In-Service Training Materials for Teachers of the Educable Mentally Retarded, Session II: Experience Unit, Family and Home, Intermediate Level.

Iowa Univ., Iowa City. Special Education Curriculum Development Center.

Abstract

Designed for the teacher of intermediate level educable mentally retarded children, inservice training materials on family and home are outlined. Units (citing objectives, activities, material, and experience charts) deal with such topics as parental occupations, responsibilities at home, sex education, home furnishings, health habits, clothing, safety, transportation, leisure time activities, and the community. General objectives of the program, core areas of concentration, resource materials, and a vocabulary list are also included in the manual. (CM)
Special Education Curriculum Development Center—an in-service training approach

A COOPERATIVE PROGRAM INVOLVING THE IOWA STATE DEPARTMENT OF PUBLIC INSTRUCTION AND THE UNIVERSITY OF IOWA
IN-SERVICE TRAINING MATERIALS FOR TEACHERS
OF THE EDUCABLE MENTALLY RETARDED

Session II

Policy Statement: A review of commercially prepared material by the Special Education Curriculum Development Center does not constitute a recommendation or endorsement for purchase. The consideration of such material is intended solely as a means of assisting teachers and administrators in the evaluation of materials.

Experience Unit
Family and Home
Intermediate Level

Staff: Edward L. Heyen, Acting Director
Munro Shintani, Ph.D., Coordinator

Staff Assistants:
Phyllis Carter
Pat Adams
James Stehbens

The project is supported in part by a grant from the U. S. Office of Education, awarded under PI-88-164. Co-Investigators are Donald L. Carr, Ph.D. and Edward L. Heyen.
FAMILY AND HOME
Intermediate Level
Preliminary Steps

I. Selection of Unit: FAMILY AND HOME

Why are you including this unit in your curriculum?

Slow learners as a group will become home owners, parents, and homemakers regardless of how adequate they are. Many retarded children will come from homes where low standards of homemaking and family living exist. Often these homes will not provide the training necessary for developing effective homemakers. Therefore, equipping the mentally retarded with the skills to function acceptably as a family member, the head of a household, or a parent becomes a major task of the school.

Successful community living has its foundation in successful family living. Consequently, it is essential that the retarded student acquire those skills, attitudes, and habits that will help him to become a contributing, effective member of his family and community.

II. List Sub-Units (related theme)

1. parental occupations
2. our responsibilities at home
3. sex education
4. home furnishings
5. health habits
6. good grooming
7. clothing
8. safety practices in the home
9. telephone
10. leisure time activities
11. holidays
12. transportation
13. the community
III. General Objectives:

1. To develop an understanding of the family group; their roles and responsibilities.

2. To develop an appreciation of good home life
   a. The home as the center of family life
   b. Expression of love within the family.
   c. Cooperation, courtesy and respect among family members

3. To teach sex education.

4. To become familiar with different kinds of homes, surroundings and furnishings.
   a. Single dwelling house
   b. Apartment house
   c. Mobile home

5. To develop good safety and health habits.
   a. Proper eating and food preparation habits
   b. Basic cleanliness rules
   c. Adequate rest
   d. Appropriate dress
   e. Prevention and care of illnesses
   f. Safety precautions and simple first aid

6. To develop an understanding of the ways families have fun together.

7. To develop an understanding of the relationship between the home and the community.
   a. Neighbors
   b. Schools
   c. Businesses
   d. Churches
   e. Social Services
   f. City Employees
IV. Core Areas:

A. Arithmetic Concepts

1. Keep records of the time meals are eaten each day
2. Reading the second hand to time how long to keep in a thermometer
3. Read degrees on a thermometer
4. Figure cost of food needed to prepare breakfast at school
5. Find the price of different brands of deodorant, cleaning powder, etc. and compare
6. Figure how many hours of sleep children get
7. Find the cost of various items of clothing
8. Determine the time that prescribed medicines should be taken throughout the day
9. Discuss the cost of various leisure time activities

B. Social Competency

1. Dramatize family situations at mealtime, bedtime, leisure time, doing chores
2. Arrange attractive table settings
3. Assign committees for group projects
4. Field trip

C. Communicative Skills

1. Keep records of foods eaten
2. Make scrapbooks; include a table of contents
3. Learn vocabulary lists
4. Write, read and copy experience charts
5. Label pictures, items, things on bulletin boards
6. Read books and stories pertaining to unit
7. Arrange a House Cleaning Dictionary in alphabetical order
8. Read labels on medicine bottles
9. Conduct "brainstorming" sessions

D. Safety

1. Read labels on cans of household poisons
2. Discuss fire prevention, precautions with medicines and drugs, prevention of falls in the home
3. Practice simple first-aid procedures; use first-aid supplies
4. Use telephone to call the doctor, the fire department
E. Health

