses. There are eleven universities in the Republic providing library training, which includes courses in documentation. Correspondence courses are also conducted by the University of South Africa in Pretoria.

BLOEMFONTEIN

Department of Librarianship, University of the Orange Free State,
P.O. Box 339, Bloemfontein, OFS

DURBAN

Department of Librarianship, University College,
Salisbury Island, Durban, Natal

RONDEBOSCH

School of Librarianship, University of Cape Town,
Rondebosch, Cape Province

FORT HARE

Department of Librarianship, University College of Fort Hare,
Fort Hare, Cape Province

GRAHAMSTOWN

Department of Librarianship, Rhodes University,
Grahamstown

JOHANNESBURG

Department of Librarianship, University of Witwatersrand,
Jan Smuts Avenue, Johannesburg, Transvaal

KASSELSVLEI

Department of Librarianship, University College of the Western Cape,
Private Bag, Kasselsvlei, Cape Province

POTCHEFSTROOM

Department of Librarianship, Potchefstroom University for Christian Higher Education,
Potchefstroom, Transvaal, and Grahamstown, Cape Province.
PRETORIA
Department of Librarianship, University of Pretoria,
Pretoria, Transvaal

PRETORIA
Department of Librarianship and Bibliography, University of South Africa,
P.O. Box 392, Pretoria, Transvaal

STELLENBOSCH
Department of Librarianship, University of Stellenbosch,
Stellenbosch, Cape Province

Programme
1. Administration of libraries and scope of activities
   a) history of the book and the library
   b) analytical, descriptive and historical bibliography
   c) cataloguing
   d) classification (UDC, LC, Brown, Ranganathan, Bliss)
   e) principles of book selection
   f) information activities
   g) administrative practice
   h) storage
2. Documentation
   a) modern methods of information retrieval
   b) reference work
   c) studies on reading
3. Scientific information service
   a) types of library: school, special, etc.
   b) specialization in making collections in special fields

Type of training
Academic study in library science - documentation is included in the curricula

Conditions of admission
Leaving certificate of a secondary school or a certificate of studies completed at a university (Bachelor's degree)

Duration of training
1-4 years, depending on the institution where the course is held

For what kind of work are the students being trained
Librarians, special librarians, documentalists

Examinations
During the period of study and at the end of each academic year
Degrees or other qualifications granted

The following qualifications are obtained on qualifying, according to the course followed:

**Diplomas:**
1. Lower Diploma (one or two years after high school)
2. Higher Diploma (and degree (Bibl.)) (one year professional course after a three-year academic degree)
3. School Library Diploma

**Degrees:**
1. Bachelor (3 or 4 years combined academic and professional course)
2. Hons. degree (Bibl.)
3. M.A. (Bibl.)
4. Dr. Phil.

Language of lectures

English and/or Afrikaans

Tuition fees

R 125 - R 500

Number of trainees

About 40 graduates per annum

Other data

The South African Library Association has latterly made provision for a measure of specialization in particular types of literature (e.g. medicine, economics, Africana) and in library administration (e.g. university and special libraries or school and children's libraries).
**Spain**

**Training Institutions, Curricula and Other Information**

**Madrid**

**Escuela de Documentalistas** (School for Documentalists),
Avenida Calvo Sotelo 22, Madrid 1

**Director:** Dr. L.S. Belda

**Year of foundation of the School:** 1953

**Post-Graduate and Non-Graduate**

**Type of training**

Professional school of documentation

**Conditions of admission**

Upper grade - university graduate
Lower grade - graduates from high school

**Are foreign participants allowed?**

Yes

**Conditions of admission**

Same as for Spanish

**Duration of training**

Upper grade - one year
Lower grade - two years
For what kind of work are the students being trained

Documentalist, librarian, information scientist

Examinations

Entrance and final examinations are compulsory

Degrees or other qualifications granted

Upper grade - Documentalista
Lower grade - Ayudante de Documentación

Language of lectures

Spanish

Tuition fees

1000 pesetas

80 per year

MADRID

Instituto Nacional de Racionalización del Trabajo (National Institute for Scientific Management), Serrano 150, Madrid

Director: Dr. F. de la Sierra

Year of foundation of the course: 1960

SPECIAL

Course on organization of administrative work in the enterprise

Programme

1. Simplification and improvement of documentation
2. Structure and organization of enterprise
3. Psychology of enterprise
4. Documentation and information in the enterprise
5. Work safety, environment, public relation
6. Planning and preparation of administrative work
7. Evaluation and division of administrative work
8. Standardization and control of documents
9. Control of management
10. Proper management
11. Statistics and analysis of statistical data
12. Archives, correspondence, typewriting
13. Automation of administrative work

Type of training

Course on organization of administrative work; lectures on documentation are included in the programme

Duration of training

3 months

The Swedish Society for Technical Documentation (TLS) is responsible for regular training in the documentation field.

**TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION**

**STOCKHOLM**

Tekniska Litteratursällskapet - TLS (The Swedish Society for Technical Documentation),
Box 5073, 102 42 Stockholm 5

The Society arranges short courses of two weeks for personnel in documentation centres and special libraries. TLS has arranged about 30 courses of this type. The courses are arranged at various places in Sweden, mainly in collaboration with large libraries. The number of students in the courses is generally about 30.

TLS conducts its training activity on a non-profit basis. The applicants for the courses represent a variety of qualifications from secondary school to university education. The programmes of the courses can be divided into three groups:

A. courses for librarians and documentalists, mainly held as symposia, where each participant presents a paper on a special subject ending up with a general discussion;

B. courses for executive staff (for programme, see below);

C. special courses, for instance on data processing in libraries and on chemical documentation.

**Programme - for courses B**

**Type I**
1. International and Scandinavian co-operation
2. Acquisition of not easily available information
3. Reference service. Documentation service
4. Modern documentation methods
5. Coordinated indexing
6. Technical aids
7. Universal Decimal Classification
8. Bibliography:
   a) general
   b) biology, medicine, physics
   c) construction, electrical engineering
   d) industrial economy and organization
   e) chemistry, chemical industry
   f) engineering, material

**Type II**
1. Cataloguing
2. Universal Decimal Classification
3. Library service routines:
   a) loan service
   b) contact with other libraries
   c) accessioning and circulation of journals
   d) bibliographies
   e) reference books

A special commission is preparing a proposal to the Government on the training of librarians, archivists and documentalists. The training of clerical staff will also be considered. The proposal was submitted early in 1969.

ADDITIONAL INFORMATION

STOCKHOLM

Kungl. Tekniska Högskolans Bibliotek (Royal Institute of Technology Library),
Industrigarden 2, Stockholm 70

Svenska Institutet för Dokumentation, SINF.DOK (Swedish Council for Scientific Information and Documentation),
Fack, 100 72 Stockholm 43

arrange courses in the field of documentation and information retrieval.
The Swiss Association for Documentation arranges 12-day (3 times 4 days) introductory courses to documentation and 8-day (2 times 4 days) courses on classification. The participants are technicians, engineers, economists and scientific workers. About 30 persons are trained each year.

Training of documentalists in chemistry is conducted by the Faculty of Chemistry of the University of Basle. The lectures are delivered in German.
TUNISIA
TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

TUNIS

Training in documentation is carried out by the Institut Ali Bach Hamba.

In addition to students from Tunisia, a limited number of students from other French-speaking African countries are admitted.

An international team of visiting lecturers from Belgium, Federal Republic of Germany, France and the Netherlands alongside with Tunisian experts provides the students with a knowledge of the theory, methods and techniques of documentation.

Besides lectures, the course also includes practical exercises and guided visits to libraries and documentation centres. Starting with the fifth course (1969/1970), directed work experience will take place in the afternoons in a documentation centre in order to familiarize the students with documentation practice.

Type of training

A documentation training course

Duration of training

400 hours of lectures and exercises during six to seven months, 5 days a week from 8 a.m. to 12.30 p.m.
Conditions of admission

Leaving certificate of a secondary school (baccalauréat) or its equivalent
Employees of documentation centres and libraries who can present a certificate issued by their authorities containing the data concerning their studies

For what kind of work are the students being trained

Assistant documentalists and information workers

Examinations

Candidates take a competitive entrance examination in September and a final examination in April upon completion of the course
Entrance examinations are not required for students from other French-speaking African countries

Degrees or other qualifications granted

Assistant documentalist

Language of lectures

French

Tuition fees

None

Number of trainees

About 25 to 30 yearly

Besides training courses, the Institut All Bach Hamba also organizes refresher courses and documentation seminars
The possibility of organizing advanced training courses in documentation is presently being studied by the Institut All Bach Hamba

Other data
There are no training courses for documentalists in Turkey. There is, however, a Library School at university level at the University of Ankara.
East African School of Librarianship, Makarere University College, Kampala

POST-GRADUATE

1. Doctoral courses in scientific and technical information

A. Specialization - "Scientific and technical information"

Programme

Introduction

1. Subject, basic problems and methods of scientific and technical information

2. Sources of information (books, journals, patents, standards, reports on scientific and research projects, etc.).

Basic procedures for processing of documents

3. Procedure of semantic processing of documents:
   - Classification, subject matter division (see also: "Basic types of retrieval systems")
   - Preparation of bibliographic description
   - Annotation
   - Abstracting
   - Reviewing
   - Translation
   - Problems of mechanization of these processes
   - Editing

4. Procedures of non-semantic processing of documents and technical means applied:
   - Copying
   - Storage
- Duplication (single and circulation)
- Teletransmission

Information publications

5. Abstracting journals, express information service, bibliographical indexes, bibliographical and abstracting cards. Other publications of reference and bibliographical types on published sources. Collections of abstracts, files and other publications on unpublished sources. Reviews. Types of reviews: topical, comparative, etc. Mechanization of the processes of preparing information publications

Information and referral services

7. The main reference information file, principles and means of its realization

8. Special reference files and their organization. Principles and means of realization of special information files

9. Reference information service as distinct from the system of library and bibliographical services. Main reference information collections of central and regional information centres, as parts of joint stock, included in the national information system

Information retrieval systems

10. Retrieval systems
    Basic elements of retrieval systems
    Retrieval languages. Vocabulary of retrieval languages. Syntax of retrieval language as the means of expressing contextual relations. Influence of syntax on the translation from natural into information retrieval language
    Logic of information retrieval systems. General and specific relations. Principles of comparison

11. Basic processes of the performance of information retrieval system
    Translation of documents and queries from natural into information retrieval language. Inverse principle of the system. Concept of mechanization of retrieval system

Technical means for information retrieval

12. Non-machine means of information retrieval: Library cards, peek-a-boo cards, Uniterm cards, edge-punched cards. Area of application of non-machine means of implementation of retrieval systems
    Machine means for retrieval systems: Universal electronic digital computers. Possibilities of applying electronic digital computers to information systems

Main types of contemporary retrieval systems

13. UDC, representing systems with strong hierarchy

14. Indexes (subject indexes, author indexes, permutation indexes, specialized indexes)
15. Systems of the American Engineers' Joint Council (EJC) and of the Cybernetic Institute of the Ukrainian Academy of Sciences, representing systems with strong hierarchy and developed grammar. System "Putst-Pustu", representing grammar-free systems with weak hierarchy.

16. Specialized information retrieval systems. Analyses of some of these non-machine systems. Problems of retrieving copies of documents, according to their address.

17. Information retrieval system "Polsk-1".

Organization of scientific and technical information in the USSR.

18. The role of the State Committee for Science and Technology in coordination of scientific and technical information in the USSR. All-Union centers of scientific and technical information and their functions. Centralized treatment of published information materials.

19. Central branch organs of scientific and technical information, and their functions.

20. Regional (and branch) information organs and their functions.

Local organizations of scientific and technical information (in offices, factories, etc.) and their functions.

Organization of scientific and technical information abroad.

22. Organization of scientific and technical information in capitalist countries. Development, structure, contemporary organization of information services in USA, United Kingdom, and Japan.

23. International information organizations. Their tasks, methods and fields of activity (FID, ISO, IFLA). International cooperation in the field of scientific information activity.

24. Perspectives of the development of international relations. Coordination of scientific and technical information activities among the members of Comecon and all socialist countries. Analysis of advanced techniques and potential for textile and textile products.

B. Specialization: "Computing technology".

Programme

1. Introduction.

2. Information theory
   Quality of information

3. Boolean algebra
   Principles. Basic logical operations and their realization in electronics circuits. Derivation of complex logical schemes from simpler ones

4. Arithmetical foundations of machine operations
   Numerical systems - binary, decimal, octal. Advantages of binary numerical systems. Binary - decimal, octal and sexadecimal systems. Translation of numbers from one system into another. Representation of numbers. Fixed and floating point. Notation of number sign; etc.

5. Instruction coding
   Systems with one, two, three and four addresses. Following instructions - natural and constrained methods. Examples of instruction compilation for various coding systems. Examples of direct coding for these instructions. Length of words. Variable word length; etc.

6. Circuit building
   Code representation - parallel and sequential. Comparative characteristics of parallel and sequential calculation

7. Basic circuit elements
   Valve, semiconductor and ferrite and combined elements, semiconductor integrated circuits, cryogenic elements, thin film circuits.
   Reliability of elements
   Construction of elementary logical functions (negation, conjunction, disjunction) on various elements. Elements AND, OR, NOT, exclusive OR (Schoeffer). Construction of basic and auxiliary circuits on universal elements

8. Basic circuit terminals
   Circuit types and their utilization in machines

9. Memory devices
   Types of memory devices: classification of memory according to their destination, rules of operation, and representation of codes. Controlled access to memory devices of parallel and sequential operation. Memory versus remaining machine devices and role of various memory devices in machine circuit

10. Control devices
    Functions performed by control devices. Building of circuits of automatic control. Microprogrammed operation control. Debugging and verification of operation

11. Input and output devices
    Requirements and types of input and output devices. Punched cards input and output devices. Data input from punched tapes. Coding devices.
199

Translators
Devices for automatic data input into electronic digital computer.
Optical input devices
Optical display devices, drum and disk printers. Electrographic and
thermographic methods of quick print.

