This state foreign language curriculum guide provides a comprehensive overview of policy and suggested procedures for progress at the secondary school level. Major sections include:

1. Philosophy and objectives of language study,
2. Personnel in the language program,
3. Principles of language learning,
4. Methodology,
5. Evaluation,
6. Equipment,
7. Course of study framework for French, German, Latin, Russian, and Spanish (three-, four-, and six-year sequences), and
8. An extensive, annotated bibliography classified by instructional levels and materials.

Numerous illustrations and charts are used throughout.
FOREIGN LANGUAGE
THE KEY TO UNDERSTANDING IN A JET AGE WORLD

FOREWORD

Utah has reason to be proud of the progress made in foreign language education in the past one and a half decades. The enrollment of students and the number of teachers in the various foreign languages have increased and a significant improvement in the quality of foreign language education has resulted from recent and continuing developments.

As the new decade begins, foreign language teachers have reason to believe that even greater progress and development can take place. Unfortunately this is also a time of decreasing federal financial sponsorship and a time of reducing foreign language entrance requirements in colleges and universities. Therefore, it is clear that this is a time of challenge--

challenge to make foreign language study available to more students for longer sequences

challenge to cooperate with local administrators and keep them apprised of the value of foreign language education

challenge to re-evaluate the requirements and seek new sources of financial backing

challenge to make foreign language study motivating, interesting, and relevant

challenge to teachers to be even more effective through improved individualization and humanization of learning.

To meet these challenges and the others current in education today, committees of outstanding educators under the leadership of Paul Luckau, Consultant in Foreign Language Education, have prepared this foreign language curriculum guide. It is in loose leaf format so that partial revision is possible every year to respond to the stimulus of innovation. The staff of the Office of the State Superintendent of Public Instruction takes pride in presenting this guide to foreign language education in the jet age world—indeed the age in which national barriers, racial intolerance, and linguistic misunderstanding are disappearing.

Lerue Winget
Deputy Superintendent for Instruction
ACKNOWLEDGEMENTS

This guide was developed through a series of three workshops held June 6 to July 1, 1966; June 5 to June 16, 1967; and June 16 to June 27, 1969. Grateful acknowledgement is made to the following people whose contributions were made during one or more of these workshops. The participants were representative of college professors, district supervisors or administrators, or classroom teachers.

DIRECTORS AND CONSULTANTS:

*Paul F. Luckau, Director; Consultant, Foreign Language Education, Utah State Board of Education
Elliot C Howe, Director; Former Specialist, Foreign Language Education, Utah State Board of Education
Marvin Folsom, Special Consultant; Brigham Young University
Jesse Manfull, 1966 Workshop Editor; Salt Lake School District
James S Taylor, Special Consultant; Brigham Young University
*Russell H. Bishop, Special Consultant; Brigham Young University
*Richard J. Cummings, Special Consultant; University of Utah

INTRODUCTION

Someone has said that the most important test of education is the quality of individual it produces. If this statement is true, then it is extremely important that the broad objectives of education be stated in terms of quality rather than quantity and that every area of the curriculum be directed toward the achievement of these goals.

Since foreign language educators are in full agreement with the above statement, it was incumbent upon those who developed this foreign language guide to make certain that the philosophy and objectives for the foreign language program were in harmony with, and support of, the state approved Tasks of Education for the Public School of Utah.

The following statements were developed to assure that all teachers of foreign languages are aware not only of the broad objectives but also of the relationship that each has to the teaching of foreign languages in Utah.

OBJECTIVES OF EDUCATION

The task of public education is to provide an environment conducive to changing behavior on the part of each learner and to motivating him to achieve the following objectives.

I. The inquiring mind exemplified by a continuing desire for knowledge, a continuing interest in current problems, and the habit of weighing alternatives and creatively applying them to the solution of these problems.

RATIONALE: The development of rational powers is regarded as essential to the preparation of citizens who will make contributions to the solution of mounting scientific and humanistic problems. Educational experiences should provide opportunity to acquire and utilize the skills and competencies of inquiry.

A. The study of a modern language helps the student to grow in his ability to think rationally, to express his thoughts clearly, and to read and listen with understanding. It makes him conscious of language as a tool for communication and as the vehicle for the transmission of a culture. He gets direct experience in manipulating another language and becomes skillful in analyzing and contrasting language structures. The element of pleasure derived from the involvement in another language is often one of the most stimulating and gratifying aspects of language learning.

B. In a technological society a student needs to understand the method of science and the influence it has on human
Through the study of a modern language the student extends the resources he has at his command for gaining information and solving problems in other fields of learning. He becomes conscious of the universality of scientific endeavor in discovering facts concerning the nature of the world and of man, and of all peoples' striving for the good life.

II. A knowledge of fundamental concepts about the world environment and man's relationship to it.

RATIONALE: One task of education is to orient the individual to the natural environment in which he must live and work and find his enjoyments and satisfactions. An understanding of basic concepts about the physical and biological world is essential to the accomplishment of this task.

A. The student learns about the role of the family in another culture, the social relationships which exist, and their effect on the individual, his particular society, and the world.

B. In his professional and commercial dealings with the peoples of other cultures, the student must understand causal relationships between the physical and social environment; the effect of climate and environment on customs, diet, consumption of goods and services, architecture, and recreation, for example, and their effect upon the social and economic life of the country.

III. Proficiency in the use of modes of communication.

RATIONALE: The complex world of today demands that each individual develop those basic communication skills which will make him an effective contributor to himself and to his society.

A. As he learns the modern language he participates in the culture of a foreign people directly through the use of their communication skills; vicariously he participates in their daily lives, their holidays, their work and play. Friendship on a personal level often results as the ability to communicate develops.

B. In his professional and commercial dealings with representatives of other cultures, the student must be familiar with their concepts of work and their cultural attitudes toward work.

C. The study of another people, their culture and their language aims at the following objectives in the acquisition of skills, information, and attitudes. Not all students will attain these objectives to the same degree. Their attainments will be tempered by the capabilities and environments of the individual students, the length of the program, and the competency of their teachers.
1. **Listening Comprehension**

The language learner progresses from the understanding of the educated native when he enunciates carefully and speaks simply on familiar subjects to the understanding of some conversations of average tempo, simple lectures, and news broadcasts to the understanding of normal group conversations, plays, movies, and the more sophisticated radio and TV programs.

2. **Speaking**

The language learner, as he learns to speak with a pronunciation and intonation readily understandable to a native, progresses from using the common expressions needed for getting around in the foreign country and speaking with a pronunciation and intonation readily understandable to a native to talking on prepared topics with a fair degree of fluency to commanding sufficient vocabulary and structure of the language to express his thoughts in sustained conversation thus contributing toward ease in social situations.

3. **Reading Comprehension**

The language learner progresses from comprehending directly the meaning of simple prose to reading with comprehension prose of average difficulty, without too much recourse to the dictionary.
reading with enjoyment newspapers, magazines, and literature as an art form and as a means of becoming immersed in the culture

4. Writing

The language learner progresses from copying and writing from dictation materials which the student has already heard and spoken to writing correctly material he develops orally for classroom and related situations to writing a short, simple letter to writing a composition with clarity and correctness in structure and idiom.

5. Cultural Analysis

The language learner becomes aware that language is the oral and written expression of another way of life; obtains a working knowledge of the geography, history, literature, fine arts and handicrafts, social customs, and contemporary civilizations of the people whose language is being learned; obtains a firsthand knowledge of the literary masterpieces; analyzes the foreign culture and contrasts it with his own; and, through correspondence, travel, or residence abroad establishes friendships on a personal basis.

6. Analysis of Language Structure

The language learner develops a working command of the sound and structural patterns of the foreign language and a knowledge of its main differences from and similarities to English. He obtains linguistic training and insight which facilitates the acquisition of other languages.
IV. A dedication to the task of improving America, striving for solutions to its continuing domestic and world problems, and upgrading the lives of all people.

RATIONALE: Our nation is founded on those beliefs which recognize the dignity and worth of the individual as the paramount responsibility of our society and the family as the basic social unit of that society. Change has brought continuing challenges to these basic beliefs. Since our society and governmental organization function only as well as the citizenry are capable of making competent decisions for meeting these new challenges, it is imperative that each citizen develop these capabilities and utilize them to the fullest extent.

A. The student increases his effectiveness outside of his national community. Competency in a modern language permits him a kind and quality of relationship which does not exist without this tool.

B. The student learns to respect the values and customs of other countries as being as valid as those of his own country.

C. The student realizes the interrelationship of cultures—the contribution of other cultures to his own, and of his culture to others. As a result he appreciates and treats with respect his fellow citizens of foreign birth.

D. The student develops an awareness of and an interest in the world as a whole. He becomes less provincial and more world-conscious as he recognizes his place in the common task of working for peace and understanding.

V. Maintenance of health, achievement of a high level of personal fitness, and the acquisition of wholesome leisure skills.

In a technological age which allows more and more free time the student needs to learn how to extend the scope of his leisure-time activities in ways which yield satisfaction and which are socially useful. He uses the modern language as an avocational pursuit by participating in goodwill organizational activities, in theater, opera, ballet, radio, film, and television. He enjoys a greater variety of books, folk songs, art songs, magazines, newspapers, and local and foreign cultural activities.

VI. An emotionally stable person.

RATIONALE: The alarming incidence of emotional instability coupled with the mounting pressures to which groups in our society are being subjected, points to the need for educational programs which contribute positively to the mental health of all students. Each individual must be helped to develop these
capabilities which assist him in recognizing emotional problems and in dealing with them effectively.

Existing attitudes of fear, distrust, or disapproval of that which is foreign tend to diminish as the student becomes alert to other peoples' hopes, achievements, and frustrations.

VII. A moral standard of behavior.

RATIONALE: To be ethical is to live by moral standards which take into consideration the welfare of self and others. The intelligent acceptance and application of a code of ethical behavior based on accepted values by members of a society is essential to its welfare. Since moral behavior is shaped in particular by an understanding of the effects of human behavior upon the lives of others, formal education has a major responsibility for promoting the moral development of students.

A. The study of a modern language tends to foster a respect for humanity.

B. The student becomes aware of the universality of human problems and values, which know no national boundaries; he learns to appreciate and to respect the merits of other cultures and other peoples.

VIII. A knowledge of the interrelationships of nature and the cultural arts and the ability to utilize all of the senses to make aesthetic judgments about the total environment and to enrich his own life.

RATIONALE: Through activity in the arts an individual may achieve harmony with the world and within himself. Education in the arts is aimed at the development of conscience. By cultivating his inner world, man may become equipped to humanize the world outside himself.

The student needs many opportunities to develop his capacity to appreciate beauty in literature, art, music, and nature. In the study of a modern language he should learn to break his culture-bound attitude toward beauty in literature, art, architecture, music, dance, handicrafts, and nature by sharing vicariously and directly in the creative activities of the foreign people and understanding their form of artistic expression. He widens his aesthetic horizon, which in turn extends his capacity for self-expression and creativity.

IX. Information and guidance for wise occupational choice. The forces of change are altering long-held American attitudes toward the
utilization and conservation of the country's human resources. Men are beginning to understand the direct connection between the education of every citizen and our strength as individuals and as a society.

RATIONALE: Effective occupational and career choice must lie in the values and goals of the individual. A basic element in this process is the linking of present actions to future goals. Education more and more becomes the bridge between the student and his future life work which in turn gives direction to his education.

A. The study of a modern language arouses an intellectual curiosity in the student. Through the unfolding of another culture, new vistas are opened which offer unlimited opportunities for inquiry, comparison, creativity, and vocational involvement.

B. The student can make a study of the foreign language, its area and civilization, his career.

C. A command of a modern language will be of considerable value in any number of professional and commercial areas.
PHILOSOPHY

FOREIGN LANGUAGE SHOULD BE A PART OF GENERAL EDUCATION IN ORDER TO PREPARE THE STUDENT FOR THE WORLD OF TOMORROW.

THE LEARNING OF A SECOND LANGUAGE STRENGTHENS ONE'S ABILITY TO COMMUNICATE.

FOREIGN-LANGUAGE LEARNING PROVIDES STUDENTS WITH AN EFFECTIVE TOOL WHICH CAN STRENGTHEN HUMAN BONDS OF UNDERSTANDING AMONG PEOPLES ISOLATED BY MONOLINGUAL BARRIERS.

CULTURAL UNDERSTANDING, LEARNED AS AN OUTGROWTH OF FOREIGN-LANGUAGE STUDY, STRENGTHENS TIES BETWEEN PEOPLES OF DIFFERENT GEOGRAPHICAL AND POLITICAL LOCATIONS.

KNOWLEDGE OF A FOREIGN LANGUAGE ACTS AS A KEY TO UNLOCK THE DOORS OF GREAT LITERARY, SCIENTIFIC, CULTURAL AND PHILOSOPHICAL TREASURES WHICH CANNOT BE SAVORED THROUGH TRANSLATION.

KNOWLEDGE OF A FOREIGN LANGUAGE ENHANCES A PERSON'S VOCATIONAL AND PROFESSIONAL OPPORTUNITIES.
OBJECTIVES

TO LISTEN TO AND COMPREHEND THE FOREIGN LANGUAGE WHEN SPOKEN AT A NORMAL SPEED ON A SUBJECT WITHIN THE RANGE OF THE STUDENTS' EXPERIENCE.

TO SPEAK WELL ENOUGH TO COMMUNICATE DIRECTLY WITH A NATIVE SPEAKER WITHIN THE RANGE OF THE STUDENTS' EXPERIENCE.

TO READ MATERIAL ON A GIVEN LEVEL WITH DIRECT UNDERSTANDING AND WITHOUT TRANSLATION.

TO WRITE ABOUT A SUBJECT WITHIN THE RANGE OF THE STUDENTS' EXPERIENCE USING AUTHENTIC PATTERNS OF THE PEOPLE WHOSE LANGUAGE IS BEING STUDIED.

TO LEARN TO THINK IN THE LANGUAGE.

TO UNDERSTAND, THROUGH THE FOREIGN LANGUAGE, THE CONTEMPORARY VALUES AND BEHAVIOR PATTERNS OF THE PEOPLE WHOSE LANGUAGE IS BEING LEARNED.

TO BECOME ACQUAINTED WITH THE SIGNIFICANT FEATURES OF THE COUNTRY OR AREA WHERE THE LANGUAGE IS SPOKEN.

TO DEVELOP AN UNDERSTANDING OF THE LITERARY AND CULTURAL HERITAGE OF THE PEOPLE WHOSE LANGUAGE IS STUDIED.
HOW MANY LANGUAGES? 1

The answer to this question is not to be found by searching through the basic principles of foreign-language learning, since all essential goals can be met in a one-language program. Rather this question relates to such practical matters as school size, available space and facilities, upper and lower limits of class size and a number of local and national factors—all of which determine the desirability of offering many or few languages. Obviously, the national interest requires as much diversification as possible, but it is not necessary in any one district to teach all the languages that might reasonably be offered somewhere.

The factor that most urgently impels a school district to offer as many languages as possible is the diversity of interests and motivations among students. A good program offers as many choices as can be adequately dealt with, but it is better to establish a strong program in one language than to have several partial courses. It is also advisable to have a full program in one language in any given school in FLES (Foreign Language in Elementary School) than to have several since one-language FLES programs do not seem to present any hazard to good motivation. In addition it is better to enlarge a program from the upper grades expanding into lower grades rather than to start in the lower grades and work up unless a continued program can be assured from the beginning.

WHICH LANGUAGES? 2

Whether a school program includes few or many foreign languages, the problem of selecting those to be offered is essentially the same. The full list of offerings in any one school or district will include only

---

1 Foreign Language Guidelines, Washington Department of Public Instruction, pp. 11-12.
2 Ibid.
a tiny sampling of the major languages of the world. Of the dozen or so languages taught somewhere in American schools, not more than four or five are likely to be offered in any one district.

Since the usual approach to selection lies along the path of least resistance, most districts choose from a list that includes only French, German, Latin, Russian and Spanish. Among these only French, German, and Spanish are highly probable choices in new programs today. The main reason for this, other than the force of tradition, is that curriculum development and the production of modern teaching materials have lagged for languages other than French, German, and Spanish. Regrettable as the limitation may be, this is a valid reason.

Districts that are not ready to make unconventional choices can operate a good program within the conventional range. Some effort should be made to find which languages among the possible selections excite popular interest. In counseling students, every attempt should be made to discover which language each student really prefers to undertake. If a FLES program is confined to one language, it should be one to which the community reacts very favorably.
WHY STUDY A FOREIGN LANGUAGE?
BECAUSE we live in a rapidly changing world

IN WHICH THE PROBLEMS AND STRUGGLES OF THE PEOPLE AND THE LEADERS OF FARAWAY PLACES HAVE MOVED INTO OUR OWN LIVING ROOMS VIA TELEVISION, RADIO, AND NEWSPAPERS. IN FACT, DAILY NEWS REPORTS OFTEN FOCUS MORE ON INTERNATIONAL EVENTS THAN ON DOMESTIC AFFAIRS. WHEN DAY AFTER DAY THE LEADERS AND THE PEOPLE OF OTHER NATIONS APPEAR ON OUR TELEVISION SCREENS, WE REALIZE THAT WE ARE NOT ALONE IN THE WORLD! WE SENSE THAT THE POLICIES AND ACTIONS OF NATIONS THOUSANDS OF MILES AWAY CAN AFFECT OUR LIVES IN A MATTER OF HOURS, SOMETIMES MINUTES.

THE BETTER WE UNDERSTAND OUR "NEIGHBORS" AND THEIR EXPLANATIONS OF THEIR PROBLEMS, THE BETTER WE CAN HANDLE THE GROWING TIES THAT BIND US TOGETHER IN A CONSTANTLY SHRINKING WORLD... THE BETTER WE CAN BUILD MUTUAL TRUST AND COOPERATION AMONG NATIONS.

BECAUSE of the great increase in travel

WE CAN FLY THE ATLANTIC OCEAN BY JET IN ABOUT SIX AND ONE-HALF HOURS. IN FACT, WE CAN REACH AIRPORTS IN PRACTICALLY ALL PARTS OF THE WORLD, FLYING AT SPEEDS OF 600 MILES AN HOUR. EVEN MOVING AT 500 MILES AN HOUR, NO PLACE ON EARTH IS MORE THAN 25 HOURS AWAY FROM ITS MOST DISTANT EARTH NEIGHBOR.
BECAUSE the national defense education act

HAS PROVIDED MONEY FOR LANGUAGE LABORATORY EQUIPMENT AND MATERIALS FOR USE IN THE LABORATORY, FOR RESEARCH, AND FOR THE TRAINING OF TEACHERS IN THE BEST METHODS OF TEACHING FOREIGN LANGUAGES.

THE NATIONAL DEFENSE EDUCATION ACT HAS PROVIDED SPECIAL INSTITUTES OR TRAINING SESSIONS TO HELP TEACHERS MASTER THE NEW METHODS OF TEACHING FOREIGN LANGUAGES. MANY STATES ARE ALSO HELPING TO TRAIN TEACHERS BY HOLDING SPECIAL CONFERENCES, OFFERING STATE-SUBSIDIZED INSTITUTES FOR TEACHER TRAINING AND IS ENCOURAGING EXPERIMENTATION AND RESEARCH IN FOREIGN LANGUAGE STUDY.

RECOGNIZING THE GREAT IMPORTANCE OF LANGUAGE STUDY IN TODAY'S WORLD, OUR STATE AND OUR FEDERAL GOVERNMENT, ARE SAYING, "COME ON, JOHN Q., LET'S LEARN LANGUAGES!"

BECAUSE american business abroad

offers opportunity for

MANY KINDS OF INTERESTING JOBS TO THOSE WHO LEARN TO SPEAK A SECOND LANGUAGE. DID YOU KNOW THAT WE HAVE MORE THAN $4 BILLION WORTH OF PRIVATE INVESTMENTS ABROAD? THESE HOLDINGS TIE US CLOSE TO OTHER COUNTRIES AND DEEPEN OUR INTEREST IN FOREIGN AFFAIRS. THEY MAKE IT VERY IMPORTANT FOR US TO UNDERSTAND ACCURATELY THE PROBLEMS OF OTHER NATIONS, BECAUSE THEIR GOOD OR THEIR BAD FORTUNE HAS A DIRECT EFFECT UPON OUR FOREIGN HOLDINGS.

MANY FIRMS THAT HAVE MARKETS IN SUCH PLACES AS LATIN AMERICA AND EUROPE NATURALLY GIVE PREFERENCE TO EMPLOYEES WHO SPEAK SUCH LANGUAGES AS SPANISH AND FRENCH.

HERE ARE JUST A FEW EXAMPLES OF THE HUNDREDS OF ADS OFFERING ATTRACTIVE JOBS TO PEOPLE WHO CAN SPEAK A SECOND LANGUAGE:

SECRETARY
ENGLISH-Spanish
EXCELLENT OPPORTUNITY FOR CAPABLE SECRETARY IN THE INTERNATIONAL SALES DIVISION OF WELL KNOWN TOILETRIES FIRM LOCATED IN RADIO CITY. GOOD WORKING KNOWLEDGE OF SPANISH. NEW MODERN OFFICE. FINEST BENEFITS.
GENERAL MANAGER--NETHERLANDS, KNOW GERMAN, FRENCH AND ENGLISH, VALVE MFG. TO $20,000.

CIVIL ENGINEER--10 YEARS IN DESIGN OF HYDRAULIC STRUCT, SPANISH SPEAK SO. AMER. TO $1,100 MONTH.

TRANSLATORS (2) RUSSIAN TO ENGLISH--TECHNICAL AND/OR SCIENTIFIC BKGRD. TOP NEW YORK CITY CORPN. RESUME, TO $7,000.

JOBS THAT REQUIRE A SECOND LANGUAGE ARE VARIED: TECHNICAL, CLERICAL, STENOGRAPHIC, SALES, PROFESSIONAL, INSTITUTIONAL, RESEARCH, SERVICE AND CREATIVE OPPORTUNITIES TOO.

BUSINESSMEN KNOW THAT THEY CAN BUY ANYTHING USING THE ENGLISH LANGUAGE, BUT TO SELL SUCCESSFULLY THEY NEED TO SPEAK THE LANGUAGE OF THEIR CUSTOMERS. IN FACT, MANY FIRMS IN THE UNITED STATES EVEN CARRY ON THEIR BUSINESS CORRESPONDENCE, AS WELL AS THEIR FACE-TO-FACE CONTACTS, IN THE LANGUAGE OF THEIR CUSTOMERS.

BUSINESS AND INDUSTRIAL FIRMS SAY THEY ARE FORCED TO GIVE "EMERGENCY" LANGUAGE TRAINING TO EMPLOYEES. IF YOU HAPPENED TO BE ONE OF THESE EMPLOYEES, YOU WOULD HAVE TO TRY TO MASTER A NEW LANGUAGE WITH LESS THAN AN EVEN CHANCE OF GETTING SATISFACTORY RESULTS. WOULDN'T IT BE MUCH MORE PLEASANT, AND EASIER, TOO, TO LEARN A SECOND LANGUAGE IN SCHOOL? FURTHERMORE, IF YOU POSTPONE FOREIGN LANGUAGE STUDY UNTIL AFTER HIGH SCHOOL, CHANCES ARE YOU NEVER WILL LEARN A FOREIGN LANGUAGE. REMEMBER, GAINING A KNOWLEDGE OF A SECOND LANGUAGE CAN MEAN BETTER JOB OPPORTUNITIES BOTH AT HOME AND ABROAD.

BECAUSE america participates in world affairs

AS A LEADER IN THE UNITED NATIONS AND IN INTERNATIONAL AFFAIRS, OUR COUNTRY, THROUGH ITS CITIZENS, HAS A GREAT STAKE IN BUILDING FRIENDLY RELATIONS WITH OTHER NATIONS THROUGH UNDERSTANDING THEIR PEOPLE AND THEIR PROBLEMS.

IT IS TRUE THAT NEVER HAVE SO MANY ISSUES DEPENDED ON COMMUNICATION FOR PEACEFUL SOLUTION. NEVER BEFORE HAVE SUCH VAST NUMBERS OF AMERICANS BEEN ASSOCIATED WITH PEOPLE SPEAKING FOREIGN LANGUAGES. INTERPRETERS CAN NEVER REALLY SUBSTITUTE FOR FACE-TO-FACE, PERSON-TO-PERSON CONVERSATION IN BUILDING A COMPLETE UNDERSTANDING OF OTHER PEOPLE, THEIR ACTUAL IDEAS, AND THE CULTURE THEY REPRESENT. INTERPRETERS CAN MISTINTERPRET, TOO!