1. Study chart of Basic Four food groups
2. Use colored food cut-out
3. Cook breakfast at school
4. Shampoo hair, clean fingernails, brush teeth, wash and iron clothes at school
5. Practice cleaning kitchen, bathroom, livingroom, etc. at school
6. Make bulletin boards about appropriate clothes for different weather conditions

V. Resource Materials:

Experience Charts
Bulletin Boards
Flannel Boards
Story Books
Field Trips
Resource Speakers
Pictures
Old Magazines and Catalogs
Telephone Directories
Art Materials
Free and Inexpensive Materials
First-Aid Supplies
Cleaning Supplies and Equipment
Large Chart Paper
Kitchen Facilities, Dishes, etc.
Pets
Traffic Signs
VI. Vocabulary:

- grandmother
- menstruation
- grandfather
- period
- cousin
- sanitary napkins
- aunt
- cramps
- uncle
- apartment
- puppets
- trailer
- chores
- Basic Four
- baby-sitter
- diet

- manners
- meals
- angry
- cleanliness
- polite
- handle
- sperm
- tablecloth
- develop
- napkins
- plates
- silverware
- serving dishes
- sponge bath
- shampoo
- fingernail file
- germs
- laundromat
- detergent
- scrub
- rinse
- deodorant
- cleaning items
- compounds
- scour
- wax
- vacuum cleaner
- dust mop
- dust pan
- Endust
- Pledge
- throw rugs
- weather forecast
- boots

<td>To develop an understanding of the individual members of the family and their roles</td>
<td>Read Orally: <em>How Families Live Together</em> as a review of immediate members of a family and their roles. Lead into more complicated relationship by pointing out that everyone at the dinner table is related because of the Grandmother and Grandfather. First, point out that all children of the Grandparents are sisters and brothers with relationships of aunts, uncles, cousins, nieces and nephews. Then read: <em>My Family</em>, to reinforce and clarify discussion. Use art materials to make hand puppets representing family members. Let children choose specific family members they wish to represent, being sure all typical relatives are covered. Directions for making puppets: Stuff toe of socking with cotton batting; tie tightly with string. Use yarn or glue on copper Dolly Duzits for hair; mark features with magic markers. Cut body from material, making it large enough to cover the hand and for fingers to fit into the &quot;arms.&quot; Cut felt hands and sew onto material. Display &quot;family member&quot; puppets in classroom. Introduce next phase of lesson with question: &quot;Do all brothers and sisters have the same mother and father?&quot; Discuss relationships of step-brother and sister, step-father and mother. Bring in difference also between foster child and adopted child. Summary: We have family members in our homes and outside our homes. We live with our closest family members, and each one does many things to make our home happy. Next, we shall discuss what some of these things are.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Mothers, fathers, sisters and brothers are family members who live together. Other people in our family are -- Grandmother, Grandfather, aunt, uncle, and cousin. We are close to them because they are our family.</td>
</tr>
<tr>
<td></td>

<td>Grandmother, Grandfather, Cousin, Aunt, Uncle</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Family</td>
</tr>
</tbody>
</table>
### OBJECTIVES

1. Varied roles of family members.
   - (1) Parents
   - (2) Children

2. To develop appreciation of good home life.
   - a. The home as center of family
   - b. Expression of love within family
   - c. Cooperation

### ACTIVITIES

- Review Primary introduction to family duty: through free discussion of mother's household and child care duties and father's economic contributions. Suggest that we do not see all the things our parents do. Bring in idea of decisions on behavior standards, study habits, and handling money.
- Explain what civic duties - community activities include, such as PTA, community government, school board meetings, voluntary organizations.

Because parents are busy people, we may do many things to help at home. Ask children what jobs they do at home. List on board. Suggested chores and others to include:

<table>
<thead>
<tr>
<th>baby sitter</th>
<th>dust</th>
</tr>
</thead>
<tbody>
<tr>
<td>clear off table</td>
<td>errands</td>
</tr>
<tr>
<td>dry dishes</td>
<td>feed animals</td>
</tr>
</tbody>
</table>

- Review idea that parents work outside the home at job or civic duties and children go to school, play with friends, go to recreation centers, but the home is where all return and where all family is together. Discuss with children why they want to be at home when they feel ill, lonely, frightened, or upset. Lead to these ideas:

  - We feel good at home because we are with people we love who love us. The things in our home belong to us and we know where to look for things we want or need. To show our appreciation and help make our homes happy, we have talked about helping with work. What other ways may we show our love in the family and the good feelings

### MATERIALS

- Pictures of parents at home, on the job, mother at marketing, volunteer work and meetings.
- Puppets made by class members.

