The film service program described in this handbook defines selection procedures that facilitate ordering and scheduling of instructional films. The internal structure of the program (i.e., the group leader concept) provides for student involvement at varying levels of responsibility. Once in operation, the program should relieve the professional building audiovisual coordinator from a great deal of direct involvement in the clerical administration of the instructional film program. Illustrations of forms used in each step of the program are given. (MF)
PROCEDURE FOR SHOWING FILMS...

Select the film...

Select not just a film but a specific film that will do a specific job. The motion picture should be an integral part of the frame work of the lesson. Consider the following:

- Your objective.
- The film sources.
- The film evaluation.
- A preview, if possible.
- Ordering well in advance.

Prepare Yourself...

View the film yourself prior to class use.

Study prepared notes taken during advance viewing.

Prepare a plan to incorporate the film into your unit.

Check the possible reviews of the film in educational journals.

Prepare the Room...

Create the best possible conditions for viewing:

- Darkened room.
- Good screen sight lines from all seats.
- Projector speaker placed where all can hear.
- Ventilation of air if the room is crowded.

Prepare your Pupils...

Help the learners plan their search for information before they see the film by:

- Assisted collateral reading.
- Discussion of topics.
- Listing points to be watched for.
- Listing questions to be answered.
- Pre-tests or inquiries.
- Comments by the instructor to clarify difficult spots in the film.

Anticipate vocabulary problems which may interfere with comprehending the film.

Introduce the film by using positive remarks that--

-- increase interest and expectancy in what is coming.

-- point out "fleeting sequences" that might be missed.

If necessary introduce the film by using negative remarks which--

-- indicate a poor quality of film or sound track, accents, dated material, etc.

Conduct the Follow-up...

Give the students an opportunity to evaluate the learning derived from the film.

Provide follow-up activities which develop naturally from viewing, such as:

- Collateral reading.
- Discussion.
- Organization of class or individual projects.
- Expression through writing.
- Dramatic plays.
- Problem solving.

IS THERE A STANDARD PROCEDURE or a standard formula for using an educational film?

The answer is No! The preparation, presentation follow-up pattern may not be desirable under all circumstances.
ADMINISTRATING AN INSTRUCTIONAL FILM PROGRAM: A Handbook for the Building Audiovisual Coordinator

By

Charles St. Louis
Audiovisual Consultant
Mona Shores Schools

Thomas G. Lee
District Media Coordinator
Mona Shores Schools

Instructional Media Services
Mona Shores Schools
Muskegon, Michigan
THE use of motion pictures as a communication tool in the classroom has contributed much to increasing the effectiveness of the teacher. Today, the educational utilization of films is recognized as a vital component of an instructor's instructional repertoire.

THIS handbook was written particularly for the individual within a school building --- audiovisual coordinator, media specialist, librarian, or whatever he may be called --- who is directly responsible for providing film service to teachers. This model which will be developed on the following pages of this handbook is not theoretical. It is, on the contrary, a time-tested system which has proven to be exceptionally effective for the ordering, booking, and screening of instructional films at the secondary level (grades 7-12).

FROM the outset, it will become obvious to the reader that the structure described can be easily extrapolated to the administration of other commonly used audiovisual equipment and materials. This extension of the model should be kept in mind.

C. St.L.
T.G.L.
Muskegon, Mich.
May, 1970
A publication of this sort could not have happened without the generous help and enthusiasm of many people: The various teachers who through the years helped develop the system. The Administration of Mona Shores Schools, in particular, Superintendent William A. Luyendyk, and High School Principal C. William Hanichen. Thanks also to all the hundreds of student assistants without whose help this program would not have existed.

Lastly, for their kind support, the authors wish to thank the Mona Shores Board of Education: Orville Janis, Lyle Williams, Otto Ross, Evelyn Hradsky, Donald Arnson, Stan Broutman and Leigh Stevens.

PROCEDURE FOR SHOWING A FILM .......................... Inside Front Cover

ADVANTAGES OF FILMS ................................. Inside Back Cover
INTRODUCTION

A MOTION PICTURE is a powerful means of communication. It is essentially a multiple method of communication combining sight and sound. It is especially effective as a technique for telling a story. It represents facts realistically. It dramatizes human relations and events. It arouses emotions. It transmits attitudes. It depicts imagination. It can enable one to see the unseen.

BECAUSE of these characteristics, the motion picture was recognized early as an instructional tool. Educational films were first shown in a very few scattered school auditoriums around 1911, when the Edison Company started making them, and gradually they have been shown more often and in more places ever since. Thomas Edison, who never had much formal schooling himself, was a great believer in education and was certain that movies could play a tremendous role in providing it.