12. Special methods of computerized information processing
Sorting, Address - free access to memory. Programme storing. Meta-
programming

13. Problem of computer organization
Purpose and role of programming. Machine language. Compilation and
automatic programming. Choice of task-solving methods. Structural
scheme of electronic digital computer. Establishing flowcharts of
separate devices. Construction of electric circuits. Multiprogram-
ming. Multifold input. Precedence hierarchy in time-sharing. Ideas
of high-speed operating memory

C. Specialization - "Structural, applied and mathematical linguistics"

Programme
1. General problems
   a) General concepts of linguistic theory: language and speech (lan-
gue and parol), syntagmatics and paradigmatics, plan of expression
   and plan of a summary, synchronism and diachronism, the concept
   of models
   b) Methods of language description
   c) Statistical-probabilistic approach to language teaching (speech),
   individual and common features of language

2. Language levels
   a) Phonetics and morphology
   b) Morphology. Concept of morphemes
   c) Syntax
   d) Semantics

3. Relations between language systems
   Language typology. Linguistics of universals

Type of training
Doctoral courses in addition

Are foreign participants allowed
Yes

Duration of training
Doctoral - 3 years
Extra-mural - 4 years

For what kind of work are the
students being trained
Information scientists, highly qual-
ified staff in the theory and practice
of information science and technol-
ogy

Degrees or other qualifications granted
Doctor's degree in science
1. scientific and technical inform-
ation
2. computing technique
3. structural, applied and mathe-
matical linguistics
Language of lectures: Russian
Tuition fees: Free

II. Advanced training courses for scientific information workers

Course in scientific and technical information

Type of training: University degree

Conditions of admission:
1. University degree
2. Adequate period of employment in information work
3. Managers, engineers and scientific workers of centres of scientific and technical information
4. Applications for the course are submitted through the interested organizations

Are foreign participants allowed: Yes

Conditions of admission:
Same as for Russian candidates and knowledge of Russian language

Duration of training: 2 months

For what kind of work are the students trained:
Subject information specialists, information workers, scientific and technical librarians

Examinations:
Final examination

Degrees or other qualifications granted: None

Language of lectures: Russian

Tuition fees: 35 R.
Moskovskij Poligrafičeskij Institut, Redaktorskij Fakultet (Moscow Institute for Graphic Arts, Editing Faculty)
Sadovo - Spaskaja 6, Moscow

GRADUATE

Programme

During the studies, in addition to general subjects, the following subjects are lectured on:

1. Theory and practice of editing
2. Principles of technical and scientific information
3. Editing of scientific and technical information publications and literature
4. History of the Soviet Communist press
5. Principles of modern technology
6. Scientific and technical terminology and designation of physical and technical quantities
7. History of publishing
8. Editing of contemporary Russian
9. History of Journalism
10. History of the foreign Communist press
11. Technology of the printing industry
12. Polygraphic and artistic book-design
13. Organization, economy and planning of publications

Type of training

Courses in information science included in the programme of training at the Editing Faculty

Duration of training

5½ years

For what kind of work are the students being trained

Editors, librarians for all types of library, information workers

Examinations

Entrance, during the course and final examination

Degrees or other qualifications granted

Diploma of editor of scientific and technical literature and information

Language of lectures

Russian

Tuition fees

Free

MOSCOW; KHARKOV; LENINGRAD

Instituty kul'tury (Institutes of Culture)

The library faculties of these Institutes prepare qualified librarians and bibliographers for technical libraries.
GRADUATE

Programme

During the course, in addition to general disciplines, the following subjects are lectured on:

1. Economics and organization of production in industry 200
2. History of technology 60
3. Library science 320
4. Foreign language - first 370
   - second 182
5. History of library science in USSR and abroad 70
6. Bibliography (general course) 45
7. Bibliography of social and economic literature 145
8. History of technical books 94
9. Scientific and technical information 100
10. Technical methods in bibliographic and information work (mechanization and automation of storing and retrieval processes) 140
11. Handling patent literature 24

Type of training

Lectures in information science included into the library science programme

Duration of training

4 years
5 years extra-mural education

For what kind of work are the students being trained

Librarians and bibliographers for technical libraries

Examinations

Entrance, during the course and final state examinations

Degrees or other qualifications granted

Diploma of qualified librarian and bibliographer of technical libraries

Language of lectures

Russian

Tuition fees

Free

MOSCOW

Vsesojuznyj Institut Naučnoj i Tehničeskoj Informacii - VINITI (All-Union Institute for Scientific and Technical Information), Baltijskaja ul. 14, Moscow. A-219

Director: Prof. A.I. Mikhailov

SPECIAL

A. Course in mechanization and automation of information processes
### Programme

1. Theory and organization of scientific and technical information  
2. Information retrieval systems and methods of their implementation  
3. Means of automation and mechanization of information retrieval processes  
4. Reprography, microcopying, mechanization of information processes  

Total: 200 hours

### SPECIAL

**B. Course on reference collections**

Course A - 25 R.  
Course B - 16 R.
VILNIUS

Vil'nyuskiy Gosudarstvennyy Universitet im. V. Kapsukasa, Fakul'tet Bibliotekovedenija i Bibliografii (Vilnius State University, Faculty of Library Science and Bibliography), Vilnius

GRADUATE Programme

During the studies, in addition to general subjects, the following subjects are lectured on:

1. Higher mathematics (incl. principles of linear programming)
2. Electronic digital computers and programming
3. Applied linguistics
4. Foreign language (first, second)
5. Economics of industry
6. Introduction to scientific information
7. History of books and library science
8. Library science
9. Information retrieval systems
10. Bibliography (general course)
11. Technical methods in information and library work

Type of training
Lectures in information science included in the library science and bibliography programme

Duration of training
5 years

For what kind of work are the students being trained
Librarians for all types of library and information workers

Examinations
Entrance, during the course and final examinations

Degrees or other qualifications granted
Diploma of qualified librarian and bibliographer

Language of lectures
Russian

Tuition fees
Free

ADDITIONAL INFORMATION

In addition to the courses mentioned here main information centres and republic institutes of information organize systematically courses and seminars on scientific and technical information. The subjects of the seminars and courses are worked out according to the activity/field of the organizing bodies.
UNITED ARAB REPUBLIC

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

CAIRO

Section des Archives et de Bibliothéconomie de la Faculté des Lettres de l'Université de Caire (Archive and Library Science Section of the Faculty of Arts at the University of Cairo), Cairo

GRADUATE

Programme
1. Methods of work in library science
2. Bibliography
3. Documentation
4. Cataloguing
5. Classification

Duration of training
1. two years - for Diplôme B.A. en bibliothéconomie
2. three years - for Diplôme M.A. en bibliothéconomie
3. five years - for Diplôme Ph.D. en bibliothéconomie

National Information and Documentation Centre (NIDOC),
Alfahreer St., Dokki-Cairo

Course in documentation

Programme
1. Organization of documentation centres
2. International exchange of scientific data
3. Computers and their use in documentation
4. Classification - theory and method
5. Bibliography
6. International co-operation in documentation
7. The technique of documentation work

Type of training
Training course

Conditions of admission
1. university education,
2. practice in information services,
3. knowledge of English or French apart from another language

Duration of training
3-4 weeks

For what kind of work are the students being trained
Personnel of information services of the United Arab Republic
| Examinations | None |
| Degrees or other qualifications granted | None |
| Tuition fees | The courses are financed by the Government of the United Arab Republic and UNESCO |
| Number of trainees | 80 persons |

**ADDITIONAL INFORMATION**

The training of specialists in automation processes of information and classification is also conducted in the United Arab Republic.
UNITED KINGDOM

Training of documentalists and information workers in the United Kingdom is closely connected with the training of librarians. Specialized training is provided by university schools of librarianship which have already awarded their first degrees in librarianship (M.A., M.Phil., Ph.D.) and by different library schools which are conducting training according to the Library Association's Syllabus leading to the professional examination of the L.A.

Some schools have adapted their curricula to lead to degrees awarded under the aegis of the Council for National Academic Awards. Post-graduate diploma courses are available at University College London, Sheffield University, the University of Strathclyde (Glasgow) and Queen's University (Belfast).

Courses of one year's duration leading to the post-graduate professional examination held by the Library Association are also available from other full-time schools of librarianship. Two-year full-time courses are available at eleven schools of librarianship which prepare non-graduate students for the examination of the Library Association.

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

ABERDEEN

Robert Gordon's Institute of Technology, School of Librarianship
Principal Lecturer in charge: J. Mc Connell Orr, F.L.A.
Year of foundation of the School: 1968

POST-GRADUATE

Programme of training is based on the syllabus of examinations of the Library Association.

Programme
A. Compulsory subjects
1. The library in society
2. The management of libraries
3. Classification and cataloguing
4. Practical classification and cataloguing
5. Subject bibliography

B. Optional subjects (two to be chosen)
6. Historical bibliography
   - The social and technical history of the printed book
7. History of libraries
8. Analytical and descriptive bibliography
10. Indexing, abstracting and information retrieval
11. Bibliography and librarianship of children's literature
12. Library service for young people
13. Archive administration
14. Palaeography  
15. Hospital libraries  
16. Comparative librarianship  
17. Library services for science and technology  
18. Literature and librarianship of local history  

NON-GRADUATE  
Programme  
First year  
Compulsory papers  
1. The library and the community  
2. Government and control of libraries  
3. The organization of knowledge  
4. Bibliographical control and service  

Second year  
List A  
1. Academic and legal deposit libraries  
2. Special libraries and information bureaux  
3. Public (municipal and county) libraries  

List B  
1. Theory of classification  
2. Theory of cataloguing  
3. Practical classification and cataloguing  
4. Bibliography  
5. History of libraries and librarianship  
6. Handling and dissemination of information  
7. Library service for young people in schools and public libraries  
8. Hospital libraries  
9. Archive administration  
10. Palaeography and diplomatic  

List C  
Bibliography and librarianship of English, Welsh, French, Spanish, Italian, German, Indo-European, Greek and Latin language and literature  
Bibliography and librarianship of history, geography, philosophy, social sciences, economy, fine arts, science, technology, medicine  
Bibliography and librarianship of particular countries and regions  

Type of training  
Courses in librarianship and information science  

Conditions of admission  
- A University degree for postgraduate course  
- Two passes in the General Certificate of Education (Advanced level) for non-graduate course  

Are foreign participants allowed? Yes

General statement concerning library school which are conducting training according to the Library Association's Syllabus
Overseas applicants will be considered on the merits of their individual school-leaving certificates, but in any case those who would not be accepted by a university in their own country cannot be accepted for entry to the Library Association's professional examinations

- One-year course for graduates
- Two-year course for non-graduates

Librarians, and information officers for all types of library

- Post-graduate Professional Examination
- Part I and Part II Examination of the Library Association

Associateship of the Library Association

English
£ 10 per session for U.K. students

ABERYSTWYTH

College of Librarianship, Wales,
Aberystwyth, Cardiganshire
Principal: F.N. Hogg, D.P.A., F.L.A.

POST-GRADUATE, GRADUATE and NON-GRADUATE

The following courses in librarianship are offered:
1. Post-graduate course leading to the post-graduate examination of the Library Association (programme of training see Aberdeen)
2. University degree course leading to a degree of Bachelor of Librarianship (University of Wales)
3. Two-year non-graduate course for the Associateship of the Library Association (programme of training see Aberdeen)

Type of training
Courses in librarianship and information science

Conditions of admission
1. Post-graduate course - a university degree and library experience are required
1. Post-graduate - four terms
2. Degree course - 3 years (nine terms consisting of two parts involving study of academic subject and librarianship)
3. Non-graduate - two years (seven terms for entrants without library experience, six terms for students with library experience)

Are foreign participants allowed

Yes

Conditions of admission

Overseas students may apply for places in the college providing they have the necessary educational qualifications and the financial backing of their Government or of another recognized body such as the British Council or UNESCO. They should write to the Library Association on matters of membership and eligibility to sit its examinations, or to the College in respect of the degree course.

Duration of training

For what kind of work are the students being trained

Librarians and information officers for all types of library

Examinations

Librarianship and information officers

1. Post-graduate Examination of the University of Wales and the College
2. Degree examinations of the University of Wales and the College
3. Part I and Part II Examination of the Library Association

Degrees or other qualifications granted

Associateship of the Library Association
Diploma L.S., B.L.S.

Language of lectures

English

Tuition fees

1. Post-graduate (four terms) £ 72
2. 3 year degree course £ 162
Financial aid for trainees

College courses are recognized by Local Education Authorities for grant purposes. It is the responsibility of the student to apply for a grant; intending students are advised to make preliminary enquiries about their eligibility for a grant before the college interview.