### EXPERIENCE CHART

- We made puppets. Today our puppets played family. They were all working at home. There are chores all may do to help mother and father.

- Vocabulary:
  - chores
  - baby sitter
  - errands
  - dust
  - table
  - dishes
  - garbage
  - iron
  - mow
  - rake
  - lawn
  - sweep

- Pages 12-50 and pp. 149-157 in You and Others; Leslie W. Irwin and others; Lyons and Carnahan, Chicago, Ill.

3. To teach sex education

a. Male sperm joins with female seed or egg to form baby.

b. It takes nine mos. for a baby to develop.

c. Babies need the security of a good home.

Class divides into groups with puppets made earlier and dramatize family situation to illustrate chores being done around home when all of the family is there. Teacher should encourage good ideas of cooperation and ways of doing chores with examples such as:

Brother says: It is a pretty day. I will mow the yard and rake the grass. Dad, where is a basket to put the grass in?

Sister: Mother, I'll play games with the baby while I am folding the clean clothes.

Arrange for mating a pet -- rabbit, cat, dog, etc. Explain to pupils that the male plants sperm in the female's body. The sperm joins with the mother's seed. From this seed the babies develop inside the mother's body.

Discuss that when people fall in love they get married. Then the man plants sperm in the woman's body. If the sperm joins with the woman's seed, a baby develops. It takes nine months for a baby to develop to the point where it is ready to be born. Babies are very helpless and need a great deal of care. They need both

Pets, e.g., rabbits, dogs, cats

Vocabulary:

- sharing love
- manners
- angry
- polite

</tr>
<tr>
<td></td>
<td>Discuss menstruation with both boys and girls. Explain what it is -- a flow of blood which occurs once a month. All girls experience this when they reach a certain age, usually about 12 years old. This is a natural process, a sort of preparation for motherhood. All women must menstruate before they can have babies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Write experience chart. With the girls explain how to take care of themselves when they menstruate. Teaching aids are available from the Kimberly-Clark Corporation. These include booklets for the girls, a motion picture prepared by Walt Disney, charts, teaching suggestions. Booklets and background information for teachers are also available from Tampax, Inc. These materials may be modified and used with retarded girls. It is important, however, to keep in mind that with these students you must be very explicit and straightforward. If too evasive, the students will miss the point.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Vocabulary: menstruation, period, sanitary napkins, cramps.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Materials:**
- Chart paper
- Chalkboard

**Experience Chart:**
- Menstruation
  - All girls menstruate when they're about 12 years old.
  - Menstruation is a flow of blood which happens once a month.
  - Menstruation is a part of growing up for girls.
**OBJECTIVES**

To become familiar with different kinds of homes, surroundings, and furnishings

**ACTIVITIES**

Begin lesson with statement that we have talked of the people in our homes and things we do in our homes. Now we will talk about the different kinds of houses we live in. Have children tell what type of house they live in. Include coverage of:

- single dwelling house
- apartment house
- mobile home.

Class art activity:

- Some members may use watercolors to make street, trees, lampposts on mural paper.
- Others draw and cut out different types of houses, using construction paper. Pin or staple the houses along the mural paper to be placed on wall. (Leave space to be filled in with later coverage.)

**MATERIALS**

- Pictures of different types of homes.
- Roll of brown wrapping paper to cover one strip of classroom wall for mural.
- Water colors
- Colored construction paper
- Pencils
- Scissors

**EXPERIENCE CHART**

People live in different kinds of houses. Apartment houses have many families in them. People who move a lot may live in trailers. That way they take their house with them.

**Vocabulary:**

- apartment
- trailer
- house

---

5. To develop good health habits.

a. Proper eating habits

(1) well-balanced meals

Introduce lesson by directing attention to bulletin board. Hold a "brain-storming session" - ask pupils to think of as many things as possible that contribute to good health.

Discuss one important health rule - eating proper food. Display a chart showing the basic four foods. Explain that food from each of these groups is needed each day for a well-balanced diet. Stress the importance of well-balanced meals: in order for our bodies to grow and develop properly, they must have the right kinds of foods. If we don't eat properly, we won't be as strong

**MATERIALS**

- Bulletin board caption: "Do you know some good health rules?"
- Picture of a boy or girl with a questioning expression on his or her face.
- Series of large question marks cut from construction paper.

**EXPERIENCE CHART**

Pictures of food from each basic group.

- We should eat well-balanced meals every day. We should drink milk and have 2 or more servings of meat or eggs every day.
- We should have 4 or more servings of vegetables and fruit, and 4 or more servings of bread and cereals.
5. Good health habits - continued.

a. Proper eating habits
   (1) well-balanced meals
   (7) eating at regularly scheduled times

   Discuss the importance of eating meals at about the same time each day. Have pupils keep a record of all food they eat for one day; indicate time of each meal, any snacks eaten, etc. When completed, discuss if foods from the Basic Four were included in each meal, if too many snacks were eaten, etc. Put records in scrapbook.