RESEARCH has justified Edison's faith in the motion picture. Experimental studies of film use have shown that when films are used properly, the rate of learning and retention is increased. Not only do films expedite the rate of learning, but they increase its scope.
MANY things are learned from the various types of motion pictures. The educational film, however, is one deliberately designed to make its audience remember something, do something, or feel differently toward something as a direct result of the showing. Such films may range from the narrowly didactic to the highly dramatic. Or from a simple "how-to-do-it" film to one on the complex problem of race relations. In either case, the truly educational film must maintain objectivity of idea and accuracy of factual content.

THE biggest boom in educational films followed World War II and has increased ever since. In the post war decade, hundreds of classroom films were produced in the U.S. by organizations like Encyclopaedia Britannica Films, Coronet, and McGraw Hill. The value of certain entertainment or feature films was brought to a focus in this same era, and portions of Hollywood features were excerpted for school use. At present, many full length feature films are available to educators on 16 mm. film.

TODAY, as never before, educators find themselves able to obtain all kinds of equipment and materials to develop and support an instructional film program --- a program which is often the core of a school's audiovisual services. This handbook is designed to help: (1) The administrator who does not have the services of a media specialist at least get his program "off the ground"; (2) The librarian who feels the need for expanding his knowledge and skills concerning the implementation of film services; and (3) The teachers in schools of library science and audiovisual education who wish to present their students with a tested model of a film service program.

THE film service model described in this handbook is a highly structured one. It is based around a seemingly plethora of forms,
memos, checklists, direction sheets, etc. which organize and control all aspects of the film program, i.e.: ordering of the films, confirmation procedures, arrival of the films, booking procedures, and the actual showing of the films by projectionists. Each form and procedure has been thoroughly tested by use and has been found to be essential to the total operation of the film service model.

THE running of such a program requires many individuals: professional, clerical, and student. However, the basic concept underlying this film service model is one of student service. The proper running of this model presupposes that the school structure is organized so that students in sufficient numbers can be available to work in the program. This is not to suggest an exploitation of students. On the contrary, the responsibilities given to students within this model are highly structured, worthwhile activities and students should receive credit (preferably academic) for these experiences.

THE schematic below structures a recommended clerical and student staff for a film program in a high school of about 1,600 pupils and 60 teachers using about 1,200 films per school year. This basic structure,

<table>

</table>

### Introduction
with appropriate adjustments in staff size, could be applicable to any size school.

INHERENT in the schematic are some organizational configurations and key personnel which the authors feel are mandatory if the model is to function.

THE choice of the proper clerk to supervise students is essential to the program. Primarily you are looking for a non-professional reflecting the strong, respected traits of a leader of youth working for a common cause. This person could be likened to a coach and his team able to withstand the day to day pressures and constant demands of an almost assembly-line service. The crux of this person must be directed toward an interpretation of the entire program which makes it meaningful and vital to all concerned.

ALSO important is the choice and concept of the group leaders. The group leader structure does much to maintain continuity within the program, since such individuals work for a three-hour block of time. Group leaders are upperclassmen, such as seniors, who have completed most of their academic requirements towards graduation.

ON the following pages of this booklet, you will find the specific forms and procedures which unite to create a most efficient program for the administration of educational films.
In this package of materials, you will find (if you used any films this year) a pile of 3"x5" cards with the title, dates you used the film(s), color, price, ordering source, name of the teacher ordering (probably your name) and the department for which it was ordered.

Use these 3"x5" cards as a reference tool for ordering films for next year. We do want these cards back as well as all of the data enclosed for your use and reference. It is part of our program to keep all of your requisitions, movie arrival notices, booking charts, inventory cards, etc., year after year so that a fixed reference guide can be structured as to what materials teachers in the past have used for teachers in the future. We now have complete records on what items each teacher has used in our department beginning with 1965.

Also enclosed in this package are a series of sheets. Three of these sheets are your order forms for next year. They can be identified by their structure; the first of these sheets is numbered one through twenty, another - twenty-one thru forty, and the third forty-one thru sixty. Along with the order forms is enclosed a mockup of next year's school calendar. This is to aid you when ordering to make sure you do not schedule a film during a vacation, holiday, etc. This calendar can also be used as a tool to help you begin to plan your lessons and teaching units due to the necessity of advance scheduling of films.

We suggest that you list the preferred films on the three order forms then place the corresponding number of each film onto the accompanying mockup calendar. Place the film's number, i.e. film number one: 1. "Hormones", in the empty squares on the calendar which represent the date(s) you will require the film. This will aid you in scheduling your films more effectively and will also help us in ordering your films.

If you teach a semester course and plan to teach the same subject both semesters using the same films, it is possible to duplicate your order by coding the twenty weeks of the first semester with the twenty weeks of the second and repeat the same list according to the placement of the week on the calendar.

Finally, we have enclosed in this package special instructions on how you and the A-V Department can research films for the various subject areas you are considering to teach next year. These instructions and the examples they illustrate are very similar to the forms and charts mentioned above on this memo. If you have any questions please feel free to stop in and see us at any time.