Belfast

The Queen's University of Belfast, School of Library Studies,
2 College Gardens, Belfast BT9 6 BQ
Year of foundation of the course: 1964

POST-GRADUATE

Course for university graduates

Programme

1. Organization and retrieval of information
2. Bibliography and reference work
3. Libraries in their social setting
4. Management of libraries
5. Bibliography of a subject area (Humanities, Social sciences, or Science and technology)
6. One optional subject
   a) Palaeography and archive administration
   b) Historical and analytical bibliography
   c) History of libraries and librarianship
   d) Library service for young people
   e) Documentation, aids to research and information retrieval
   f) Descriptive bibliography and indexing
   g) Library buildings
   h) Bibliography and librarianship of Irish history and literature

NON-GRADUATE

Course for non-graduates

Programme

as for graduates, plus one first-year subject from the courses for the
degree of B.A., B.Sc. or B.Sc. (Econ.), and one further optional subject from 6 above

GLASGOW

University of Strathclyde, School of Arts and Social Studies,
Livingstone Tower, Richmond Street, Glasgow C.1
Dean: W.E. Tyler, F.L.A.
Year of foundation: 1964

The following courses in librarianship are offered:
1. One-year course for the Post-graduate Diploma in Librarianship
2. Three-year course for the Degree of Bachelor of Arts in the School of Arts and Social Studies, with librarianship as the first principal subject

3. Two-year course for the Associateship of the Library Association

POST-GRADUATE

One-year course for the Post-graduate Diploma in Librarianship

Programme

1. The management of libraries, including a special study of one of the following:
   a) academic and national libraries
   b) industrial and special libraries
   c) public libraries
   d) school and children's libraries

2. Classification

3. Cataloguing

4. Three classes from the following, including at least one from each of sections a) and b):
   a) Bibilography, including a study of materials and research in a special field:
      - English literature, 1400-1800
      - English literature, 1750 to the present day
      - Literature for children
      - Geography
      - Mediaeval and modern history
      - Politics and law
      - History of science
      - Chemistry and chemical technology
   b) Historical bibliography
      - Analytical and descriptive bibliography
      - Documentation and information retrieval, consisting of: the recording, organization and dissemination of specialized knowledge. The theory of indexing, storage and information retrieval in special libraries. Item indexing: classification, alphabetical subject headings, semantic factoring, relational analysis. Term indexing. The application of machine techniques.
      - Coding. Strategies of search. The testing and evaluation of various indexing techniques. The practices of published indexing and abstracting services. The information service. Subject inquiries, literature searches. Abstracting, translation, bulletins. Preparation for publication: technical writing, typography and illustration, editorial procedure. Automation in reference work.
      - Documentary reproduction: the methods and economics of producing and copying documents. Copyright problems

Type of training: Post-graduate course in librarianship and information science

Conditions of admission: University degree

Are foreign participants allowed? Yes
Conditions of admission

Degrees or other qualifications granted

Language of lectures

Tuition fees

NON-GRADUATE

Two-year course for the Associateship of the Library Association

Programme based on the syllabus of examinations of the Library Association (see Aberdeen)

Type of training

Course in librarianship and information science

Conditions of admission

As for British students

One year

Librarians and information officers for all types of library

During the course and final examination

Post-graduate Diploma in Librarianship

English

£50

a) Obtained a Scottish Certificate of Education in five subjects, three of which are at higher grade; one must be in English and one either a language or a science, or

b) Passed the General Certificate of Education in five subjects, two of which must be at Advanced Level; one must be in English and one in either a language or a science, or

c) Obtained the Northern Ireland Senior Certificate of Education with five passes, two of which must be at Advanced Level; one pass must be in English, and one in either a language or a science, or
d) Passed the First Professional Examination of the Library Association, or
e) Obtained such other general educational certificate as the Council of the Library Association may accept as being of equivalent standard.
Duration of training: Two years
For what kind of work are the students being trained: Librarians and Information officers for all types of library
Examinations: Part I and Part II Examination of the Library Association
Degrees or other qualifications granted: Associateship of the Library Association
Language of lectures: English
Tuition fees: £50

LEEDS

Leeds College of Commerce, Department of Librarianship and Information Science,
28 Park Place, Leeds 1
Year of foundation: 1947

POST-GRADUATE, GRADUATE and NON-GRADUATE Programmes
based on the syllabus of examinations of the Library Association (see Aberdeen)

Type of training
Course in librarianship and Information science
- A university degree for post-graduate courses
- Two passes in the General Certificate of Education (Advanced Level) for non-graduate and under-graduate courses

Conditions of admission
- Attendance at a personal interview.
- Basic admission requirements are those laid down by the Library Association for its courses

- 1. One year for post-graduates
- 2. Three years for the B.A. (Librarianship) and B.Sc. (Information Science) courses
- 3. Two years for Library Association Final Part II course

Are foreign participants allowed? Yes

Duration of training
- One year for post-graduates
- Three years for the B.A. (Librarianship) and B.Sc. (Information Science) courses
- Two years for Library Association Final Part II course

Short courses for senior librarians are also a feature. These normally last one week.

200

London

University College London, School of Librarianship and Archives,
Gower Street, London W.C. 1
Director: Prof. A. Brown
Year of foundation: 1919

The educational and training programmes offered cover post-graduate diplomas, M.A., M.Phil. and Ph.D. degrees in librarianship, information studies and archive administration.

M.Phil. and Ph.D. in Librarianship and Archive Administration are awarded for approved work presented for examination in thesis form, supplemented by oral examination. For both degrees, the minimum qualifications for admission are similar to those for the M.A. For the Ph.D., a high level of academic and professional maturity is expected. Admission is normally to the M.Phil. degree in the first place, with provision for transfer to the Ph.D. in suitable cases. For full-time students, the minimum course is two years for the M.Phil. and three years for the Ph.D. Part-time courses are likely to be twice the length in each case.

The following post-graduate diploma courses are offered:

A. General Diploma in Librarianship
B. Diploma in Scientific and Industrial Library and Information Work
C. Diploma for Teacher-Librarians
D. Diploma in Archive Administration (details are not published)

POST-GRADUATE

A. General Diploma Course in Librarianship

Programme: 1. History of Libraries: examination of course work
2. Elements of Information: bibliography: one paper, including examination of course work
3. Subject bibliography - research sources in general and special fields: examination of course work
4. Cataloguing: one paper, and examination of course work
5. Classification: one paper, and examination of course work
6. Management studies in library and information work, including mathematics and statistical method: one paper, and examination of course work
7. The study of reading: examination of course work
8. Candidates must choose one of the following:
   a) Palaeography and diplomatic of English archives: two papers
   b) Bibliography of Asia and Africa: one paper, and examination of course work
   c) The literature of pure and applied science; communication problems, information systems: one paper, and examination of course work
   d) Advanced historical bibliography: one paper, including course work; and either modern book production: one paper; or manuscript studies: one paper.

Type of training: Course in librarianship.

Conditions of admission:
A good first degree and the university's diploma in librarianship or an equivalent qualification, a year of practical experience in library work; a good reading knowledge of at least two modern languages.

Are foreign participants allowed? Yes.

Conditions of admission:
As for English students.

Duration of training:
One year for full-time students. Part-time students are occasionally accepted for a course of two years.

For what kind of work are the students being trained?
Librarians for all types of library work.

Examinations:
The examination will consist of (a) an essay or report (of not more than 25,000 words), (b) two written papers in the field selected by the candidate, (c) an oral examination held at the discretion of the examiners.

The title of the essay or report must be submitted by the candidate for approval at least six months before the date of the examination. If the proposed subject is not approved, the candidate may submit an alternative within one month of being so informed by the university.
The two written papers must be in one of the following fields of study:

a) Historical and social studies in librarianship
b) Regional studies in bibliography and librarianship
c) Comparative studies in librarianship
d) Communication studies: information science, storage, retrieval and dissemination
e) Historical and analytical bibliographic studies
f) Classification and cataloguing studies
g) The study of reading
h) Manuscript studies
i) Management studies in library and information work

B. Diploma Course in Scientific and Industrial Library and Information Work

Programme

1. The literature of pure and applied science: communication problems; information systems: one paper, and examination of course work. Includes seminars and course work. Seminars are designed to enable students with different scientific interests to contribute to a common topic from their specialist viewpoints. Course work includes the writing of a paper in pure or applied science, prepared as though for publication in a specified journal; this paper demands subject knowledge and a wide-ranging search in the recent literature. Candidates also write a critical review of a specified scientific information system.

2. The history of modern library and information services: examination of course work, seminar work, and examination of course work. Seminars and course work with opportunities for specialization.

3. Subject bibliography: research sources in general and special fields: examination of course work. Seminars, lectures and extensive course work based on subject specialization.
4. Surveys and use of scientific literature: examination of course work
   Seminars and course work based on subject specialization

5. Classification: one paper, and examination of course work
   Lectures, seminars, and course work based on subject specialization

6. Cataloguing: one paper, and examination of course work
   Mainly seminars and course work, with specialization by types of service

7. Modern printing methods: one paper

8. Management studies in library and information work: one paper
   Provides opportunities to specialize by types of service

9. An individual study in an approved topic.
   The topic will normally be selected from subjects in course 1

**Type of training**

Course in Librarianship and Information Work

**Conditions of admission**

A first degree in a recognized branch of science, and a practical experience in library work

**Are foreign participants allowed?**

Yes

**Duration of training**

One year for full-time students; part-time students are accepted for a course of two years.

**For what kind of work are the students being trained?**

Librarians of scientific and industrial libraries and information workers

**Examinations**

As for General Diploma Course - A.

**Degrees or other qualifications granted**

M.A. in Information Studies

**Language of lectures**

English

**Tuition fees**

£ 62

**Financial aid for trainees**

Government

**Numbers of trainees**

6 - 10

**POST-GRADUATE**

C. Diploma Course for Teacher-Librarians

1. The history of librarianship, with special reference to the role of libraries in the history of English education: examination of course work

2. Subject bibliography: research sources in general and specialized fields: examination of course work
3. Cataloguing and classification: examination of course work
4. Library management studies: one paper
5. Reading and the use of books in education: two papers
   Includes a) Principles of child development, with special reference to the place of reading in the mental growth of children and adolescents; linguistic and reading ability; remedial reading; and b) Critical study of children's literature and outstanding collections
6. Use of libraries as aids to teaching: one paper
   Includes the role of the library in educational institutions, its relation to subject teaching in schools and colleges; the library needs of students and research workers; the flow of information in the education field
7. An individual study in an approved topic
   The course work required will consist of the planning and preparation, with appropriate bibliographies and annotations of a) an individual study in an approved topic at the student's own level; and b) material to be used in the presentation of a topic or part of a teaching syllabus for a specified group of pupils or students

The language requirement is that candidates must have a good reading knowledge of at least one modern language in addition to English

The City University, Information Science Section,
St. John's Street, London E.C. 1

The City University provides a full-time one-year course and a two-year part-time day-release (formerly evening) course in Information Science with a similar programme of training.

**POST-GRADUATE**

**Full-time course**

**Programme**

1. Information gathering
   a) Sources of information: their characteristics, comparative evaluation, and appropriate means of exploitation
   b) Published and unpublished sources: individual sources and organizations; oral, visual, and non-documentary sources
   c) British and foreign specialized sources: libraries, learned societies, trade organizations, research associations, national and international bodies
   d) Methods of locating sources: making efficient use of them, in particular, for obtaining detailed information

2. Information storage and retrieval
   a) Classification theory: hierarchic, scientific, by synthesis; logical principles and advanced research methods; principal classification systems at present in use
   b) Information storage and retrieval: indexing; large-scale mechanical and electronic methods; information retrieval systems; computer-production of indexes and selective dissemination of information; problems of testing systems; statistical evaluation
   c) Developments in linguistic and semantic analysis and logic for information storage and retrieval

3. Dissemination of information
   a) Flow of information: theory of human communication and the problems in research and industry
   b) Abstracting and the production of abstracts journals
   c) Organization of the flow of information in research, industry, and government; role of international organizations in the dissemination of information; liaison and advisory services
   d) Application of results of research and development
   e) Ergonomics: its application to information work

4. Legal and commercial aspects of information work
   a) Law: Patents, Trade Marks, Registered Design, and Copyright Law
   b) Standards: national, international and industrial standards; organizations dealing with standards

5. Administration and other aspects of information work
   a) Management of information departments: staffing; problems and organizational relationships; economics of information services
b) Reproduction and presentation of information: copying and reproduction methods; methods of typography, printing and illustration in relation to problems of efficient communication

c) Language studies: tuition in one foreign language to good technical reading standard; principles of translation and transliteration, and linguistic problems in information work

North-Western Polytechnic, School of Librarianship, 207 Essex Road, London N. 1

Head: E.P. Dudley, F.L.A.

POST-GRADUATE Programme

See University College-London: A. General Diploma Course in Libra-
rianship, and B. Course in Scientific and Industrial Library and Information Work.

Students may choose either the A or the B syllabus. A science degree is essential for the B course.

Type of training

Course in Librarianship and Information science

A university degree and at least one year of practical work in a library. Students entering by direct application to the school from universities are required to undertake a preliminary term of practical work.

Conditions of admission

Yes.

Are foreign participants allowed

See Graduate course of North-Western Polytechnic

Yes.

Duration of training

One year

For what kind of work are the students being trained

Librarians and information officers for all types of library

Examinations

Post-graduate Professional Examination of the Library Association

Academic Post-graduate Diploma in Librarianship of the University of London

Degrees or other qualifications granted

Yes.

Head, E.P. Dudley

Year of foundation: 1946

GRADUATE

Degree course

Programme

1. The "Universe of knowledge" and subject study
   Part I: the student considers knowledge as a whole, examining relevant disciplines such as epistemology, the growth of knowledge and the attempts made to form an integral view.
   Part II: choice of one of several subjects for more detailed study; subject bibliography and other aspects of the course can be closely related to the choice made:
   - Biology
   - Chemistry
   - Children's literature
   - English local history
   - Literary studies (English literature)
   - Music

2. Social studies (sociology, anthropology)
   The intention here is to demonstrate the interaction between society and library services.
   Part I: offers a broad study of the major social institutions in Britain today and introduces certain concepts used in the social sciences.
Part I: allows the student to examine in some detail the relationship between particular communities and the appropriate library services.

3. Communications studies
   Part I: begins by surveying the contributions made to the study of communication by such disciplines as semantics, philosophy, psychology, and information theory, assessing their relevance for librarians; this is followed by a course introducing the major systems of communication and control in society, with particular reference to those which have been developed for recorded and documentary communication.
   Part II: provides for further study of certain aspects of the above which are of special importance for the librarian, namely: library management, bibliographic organization, and indexing systems. In each of these there will be an element of specialization based on the student's subjects choice in Part I and his interest in a particular type of library.

4. Complementary studies
   Part I: includes courses in mathematics and logic, and the study of a foreign language with particular reference to the needs of libraries.
   Part II: choice from the following (one to be chosen):
   - Studies in printed communications
   - Literature and society
   - Library history
   - Descriptive bibliography and bibliographical cataloguing
   - Palaeography and the use of original documents
   - Personnel administration

Type of training: Course in librarianship and information science.

Conditions of admission: The minimum entry requirements are two General Certificate of Education (Advanced level) and three Ordinary level passes. General Certificate of Education subjects must include English language and either a foreign language or a science, desirably both.