IN A WORLD IN WHICH COMMUNICATION AND UNDERSTANDING ARE NECESSARY FOR PEACE, BREAKING THE "LANGUAGE BARRIER" IS A FIRST STEP IN PROTECTING THE LIVES OF OUR PEOPLE AND THE WELFARE OF OUR NATION.
The principal is the educational leader of the school, and programs of instruction within a building cannot prosper without his administrative support and direction. The principal is the superintendent's personal representative, and the superintendent, in turn, the executive officer of the board of education. Supervision usually provides advisory service to teachers, principals, and superintendents to the end that the educational programs will be further improved. The formulation and direction of policy regarding the program of instruction lies principally within the administrative-supervisory staff of a district, but the implementation of instruction is the realm of the teacher. Foreign language instruction needs the specific attention, support, and direction from the district supervisor and the school administrator in order to assure that students gain the development to which they are entitled in a good foreign language program.

The ingredients of a successful foreign language program are listed below:

1. District support and direction including
   a. A supervisor or someone with delegated responsibility for leadership in foreign language instruction.
   b. Clearly stated objectives.
   c. A cooperatively designed and coordinated program of instruction encompassing several years of continuous foreign language learning.
d. Materials and instructional aids of sufficient quality and quantity to help the teacher accomplish his objectives.

2. A school principal who actively supports the foreign language teacher in his assignment.

3. A staff of professionally competent, enthusiastic teachers.

4. Students who are aware of the value of foreign language learning and who have resolved to put forth the effort required to learn another language.

How to develop a successful foreign language program.

1. Consult with language experts to determine what is desirable and possible for the school.

2. Select languages which reflect as much as possible the interests of the community and for which competent, enthusiastic teachers are available.

3. Make election of language study possible for all students, not just the college bound. Language instruction should not be compulsory in the secondary school. Offer more than the minimum number of years required for college entrance.

4. Provide foreign language instruction for all students at the earliest possible grade level. It is suggested that any one or all three of the following plans be followed.

---

1A Guide for Foreign Languages, Missouri State Board of Education, pp. 16-19.
If foreign language instruction is adopted in elementary school, it is suggested that this articulated Plan I be followed. Under this plan, the student's interest remains high because he is able to experience progress and success as he advances from one level to another in a well-coordinated program. Ultimately he is offered Advanced Placement for which he may receive college credit for his efforts. This makes possible a smooth transition into university literature courses.

If the school district is unable to provide a well-articulated program in foreign languages beginning in the elementary school, Plan II is suggested. If foreign language instruction is initiated in the junior high school, there are certain advantages over starting at a later time. A well-coordinated six-year program can be offered. Students who begin at this age still have minimal interference from their native language. Most universities offer credit at a reduced fee to students who score high on the college achievement tests. Students who have completed five levels of secondary school work should easily qualify for this advantage. In most cases, he should be able to enter university literature courses.

Plan III--a Level I, II, III sequence in high school--would serve a district which could provide no more than this minimum. It would also provide additional advantage to districts which have already established an elementary and/or a junior high school beginning sequence.

Students, under this plan, would be able to continue their foreign language study in the college or university since the three years of study is more than the minimal college entrance requirement. This points to a need for careful articulation between the high school and the university.

A Level I, II, III sequence in high school also provides an opportunity for a student who has studied one language through junior high school to add another language to his program at the high school level.
5. Employ only well-trained teachers whose major interest is language teaching and who are motivated toward perfecting their own fluency and acquiring new techniques of language instruction.

6. Select new teaching materials on the basis of teaching goals continually agreed upon by district and school committee and of consultation with available resource people.

7. Involve teachers in all decisions concerning selection of language, scope, and sequence texts and materials.

8. Provide a district coordinator or supervisor who has a competent foreign language background and who is directly responsible for supervision and promotion of the program. An experienced, competent teacher in the district may be given the responsibility of assisting beginning teachers.

9. Avoid excessively large language classes, not to exceed the maximum of 25 students at the secondary level. The ideal is 10 to 15.

10. A daily schedule of seven or more periods provides the best opportunity for the maximum number of students to study a foreign language.

Administrative Considerations

In developing a foreign language program, administrators should ask such questions as:

1. Is the curriculum flexible enough and are there sufficient periods in the school day to allow students to enroll in foreign

---

language classes without difficulties in scheduling?

2. Has provision been made for continuity of instruction from its beginning through grade 12 so that students may develop a real proficiency in the language?

3. Is the program well-articulated and coordinated between levels in any given school and/or between elementary, junior high, and senior high schools throughout the district?

4. Is a variety of evaluative techniques and instruments used such as surveys, case studies, interviews, contests, publications, reporting, and observation?

5. Is the preparation of the teaching staff adequate to meet the objectives of the program?

6. Does the school system promote participation in in-service training, night courses, summer institutes, and travel abroad, and provide compensation for teachers engaging in such activities?

7. Is adequate supervision given the program to insure appropriate and effective instruction?

8. Are parents apprised of the developing foreign language program?

9. Have sufficient space, materials, and equipment--tape recorders, record players, slides, foreign language periodicals, books, realia, and tape recordings--been provided for teachers to create a varied and stimulating program and to accommodate individual differences?

10. Are provisions made for appraising and implementing new developments and materials in the field of foreign languages as well as for overcoming existing weakness and resistance to change?
Relationships with the teacher

The administrators have the responsibility of assuring teachers a situation that will produce the highest professional growth. Teachers work most effectively when they have:

1. Time to keep informed about the latest research, progress, and new materials in their field.
2. Time to work individually with students.
3. Time to prepare suitable classroom and laboratory materials.
4. Time to visit other schools with similar programs.
5. Time to participate in study groups and workshops.
6. Time to develop extracurricular activities such as language clubs and plays.
7. Time and financial assistance to attend professional meetings.
8. A budget for purchase of audiovisual materials, films, slides, foreign language newspapers and magazines.
9. Encouragement to participate in summer workshops, language institutions, and to travel.

THE COUNSELOR

Importance of foreign language study

3 Modern Foreign Languages for Iowa Schools, Iowa Cooperative Curriculum Development Program, p. 35.
Political and technological developments in the last two or three decades have necessitated a complete modification in foreign language instruction in all facets of language learning with emphasis on oral communication. Countries and peoples are now hours distant by travel, not weeks or months. Politically, peoples are clamoring for independence, higher living standards, and are looking to world powers for information and help. These developments have thrust on citizens of the United States exacting responsibilities which cannot be met until lines of communication are established. The American government, seeing the necessity of strengthening national language capabilities, initiated the National Defense Education Act of 1958. In order to correct the language deficiency in our society, it is now necessary for the American school system to achieve a great deal more in foreign language instruction than ever before attempted. If our nation is to rise to the challenge of fostering intercultural understanding including effective use of communications skills, foreign language instruction must be offered to this nation's youth. Americans can no longer insist that other people learn English in order that communication can take place.

The following facts should be considered when counseling students concerning foreign language study.\(^{5}\)

1. Language study helps students to become more articulate, broadens students' cultural and intellectual horizons, and increases respect and tolerance for ideas, values, and achievements of a foreign culture.

2. Many colleges and universities are instituting, restoring, and increasing their requirements in foreign language, both for admission and for degrees.

3. All students should have the opportunity to elect foreign language study and to continue it as long as their interest and

\(^{5}\)Ibid.
ability permit.

4. Students should begin language learning at an early age. The advantages of an earlier start are greater ease in learning and the chance to develop near-native proficiency in speaking.

5. Students entering the secondary schools from an elementary school foreign language program should be given the opportunity to continue in the same language through at least a four-year sequence without interruption.

6. It is important to identify students who are especially capable in language learning in order to give them time to become linguists or other language specialists.

7. Students who may eventually become our national leaders need a high level of foreign language competency and should be encouraged to study foreign languages.

8. Students who are native speakers of a foreign language taught in schools do not benefit from the usual beginning courses designed for English-speaking students. Such students should, therefore, be encouraged to take foreign language classes designed for their special needs.

9. The particular foreign language which a student studies in school is a matter of individual motivation based on such considerations as which languages are available, family preference, community background, vocational interest, travel opportunities, and other considerations.

10. The counselor should neither suggest nor imply that one foreign language is easier to learn than another, or that one language has greater social acceptance or appeal.

11. Students should never be permitted to "shop" the language
department if their initial unsatisfactory experience in another language has been due to academic weakness.

12. The counselor is encouraged to consult with the foreign language teachers on all matters concerning the foreign language program.

THE TEACHER

The past few years have brought rapid change in the teaching of foreign languages. Both course offering and methodology now require teachers with language majors who are dedicated to their profession. As the last few years have produced such profound changes, so will the next few years produce more. Teachers must prepare continually, seek, find, and assimilate modern techniques and methods.

Not all language teachers have the same abilities, attitudes, loyalties and preparation. Realizing that they are teaching one of the most technical and difficult subjects offered in the elementary and secondary schools, language teachers of outstanding quality will:

1. Continually improve competence in language skills by all possible means, including periodic foreign residence.

2. Keep abreast of development in the language and culture.

3. Convey habitually a positive, enthusiastic attitude for teaching the language and culture, and for language learning.

4. Have a genuine interest in young people; accepts students where they are and moves ahead with them.

5. Be thoroughly dedicated to the language-teaching profession; establishes good professional relationships with total staff.
6. Understand thoroughly the basic philosophy of the program (text) being used.

7. Join and participate regularly in local, state, and national associations, including those directly pertaining to language learning.

8. Survey at least monthly the professional literature of their teaching specialists.

9. Acquire additional formal preparation through in-service workshops and course work leading to higher degrees and professional certificates.

10. Test new programs and experimental ideas.6

---

6MLA Proficiency Tests for Teachers and Advanced Students (Revised)

Languages: French, German, Italian, Russian, Spanish
Level: Present and prospective teachers
Forms: Three
Administration: In specified centers on announced dates
Skills tested: Listening, speaking, reading, writing
Tape: Yes (listening and speaking)
Length: Varies from 20 to 45 minutes
Description: These tests are administered in three different combinations.

Information and tests available from the Educational Testing Service, Princeton, New Jersey 08540, and from MLA.
Sources for Assistance

In addition to a requisite set of language skills and a clear understanding of methods and techniques, the superior teacher's performance results in good student-teacher rapport and enthusiastic presentation. Suggested sources for teacher improvement are:

1. Utah State Foreign Language Guide.
2. Foreign Language specialists, district, state and nation.
3. Colleagues who are constantly striving for self-improvement.
4. Successful programs and classes in other schools and districts within reasonable distance.
5. Foreign language in-service programs, workshops, conferences, and institutes sponsored by the district, the state or by institutions of higher learning.

Cooperation

Foreign language teachers are a part of a very complex instructional team composed of administrators, counselors, other language teachers, teachers of related subjects, and parents.

PROFESSIONAL PREPARATION

Teachers should review these PMLA\textsuperscript{7} standards for professional preparation.

\textsuperscript{7}"Standards for Teacher-Education Programs in Modern Foreign Languages," \textit{F L Program Notes}, No. 51, pp. 1-2.
1. Only selected students should be admitted to a teacher-preparation program, and those selected should have qualities of intellect, character, and personality that will make them effective teachers.

2. The training of the teacher must make him a well-educated person with sound knowledge of United States culture, the foreign culture and literature, and the differences between the two cultures. It must also enable him to:
   a. Understand the foreign language spoken at normal tempo.
   b. Speak the language intelligibly and with an adequate command of vocabulary and syntax.
   c. Read the language with immediate comprehension and without translation.
   d. Write the language with clarity and reasonable correctness.
   e. Understand the nature of language and of language learning.
   f. Understand the learner and the psychology of learning.
   g. Understand the evolving objectives of education in the state and in the nation and the place of foreign-language learning in this context.

3. In addition to possessing the requisite knowledge and skills, the language teacher must be able to:
   a. Develop in his students a progressive control of the four skills—listening, speaking, reading, writing.
   b. Present the language as an essential element of the foreign culture, and show how this culture differs from that of the United States.
c. Present the foreign literature effectively as a vehicle for great ideas.

d. Make judicious selection and use of methods, techniques, aids, and equipment for language teaching.

e. Correlate his teaching with that of other subjects.

f. Evaluate the progress and diagnose the deficiencies of student performance.
Knowledge of language learning will continue to evolve as further experimentation and experience provide new data. Teachers need to be aware of linguistic and psychological considerations upon which authors base their programs of instruction. Some of the principles of linguistics and psychology which appear to be of importance to foreign language teachers are discussed briefly in this section of the guide.

The objectives upon which most of the prevalent modern foreign language textbooks are based and those accepted by a majority of foreign language teachers are enumerated as listening, speaking, reading, writing, and through these, an appreciation of culture. Not many teachers know or utilize either the underlying linguistic rationale or the types of learning involved as they attempt to guide students to achieve each of the skills enumerated in the standard list of objectives.

**ROLE OF LINGUISTICS**

Linguistics is a science, not a teaching method; however, the findings of linguistic science can do two things for the teacher of foreign languages. The first is to provide him with the necessary information to combat various misconceptions about the nature of language and writing. The second is to supply the teacher (and the textbook writer) with accurate statements about the sounds, grammar, writing systems, paralanguage (vocal gestures) and kinesics (gestures, body motions) of the language and with information about the points of conflict between English and the foreign language (contrastive studies). Linguistics should be included in the professional training of the teacher; it is applied to language classes, but not taught formally.
Language is so much a part of man that it is impossible to tell where language habits stop and personality begins. Consequently it is extremely difficult to examine language objectively. Because language is such a familiar part of everyday life, many teachers do not understand its nature and do not direct class activities toward the achievement of the established goals. Following is a list of facts that will help the teacher better understand the nature of language.

**NATURE OF LANGUAGE**

1. Speech is one or more sounds made by human beings for purposes of communication. The communication is language.

2. Languages are different, not only in having different words as symbols for things, but also in arranging words in different ways to express different reactions to situations.

3. Language is more than just a sequence of words; people also communicate by such means as structure, stress, pitch, and pauses.

4. Changes in language depend on time, place, social, and stylistic levels. These changes are not corruptions but normal features of all languages.

**MAJOR TEACHING IMPLICATIONS**

1. Remember that learning to speak a foreign language is not an intellectual activity in the usual sense of the term, but learned behavior—-a set of habits.

   Use classroom time, particularly in the early stages, in habit formation, not in talking about the language.

2. Present grammar as a set of generalizations about the way a language behaves rather than as a set of rules to which the language must conform.

   Train the student to expect the grammar of another language to be different from English grammar, not as something universally consistent.

3. Practice pronunciation in the form of real sentences or real sentence parts. Be sure that the stress, pitch, and intonation patterns of model sentences are authentic, consistent, and appropriate to the context.

4. Prepare students to recognize regional and social differences. Introduce them progressively to dialect forms, colloquial expressions, and literary styles and guide them.

---

NATURE OF LANGUAGE

Different languages have different taboos and reflect different world views. For example, in ancient Hebrew the word for God, IHVH (Yahweh), was unmentionable; another word was always substituted for it. In English, by those who use the expressions, Lord! is considered milder than Good God! although they mean the same.

5. Speech and writing are different, though related, language systems. In all languages, speech preceded writing. Most of the world's languages still have no written systems.

6. Language cannot be interpreted simply as a function of race. Primitive peoples do not speak "primitive" languages. The languages of simple cultures ("primitive peoples") are not necessarily simpler than the languages of highly complex cultures.

English sounds just as strange to a foreigner as his language sounds to monolingual speakers of English.

7. Words for "the same thing" in two languages are not "equal to each other" unless basic meanings and connotations both correspond—and they seldom do.

8. A native speaker is usually not aware of the grammatical

MAJOR TEACHING IMPLICATIONS

in the appropriate use of each. Assure students that a home variety of the second language (dialect) is not inferior, merely different, and may be used in appropriate situations.

Whenever appropriate, utilize the findings of linguistics in order to gain more ready access to the great ideas and literature of a language.

5. Teach writing in terms of speech and not speech in terms of writing.

6. Do not make such relativistic value judgment as "the Germans say this backwards" or "the Spanish people are illogical in the use of the double negative." Do not recommend such distortion or gross oversimplifications as "Hold your nose while saying certain French sounds" or "Clear your throat when saying that sound."

7. Emphasize "equivalent meaning" rather than word for word translations.

8. Do not assume that a person qualifies as a language teacher
NATURE OF LANGUAGE

complexity of his own language. He has mastered patterns subconsciously and is usually insensitive to the problems encountered by non-native speakers of the language.

Mere practical control of a language does not qualify anyone—not even a native speaker—to make meaningful statements about the language.

9. Language is culturally acquired. Meaning given to vocal symbols cannot be separated from the culture of the language community.

MAJOR TEACHING IMPLICATIONS

merely because he is a native speaker of that language.

9. Teach the meaning content of the second language as it has developed in the culture where the language is spoken natively. For example, petit déjeuner is not the same as "breakfast." Brot is not the same as "bread." Peso is not a "dollar."

10. Lexical meaning, expressed by selection of words (tall man, short man), must be distinguished from grammatical meaning, expressed by their inflection (speak, spoke) or arrangement (house dog, dog house).

10. Teach the vocabulary in situational context which clarifies basic meaning and cultural implications. Do not teach long lists of isolated words with English translation.
PRINCIPLES UNIQUE TO FOREIGN LANGUAGE TEACHING

1. The learning of a modern foreign language is a single discipline with its own objectives and learning procedures, its own characteristic content and expected outcomes. The learning of the mother tongue and the learning of a classical language are separate and distinct from this.

2. Language competence on the part of the teacher and effective instructional materials are basic necessities. Equally significant is the manner of presentation to the learner.

3. The skills of hearing, speaking, reading, and writing are all involved in language behavior. In the audio-lingual phase, language functions purely on its own. The visual-graphic phase is ancillary to language and important to it, but it can easily be foregone, just as it is in the daily life of each individual. All four skills should be taught in a carefully prescribed sequence and proportion of allotted time.

4. Incremental learning is particularly significant. One does not learn by making mistakes, but rather by giving the right response. If this can be given promptly and easily, with little or no waste in terms of wrong response, learning is quicker and better.

5. A principal objective is to use the foreign language as it is used in the foreign culture, in which, obviously, English plays no part at all. Nevertheless, in order to establish semantic meaning at early levels, some use may be made of English.

6. All four skills should be measured. Ways of testing with suitable accuracy the ability to listen with comprehension and to speak have recently been developed. Tests of reading and writing are constantly being improved, with increased emphasis being placed upon recall and active performance.

---

7. Thinking, composition, and literature have qualities and dimensions of their own that must be identified separately and related appropriately to language in subsequent levels.

PSYCHOLOGICAL CONSIDERATIONS

Language is almost as natural as sleeping and breathing. Language permeates our inner lives and is an indispensable factor in human relationships. If language is considered to be behavior, then psychology, the science of human behavior, must have a great deal to say about this human characteristic which has both mental and physical aspects. Human beings are not born with language; it must be acquired. Memory, habit formation, innate ability, and motivation are factors which influence language learning. When language learning is related to the teaching process, it becomes evident that language is neither individual behavior nor group behavior, but both. Teachers need to know what progress is being made as a result of instruction, and they, therefore, need to measure the learning acquired by the student.

The following ideas about learning psychology are provided with the in-service-workshop goal in mind. These should be explored and discussed so that foreign language teaching and learning will improve.

Certain types of learning interact and dominate at times in the development of specific language skills, and efficient teaching of foreign language is fostered if the teacher understands the types of learning and how they apply to unit and lesson planning. Professor Asahel D. Woodruff treats four basic types of learning which should be involved in foreign language teaching. They are (a) concept

---

formation, (b) symbolic or associational learning, (c) motor manipulation, and (d) habit formation. Professor Woodruff's treatment of these types of learning is very detailed and should help groups of foreign language teachers in in-service workshops to improve their unit and lesson planning.

Professor Leon A. Jakobovits treats the controversy in teaching methods between the cognitive-code advocates, including the transformationalists, and the stimulus-response-reinforcement advocates. The difficulties can probably be resolved by applying the best aspects in these camps to foreign language teaching. This means a careful plan using the four types of learning with a good affective climate.

The diagram on page 32 shows the interrelationship of the five types of learning with the ever-present affective domain and should be helpful in indicating that all these aspects are involved in foreign

---

4. Other very helpful sources discussing types of learning and unit and lesson planning are:

B. S. Bloom, et. al, *Taxonomy of Educational Objectives*, N. Y.: McKay, 1956. (Treats the classification of educational objectives)

Frank M. Grittner, *Teaching Foreign Languages*, Harper and Row, 1969, pp. 327-340. (Treats interaction analysis which is helpful in the measurement of affective domain--emotional interaction--in educational objectives.)

Gertrude Moskowitz, *The Foreign Language Teacher Interacts*, Association for Productive Teaching, 1040 Plymouth Building, Minneapolis, Minn. 55402. (Treats interaction analysis which is helpful in the measurement of affective domain--emotional interaction--in educational objectives.)

language teaching and learning. Careful analysis of the diagram should indicate to the teacher:

1. That in teaching any basic dialog, certain concepts (see Woodruff) are involved: i.e. situation, culture and grammar.

2. That the words and sentences, paralanguage (loudness or softness and other effects of voice) and gestures or other body or facial movements have unique meaning (symbolic and associational meaning.)

3. That pronunciation and intonation require psycho-motor manipulation utilizing muscles and positions which often need no verbal explanation but simple imitation; however all foreign language teachers should be able to assist students in making individual and multiple (clustered) sounds by explaining what to do.

4. That habit formation is perhaps the most important foreign language experience in that the other three types of learning are initial experiences which require long, diligent, and alert practice to habituate the skills and concepts and symbols. The practice is a long process that requires the best of teachers and students to keep vital and worthwhile.

The following involve the types of learning:

1. Beginning Experiences
   - Basic situation presentation
   - Dialog learning
   - Implementation of dialog elements
     - Question-answer
     - Rejoinder
     - Personalization
   - Grammar
     - Structure presentation and generation (organic approach)
Pattern drill
Inductive generalization (functional approach)
Conversational stimuli
Reading and writing
Machine-aided learning
Testing

2. Intermediate Experience

Similar delineation to the above beginning experience (see intermediate textbooks).

3. Advanced Experience

Similar delineation to the above beginning experience (see advanced textbooks).

When all four types of learning interact in a favorable affective domain, real progress can take place. The initial steps in concept formation, symbolic learning, and motor skill development are very important and must not be neglected but these are beginning steps. The longer process of habit formation through diligent practice, overlearning, and periodic review is paramount in language learning. If concept formation were the main objective, almost all foreign language teachers would speak the target language as natives because they understand the grammar and cultural concepts so well.
INTERRELATIONSHIP OF
FIVE TYPES OF LEARNING
IN A TYPICAL LANGUAGE CLASS ACTIVITY

Emotional Interaction (Affective Domain)*
Symbolic or Associational Learning
(Vocabulary)
(Facial expression)
(Gestures)
(Other body movements)

Concept Learning
(Culture, situation, grammar)

Emotional Interaction (Affective Domain)*
Learning a Dialog**

Motor Manipulation Skills
(Pronunciation Intonation)

Habit Formation--Overlearning
(Memorization, drill, and periodic review)

Emotional Interaction (Affective Domain)*

* All learning activity includes emotional interaction, that is it is in the affective domain.

** This diagram centers on learning a dialog, but any aspect of foreign language learning can occupy the center, i.e. practicing a pattern, reading a narrative, adapting a dialog, and the like.
PSYCHOLOGICAL PRINCIPLES OF LEARNING

I. REINFORCEMENT

People tend to accept and repeat those responses which are pleasant and satisfying and to avoid those which are annoying. Students should experience personal satisfaction from each learning activity and should achieve some success in each class period by mastering some new idea or operation.

First impressions are often the most lasting. This means that those first classes are all important. The teacher should arouse interest, create a sense of need for the subject matter, and insure that the students learn it right the first time.

The more often an act is repeated, the more perfectly and quickly a habit is established. Practice makes perfect—if the practice is the right kind.

A skill not practiced or knowledge not used will be largely lost or forgotten. The teacher should recognize the value of repetition in the classroom for reinforcing newly-gained knowledge or skills. Important items should be reviewed soon after the initial instruction.