NOTE: WE MUST HAVE ALL ORDERS FOR NEXT YEAR'S FILMS IN BY MEMORIAL DAY!

Please make sure all orders are approved by your department chairman before they are submitted to us. Have your chairman initial all order forms or see us about restructuring or changing your orders.

C. St. Louis
A-V Director
THIS is basically a model constructed of facsimile letters and forms. With a careful reading of these documents and attention to the overall continuity of presentation the reader should have no difficulty in working his way through this administrative model.

**Compilation of the Basic Film Order**

The year's basic film order should be begun in the Spring of the preceding year. This ordering activity is initiated when all teachers are sent an "ordering package" which contains: inventory cards, ordering sheets, the coming year's calendar, and information on topic research.

The explanatory letter to this ordering package (page 10) delineates in specific detail what a teacher must do to successfully complete his film order for the coming year.

The inventory cards contain information on films used by the teacher during the current year. This gives the teacher the necessary information to re-order films which have proved valuable. Similar information on films used during previous years is also available upon request, since these cards are retained on file for such reference use. The inventory cards themselves are prepared at the time the films are confirmed, a procedure which is described in further detail on page 22.

Also included in this initial ordering package are order sheets

Basic Film Order 11
Ordering Sheets with room for sixty film titles

which provide space for sixty film choices. In addition to space for the normal descriptive data (i.e., title, color, length, cost) the form requires the teacher to indicate the catalog and page number in which the film is listed. This information is necessary for re-checking before actual ordering can take place.

Basic Film Order
Mock-Up of the coming year's school calendar

their orders is effectively pacing the show dates of the films requested. As an attempt to practically alleviate this recurring problem a small mock-up calendar of the coming school year is prepared and included in the ordering package. Vacations, holidays and special events are noted so that films are not scheduled during these exceptions to the school year.

THE mock-up calendar will also be used as a coding sheet when the teacher prepares his total film order.

OCCASIONALLY teachers will want to order films on subject areas for which they have no specific titles in mind. At this point they can refer to the various selection tools provided in the Media Center, or utilize "Topic Research" a service offered by the Media Center staff. The exact procedure for such a service follows on the next two pages.
Subject: Topic Research

To: All department chairmen and interested faculty members.

I have noticed a certain degree of difficulty and confusion on the part of teachers attempting to effectively research and locate quality films to order for the coming school year. Since this apparently seems to be a problem on the part of most teachers due to the lack of time, selection tools and basic information on where to go and what to look for, I recommend that the following procedures be followed:

Submit to me, on a slip of paper or on a form similar to the one on the bottom of this memo, a listing of the general subject areas, periods, themes or topics you are considering to cover with films. We will then research and return to you a listing of recommended films to which we have access and can cover with our budget.

This list will state the title of the film, the color, the length as well as the catalog and page number where it was found. All you need to do is check the catalog for a complete description of the film or check with us and we will tell you if anyone on our staff has previously used the film to give you a first hand evaluation. After you have made your final selections then fill out one of our standard order forms, submit it to us after it has been approved by the department chairman and we will process it for you.

We have made a mockup of next year's calendar which includes all vacations, marking periods, special day off and school week numbers. This tool is for you to use while selecting preferred show dates for the films you require. All that you have to do is place the corresponding number next to each movie title onto the calendar spaces representing the calendar dates you will require the film(s). This will enable you, your department chairman and our department to keep an adequate balance of film flow, coordinate and solve unnecessary duplication as well as illustrate to you a total picture of your film program for the year at a single glance.

Allow us to work for you and your needs for media materials. We will be more than pleased to serve you in any way we can along the lines of information and instructional material usage.

General topics researched by the A-V staff and returned to teacher for approval.
Specific topics selected and placed on order form

AFTER a teacher has reviewed all previously used films, researched current selection materials, and perhaps utilized the research service offered by media personnel, he is ready to record his order on the forms provided.

ALL information must be carefully entered, as illustrated on the facsimile below. The teacher's department chairman as well as the audiovisual director must approve the order to insure for overall curricular appropriateness and continuity as well as financial feasibility.

NEXT the corresponding number of each film is placed on the mock-

Place the corresponding numbers on the mockup cards (indicating the date(s) you require the film. If additional space is required for ordering films use the attached sheets 31-40, 41-60.
School Calendar coded with specific material's number

Once all the necessary forms have been accurately completed and signed, the order is ready to be processed by student and adult clerks.

The film entitled "Hormones" which was located during a topic research for Roger Tharp (page 15) and later selected by that teacher for his film order (page 16) will be used as an example. It will be traced through the various steps from ordering until the time the film is screened for students.
ORDERING OF FILMS

THE first step of the ordering procedure is to double check the data provided on the teacher's order form, particularly source and rental price. Below the film "Hormones" is checked against the University of Michigan-Michigan State Joint Film Catalog.