   Write experience chart. Read orally.

   Seatwork: Copy experience chart to put in scrapbook.

   Vocabulary:
   schedule
   meals

   Chart paper
   paper and pencils
   crayons
   construction paper

   Daily record form

   (Picture of a family eating)
   We should eat our meals at about the same time each day. Our bodies work best when we keep on a regular schedule.

   We are going to keep a record of all the food we eat in a day. Then we'll see if our meals are well-balanced.

<tr>
<td>Good health habits - continued</td>
<td>Discuss tasting new, unfamiliar foods and learning to like less favorite foods. Using the food cut outs, dramatize a family situation in which mother serves a new vegetable, a different casserole, etc. Encourage students to try new things when eating lunch at school in the Hot Lunch program. Write experience chart. Read orally. Scatwork: 1. Copy experience chart for scrapbook. 2. Look in old magazines to find pictures of food. Select a good menu for each meal; paste onto papers. Label food if possible; put in scrapbook. Review lessons about good eating habits by re-reading experience charts. Discuss that care should be taken when fixing these foods to be eaten - vegetables and fruits should be thoroughly washed; meat, bread, cereals, etc., should be kept clean and uncontaminated; you should always wash your hands before handling food; dishes and cooking utensils should be clean. Read pp. 90-97 in <em>Come Rain, Come Shine</em> Write experience chart. Scatwork: Copy experience chart for scrapbook. Find a picture in a magazine to illustrate. Vocabulary: cleanliness, handle</td>
<td>Food models, Iowa Dairy Commission</td>
<td>(Picture of a less familiar food) We should taste new kinds of food. Many times we find we like them. Some foods we should try to learn to like. We probably won't like all foods but we should try to eat as many as possible.</td>
</tr>
<tr>
<td>a. Proper eating habits - cont. (3) Learning to eat new foods</td>
<td></td>
<td>Chart paper. Paper and pencils Old magazines Newsprint Paste Scissors Experience chart about food.</td>
<td>(Picture showing someone fixing food) Cleanliness With Food We should be very careful to keep everything clean when we handle food. Our hands and the dishes and pans should be clean. We should wash fresh fruits and vegetables before we eat them. Meat and other food should be kept clean, too.</td>
</tr>
</tbody>
</table>

We should taste new kinds of food. Many times we find we like them. Some foods we should try to learn to like. We probably won't like all foods but we should try to eat as many as possible.

</table>

### Activities

- Point out that serving food attractively helps us enjoy eating.
- Show students proper way to set the table.
- Let them practice with dishes and food cut-outs.
- Write experience chart. Read orally.
- Seatwork: (1) Copy experience chart for scrapbook. (2) Make diagrams of correct table settings; use pictures of plates, glasses, etc., from catalogues; paste onto colored paper. Put in scrapbook. Make a chapter page - chapter 1. Rules about food.

#### Vocabulary:

- Tablecloth, napkins, plates, glasses, silverware, serving dishes.

### Material

- Tablecloth
- Napkins
- Plates
- Glasses
- Silverware
- Serving dishes
- Sink or large basin
- Hair shampoo

### Experience Chart

- Food models, Iowa Dairy Commission
- Chart paper
- Old catalogues
- Construction paper
- Paste and scissors
- Newsprint

- Sponge bath
- Shampoo

---

**Chart paper**

**Newspaper**

**Paper and pencils**

**Crayons**

---

We practiced setting the table today. If the table looks nice we enjoy eating more.

---

Take baths or showers regularly; tell how to take a sponge bath if a bathtub or shower is not available.

Discuss how to shampoo hair - both boys and girls. Have one or two students demonstrate proper procedure for shampooing; also discuss girls putting up hair so it will look attractive. Demonstrate.

Write experience chart. Read orally.

