Designed for educable mentally handicapped students, the Functional Basic Reading Series is described in terms of a practical approach to reading. The four developmental stages of the sequential program are presented accompanied with specific titles of materials appropriate for each level. Characteristics of controlled vocabulary, social goals and objectives, and interest factors are noted. (RD)

       Munro Shintani, Ph.D., Coordinator

Staff Assistants:
       Phyllis Carter
       Pat Adams
       James Stehbens

The project is supported in part by a grant from the U.S. Office of Education, awarded under PI-88-164, Co-Investigators Donald L. Carr, Ph.D., and Edward L. Meyen
The Functional Basic Reading Series is a complete reading series specifically designed for educable mentally retarded students. It attempts to provide a special type of reading program—one that offers a functional and practical approach to reading rather than one which is strictly academic.

The teaching techniques and theories employed in the Functional Basic Reading Series do not differ markedly from those used in a regular series. However, the Functional Series differs chiefly in the rate and complexity with which the reading skills are presented. The objectives of the program are to (1.) control the rate of introduction, repetition and complexity of the vocabulary, (2.) reconcile the chronological, social and mental ages in terms of illustrations and story content, and (3.) present functional reading skills on a level and at a rate which is commensurate with the pupil's ability.

Developmental Stages of Functional Basic Reading

The Functional Basic Reading Series is organized into four developmental levels. Level I is entitled "Developing Special Abilities Needed for Beginning Reading Instruction" and is the readiness level. Level II, "Initial Stages of Reading Instruction," develops the ability for associating word and picture symbols, the ability to acquire a sight vocabulary, and the ability to read simple sentences. Level III is "Learning Word-Recognition Skills and Developing Reading Efficiency and Independence." The children working in this level learn the word-analysis skills necessary for word recognition and efficiency in independent reading. Level IV is entitled "Independent Reading for Comprehension, Information, Protection and Entertainment." The text materials at this level stress the higher thought processes by means of stories that emphasize educational and vocational content.

Although no rigid grade demarcations are placed on any of the materials, the program is sequential in development. Pupils may progress through the materials according to their own abilities.

New Words - 1245
Cumulative Word Total - 2471
The publishers point out that the program and materials outlined above are intended for the pupil whose approximate I.Q. is 70. Some of these same materials have been rewritten at a lower reading level for students in the 55 I.Q. and 63 I.Q. range. The stories have been reillustrated to depict characters and situations which will be acceptable to the social needs of these pupils.

Controlled Vocabulary

A new vocabulary list, especially intended for retarded pupils, was compiled for developing the reading text material in this functional reading series. Al Tudyman and Marvin C. Groelle, in compiling A Functional Basic Word List for Special Pupils, considered two basic criteria: (1.) those words having special significance to mentally retarded and slow learning children, and (2.) those words most frequently recurring in several of the standard word lists.

New vocabulary is introduced slowly and systematically. Each new word is repeated five to ten times before another new word is introduced. The numbers of words and the number of ideas per sentence has been controlled throughout each book in the series.

Social Goals and Objectives

The stories in the Series carry the theme of eight continuing "social life needs." These are: (1.) learning to get along with others, (2.) learning to keep healthy and to live safely, (3.) learning the wise use of leisure time, (4.) learning to travel and move about, (5.) learning to manage personal affairs, (6.) learning to earn a living, (7.) learning home making and simple money management, and (8.) learning the rights and privileges of a citizen.

Interest Factors

The stories attempt to portray experiences with which the retarded student can relate. These are situations which are concrete, functional, and non-abstract in nature.

Illustrations are used to help focus on the central theme of the story. The story characters and their environments conform to the chronological age of the pupils who will use each particular book.

The vocabulary is basic and functional in nature, portraying in simple language experiences and ventures which are appealing to special class pupils.