Are foreign participants allowed: Yes (see details under "Other data").

Duration of training: Four years.

For what kind of work are the students being trained: Librarians and information officers for all types of libraries.

Examinations: Written examinations take place at the end of Part I (after four terms) and at the end of Part II (after ten terms). A final dissertation will be completed in the last two terms of the course.
Degrees or other qualifications granted

B.A. (Honours) of the Council for National Academic Awards

Language of lectures

English

Tuition fees

£ 45 per year (British students)

Financial aid for trainees

British students are supported by grants from local authorities or salaries from their libraries

Number of trainees

80

Other data

1. The School prepares overseas students for the qualifying examinations (both postgraduate and nongraduate) and also runs a special one-year course for experienced overseas librarians which does not lead to a qualification. The qualification courses incorporate a period of preliminary study and practical work in British libraries; the duration of the graduate course is therefore five terms beginning in April; for non-graduates the course lasts three years and begins in January. Pre-entry qualifications are as for British students, overseas equivalents being accepted if they are approved by the Library Association (non-graduate course). Students without "Advanced" level G.C.E. passes, but with five "Ordinary" levels or the equivalent may enter for the Library Association examinations after successfully completing a preliminary year of study at library school.

Fees for overseas students are £ 250 a year; £ 150 a year or pro rata for periods of preliminary study. A deposit of £ 50 must be sent before the course begins.

All students must have worked in a library in their own country for at least a year (non-graduates) or six months (graduates). They should be sponsored and financed by an official body such as their Government or municipality or by an international agency such as UNESCO or the British Council. Private students are rarely admitted. In any event the application must be forwarded...
NON-GRADUATE
Programme based on the syllabus of examinations of the Library Association (see Graduate course ("Other data") for all types of library

Type of training: H.

Conditions of admission:

1. Fluency in English must be perfect.

2. In addition to studies leading to the Library Association examinations, the School offers occasional short courses and symposia designed for experienced librarians.

Duration of training:

Two years.

For what kind of work are the students being trained:

Librarians and information officers for all types of library.

Examinations:

Degrees or other qualifications:

Two passes in the General Certificate of Education at Advanced level.

At least one year of practical work in a library without satisfactory practical experience of library work are required before entry to the preliminary term of the course.

Yes

Are foreign participants allowed:

Yes

See Graduate course ("Other data")

Language of instruction:

LOUGHBOROUGH

Loughborough Technical College, School of Librarianship,
Radmoor, Loughborough, Leicestershire
Year of foundation: 1946

POST-GRADUATE, GRADUATE and NON-GRADUATE

Programmes
based on the syllabus of examinations of the Library Association (see Aberdeen), but a university degree is also offered.

Type of training
Courses in librarianship and information science

Conditions of admission
1. A university degree - for post-graduate courses
2. General Certificate of Education (Advanced level) for 4-year course leading to B.A. or B.Sc. of Loughborough University of Technology
3. Two passes at General Certificate of Education (Advanced level) - for non-graduate courses

Previous library experience is not required for post-graduate and non-graduate courses
Are foreign participants allowed: Yes

Conditions of admission:

Similar conditions as above

Duration of training:

1. One-year course for post-graduates
2. Four-year course leading to B.A. or B. Sc. of Loughborough University of Technology
3. Two-year course for non-graduates

For what kind of work are the students being trained:

Librarians and information officers for all types of library

Examinations:

Part I and Part II Examinations of the Library Association
Post-graduate and non-graduate examinations

Degrees or other qualifications granted:

Master's and Bachelor's degrees of the University
Associateship of the Library Association

Language of lectures:

Tuition fees:

£69 per year (British students)
£260 per year (foreign students)

Number of trainees:

250

MANCHESTER

Manchester College of Commerce, Department of Librarianship,

Aytoun Street, Manchester M1 3GH
Head: J.L. Ingham, F.L.A.
Year of foundation of the courses: 1964

POST-GRADUATE, GRADUATE and NON-GRADUATE

Programmes

based on the syllabus of examinations of the Library Association (see Aberdeen)

Type of training:

Courses in librarianship and information science

Conditions of admission:

1. A university degree - for post-graduate course
2. General Certificate of Education (Advanced level) for 3-year course leading to B.A. in library studies
3. Two passes of General Certificate of Education (Advanced level) - for non-graduate courses

Are foreign participants allowed? Yes

Conditions of admission

- All foreign students must be sponsored by an official body or chief librarian in the country concerned, and have completed at least one year's experience in an approved library before the course begins.

Duration of training

- Post-graduate course - three terms (12 months) commencing in January of each year
- Three-year first degree course (Council for National Academic Awards)
- Two-year course for non-graduates

For what kind of work are the students being trained

Librarians and information officers for all types of library

Examinations

- Post-graduate course - mid-session examination (internal) in June and the Library Association Postgraduate Examination in December (external)
- Three-year degree course - June: internal examination
- Two-year course - mid-session examination (internal) in Summer of each year; Library Association Part I (Intermediate) Examination and the Part II (final) Examination, December of second year

- Two-year course - mid-session examination (internal) in Summer of each year; Library Association Part I (Intermediate) Examination and the Part II (final) Examination, December of second year

Degrees or other qualifications granted

All courses can lead to the Associateship of the Library Association, but the three-year course also leads to B.A. in library studies.

Language of Lectures

English

Tuition fees

- £250 per year for foreign students
Number of trainees
16
Two-year course 1966/67 - 60 students

Other data
Department of Librarianship organizes also short courses for senior personnel.
The College of Commerce has been designated as a future Polytechnic, and its title will be thus changed in due course.
Degree in Information Science may commence either Autumn 1969 or 1970.

NEWCASTLE

Newcastle-upon-Tyne Polytechnic, Department of Librarianship,
Education Precinct, Newcastle-upon-Tyne NE1 8SP

Head of Department of Librarianship: W. Caldwell, F.L.A.
Director of Studies in Information Science: T.D. Wilson, F.L.A.

Year of foundation of the B.Sc. in Information Science: 1968

GRADUATE

Programme

First year
1. Introduction to information sciences
2. Organization of knowledge (I): intended to lead to an understanding of what is meant by "the field of knowledge", of the methods and problems of scientific investigation, and of the bibliographical problems created by the growth and diversification of recorded knowledge
3. Social factors and documentation: a consideration of the psychological and sociological background to an individual, or groups of individuals, seeking or producing information
4. Mathematics (I): to provide a mathematical background suitable for information science and to assist with pure science and engineering studies
5. Basic science (I): to acquaint students with the fundamental vocabulary, concepts, methodology, techniques and some applications of physical and chemical sciences
6. Foreign language
7. Development of science and technology (I): a survey of the historical development of science and technology with due attention to social and economic changes

Second year
1. Organization of knowledge (II): with special reference to practical methods of information handling through classification, cataloguing, and indexing
2. Bibliography of, and information problems in, science and technology:
   a) sources of bibliographic information and general data in science and technology
   b) identification of some problems in information work
3. Report writing and editing
4. Mathematics (II)
5. Basic science (II)
6. Development of science and technology (II)
7. Short courses: graphics, and research methods in information science

Third year
A practical year spent in libraries and information centres

Fourth year
1. Information storage and retrieval: a theoretical and practical study of modern methods of organizing information for retrieval, including the application of computers
2. Bibliography of, and information problems in, main academic subjects
3. Data processing: to introduce the student to the basic principles of systems analysis and to the possibilities of electronic date processing machines in library and information department operations
4. Management and its applications in information centres: to provide a framework of management theory illustrated by reference to libraries and information centres, and by comparison with formal organizations of all kinds
5. Physical or engineering sciences: with students opting for either advanced physical sciences, or engineering sciences
6. Project: to enable the student to display his ability to pursue a subject in depth, drawing, where possible, upon different areas of study from within the course

Type of training
Academic study in information science

Conditions of admission
General Certificate of Education (or equivalent) with two subjects at Advanced level and three at Ordinary level. Mathematics and physics or chemistry, or physics with chemistry at Ordinary level, and a language other than English must be included. The Advanced level requirements are, at present, being held open but, obviously, candidates must have an interest in science and technology and willingness to pursue such subject to a higher level.

Are foreign participants allowed
Yes

Director: Prof. W.L. Saunders, M.A., F.L.A.

Year of foundation of the course: 1964

**POST-GRADUATE**

**Programme**

1. Generation and use of information
   a) general
   b) scientific and technological communities

2. Information resources
   a) general:
      - general reference
- humanities
- social sciences
b) science and technology

3. Communication of Information
a) organization for use:
   - basic cataloguing
   - basic classification
   - advanced classification
   - reprography
   - computer basics
   - computer programming
   - computer applications
b) systems and services:
   - introductory survey; card-to-computer mechanization
   - basic statistics
   - advanced statistics
   - organization and method studies
   - operational studies
   - systems analysis and design

Type of training

Post-graduate study in librarianship and information science

Conditions of admission

A candidate for entry to the course of study for the M.Sc. in Information Studies must:
a) be a graduate of a university of the United Kingdom, or hold an equivalent qualification of some other institution or body recognized by the Senate for this purpose. Priority is given to graduates in science, technology, engineering or similar, such as mathematics or statistics
b) satisfy the Director of the Post-graduate School of Librarianship and Information Science that he has an adequate reading knowledge of two languages in addition to English; and
c) normally have had approved practical experience in a library or information service
A candidate whose qualification is of lower standard than second class honours must satisfy the Board of the Post-graduate School of Librarianship and Information Science as to his general and special qualifications

Are foreign participants allowed
Yes

For fuller details of the M.Sc. course see Aslib Proc., vol. 21, no. 1, Jan., 1969, pp. 24-31. The University also offers M.A. in Librarianship.

ADDITIONAL INFORMATION

LONDON

Short courses lasting several days on various problems associated with information work are organized by ASLIB, schools of librarianship, various colleges, and professional associations.

The aim of the courses is to familiarize persons without adequate experience in information work, with the principles of information and procedure of work in the information services and different types of library.

The chief objective of the courses is to increase work output and underline the role and importance of the information centre within individual institutions.

These are examples of the wide variety of courses offered:
- Mechanization of information processes
- Information retrieval
- Classification
- Co-ordinate indexing
- Cataloguing
- Library techniques
- Special librarianship
- Patents
- Dissemination of information
- Systems analysis
- Scientific literature
- Sources of technical information
- Information on a shoe-string
- Work with maps
- Standardization for documentation
- Gramophone record collections
- Report writing and preparation
- Personnel management for librarians
- Abstracting and preparation of abstracting publication
- Business information
- Information for management

Copies of a publication listing such short courses are available on request from the Office for Scientific and Technical Information, Elizabeth House, 39 York Road, London S.E.1.

LONDON

Assistant's certificate

The City and Guilds of London Institute awards Library Assistant's Certificates to students who pass the examination following a one-year
course offered by the colleges listed below:
1. Aberystwyth College of Further Education
2. Aylesbury College of Further Education
3. Mander College, Bedford
4. Bradford Technical College
5. Bridgewater Technical College
6. Heriot-Watt University, Edinburgh
7. Telford College of Further Education, Edinburgh
8. Ewell Technical College
9. Central College of Commerce and Distribution, Glasgow E.1
10. Lincoln College of Technology, Lincoln
11. West London College
12. West Ham College of Further Education, London E.15
13. St. John's College of Further Education, Manchester
14. Motherwell Technical College, Motherwell
15. Newcastle-upon-Tyne College of Further Education
16. City College, Norwich
17. Oxford College of Further Education
18. Highbury Technical College, Portsmouth
19. Slough College of Technology
20. St. Albans College of Further Education
21. Stoke-on-Trent College of Building and Commerce
22. Trowbridge West Wilts College of Further Education
23. Wallasey Libraries, Wallasey
24. Walsall Staffordshire Technical College
UNITED STATES OF AMERICA

The term "documentation" as used in Europe has been supplanted in the United States by the term "information science", a broad term which is considered to better describe the great diversity of the field. The information sciences curricula are derived from many programmes, including library science, linguistics, systems engineering, business administration, information control, business data processing, editing and writing, archives management, communications and graphic arts.

As implied by the previous statement, the field of information science in the United States could be defined as that field of academic study and professional practice concerned with the nature, handling and function of information and with all aspects of its generation, control and use in society. Accordingly, many different curricula and course offerings have appeared in the various academic programmes.

A large number of schools in the United States offer work in the field of information science from differing points of view. For example, there are approximately 350 library schools offering library science courses; 41 of these programmes are accredited by the American Library Association. Of these, many are offering major or specific concentration in the information sciences on a degree granting basis, but all offer one or more courses in information science. Only those graduate library schools who have a major degree in information science or a heavy concentration of courses in the field are included in this survey.

Programmes are developing in departments or schools of Business administration, Public administration, Psychology, Engineering and the Computer sciences. Again, only those graduate programmes which provide the option to specialize in the area of information science are included.

The degree of detail in the description of the various programmes differs, depending on the amount of information that was made available. For further course descriptions, etc., inquiry should be made directly to the school.

UNIVERSITIES WITH PROGRAMMES IN INFORMATION SCIENCE

ATLANTA, Ga.

Georgia Institute of Technology, School of Information Science,
Atlanta, Georgia 30332

Director: Dr. V. Slamecka

Year of foundation of the School: 1963

POST-GRADUATE

The School of Information Science of the Georgia Institute of Technology was established in 1963, with the support of the National Science Foundation, as a graduate degree granting department of instruction and research. The school offers M.S. and Ph.D. degrees; its academic programmes endeavor to prepare students for advanced study and research in information science and for careers in information engineering.
Option I is concerned primarily with the theory of information processes and processors. The programme of study emphasizes semiotics, with broad foundations in several disciplines, including mathematics, logic, the study of language, the theory of systems, as well as areas in biological and behavioral sciences. Students are expected to proceed toward the doctorate and academic or research careers.

Option II has as its objective the professional education of engineers in the application of information processing devices and techniques in such processes as learning, problem solving and decision making, and in the design and operation of advanced information systems and networks (e.g. corporate, medical, library, educational, etc. information systems).