#### Vocabulary:

- Sponge bath
- Shampoo

<td>Review cleanliness rules and read experience charts. Discuss next rule - wearing clean clothes. Stress changing under clothes every day; dresses, jeans, shirts when they get dirty. Emphasize health aspect of clean clothes. Discuss how families wash clothes - washing machine at home or go to a laundromat. Emphasize that this is a big job for Mother; children should help as much as they can. Demonstrate how to launder garments by hand, how to hang them up so they'll dry quickly. Have each child practice. Show how to iron simple pieces. Write experience chart. Read orally. Seatwork: Copy experience chart for scrapbook. Vocabulary: laundromat, detergent, scrub, rinse.</td>
<td>Experience charts</td>
<td>(Picture of a person washing clothes) Wearing clean clothes helps us stay healthy. We should change underclothes every day and our other clothes when they get dirty. Sometimes we can help by washing underclothes out by hand. We have to scrub hard and then rinse them well.</td>
</tr>
<tr>
<td>5. Good health habits - continued</td>
<td>Explain to students that in order to guard against body odors they need to use a deodorant as well as wear clean clothes and bathe regularly. Display different kinds and show how to use. Discuss cost - stress not wasting deodorant when using it. Write experience chart. Seatwork: (1) Copy experience chart for scrapbook; (2) List the cost of different brands of deodorant. Compare prices, figure out differences in cost. Vocabulary: deodorant</td>
<td>Sink or basin Detergent Articles of clothing Iron and ironing board Chart paper Different kinds of deodorants --- creams spray-on roll-on, etc. Chart paper</td>
<td>(Picture of bottle of deodorant) Deodorants help keep us from smelling bad. Wearing clean clothes and taking baths help, too. There are different kinds of deodorants. You can buy them in the grocery store or drug store.</td>
</tr>
</tbody>
</table>
## OBJECTIVES

5. Good health habits - continued
   - c. Basic cleanliness rules

### ACTIVITIES

Refer to bulletin board about health rules. Students formulate rules about keeping themselves clean; write on strips of paper and put up on board. Review experience charts.

Stress that one of the most important health rules in keeping clean; that we need to keep our house clean as well as ourselves. As children are getting older they can help do the work involved in cleaning their house. Emphasize that boys as well as girls should know how to clean and should help at home.

Discuss proper way to clean the kitchen. Go to home ec. room or hot lunch kitchen and demonstrate cleaning the sink, counters, tables, refrigerator, stove, cupboards, floor. Stress importance of keeping kitchen, where food is prepared, very clean. Let children clean kitchen thoroughly.

Write experience chart. Review cleaning procedures carefully.

Seatwork: Duplicate experience chart to put into scrapbook. Look in old magazines for pictures of cleaning supplies and compounds that would be used in the kitchen. Cut out, paste onto paper, and write a sentence telling how it would be used. Vocabulary: cleaning items, cleaning compounds, scrub, sweep, scour, wax.

## MATERIALS

- Sentence strips
- Experience charts
- Bulletin board
- Sentence strips
- Experience charts

## EXPERIENCE CHART

1. Take a bath, shower, or sponge bath.
2. Shampoo hair once a week or more.
4. Brush teeth every day.
5. Wear clean clothes.
6. Use a deodorant.

(Picture of a kitchen) **How To Clean the Kitchen**

Put something like spic-n-span in a pail of hot water. With a rag wash off the table, the cupboards, the counters, stove, and refrigerator.

Use some Babo and a rubber scrubber to clean the sink.

Sweep the floor with a broom. Then mop the floor with hot water and spic-n-span.

Every few weeks the floor should be waxed.

The kitchen should be kept clean because this is where we eat.

(2) keeping house clean, cont.

Review and re-read experience charts about cleaning house. Let pupils tell about work they're doing at home.

On bulletin board, put up strip about house cleaning.

5. To develop good health habits

d. Appropriate dress

(1) For different weather conditions

On large flannel board or bulletin board display a series of pictures showing a cold snowy day, a rainy day, a hot summer day, a windy spring day; also show various items of clothing such as boots, winter coats, head scarf, umbrella, summer shorts, etc. Have pupils decide which clothing is appropriate for each weather picture; attach strong or yarn from the clothing pictures to the weather pictures.

Discuss that wearing the right clothes is an important health rule; not dressing warm enough, not wearing boots, etc., will often cause us to get sick.

Stress also that the pupils are getting old enough to be responsible for choosing the right kinds of clothes to wear in different kinds of weather.

Write experience chart. Read orally. On bulletin board put up health rule. Wear the right kinds of clothes for different kinds of weather.

Seatwork: Duplicate chart for scrapbook. Look in catalogues to find the price of the items of clothing displayed on flannel board. Write name of item and cost.

Experience chart

Bulletin board
Sentence strip

Flannel board or bulletin board
Series of pictures cut from magazines
Colored string or yarn

Bulletin board
Sentence strip
Chart paper
Ditto Master copy to duplicate experience chart
Clothing catalogues

sweep the dirt into a dust pan.
Take throw rugs outside and shake them good.

Sentence Strip for Bulletin Board
Clean the house very good once a week.

(Picture of a child wearing a winter coat.)

We should wear different kinds of clothes for different kinds of weather. In the morning we can listen to the weather forecast, so we'll know what to wear to school.