A CHECK is also made as to whether or not the same film has been requested by another teacher. If this does occur, an attempt is made to compromise the use dates of the requested film to one mutually accepted time. For a situation such as the aforementioned, the film use time would be extended from the standard three day period to anywhere from five to ten days, depending on how many teachers require the film. It should be noted that renting the film for a day or two longer than the standard three day period is usually less expensive than renting the film for two separate showings.

AFTER the number of days the film will be required is determined the film can then be ordered. This is done by using the preferred order form usually provided by the film rental source. When no form

Proper order form filled out and mailed to distributor

is provided a form letter may be substituted and usually causes no problem. Since "Hormones" is to be rented from the University of Michigan's Audio Visual Education Center the preferred form from that rental source is utilized. Note that the U. of M. requires that three choices of film use dates be listed.

ONCE the order form has been submitted to the distributor a per-
period of ten days to two weeks usually elapse before a reply is received --- generally in the form of a confirmation notice. If ordering has been initiated far enough in advance the chances are great that most films ordered will be confirmed on or near the dates requested.

SINCE most film distributors ship films anywhere from seven to ten days before the scheduled show date (note that Michigan ships a week in advance) most films arrive two to three days before the requested show date. This suggests that it is perhaps a good policy to order films with show dates towards the middle or end of a week, so that the actual time the film is available for use can be extended.

IT might also be mentioned at this point that a strict policy of returning rental films on the day after the rental period should be strictly adhered to.

ONLY until the confirmation notice is received can the film definitely be considered as coming. It is at this point that the various book work can begin to structure the use of the film.

FOR each film confirmed a separate individual film schedule is
Specific Film Schedule Form filled out for each confirmed film

This is a two sided form giving data about the film on one side and a two week scheduling calendar on the reverse side. Note that the dates for which the film was confirmed are placed on the reverse side.

ALONG with this procedure inventory cards (page 22) on each film are prepared in duplicate and filed in two (2) files, by:

TEACHER - Each teacher is assigned a number and this copy of the card is filed behind the teacher requesting the film. If more than one teacher requests the film then additional cards should be prepared.

FIRST SHOW DATE - A file with a divider for each day of the school year is prepared and this card is filed behind the first show date divider.

BOTH of these files have a vital place in the total structure of

Inventory Cards

the entire film program. The Inventory Card, filed by teacher, is used as already discussed (page 11) as a reference tool in preparing yearly film orders.

ABOUT two weeks before the school year commences a Master Confirmed Film Catalog containing all confirmed films to date is prepared and duplicated for each teacher in the school, but preferably throughout the school district. This publication is compiled by organizing the inventory cards which were filed by first show date and reproducing the data in catalog form.

ONCE a teacher learns that a requested film has been confirmed it is his responsibility to fill out the necessary requisition so that the audiovisual department can book the specific use of the film. The fact that a teacher has ordered a film does not insure that it is for his use only, and once the film is listed in the Master Confirmed Film Catalog any teacher is free to schedule its use. More about the booking procedure will be described starting on page 29. However, it should be emphasized that one of the strengths of this administrative model is its ability to completely schedule a film's use, equipment, projectionists and all, weeks or even months in advance of the films arrival at the building.

SINCE all confirmations are not in by the time the Master Con-

**Master Catalog** 23
Weekly supplements prepared to the Master Confirmed Film Catalog.

Firmed Film Catalog is printed, and because ordering and confirming take place continually all year long, a supplement must be provided to bring the Master Catalog up-to-date. This list can be prepared whenever the quantity of newly confirmed films merits it. In the model described, however, a weekly supplement was required.

Another great help to teachers is the preparation of “Next Weeks

All teachers in the district may use the films listed. However, the teacher requesting the film must pick up and return.
ARRIVAL OF FILMS

ONCE the film arrives it is necessary to determine if the requesting teacher has scheduled specific showing times. This is done by pulling and checking the film schedule form.

IF a requesting teacher has already booked specific showings of the film a Movie Arrival Notice is sent as a reminder. Other teachers who might have booked the film are also sent notices.

IN the case that the requesting teacher has not previously scheduled the use of the film, an invoice is attached to the Movie Arrival Notice and sent to the teacher to be filled out and returned.

IT is at this time that the film schedule is punched on the "IN" space to indicate that the film is in stock. The same is done when the film is returned except that it is punched in the "OUT" space.

ALSO at this time the "first show date" inventory card is pulled and placed in a return date file for films in stock. This card is filed behind the day after the last show date, as this is the basic rule as when to return films. When the film is returned then the "first show date" inventory card is refilled in its original file.