Option III is concerned with the professional education of computer systems engineers, and focuses on the design and study of advanced computing systems and utilities. The systems engineering approach and functional optimization of the design of computer systems and their components such as programming systems, languages etc. are emphasized.

With the partial support of a $450,000 grant by the National Science Foundation, the School of Information Science has established an informal, interdisciplinary centre for research in information science and engineering. The programmes of the research center are broadly consonant with the definitions of the areas of information science and engineering reflected in the curricula of the Georgia Institute of Technology, so as to complement the education in information science and related disciplines and to provide a pool of research opportunities at the graduate level.

To fulfill the requirements for the Master's degree, students must successfully complete at least 50 quarter hours. Approximately one-third of the 50 quarter hours is elective, either as course work or thesis; however, only students with a substantial background in information science will be encouraged to present a thesis as part of the M.S. degree requirements.

Students wishing to pursue the Ph.D. degree may, with the permission of the School, by-pass the M.S. degree.

The doctoral programme is built on the substance of the Master's curricula which comprise, at present, one theory-oriented and two engineering directions of study. The former is concerned with the theory of the abstract information process and, more widely, with metascience; the engineering directions of study are concerned with the design of information and computer systems. The areas of specialization at the Ph.D. level thus include such theoretical areas as information representation, measure and structure; mathematical logic, theory and design of language, and theory of the information process in natural systems and automata; and numerous aspects of information and computer systems engineering.

Programme

1. Digital computer organization and programming
2. Automatic data processing
3. Computer and programming systems
4. Introduction to information engineering
5. Languages for science and technology
6. Topics in linguistics
7. Problem solving
8. The literature of science and engineering
9. Mathematical techniques for information science
10. Elements of information theory
11. Information systems
12. Logistic systems
13. Logic design and switching theory
14. Non-numeric information processing
15. Computer systems
16. Communication and control of information
17. Syntax of natural languages
18. Mathematical linguistics
19. Information representation and structures
20. Graph theory
21. Information control methods
22. Theory of classification and indexing
23. Cybernetics
24. Theory of models
25. Equipment of information systems
26. Information systems design
27. Problems in systems design
28. Advanced semiotics
29. Advanced logic
30. Philosophy of mind
31. Advanced computer organization
32. Computer techniques for information storage and retrieval
33. Design of computer operating systems
34. Computer language design
35. Organization and management of information industry
36. Philosophy of language
37. Theory of automata
38. Information systems optimization
39. Syntax-directed compilation
40. Special problems in information science

Conditions of admission
B.S. degree; mathematics background in calculus, differential equations, introductory modern algebra, probability theory and statistics, computer programming.

Are foreign participants allowed
Yes

Duration of training
M.S. programme: average 5 academic quarters (15 months)

Degree or other qualifications granted
M.S., Ph.D.

Tuition fees
$1065 per academic year for out-of-state students
Financial aid for trainees

Qualified students admitted to full graduate status of the Master's programme are eligible for a graduate teaching or research assistantship. Incumbents are expected to instruct sections of certain courses or participate in the research programme of the School of Information Science; their assignment is at the discretion of the School. Graduate assistantships are considered a form of employment by the Institute, and performance is evaluated accordingly. A graduate teaching or research assistantship at the M.S. level currently pays $233 per month on a one-third time basis, in return for 13 work per week, and it carries on out-of-state tuition waiver. Students holding such an assistantship may carry a full academic load of 12 hours per quarter. Qualified students in the doctoral programme may apply for research associateships, available at the rate of $11,000 (full-time, 12 months equivalent salary).

BETHLEHEM, Pa.

Lehigh University, Graduate Studies and Research in the Information Sciences,
Bethlehem, Pennsylvania 18015

POST-GRADUATE

The Division of the Information Sciences, within the Department of Philosophy, offers a M.S. programme in the Information Sciences, designed to fulfill several objectives. First, it provides a broad base of both theory and application for those who will be concerned with the design, operation and management of information retrieval systems. As such it may be considered a terminal degree. Secondly, the programme offers a foundation for the growth and development of individual research interest and further graduate study. The Department of Philosophy offers a doctoral programme in the foundations of the information sciences. Related doctoral programmes, for qualified candidates, also exist in the Departments of Psychology and Industrial Engineering.

There are 3 options within the programme: Foundations of Information science, Interface and behavioral problems, and Systems. There is considerable overlap between the three options, since there is a common kernel of theory. Each option thus represents a different application of theory, or a different kind of specialization. The Foundations
The Interface and behavioral option is now under intensive development and involves Prof. Rubenstein and faculty from the departments of psychology, social relations and industrial engineering.

The Systems option is also under initial development. The necessary courses and expertise are already available in several departments, and the option is now being formalized with the co-operation of the departments of industrial engineering and electrical engineering.

The Division is closely linked to the Centre for the Information Sciences through which a broad range of research is conducted. Current research is conducted in such areas as computational linguistics, document retrieval theory relevance, methodology of evaluation of retrieval systems, the man-system interface in libraries, linguistic style variation, automatic indexing, experimental system design, and library systems analysis. This research is done in collaboration with interested departments across the campus.

Programme

1. Computers and language
2. Descriptive linguistics
3. Psycholinguistics
4. Theory of formal grammars
5. Information retrieval theory
6. Seminar in psycholinguistics
7. Seminar in semantic analysis
8. Special topics in linguistics
9. Analysis of information
10. Subject document retrieval
11. Mechanized subject document retrieval
12. Retrieval system evaluation
13. Retrieval languages
14. Mathematical models in linguistics
15. Retrieval structures
16. Special topics in the Information sciences

Conditions of admission

The curriculum is based on a B.S. degree in an engineering or scientific discipline. Desirable preparation consists of at least 12 hours of mathematics, including one course beyond the calculus. In recognition of the flexibility and cross-discipline nature of the subject, exception to this requirement may be granted to those students with training in a systematic science. A course in computer programming or programming experience is required. Mathematics, computer programming, is available, without graduate credit, for those without this background.
Degrees or other qualifications granted

M.S.

Financial aid for trainees

A limited number of fellowships and research assistantships are available; these will be awarded on a competitive basis.

BLOOMINGTON, Ind.

Indiana University, Graduate Library School,
University Library Building, Bloomington, Indiana 47401

Dean: B.M. Fry

Year of foundation of the courses: 1966

POST-GRADUATE

The purpose of the Graduate Library School is three-fold:

1. To educate the librarian to assume a responsible, professional role by providing him with a) an understanding of the library and information centre in society; b) an appreciation of their role in the history of the communication of recorded ideas; c) a knowledge of the principles and practices of library and information centre organization and administration; d) familiarity with the bibliography, and literature of the humanities, natural sciences and social sciences; e) the ability to evaluate, interpret, and stimulate use of all types of material, print and non-print; and f) a basic competence in the application of research methods.

2. To provide means for the continuing education of practising librarians and information scientists in a time of rapidly changing disciplines.

3. To provide for the advanced education of library administrators, research personnel, and library and information science teachers by means of a programme leading to the Ph.D. degree. The doctoral programme in librarianship and information science offers an opportunity to acquire a) a broader understanding of librarianship and information science; b) thorough knowledge of a special area of the profession and further study in an allied area; and c) an ability to analyse problems and conduct research concerning them.

The Curriculum Committee of the Graduate Library School has been working for the past two years (since becoming a separate professional school) to re-evaluate the course structure in light of new graduate demands and a body of knowledge and expertise which is rapidly changing. It began this re-evaluation by determining the aspects which it feels every library school student must have. From these aspects a basic core of courses was drawn up. The nature of several continuing courses was altered to reflect an infusion of elements of information science into traditional librarianship. A new approach, new emphasis, new techniques and new ideas in instruction were incorporated into revised courses.
In addition, an expanded curriculum for the information sciences, beginning 1968-9, was developed including six new courses. The curriculum for the information sciences outlined has several objectives in mind: there is the immediate need for an integrated programme that will allow the M.L.S. student to get some fundamental work and some advanced work in information science; it will also provide the Ph.D. student with an interest in majoring in information science with opportunity to branch out in the higher level courses and then concentrate in considerable depth at the doctoral level. It also includes the appropriate framework for an outside minor candidate in another discipline. It is also closely tied to the more traditional library science courses to allow for the eventual development of a Masters in Information Science without causing a complete disruption of the programme.

In essence, the Graduate Library School is trying to abstract from traditional library course content that which is intellectually visible and to retain it, but to eliminate all that is descriptive, routine and pedestrian. To that which remains of traditional library ingredients, we have grafted on or added courses in theory and principles of information science and engineering.

Programme

1. Introduction to information science
2. Mechanization of library technical processes
3. Computer applications in information systems
4. Information storage and retrieval - methods and techniques
5. Systems analysis and design
6. Information systems administration
7. Advanced theory of information science
8. Independent study in information systems

Conditions of admission

All prospective graduate students, including graduates of Indiana University, must make formal application by July 15, December 15, or April 15, before matriculation. International students must apply by February 1. Application forms, available in the Office of the Graduate Library School, must be accompanied by one transcript of all college and university work. Indiana University graduates should request the Registrar's Office to send unofficial copies of their transcripts to the Office of the Graduate Library School. A fee of $10 is required for all new applicants to the University (not required from persons who have previously attended University as regularly admitted students). In
addition the student must meet the following requirements:

1. Evidence of ability to pursue graduate work in library science:
   a) a cumulative average of 3.0 (4.0 equals A) in the total undergraduate program, or
   b) a cumulative average of 3.0 in the latest 60 semester hours of undergraduate work, or in the latest 60 semester hours of combined undergraduate and graduate work.

   An applicant who fails to meet either requirement a) or b) above but has achieved high scores on the Aptitude Test of the Graduate Record Examination may submit these scores in support of the application.

2. In addition to a good scholarship record, undergraduate preparation must include three years of general education distributed among the social sciences, biological and physical sciences, literature, and other areas of the humanities. An applicant who has deficiencies in one or more subjects may be admitted conditionally until these deficiencies are removed, provided they do not exceed 15 semester hours of credit. A major in a liberal arts subject is required.

3. Good physical and mental health
4. Ability to use correct, clear, effective English

Additional requirements for admission to the Ph.D. programme include the degree of Master of Library Science from Indiana University or a master's degree in library science from another library school accredited by the American Library Association. Ordinarily an average of 3.5 (4.0 equals A) is required. Acceptable library experience is also a requirement.

Are foreign participants allowed? Yes

Conditions of admission Same as for U.S. students

Duration of training M.L.S. degree: completion of 36 semester hours (usually 2 semesters and
Degrees or other qualifications granted

- Master of Library Science (M.L.S.)
- Master of Library Science - Information Specialist (Chemistry) (M.L.S.)
- Ph.D. in Library and Information Science

Financial aid for trainees

Each year the Graduate Library School awards a limited number of University Fellowships of $1800 to $2200 each, provided by the Indiana University Office for Research and Advanced Studies. Graduate Fellowships of $1,500 each are offered annually by the Graduate Library School. Recipients of these fellowships pay in-state fees.

During the academic year 1968-9, the School awarded master's degree fellowships of $2200 each and Ph.D. degree fellowships of $5000 each plus stipends for dependents, and exemption from all fees under a grant from the U.S. Office of Education.

The Graduate Library School also awards five scholarships for the academic year which remit all except $50 of the basic fees each semester. It also awards five scholarships for the Regular Summer Session which remit all except $29.50 of the basic fees.

Also offered are Graduate Assistants, Teaching Associates, Indiana Library Association Scholarships, Indiana School Librarians Association Scholarships, Indiana State Library Scholarships, Residence Scholarship Plan, and Library Intern Program.

Number of trainees (number of graduates to date)

650 M.L.S., 2 Ph.D.
Pratt Institute, Graduate School of Library and Information Science, Brooklyn, New York
Dean: Dr. N. Sharify
Year of foundation of the courses: 1969

POST-GRADUATE

The Institute offers a full range of courses for specialization in information science. Further, Introduction to Information Science is a course required of all students whether they intend to become information scientists or not. The curriculum in information science is supplemented by the opportunities for demonstrations and research offered by the Institute.

In addition to providing training in information science as well as the more traditional areas of librarianship, the Institute offers another dimension, the international, with a full range of courses covering the international aspects of librarianship and information science. A newly established Center for International Librarianship Studies provides a service and research are for this part of the programme.

Programme
1. Introduction to information science
2. Abstracting and indexing
3. Communications
4. Information storage and retrieval systems
5. Automated library operations
6. The place of language in communication
7. Specialized information centres

Conditions of admission
Baccalaureate degree from an accredited college or university representing sound, basic training in the humanities, social sciences or sciences

Are foreign participants allowed
Yes

Conditions of admission
The equivalent of the qualifications for admission required of students from the United States

Duration of training
36 credits (12 courses)

Degrees or other qualifications granted
M.L.S.

Tuition fees
$57 per credit

Financial aid for trainees
- Federal Title II Fellowships
- Olive Bishop Price Fellowship in International Librarianship
- Mary Wright Plummer Scholarship
- Alumni Association Scholarship
BUFFALO, N.Y.

State University of New York at Buffalo, School of Information and Library Studies,
Buffalo, New York 14214
Dean: E. Giuliano
Year of foundation of the courses: 1968

POST-GRADUATE

The aim of the School of Information and Library Studies is to train specialists in the research and development activities needed to advance the profession of librarianship.

Another aim of the School is to train leaders for the future development of the profession of Librarianship.

Graduates of the School of Information and Library Studies will have the ability to: 1. assume the professional responsibilities of practising librarianship; 2. understand cognitively and practically contemporary aspects of librarianship, including new media, information systems and effective management; 3. explore the theories of and to develop skills relating to knowledge representation, storage, transfer, and its utilization; 4. understand and advance the states of technologies and methodologies appropriate to the future of librarianship; and 5. further research and development on knowledge transfer methodologies and systems.

The student is required to take the following prerequisites: languages of the World and introduction to computer science. Those students who do not have a background in computer science may take linguistics instead.