Our mothers don't have to tell us to wear our boots or heavy coats. We're old enough to know for ourselves.
5. Good health habits - continued

e. Prevention of illnesses

Make chapter 5 page - Rules about Clothes.
Vocabulary: weather forecast, boots, scarf, winter coat, gloves, jacket, rain hat, umbrella, shorts, sunsuit, etc.

On chalkboard sketch a picture of a cartoon character with a bad cold - red, sore nose, watery eyes, etc. Tell children this is Sad Sam who doesn't know what this word means - write the word Prevention on board. See if pupils can sound out word, develop meaning - keeping something from happening.

Discuss how to prevent colds and other sickness. The most important prevention is following good health rules - review bulletin board and read experience charts.

Then discuss going to the doctor for shots for polio, tetanus, smallpox, measles, diphtheria and how these help prevent illness.

Read pp. 126-131 in *Come Rain, Come Shine*. Write experience chart.

Seatwork: Copy experience chart and draw a picture of Sad Sam to illustrate the story.

Vocabulary: prevention, polio, tetanus, smallpox, measles, diphtheria.

5. Good health habits - continued

e. Care of illnesses

Read experience chart about prevention of illnesses. Discuss that sometimes people get sick even if they do follow good prevention rules.

Dramatize how to care for someone who is sick with a cold or flu. Bring out that the person should stay in bed, not come to school to expose others, how to take a temperature and the danger of a high fever. Discuss going to the doctor

Chalkboard
Colored chalk

Chalkboard
Colored chalk

Come Rain, Come Shine, by Brownell, et al.

Chart paper
Paper and pencils
Crayons

Experience Chart
Thermometers

Empty prescription bottles with labels showing directions for dosage

(Picture showing a person who is sick in bed)

Prevention
The word prevention means keeping something from happening.

If we follow good health rules, we can keep from getting sick.

The doctor can give us shots to help us from getting very sick.

If We Get Sick
When we're sick we should stay home in bed and not expose other people.

Our temperature is usually 98 degrees.
5. To develop good safety habits in the home

Deputize students in class as 'Safety Spys' (devise badges or identification papers, etc., if desired) and assign them to be on the lookout for safety hazards in the home. Hold frequent briefing sessions to hear reports on their findings. (Pull down the blinds, close the door, talk in subdued tones, devise secret passwords, etc.) Bring out the following points:

- Prevention of fire in the home - not playing with matches or cigarettes, heating system in good condition, electric cords and wiring in good condition, care when cooking, etc. Discuss what to do if the house does catch on fire - calling fire department, discussing escape routes from the house if the main door or stairway were

- Households

- Care with drugs

- Prevention of falls in the home

Children are to copy labels and write down the time each medicine should be taken throughout the day. Make a chapter page - chapter 6 - Rules about prevention and care of sickness.

Vocabulary: expose, temperature, degrees, fever, thermometer, prescribe, capsule.

Safety Spy Report #1

We checked our homes for fire safety. Agent 001 found someone playing with matches. This is bad. Agents 002 and 003 checked out the furnaces and electric cords. They need to be in good shape.

The chief told us a plan to use if the house does catch fire.

Take 1 capsule every five hours. Two teaspoons with every meal.

If it gets above 100 degrees we should go to the doctor.

If he gives us medicine, we should read the label and take it as it says. We shouldn't take aspirin and other things unless our parents tell us to.
Guard against household poisons - learn to recognize products that are poison or harmful, where these should be stored so children won't get into them, using them properly.

Proper precautions with medicines and drugs - keep in medicine cabinet or shelves high enough so small children can't get in them, throwing away old medicines, not taking someone else's medicine, following directions carefully for aspirin, cold remedies and other preparations.

Prevention of falls in the home -- using a bathmat in the bathtub, care with throw rugs, keeping toys and other items picked up, keeping clutter off stairs, using sturdy step stool for reaching high cupboards and shelves.

Seatwork: Assign committees to draw picture records of each Safety Spy agent and his assignment - show each important point and write explanatory sentence for each picture.

Duplicate experience charts for scrapbooks. Make Chapter page - Chapter 7 - Rules about Safety in the Home.

Vocabulary: poison, electrical wiring, drugs.

Cans of Sani-Flush, Drano, Clorox, etc.

Bottles of aspirin, cold remedies and other non-prescription drugs

Rubber bathmat

Step stool

Come Rain, Come Shine, Brownell, et al.

Chart paper

Safety Spy Report #2
Agent 008 found something very dangerous under the kitchen sink. It had poison written on it. Mother uses it all the time and if used right it is a big help.

But if it is swallowed, it can be deadly!! It is a can of Drano.

Safety Spy Report #3
Agent 000 briefed us on the medicine cabinet. He found it was up high so no little spys could get into it.