II. OBSTACLES TO LEARNING

Certain feelings, emotions, and attitudes of students may be obstacles to learning. Some of these cannot be controlled by the teacher but the following can:

A. Boredom

The work may be too hard or too easy. The teacher may have failed to motivate the students or to keep their attention.

B. Confusion

The teacher may create confusion by presenting too many or overly complex ideas. Contradictory statements or failure to relate one step to another also can confuse students.

C. Irritation

Annoying mannerisms of the instructor, poor human relations, interruptions, and delays can create this obstacle.

D. Fear

Fear of failure or of getting hurt are common obstacles to learning. Being certain that each student experiences some success each session is important.
III. FACTORS AFFECTING LEARNING

Such factors as practice, habits, retention, transfer, discrimination, motivation and interference affect the learner and the learning condition. The following are examples:

A. Language habits developed will depend on the correctness of the models given to the student to imitate.

B. Acquiring a new habit or behavior is brought about by conditioning--stimulus-response--and reinforcement--reward.
   1. If the learner knows what he is doing and the purpose for doing it, the simple fact of knowing that he is doing it correctly is a reward in itself and will reinforce his behavior.
   2. Rewarding the desired response increases the probability that the response will be repeated again in a similar situation.
   3. The real skill of the teacher is shown not in correcting or punishing but in creating situations in which the learner cannot help but respond correctly.
   4. It is equally important to realize that erroneous responses, if not corrected immediately, persist.

C. Meaningful practice exercises must incorporate frequent repetition to bring about enough overlearning to guarantee retention, particularly in the initial learning experience and in programmed, periodic review.

D. To secure retention, students should review frequently, at short intervals, almost immediately after the original learning and then after longer and longer intervals as the time from the original learning increases. Check lists are needed to remind teachers of what has been presented; when it was last reviewed, and how often it has been reviewed.

E. It is possible to practice a skill perfectly but so differently from the way it is actually used that there is almost no transfer from one situation to another.
   1. Transfer cannot be taken for granted.
   2. The student's ability to analogize and to see applications depends upon his background of experience, his level of insight, and his previous conditioning in this direction.

F. When one's native language impedes the learning of a second language, the phenomenon is known as interference. This interference transfers automatically to the second language.
   1. Interference can be almost negligible as in the case of the bilingual (who learned the language in childhood); therefore, foreign language should be taught at an early age. The earlier learning begins, the better.
2. The teacher must be aware of the points of interference and give special emphasis to them.

3. The automatic use of the mother tongue must be drilled out.

4. The mental set of the class must be completely in the foreign language environment. Use of English must be discouraged.

G. Learning is more efficient when the learner proceeds from the simple to the complex.
   1. See the total configurations first.
   2. Drill the parts.
   3. Put the parts back into the total configuration.
   4. Practicing and overlearning the segments do not guarantee a mastery of the total configuration.

H. The student's ability to perceive configurations or patterns and his ability to discriminate and to generalize can assist him immeasurably in acquiring a new language.
   1. The student is made conscious of the structure of the language and how it follows definite patterns.
   2. More exercises and analogies are necessary for students of limited linguistic ability.

I. Learning to do involves doing. Students don't learn as a result of what teachers do, but as a result of what teachers motivate them to do.
   1. Teachers need to think seriously about the arrangement and length of time spent on learning tasks such as drills and practice exercises in language classes.
      a) Studies show that for best results practice should be spaced. A few drills and practice exercises daily for a week will give better results than many such drills and exercises concentrated in one long session.
      b) Frequent short practice sessions generally produce greater learning. The optimal length and spacing depend on the kind of learning task and the age of the learner.
      c) Sometimes long sessions are favorable if the task is highly meaningful, that is, (1) when new insights are gained, (2) when the material has been previously overlearned but during a prolonged time interval the forgetting has been great, (3) when peak performance is required on tasks already known, or (4) when prolonged warm-up periods are necessary to become involved in the task.
J. The unknown cannot be appreciated or experienced except in terms of the known.

1. Technical grammar terminology can be more difficult at times than the foreign language itself. "The second person singular subject pronoun" can more easily be understood if reworded "the world you." Instead of saying "the definite article," it is much clearer to the student to say "the word the." There is no objection to understanding the grammatical or linguistic concepts if they are part of the experience of using the language. Reducing grammatical terminology to a minimum is an important need in the learning of foreign languages.

2. Foreign utterances are best learned and retained when presented in context, in association with objects, actions, and conditions which are their referents.

3. Practice exercises become the prototype for the unit of behavior or language the learner wants to acquire.

4. A great help in acquiring meanings in language learning is the development of experiences with the use of visual aids such as charts, illustrations, filmstrips, slides, and short films.

5. Teachers must help students avoid the pitfall of rote learning by adopting the following measures:
   a) Developing meaning and understanding.
   b) Patterning the material in the dialog rather than allowing it to be unorganized.
   c) Relating the new to what has already been learned.
   d) Relating materials in the dialog to the practical activities of the learner.

K. Interest and motivation are crucial in any learning program that extends over a period of three or more years.

1. Students are thinking and feeling as they undergo the learning process; the more positive his thinking and feeling are, the better his retention will be.

2. False goals, e.g., an "A" on a report card, are likely to engender quick forgetting of the language since the immediate goal has been reached.

3. Lesson content is highly important.
   a) Content should develop significant insights, attitudes, and interests in the contemporary life of the foreign culture and society.
b) The content should be appropriate to the maturity of the learner.

c) Motivation becomes more difficult if the teacher limits the task to a set of materials to be learned in the classroom.

(1) Learning occurs in a larger setting.

(2) The whole school situation should be considered, including extracurricular activities, out-of-school activities, and community activities.

d) Using the language means exchanging words and ideas with someone else—a listener, a reader, a correspondent, or a group of persons and not just a concern for reciting "when my turn comes."

4. Students should feel that they are making progress toward goals and objectives they themselves have accepted.

5. Teachers should note the characteristics of the students with whom they are dealing.

a) Children's interests are varied, e.g., the space-age marvels, animals, the workings of nature, fantasy, things historically remote, television advertising slogans. (Note the following section on child growth and development and implications for foreign language teaching.)

b) Adolescents have long-range goals—college entrance, choice of occupation, community activities—which take the place of transient interests.

6. The personal motivation and enthusiasm of the instructor must be such that he is capable of inspiring his students.

L. The slow, orderly unfolding of the human being physically and psychologically indicates that readiness to learn is extremely important.

1. The use of language is dependent upon the maturation of the neuro-muscular connections.

2. The learner's ability to symbolize at the verbal level, to analyze, to discriminate and generalize about what he has learned indicates learning tasks to be assigned at different readiness levels.

3. The teacher must be careful not to teach all he knows about an aspect of language at any one time. He programs the aspects to be experienced and to be reviewed over an extended period of time.
Foreign language teaching has been an area of furious action in the past decade. An incredible amount of information concerning language itself, language acquisition, and language teaching has resulted. A new teacher, faced with such an array of materials, some of it conflicting, is understandably awed and confused as to what course to take in his own class. A typical reaction is to skirt the issues entirely and teach the same way he was taught. To ignore the information available, however, would be tragic because certainly there is room for much more effective teaching. Techniques and materials must be continually improved. Certainly, one does not wish to remain static. Even teachers who have embraced one of the "new methods" cannot tie themselves to the past, or even the present; certainly new information and techniques which should bring us greater success will continue to be identified and developed.

Undoubtedly there has been a shifting of emphasis and of goals in the past decade. The failure of the grammar-translation approach to produce ability to use the language, its neglect of the aural-oral skills resulted in the reaction (perhaps over-reaction) that has been called the audio-lingual approach. This movement has been quick to make use of information provided by modern linguists, to make use of electronic equipment, to make use of modern psychological theory in the area of language acquisition, and has placed emphasis on the practical values of a fluency in the language. Most of the texts written in the past years have been prepared for an audio-lingual approach.

The committee which prepared this guide feels that the audio-lingual approach (or certain modified forms) will be most successful in bringing a language teacher to the goals stated herein. A beginning teacher could do no better than to teach with an audio-lingual text and follow quite closely the recommended techniques.

As the teacher gains experience, he will perceive areas where he will need to work to achieve the balance needed to achieve his goals. Beginning and experienced teachers alike should be open-minded and eager to find and try new ideas. Excellence in teaching and a constant effort toward specific goals usually bring success. Although one approach may be more effective than another for reaching certain goals, quality teaching is more important. It is hoped that use of the information presented in this guide will contribute significantly to the achievement of that high quality teaching.
Teaching a foreign language to children requires not only a fluency in the language and a proficiency in foreign language teaching methods, but also insights into the developmental characteristics of the children being taught. At different levels of development, children possess greater readiness for certain aspects of foreign language learning. Teachers should capitalize on this readiness and use these insights, to ensure more effective learning. The following is a classification of some of these characteristics of the child from age eight to seventeen and the corresponding implications for the foreign language teacher.

(*Note: This list assumes that a child begins second language study at an early age and grade level (FLES). Some of the characteristics noted may begin developing at the age indicated and continue into other stages of maturation. It should be kept in mind that this is a list of general tendencies and may or may not represent the developmental pattern of any one specific student.)*

</tbody>
</table>

CHARACTERISTICS OF CHILD

- Can project own life interests into those of children of other lands; is delighted with similarities.
- Learns through concrete situations; is able to plan and present fairly complete dramatic representations; impersonates to appraise his developing attitudes.
- Expects and asks for praise.
- Is more rapid in responses; listens closely to adult talk.
- Is interested in doing many things but does not have sustaining power of nine-year-olds.
- Is interested in clothes and in buying new ones; is intrigued by money and buying and selling.
- Is spontaneous in competition;

IMPLICATIONS FOR TEACHER

- Maintains authenticity of world in the foreign culture.
- Vary classroom activities with skits, dialogues, and role-playing.
- Ensure success of each child. Do not put him on his own too soon or isolate needlessly through individual competition.
- Provide good models of speech, preferably by several voices.
- Vary each session with several interesting activities. Never use a single technique to exclusion of all others. Disguise drills in games, songs, and skits.
- Use this interest for more than teaching a list of articles of a clothing store and act it out, for example.
- Introduce games involving mild
CHARACTERISTICS OF CHILD

enjoys taking turns; insists on fair terms; is beginning to segregate on a sex basis.

Likes to classify, arrange, and organize; experiences more interplay between school and home.

Enjoys nonsense rhyming; likes to memorize.

Is ingenious in making new rules and inventing games.

Likes pictorial magazines and the radio.

Learns from mistakes of others, including those of the teacher.

Likes to have teacher a part of activities.

Uses telephone.

IMPLICATIONS FOR TEACHER

competition which will allow success. Employ chain drills. For fair play have a boy choose a girl and a girl choose a boy.

Choose vocabulary material that can be used at home or school; be sensitive to child's interests.

Take advantage of this quality by choosing clever material for memorization. Introduce humor.

Allow for creativity and originality by permitting the children to devise some of their own activities.

Plan stimulating visual materials. Use "Broadcasting" device to enliven dialogues.

Utilize errors as opportunities to extend learning (often in humorous context).

Use toy telephone or teletrainer sets (available at Phone Co.) for practice.
CHARACTERISTICS OF CHILD

Demonstrates strong self-motivation.

Likes to do the same thing repeatedly; is intensely realistic; enjoys reading for facts and information.

May hate to stand before class; is more competitive as member of group than individual; cannot always recall immediately.

Works more independently at school; likes adult supervision of group games rather than sharing activity.

Forms groups on basis of segregated sexes.

Shows more ability to carry a task through to completion.

Has mastered most number combinations.

IMPLICATIONS FOR TEACHER

The Nine-Year-Old

Stimulate the development of acceptable and mature motivation.
Refrain from "over" challenging.

Devise interesting drills.
Relate conversational material to real life more than to fantasy.
Introduce more detailed facts concerning foreign customs, geography, etc.

Use judicious "coaching." Don't put student on the spot. Plan group games and recitation.

Assume friendly but more aloof role. Occasionally plan small-group activities or allow several small groups to plan and practice dialogues independently.

Avoid pairing off boys and girls. Allow independence in formation of small group.

Require mastery in memorization and presentation of dramatic skits in finished form.

Gear number work to skills already acquired in arithmetic.
CHARACTERISTICS OF CHILD

The Ten-Year-Old

Has basic skills well in hand.

Works with speed; has longer attention span.

Likes mental arithmetic.

Has a good sense of cooperation and will abide by group decision.

The Eleven-Year-Old

Shows unevenness in performance; is easily fatigued; has short attention span.

Thrives on competition is interested in his standing in group; prefers mechanics of math to solution of problems.

Is better at rote learning of specifics; likes work related to reality; prefers current to past information.

Loves to sing.

Has enthusiasm for physical activity and sports.

IMPLICATIONS FOR TEACHER

Plan introduction of reading for those who have had approximately 100 hours of conversational study of language.

Require mastery of more material.

Work for real mastery of number terminology and computation.

Foster whole-group feeling through class projects.

Provide physical movement through dramatization, the carrying out of oral commands, simple dances and games.

Use group participation rather than individual. Treat spelling, math, geography orally.

Employ oral stories, cultural materials, folk stories, spell downs, work problems, and vocabulary games.

Sing folk songs and rounds. Play recorded music.

Gear vocabulary units toward sports. Participate in actual sports if possible.
CHARACTERISTICS OF CHILD

Works for good grades; shows self-satisfaction in doing well; has a certain amount of intellectual curiosity.

IMPLICATIONS FOR TEACHER

Encourage competence and achievement rather than working for grades.

The Twelve-Year-Old

Is more cooperative and dependable; has periods of fatigue in everything he does; dislikes strongly those making demands.

Increasingly needs more informational material; is better able to arrange, classify, and generalize; likes to talk; has high initiative; is ready for social studies.

Enjoys singing in harmony.

Limit amount of homework but give extended, individualized work to superior pupils.

Needs firmness and control.

Offers more detailed study of countries speaking languages. Encourage pupils to subscribe to foreign-language newspapers and periodicals designed for this age group.

Likes things that are funny.

Use songs with words with harmonized scores.

Exhibits wide range of interests; wants to be self-reliant and often likes to work independently.

Stress overlearning and mastery.

Have students prepare own captions for humorous material.

Encourage interest in special areas use of library and community resources. Promote activities in foreign language such as radio programs, films, and concerts.
CHARACTERISTICS OF CHILD

The Thirteen-Year-Old

Studies more independently of contemporary group; often seeks special projects and assignments.

Make extensive materials available for individual study. Read supplementary stories. Make class reporting in the language a common practice.

Has ups and downs, unpredictable moods and behavior.

Be patient and understanding.

Is less willing to recite and perform before others; meditative; is more quiet and withdrawn; has feelings easily hurt.

Encourage expression in the language. Avoid letting students remain outside the group.

At times becomes crisp and sardonic in humor; is especially good at sarcasm.

Avoid individual students being hurt by group ridicule; utilize simple folk humor.

Has thought about future career and about marriage.

Discuss family living in the foreign country along with socio-economic conditions, occupations, opportunities for travel and foreign service.

Is "crazy about" (likes) sports and fads.

Examine typical sports and engage in actual play if possible.

Is interested in creative expression.

Study great men of science and medicine of foreign country. Compare modern-day dress with traditional costume.
CHARACTERISTICS OF CHILD

Is expansively enthusiastic, energetic, sociable.

Shows strong feelings toward peer group.

Is noisy; enjoys interaction between girls and boys (girls more interested in boys than vice versa, however).

Thrives on a variety of programs.

Shows less interest in broad social studies; has great interest in any material with psychological slant; likes to relate what interests him to his life.

IMPLICATIONS FOR TEACHER

The Fourteen-Year-Old

Promote group use of conversational material. Present everyday-life situations.

Emphasize boy-girl and other social relationships in foreign land.

Diversify material, furthering group and individual participation. Use group spirit to motivate improvement in pronunciation, enunciation, intonation, and thought content in conversation. BE CAREFUL IN PRESENTATION.

Vary methods of presentation, using such activities as planned skits, games, more sophisticated songs, definitions in foreign language, films, cultural tapes, and visits by native speakers.

Emphasize oral drill vocabulary, and cultural materials; let students read materials in the language involving strong personal interest.
CHARACTERISTICS OF CHILD

Has extensive overlapping of his activities; is in danger of overextending through poor planning.

Has headaches which may occur when he is unable to adjust to demands of environment; becomes emotionally excited... (This may result in illness or dizziness).

Often likes to exercise self-expression in public speaking, in dramatics and in giving reports.

IMPLICATIONS FOR TEACHER

Give frequent oral quizzes and in beginning classes, few written tests.

Since most ailments disappear when student gets into activity, provide a change of pace or activity.

Conduct such activities as short extemporaneous skits by groups of three or four on a given subject; have plays prepared outside classroom and oral reports on current events.

The Fifteen-Year-Old

Is often extreme in his attitude toward school; is enthusiastic and wholehearted or hostile, rebellious, and indifferent.

Displays intense allegiance to peers and to team.

Is stimulated by the chance to air his opinion and
CHARACTERISTICS OF CHILD

beliefs in panel discussions.

Shows indifference; speaks with soft voice; may seem lazy or tired.

Undergoes the fifteen-year-old SLUMP (a period of psychological discouragement based on confused self-criticism and physical changes).

In a rising spirit of independence may initiate conflicts between himself and teacher during this "SLUMP" period.

Wants to improve ability to study and to concentrate.

IMPLICATIONS FOR TEACHER

as current events and attitudes or showing contrasts and similarities of ideas between the two peoples.

Be aware of retiring students and help them to participate. Encourage projection of voice and personality.

Recognize this slump as a temporary situation of from four to eight weeks or longer. Make allowances.

Maintain sense of humor. Recognize attitude of rebellion against authority. Don't take rebellion personally.

Give emphasis to methods of study. Give ample time for completion of projects.

The Sixteen-and-Seventeen-Year-Olds

Are intent on becoming independent; no longer need to demand liberty and independence; are concerned with school examinations; often cover up their true feelings.

Avoid placing them in embarrassing situations. Exercise care in administration of examinations.
CHARACTERISTICS OF CHILD

Are interested in "here and now" and job to be done today; show interest in activities within adult patterns.

Begin to enjoy analyzing plays.

Are sometimes slow in maturation; need encouragement and recognition.

Are interested in how school is run.

Are most concerned now with outside activities.

Are now interested in getting better grades; frequently are motivated to better achievement by extending goals.

Are now more self-possessed; display greater self-reliance.

IMPLICATIONS FOR TEACHER

Encourage them to attend carefully-selected lecture related to language or country and films. Have them read literature in the language and investigate travel opportunities. (Advanced levels)

Analyze literature by discussing style, character, and content to develop feeling of language and shades of meaning. (Upper levels, especially level 3 on).

Arrange individual conferences to assure of capabilities.

Study governmental structure and school systems of countries.

Organize language clubs. Add incentive through displays and assembly programs. Solicit pen pals from the foreign country.

Have materials available on educational and occupational opportunities in foreign language field.

Expect students to pursue individual projects and carry out assignments with less supervision. Encourage them to take initiative in arranging conferences for remedial help.
CHARACTERISTICS OF CHILD

Show greater range of interests.

Are more tolerant of world in general; are more oriented toward the future.

Are completing the major growth cycle which began with year ten and will continue to move gradually toward maturity for another five years.

IMPLICATIONS FOR TEACHER

Play and discuss more serious music. Show and discuss art, both ancient and modern. Allow the students to give reports on science and modern advancements. Utilize team-teaching and coordinate resources with other faculty. Have guest lectures followed by discussions in foreign language. (upper levels)

Discuss differences in cultures. Set up discussions on political, economic, and social problems.

Adapt materials and procedures to the needs of individuals and to fit the gradual maturation pattern.
CULTURE

Study of a people through the foreign language can give students an intimacy that they cannot get through other disciplines, for example, history. The students get to know a people in greater detail in foreign language study than through the social studies. Foreign language students focus on the civilization of one people. Though the social studies could be limited to study of one group or country, this is generally not the case because of time limitations. The social studies, then, make a broad contribution to international understanding. The foreign languages make a specific contribution. Meaningful knowledge of the civilization of the people whose language is studied is a vital part of the foreign language sequence.1

CULTURE AND CONTEMPORARY SOCIETY2

Culture had been defined as "the total belief and behavior pattern of a language community."3 It must not be considered as limited to the arts and humanities. In any language community, the habits, manners, values, ideas and common objects comprise what can generally be considered the society's culture.

1 Peter F. Oliva, The Teaching of Foreign Languages, pp. 163-4.
2 Foreign Language Guidelines, Washington Department of Public Instruction, pp. 34-35.
3 Nelson Brooks, Language and Language Learning, p. 268.
Language, a basic element of any culture, is the principal means through which the culture can be transmitted. Language as the carrier and recorder of the culture is its most important element. So closely interwoven are the two that many expressions cannot be understood except in their cultural context. Indeed, of all the aspects of culture, language is at once the most readily definable and teachable in structural terms, and the most accurate mirror of the extent to which the speaker feels at home in the culture as a whole.

In addition to the spoken and written forms, culturally important parts of language and its physical and visual aspects, paralanguage and kinesics. Paralanguage includes the vocal qualifiers conveyed by the voice, not through words but through such elements as pitch, tone, intonation, and so on. Included in kinesics are the non-vocal body movements that play a part in communication, such as hand gestures, raised eyebrows, shoulder shrugs, pursed lips, a change in stance or the way in which people look at each other when speaking.

Humor also varies in different cultures; and the patterns of jokes, irony and whimsy are often confusing to a foreigner. Sensitivity to these differences is necessary not only for understanding the spoken language but also for appreciation of the literature.

A better understanding of cultural patterning in general is becoming available to the language teacher as a result of anthropological, sociological and psychological research. The absorption of these cultural patterns and overtones, along with acquisition of linguistic skill, must be so integrated that the learning results not in a series of memorized facts but in a true understanding of the total cultural pattern. The student of either a classical or a modern language cannot be at ease in using the language unless he "feels at

---

4Robert Lado, Linguistics Across Cultures, Chapter 6.
home in the culture."

Although culture and society may seem synonymous, there is a difference. While culture designates all the ideals and the total behavior of a people, society refers to a people bound together by a social and political order. Let us consider some examples. Some modern countries have the same cultural roots while their present day societies differ.

The cultures of ancient Greece and Rome have persisted as a living force in Western civilization and their languages are still valued as conveyers of their traditions, yet their societies no longer exist. On the other hand, the United States has the same society but varying cultures which are reflected in regional dialects and vocabularies and in differing behavior patterns.

In the study of a foreign language, familiarity with the established relationships among the people and with the present day economic and political patterns is essential to well-rounded understanding. Current publications are the most valuable aid to an understanding of the contemporary scene.

The sympathetic understanding of a foreign culture leads to acceptance of differences and cushions the cultural shock which often occurs when an individual first comes in actual contact with an entirely new way of life. In other words, the student should overcome his readiness to be irritated by the new and strange.

Understanding of another culture leads to personal enlightenment that will last long after the completion of formal language study. The student not only learns to respect the values and customs of other countries as being as valid as his own, but he also develops a more objective understanding of his own culture and a realization of the interrelationship of cultures, the contribution of other cultures, both classical and modern, to his own, and of his culture to others.
When accepting and respecting differences between cultures, the student develops an awareness of the universal quality of human problems and the basic oneness of the human race.

FORMAL CULTURE AND DEEP CULTURE

To distinguish between two different aspects of culture, the terms formal and deep are used. Formal culture refers to the products of artistic endeavor; achievements of intellectual and artistic genius; deeds of heroic valor; concepts of lofty spirit; and various modes of significant thought, genteel living, and racial vigor. These are matters of which a country or nation is fully aware and justly proud. Everyone is informed about the formal culture and is quite willing to discuss, to display, and to send examples abroad to be admired and emulated. Deep culture, on the other hand, refers to the thoughts and beliefs and actions; the concerns and hopes and worries; the personal values; the minor vanities and the half-serious superstitions; the subtle gradations of interpersonal relationships as expressed in actions and words; the day-by-day details of life as it is lived—often with little or no awareness of these details—at home and at school, at work or at play, in church and in celebrations, in childhood or manhood, in battle or in peace, in country or in city—in short, deep culture portrays what it is like to be a Russian, a Mexican, or a Japanese.

We may conclude that culture in terms of the "best" and culture in terms of the "all," though decidedly different, are actually closely interrelated. For the language learner, no full understanding of

meaning is possible without an extensive analysis of what is referred to by both the formal and the deep. The role of language is as important in one as in the other.