Programme

1. Librarianship/information science in the communication process
2. Resources: appraisal, acquisition and organization
3. Resources and services: reference and bibliography
4. Information networks: current technology
5. Administration and management: applied social sciences
6. Information systems and science
7. Automated library systems
8. Special topics in information systems and technology
9. Computer science, computational linguistics
10. Research methods for information science and libraries
11. Resources and services: subject
12. Context analysis: subject and descriptive
13. International publishing and bibliographic resources
14. Knowledge representation: form and flow
15. Information system management theory and practice

Conditions of admission

Students applying for admission should have received at least a bachelor's degree in the liberal arts of the sciences, or in a subject discipline appropriate for
special library services such as art, music, education, law or business.
Admissability is based upon a student’s academic qualifications as well as other indications of his potential for success in graduate work in Information and Library Studies.
In addition, the aptitude section of the Graduate Record Examination is required.

Are foreign participants allowed
Yes

Conditions of admission
Admission standards plus evidence of use and comprehension of English

Duration of training
For a full time student: 2 semesters and a summer session would be minimal time; however, the 36 credit hours may be secured over a three years' period

Degrees or other qualifications granted
M.L.S. (currently being awarded to all graduates whatever the specialization within the school)

Tuition fees
For graduate courses: $60 per credit hour. M.L.S. degree requires completion of 36 credit hours minimally

Financial aid for trainees
Remission of tuition possible under certain circumstances; Graduate Assistantships available; Work-Study programmes supported by libraries within the vicinity. Special scholarships have not yet been designated

CHICAGO, ILL.

University of Chicago, Graduate Library School,
1116 East 59th Street, Chicago, Ill. 60636
Dean: D.R. Swanson
Year of foundation of the courses: 1928 (certain changes in 1963 as noted below)

POST-GRADUATE

The programme in librarianship began in 1928. Throughout its history the Graduate Library School has attempted to identify and emphasize principles and intellectual foundations of librarianship. These principles must necessarily go well beyond the bounds of current vocational practice if libraries of the future are to be soundly conceived
and designed. With this emphasis upon principles and upon the planning of future library systems, the dividing line between library science and information science is uncertain at best.

In 1963 and 1964 a number of new courses on subjects related to information retrieval, automatic indexing, computer programming and organization, mechanical translation, and systems planning were added to the curriculum. A special effort was made to identify and to encourage students to take advantage of courses related to these fields offered in other departments and divisions of the university, particularly those courses in computer science offered by the Committee on Information Sciences.

Both the M.A. and Ph.D. programmes require a dissertation. Many of these have been in the field of information science, but at least all of them have served to make the conduct of research an integral and important part of the training programme in librarianship. Subject specialities in which dissertation research has been and is being carried out are exemplified by the following: public libraries; society and use of libraries; comparative librarianship; book selection; children's literature; libraries for children and young people; reading interests of youth; storytelling; college and university libraries; research library resources; scholarly communication; cataloguing and classification; art and music in the library; history of printing and publishing; history of libraries; history and bibliography of science and technology; biomedical information systems; information systems; computer applications; theories of indexing, subject analysis and classification; mechanical translation; language processing; symbolic processes; coding, organization and searching of information; Chinese bibliography.

Programme

1. Library systems planning
2. Language, symbolic process and computers
3. Biomedical information
4. Theories of indexing and information retrieval
5. Algorithmic syntax
6. Mechanical translation and language processing
7. Information, storage and searching

Courses offered in other departments and divisions of the University related to information science are:
- Introduction to biomedical application of computers
- Digital computer techniques
- Information and computers
- Digital computers and applications
- Organization of computer systems
- Coding and switching theory
- Automatic theory
- Algorithmic languages
- Computer operating systems
- Numerical processing
- Artificial intelligence
- Probability and statistical inference
- Mathematical analysis for business decisions
- Linear transformations, modules and matrices
- Information theory
- Applied combinatorics
- Mathematical logic
- Semantics

Conditions of admission

For the M.A. programme - bachelor's degree or its equivalent is required. Since the school is small, admission is necessarily selective and based upon the student's undergraduate academic record, performance on the Graduate Record Examination (Aptitude Test), letters of reference, the student's own purposes and objectives and in some cases on a personal interview.

For the Ph.D. programme - normally a student must have a Master's degree or equivalent in order to enter the Ph.D. programme. Admission to candidacy, however, is contingent upon the student's performance on a series of preliminary examinations and upon a satisfactory written thesis proposal, and an oral examination based upon the proposal.

Are foreign participants allowed

Yes

Same as for American students plus satisfactory performance on a test of English as a foreign language.

Duration of training

Approximately 6 quarters - 1 1/2 years (5 quarters of courses plus an M.A. thesis). For the Ph.D. programme: minimum of three full quarters of residence plus dissertation. This usually requires from two to three years beyond the Master's degree.

Degrees or other qualifications granted

M.A. and Ph.D. in Library Science

Tuition fees

$ 700 per quarter for a full academic programme of three courses

Approximately 30 scholarships and fellowships are awarded by the University. A number of fellowships for M.A. candidates and Ph.D. candidates ($2,200 and $5,000, respectively, tuition-free) are supported by the U.S. Office of Education.

Financial aid for trainees
Six pre-doctoral and two post-doctoral training stipends ($2,400 and $6,000, respectively, tuition free) for medical librarianship are also available, under a programme sponsored by the National Library of Medicine.

Number of trainees (number of graduates to date):

- Since 1928: Ph.D. - 100; M.A. - 503; B.L.S. - 209
- Since 1963: Ph.D. - 7; M.A. - 163

CLEVELAND, Ohio

Case Western Reserve University, Documentation and Information Science,
11161 East Boulevard, Cleveland, Ohio 44106
Dean: J.H. Shera

Year of foundation of the courses: Masters programme - 1955
Ph.D. programme - 1962

POST-GRADUATE

There are at present two programmes in Documentation and Information Science at different levels of education and achievement. The first, at Master's level, is an introductory programme. Its objective is to equip students to work in existing and evolving libraries and information centres.

The second programme at the doctoral level is a research programme providing for advanced professional study and research in library and information science. Curricular flexibility and interdepartmental dialogue are basic to this programme. It includes a ground structure which is favorable to student initiative and free inquiry within a wide spectrum of instructional opportunities, permitting study and fairly sophisticated operational implementation of applications throughout the University.

Programme

1. Foundations of library science
2. Information sources and services
3. Automation of library processes
4. Information retrieval systems
5. Information retrieval systems laboratory
6. Information processing on computers
7. Automatic language processing
8. Specialized information centres and services
9. The literature of the humanities
10. The literature of the social sciences
11. Systems analysis in information science
12. Self-organizing systems
13. Linguistics for information science
Conditions of admission

For Masters programme: Baccalaureate degree from an approved college or university; 2.7 average; at least 3/4 programme in liberal arts. Reading knowledge of one modern foreign language. Acceptable Graduate Record Examination scores in one Advanced Test and in Aptitude Tests. Personal qualifications as attested by references and personal interview.

For the Ph.D. the same as above plus a Master's degree in Library Science or in appropriate subject discipline from an accredited library school, and significant professional experience.

Are foreign participants allowed

Yes

Conditions of admission

Duration of training

M.S. in L.S. one calendar year (minimum), i.e. summer session and academic year. Ph.D. approximately three academic years.

Degrees or other qualifications granted

Master of Science in Library Science Ph.D.

Tuition fees

For 1969-70: $1825 per academic year; $458 per 6 weeks Summer Session
For 1970-71: $2000 per academic year; $152 per 6 weeks Summer Session

Financial aid for trainees

- Limited number of scholarships and fellowships - including waiver of tuition
- Waiver of tuition plus stipend of $2000-$5000
- Teaching fellowships

Number of trainees (number of graduates to date)

Ph.D. - 4
M.S. - 150 (approximately)

COLLEGE PARK, Md.

University of Maryland, School of Library and Information Services,
College Park, Maryland 20742

Dean: P. Wasserman
Preparation of information scientists is conducted as part of the general curriculum in librarianship. Particular courses within the programme have been identified as being particularly relevant for those interested in information science. The School's programme for the Master of Library Science degree requires 36 hours of course work to be completed within a period no longer than 3 academic years. 24 of these hours are taken up with required courses, designed to introduce the student to the broad range of disciplines relevant to librarianship and equally relevant to the responsibilities of the information scientist. They also provide the necessary background for the more specialized courses.

The required courses are followed by elective offerings open to the student based upon his personal requirements and choices; these are selected in consultation with his advisor and his programme is designed to meet his own particular career interests and objectives. Those students who specialize in information science will normally develop their range of courses in consultation with faculty members who particularly concentrate their attention upon information science.

Programme

1. Introduction to data processing for libraries
2. Organization of knowledge in libraries
3. Literature and research in the sciences
4. Construction and maintenance of index languages
5. Research methods in library and information activity
6. Introduction to reprography
7. Information systems design
8. Library systems

Conditions of admission

Admission as a student to the School is limited to individuals who hold the bachelor's degree from recognized colleges, universities or professional schools in this country or abroad or to those who can give evidence of successful completion of equivalent courses of study. The individual's undergraduate academic record is of primary importance as an indication of his competence to carry forward graduate study in librarianship, but several other factors are also taken into account. Although no specific undergraduate courses are required for admission to the school, those who seek admission must have completed a broad
Are foreign participants allowed for admission?  Yes

Same as above, plus proficiency in English

Foreign students are normally accepted only on a full-time basis at the University of Maryland and should estimate their educational and living expenses at approximately $275 a month or a minimum of $3,300 a year, including the expenses of two semesters and one Summer School session.

The Master of Library Science degree will be awarded to those students who successfully complete within three years from their first registration in the School, a programme of 36 hours, with an average of "B". Under a full-time programme a student normally completes semester hours during the fall and spring semesters and 6 hours during the summer term.

Master of Library Science

Effective with the summer session 1968, the tuition rate is $30 per credit hour for Maryland residents and $36 per credit hour for out-of-state residents.

Are foreign participants allowed for admission?  Yes

COLUMBUS, Ohio

The Ohio State University, Department of Computer and Information Science, 400 Caldwell Laboratories, 2024 Neil Avenue, Columbus, Ohio 43210

Dr. M.C. Yovits

Year of foundation: 1966

POST-GRADUATE

The programme emphasizes education, research, and the professional practice and application of computer and information science. The educational programme offers undergraduate and graduate degrees through the Ph.D. The research activities which are a central part of the programme consist of a broad conceptual base supported in major part by a grant from the National Science Foundation, as well as a number of smaller and more practically oriented contracts and grants. The broad core research programme and these other research tasks interact to form an integrated framework.

The programme of the Department of Computer and Information Science is interdisciplinary, in that many other departments on the campus deal with specific applications of computer and information science. It is therefore desirable that students in computer and information science be encouraged to develop a background in these fields. The departments representing these fields are encouraged to cooperate in the research and academic efforts in computer and information science.

The Department has developed and will continue to develop courses related to the general properties of computer and information problems and to their practical and generalized solutions.

Those instructional areas which are emphasized by the Department of Computer and Information Science are as follows: general theory of information; information storage and retrieval; theory of automata, finite state machines, and computability; artificial intelligence, self-organizing and adaptive systems; pattern recognition.

Programme

1. Digital computer programming for social scientists
2. Digital computer programming
3. Survey of numerical methods
4. Introduction to information storage and retrieval
5. Numerical analysis

Conditions of admission

Basic requirements for admission to the Graduate School are established by the Graduate Council, a re-
presentative body of the graduate faculty. Minimum requirements include:
1. A baccalaureate or professional degree earned from a department of approved standing and granted by an accredited college or university
2. At least a 2.7 cumulative point-hour ratio (on the basis of the 4.0 grading system of the Ohio State University) for all previous academic work
3. Prerequisite academic work which gives evidence that the applicant should be able to pursue effectively the graduate courses of the department in which he wishes to specialize.

In addition to the Graduate School requirements, the department requires that each student present evidence of credit for the following (or equivalent):
1. Programming I and II
2. Mathematics through the calculus
3. 10 additional quarter hours of mathematics or computer and information science

These requirements may, at the discretion of the Graduate Committee, be relaxed for otherwise exceptionally qualified students.

Yes

Same as U.S. Speaking knowledge of English required.

Ph.D. - 4 years
M.S. - 2 years
Ph.D., M.S., B.S. in CIS, B.S. and B.A.

$145 per quarter

Fellowships, teaching assistantships, and research assistantships are available.

64
POST-GRADUATE

The Master of Science programme in Information Science represents an interdisciplinary approach. The programme provides an integrated outlook for the application of computer, mathematics, psychological and engineering principles for the receipt, classification, communication, cataloguing, storing and retrieval of data and information regardless of its subject matter. It provides training in the underlying concepts of information and its use as it relates to various fields, particularly to behavioral and social sciences.

Individuals completing the programme are expected to be sufficiently trained to cope with problems emerging in the development and implementation of information handling systems in general and computer-based systems in particular. Examples of such systems are automated library environments, military command and control, community data systems, medical diagnostic and computerized educational systems.

Programme

1. Mathematics and information science
2. Advanced statistical application to information science
3. Communication theory
4. Foundations of behavioral theory
5. Information system technology
6. Information presentation
7. Organization and retrieval of information

Conditions of admission

B.A. or B.S. in Physical Science or Behavioral Science with completion to calculus and knowledge of a computer-programming and statistics-related field of study, or B.A. or B.S. in other disciplines with at least three years of high school mathematics, or B.A. or B.S. in any discipline with at least three years of high school mathematics and a working knowledge of a computer-related subject.

Are foreign participants allowed Yes

Duration of training

2 years

Degrees or other qualifications granted Master of Science in Information Science

Tuition fees

$38.00 tuition for courses taken for graduate credit per credit hour for lecture course.
Financial aid for trainees

Students may apply for assistantships when they apply for admittance to the graduate programme. Applications are received up to March 1 and students are informed by April 1 of the action on their application for assistantships. Assistantships are awarded primarily on the quality of the academic background of the individual.