One negative report is that there was some old medicine left over from a sickness last spring. It should be thrown away.

Safety Spy Report #4
Several agents found homes where bad falls might happen. They checked off these dangers on their pocket transmitters:

- slippery bathtub
- toys and stuff all over the floor,
5. Good safety habits - continued

b. Simple first-aid.

(1) burns
(2) cuts and scratches
(3) bruises
(4) splinters
(5) animal bites
(6) poisonings

Discuss how to care for minor injuries; list each treatment on experience charts. Let children dramatize and practice caring for each situation.

- **Burns**
  - Minor burns: Discuss prevention.
  - Cuts and scratches: Show children how to use sterile gauze squares to help clean the wound if it is very dirty; how to make bandages with gauze squares and rolls and tape.

- **Cuts and scratches**
  - Teach children how to use sterile gauze squares to help clean the wound if it is very dirty; how to make bandages with gauze squares and rolls and tape.

- **Bruises and black eyes**
  - The ice bag will help reduce the pain and swelling. If pain continues and is severe, go to the doctor.

- **Splinters**
  - Stress making sure the needle is sterilized.

- **Animal bites**
  - Stress the seriousness of rabies. Go to the doctor and let him decide what should be done, if the animal should be tested, etc.

- **Poisonings**
  - Stress the need for prompt action in calling the doctor.

Discuss keeping a First Aid Kit in the home. Show kits which you can buy; demonstrate how to make up one and discuss what should be in them. Stress importance of keeping them handy and well-stocked.

Seatwork: Have children copy each chart. Assemble in a First Aid booklet which they can take home to keep near their First Aid kit.

Vocabulary: antiseptic, bandage, sterile, gauze, adhesive tape, rubbing alcohol.
5. To develop good health and safety habits

Review health and safety concepts: read experience charts and go through scrapbook. Make a table of contents for books, number pages, assemble.

1. Wash the wound right away with lots of soap and water.
2. Put on a bandage.
3. Go right to the doctor.
4. If the animal gets away, call the police.

Animal Bites
1. Wash the wound right away with lots of soap and water.
2. Put on a bandage.
3. Go right to the doctor.
4. If the animal gets away, call the police.

Poisoning
1. Call the doctor right away.
2. Tell him what the poison is.
3. Do just what he says.
4. Keep the can or bottle that the poison was in.

2. Sterilize a needle by putting it in alcohol.
3. Use needle carefully to get out splinter.
4. Put an antiseptic on it.

Animal Bites
1. Wash the wound right away with lots of soap and water.
2. Put on a bandage.
3. Go right to the doctor.
4. If the animal gets away, call the police.

Poisoning
1. Call the doctor right away.
2. Tell him what the poison is.
3. Do just what he says.
4. Keep the can or bottle that the poison was in.
To develop an understanding of the ways families have fun together.

a. In the home
   (1) Watch TV
   (2) Listen to music
   (3) Play games
   (4) Work on hobbies
   (5) Play outdoors
   (6) Visiting friends or relatives
   (7) Taking care of pets
   (8) Family parties and activities

b. In the community
   (1) Sports
   (2) Fairs
   (3) Picnics
   (4) Movies
   (5) Swimming
   (6) Fishing
   (7) Youth organizations

Hold a "brainstorming" session - ask children to think of as many things as possible for the ways families can have fun together.

Write experience chart.

Seatwork: Look in magazines for pictures showing the various activities families can enjoy together. Discuss pictures, put on bulletin board under correct heading - At Home or In the Community. Write appropriate sentence to put below each picture. Title bulletin board, Ways Families Have Fun Together.

Read Jerry books.

Vocabulary: hobbies, sports, fairs, youth organizations

Chart paper
Old magazines
Scissors
Sentence strips
Bulletin board letters

Jerry Goes Fishing, by Florence Battle, Beckley-Cardy Co., Chicago, Ill.: 1942.

Jerry Goes to the Circus, by Florence Battle, Beckley-Cardy Co., Chicago, Ill.: 1945.

Jerry Goes on a Picnic, by Florence Battle, Beckley-Cardy Co., Chicago, Ill.: 1952.

A good neighbor keeps his yard clean. He does things to help the people who live near him. If someone on his street is sick a good neighbor does not disturb him.
7. To develop an understanding of the relationships between the home and the community

b. Schools

(1) To learn that all the community has interest in the school.
(2) To recognize that special education helps children who have difficulty learning.

We have talked about the important time we spend in our homes. Next to our homes, we spend more time in school. The schools in our community are very important to our home and family. Our mothers and fathers pay taxes to build our schools and pay our teachers. The people in the community choose (by voting) a school board - more neighbors from different streets - to see that the schools are good for boys and girls and that there is enough money to pay the costs. The schools help boys and girls learn the things they need to know to live good lives now and know the things they must do when they grow up and help run a community.