INSTRUCTION IN FORMAL CULTURE

Following are some of the subjects that are part of what is called formal culture:

literary landmarks
the contents of museums
musical performances
art exhibitions
ballet dancing
public addresses
holidays and parades
national shrines and monuments
churches and worship

schools and charities
business, industry, finance
military life
diplomatic and civil service
organized politics
national sports
medicine
lawmaking and legal justice

INSTRUCTION IN DEEP CULTURE

Deep culture includes such matters as:

family ties
friendships
milestones in personal life: births, weddings, funerals
bravery and cowardice
pride and self-respect

humor
gestures of:
welcome or hostility
approval or disapproval
affection or anger
courtesy or rudeness
inquiry or lack of comprehension
status
dictates of conscience
ambition, self-sacrifice, selfishness
childhood, adulthood
expressions of masculinity
expressions of femininity
choosing a wife or a husband
kindness and cruelty

voice intonations that mark:
command or invitation
surprise or indignation
pleasure or annoyance
coaxing or admiration
menace or reassurance
the grammar of courteous
or familiar address
METHODOLOGY

The ultimate goal of foreign language instruction is to prepare students to communicate with native speakers in their own language. This presupposes the development of skills in listening comprehension, speaking ability, reading, and writing as an outgrowth of integrated and simultaneous practice of these skills. In every level of foreign language learning, care should be taken to arrive at the goal of communication after each presentation and practice of new material.

The following diagram is meant to be an aid to the teacher in preparing his short and long range lesson plans.

As the student progresses to more advanced stages, there should not be a decrease in emphasis on listening and speaking skills. High proficiency in listening and speaking ability requires more than two years of study. Teachers should, therefore, encourage students to continue foreign language for longer periods.
I. Presentation Phase (comprehending, imitating, and repeating)

A. Listening

1. Initial presentation of new materials should be made orally.
   a) Students should be able to hear the basic sentences (dialog form) many times.
   b) As teachers present model several times and students repeat, correct pronunciation, normal speed, and grammatical accuracy should be maintained.
      (1) Teacher should avoid over-enunciating or over-stressing.
      (2) Model should reflect whatever contractions, linking, and so on, that a native speaker would make.
      (3) When necessary to practice individual segments or sounds, teachers should always finish by repeating them at normal speed, with correct intonation, and in context.
   c) A large percentage of class time should be spent in listening to the new language.

2. Teachers should accomplish presentation with non-verbal cues:
   a) Gestures
   b) Dramatizations
   c) Visuals.

B. Listening and Speaking

1. Student should imitate what is heard.
   a) Class in choral response
   b) Small group response
   c) Individual response

2. IMMEDIATE CORRECTION IS INDISPENSABLE.
II. Practice Phase (manipulating, expanding, and recombining)

A. Listening
1. Newly recombined materials should be presented at regular intervals.
2. Exposure to a wide variety of native speakers may be provided by means of tapes and discs.

B. Listening and Speaking
1. Listening-speaking relationship should move gradually from teacher--class to teacher--student then to student--student.
2. The following are devices which should be used in listening-speaking practice:
   a) Pattern drills
   b) Limited use of translation drills
   c) Progress to question-answer drills, guided rejoinders, expanded rejoinders (involving more than one student), directed dialog
   d) There are many games which serve as excellent devices for more freely structured practice.
3. IMMEDIATE CORRECTION IS INDISPENSABLE

C. Reading
1. Although reading is a separate skill, it is introduced as an outcome of materials presented vocally. Now-familiar vocabulary, structures, and so on, appear in new combinations.
2. Oral questioning on reading materials elicits good practice in both listening and speaking.

D. Writing
1. To begin, students copy familiar dialog lines, and so on.
2. Workbooks may be used.
3. Textbook exercises on materials introduced orally may serve for written exercises.
4. Students write from dictation based on any learned material.
III. Communication Phase and Evaluation (selecting for free response)

A. Speaking

1. Use should be made of:
   a) Personalized question and answer.*
   b) Short personalized talks, or series of statements based on material practiced.*

2. This is an ideal time for presentation of fresh visuals pertaining to subject matter as basis for free expression,*
   a) Series of pictures similar to ones used in introduction of materials.
   b) Flannel board visuals which remind students of introductory materials. Student can create his own situation on the flannel board by selecting figures he can make statements about.

B. Writing

After the student has been through the practice phase of reading and writing, and the oral procedures above, he may go through the same procedures in writing. However, assignments of this nature should be used only when there can be immediate teacher correction.

C. Evaluation

Evaluation should be based on the practice phase. See the evaluation section for ideas on testing specific skills.

(*The principle of immediate correction does not apply here. Errors are bound to be numerous; they can be noted without comment for subsequent drill. Teacher and students must accept these errors as an unavoidable part of the trial and error process.1)

B. Teaching Speaking Ability
INTERMEDIATE AND ADVANCED LEVEL

C. Teaching Reading Comprehension

I. Presentation Phase (motivating and preparing)

A. At this level of learning, new materials are based principally on reading selections.

1. Explanation of new vocabulary should be conducted, as much as possible in the foreign language.
   a) Prior to playing a tape, a few minutes will suffice to develop aural recognition of the few new words that appear on the tape.
   b) The use of synonyms, antonyms, cognates, word analysis, and definitions are ways of making the explanations.
   c) Visuals of any appropriate nature are very helpful.
   d) Narratives and short dialogs can help to introduce new vocabulary.

2. Explanation should be made of new structures and idioms through such means as:
   a) Simple paraphrasing
   b) Relating to familiar material
   c) Drawing inference from context.

3. Reading selection is presented orally by the teacher, either reading aloud to students with books closed or retelling the material in condensation. Tapes of native voices can help to give variety.

4. If reading selection has been retold in condensation, teacher then reads aloud as students follow in text.

5. In following the above procedures, the teacher may prefer to inject practice procedures at any time to check on comprehension or to give emphasis.
II. Practice Phase (fully participating)

A. The pupils will follow in the text as the teacher reads aloud. Some textbooks have taped readings which can be substituted at this point.

B. The student, led by the teacher, will repeat the material in chorus, reading from the text.

C. The students may read the selection silently. This practice may be assigned for out-of-class time.

D. Students read vocally alone or in roles.

E. Listening, speaking, and reading skills may be integrated in the following question-answer period which is based on the material presented in the reading selection.
   1. Pattern-practice drills, and so on, for structural item.
   2. Listening practice from tapes selected for subject matter similar to that of reading selection.
      a) All new related material should consist of highly interesting stories, plays, poems, and so on.
      b) Each listening exercise should be followed with a short quiz.
   3. Films may be used in the same way as tapes.

F. Writing skills may be developed as an outgrowth of the reading selection materials in the following ways:
   1. Exercises such as true-false, multiple choice, completion, and so on.
   2. Dictation of excerpts from reading selection.
   3. Textbook-designed exercises following reading selection.
III. Communication Phase and Evaluation (using and evaluating)

A. Speaking
1. Use should be made of the following:
   a) Personalized question and answer.*
   b) Short personalized talks.*
   c) Students could describe situations from visuals related to reading.*
   d) Collective summary given by several students and cued by the teacher.*
   e) Summary guided by key words written on the board.*
   f) Round of questions and answers, one pupil calling on the next—"chain reaction."
   g) A summary by dramatization, if suitable.*

B. Writing
Students may also follow the same procedures as above in writing. However, assignments of this nature should be used only when there can be prompt teacher-correction.

C. Evaluation
Evaluation should be based on the practice phase. See the evaluation Section for ideas on testing specific skills. Also see the Course of Study Framework for each language for further suggestions.

(\*The principle of immediate correction does not apply here. Errors are bound to be numerous; they can be noted without comment for subsequent drill. Teacher and students must accept these errors as an unavoidable part of the trial and error process.\)

PLANNING

Probably the most important consideration in the teacher's planning is perspective in setting and achieving goals. Fortunately there is abundant help available. Capable committees have established national goals of education. Most states have listed the goals of education considered prominent for the state. Within the state, districts have brought together competent educational leaders, administrators, counselors and teachers and the lists of national goals and of state goals have been examined and district goals have been written, tested, evaluated, and rewritten. This is generally true in every curricular offering. It is certainly true of the foreign language curriculum.

In achieving a comprehensive plan for foreign language education from the elementary school through the junior high school and senior high school to college, teachers and administrators and counselors must use certain terms with clarity. The following definitions are offered to effect a "lowest common denominator" for use in discussion:

**Level**—A level contains the amount of learning that can be achieved in an upper grade of the secondary school in classes that meet for periods comparable to five times a week for at least forty minutes a day under the direction of a teacher who is competent, by a class composed of around twenty able and willing learners.¹

**Stream (Tracks)**—The series of levels suggested for achievement with starting points in the elementary school (Stream A starting in the third or fourth grades), in the junior high school (Stream B starting in the seventh grade), or in the senior high school (Stream C starting in the ninth grade). In each stream,

---

students, parents, teachers, administrators, counselors, and the general public have every right to expect that the learning shall have been of substantial quantity and quality. (See the course of study framework for detail.)

Lesson--This word has a general meaning; i.e., something to be learned or studied, and a restricted meaning; i.e., something to be learned or practiced at one time. We suggest the word "lesson" to be used primarily for daily lessons or clarified when used in a larger sense.

Unit--Brooks² suggests that the year or semester be divided into bi-weekly periods, the work for each period constituting a unit. In general each unit begins with assignments in dialogue or reading, structure, and vocabulary and ends with a test that summarizes the work of the entire unit. In more advanced levels, a certain amount of text is assigned for each day; one or several problems of structure are assigned for the entire unit.

The two forms which follow indicate the important ingredients in a unit plan (which may extend over a longer or shorter period than the suggested average of two weeks) and in a daily lesson plan. It is suggested that full poster-sized paper (22" X 28") be used for the unit plan so there will be sufficient room to write all the ideas and considerations in each section. It is further suggested that the key words indicating the activity written in the space for each day under daily distribution on the unit plan be copied in the first column on each day's lesson outline. The behavioral objective can be stated for each activity necessitating several procedures for the teacher and several procedures for the student. Clock time is recommended so that the timing can be accomplished in a glance at the clock--no arithmetical calculations are necessary. Of course

²Ibid. p. 241.
timing must be flexible but really close to the teacher's prescription. Transitions from one activity to the other should be planned. The forms given here have been tried by many beginning and several experienced teachers and have been accepted by them with enthusiasm.

The following statement of Brooks is widely accepted:

The teacher must know how materials are made and he must have helped make them. He cannot, however, be expected to create materials for his courses as he goes along. Teaching is a full-time occupation, and so is the preparation of materials. No one can engage in both simultaneously and do justice to either. ³

ADDITIONAL SUGGESTIONS FOR PLANNING

1. Points to Consider
   
b. State objectives.  
c. MLA objectives.  
d. Test objectives.  
e. Pace of activities.  
f. Individual differences.  
g. Boredom.  
h. Cultural inserts.  
i. Use of native speakers.  
j. Use of visitors to foreign country.  
k. Techniques of testing and evaluation.  
l. Type of assignments.

³ Nelson Brooks, Language and Language Learning, p. 150.
m. Classroom decor  

n. Instruction techniques.  

p. Seating arrangement.

2. Do's for Teachers

a. Maintain lively pace.

b. Include three to four activities daily.

c. Vary approach.

d. Periodically change classroom decor.

e. Use appropriate visual aids.

f. Actively involve all students.

g. Have well-defined, long-range and daily goals.

h. Invite natives as guest speakers.

i. Indicate love of the language.

j. Relate to other subject areas.

k. Encourage departmental and district meetings for exchange of ideas and articulation purposes.

l. Plan for improving and implementing language competency.

---

m. Request necessary supplies and equipment.

n. Teach vocabulary in context.

o. Avoid literal translation.

3. More Do's for Teachers

a. Teach only a limited amount of material at any one time.

b. Use only the foreign language to communicate with students.

c. Require students to make comments and ask questions in the foreign language.

d. Teach vocabulary in context not in lists of words or with pictures.

e. Emphasize the teaching of structure as well as vocabulary.

f. Stress intonation patterns when teaching pronunciation.

g. Give constant and consistent attention to the four linguistic skills.

h. Give constant and consistent attention to the teaching of culture.

i. Complete the basic course before attempting to teach the appreciation of literature.

j. Permit students to hear frequently the language spoken at normal speed by native speakers through the use of tapes.
## UNIT PLAN

Put this outline on full-size poster paper (22" X 28") in order to have room for detailed planning.

<table>

*Suggested daily distribution of activities copied from the Unit Plan
Language teachers agree that all aspects of language learning must be practiced. This is, of course, true of reading. In addition to the regular daily lessons of levels I-VI, a program of extensive reading is highly recommended to develop a reading for pleasure skill as well as reading speed with comprehension.

SUGGESTIONS FOR PREPARING READING SELECTIONS

1. The density of new words should not exceed one new word in about every 35 running words.
2. The new words or expressions must be spaced as evenly as possible.
3. The vocabulary must be as useful as possible.
4. Words that are obvious to the student need not be counted as new words.
5. The language should be deliberately manipulated so as to set up as many inferential situations as possible.

SUGGESTIONS FOR USING EXISTING READERS

So far, only a very few contrived modern readers have been published; however, in the 1930's, following the so-called Coleman report, many publishers printed graded readers based on word frequency counts (words in print, primarily). While educators are waiting for more readers following the criteria mentioned above, these graded readers could very well be used for reading practice. They are not ideal but they can be read rather than deciphered because of extensive footnoting and the careful programming of vocabulary and structure in the readers.

The following are recommendations related to Extensive Reading:

1. Rather than buying classroom sets of twenty-five to thirty readers, especially with five grades within one book, schools or districts should purchase three to five separate readers on one grade level from five or six different publishers.
2. The individual student should read at one grade level until he can read approximately a page per minute or 250-300 words per minute. This emphasizes horizontal "reading" at one grade level rather than "deciphering" vertically through five levels.

3. The reading material should be easier than the class material; therefore, it is recommended that the student start late in level one or even wait until level two to begin reading.

4. Quantity reading with comprehension is the goal. The student should stay within one reading grade until he reads about a page a minute.

5. If a student has a reading problem in his native language, he should work on correcting this problem with a reading specialist. He should not be expected to reach the supplementary reading goal.

6. The student should report his extensive supplementary reading by (a) giving a short summary in English, (b) by answering questions in the foreign language (questions in booklet or posed by the teacher), (c) retelling parts of the story orally in the foreign language or in English, (d) taking true-false tests, (e) writing 3 X 5 resume cards, (f) discussing the story orally with the teacher and taking periodic standardized reading tests to check progress (twice a year).

7. The student should progress vertically in his extensive reading as he progresses in his direct course work. In the intermediate stages he will begin to read magazines and newspapers. Some special magazines and newspapers are available for the beginning students.

8. The course of study framework section contains lists of readers available. The materials list indicates sources for magazines and newspapers for all reading stages.

9. As the student progresses from level to level, the control exercised by the teacher relaxes and the extensive reading of the student increases until he attains liberated reading.

10. During level four the student reads more both in and out of class and the extensive and intensive reading experiences tend to merge. The teacher begins to lecture on topics requiring student reading and he involves the student in deeper discussions about reading material. The reading outside of class is an extension of the reading in class.

11. Liberated reading is the reading phase which allows the student to read anything of moderate difficulty in the library which is hopefully well stocked. At this stage a planned literature course may be offered, using the bibliographies and suggestions of the Advanced Placement Program in foreign languages. At this stage a planned course in science or social studies may be offered in the foreign language.
TEACHING CULTURE

Culture may be taught as an end in itself; it may also be taught incidentally when it is encountered in the pursuit of another objective. Since the "culture objective" of the language guide is not a separate entree to be dumped on the table, but rather the seasoning, it is not to be divorced from the teaching language, but should be presented as an integrated part of class activities. The teacher might well expose the student indirectly to culture at a time appropriate to the language experience.

I. Techniques of teaching culture include:

A. Teachers should urge the adoption of text materials which present the various cultural aspects of the people who speak the language.

B. Three effective methods of presenting culture in the class are: preamble, cultural aside, and culture capsule. Blends or variations of these methods are appropriate.

1. The preamble is a short, two or three minute talk given in the target language on a topic which may or may not be fully understood by the students. It sets the stage, provides the "foreign" atmosphere, helps the student "shift language gears," and, in general, gives the listener a sample of the language as he might hear it spoken in the country. The student should be fully aware of this purpose and should try to understand as much as possible.

2. The cultural aside is an unrehearsed, on-the-spot presentation of a cultural concept. As much as possible the target language should be used but short explanations of cultural aspects—even in English—
can be invaluable in the language experience as well as in the total cultural growth. These short explanations should, if at all possible, be given in the target language. In the first level much culture is to be taught incidentally or obliquely. A checklist of the major cultural aspects covered or to be covered should be kept by the teacher to determine whether the item has been covered, reviewed, tested, and reviewed later.

3. The cultural capsule is treated more elaborately so that the students are involved in all communication activities: understanding the spoken language, speaking it, reading it, and writing it. He is involved in the culture even further in that he sees and if possible holds and manipulates the realia or looks at the pictures of the real objects or actions. The following procedure can take one long period or, much better, a short experience each day for five or more days.

a) The teacher introduces the capsule by talking about it and showing whatever there is to show. (No more than five minutes.)

b) In the next phase the teacher asks questions about the previous presentation and supplies answers if the students cannot at least supply one word answers. Some answers should be drilled. (No more than five to seven minutes.)

c) In the third phase the teacher asks the questions and the students answer. The answers are drilled and perhaps varied slightly. (About five minutes)

d) In the fourth phase three or four students conduct
the total presentation, a short test could follow. If the students seem able to conduct the presentation readily, a new culture capsule or a wider or deeper coverage of the same capsule is in order. (No more than ten minutes)

The cultural capsules should be very simple and rather short for the first level. The procedure can be extended from five to fifteen minutes for subsequent levels or even to entire units requiring thirty to forty-five minutes a day for two weeks in the fourth or fifth levels. In these advanced levels, reading and writing could be added. Some reading and copying of resumes of the elementary cultural capsule certainly is recommended after the exclusively audio-lingual period.

C. Many language teachers have found that some library work dealing with general aspects of the culture of the people whose language is being studied is very helpful in the early weeks of the course. Such homework assignments also help the students to form good study habits for the foreign language course.

1. Journals of library reference work finding answers to questions dealing with social, political, and economic subjects and people.

2. Preparation of special reports to be given later in the course.

3. Presentation of the reports at the rate of one or two per week (not more than ten minutes per report).

D. Bulletin boards and exhibits employing authentic cultural materials can be of great value in imparting to the classroom the character of a "cultural island."
E. **Dialog** is a useful way of teaching culture because it is—or should be—a replica of the way in which people speak to each other in real life. The greater the degree of authenticity in the dialog and the greater the degree of identification the student can make with the role he assumes, the greater will be his satisfaction and success in learning.

F. **Singing** adds cultural dimensions of great significance. Since the contribution of songs is essentially cultural, it is important to select songs that are authentic and representative. Let the student know when the people actually sing the songs and what they probably think while singing.

G. **Tape recordings** of the language as actually spoken in real situations bring authentic verbal materials into the classroom. If, for example, French is the language being studied, a recording of an actual sidewalk cafe conversation might be useful.

H. **Movies** of people in real-life situations may be useful. Such movies are a source of authentic verbal and visual materials.

I. **Contemporary newspapers and journals** in the target language should be a good supplement if discriminately introduced and if problems of ordering and distribution can be successfully overcome. Such materials tend to have a special cultural and idiomatic flavor, providing a great deal of the original cultural heritage and a better understanding of the people whose language is being studied. They also afford the occasion to turn from our view of them to their view of us, thus giving the student this new perspective or conception.

J. **Role-playing** also appeals to students. The assignment of different roles to different students and the acting out of these roles in classroom discussions, encourages student...
response by dramatizing the learning situation. Opportunity may be provided for more advanced students to do special research on the cultural roles they enact. The greater the familiarity with the roles, the more effective the expression of culture through the language, and language through culture.

K. The sharing of experiences in another culture may be facilitated by the presence in the classroom of guest speakers who have had firsthand opportunities to become familiar with various phrases of it. An excellent source is the American Field Service. More broadly, contacts between teacher-student groups and local representatives of the country whose language is being studied might well be increased.

L. Use of such sources of cultural information as foreign embassies and UNESCO is also encouraged. Correspondence between students and children in the country whose language is being studied is generally highly motivating.

M. Records, films, filmstrips, slides, television and radio may likewise be programmed to advantage in the teaching of culture, and charts, maps, pictures and flashcards should—like blackboards—be standard equipment in the language classroom.

The primary objective of teaching culture is not just to impart knowledge but to develop a sympathetic understanding and appreciation even when customs and reactions are completely opposed to those typically American. Culture is not just what people do, how they live, and how they dress, but also what and how they think.
LANGUAGE CLUBS

One of the most valuable assets to a school's language program can be language clubs, especially if the basic program is a good one. Well-organized and carefully supervised language clubs can promote enthusiasm for language study and provide supplementary activities which will enhance the total program. The following outline will be a helpful guide to teachers working with language clubs.

I. ORGANIZATION

A. Officers.

A combination of elected officers and officers appointed by the teacher results in greater success.

1. Main officers.
   a) President.
   b) Vice-president.
   c) Secretary.
   d) Historian.
   e) Task committee chairman.
   f) Class representatives.

2. Sponsors.
   a) Foreign language teachers.
   b) Other interested teachers (especially native speakers).
   c) Parents of students or members of community (good source of help and support).

B. Membership.

1. All interested language students.
2. Interested non-language students (exercise caution).

C. Meetings.

1. Times (depends on the type of meeting).
   a) Before school.
   b) In part of the class period.
c) During lunch.
d) After school.
e) Evenings.

2. Frequency (depends on the type of meeting).
   a) Weekly.
   b) Monthly.
   c) Quarterly.

3. Types.
   a) Business meetings (probably only one per year).
   b) Cultural presentations weekly and monthly.
      (1) Slide-talks.
      (2) Films.
      (3) Skits.
   c) Four major parties.

II. ACTIVITIES

A. Celebrate special holidays.
   1. Christmas.
   2. Fasching, Mardi Gras, Carnival.

B. Sponsor special events.
   1. Recruiting groups in junior high school.
   2. Pre-enrollment open house.
   3. Displays.
   4. School assemblies.
   5. School activities (dances, clean-up day, etc.).
   6. Film series.
   7. AFS Program.
   8. Service projects (sub for Santa).
C. Other activities.

1. Parties with other schools.
3. Lectures.
4. Picnics.
5. Folk dancing.
6. Outings (on foot, bicycle).
7. Caroling.
8. Dinners, dances, concerts.
9. Church services.

III. INTER-LANGUAGE ACTIVITIES

A. Multi-language assemblies.
B. Foreign Language Week.
C. Party with other language clubs in school.

IV. NATIONAL FOREIGN LANGUAGE CLUBS
This checklist is designed to assist in the selection of a classroom text and accompanying enrichment materials. Administrators and teachers are admonished to select a program with at least a four year sequence and preferably six or more. Avoid the use of different programs from year to year because this results in needless expense as well as serious deficiencies or needless repetition on the part of the student.

1. Does the basic philosophy of the foreign language program agree with the district philosophy?

2. Does the program have some well-defined objectives that can be correlated with the objectives of the teacher?

3. Is the program designed to develop all the skills of communication: listening, speaking, reading, and writing? Are adequate drills and exercises provided to teach mastery of these skills?

4. Is the phonetic basis of the language presented in a linguistically sound manner?

5. Is the program organized so that the structure of the language is presented in a logical sequence, that is, from the simple to the complex and from the part to the whole?

6. Is the vocabulary realistic and authentic? Is it presented in context as opposed to word lists?

7. Is the program based on authentic culture of the language being studied?

8. Does the program provide for a smooth transition from level to level?

9. Are appropriate and sufficient enrichment materials included such as films, filmstrips, tapes, pictures, and take-home discs? Are these materials of a good quality: good photography of authentic scenes, quality recordings done by appropriate native voices, tapes and discs free of extraneous noises.

10. Is a teacher's manual provided that includes useful aids, such as drill techniques, suggested lesson plans, linguistic and pronunciation aids, suggestions for classroom activities, and aids for checking and testing student progress?

11. Is the format of the text attractive? Consider the size of the print and the number of pictures and illustrations. Does the page look cluttered? Is the book well-bound and durable?