Number of trainees (number of graduates to date)

LOS ANGELES, Calif.

University of California
405 Hilgard Avenue, Los Angeles, California 90024

Programme A: Prof. R.M. Hayes
Programme B: Dean A. Horn
Programme C: (Miss) L. Darling
Programme D: Prof. M. Melkanoff.

POST-GRADUATE

A. The M.S.I.S. degree programme is an interdisciplinary course of study and research in the theoretical foundations of information handling. It is intended to prepare "information scientists" (i.e. persons dealing with the general problems of information handling per se rather than application to a specific discipline). The student is required to gain a working knowledge of the mathematics required for system design and evaluation, and familiarity with the tools of librarianship and their use in information services. He is required to learn the techniques of management, including cost accounting, as they apply to information activities, to gain proficiency in computer programming, and to write a thesis representing an original contribution to the field of information science.

B. Some suggested fields of specialization are: science and engineering librarianship, library systems, analysis and automation, rare books and manuscripts, library programmes in archives, map librarianship, etc. Applicants are not discouraged from proposing fields other than those mentioned above. Applicants may be asked to broaden or narrow their proposed fields of specialization. This modification will be proposed before the fellowship award is made, and must be acceptable to the applicant.

C. The Biomedical Library at the University of California offers four one-year internships annually. Time is divided between planned
training in medical librarianship and formal course work selected from: biological sciences, history of medicine, information science, and foreign languages, depending upon the academic background and interests of the trainees. Work assignments are made on a rotating basis in the library's divisions and for shorter periods in the UCLA Medical Search Station, the Brain Information Service, and the Technical Processes Automation Project. These are supplemented by readings, discussions with staff members, visits to other libraries, and attendance at professional meetings.

D. In the past ten years the School of Engineering has developed a programme of study, research and development on computers and their application, within the Information System Division. This programme has culminated into the establishment of three fields - system design, numeric application and computer languages, acceptable for the Ph.D. in Engineering. The primary aim of computer science is to enhance scholarly advance by increasing our understanding of what constitute realizable models and in extending the scope of realizability. Thus the School of Engineering provides a natural focus for the expansion of its present programme into a campus-wide programme in Computer Sciences.

Programme

1. Methods of Information systems analysis and design
2. Operations research and techniques
3. Cataloguing and classification
4. Comprehensive bibliography
5. Specialized bibliography
6. Managerial accounting
7. Types of library
8. Management of Libraries
9. Computer programming
10. Applications of computer
11. Seminar in information science
12. Data base systems
13. Information retrieval systems
14. Management information systems
15. Library data processing

Additional courses are available in the Departments of Business Administration, Computer Science, Engineering, Mathematics and Psychology

Conditions of admission

A. B.A. and Calculus
B. M.L.S.
C. M.L.S.
D. B.A. (in Mathematics, Engineering or Physical Science)

Are foreign participants allowed: Yes

Conditions of admission Same as above
Duration of training
A. - Two years
B. - One year
C. - One year
D. - One of five years (for Ph.D.)

Degrees or other qualifications granted
A. - M.S.I.S. (DOC) - Master of Science in Information Science (Documentation)
B. - Certificate of Specialization in Library System Analysis
C. - Certificate of Specialization in Library System Analysis
D. - Ph.D. and M.S.

Tuition fees
Incidental fees for California residents total $105 per quarter;
incidental fees and tuition for non-residents of California total $505 per quarter

Financial aid for trainees
A. Stipend from the National Library of Medicine, Research Assistantships in Institute of Library Research
B. Research Assistantships in ILR, Fellowships under Title II-B of the Higher Education Act of 1965
C. Support by USPHS
D. No special support, but scholarships and assistantships are available

MINNEAPOLIS, Minn.

University of Minnesota, Library School.
Minneapolis, Minnesota 55455

D.K. Berninghausen

Year of foundation of the course: 1965

POST-GRADUATE

The Graduate School offers the Master's degree under two plans:
Plan A, including a thesis and Plan B, which substitutes additional course work and research paper for a thesis. Programmes of study leading to a M.A. degree will be planned according to special abilities, backgrounds, and aims of the individual student.

Plan A with thesis requires the following courses: library administration; reference; selection; cataloguing and classification; special libraries; library mechanization; information retrieval; and 3 outside courses in computer programming, mathematics, logic linguistics, management systems, etc.
Plan B requires approximately the same courses with 9 credits devoted to additional coursework and research papers rather than a thesis.

This programme is intended for librarians who wish competency in mechanization and information retrieval. At least 9 credits outside the library school offerings are required. Considerable flexibility in programme planning for individual students is possible, and some programmes might include 9 credits in computer programming and 9 credits in mathematics if desirable.

Programme

1. Library mechanization
2. Information retrieval
3. Biomedical computing
4. Computer applications
5. Theory, programming modern digital computers
6. Use of computers in business research
7. Introduction to general linguistics
8. Mathematical linguistics
9. Descriptive linguistics
10. Systems and procedures analysis
11. Data processing systems
12. Decision making and operations analysis
13. Introduction to industrial engineering
14. Introduction to work analysis
15. Introduction to operations research
16. Dynamics of human communication
17. Science communication
18. Interpretation of science and technology
19. Speech and language in human behavior
20. Mathematical logic
21. Advanced logic
22. Topics in logic
23. Philosophy of logic

Conditions of admission

For short training programmes:
- a graduate degree from an ALA accredited library school and
- admission to the graduate school.

For MA programme: admission to the graduate school.

Are foreign participants allowed? Yes

Condition of admission: Admission to the Graduate School.

Duration of training: 12 to 15 months

Degrees or other qualifications: Master of Arts

Tuition fees:
- 1968:
  - 6 credits or less - Resident: $52 + $100 = $152
  - 6 credits or less - Nonresident: $140 + $0 = $140
  - Over 6 credits:
    - Resident: $104 + $37 = $141
    - Nonresident: $280 + $37 = $317

Incidental fee: $37
Financial aid for trainees

Number of trainees (Number of graduates to date)

Summer Session (5 weeks) -
$59.00 for 4 credits,
$72.00 for over 4 credits

For biomedical librarians $200 per month plus free tuition
Higher Education Act fellows $2650 plus free tuition

No breakdown of MA graduates showing how many have taken these courses; 15 biomedical librarian fellows have done so

NEW BRUNSWICK, N.J.

Rutgers, The State University of New Jersey, Graduate School of Library Service,
New Brunswick, N.J. 08903
Dean: N. Harlow

Year of foundation of the courses: 1954

POST-GRADUATE

The programme at the master's level is designed to prepare persons to work in libraries and information centres in school, public, academic and research libraries; a basic, integrated programme of studies (composed of seven of the total of twelve courses) is intended to develop a knowledge of principles, concepts, and analytical processes in preparation for future professional responsibility and practice. The content of the basic courses pertain to all types of library and information service (for example, there are "required" courses in systems analysis, public administration, bibliographic organization and description, in criteria for selecting informational material, in planning services for specific communities of users, etc.). Beyond this group are courses which support specialization in areas of interest (academic, special, public, school), including work which may be taken as "continuing education" subsequent to receipt of the M.L.S. degree.

The doctoral programme emphasizes research and prepares persons for careers in research, for teaching in higher education, and (by developing capability in critical analysis and an understanding of the values and methods of research) for positions of major responsibility in the field. It is built upon a series of seminars intended to develop a comprehensive view of the field of librarianship and information science and an understanding of what the issues and problems are. At Rutgers, study is carried on through small seminars under the guidance of distinguished faculty, and there is a continuing close relationship between a limited number of students and senior faculty members. The School works closely with the Department of Computer Science (with an on-line terminal providing access to an IBM 360/67), the Statistical Centre, Urban Studies, and a number of other university disciplines.
Programme
1. Systems analysis in library management
2. Information science and technology
3. Programming theory for information handling
4. Administration, theory and practice
5. Planning library services
6. Abstracting and indexing for information services
7. Sources of information in science and technology
8. Sources of information in business and technology
9. Sources of information in government publications
10. Seminar in research methods
11. Statistical theory for research workers
12. Seminar in information science
13. Seminar in research library administration
14. Seminar in technical services

Conditions of admission
1. Graduation from an approved institution of higher broad cultural background plus a field of specialization.
2. Evidence of above average scholastic ability and promise for successful graduate study.
4. Evidence of personal maturity and professional motivation.

Are foreign participants allowed? Yes

Duration of training
M.L.S. programme requires one academic year (2 semesters and a Summer Session) or three semesters; it may be taken part-time in 3 years.

Degrees of other qualifications granted
Master of Library Science and Ph.D.

Tuition fees
Full-time student: $16 per credit hour ($440 a term) for residents
Part-time and Summer Session: $25 per credit hour

Financial aid for trainees
Several scholarships and fellowships from U.S. Office of Education, Library Services and Construction Act Funds (master's level). Several fellowships from U.S. Office of...
PHILADELPHIA, Pa.

Drexel Institute of Technology, Graduate School of Library Science,
32nd & Chestnut, Philadelphia, Pennsylvania 19104

G. Garrison

Year of foundation of the course: 1963

POST-GRADUATE

This curriculum is specifically designed to meet the educational requirements of: 1. Administrative personnel in science information departments; 2. Abstractors, translators, science literature and patent searchers; 3. Editorial personnel of science publications; 4. Computer centre staff members and computer salesmen and engineers; 5. Science researchers and instructors in information science.

The curriculum is comprised of 50 hours in required courses and an additional 10 hours of electives in one of five areas for a total of 60 quarter hours (40 semester hours), with no course grade lower than C and a weighted average of 3.00 the degree.

The required courses introduce the student to five major subject areas of information science and provide him with a general knowledge of the entire field. The required courses along with the thesis provide for concentration in various fields such as research, management, publication, instrumentation and science bibliography.

Programme
1. Principles of management
2. Reference materials in science and technology
3. Methods of research in librarianship
4. Science literature abstracting and indexing
5. Publication
6. Information centre administration
7. Instrumentation
8. Integration of the science information system
9. Search strategy

Conditions of admission
Applicants must hold the bachelor's degree from an accredited institution and must have a 3.00 grade point average (on 4 point scale) for last two years of undergraduate work.

In addition to the general admission
requirements applicants for admission to the curriculum will: 1. preferably, have had undergraduate or graduate work in some of the following: calculus, statistics, linguistics, experimental methods, logic, systems analysis, operations research, algebra, electronics, communications, computer theory, psychology and sociology; 2. ideally, have had work experience in some of the following: indexing, literature searching, report writing, editing, photography, business administration, librarianship and translating.

Are foreign participants allowed

Yes

Conditions of admission

In addition to above, students must demonstrate competence in English language.

Duration of training

Four quarters (full-time) for 60 quarter hours of credit.

Degrees or other qualifications granted

Master of Science (Information Science)

Tuition fees

$40 per quarter hour

Financial aid for trainees

Some state, federal and local funds available for scholarships and fellowships. Also, extensive opportunity for part-time jobs in the Philadelphia area.

Number of trainees (number of graduates to date)

University of Pittsburgh, Graduate School of Library and Information Science

Pittsburgh, Pennsylvania 15213

Dean: H. Lancour
Director of Knowledge Availability Systems Center: A. Kent

Year of foundation of the courses: 1963

POST-GRADUATE

The programme offers a series of courses in information science which covers topics in mathematics, computer programming and advanced applications in the literature fields. Both management information systems and administrative functions as well as the information storage.
and retrieval problems are dealt with. Advanced topics in information systems analysis and design are covered including such topics as finite state machines, information theory and coding theorems. The programme offers an M.L.S. degree and a Ph.D. A separate programme in information sciences is also being developed in the School of Engineering, Department of Industrial Engineering.

The M.S. and Ph.D. degree are offered in Management Systems and Operations Research. However, a student can develop a major in Information Engineering, covering the basic principles of information systems design, organization and operation. These systems relate to management and information storage and retrieval; both small and large systems are considered. A student is expected to have acquired a strong background in mathematics, computer science, simulation, statistics and operations research.

Programme

1. Library systems analysis
2. Mechanized information retrieval for Ph.D. students
3. Specialized information centres
4. Mathematics in information storage and retrieval
5. Computers and logic in information retrieval
6. Data processing and the library
7. Linguistics and the library and information sciences
8. Languages for the library and information sciences
9. Administration of special libraries and information centres
10. Library networks
11. Research problems in information science
12. Language engineering

Conditions of admission

Are foreign participants allowed? Yes

Baccalaureate degree

Sufficient amount of English to do this work

M.L.S., M.S. and Ph.D.

Languages for the library and information sciences

Ph.D. - 0

M.L.S. in Information Science - approximately 50

TALLAHASSEE, Fla

Florida State University, Information Science and Technology,
Tallahassee, Florida 32306

Professor: Dr. G. Jahoda

Year of foundation of the courses: 1964
The Information Science and Technology programme leads towards the Master of Science degree in librarianship which consists of 60 quarter hours of class work and the equivalent of at least one quarter of directed work experience. The full-time student will be able to complete this programme in a minimum of 15 months, including the work experience. In addition to taking 33 quarter hours in basic librarianship required of all Library School students, the student takes 18 quarter hours in information science.

Programme
1. Information storage and retrieval systems
2. Abstracting and indexing
3. Information systems design and evaluation
4. Information resources and literature searching in science and technology
5. Information centre administration

Conditions of admission
Applicants must have a bachelor's degree with a B (3.0) average in the student's major and collateral courses, two years of a foreign language at the college level, and an acceptable score on the Graduate Record Examination. While the programme is slanted toward students with an undergraduate major in the physical or biological sciences, mathematics or engineering, applications from students with another undergraduate major will be considered.