Have students name the people in their school who help run the school and help them learn.
1. Teacher
2. Principal
3. School Nurse
4. Janitor
5. Lunchroom Workers
6. Others they may have services from such as psychologist or guidance counselor.

Vocabulary:
neighbor
community
invited
sidewalk
noisy

Colored Construction Paper
Scissors
Pencils

Our school has a special class for us because we are slow in learning. Our teacher helps us learn how to mind and be happy with everyone.

Vocabulary:
school
learning
7. Home and Community

c. Churches

(1) Teaching about right ways to live and about God.

The church is an important help for families. There are many different churches because people want to worship in different ways and believe different things. Name the different churches in your community. (Keep in mind that not all families represented by class may attend church.) Churches teach about God and help families when they are in trouble by collecting food, clothes, and money. If someone's house burns down, the people of a church might help them get clothes and food to replace those lost.

Add churches to mural.

(2) Different kinds of churches

Our families get help from the schools which make better people by teaching us the right way to live. What is another place in our community where we enjoy being with other people and learn right ways to live? The church is an important help for families. There are many different churches because people want to worship in different ways and believe different things. Name the different churches in your community. (Keep in mind that not all families represented by class may attend church.) Churches teach about God and help families when they are in trouble by collecting food, clothes, and money. If someone's house burns down, the people of a church might help them get clothes and food to replace those lost.

Add churches to mural.

7. Home and Community

d. Social Services

We have said that churches help people when they are in trouble. Do you know that there are others in our community whose job it is to help our families when they are in trouble? Discuss:

1. Social Workers
2. Public Health Nurse
3. State Employment Office

Note that these services are free and for people who cannot help themselves. Our community is showing that it is a "good neighbor" and helps people get jobs, solve their problems and become well when they

There are people in our community who help families in trouble. It is their job to help find a job. They give food and medicine to people who cannot buy it. They help people to help themselves.
7. **Home and Community**

d. **Community Employees who help families**

(1) **Policemen**

- Protect our families, see that laws are obeyed and help us when we are in trouble.
- Protect families when problems arise. There are people in our community who help to keep problems from happening as well as handling when it comes. Our police and firefighters help people learn how to keep safe.
- Read *Policemen* by Ina K. Dillon
- Invite police chief to talk to class about:
  1. Traffic safety
  2. Child molesters

**Worksheet:** Instruct students to use words at top of page to fill in the blanks.

**Vocabulary:** social worker, nurse, themselves, medicine, police officer, fireman, safety, strangers, obey

(2) **Post Office**

- Services help us get in touch with other people.
- Services help us by delivering the mail and sending it on trains and planes.
- If possible, take class to Post Office to mail letter, explain what different windows are for.
- Have class discuss what kinds of things we receive in mail:

**Seatwork:** Copy experience chart story.

- The people we have talked about help families when problems arise. There are people in our community who help to keep problems from happening as well as handling when it comes. Our police and firefighters help people learn how to keep safe.
- Read *Policemen* by Ina K. Dillon
- Invite police chief to talk to class about:
  1. Traffic safety
  2. Child molesters

**Worksheet:** Instruct students to use words at top of page to fill in the blanks.

**Vocabulary:** social worker, nurse, themselves, medicine, police officer, fireman, safety, strangers, obey

**Dear Friends,**

We would like to visit you at the Fire Department. We are studying how our firemen help families and want to see how you know where a fire is. We want to know how we can make our homes safe from fire.

**Books:**

**Display of traffic signs.**

**Place cutouts of fire truck and traffic patrol on mural.**

**Display of traffic signs.**

**Samples:** letters, magazines, flyers

**Stationery:** envelope, stamp

**Dear Friends,**

7. Home and Community

e. Community Employees who help families.

(3) Firemen help us know how to keep our homes safe from fire.

(4) Garbage Collectors, street cleaners, maintenance workers help our families keep our homes free of debris and fire hazards.

Prepare students for proper behavior on field trips and remind them of questions to be covered:

- Fire hazards to watch for in our homes
- How a fire is reported and received.

Seatwork: Draw a picture record of the things seen on the field trip.

Discuss other maintenance workers paid by city.

Books:

Thank you.

Sincerely,

Vocabulary:
- friends
- department
- study
- safe
- post office
- postman
- letter
- mail
- deliver

Our Visit to the Fire Department:
1. Stay together
2. Watch where you walk.
3. Don't touch fire equipment.
4. Ask questions in turn.
5. Listen to the answers.

Vocabulary:
- together
- equipment
- questions
- listen
- answer