---

12. Is English used judiciously in the text? Are comparative translations avoided?

13. In the upper levels, is the reading material selected for its appropriateness of content, length, interest, and difficulty? Is there an attempt to acquaint the student with the literature of the language?
EVALUATION OF A LANGUAGE TEXTBOOK

This is a form that has proven very helpful in checking how extensive the audio-lingual emphasis is in the text program.

I. BASIC INFORMATION

Name of Text ______________ Author(s) ________________
Publisher ______________ Authority (Author's Background and
Date of Publication __________ Qualifications)______________
First or Revised Edition ______________

II. TYPE OF TEXT - Check the items most closely resembling the text and then total the indicated points.

A. Short, natural, memorizable dialogs.
   - Long dialogs intended for reading.  
   - Long or contrived reading sections.  

B. Supplemental vocabulary introduced in context.
   - Vocabulary list with English equivalent.  

C. Grammar introduced through drills followed by a generalization.
   - Concise grammar explanation followed by pattern drills.  
   - Detailed grammar explanation followed by written exercises.  

D. Priority given to spoken language in exercises and classwork.
   - Emphasizes writing and reading about same as speaking.  
   - Primary emphasis on reading and writing.  

E. Exercises intended mainly for oral practice.
   - Pattern drills mixed with fill-in, isolated vocabulary, conjugation, translation fill-in exercises, isolated vocabulary.  

-82-
Conjugation, long translation exercises.  

F. Dialog followed with adaptation, variation drills.  
Dialog followed only with questions to be answered.  

G. Culmination drills or activities intended to stimulate conversation and free selection.  
Questions related only to content of dialog.  

15-21 Points-Audio-Lingual Text  
10-15 Points-Modified Audio-Lingual-Traditional Text  
Below 10 Points-Grammar-Translation Text

III. CULTURAL CONTENT  
A. Are dialogs and readings culturally oriented?  Yes____ No____  
B. Does it contain cultural notes or explanations?  ____ ____  
C. Does it have numerous pictures and drawings?  ____ ____  
D. Do pictures have captions only or do they include explanations?  ____ ____  
E. Does it have songs, proverbs, poems, authentic reading, etc.  ____ ____  

IV. READING AND WRITING MATERIALS  
A. Are readings artificial and contrived?  Yes____ No____  
B. Is reading heavily literary-criticism oriented?  ____ ____  
C. Does it contain contemporary literature (newspaper articles, etc.)?  ____ ____  
D. Are writing drills in context?  ____ ____  
E. Are writing drills translation?  ____ ____  

V. PROVISIONS FOR ARTICULATION  
A. Are there 2nd and 3rd level books?  Yes____ No____  
B. Are they by the same authors and progressive and integrated?  ____ ____
C. Are there gaps between levels?  

Yes [ ]  No [ ]

D. Is suitable text content for levels used?  

[ ] [ ]

VI. SUPPLEMENTARY MATERIALS

A. Teacher's manual?  

[ ] [ ]

B. Tapes - dialogs  

[ ] [ ]

drills  

[ ] [ ]
tests  

[ ] [ ]
songs  

[ ] [ ]

C. Take home record?  

[ ] [ ]

D. Workbook, writing exercises.  

[ ] [ ]

E. Specialized workbooks (cue sheets).  

[ ] [ ]

F. Visuals - films  

[ ] [ ]

filmstrips/slides  

[ ] [ ]
flash cards  

[ ] [ ]
dialog cues  

[ ] [ ]
supplementary pictures  

[ ] [ ]
test visuals  

[ ] [ ]
teacher cue cards.

EVALUATION

EVALUATING THE TOTAL FOREIGN LANGUAGE PROGRAM

In determining the effectiveness of the total foreign language program, special consideration must be given to the observable results as reflected by student learning and behavior.

CONSIDERATIONS FOR EVALUATION

I. GENERAL CONSIDERATIONS

A. Do evaluation activities measure the student's ability to use the structural units and patterns of the foreign language in valid situations?

B. Are the four basic skills--listening, speaking, reading, and writing--evaluated?

C. Is there evidence of student progress in all skills?

D. Have the instructional materials and equipment used proved efficient and adequate as teaching aids?

E. How well do teachers use testing and other forms of evaluation in analyzing the effectiveness of their teaching?

F. Does the school regard evaluation as a reciprocal process?

1. Do administrators evaluate teachers?

---

2. Do teachers evaluate students?

3. Do students and teachers evaluate themselves?

G. Does evaluation result in improved methods? Improved teaching? Improved learning? Progress?

H. Are such measures as attitude questionnaires and class visit reports and psycholinguistic devices used to assess and understand behavior-producing attitudes and motivations in foreign language learning?

II. INSTRUCTIONAL CONSIDERATIONS

A. Have the objectives of the program been clearly defined?

B. Has the course been planned in sufficient detail to provide appropriate guidelines?
   1. Do instructional methods foster development in all foreign language skills?
   2. Is there emphasis on language as communication—conversational as well as literary language?
   3. Are there opportunities to compare the students' culture with the foreign culture?

C. Is the program an integral part of the total curriculum?

D. Are materials used appropriate to the ability, maturity, and
interests of the learner?

E. Is the program sufficiently diversified and flexible to stimulate each individual to work to his maximum capacity?

F. Is there evidence that foreign language learning is applied?

1. Is the material learned enjoyed and used widely in and out of school?

2. Is there increased interest in foreign peoples cultures?

3. Is there evidence of increased international understanding as shown by such activities as follow:

   a) Use of supplementary materials (books, films, slides, tapes?)

   b) Contact with native speakers?

   c) Travel?

   d) Foreign language camps?

   e) Pen pals, tape pals?

GROUPING

I. GROUPING IS AN EVALUATIVE PROCEDURE

Grouping is an evaluative procedure although often it may not be so recognized.

---

A. It can be an extremely valuable arrangement to make foreign language more meaningful.

B. When and how to use grouping depends on the nature of the activity and upon the time available.

C. The size of the group will vary with the type of activity.

II. GROUPING IN A FOREIGN LANGUAGE CLASS PROVIDES FOR INDIVIDUAL DIFFERENCES.

A. Wide variation in background ability of the pupils requires a flexible, diversified program which challenges the abilities of all and encourages each individual to work at his maximum capacity.

B. Developing this type of program requires time, thought, and careful planning in addition to a great variety of teaching materials.

III. GROUPING OCCURS ON DIFFERENT BASES

A. Student performance level is the determining factor for setting up groups if language skills are involved.

B. Student interest in certain areas is the determining factor for setting up groups preparing cultural presentations.

TESTING

I. NATURE OF TESTING
A. In the continuous process of evaluation, testing is a periodic measurement.

B. Testing may occur in a great variety of situations—formal or informal, oral or written, group or individual.

C. Ideally, in each testing situation the instrument used and the way it is used should be designed to meet a particular need.

D. Tests must be valid measures of what has been taught.

E. Tests should be learning devices for both student and teacher.
   1. Through tests students can better realize and apply what they have learned.
   2. Tests also make teachers more aware of what they have or have not taught.

F. Testing should be an integral part of regular classwork and should be regarded as normal procedure in any foreign language class.

G. Measurements must be systematic—occurring before, during, and after a given period of instruction.

H. A basic part of the testing process is reviewing.

I. Complete, clear instructions are vital in testing.

J. Follow-up after a test is perhaps the most valuable part of the testing process.
II. PURPOSES OF TESTING

A. Testing has a wide range of purposes. It may be used:

1. To judge the potential proficiency of students.
2. To facilitate placement in courses.
3. To determine whether individuals have reached desired levels of language proficiency.
4. To measure outcomes of different approaches to language learning.
5. To measure any of the many facets of language competency.

III. TYPES OF LANGUAGE TESTS

A. Prognostic or Aptitude Testing—Prognostic or aptitude testing can be used to predict success in learning a modern foreign language. Various means of predicting success and selecting students have been used. Prognostic tests are better than intelligence tests for these purposes; however, a sample of actual work in a language class over a period of time is the best index to future language achievement. A child's achievement in fluency and acculturation will vary in degree with his native intelligence, his interest, and his ability to hear and imitate sounds.

---

Two reliable aptitude tests are:

1. Carroll-Sapon Modern Language Aptitude Test (JLAT)
The Psychological Corp.
304 East 45th Street
New York City, N. Y. 10017

2. Pimsleur Language Aptitude Battery (ninth grade to adult)
Harcourt, Brace, and World, Inc.
757 Third Avenue
New York City, N. Y. 10017

B. Achievement Testing\(^5\) -- Language learning should be evaluated at all levels, including the elementary school, in the same manner as other subjects in the curriculum. Progress in modern language skills can be determined by achievement test results and other information gathered informally. Achievement test results now indicate individual progress in listening, speaking, reading, writing, and the acquisition of cultural information. (grades six--twelve)

Two reliable achievement tests are:

1. MLA Cooperative Foreign Language Tests
Educational Testing Service
Princeton, New Jersey 08540

French, German, Italian, Russian, Spanish

\(^5\)Ibid.
2. Common Concepts Foreign Language Test  
   California Test Bureau, DelMonte Research Park  
   Monterey, California 93940  
   French, German, Spanish, English (Level I--all grades)

C. Progress Tests\(^6\)--Progress tests are usually designed to accompany a specific set of instructional materials or textbooks. Many teachers make up their own to measure progress of students. These tests may be obtained by writing to the publishers of the texts.

D. Proficiency Tests\(^7\)--The proficiency test defines a student's level of achievement in reference to a specific type of employment or instruction. It measures whether a student has mastered specific skills and content deemed prerequisites for a particular job or course of study. The placement test is the best known of these. Placement testing is becoming increasingly important in the foreign language programs of today. Even though elementary and secondary schools in Utah are not yet using tests for placement to any great extent, such tests as the following are being employed quite extensively and successfully at the college level:

1. B.Y.U. Proficiency Test  
   Brigham Young University  
   Provo, Utah 84601

\(^6\)Rebecca M. Valette, Modern Language Testing, p. 185.  
\(^7\)Ibid. p. 5
2. College Board Advanced Placement Tests
   Educational Testing Service
   Princeton, N. J. 08540
   French, German, Spanish

3. MLA Proficiency Tests for Teachers and
   Advanced Students
   Educational Testing Service
   Princeton, N. J. 08540
   French, German, Italian, Russian, Spanish

E. Informal Tests--Evaluation of pupil progress does not always require the use of lengthy formal tests. Many short tests of different types can be given daily. Such tests may do the following:

1. Provide strong motivation.
2. Serve to sharpen student interest and alertness.
3. Have psychological value because the student uses immediately what he has learned, thus reinforcing idiomatic usage by immediate correction.

IV. PRINCIPLES FOR THE CONSTRUCTION OF ACHIEVEMENT TESTS

The construction of a reliable and valid test is a difficult and time-consuming process. It requires high competence both in the subject being tested and in the techniques of test construction. Some of the new materials for modern language

---

courses come complete with unit tests; however, teachers will continue to construct a great many of their own tests. The following principles should be useful in evaluating a progress test prepared by the textbook committee or a test prepared by the classroom teacher.

A. Tests should determine what the student knows, not what the teacher knows.

B. A test must provide a learning experience by showing the student what is expected of him and by encouraging him to apply what he has learned.

C. All four skills should be tested but not simultaneously.

D. The items should represent material learned in class and the distribution should correspond to the relative importance of the skill measured and the course goals.

E. The test should require responses in keeping with normal language behavior.

F. The test writer should analyze the skills involved in the expected language behavior and test them separately as well as collectively.

G. Idioms, vocabulary, structures, and cultural items should be tested in context and should not appear as lists of facts or rules.

H. Incorrect forms should never be presented to students.

I. Test items should be in the foreign language and should require performance in the foreign language. Translation should be utilized only at advanced levels.
J. All directions should be brief and clear. At the elementary stage, directions in English are preferable. Usually a sample item and its answer are necessary.

K. When subjective evaluation is necessary, a quality scale should be used.

L. Simplicity is the key to success in testing.

V. TESTING SKILLS IN THE CLASSROOM

At all levels of instruction teachers should test only what their students have been taught and have thoroughly practiced. Different skills require different tests. Audio-lingual skills must be tested as well as visual-graphic skills.

A. Listening Skills—With the increased emphasis on spoken language, new techniques are required for testing the listening comprehension. Listening items such as the following are used to test general comprehension, common expressions, specific vocabulary, sound patterns, and sentence structure.

1. The students have a series of three or four pictures in their booklets. The teacher or the voice on the tape reads a statement in the target language. The students mark the picture which most nearly corresponds to the statement.

2. The teacher or voice on the tape asks the students to perform certain tasks in their test booklets, such as: "give the answer to simple arithmetic problems, draw a cat, put eyes in the outlines of a face, draw a square, a circle, or parts of a drawing."
3. The teacher or voice on the tape makes a statement. The students mark whether it is true or false.

4. The teacher or voice on the tape gives an incomplete statement. The meaning of the statement will be completed correctly by one of three suggested words or expressions in the target language.

5. The teacher or voice on the tape will give a short definition of a person, object, or idea without actually naming it. Three answers in the target language will be given. One of these will be selected by the students as the correct answer.

6. One voice on the tape asks a question. A second voice gives three answers. The students mark the number of the correct answer.

7. The first voice on the tape gives an answer. The second voice asks three questions. The students mark the number of the question which would elicit the answer given by the first voice.

8. The students are presented with a picture which either tells a story or describes a situation. Either the voice on the tape or the teacher describes three situations or tells three stories. One of these corresponds to the picture. The students choose the number of the correct aural description of the picture.

9. The students are told a story containing a number of specific details. They are asked to retell the story in their own words in English at the elementary level and later in the target language.

10. The students look at a picture. They then hear three
statements about the picture and indicate on their answer sheet whether the statement is true or false.

11. The students see a picture and then hear three statements about the picture. They decide which statement is true and mark the corresponding letter on their answer sheets.

12. A short, taped conversation is played for the students. They then indicate where it probably took place or who was speaking. Possible locations or personnel may be suggested in a list.

13. The voice on tape makes a statement and several rejoinders. The students select the most appropriate rejoinder and write its letter on the answer sheet.

14. Students listen to a dialogue or narrative. They then listen to or read a number of statements about the passage and indicate whether each statement is true or false.

15. Students hear a sentence read aloud which is similar to one of four written sentences and select the sentence they think they heard read. This item tests the recognition of sound symbol-written symbol correspondence.

16. Students hear a group of very similar sounds and must discriminate which sounds are similar and which sounds are different.

17. The student hears the sentence and chooses the linear pattern that depicts the intonation curve of the sentence.

Note: For more detailed information and specific examples in German, French, Spanish and Italian on testing listening

B. Speaking Skills — The testing of speaking skills is difficult because results are based on subjective appraisal. Teachers can keep a closer check on oral competency if time is set aside weekly for evaluation of each student's oral performances during the week. This represents the teacher's total impression and is recorded. Use of a tape recorder can increase objectivity. A rating scale can be used to evaluate student responses in given categories: (1) fluency, (2) pronunciation and intonation, (3) correctness—order and structure, (4) conveying the idea, and (5) use of vocabulary. Suggestions for testing speaking skills follow:

1. The student listens to an utterance and then repeats it with proper pronunciation and intonation.

2. The teacher or the voice on tape asks a series of questions about a picture to which the student records his answer.

3. The student records on tape one or two sentences describing a picture.

4. The student records on tape answers to a series of questions asked by the teacher or the voice on the tape.

5. Same as number four but a cue is provided:
   Why are you going down town?
   Cue: go shopping
   I'm going shopping.

---

6. The teacher or the voice on the tape, in English or in the target language, asks the student to give a certain command or to ask a question.

7. The student changes a question to a statement or vice-versa.

8. A series of three or four pictures telling a simple story is shown to the student who records his version of the story.

9. The student is given a short passage to read. After a quick preview he records it for later evaluation by the teacher.

10. A statement is given. The student is told to repeat the statement, providing a synonym for an indicated word.

11. The student is told to provide a suitable rejoinder for each of a series of utterances.

12. A student is told to expand an utterance by inserting a given word or phrase with the necessary changes:
    He sings.
    Cue: beautiful
    He sings beautifully.

13. The student is instructed to change an utterance or passage in one of the following ways:
    a) tense
    b) nouns to pronouns
    c) positive to negative
d) singular to plural

e) person

f) direct to indirect discourse

14. The student is directed to combine two sentences into a single sentence:

1) expressing a contrary to fact situation, or
2) using a specified conjunction, or
3) making one sentence a relative clause.

15. The student is provided with an "action picture." He is told to describe what is taking place or give an imaginary conversation.

16. A student is given a situation first in English and then in the target language. He is directed to provide appropriate dialog.

17. The student either listens to or reads a short passage and then repeats it from memory. Word cues can be provided.

Note: For more detailed information and specific examples in German, French, Spanish and Italian on testing speaking skills, the book Modern Language Testing by Rebecca M. Valette is invaluable. Harcourt, Brace, and World, Inc., 757 3rd Ave., New York, N. Y. 10017.

C. Reading Skills\textsuperscript{10}--Many techniques for testing reading involve other skills. Items such as those listed below which test

the understanding of the reading passage or utterance must use vocabulary and structures with which the student is already familiar.

1. The student reads or records the phrases or utterances flashed on a screen or found in a test booklet. (Tests recognition of graphic symbols)

2. The student hears a sentence read aloud and must select the appropriate written form of the sentence from four similar sentences provided on the test sheet. (Tests recognition of sound symbol-written symbol correspondence.)

3. A student is presented with a picture. In his test booklet will be:
   a) A series of three or four sentences one of which correctly depicts the situation in the picture.
   b) An incomplete sentence followed by three or four choices, one of which correctly completes the sentence.

4. A student is presented with two or more pictures. In his test booklet is an utterance or a statement containing a structure problem. The student chooses the picture that best fits the utterance. The pictures must be drawn so that the picture representing the correct answer differs by a minimal distinctive feature.

5. A student is presented with a series of four or more pictures, usually telling a story. In his test booklet is a series of statements to be arranged correctly to the sequence of the pictures.
6. A story of reading selection is followed by:

   a) A number of true and false statements from which the student checks the correct statements.

   b) A number of multiple choice statements from which the student checks the correct items.

   c) A statement or series of statements based on the reading selection. The student checks those which can be correctly inferred from the passage.

7. A definition or description of a person, place, thing, situation, or concept is given. Each of these is followed by a number of choices from which the student selects the item defined or described.

8. A written statement is followed by three or four choices also in the target language, one of which is the equivalent of the underlined word or phrase in the statement. The student selects the correct equivalent.

9. A written statement in English is followed by three or four written statements in the target language, one of which is the equivalent of the English statement. This is best used for idiomatic expressions and in advanced levels. It should be used sparingly.

Note: For more detailed information and specific examples in German, French, Spanish, and Italian on testing the reading skills, the book Modern Language Testing by Rebecca M. Valette is invaluable. Harcourt, Brace, and World, Inc., 757 3rd Ave., New York, N.Y. 10017.

D. Writing Skills

   In testing the writing skills, the teacher...
evaluates a student's ability to transfer sound into written symbols, to spell, and to manipulate the grammar as well as the vocabulary of the language. The question or stimulus at the beginning level should be carefully formulated in order to elicit the required, controlled response. At the intermediate and advanced levels items should call for freer responses. The items below suggest specific ways to test writing skills.

1. The student copies simple utterances with attention also paid to punctuation and diacritical marks used in the language.

2. A dialogue or text without any punctuation, capitalization, or paragraphing is given. The student rewrites the text with correct capitalization, punctuation, and paragraphing.

3. The student copies an utterance in which he is requested to make a specified or free change of an item.
   - Specified: I saw the child playing.
   - Cue: two
   - Response: I saw two children playing.
   - Free: I saw the child playing.
   I saw the cat playing.

4. The student completes a statement in accordance with the meaning suggested by a picture.
   - John is eating.
   - Cue: picture of an apple.
   - John is eating an apple.

5. An utterance or statement is flashed on the screen. The student writes it after the projected version disappears.

6. The student writes answers to questions, rejoinders to given utterances, or restatements of written statements.
7. The student may be asked to carry out one of the following:

   a) Change a story from one person to another or from one tense to another.

8. Change the form of a story from a dialogue to a narrative or vice versa.

9. Write a sentence using the same structural pattern of the model sentence but using a different vocabulary.
   
   Model: The person whom he saw was John.
   
   Response: The hat which he disliked was imported.

10. The student is provided with a passage which has a number of words missing. The student is to recognize which words are to be added and write them in the proper blanks. (Note: If desired, a glossary of terms may be provided, first letter cues given or kind of word specified, noun, or pronoun.)

11. The student is provided with word cues. Using them he writes a sentence, paragraph, or dialogue. Example:
   
   Cue: means/know/do/i/not/what/it/
   
   Response: I do not know what it means.

12. The student listens twice to a short passage of familiar situational and linguistic material. Several questions follow and the student writes his answers. This item also tests listening comprehension.

13. The student writes a directed composition from an outline in English or in the target language.

14. The student summarizes a story or paragraph by utilizing the expressions of the particular passage. At the
advanced level the student may use his own words and expressions.

15. The students are instructed to recreate a story read aloud by the teacher or a voice on tape.

16. The students fill in the blanks in a spot dictation. The student sees: I like --- girl. He hears: I like the girl. He writes: the

17. Dictation can be used to test spelling, recognition of the forms of words, and some problems of inflection.

18. The teacher draws a series of symbols. The student writes what the symbols represent.

19. The teacher gives a topic sentence and a final sentence. The student writes what goes between the two.

Note: For more detailed information and specific examples in German, French, Spanish, and Italian on testing writing skills, the book Modern Language Testing by Rebecca M. Valette is invaluable. Harcourt, Brace, and World, Inc., 757 3rd Ave., New York, N.Y. 10017.

VI. TESTING CULTURAL INFORMATION

Studying the culture of a nation in terms of its contributions to the arts, crafts, literature, social institutions, and science is an important objective in the study of a modern language. Such knowledge can be tested in various ways with little

difficulty. (Cultural tests may be obtained from Educational Testing Services, Princeton, New Jersey.) One aspect of culture not exploited in testing until recently is the structural system or patterned behavior--the way of life of a people rather than their level of cultural refinement. The following are some samples which a teacher could use as an incentive to develop his own tests (in English or the foreign language) if he has a good knowledge of the patterns of behavior in the foreign culture as compared with his own.

A. The bright rays of the sun glisten on the snow and filter through the huge windows. In the center of the great hall in the Kremlin stands a huge fir tree beautifully decorated with ornaments and sweets of all kinds. Hundreds of children dressed in their holiday finery form a huge circle and sing and dance around the tree. The room is piled high with gift packages which jolly Grandfather Frost will share with the children during the course of the celebration. The time of this celebration is:

1. January 1
2. December 25
3. January 6
4. November 7
5. February 2

(Number 1 is the correct answer.)

B. You are in a small village twenty-five miles outside of a large industrial city in Germany. Which of these situations are normal occurrences without special meaning?
You visit a family and find the following incidents taking place between 6 and 8:30 on a Monday morning:

1. One member of the family catches the school bus to go to the Wissentschaftliche Mittelschule in the city.

2. One member takes the bus to go to the large automobile factory outside the city.

3. One member gets into the family Volkswagen to go to the city to do some shopping.

4. One member of the family milks the cow and takes care of the farm chores.

5. One member is still eating a breakfast of orange juice, toast, ham and eggs, and coffee.

(Numbers 2, 3, and 4 are normal occurrences.)

C. University students are sitting in the large hall listening to a lecture being given by a professor. They are stamping their feet:

1. To show disagreement.

2. To show enthusiastic approval.

3. To show impatience because the professor is lecturing overtime.

4. To show discomfort because the classroom is cold.

5. Because it is the custom to do this at the end of a lecture.
(Number 2 is the best possible answer.)

D. You are in a cafe in Spain and you wish to call the waiter to indicate that you have changed your mind and you wish to order something else. You would:

1. Clap your hands above your head.

2. Snap your fingers.

3. Try to catch the waiter's eye.

4. Stand up.

(Number 1 is the most appropriate answer--2 is also acceptable.)
Audiovisual aids, electro-mechanical teaching aids, and electronic equipment are often overlooked and their helpful results not realized. It is impossible to present herewith all the electronic, mechanical, and audiovisual equipment, as advances in technological innovations are so rapid.