Duration of training
12 to 18 months

Tuition fees
$125 per quarter for Florida residents; $325 per quarter for out-of-state students

Financial aid for trainees
Fellowships, scholarships

Conditions of admission
Proficiency in English; graduation from a 4-year college with a bachelor's degree

Degrees or other qualifications granted
Master of Science

Are foreign participants allowed
Yes

Number of trainees (number of graduates to date)
10 with specialty and several hundred library school students having taken one or more information science courses
URUGUAY

TRAINING INSTITUTIONS, CURRICULA AND OTHER INFORMATION

MONTEVIDEO

ZAGREB

Centar za Studij Bibliotekarstva, Dokumentacije i Informacionih Znanosti (Centre for the Study of Librarianship, Documentation and Information Sciences), Trg maršala Tita 3, Zagreb

Professor: Dr. Ivan Težak

Year of foundation: 1963
POST-GRADUATE PROGRAMME

Programme

First year
1. Significance and structure of information
2. Documentation service
3. Library service
4. Classification
5. Cataloguing
6. Conventional and non-conventional publication
7. Bibliographies and reference material
8. Characteristics of users

Second year
1. Documentation system for specially chosen scientific field (e.g. chemistry, biology, others)
2. Law, general regulations
3. Optional lectures (only one of these four is compulsory):
   a) Mathematical elements of information
   b) Logical elements of information
   c) Linguistic elements of information
   d) Technical elements of information
4. Facultative lectures: Paleography, librarianship, (public, school, special, musical), archive, museology, preservation technique, arrangement of galleries and exhibits, translations and interpretation-service, mechanical translation, cybernetics, editing and publishing, graphic arts and reprography, planning and building of libraries, and other areas of educational and scientific activities

Type of training
Interdepartmental study in Librarianship, Documentation and Information Science

Conditions of admission
Interdepartmental study in Librarianship, Documentation and Information Science
University diploma - B.A., B.Sc., or higher level
Other requirements:
- Knowledge of one world language
- Reading ability of two more languages
- Typing ability
- Acquaintance with one of the standard reproduction techniques

Are foreign participants allowed

Yes

Are foreign participants allowed

Conditions of admission
As for Yugoslavian students

Note: Additional content not fully visible or legible.

In 1967/68 the State Secretariat for High and Vocational Schools recommended to all schools of engineering and other vocational training under this Secretariat to introduce a 16-hours course on "Information and documentation" as a regular and obligatory subject.
GERMANY

Courses for users of documentation in German universities and academies (the titles of lectures and seminars are subject to alteration).

BERLIN

Freie Universität Berlin (Free University of Berlin)
- Medical statistics and documentation for clinical physicians
- Introduction to documentation (with practical work)
- Language in documentation
- Problems of documentation and media
- The documentation centre and its users

Technische Universität Berlin (Technical University of Berlin)
- Theory and technology of electronic computers (with practical work)
- Statistical system theory and theory of information (with practical work)
- Main problems of technological documentation
- Systems of process control with digital and analogue computers
- Fundamental features of programming digital computers

Berliner Bibliothekarakademie (Berlin Library School)
- Introduction to documentation

BONN

Universität Bonn (University of Bonn)
- Introduction to medical statistics and documentation
- Introductory course for use and programming of electronic data processing equipment and punched cards machines for medical men

DUSSELDORF

Universität Duisburg (University of Duisburg)
- Introduction to scientific work
- Medical books and periodicals and introduction to bibliography and documentation

FRANKFURT

Universität Frankfurt (University of Frankfurt)
- Introduction to modern literature in chemistry and physics (with practical work)

FREIBURG

Universität Freiburg/Br. (University of Freiburg/Br.)
- Fundamental principles of documentation (with practical work)
- Problems and methods in documentation of medical data
GIESSEN

Universität Giessen (University of Giessen)
- Introduction to scientific documentation

HANNOVER

Medizinische Hochschule Hannover (Higher Medical School of Hannover)
- Documentation problems

HEIDELBERG

Universität Heidelberg (University of Heidelberg)
- Introduction to medical documentation and statistics
- Introduction to scientific work in the field of data processing

KIEL

Universität Kiel (University of Kiel)
- Documentation of medical data with special consideration to automatic data processing
- Practical exercises on punched cards machines
- Medical bibliography and documentation of literature
- Statistical methods study for medical men (including documentation of medical data and automatic data processing)

MAINZ

Universität Mainz (University of Mainz)
- Introduction to programming of electronic computers for medical and statistical tasks

MARBURG

Universität Marburg (University of Marburg)
- Introduction to independent scientific work on medico-biological statistics

MÜNSTER

Universität Münster (University of Münster)
- Principles of medical information

STUTTGART

Technische Hochschule Stuttgart (Technical University of Stuttgart)
- Problems of organization of libraries and documentation
Universität Tübingen (University of Tübingen)
- Medical data documentation (with practical work)
- Registration and machine processing of medical data (with practical work)
- Colloquium on information processing

ULM

Medizinisch-Naturwissenschaftliche Universität Ulm (Medical and Natural Sciences University of Ulm)
- Medical statistics and documentation

WÜRZBURG

Universität Würzburg (University of Würzburg)
- Medical documentation and statistics
According to a decision by the Committee for Science and Technology, obligatory training has been introduced in the field of scientific information for students of all academic establishments in Hungary.

Lectures and practical work last 10-20 hours and are devoted mainly to bibliography, documentation services and problems of scientific work. The aim of the practical training is to familiarize the students with the use of catalogues, abstracting journals and reprographic equipment.

**BUDAPEST**

Eötvös Loránd University; the Library Science Department has a course on information science lasting 113 hours. The programme includes:

1. Introduction to information and documentation
2. Bibliography
3. Documentation processes
4. Theory and practice of searching of documents
5. Classification
6. Mechanization and automation of information processes
7. Reproduction of documents

**BUDAPEST**

At the Polytechnic in Budapest, Department of Chemistry, lectures (20 hours) are conducted in the field of Information and documentation.
ITALY

BOLOGNE

At the Istituto di Chimica Generale e Inorganica lectures were introduced in 1960 on "Chemical nomenclature and documentation" destined for students of the institute and lasting for one academic year.

MILANO

The Federazione delle Associazioni Scientifiche e Tecniche di Milano organizes seminars devoted to problems of application of mechanized systems for information data processing in different branches of industry and science.

ROME

Lectures in documentation are held at the Scuola di Perfezionamento in Storia della Medicina to provide students with some general background information.

The Facoltà di Scienze Statistiche, Demografiche e Attuariali dell' Università degli Studi di Roma conducts a preparatory course for the journalistic profession. The purpose of the course is to study information by means of methods applied in sociology.

The preparatory course for the profession of a journalist includes the following subjects: history of means of information, legislation, statistics, information technique, and the theory of studying the public opinion.

An experimental course in documentation and bibliographical research in the field of the economic sciences was also held in 1962 at the Faculty, under the patronage of the Economic Information Centre for Underdeveloped Areas. Students of the Faculty of Economy and Law and employees of state and private enterprises participated in the course.

The programme included: methods of documentation activity and methods of disseminating information in the economy with particular emphasis on their fitness for less developed areas.

Lectures in documentation are also held at other faculties of the University of Rome, the Faculty of Literature and Philosophy, and in library schools.
PO LAND

At the higher schools listed below there are 30-hour lectures in scientific information in the 3rd or 4th year of studies:

Academy of Mining and Metallurgy in Cracow, Cracow
Cracow School of Economics, Cracow
Technical University of Cracow, Cracow
Technical University of Gdansk, Gdansk
Silesia Technical University of Gliwice, Gliwice
University of Lodz, Lodz
College of Agriculture in Lublin, Lublin
Technical University of Poznan, Poznan
Nicholas Copernicus University in Torun
Central School of Planning and Statistics in Warsaw, Warsaw
Warsaw Agriculture University, Warsaw
College of Agriculture in Wroclaw, Wroclaw
Higher School of Economics in Wroclaw, Wroclaw
Wroclaw B. Bierut University, Wroclaw

Programme

1. Role of scientific information and its aims
2. Organization of information activities in Poland
3. Organization of information activities abroad
4. Sources of scientific information
5. Classification according to UDC
6. Methods of processing documentation and information
7. Information retrieval
8. Application of scientific information methods to students research work
9. Formal and informal examinations

Lectures on scientific information are also organized for scientists and lecturers at higher schools.

WARSAW

At the Akademia Wychowania Fizycznego (Academy of Physical Education) in Warsaw 15-hours lectures in scientific information are held in the 4th year of studies.

Programme

1. Progress in scientific research and growth of special literature in the world. General remarks
2. Role and aims of documentation and scientific information
3. Sources of information and their information value in:
   a) books, etc.
   b) periodicals
4. Copyright, translations, citations, etc.
5. Work of information and scientific documentation services
6. Processing of documents
7. Classification principles
8. Documentation cards as basis for registration of documents
9. Card files, catalogues and their kinds
10. Dissemination of information
11. Mechanization of information processes, general view
12. Organization of information services at home and abroad
13. Principles for writing scientific work, including Master's thesis
14. Visits to Documentation and Scientific Information Research Centre at the Academy of Physical Education.

Lectures on scientific information are also held for lecturers at higher schools under the Ministry of National Defence.

In some vocational technical schools and general education secondary school programmes lectures on scientific information are combined with library science and last for a couple of hours.

Refresher courses are also organized by the Chief Technical Organization in Warsaw and by the Centre for Technical Advancement in Katowice for technical and economic personnel employed in various branches of national economy; they include scientific information in their programmes.
Institutul Central de Documentare Tehnică - IDT (Central Institute for Technical Documentation)
Str. Cosmonautilor 27-29
Director: V. Tărăbol

Information and documentation in applied research - A users' training course

Programme
1. Necessity of technical and scientific information in applied research
2. Individual information and documentation methods used by research workers
4. Classification of patent literature
5. Utilization of bibliographies
6. Utilization of abstracts
7. Utilization of review articles
8. Methods of investigation in applied research

Type of training

Course for users of information

Conditions of admission

Course can be attended only by research workers belonging to research institutes and industrial plant research laboratories

Duration of training

4-6 days
SOUTH AFRICA

In addition to the professional training courses for librarians the universities and the South African Council for Scientific and Industrial Research conduct training courses for users of information, which are attended both by students of the institutions and by scientific and technical personnel.

SWITZERLAND

Users of information and documentation are trained by the Eidgenössische Technische Hochschule (Federal Institute of Technology) in Zürich.
UNION OF SOVIET SOCIALIST REPUBLICS

MOSCOW

Moskovskij Gosudarstvennyj Universitet im. M.V. Lomonosova (Moscow State University), Physics, chemistry, biology, geology and economics faculties Leninskie Gory, Moscow

Course: Scientific and technical information

Programme
1. Basic principles of organization of scientific and technical information in the USSR and abroad
2. Sources of scientific documentation according to specialization of users
3. Collection and retrieval of information documents - general knowledge about information retrieval systems, classification and systematization, analytical information processing, information search and retrieval
4. Methods of utilization of primary and secondary scientific documents
5. Future developments in information activities

Type of training
University lectures

Conditions of admission
Lectures are conducted for students of physics, chemistry, biology, geology and economics faculties. Attendance at the lectures is optional.

Duration of training
36 hours

Examinations
Information users. The goal of the course is to improve methods of using sources of information and to give some knowledge where and how the necessary data can be obtained during and after studies.

Who is to be taught

Examinations

Degree or other qualifications granted
None

Language of lectures
Russian

Tuition fees
Free

Number of graduates
300 in 1968
Training for users of libraries in the United Kingdom has mainly been carried out in Universities. A series of short courses on the use of the chemical literature was begun at the Liverpool College of Technology since 1959. In 1966 similar courses on the use of the biological literature were started at the University of Bradford. Both these courses, however, have over the years come to be attended more by information workers than by bench scientists.

At a series of six Universities (Edinburgh, London University College and Chelsea College of Science and Technology, Oxford, Warwick and York) the Office for Scientific and Technical Information is arranging courses for some 500 students to receive an information service and some instruction in its use.

In 1962 the National Lending Library of Science and Invention at Boston Spa, Yorks. began to run ten-day Seminars on the use of scientific literature for post-graduate research students. These have been discontinued in favour of courses for staffs of university libraries, aimed at preparing them to give instruction in the use of scientific literature to the students of their own universities. A specimen timetable for such a course on the use of scientific literature lasting 10 days' is published below:

1. Tour (description) services of the National Lending Library for Science and Technology
2. Guides to published information
   a) Serials:
      - current awareness tools
      - abstracting journals
      - indexing journals
      - annual reviews
      - review serials
   b) Tools for students' specified interest
   c) Reports: indexes
   d) Books:
      - theses
      - annual reports
      - yearbooks
      - monographs
      - technical dictionaries
      - language dictionaries
      - encyclopaedias
      - bibliographies
3. Language problems
4. Record keeping
5. Information bureau
6. Keeping up with current literature
7. Library resources in the U.K.

Films: The National Lending Library for Science and Technology, and the National Library of Medicine, USA

Criticism and discussion of the course.
Many university libraries are now providing instruction to their users in the use of literature. Instruction is provided at many levels, ranging from freshmen to post-graduate students, and there is no common pattern. A review of the position in the various universities is given in the paper by Miss Tidmarsh.

Outside the universities, Aslib provides a two-day course entitled "information on a shoe-string", which is designed for managers, secretaries, research workers and others who have a part-time responsibility for providing information in their organization. This course is held once or twice a year, usually outside London.

Another development is being supported by OSTI whereby retrospective searching of the medical literature by means of the Medlars technique (Medical Literature Analysis and Retrieval System) will be made easier by providing facilities for consultation with specially trained liaison officers. Five such officers - at Newcastle, London, Edinburgh and two yet to be appointed - will help users in the formulation of search profiles and will advise on availability and capacity of this computer-tape index. Courses are also being held at the Hatfield College of Technology.

ZAGREB

The Centar za Studij Bibliotekarstva, Dokumentacije i Informacjonih Znanosti (Centre for the Study of Librarianship, Documentation and Information Sciences) conducts training of users, intended for two kinds of students:

- specific subjects in the field of librarianship and documentation for one semester for students of the Prirodoslovno-Matematichki Fakultet (Faculty of Natural Sciences - Mathematics) of the University of Zagreb;
- special seminars in problems associated with the principles, methods, and technique of scientific work, conducted twice a week for two semesters for graduates of various faculties of the University.