SPACIOUS physical facil-

Movie Arrival Notice

MOVIE ARRIVAL NOTICE

TO: Mrs. Tharp

Date issued: 1-17-69

This is an official notification from your Media Center's A-V Dept. that a 29 minute film titled: Hormones has arrived for your use from:

- Univ. of Mich.
- County Bldg.
- Western-Mich. Univ.
- Other (specify:)

Our records indicate that:

A. You have already scheduled this film for use as per a previous request. The details of this scheduled show date can be checked by referring to the confirmation form sent to you at the time when it was booked under Invoice No. ______. You may expect the film to arrive and be shown during the date(s) and time(s) which appear on the confirmation form. If you wish any changes at this time please check with us soon!

B. It was ordered by you for use between the dates of: 1-21-69 - 1-23-69. If you wish to see this film complete the attached requisition form soon as the film must be returned to its distributor by: 1-24-69 (this is the date it must leave our bldg.)

The above mentioned film has arrived in __ real(s) and we feel that it can be shown to you in __ part(s) which will take __ showing(s) of approximately __ minutes each. All special preparations to accomplish this recommendation will automatically take place unless we hear otherwise from you immediately!

Shelving of films

It is well known that the housing of films is a necessity when a high-usage film program, such as the one described in this booklet, is in operation.

It should be noted at this point that some films require editing before they are labeled for shelving. This editing technique will be described in more detail on page 39.

SINCE the positioning of film titles on film cases or on film cans varies so much, a film label has been devised to provide uniformity to film identification. Here again the title inventory card serves as a guide.

INSTRUCTIONS TO TEACHERS:

Shelf Number

Hormones

(Movie Title)

Tharp

(Room)

Rental Source: (Circle One)

U.O.F. M. M.S.U. W.M.U. County

Other

1-17-69 1-24-69

(Arrival Date) (Return Date)

Arrival of Films 27
Requisition returned for booking

in completing this form. As this label is filled out a carbon copy is made and placed inside or affixed to the outside of the film's mailing case. This is done to help reduce mixups when films are mailed back to their distributor.

A LARGE number is stamped on the film label to identify its position in the film storage rack. Once the film is stored in the rack the title of the film is placed on a list which corresponds to the numbered slots so that easy location of the films in the rack can be achieved.

THE teacher(s) notified about the arrival of his film(s), if he hasn't previously scheduled it, fills out the basic requisition form attached to his movie arrival notice. Here he is given option as to show dates (two choices), the periods he wishes to view the film, and when he wishes to see more than one film per hour. This requisition form also serves as a basis for requesting audiovisual equipment other than just items necessary for using a film. Any special comments or personal needs can be stipulated on this form to adapt its usage to any peculiar needs the teacher may require.

THE completed form is then returned by the teacher to the audiovisual office for processing which leads into the next phase of this model: "booking."

A-V Director
BOOKING PROCEDURES

ONE of the major advantages of using a booking system similar to the following is that once a film is listed as definitely confirmed it can be scheduled (equipment, projectionists and all) as far in advance as preferred by the teacher(s). A film confirmed in September for use in May can be booked in September for use in May and nothing else need be done until it arrives.

WHEN the completed requisition is returned by the teacher to the audiovisual office - booking begins. The preferred show dates are checked on the Film Schedule Card to see if the film is free for the desired date(s) and school period(s). If the request cannot be filled

Film schedule is checked to secure film for specific show date, and invoice number entered.

C. St. Louis
A-V Director
A METHOD of invoicing each booking is used with the aid of a mechanical self-inking numbering stamp which has the capability to repeat itself 5 consecutive times and then advance to the next number. Essentially there are five (5) separate forms which are always used with each booking and therefore can be stamped at the same time. They are: - - - -

- The Requisition (filled out by the teacher).
- Confirmation Notice.
- Master Daily Equipment Use Schedule (A-V Clerk's copy).
- Master Daily Equipment Use Schedule (Group Leader's copy).
- Equipment Tag.

THE information on the requisition which was provided by the teacher is used to fill out the following described forms. It is then placed in a file organized sequentially by Invoice Number.

Confirmation

THE second invoiced form, the Confirmation Notice, is sent to the teacher. It stipulates the exact use date, equipment which will be utilized, title of the film(s) and room(s) where materials are to be used. The use of Invoice Numbers provides quick reference if either the teacher or A-V Department desires to make changes in the use of the film, or check an original requisition.

THE last two invoiced forms, the Master Daily Equipment Use
Master daily equipment use schedule

Schedules are identical in structure and information, their only difference being the color of paper stock on which they are printed. One form is for use by the adult audiovisual clerk, the other by the student group leader.

As its name suggests, this form depicts in a graphic and concise manner the maximum use of a piece of audiovisual equipment, in this case a motion picture projector, during a school day. It should be obvious that more than one requisition can be combined into the daily use of one projector, to obtain maximum equipment utilization if necessary.

One side of the form gives the basic information about the booking: the teacher(s) involved and their number(s), the type of equipment required, and a list of the film titles.

The reverse side shows a breakdown of the six periods comprising the school day and the specific facets of each period: the teacher(s) involved (coded by number), the room(s) where the film will be shown, the specific film(s) to be used (coded by number from the reverse side) and the projectionist's number.