I. THERE HAS BEEN A GENERAL ACCEPTANCE OF THE LANGUAGE LABORATORY AS A VALUABLE TEACHING AID.

A. General Considerations

1. The type of installation must be determined by the needs of the foreign language program. No one system is suitable for all programs. The type of laboratory should be decided by the teacher, administrator, and language supervisor.

2. Laboratory work is as effective as the teacher's ability to create a positive attitude in the students. Emphasize the value of laboratory practice.

3. Reinforcement is the main benefit derived from laboratory use. Self-instructional benefit is, likewise, important although relatively new in concept.

4. Laboratory work must be closely integrated in the program.

a) The language laboratory is not the place to introduce new materials.

b) The laboratory is not a substitute for the teacher. The live voice is indispensable as the model. Expression is not limited to sound. Facial and body expression require face to face presentation.

5. The quality of student performance is a measure of the effectiveness of the laboratory.

a) Laboratory work must be continually monitored and constructive criticism administered. Encourage student to strive for the goal of perfection.

b) Students must realize that the laboratory instructor is present and able to give assistance.

c) Student attention and participation must be maintained. Programs should be interrupted when the laboratory instructor converses with the student.

B. Laboratories--To be a useful teaching device, the language laboratory must be suited to the individual needs of the foreign language program. There is no one system suitable for all programs. The competitive nature of commercial enterprises with electronic advancements have brought many innovations. To operate efficiently, a language laboratory should provide total or partial self-instructional functions. Again it must be emphasized that the language laboratory is a TEACHING AID and not a TEACHER SUBSTITUTE. When used properly, the language laboratory requires more teacher time and effort, yet the results in terms of linguistic progress are so gratifying that the project is well worth the effort.
1. Types of Laboratories

<table>
<thead>
<tr>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>a)</strong> The laboratory-equipped (electronic) classroom, with or without booths, has up-to-date audiovisual equipment which is located for teacher convenience. Each student position has a headset with individual volume control.</td>
</tr>
<tr>
<td><strong>b)</strong> The listening room is located in the library, lounge, or other available space. Tapes should be made accessible for checkout. By using earphones and tape recorders, students may listen to lessons without disturbing others.</td>
</tr>
<tr>
<td><strong>c)</strong> This is a separate room which serves as a place where students may do homework assignments, drill, review, take oral comprehension examinations, prepare and record oral composition and pursue individual projects.</td>
</tr>
<tr>
<td><strong>d)</strong> Double decker bus converted to a language laboratory and classroom</td>
</tr>
</tbody>
</table>

---

3."Rolling Laboratory" Hawaiian Language Teacher, Vol. 6, No. 2, Hawaii Association of Language Teachers, March 1965, p.11.
may travel from school to school.

e) The drill room4  e) Small group studios are equipped with a wide range loud-speaker fed from a central control and are used for live voice drills, pronunciation or substitution exercises.

f) Convertible classroom  f) A standard classroom can be turned into a complete laboratory by simply raising the tops of the desks to create partitions. Lab equipment is stored under the lids. (Stromberg Carlson)

g) Listening corner  g) Listening stations are set up in the corner of the classroom.

h) Tri-phonie listening table  h) Listening stations are set up in the corner of the classroom.

i) Dialogue system  i) Laboratory consists of individual booths with volume and microphone control, and a telephone-type dial. In addition to the console tape banks, any number of banks may be installed in a separate

2. Laboratory auxiliary equipment

a) Tape duplicators and erasers

A time-saving device for duplicating tapes at high speeds. Bulk erasers, kept in an area separate from tape libraries, expedite handling of tapes.

b) Transistorized phonograph

A unique piece of equipment. The record can be stopped dead in its track by means of a pause switch, then restarted at exactly the same point with no distortion.

c) Accoustical control headset

Allows direct transmission of student speech to student's ears. This is accomplished by an accoustical tube passing in front of the student's mouth and wireless laboratory

Transistorized headsets receive from a peripheral antenna. The headsets may be used anywhere in the room.

room controlled by the dial system. Parallel-track banks provide flexibility. Many other innovations in laboratory flexibility are possible, such as home telephone connections.
from earphone to earphone. The elements in the earphone serve as a transceiver for student-instructor communication.

3. Advantages of the language laboratory

a) Provides opportunity for students to hear a variety of native voices.

b) Provides good, consistent models for student imitation.
   (1) Free from conversational distractions.
   (2) Undisturbed by outside distractions.

c) Assumes the burden of sufficient repetition.
   (1) Frees teacher to concentrate on individuals.
   (2) Speeds up learning process through controlled repetition.

d) Provides in some instances record and playback for students to hear their own voices.

e) Allows for mass audio and oral testing.

f) Permits individual remedial and accelerated work.

g) Provides cultural enrichment and broadening of concepts.

h) Provides opportunity to practice aloud simultaneously yet individually. With 30 students, 29 are not idle while one is busy.
i) Affords isolation and complete concentration.

4. Guarding against possible disadvantages of the language laboratory.

   a) Its mechanical failure, functional difficulties, repair, and general maintenance are a problem unless equipment is carefully chosen and has a good warranty.
   
   b) It can become boring, tedious, and monotonous to the students unless they are motivated to the purpose of the laboratory.
   
   c) It requires supervision and pre-class preparation by the teacher.
   
   d) It is time consuming but the rewards are commensurate.
   
   e) It can become a place for the student to play and waste time unless carefully supervised.

5. Location of the language laboratory—in order to minimize background noise the lab should be located:

   a) Away from outside noises like traffic, playground, industry.
   
   b) Away from inside noises such as gyms, vocational areas, music rooms, and halls with heavy student traffic.
   
   c) Within the area of the centralized foreign language classrooms with easy access to them.
   
   d) In a proper area large enough to provide for:
(1) Desired type installation.
(2) Expansion of facilities.
(3) Adequate and safe electrical wiring.
(4) Acoustical excellence.
(5) Storage facilities.
(6) Equipment storage and functional areas.
(7) A projection screen a suitable minimum distance from the first row.
(8) Aisles to allow the teacher to circulate.
(9) Ventilation and other good environmental conditions.

6. Scheduling groups in the language laboratory.
   a) Large classes or small groups or individuals may be scheduled simultaneously and on a daily or alternating basis.
   b) Since twenty minutes is the optimum, two or three groups may be scheduled during a single class period.
   c) A particular section of the laboratory may be reserved for individual laboratory work.
   d) More laboratory time should be scheduled for first and second level than for advanced levels.
7. Evaluating student progress in the laboratory.

a) Pronunciation, intonation, fluency and grammatical structure may be tested by recording and playback or spot checked by the teacher during a laboratory session.

b) Because of the subjective element in evaluation, the teacher should set up a scoring system which will measure the student's ability according to his progress and achievement as objectively as possible.

8. Hints for successful laboratory operation.

a) Content of tapes:

(1) What the student hears must be closely related to what has been taught in the classroom. Most textbooks have accompanying tapes with excellent drills, narratives, etc. However, the teacher may want to add a variety of tapes containing structure drills, reinforcement drills and listening comprehension drills in addition to the basic course program.

(2) Authentic, well-timed, interesting models must be presented.

(3) Exercises involving the use of all the language skills in appropriate sequence and with appropriate emphasis should be available.

b) Preparation of tapes.

(1) Question and answer drills, completion exercises, and substitution drills are all followed
by immediate reinforcement.

(2) Tape length should be up to ten minutes, then rewind and replay if desired because pseudo-communication with a machine is fatiguing and boring.

(3) Four and six-phase drills are usually presented on the tapes in the following sequence: In a flowing tempo a sequence is spoken on the tape, a pause ensues in which the student responds, then the correct response is given on the tape, finally allowing student reinforced response.

(4) Make tapes from prepared scripts and demand a fluent situational presentation.

(5) Expedite tape duplication through various time-saving techniques.

c) Tape library.

(1) Paint a diagonal line across the sequentially-arranged tape boxes. Tapes are replaced in order by sight.

(2) Different colored boxes and tapeleader help to differentiate levels and languages.

(3) Use duplicated sets of tapes for check-out and console use; keep the master set out of circulation.

d) Maintenance—careful orientation of the student to proper use of laboratory equipment can prevent many maintenance problems. The teacher must know the functions,
mechanics and potential of the laboratory and be able to diagnose and correct simple difficulties. Never attempt technical repair, but call a customer engineer.

II. RELATED TO AUDIOVISUAL AIDS AND LABORATORIES ARE TECHNOLOGICAL ADVANCES IN EDUCATION.

Though these innovations are often financially prohibitive or overwhelming at first impression, teachers should be familiar with all innovations.

A. Computer-assisted instruction--A program, making provisions for as many probable circumstances as possible, is stored into the computer storage. Programming is accomplished with a course writer which transposes the teacher-written program into machine language, eliminating the need of specialized programs. Through student-initiated use of TV and audio devices the sequential program is followed. Upon student response with a light pen or keyboard answer, the computer supplies the next appropriate step. The computer system, a tutorial approach, assures sequential progression, flexibility, and an unbiased medium, thus eliminating frustration and other psychological implications. Most school districts can ill afford elaborate electronic systems but smaller equipment is available.

Experiments from the large district cooperative system to the individual plant efforts have been underway for several years in some states. Operations including registration to computer-assisted instruction are being successfully serviced. Many companies, including General Electric, IBM, and Burroughs, are announcing innovations. The IBM 1500, announced in 1966, is able to accommodate an essentially complete program in
language. Despite the advances and their availability to the teacher, there is no substitute for the prepared efficient teacher, the basis for any total program.

B. **Educational TV**—Each teacher in the district elects the AM or PM viewing of a 15-minute program. A follow-up by the classroom teacher is essential. Employing all audiovisual aids, the program lends itself to animation of even still pictures and captures the students' interests.

C. **Closed Circuit TV**—The teacher controls the recording from the studio set. All aids and other media are correlated with the natural flow of teacher presentation. Contact with the studio teacher may be maintained in the receiving classrooms by the monitors, resulting in immediate clarification of difficult concepts.

D. **Dial-a-course Study Center**—Central control consists of sound tape banks and video tape recorders. The student dials the program desired and sees the teacher or demonstrations on an 8" viewscreen. The instructor has the prerogative to over-ride student operation of the controls for sequential progress. Optimal flexibility provides 10-15 video chains and 1000 sound tape lessons.

E. **Multi-Program-Lingua-Dial**—This lets teacher and/or students select by means of a dial, hundreds of different program inputs. The system may use tape or audiovisual equipment. A special application is for "at home" students who may dial programmed lessons through telephone equipment plugged into the system.

F. **Telephone**—Answering service (electronic secretary) may be used as practice recordings. Cost is not prohibitive. (Ship's Jewelry, Provo, Utah)
III. OTHER TEACHING AIDS

A. **Record Player**--One of the least expensive mechanical aids, the record player is simple to operate and easy to move. Most texts have accompanying records for listening comprehension and widening of cultural knowledge and experience.

B. **Tape Recorder**--This machine has the advantage over the record player in that it can be used again and again without noticeable wear or irreparable breakage.

C. **Movie Projector**--There are many good films with foreign language sound tracks which make it possible to enrich the cultural content of the language course and give the class opportunities to hear the language spoken in native situations. Many new programs of instruction demand use of the movie projector as an integral part of presentation.

D. **Overhead Projector**--The creative and imaginative teacher uses the overhead projector to good advantage. Visual materials and variations of cultural and structural designs and writing may be projected above and behind the teacher so the teacher faces the class. The visuals are on acetate and may be designed as individual pictures or overlays. Use grease pen for drawing on the acetate.

E. **Filmstrip and Slide Projectors**--There are fine filmstrips as well as commercial 35mm slides available for integrated programs and cultural background. There are accompanying scripts, tapes and records for many programs. Personal slides of patrons and students who have travelled in the country provide interest and motivation.

F. **Opaque Projector**--This machine will project images from opaque materials such as maps, photos, texts, newspapers, magazines, and written materials. Illustrations make concepts more
meaningful. The machine is valuable for teacher and student demonstrations.

G. **Television**--Many programs are being initiated to help the teacher in the presentation of language materials. See section on innovations for further information on educational and closed circuit television.

H. **Video-Tape Equipment**--This device can be used to turn the classroom into a television studio to produce your own program.

I. **Commercial Theaters**--Worthwhile films in the target language are often shown in the vicinity of the school. Plan a group trip sponsored by the school, with parents to help, or encourage your students to plan to attend these selections.

J. **Teaching Machines**--Programmed instructional materials have been produced for manual teaching machines although this concept is better suited to electronic machines for greater flexibility.

K. **Flannel Board**--Here is a device which is certainly not new but which the creative teacher can use effectively to illustrate a dialogue situation, to present a story for audio comprehension, and to encourage participation.

L. **Bulletin Board**--The classroom should be a "cultural island." Even though sometimes it may seem that there is just not enough time to create a display, this means of communicating information to students is one of the best. Pictures and articles of the country whose language is being studied bring life into the classroom. Student participation should be encouraged in this effort.
M. Radio--A very valuable aid to language learning is the short-wave broadcast from foreign lands. Encourage students to record, if possible, radio conversations, newscasts, and commercials.

Special Note: An excellent aid in establishing a language laboratory, obtaining a tape library, using the laboratory for testing purposes, for orienting student and teacher to the use of laboratory equipment and for learning about proper maintenance of the laboratory is the series of films Successful Use of the Language Laboratory and the accompanying guide.

EVALUATION AND TESTING

Definitions of Types of Tests listed here: (Source--Valette)

Achievement Test--measures student's control of the language, not based on content of a particular course of instruction. This test is prepared by an outside group of examiners and has been carefully pre-tested and standardized.

Prognostic-Aptitude Test--provides a statistical indication of a student's probable success in a given area of study.

Proficiency Test--defines a student's level of achievement in reference to a specific type of instruction (or employment).

SOURCE MATERIALS

This section is designed to provide the teacher with a source of materials that will aid him in the classroom. The teacher who effectively employs audiovisual aids, music, and creative ideas can give his students a genuine feeling of being immersed in the culture. Such enrichment materials give added life and vitality to a foreign language program.

In order to have a more complete list of materials, it is highly recommended that every teacher obtain the following publications to be used with this guide:

2. *MLA Selective List of Materials for Use by Teachers of Modern Foreign Languages*, MLA-ACTFL Materials Center, 62 Fifth Avenue, New York, New York 10011. 1962, 168 pp. $1.00 -- 1964 Supplements $1.00
3. Source Materials for Teachers of Foreign Languages, Department of Foreign Languages, National Education Association, 1201 16th Street, N.W., Washington, D.C. 20036

FLES teachers will find excellent suggestions on source materials in the book, Foreign Languages and the Elementary School Child, by Mildred R. Donoghue. (See Bibliography)

Secondary teachers will find the book, Teaching Foreign Languages, by Frank M. Grittner to be an invaluable reference. (See Bibliography)

In selecting a basic text the teacher is referred to the Utah State Board of Education's publication on textbook adoptions. Those texts have been approved by the State Textbook Adoption Commission. It is suggested that the teacher also refer to the page called "Textbook Selection" in the Foreign Language Guide.

For further annotations of materials in this guide, consult the three publications recommended on this page.

Information in this guide is listed under the following headings:

Audiovisual Sources
Bibliography--Professional References
Cultural Aids from Travel and Information Service
Evaluation and Testing Materials
Foreign Language Journals
Foreign Language Periodicals--Newsletters included
Learning Activity Aids
Resources and Supplementary Information--Handbooks, Guides
Sources of Catalogs

* * *

Bibliographies are almost out of date before they can be recorded; therefore, the committee recommends to all who use this guide that the bibliographies published in The Foreign Language Annals, under the sponsorship of the American Council on the Teaching of Foreign Languages (ACTFL), be consulted. The accessions of the Educational Resources Information Center (ERIC) will also be listed in the Foreign Language Annals.
COURSE OF STUDY FRAMEWORK - FRENCH

A course of study framework is essential to a coordinated or integrated program of instruction in foreign language. Provisions must be made for a broad, general framework which will give direction and provide the basic structure within which the foreign language teachers, under the direction of the district foreign language supervisor, will formulate their district or individual course work and teaching activities.

A course of study framework is one of the basic requirements to an articulated program of instruction because it establishes the "road map" which will enable the teacher to plot a course that has purpose and covers all essential elements. It helps to prevent the practice of wandering hither and thither without direction. A course of study framework will insure that the student achieves fundamental skills and acquires basic information prescribed by specialists as he ascends the foreign language ladder of development.

The six essentials of a well-articulated program of instruction in foreign language are:

1. A statement of objectives.
2. Qualified direction and supervision from the district office.
3. Teachers who are professionally prepared in content and methodology.
4. Adequate materials and equipment for instruction.
5. Content or subject matter that has been described with clarity and precision from the simple to the complex level of language learning.
6. Evaluation, including systematic measurement of student performance.

As an aid to articulation of foreign language instruction, the following definition of a level of foreign language instruction is provided:

A level is a segment of language learning in which specific skills and information are prescribed for sequential acquisition by the student. The skills and learning to be acquired must be delineated. The constant element is the prescribed material to be learned; the variable elements are the learner, his maturation, capacity, experience, and motivation; the teacher, his preparation, experience, personality, and motivation; and the time (allotment or interval) required to master the material to be learned.

"The boundaries between successive levels must be recognized as somewhat arbitrary, since the learning of a language is in a sense continuous and unending. However, it is possible to specify approximately what should be achieved by the end of each level. This achievement can neither be described nor tested in terms of the amount of time the learner has spent..."
A. They bring into focus the major course objectives.

B. They correspond, item by item, to the "Skills and Content" tables for each year (or level) of language study.

C. This format enables the curriculum planner to see how the course of study for a given year relates to the long-range objectives.

II. THE VERTICAL COLUMNS

In the vertical columns of this section an attempt has been made to identify those sounds, grammatical forms and word order arrangements which the American youngster must master in order to communicate in the French language. Special emphasis has been given to the points of difficulty invariably encountered by the student of French whose native language is English. Points of pronunciation, grammar, and word order which are closely parallel to English are easy to learn and, therefore, not mentioned.

In the vocabulary section it is clearly not possible to list all available words. That is the province of the lexicographer. However, it is possible to identify categories of vocabulary which must be learned if minimal communication is to take place.

Similarly with culture only areas which the student is likely to encounter and those which are appropriate to his age and maturity can be dealt with.

III. THE HORIZONTAL "SKILLS AND CONCEPTS" LIST

Reading horizontally, one can identify the learning problems which are unique to each skill. Clearly there are some items which are essential for all skills. On the other hand, there are items which have pertinence with only one of the skills. Teaching emphasis must reflect this fact. For example, inverted word order presents minimum difficulty in reading, but it is of crucial importance in the active skill of speaking. Other items, such as literary vocabulary and certain subjunctive forms, need only be learned for reading recognition.

It was agreed that the mastery of the four skills must be accompanied by a grasp of certain basic generalizations and concepts. These are listed in the bottom row of the table.

It should be noted that two separate sequences of study are listed. The longer sequence presumes six full sequential years of contact with the language. The shorter sequence may consist of four full sequential years or the equivalent number of contact hours distributed over a greater number of years in any one of many patterns of scheduling.
in class or the number of pages he has 'covered' in the textbook."

The basic language activities, skills, and content have been described on four levels or six grades of achievement from the simple to the complex. It is suggested that the teacher read all components of a level in order to get a more complete view of what is incorporated in each level.

Teachers are reminded again that the concept statements presented in this Framework are brief. It is suggested that school districts organize committees of language teachers and give them the responsibility of expanding and extending the content activities and subject matter described in this Framework. It is also suggested that the Utah Foreign Language Guide be consulted and used to assist in the process of expanding the Utah Course of Study Framework.

The Course of Study Framework for Foreign Languages and the Utah Foreign Language Guide provide criteria for the selection of textbooks. The Framework may be used to check the content of a textbook at a specific level, while the Guide may be used to evaluate the methodology proposed in a particular text.

Districts are urged to use this framework as a guide in setting up a district course of study in terms of their own textbook and school programs. The skill and content tables as presented here will have to be adapted to the actual program of the district. Three possible programs are shown below as examples.

## Four-year Sequence Level I

<table>
<thead>
<tr>
<th>Vocabulary</th>
<th>Culture</th>
</tr>
</thead>
<tbody>
<tr>
<td>800-1,000 words and expressions</td>
<td><strong>Introduction to French culture</strong> should be <em>an integral and natural part of teaching French</em> but <em>should not take the place</em> of teaching the language. The environment of the classroom, French books, magazines, tapes, films, records, and pictures should stimulate the students' interest in learning about the following cultural items: French names, forms of address, courtesy patterns, French school day and school year, 24-hour clock, French houses, some typical foods and table manners, French holidays, especially Christmas, Easter, rhymes, songs and music.</td>
</tr>
<tr>
<td>500 words and expressions</td>
<td>Nouns, verbs, adjectives, adverbs pertaining to these subjects as well as function words such as <em>et, au, mais</em>.</td>
</tr>
<tr>
<td>1,000-1,200 words and expressions</td>
<td>Emphasis should be placed on <em>concrete, descriptive vocabulary connected with reality familiar to the students.</em></td>
</tr>
<tr>
<td>500 words and expressions</td>
<td>Cultural items are an integral part of a language. In listening to or reading the language, one must be aware of the nuances of cultural forms. To speak or write the language correctly also means to use culturally acceptable forms.</td>
</tr>
</tbody>
</table>

In spoken and written form, words make up a language. To communicate in that language, one must grasp the meaning, isolated or in context, *without conscious reference to English.*
## Four-year Sequence Level II

<table>
<thead>
<tr>
<th>Phonology</th>
<th>Morphology</th>
<th>Syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Further work towards the mastery of sounds, especially those that differ most from English: r, u, etc. Rhythm and melody of sentences</td>
<td>Prepositions and adverbs, esp. with geographic names Personal pronouns, indirect object, y, en Indefinite pronouns and adject. personne, rien, tout, quelqu’un, etc. Compound pronouns with même Verbs: imperfect, pluperfect More irreg. verbs: Venir de, être en train de, Il faut plus infinie. Relative pronouns, qui, que, ce qui, ce que Adverbs of quantity, très, beaucoup, un peu, etc. Position of personal pronouns when 2 in sentence Position of negative particle ne ... pas, ne ... rien with auxiliary verb Verb construction (direct or indirect object, or infinitive with or without preposition such as demander à) Causative faire and verbs of perception Construction: Si + present, with future in main clause Various ways of expressing possession à moi, mon livre Patterns: C’est ... qui, C’est que, moi aussi, moi non plus Position of adverbs, esp. beaucoup, assez, etc.</td>
<td>Position of personal pronouns when 2 in sentence Position of negative particle ne ... pas, ne ... rien with auxiliary verb Verb construction (direct or indirect object, or infinitive with or without preposition such as demander à) Causative faire and verbs of perception Construction: Si + present, with future in main clause Various ways of expressing possession à moi, mon livre Patterns: C’est ... qui, C’est que, moi aussi, moi non plus Position of adverbs, esp. beaucoup, assez, etc.</td>
</tr>
</tbody>
</table>

| Same as above | Same as above | Same as above |

| Association of all French sounds with the right orthographic representations Cognates Homonyms (real and deceptive) Technique in word attack Accent and syllabication Rhythm and melody of sentences | Students should begin to express simple ideas, using correct verb forms for the present, future, passé composé, and imperfect. | Students should be able to express simple ideas, using appropriate word order in directed composition. |

| Association of all French sounds with the right orthographic representations with particular emphasis on mute letters and groups of letters Homonyms Capitalization of adjectives used as nouns and denoting nationality or city | Tense functions often differ in French and English. There are many more verb endings in French than in English, and there are more irregular verbs. The range of meaning of prepositions differs in French and in English. | Direct and indirect objects have other position as nouns than as pronouns. Complex and rigid word order in negative patterns with various particles. |

| French pronunciation requires clearer enunciation, more articulation, and more tension sustained with lips rather than with breath, which has less force. | | |

</tr>
<tr>
<td></td>
<td>rhymes</td>
</tr>
<tr>
<td></td>
<td>songs and music</td>
</tr>
<tr>
<td><strong>500 words and expressions</strong></td>
<td>The units of vocabulary are obviously linked closely to the study of culture. As much of this as possible is done in French.</td>
</tr>
<tr>
<td><em><em>800</em> words and expressions</em>*</td>
<td>Cultural items are an integral part of a language. In listening to or reading the language, one must be aware of the nuances of cultural forms. To speak or write the language correctly also means to use culturally acceptable forms.</td>
</tr>
<tr>
<td><em><em>500</em> words and expressions</em>*</td>
<td></td>
</tr>
<tr>
<td><em>These figures are a maximum and should only be regarded as an indication.</em></td>
<td></td>
</tr>
</tbody>
</table>

In spoken and written form, words make up a language. To communicate in that language one must grasp their meaning, isolated or in context, without conscious reference to English.
<table>
<thead>
<tr>
<th>Phonology</th>
<th>Morphology</th>
<th>Syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Further work toward the mastery of sounds, especially those that differ radically from English ones, r, u, etc. Rhythm and melody of sentences</td>
<td>Prepositions and adverbs, place, manner, time Personal pronouns, esp. on Verbs imperfect, future and immediate future of regular verbs most common irregular verbs Reflexive verbs Pronouns, demonstrative, possessive, esp. le mien, le tien, le vôtre, reflexive, interrogative quoi Irregular forms of nouns and adjectives</td>
<td>Various expressions for possession Indirect style requiring only change in subject and not in mood of verb Si answer to negative question Pattern moi aussi, moi non plus</td>
</tr>
<tr>
<td>Further work toward the mastery of sounds, intonation, and stress</td>
<td>Association of all French sounds with the right orthographic representations with emphasis on irregularities Cognates Homonyms (real and deceptive) Foreign words Silent letters and silent groups Accent and syllabication Rhythm and melody of sentences</td>
<td>Recognition of indirect and stressed forms of personal pronouns</td>
</tr>
<tr>
<td></td>
<td>Adjectives denoting nationality or city are not capitalized unless they are used as nouns. Association of all French sounds with the right orthographic representations</td>
<td></td>
</tr>
<tr>
<td></td>
<td>French pronunciation is more careful than English pronunciation (articulation more sustained). Foreign words are generally pronounced according to French system of sounds and graphic representation.</td>
<td>Tense functions often differ in French and English. There are many more verb endings in French than in English, and there are more irregular verbs. The range of meaning of prepositions also differs in French and in English.</td>
</tr>
</tbody>

<td>holidays</td>
</tr>
<tr>
<td></td>
<td>fairy tales graded</td>
</tr>
<tr>
<td></td>
<td>legends versions</td>
</tr>
</tbody>
</table>

Vocabulary should include functional words and *idioms* in current use.