This form is the "brain" behind each individual booking, the key to "what's happening."

The fifth and final invoiced form is

- This set up requires a wide angle lens (cinemascope).
- You are missing film(s). _____ as it is being shared with another teacher, check comments below.

**COMMENTS:**

--

**LEAVE ALL TAGS ON CART WHEN YOU COMPLETE YOUR ASSIGNMENT!**

---

*This set up requires a wide angle lens (cinemascope).*

The Equipment Tag. This label is attached to the required equipment. It serves as the key label which shows the use schedule of the equipment to which it is attached as well as the student assistants who are assigned to transport and operate it each hour of the day. The instructors and Invoice Number which appear on this tag are vital to direct each A-V Assistant to his properly assigned equipment, where to take it, and which film to show.
Movie "Set Up"

A MOVIE "set up" is specifically comprised of: a mobile cart, a movie projector, take-up reel and an extension cord (and screen if one is not permanently mounted in showing rooms). Movie set-ups are the only items of audio visual equipment which are consistently set up and left set up due to their excessive use. All other audiovisual equipment is set up as requested.
Assignment—Direction Forms are prepared for each student assistant.

ABOVE all, the student assistant Assignment—Direction Forms are the key to activating all of the previous book work. This form provides 95% of all directions necessary to have any quantity of assistants do almost anything as the form demonstrates.

IT is always advisable to have some sort of structured system to

---

3-1

A-V Asset No. ___

Date: 3-31-69

(follow the instructions checked on both sides of this assignment sheet. Ask us if in doubt.)

This assignment is: ( ) Regular. ( ) Pick-up only. ( ) Delivery only. ( ) Delivery & Pick-up only.

SPECIAL! Check comments on bottom of back.

FIRST—You are to:

Report to the Equipment Room, pick up and deliver Invoice No. ___ to Room No. ___.

Report to Room No. ___ and operate the equipment which is already in this room under invoice No. ___.

SECOND—You are to:

Leave in the room and operate the equipment for the teacher in charge.

Leave the equipment in the room and return to the A-V Office so the teacher in charge will operate the equipment.

THIRD—You are to:

Leave the equipment in the same room, rewind the film and take the set-up to Room No. ___. Politely knock and place the equipment inside the classroom for the next A-V Assistant to operate during ___.

(follow the instructions on the reverse side—)

(sided)

THIRD STEP CONT’D:

Rewind the film and return the entire set-up to the Equipment Room and prepare it to be used again today during ___.

Rewind the film and return the entire set-up to the Equipment Room and shut down the equipment as it will NOT be used again.

If you have a Pick-Up at the end of the hour, help out in the A-V Office until it is time to make the pick-up.

Help out in the A-V Office as your specific assignment for the day is done.

COMMENTS:

( ) Have fast! as you have a _______ minute movie to show and it will take all hour.

( ) You will need a 3,000 ft. take-up reel.

( ) This is a cinemascopic movie. You will need the special lens and 2nd. screen by necessary. Make sure you check this out.

( ) One of the films you are to show is going to be shown again this hour by another teacher. Check on the details below.

A-V ASSISTANT REPORT WHICH MUST BE SIGNED BY THE TEACHER IN CHARGE OF THIS ASSIGNMENT.

My A-V Assistant was: ( ) Satisfactory

( ) Unsatisfactory

Teacher’s Signature: ____________________________
If assignment is not done, or if any other problems arise (i.e., attendance, behavior, etc.) student is notified and allowed five mishaps before being dropped.

be able to keep track of student assistants involved in the program — particularly a large program. It is difficult to have a consistently strong grading approach to evaluate the degree of involvement each student has with the program. This being the case a point system has been structured allowing each student five points per year which are removed one by one (or more if necessary) as problems develop. When the points have been expired the student is simply dropped from the program with no credit.

---

Our records show that:

- Your student assistant assignment sheet was not turned in on _, under ___________. (date:)
  (Inv. No.)
- There was not a signature on your student assistant assignment sheet for ___________, under ___________. (date:)
  (Inv. No.)
- Your student assistant assignment sheet was marked as being unsatisfactory for __________, under ___________. (date:)
  (Inv. No.)
- You were absent on __________ and we have not as yet signed your admit slip which excused you for the absence.
- You had an unexcused absence on __________ and this counts against your record at __________ point(s).

Special comments:

This particular notice counts as __________ points against you five allocated for the semester. All totaled you now have only __________ points left before you are automatically dropped from this course without any academic credit.

You have until __________ to correct the above mentioned problem. If we do not hear from you by then the points mentioned above will automatically go into effect.

C. St. Louis
A-V Director
SUMMARY

The film service model described in this handbook works. Developed over a period of seven years, it has remained essentially stable the last three of these years.

The crux of its success lies not only with the highly structured procedures and accompanying forms, but more so because of the student service philosophy which makes the whole program go. Without a rather large group of competent, responsible students, who have been unified into a group by common goals, this film service model would not work.

A program of this type has also demonstrated its effectiveness to appeal to students with widely varying interests and abilities. It provides a unique opportunity for students to make significant contributions to their own academic community. The internal structure of the program (i.e. the group leader concept) provides for student involvement at varying levels of responsibility.

Also important to the total success of this type of a complex program is adequate adult supervision. In short, a good clerk can run the program. However, it takes a dynamic type of individual with leadership characteristics who can constantly stay on top of the program and at the same time be aware if students are meeting their responsibilities.

Once in operation such a program relieves the professional building audiovisual coordinator from a great deal of direct involvement in the clerical administration of the instructional film program. He has more time to engage himself more directly with instructional related tasks.
BESIDES the human elements, the strength of this film service program is reflected in the many forms which direct all aspects of the service. Experience has demonstrated that such forms must not only be tailored to the local educational structure, but also must be extremely specific. The student assistant Assignment-Direction Form (page 34) is an excellent example of this concept.

OTHER particular strengths of this film model are: (1) A clearly defined selection procedure which not only makes it easy for instructors to order the films they want and need, but also allows for the creation of a data bank to assist in future ordering. (2) The ability of the system to completely schedule the use of a film (i.e. Book it) equipment, projectionists and all, weeks or months before the film actually arrives in the building.

IT is not expected, or really intended, that this model be taken per se and set into operation elsewhere. Numerous local adaptations would obviously be required. However, the overall concepts conveyed have relevance to any structure for the administration of instructional films at the building level. It is hoped that the various forms and accompanying commentary have served as a sort of "educational marketplace" from which the reader has had the chance to pick and choose ideas which meet his own unique needs.
USE OF FEATURE FILMS

The value of full length "Hollywood" entertainment films for educational use has long been recognized, and a great number of such films are available in 16mm format. In general, the use of such feature films is the same as for educational films except for a few special considerations concerning: selection, ordering, booking, editing and evaluation.

selection

Feature films are expensive, have long running times, and are often not desirable for classroom use. Their selection should be handled with greater care and thought than a regular educational film. Most distributors of feature films prepare careful and thorough catalogs listing sufficient information to give the average teacher enough criteria to make a wise and intelligent selection. In addition to title, length, color, scope, producer and a brief description of each film, most catalogs will list audience level and how it has been rated and awarded by different organizations who reviewed it. However, it is important to note that many highly awarded films are not appropriate for youngsters to see without an extremely thorough preparation. Films rated "M", "R", and "X" can be brought into the school and shown to all where the individual student couldn’t see it in the local commercial movie theaters.

The scheduling of feature films should be a special unoccasional event. They are best used to motivate children to a high interest level which may be the kick-off point, intermediate explanation, or summary of a teaching unit. There are many films which cover a great deal of subject ground in their footage. For example, for a quick, motivating introduction to an era the film "The Fall of the Roman Empire" enhances all the major concepts which ended one major era of history and brought on a new one.

Many times a feature film will illustrate a point with simple perfection and all the motivating techniques and advantages a multi-million dollar production budget can give. A very difficult concept to teach which might take many laborious weeks of teaching effort can often be resolved for a few dollars, the fee for the film, and wet or maybe three hours, the time it takes to see the film.

ordering

There are numerous distributors of feature films. However, in the opinion of the authors, only a few are worth dealing with. Great differences in price can be found from one company to another for the use of the same feature film. It is not too unusual to find differences ranging from ten to seventy-five dollars. Since feature films do cost much more than regular educational films, the source and the fee they charge should be a major factor in where films are ordered from.

Often it is highly advisable to order a film as far in advance as possible, even a year ahead of the show date if possible. Many feature films, especially seasonal films are booked-up by their distributors a year or more ahead of time.
WHEN ordering features it is advisable to specify that the film is to be used for a public high school on a non-profit basis, that it is to be used for one day only, and that your audience size shall remain quite small, around 45 students or less. This criteria will enable you to probably qualify for the lowest rate, since distributors vary their rates according to the above mentioned data.

SOME films selected will only be available in Cinemascope, for which a special wide angle lens is necessary. They can be rented from many film distributors for a fee around ten dollars a showing. However, these lenses can be purchased for about one hundred dollars. If the screening of Cinemascope films occurs five or more times a year it would be more economical in the long run to purchase a lens.

**booking**

ALMOST all feature films exceed sixty minutes in length, and often run as long as 180 minutes and up. Since most schools on the secondary level, grades seven through twelve, conduct classes in modules of from forty to sixty minutes a film exceeding class time must be shown in parts on two or more consecutive days. For effective scheduling, feature films generally require editing into segments capable of being shown during a class period. More on this editing procedure later.