The aim should be toward a useful, active vocabulary practiced in a variety of situations rather than toward a large number of words memorized in isolation.

*Pay particular attention to cognates (false and true).*

| **800**              | Visual and audio stimuli as well as the topics of vocabulary should suggest the following cultural items for study at this level: |
| words and expressions| forms of letters                |
| above grade 7        | French restaurants              |
|                      | places in a French city         |
|                      | France: landscape in regions    |
|                      | main rivers                     |
|                      | main cities                     |
|                      | holidays, festivals             |
|                      | legends                         |
|                      | folklore                        |
|                      | proverbs                        |
|                      | music — popular and classical   |
|                      | current events                  |

Language reflects culture and culture influences language. Folkways, mores, gestures, activities, attitudes, and ideals as seen in the language and literature should be evaluated objectively.

<tr>
<td>Introduction to regional differences</td>
<td>Exclamatives <em>que, comme, quel</em>&lt;br&gt;Relative pronouns <em>lequel, dont, où</em>&lt;br&gt;Verbs: present participle, future perfect, past infinitive, subjunctive present, conditional perfect&lt;br&gt;Passive voice&lt;br&gt;Subordinating conjunctions with subjunctive&lt;br&gt;Special uses of conditional</td>
<td>Word order with exclamations&lt;br&gt;Word order with relat. <em>dont</em>&lt;br&gt;Word order in passive&lt;br&gt;Conj. <em>si</em> + imperfect or pluperfect, and conditional in main clause&lt;br&gt;Conjun. <em>quand, dès que</em>, plus future or conditional in subord. a.&lt;br&gt;Subjunctive constructions esp. with <em>vouloir, demander, insister, attendre, insister</em>, etc.&lt;br&gt;Gerund with <em>en</em></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Perfecting pronunciation with attention to individual problems</th>
<th>Perfecting reading skill with increase in speed</th>
<th>Perfecting writing skill, esp. punctuation, apostrophe, syllabication</th>
</tr>
</thead>
<tbody>
<tr>
<td>Same plus subjunctive (imperfect and pluperfect), <em>moindre</em> and <em>pire</em> as irregular comparisons</td>
<td>Expressing more complex ideas in directed composition using correct word order and morphological form, especially verb forms with the subjunctive and special uses of the conditional</td>
<td>Importance of subjunctive in French, but its tendency is to avoid all forms except present, especially in spoken French&lt;br&gt;The same fact may be expressed from two viewpoints through active and passive voice, but the latter is used less in French than in English.</td>
</tr>
</tbody>
</table>

Poetic forms of the language may differ from everyday French. In turn, spoken French differs from written French. Not all French-speaking people pronounce sounds alike. But French as it is spoken in the Loire Valley is considered the purest and is understood by all French-speaking people.

Patterns are many but each is specific. Emphasis is often conveyed by use of a specific pattern (as well as by intonation as in English).
# Six-year Sequence Grade 10

<table>
<thead>
<tr>
<th>Vocabulary</th>
<th>Culture</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increase in vocabulary cannot be stated in figures.</td>
<td>To gain an insight into the extent of French literature a student should be introduced to a variety of literary works which are appropriate to his age and interests. His reading should also include newspapers, magazines, and books on topics interesting to teenagers.</td>
</tr>
<tr>
<td>Passive vocabulary will, of course, be larger than active, but extent of both will depend on student's ability and willingness to speak and read French.</td>
<td>He should be exposed to French music of various types and see films and pictures depicting many aspects of French life.</td>
</tr>
<tr>
<td>Conversational topics should be chosen with consideration of the student's age and interests.</td>
<td>He should discuss current events as well as events in French history with an increasing understanding of the French way of life.</td>
</tr>

<td>In reading aloud and silently with near-native proficiency the student should recognize changes of meaning caused by different grammatical forms.</td>
<td>recognized with near-native proficiency,</td>
</tr>
<tr>
<td>The graphic symbol should be written for each sound with near-native proficiency.</td>
<td>Gender, number, prepositions, and forms of pronouns, tense, voice, mood of verbs, and other grammatical forms should be used correctly to express one's ideas in writing.</td>
<td>and used correctly in writing.</td>
</tr>
<tr>
<td>The relationship of sound symbols and written symbols should be fully understood.</td>
<td></td>
<td>Continued practice in free composition</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The use of word order to help express meaning orally and in writing should be fully understood.</td>
</tr>
<tr>
<td>Vocabulary</td>
<td>Culture</td>
<td></td>
</tr>
<tr>
<td>------------</td>
<td>---------</td>
<td></td>
</tr>
<tr>
<td>A student should be able to understand almost any word in standard French in normal conversational contexts.</td>
<td>A student should listen with understanding to audio stimuli and detect nuances of meaning relating to any aspect of French culture.</td>
<td></td>
</tr>
<tr>
<td>He should have an active speaking vocabulary appropriate to his age and capacity, enabling him to communicate in French with near-native fluency.</td>
<td>He should speak and write in culturally acceptable forms and in his speech and writing reveal some knowledge of the heritage of the people who speak French.</td>
<td></td>
</tr>
<tr>
<td>He should recognize in context a wide range of vocabulary items. If he is planning to continue French in college, he should do extensive outside reading to familiarize himself with many literary forms, words, and expressions.</td>
<td>He should read everything from newspapers to works of literature with an understanding of its place within the French culture. A student planning to continue his studies in French in college should familiarize himself with literature in his field of interest.</td>
<td></td>
</tr>
<tr>
<td>A student should have a writing vocabulary which is appropriate to the occasion.</td>
<td>Continuation of Advanced Placement Program, if previously introduced.</td>
<td></td>
</tr>
</tbody>
</table>

To understand, speak, read, and write French, one must have command of a large and appropriate vocabulary.

The heritage of the people who speak French is a rich and interesting one. The French culture should not be evaluated from the standpoint of Anglo-American culture.
FRENCH

BIBLIOGRAPHY OF READING MATERIAL BY LEVELS

LEVEL I

This story in big print and well illustrated in color is suitable for grade 7. Only the present tense is used. There are useful, interesting exercises at the back. The story is about two wooden soldiers and a goat named Figaro.

LEVEL II

Ancy, Jacqueline. *Images de Jean Mermoz*. Paris: Diadéme, 1960. 61 pp. One of a series of *Lire et Savoir*. Includes notes for idiomatic expressions. This is the story of one of France's great aviators, who died in 1936. He is in the tradition of Antoine de St. Exupery.

A stirring tale of constant love and knightly adventure in Old France, 800 years ago. Good for junior high school students. No exercises.

This is a well-known folk tale which narrates the amazing adventures of a confident and courageous little tailor. Only the present tense is used. Exercises.

The fantastic adventures of a collegian hold students' interest to the last page.

Enault, Louis, edited with notes and vocabulary by C. Fontaine.
This book is intended for elementary classes. The vocabulary is not too difficult.

Jean Denis, a young French doctor, is sent into the dark regions of Africa. He has many narrow escapes, especially with the bubonic plague. The reader is continually kept in suspense.

For high school students who have had at least one term's study, and who have acquired a rudimentary knowledge of the forms and use of the present, passe compose, and future tenses. Complete magnetic tapes help develop reading skill.

The youthful Emile's adventures in Paris as the leader of an equally youthful band of detectives who seem always to be one jump away from danger.
ahead of the police. Delightful and easy reading for French 2 either junior high school or senior high school. With exercises.

Langellier, Alice. Chemin Faisant. Holt, Rinehart and Winston. Very simple language provides "plateau" reading for students who have finished a beginning course. For junior or senior high school French. Magnetic tape recordings are available.

Ledesert. Au Voleur. (paperback) Didier - Chilton, 1958. 66 pp. This is an exciting story written in simple colloquial French. A young brother and sister track down robbers involved in jewelry thefts. The setting, well described in the book, is near Annecy in the Alps. The story is written in the present tense. Conversations are simple and natural and could be acted out in class.

Ygot, Yves. Monsieur et Madame Curie. Paris: Didier, 1959. 70 pp. No notes, or vocabulary, but very easy to read at the end of French 2, if the students have just become acquainted with the passe simple.

LEVEL III

Audoux, Marguerite. Marie-Claire. Paris: Didier, 1959. 94 pp. This is another of the series Lire et Savoir. These books were especially designed for students of the French language who are not native speakers. It contains notes which are very helpful, and questionnaires. The vocabulary is not too difficult.

Begue, Louise and Franck, Frederick. Au Fil De L'Eau. Holt, Rinehart, and Winston. Ideally suited for use in schools. Acquaints the student with non-stereotype and non-touristic France which can be seen only by traveling the waterways of France. A complete magnetic tape program.

Daudet, Alphonse. Lettres de Mon Moulin. Boston: Heath, 1922. 61 pp. Contains eight of the letters written from Daudet's old mill in Provence, describing some of the characteristic personalities of the area. Also has exercises. There is a comprehensive edition by Nelson and Sons of New York, in 1929, which has twelve letters, and also has good notes and exercises. These include questionnaires, and exercises in grammatical usage, which French 3 needs.

This is a collection of easy short stories written as far as possible in dialog and which can be easily dramatized. The stories are interesting and the vocabulary excellent. The first stories are written in the present tense. Others use the past and future tenses as well.

The bicycle Tour de France is the greatest sporting event of the year for most Frenchmen. The impact of the Tour on the life of one young man is felt in this fast-moving recent novel.

A charming story moderately difficult to read but with explanatory notes on each page. Interesting pen and ink sketches. questions and exercises at the end of each chapter.

An intriguing detective story about a young doctor whose fiancée is suspected of murder. Abridged, rearranged, and lightly adapted to assure enjoyable reading. With exercises.

Contains La Parure, Mon Oncle Jules, Mademoiselle Perle, and others. Opposite each page of the text are the vocabulary and notes for that page.

A story of two drummer boys, based on a dramatic incident in the life of Napoleon. No dictionary. All in French.

An abridgment including all the episodes of the original that have thrilled generations of readers. With exercises.

This is the complete book, with no exercises or questionnaires or even vocabulary. There is another edition by Heath which is for those who do not read so easily.

This is an interesting biography of the man who built the Eiffel Tower. The noble quality of his mind and spirit stands out in the biography.
LEVEL IV

Bazin, Bordeaux, Daudet. Pauvres Gens.
These are four short stories by Maupassant.

Beaumarchais, edited by I. H. B. Spiers. Le Barbier de Seville. Heath, 1893. 144 pp
The light-hearted and impudent Figaro, always ready to use his quick wits for the benefit of his friends, is one of the most felicitous characters in drama.

Belle, Rene and Haas, Andree F. Promenandes En France. Holt.
Illustrated. Questions for each chapter and a very helpful explanation of idiomatic expressions. Magnetic tape recordings also available.

Jacques Fouques has many adventures in the Canadian wilds among the Indians as he learns the hardships of becoming a French explorer. Jacques discovers Lake Superior and Niagara Falls. There is much fast-moving action in this book.

This is a farce in which Figaro, the barber, must cut the hair of a man without hair and shave another man who does not have a beard.

Perfect as a supplementary to cultural units. Here students are introduced to more than twenty great French writers, rulers, men of science and artists who have shaped the course of events. Magnetic tape recordings are available.

Dumas, Alexandre. La Tulipe Noire.
In this story of a rare tulip, one finds plot and counterplot, assassinations and true love, imprisonment in dungeons and the conquest of fame and wealth.

A friendly satire on the Meridional with his love of show and his tendency to exaggeration. A few excisions in the original text have been replaced by brief summaries to keep the story intact. With exercises.

The book contains interesting sketches of different French types. Students find it entertaining reading and enjoy discussing characters and customs. Also has tapes to accompany it and exercises. (Exercises interspersed with reading)

Selections arranged in such a way as to give a representative picture of French life—with background material and suggestions for interpreting the stories: Dumas fils: Le prix de pigeons; Le jongleur de Notre-Dame; and others.

In this story two girls take refuge in an old castle and aid the young owner to recover a lost treasure. Young students find the tale very interesting. The present tense and the present perfect tense are used.

Eight episodes or problems in crime, presented in purely conversational style. Each class member may become another Hornleigh by carefully watching the words of the suspects.

An intriguing original detective story written in simple French by a famous contemporary author. Here the student will be introduced to the renowned Commissaire Maigret.

**LEVEL V**

Intermediate Alternate. Aside from short stories, the book contains a very interesting anthology of French history and another of French literature of the Nineteenth Century.

Short reading selections with excellent vocabularies. New words are defined in French and then used in example sentences. Questions and exercises in French are included for each selection.

The action of this play takes place in 1664. It has footnotes in English. French-English vocabulary in the back of the book. Study questions and subjects for composition are included.

A mysterious young boy comes from another planet to show man his follies and to philosophize on life. The story is whimsical and beautifully related.

A programmed reading text, Book 7. Uses the same format as Book 6.

Selections from *Les Trois Mousquetaires* adapted into simpler French. All French texts, no dictionary.

A blind girl learns of love and tenderness in this touching story of a pastor and his protegé. The novel is a psychological one delving into human motives and emotions.

-30-

193

With questionnaires and exercises interspersed throughout the text. This is designed as a college reader, but can be used for some of the really good French 4 students. An excellent collection and representative of "reputable authors."

Loti, Pierre. Pécheur D'Islande. Wible Institute and also Heath, 1902. 120 pp.

This is a classic with setting in Brittany, relating a touching love story, the role of the sea in the lives of the inhabitants and the toll it takes. Abridged edition.

The standard edition based on the complete Bodleian manuscript. The introduction furnishes substantial background information on the evolution of the poem, composition and poetic art, animating ideas, language and versification.

A comedy-satire showing how an honest schoolmaster turns into an unscrupulous millionaire. With exercises.

A collection of significant writings by the French winners of the Nobel Prize for Literature: Sully Prudhomme: letter and LeCygne; Anatole France: Mademoiselle Roxane; Mauriac: Conte de Noel; and others.

In this anthology by Nobel prize winner, there are short stories, poems, and scenes from plays. Writers include Anatole France, Martin de Grad, Gide, Mauriac, Camus, and Saint-John Perse. Through their writings students get an insight into the French love of life and their love of knowledge about it. Exercises at end.

A programmed reading text Book 6. There is a plastic guide card which is used to show only the French words; the card may be moved slightly to reveal English translations and certain difficult words when necessary.

LEVEL VI

Story of a girl whose life is ruined by her father's passion for hoarding money.

Four short stories by Zola Theuriet and de Maupassant. Dramatizations for each of the stories follow, using simple, conversational style.

Keating and Moraud. Voltaire. (paperback) American Book Company. This book could best be used as a supplementary reader in which pupils learn something of the life and writings of Voltaire.

Moillere. LeBourgeois Gentilhomme. (paperback) Heath. This well-known, amusing play about a social climber appeals to students. An accompanying record and filmstrip can be obtained from EAV.

Pagnol. Fanny (paperback) Wible Institute. A touching play in which Fanny remakes her life, choosing a path that will benefit her child.

Sand, George. La Mare au Diable. New York: Holt, 1899. 77 pp. This ancient edition has notes, vocabulary and paraphrases for retranslation. The editor, Edward S. Joynes, also includes an introduction which dwells mainly on "the more attractive aspects of George Sand's life and literary career."

Voltaire. Candide. In this witty, delightfully sarcastic tale with its exciting adventures related in clear, concise French, Voltaire refutes the philosophy that all is for the best is the best.

Zola, Emile. L'Attaque Du Moulin. This is a realistic and tragic story which takes place during the Franco-Prussian war. It keeps the reader in suspense.
A course of study framework is essential to a coordinated or integrated program of instruction in foreign language. Provisions must be made for a broad, general framework which will give direction and provide the basic structure within which the foreign language teachers, under the direction of the district foreign language supervisor, will formulate their course work and teaching activities.

A course of study framework is one of the basic requirements to an articulated program of instruction because it establishes the "road map" which will enable the teacher to plot a course that has purpose and covers all essential elements. It helps to prevent the practice of wandering hither and thither without direction. A course of study framework will insure that the student achieves fundamental skills and acquires basic information prescribed by specialists as he ascends the foreign language ladder of development.

The six essentials of a well articulated program of instruction in foreign language are:

1. A statement of objectives.
2. Qualified direction and supervision from the district office.
3. Teachers who are professionally prepared in content and methodology.
4. Adequate materials and equipment for instruction.
5. Content or subject matter that has been described with clarity and precision from the simple to the complex level of language learning.
6. Evaluation, including systematic measurement of student performance.

As an aid to articulation of foreign language instruction, the following definition of a level of foreign language instruction is provided:

A level is a segment of language learning in which specific skills and information are prescribed for sequential acquisition by the student. The skills and learning to be acquired must be delineated. The constant element is the prescribed material to be learned; the variable elements are the learner, his maturation, capacity, experience, and motivation; the teacher, his preparation, experience, personality, and motivation; and the time (allotment or interval) required to master the material to be learned.

"The boundaries between successive levels must be recognized as somewhat arbitrary, since the learning of a language is in a sense continuous and unending. However, it is possible to specify approximately what should be achieved by the end of each level. This achievement can neither be described nor tested in terms of the amount of time the learner has spent in class or the number of pages he has 'covered' in the textbook."1

The basic language activities, skills and content have been described on four levels or six grades of achievement from the simple to the complex. It is suggested that the teacher read all components of a level in order to get a more complete view of what is incorporated in each level.

Teachers are reminded again that the concept statements presented in this Framework are brief. It is suggested that school districts organize committees of language teachers and give them the responsibility of expanding and extending the content activities and subject matter described in this Framework. It is also suggested that the Utah Foreign Language Guide be consulted and used to assist in the process of expanding the Utah Course of Study Framework.

The Course of Study Framework for Foreign Languages and the Utah Foreign Language Guide provide criteria for the selection of textbooks. The Framework may be used to check the content of a textbook at a specific level, while the Guide may be used to evaluate the methodology proposed in a particular text.

Districts are urged to use this framework as a guide in setting up a district course of study in terms of their own textbook and school programs. The skill and content tables as presented here will have to be adapted to the actual program of the district. Three possible programs are shown below as examples.

Explanation of the Skill and Content Tables

I. THE ESSENTIALS FOR COMMUNICATION

In using the section "Essentials for Communication" pages are first unfolded from the front to back covers. These fold-out pages have the following functions:

A. They bring into focus the major course objectives.

B. They correspond, item by item, to the "Skills and Content" tables for each year (or level) of language study.
C. This format enables the curriculum planner to see how the course of study for a given year relates to the long-range objectives.

II. THE VERTICAL COLUMNS

In the vertical columns of this section an attempt has been made to identify those sounds, grammatical forms and word order arrangements which the American youngster must master in order to communicate in the German language. Special emphasis has been given to the points of difficulty invariably encountered by the student of German whose native language is English. Points of pronunciation, grammar, and word order which are closely parallel to English are easy to learn and, therefore, are not mentioned.

In the vocabulary section it is clearly not possible to list all available words. That is the province of the lexicographer. However, it is possible to identify categories of vocabulary which must be learned if minimal communication is to take place.

Similarly with culture, only those areas which the student is likely to encounter and those which are appropriate to his age and maturity can be dealt with.

III. THE HORIZONTAL "SKILLS AND CONCEPTS" LIST

Reading horizontally, one can identify the learning problems which are unique to each skill. Clearly there are some items which are essential for all skills. On the other hand, there are items which have pertinence with only one of the skills. Teaching emphasis must reflect this fact. For example, inverted word order presents minimum difficulty in reading, but is of crucial importance in the active skill of speaking. Other items, such as literary vocabulary and certain subjunctive forms, need only be learned for reading recognition.

It is agreed that the mastery of the four skills must be accompanied by a grasp of certain basic generalizations and concepts. These are listed in the bottom row of the table.

It should be noted that two separate sequences of study are listed. The longer sequence presumes six full sequential years of contact with the language. The shorter sequence may consist of four full sequential years or the equivalent number of contact hours distributed over a greater number of years in any one of many patterns of scheduling.
## Essentials for Communication

## Culture

Introduction to German culture should be an integral & natural part of teaching German but should not take the place of teaching the language. The environment of the classroom, German books, magazines, tapes, films, records, & pictures should stimulate the student's interest in learning about the following cultural items: German names, forms of address, courtesy patterns, social customs, German school day & school year, regional costumes, 24-hour clock, German houses, some typical foods, German holidays especially Christmas & Advent, rhymes, songs & music. The units of vocabulary are obviously linked closely to the study of culture. As much of this as possible is done in German.

Cultural items are an integral part of a language. In listening to or reading the language, one must be aware of the nuances of cultural forms. To speak or write the language correctly also means to use culturally acceptable forms.

In spoken & written form, words make up a language. To communicate in that language one must grasp their meaning, isolated or in context, without conscious reference to English.

</tr>
<tr>
<td>800-1,000 words &amp; expressions above grade 7</td>
<td>Aim should be toward a useful active vocabulary practiced in a variety of situations rather than toward a large number of words memorized in isolation.</td>
</tr>
</tbody>
</table>

Words & expressions in German are sometimes closely related to English but almost always differ in range of meaning. Vocabulary is influenced by historical background, social customs, & other factors.

In listening, speaking, reading, & writing cultural patterns are obvious & must be observed by a native or non-native speaker of the language.

present perf. & past tense of reg., irreg., & special verbs | word order in pres. perf. perfect tense  
position of reflex. pron.  
position of genitive  
position of adverbial expressions of time, manner, & place |

- German has 4 cases; each has a special form & function. Prepositions require specific cases. Adjectives have case endings. Nouns & pronouns agree with verbs in pres. perf. & past tenses. Tense functions often differ in German & English. Verbs follow two main patterns (strong & weak) with some exceptions.

Not all German-speaking people pronounce sounds alike. High German is understood by all German-speaking people. Most modern German books are printed in Antiqua; old books were printed in Fraktur.

Word order in pres. perf. tense differs from pres. & past. The genitive may stand before or after the noun. Several adverbial expressions in a sentence stand in the order of time - manner - place.

Consideration may also be given to the grouping of college-bound & terminal students for selective reading. | Current events are listened to, viewed, discussed, read, & written about. Books, periodicals, tapes, films, slides, records, & pictures are resource materials directly used by the students. The choice of these materials is up to the teacher, who should take into consideration the age, maturity, ability, & interest of the student. |
| A writing vocabulary appropriate to the occasion should be mastered. | A knowledge of culturally acceptable forms & of the German heritage is a part of learning the German language. |

Spoken & written communication employs a large volume & variety of words & expressions.
Six-year Sequence Grade 12

</table>

To understand, speak, read, & write German one must have command of a large & appropriate vocabulary.