ONCE edited the various reels can be cycled to achieve maximum use of the film. For example, in a three reel feature; reel one could be scheduled Monday, reel two on Tuesday, and so on. On Tuesday another class could be scheduled for reel one, then reel two on Wednesday, and so on. Ideally the feature could complete three cycles in a week time, with the last class seeing reel three on Friday. The major drawback to such a cycling process would be a Cinemascope film which would require three wide angle lenses. This may prove to be financially burdensome. It should be noted at this point, that Cinemascope films also require a wide screen. Two regular screens positioned side-by-side with a strip of white adhesive tape masking the black border of the overlapping screens is quite adequate. Regular Cinemascope screens, of course, may be purchased.

**editing**

IN using a multi-reeled film such as a feature or even a two part film, it is occasionally desirable to edit them into one reel or a series of reels different from the way they arrive. This is done when it is necessary to squeeze as much viewing time as possible into a specific school period.

FEATURE films may arrive in as many as six reels for the same film. As indicated earlier, it is apparent that films of this nature must be shown in segments on successive days, since most schools only allocate forty to sixty minutes per class period.

IT is highly desirable to achieve maximum viewing time within a single class period in an attempt to conserve time and minimize the number of periods it would take a class to view the entire film. This permits greater flexibility in booking.

EQUIPMENT for editing should consist of two heavy duty rewind
units each with its own brake; an editor-viewer so that each frame can be seen and isolated as the film is being edited, and a quality splicer. Also required will be long run reels with at least a 2,000 to 2,400 foot film capacity. (The standard projector reel holds 1,600 feet of film for which the running time is around forty-five minutes.) In addition, two colors of leader should be stocked, one color for the "head" and the other for the "tail" of the edited film.

EDITING feature films takes some slight experience but primarily an eye for continuity of scenes in the film to be edited. The number of parts a feature film is to be divided into is arrived by dividing its total running time by the length of the standard class period. So a 150 minute feature film would logically be divided into three parts if the class period were forty-five minutes. A feature film of this length would more than likely arrive in four 1600 foot reels, and therefore have to be edited into three 2,000 foot reels.

THE editing itself is simple. The original 1,600 foot reels are rewound onto the 2,000 foot reels and cut as close as possible to the required time point. It is advisable to cut as close to a major scene change in the film as possible so that the end of each newly edited part will leave off at a high psychological point. This is easily done with the use of the viewer previously mentioned. Once the film is cut, leader for the tail and head should be spliced on and labeled with the title, and part number. It should be noted that all films come with leader at both ends. This should not be removed, but just spliced together when the occasion arrives. This simplifies the reverse process of separating the films back into their original reels when usage is completed.

**Evaluation**

IT is essential when using feature films to follow up their use with a written evaluation. The basis for stressing such evaluations are: (1) To add documented support for large rental fees, and (2) To accrue reference data for future feature film selection.

THE rental costs for feature length films can range anywhere between fifty to two hundred dollars. Such high fees for films which seem at first glance to be purely of an entertainment nature are always subject to question. Supportive data concerning the utilization of all feature films should be constantly maintained. An up-to-date file containing film evaluations, and other supportive data should be kept on each feature film used, to provide immediate reference if problems arise.

DUE to the fact that in feature film use learning is a byproduct since most features are structured primarily to motivate and entertain, it is vital to have teachers discern to what degree the learning aspect of the film was impacted on the minds of the viewers. Since any feature film would have been selected with the upmost care and thought the odds are high for a positive response from the film's use.
ADVANTAGES OF EDUCATIONAL FILMS

The motion picture has the power to communicate many concepts involving motion:

The movements of objects too slow to be seen by an observer.

The movements of objects too fast to be analytically observed.

The motion involved in depicting the relationships of objects and flow of events separated by intervals of time and space.

The motion of the unseen.

The motion of the imaginary and of abstraction.

The motion of rhythm.

The motion involved in the interaction and flow of ideas between people.

The motion picture as an art form may be used to develop aesthetic and emotional values.

Motion pictures have the power to see objects too tiny to see by the eye alone.

The motion picture has the power to see objects too far away.

The motion picture has the power to bring all the arts together; motion pictures, drawings, color, voice, music, dance, in a combination to produce a planned result.

The motion picture has the power to present the past, the present, and the future.

Motion pictures are particularly successful in showing relationships of things, ideas and events.

Motion pictures can increase reading interest.

Motion pictures bring variety to methods of instruction.

The motion picture may be used instead of a textbook as a central theme of a unit.

The motion picture may be used in connection with all types of learning:

Development of motor skills.

Development of perception.

Builds associations and memory.

Development of understandings.

Develops emotional experiences of educational value.

Develops problem solving.

Develops attitudes, ideas and appreciations.

The motion picture may be used to facilitate the transfer of abstract concepts to concrete situations.

The motion picture has the power to present information and ideas which cannot be presented in any other way.

The motion picture can be used to develop common perceptive backgrounds and experiences.