The culture & heritage of the people who speak German is rich & interesting.
GERMAN

BIBLIOGRAPHY OF READING MATERIAL BY LEVELS

LEVEL II

This book treats the amazing career of Sutter, the German-Swiss, whose unusual pioneering spirit made him the richest man-on-paper in America.

This booklet recounts the life history of Albert Schweitzer. Chapter VIII on Schweitzer's Kulturphilosophie is a little difficult and could be skipped if the book is not discussed in class.

This very easy reader concerns all sorts of subjects with no interrelationship. (A little tedious to read).

This is as easy as Allerlei but written in story form.

This booklet results from the author's long talks with the people while she was a guest on a German farm.

This booklet gives further understanding of village life in Germany.

This follows the Hagboldt idea. It is a basic story and very easy.

LEVELS II and III

A sailboat adventure is presented here.

This booklet deals with another German-speaking American.

In this booklet one may read about the life and career of Thomas Mann, novelist, essayist, dramatist, and short-story writer of international reputation.

This book deals with one of the giants of European Art.

This booklet gives an account of another famous German-speaking American.
The life of Heinrich Heine is followed in the booklet.

Hagboldt. Fabeln. Heath, 1933. 40 pp. (Be sure to obtain the Roman type).
This booklet contains the familiar fables.

Familiar Grimm's Fairytales are presented.

These are quite easy stories.

Many short narratives are presented.

This little Novelle presents a story about a small town mayor
and his adventures with tourists and towns people.

Kreuzenau, Michael. edited by Moeller, Jack R. Der kleine Bürgermeister

This booklet results from the author's experience in German cities.

Using the city of Goslar as a point of departure for a legend
and history, the author gives the student some vividness and variety
in his reading.

This booklet retells in narrative form one episode each from
the lives of Goethe and Schiller.

Rechtschaffen, Homberger, Bobetsky. Literatur für den deutschen Unterricht.

35 pp.

Max Hueber Verlag, 1963. 64 pp.
Many short narratives, games, poems, jokes, etc., are presented
in this booklet. This booklet is available through the Chilton Book
Company, New York.

This booklet consists of ten imaginary radio programs. In this
booklet one can compare students' life of the 15th, 18th, and the 19th centuries.

Zwick, C. N. *Series.* Edited by Samuel, H. D. *Das schwarze Segel.*
A harbor story designed for rapid reading. The others in series A and B are in Gothic print.

LEVEL III

Text and pictures.

Many interesting short stories are presented here.

This is a continuation of the above but a little more involved.

There are eight Komodien, six Gespräche, and two Weihnachtsspiele.

Ginn (publisher), 1964. *Der Millionär.*

This booklet describes the development of Watertown as reflected in the achievements of German immigrants.

Various subjects: Zimmer suchen und mieten, Papierhandlung Deutsch lernen, Mittagessen, Trinken, Einkäufe, Anziehen, Kino Theater, u.a.

Heath (publisher), 1942 *Alle Funf.* 39 pp.

Text and pictures.

This is more difficult and should be in a higher level or subsection.

Ten one-act plays. These seem to be quite easy to read.

Reading and pictures. Various subjects: Die deutsche Sprache historische Uberblick, Reise durch Deutschland, Berlin u. freie Universität, Studenten gegen Hitler, and Wien.

This is graded in difficulty, presented in the form of a diary kept by an American student at an American university whose brother spent a lot of time in Germany. The student is studying German and meets a German girl.

The committee recommends that the Roman type be used exclusively in reading. However, if the Gothic type were to be introduced at any point, the committee thought that the point should be between the third and fourth levels. Here are some easy readers printed in the Gothic type:

LEVEL IV

Morgan, B. Q. and Strothmann, F. W. *Reading German.* Ginn, 1943. 152 pp. With reading helps.

More difficult readers printed in the Gothic type to be used in the fourth level are these:

Immensee, Germelshausen, L'Arrabiata.

**LEVELS IV - VI**

Special section of suggested scientific readings in the order of difficulty.

There are several others which are approximately equal to these in difficulty.

The next level could be represented by the following books printed in Germany for foreigners. After this level, the direct periodicals could be used.

There are others in this series and more will appear in publishers' catalogues.

**LEVELS V - VI**

Advanced Placement reading various works by the following 10 authors as representative:

1. Eichendorf: *Aus dem Leben eines Taugenichts und Lyrik*

2. Goethe: Selected lyrics and urfaust

3. Heine: Selected poems

4. Keller: *Die drei gerechten Kammacher*

5. Kleist: Selected anecdotes

6. Lessing: A drama
7. Mann, T.: Tonio Kröger
8. Morike: Selected poems
9. Rilke: Selected poems
10. Schiller: Selected ballads

LEVEL VI

Might be accomplished by means of a modified literature anthology and liberated reading of paperback literature also anthologies of science, art, philosophy, etc. such as:

INTRODUCTION

For 2,000 years the Latin culture and language have influenced the thoughts and actions of Western civilization. Recently the renewed interest in the humanities has brought the importance of Latin into proper perspective.

The new approaches to methods of learning modern languages based upon the science of linguistics are slowly being adapted to the study of classical languages. By combining the traditional teaching methods and some of the basic methods of applied linguistics to the learning of Latin, more interesting and productive results are obtained. These new approaches also create a new permanent relevancy to both the social and the political orientation of Latin literature. No longer is Latin considered a "dead" language. Even though its natural growth has ended and it is no longer spoken by a cultural group, its growth continues in such modern languages as Italian, French, Spanish, Portuguese, and Rumanian; and a good knowledge of Latin can speed the learning of these modern languages.

The benefits derived from the study of Latin are many. The student's concepts of living will be broadened and he will view other national cultures with greater understanding and appreciation. He will be more worldly in the realization that there is more than one way to express ideas; that different people have different views of life, different political convictions, different ethical values, and different customs which are the result of growth and are, consequently, inherently "sacred" to each culture.

In addition to the linguistic and cultural roots of Latin in many ethnic groups, Latin is still contributing to an already large vocabulary in modern English in the fields of science and technology. More than fifty per cent of our total vocabulary in English is directly derived from Latin and is continually growing because of the basic linguistic roots. Indirect influence of Latin through other languages would increase this percentage to well above seventy per cent. As a direct result of these linguistic influences, Latin improves one's ability to spell with greater precision and improves comprehension in English, especially in the area of abstract ideas which create many communication problems in language.

In outlining the course of study framework for Latin, the same basic learning skills of listening, speaking, reading, and writing in a modern language will be used for Latin; however, since the main objective in the teaching of Latin is for reading and comprehension and since verbal communication is not a goal in itself as in modern languages, the time sequences for each skill should be adjusted.

The ultimate objective of teaching Latin is comprehension, and, as in learning any language, the thought must come directly from the language either spoken or written. Translation or English equivalents are no longer goals to be considered in Latin. The gradual transition from traditional teaching methods to the new approaches is reflected in the inadequacies of the current textbooks. Here the teacher who is interested in applying the new approaches will have to improvise and create specific teaching...
techniques applicable to Latin. Many teaching aids now available for modern languages can be adapted to the teaching of Latin if judicious selections are made.

In teaching comprehension two basic areas of knowledge are needed: a knowledge of forms (morphology), and the knowledge of the manner in which these forms function in the language (grammar). Morphology and grammar, however, do not furnish sufficient knowledge for one to understand fully what the author is trying to communicate. In addition, a knowledge of the author's choice of words and arrangement will need clarification to help the student to understand the most likely meaning. To aid the student to think in the language, individual words will sometimes need elucidation by the teacher.

As the student becomes more proficient in listening and reading, the elements of the author's style, such as the use of phrases and clauses and their arrangement, should also be considered more fully. For example, in Roman oratory and literature many stylistic devices were used to heighten the expression of the idea. These the student must understand to fully appreciate the literature. A knowledge of the cultural qualities of Roman life—customs, social conditions, and religious attitudes—is also necessary to understand the author's ideas properly.

The teacher of Latin must not bog down in a morass of mechanics in the language. If the main objective of comprehension is kept constantly in mind and every teaching and learning experience is directed toward comprehension, the teacher will find many new ways of teaching Latin.

COURSE OF STUDY FRAMEWORK — RUSSIAN

PREFACE

Russian, like English, French, German, Latin and Spanish, belongs to the Indo-European family of languages and thus shares with them many common features. Although written in the Cyrillic alphabet, it can be mastered easily by the average student. The study of Russian affords an intellectual experience similar to that encountered in the study of any other European language. With the ever-increasing role that the Soviet Union has come to play in world affairs, the Russian language has assumed a position of indisputable importance.

The cultural heritage of the Russian people, as expressed in their literature, music and art, is considered to be among the world's most important and influential. In addition, there are many critical areas, especially scientific and technical, in which Russian is an invaluable asset. Thus, the need for the study of Russian stems directly from the need to know and learn this rich and vital culture. The key to this knowledge and understanding is the Russian language itself.

INTRODUCTION

The basic purpose of the Guidelines is to provide a unified three-year Russian program at the secondary level. It is important that teachers agree upon the basic objectives and contents of the Russian curriculum. Such agreement is necessary for the welfare of the student and would also provide state colleges and universities with a basis for placing incoming students. Due to the mobility of students this means uniformity and fluidity among various schools and systems as to material covered.

The curriculum guide is primarily concerned with developing the four basic skills: listening, speaking, reading, and writing. The guide provides suggested cultural topics which should be integrated with the development of these skills. The study of Russian contributes significantly to a student's understanding of the world and to a greater appreciation and knowledge of his own culture. To benefit fully from his study of this very important and widely spoken language, a student must acquire reasonable proficiency in these basic language skills.

The whole approach of the Guidelines is realistic and practical. It is divided into three years of study with definite yearly goals and objectives, and the teacher is able to see which materials should be covered during a given year. The subject matter is presented in order of difficulty, thus giving a systematic and logical approach to teaching.

School systems which do not have a Russian-language program should be encouraged to start one. It is much easier to begin a new program when presented with definite and suggested materials.

There is impressive evidence that the teaching of Russian in American schools has increased considerably in the last decade. Since the day America first
heard of Sputnik, the number of colleges and universities offering Russian has grown from 173 in 1956-57 to a reliably estimated 600 in 1965. ¹

The study of Russian at the secondary level in the United States has shown the same type of increase. In the 1955-56 school year only 9 secondary schools were offering Russian; by the spring of 1958 the number rose to 18; by 1960 to 153; and the AATSEEL survey conducted in the face of 1966 by Professor Victor Terras of the University of Wisconsin at Madison shows that 516 secondary schools were offering Russian. This survey further shows that 24,406 students were enrolled in these courses, an increase of 577 over the MLA totals of 1964. ¹

The Guidelines does not advocate one methodology. For general and specific methodological problems the teacher should consult any of the following:

Pedagogical articles in such journals as:

Foreign Language Annals (FLA).

The Modern Language Journal (MLJ).

(Michigan State) Русский язык в школе, русский язык за рубежом (USSR).

The Slavic and East European Journal (SEEJ).

Teacher's manuals accompanying various textbooks would also be helpful.

The methods used in their own teaching by the authors of the Guidelines cover a large range, including the "traditional" methods, the direct method, the audio-lingual method and all these with various modifications, both with and without language laboratories. The list of materials and texts provided is only meant to indicate some textbooks and teaching supplements used with success over a period of several years. It is, therefore, hoped that the Guidelines will be of use to all high school teachers of Russian regardless of methodological persuasion or choice of teaching media.

¹Albert Parry, America Learns Russian, Syracuse, N.Y., 1967.

## ESSENTIALS FOR COMMUNICATION

</tbody>
</table>

### General Remarks

- Russian and English differ in graphic symbols for most vowels and consonants; both have like symbols for some sounds.
- Russian has many sounds and graphic symbols completely foreign to English.
- Normal and inverted word order express the same content (may shift emphasis).
- Adjectives agree with nouns in gender, number and case.
- Verbs agree with nouns and pronouns in the nominative case.
- Each case has specific functions.
- Pronouns represent nouns (animate and inanimate) according to gender of noun.

### General Notes

- Verbs agree with the nominative case of pronouns in past, present, and future, except the genitive of absence.
- Prepositions require different cases.
- Nouns and pronouns in different cases in a sentence.
- Verbs of learning, studying and teaching and the cases governed by them.

- Production of all sounds in Russian words and words adopted into Russian.
- Rhythm and melody of sentences.
- Accent in all types of words.
- Association of all Russian sounds with the correct graphic symbols.
- Developing a fluent pronunciation technique.
- Foreign words.
- Assimilation of the prepositions В, С, К with pronoun and adjective.
- Association of all Russian graphic symbols with sounds.
- Developing a special technique.
- Capitalization of polite "You" in correspondence.
### LEVEL TWO (SECOND YEAR)

#### VOCABULARY

<table>
<thead>
<tr>
<th>Listening</th>
<th>Speaking</th>
<th>Reading</th>
<th>Writing</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>800-1000 words and expressions above level one.</strong></td>
<td><strong>700 words and expressions above level one.</strong></td>
<td><strong>1000-1200 words and expressions above level one.</strong></td>
<td><strong>700 words and expressions above level one.</strong></td>
</tr>
</tbody>
</table>

In the context of the topics or units:
- Daily routine, telephoning, shopping, post office, restaurant, community, transportation, landscape, travel, animals, holidays, biographies, cities (American, Russian), introduction to history and geography.

Vocabulary should include:
- Use of imperfective and perfective verbs of motion; adjectives, nouns and pronouns in all cases of the plural and singular; cardinal and ordinal numbers (genitive plural introduced at level one).

**General Remarks**
- Words and expressions in Russian may or may not be related to English. Vocabulary is influenced by historical background, social customs, and other factors.

#### CULTURE

<table>
<thead>
<tr>
<th>Listening</th>
<th>Speaking</th>
<th>Reading</th>
<th>Writing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Visual and audio stimuli as well as the topics of vocabulary study should suggest the following cultural items for study:</td>
<td>Russian restaurants, shopping in a Russian city, places in the Soviet Union:</td>
<td>Republics, 5-8 rivers, 10-15 cities,</td>
<td>holidays, festivals, fairs, folklore, proverbs, music, industry, and current events.</td>
</tr>
</tbody>
</table>

**General Remarks**
- In listening, speaking and writing--cultural patterns are not obvious and must be pointed out.

A course of study framework is essential to a coordinated or integrated program of instruction in foreign language. Provisions must be made for a broad, general framework which will give direction and provide the basic structure within which the foreign language teachers, under the direction of the district foreign language supervisor, will formulate their course work and teaching activities.

A course of study framework is one of the basic requirements to an articulated program of instruction because it establishes the "road map" which will enable the teacher to plot a course that has purpose and covers all essential elements. It helps to prevent the practice of wandering hither and thither without direction: a course of study framework will insure that the student achieves fundamental skills and acquires basic information prescribed by specialists as he ascends the foreign language ladder of development.

The six essentials of a well articulated program of instruction in foreign language are:

1. A statement of objective.
2. Qualified direction and supervision from the district office.
3. Teachers who are professionally prepared in content and methodology.
4. Adequate materials and equipment for instruction.
5. Content or subject matter that has been described with clarity and precision from the simple to the complex level of language learning.
6. Evaluation, including systematic measurement of student performance.

As an aid to articulation of foreign language instruction, the following definition of a level of foreign language instruction is provided:

A level is a segment of language learning in which specific skills and information are prescribed for sequential acquisition by the student. The skills and learning to be acquired must be delineated. The constant element is the prescribed material to be learned; the variable elements are the learner, his maturation, capacity, experience, and motivation; the teacher, his preparation, experience, personality, and motivation; and the time (allotment or interval) required to master the material to be learned.

"The boundaries between successive levels must be recognized as somewhat arbitrary, since the learning of a language is in a sense
continuous and unending. However, it is possible to specify approximately what should be achieved by the end of each level. This achievement can neither be described nor tested in terms of the amount of time the learner has spent in class or the number of pages he has 'covered' in the textbook. 

The basic language activities, skills and content have been described on four levels or six grades of achievement from the simple to the complex. It is suggested that the teacher read all components of a level in order to get a more complete view of what is incorporated in each level.

Teachers are reminded again that the concept statements presented in this Framework are brief. It is suggested that school districts organize committees of language teachers and give them the responsibility of expanding and extending the content activities and subject matter described in this Framework. It is also suggested that the Utah Foreign Language Guide be consulted and used to assist in the process of expanding the Utah Course of Study Framework.

The Course of Study Framework for Foreign Languages and the Utah Foreign Language Guide provide criteria for the selection of textbooks. The Framework may be used to check the content of a textbook at a specific level, while the Guide may be used to evaluate the methodology proposed in a particular text.

Districts are urged to use this framework as a guide in setting up a district course of study in terms of their own textbook and school programs. The skill and content tables as presented here will have to be adapted to the actual program of the district. Three possible programs are shown below as examples.

Explanation of the Skill and Content Tables.

2Spanish Curriculum Guide, Wisconsin Department of Public Instruction, Madison. The following flow charts and fold out charts were used by permission.
I. THE ESSENTIALS FOR COMMUNICATION

In using the section "Essentials for Communication" pages are first unfolded from the front to back covers. These fold-out pages have the following functions:

A. They bring into focus the major course objectives;
B. They correspond, item by item, to the "Skills and Content" tables for each year (or level) of language study;
C. This format enables the curriculum planner to see how the course of study for a given year relates to the long-range objectives.

II. THE VERTICAL COLUMNS

In the vertical columns of this section an attempt has been made to identify those sounds, grammatical forms and word order arrangements which the American youngster must master in order to communicate in the Spanish language. Special emphasis has been given to the points of difficulty invariably encountered by the student of Spanish whose native language is English. Points of pronunciation, grammar, and word order which are closely parallel to English are easy to learn and, therefore, not mentioned.

In the vocabulary section it is clearly not possible to list all available words. That is the province of the lexicographer. It is, however, possible to identify categories of vocabulary which must be learned if minimal communication is to take place.

Similarly with culture, only those areas which the student is likely to encounter and those which are appropriate to his age and maturity can be dealt with.

III. THE HORIZONTAL "SKILLS AND CONCEPTS" LIST

Reading horizontally, one can identify the learning problems which are unique to each skill. Clearly there are some items which are essential for all skills. On the other hand, there are items which have pertinence with only one of the skills. Teaching emphasis must reflect this fact. For example, inverted word order presents minimum difficulty in reading, but is of crucial importance in the active skill of speaking. Other items, such as literary vocabulary and certain subjunctive forms, need only be learned for reading recognition.

It is agreed that the mastery of the four skills must be accompanied by a grasp of certain basic generalizations and concepts. These are listed in the bottom row of the table.
It should be noted that two separate sequences of study are listed. The longer sequence presumes six full sequential years of contact with the language. The shorter sequence may consist of four full sequential years or the equivalent number of contact hours distributed over a greater number of years in any one of many patterns of scheduling.

Grade Nine in a Four-year Sequence

**Phonology**

Spanish vowel: a, e, i, o, u; contrast unstressed vowels (Note) consonant sounds. Initial and intervocalic: d, g, b. Differentiate between systems of stress in Spanish & English. Intonation & rhythm in statements, questions & commands. Dental & velar n. Pronunciation of x, th. Develop auditory discrimination among verb tenses (present to preterite, future, etc.). Production & differentiation of the sounds listed above. Liaisons between like vowels & consonants. Answer simple questions stressing knowledge of liaisons.

**Morphology**

**Syntax**

Associations of the sounds of the language with written symbols especially: l, ll; qui, que; ca, co, cu, ch; hi, rr; ni, ga, go, gu, gue, gui. Read aloud with proper pronunciation & intonation. Knowledge of proper syllable & placement of accents.

Use of and exposure to above in reading, especially: number & gender of nouns; adjectives, number & person of verbs & pronouns. Agreement of adjectives with nouns & verbs with their subjects. Use of preterite & imperfect. Comparison of adjectives & adverbs.

Spell vowel and consonant sounds correctly, especially: l, ll; qui, que; ca, co, cu, ch; hi, rr; ni, ga, go, gu, gue, gui; ua, ue, ui, uo. Formulate meaningful sentences in Spanish. Basic principles of stress (hablo, habló, estás, estás.)

Use of above in writing; knowledge of gender & number of adjectives & nouns, person & number of verbs & pronouns; agreement of verbs with their subjects. Write simple text from dictations & narratives. Capitalization.

Recognize the relationships between sounds & written symbols. Note the close "fit" between phoneme & grapheme in Spanish.

Knowledge about & use of basic grammatical forms listed above in listening, speaking, & writing. Gender, number, & subject pronoun-verb agreements are necessary to convey meaning.

Realization that basic word order in English & Spanish is fundamentally the same with respect to the position of subject verb & predicate; however object pronouns precede verbs unless the verb form is an affirmative command, gerund, or infinitive.

Denote possession; to use adjectives in correct position & form. Change statements into questions & commands. Change affirmative statements into negative ones. Position of object pronouns, differences between the position of demonstrative pronouns & adjectives.

Expose students to additional basic forms or word order by introducing them to short readings. Provide more complex sentences where students encounter basic word order in a more varied context.

Rewrite statements in the form of questions & commands. Change affirmative statements into negative ones. Written exercises requiring an understanding of adjectives, negatives, articles, & object pronouns, demonstrative pronouns, indefinite pronouns, & word order in comparisons.

## Grade Ten in a Four-year Sequence

<table>
<thead>
<tr>
<th>Phonology</th>
<th>Morphology</th>
<th>Syntax</th>
</tr>
</thead>
</table>

| Phrases emphasizing the production of vowel clusters, diphthongs; fusion of vowels, & linkage: sounds involving the points listed above—always with practical materials in complete meaningful utterances. | Nominalization; change from present to imperfect subjunctive, use of the subjunctive; passive voice with se & ser; hacer with expressions of time; si clauses in the subjunctive. | Drills emphasizing the position of reflexive pronouns, the word order with gustar, faltar, parecer; the passive voice; hacer with expressions of time. Drills requiring the use & correct word order with the subjunctive. Make comparisons with adjectives & pronouns. |

| Recognize vowel clusters, diphthongs, fusion of vowels & linkage in reading selections. Practice reading sounds represented by the following spellings: ll, y; qui, que; ca, co, cu; h, v, j; ge, gi, go, gue, gui, gii, gua, guo. Observance of accents which break diphthongs: caído, traído, Raúl. | Supplementary readings involving the subjunctive in as many forms as possible. Assign a graded reader or other material incorporating the basic grammatical forms listed above. | Expose students to supplementary readers where basic word order is found in new context. Provide more complex reading in order that students encounter basic word order in varied contexts. |

| Dictations & other written exercises emphasizing knowledge of written symbols for sounds listed above. | Give students contexts requiring them to choose between the: imperfect & preterite, indicative & subjunctive, sequence of tenses por & para, the correct use of the passive voice construction. Additional reading exercises involving the use of the grammatical forms listed above. | Write short sentences in which word order is stressed. Give the infinitive of reflexive verbs or expressions requiring the subjunctive; change active to passive voice; cues requiring the use of gustar, faltar, etc. (All material written by the students should be in complete & meaningful sentences.) |

| Differentiate between syllabication in writing (los-a-him-nos) & speaking (lo-so-lun-nos). Realization of the relationship between spelling & sounds. | Realization that people speaking Spanish express ideas with different grammatical structures (por & para, indicative & subjunctive, imperfect & preterite). The subjunctive is very commonly used in Spanish & is necessary if one wants to speak the language idiomatically. | Realization on the part of the student that word order in English is fundamentally the same as that of the Spanish with a few exceptions; position of object pronouns & reflexive pronouns, idiomatic expressions (gustar, faltar), hacer with expressions of time. |

</table>
Grade Eleven in a Four-year Sequence

<table>
<thead>
<tr>
<th>Vocabulary</th>
<th>Culture</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increase in vocabulary cannot be stated in figures.</td>
<td>Cultural items at the third level might include:</td>
</tr>
<tr>
<td></td>
<td>Spain:</td>
</tr>
<tr>
<td></td>
<td>government</td>
</tr>
<tr>
<td></td>
<td>educational system</td>
</tr>
<tr>
<td></td>
<td>recreation</td>
</tr>
<tr>
<td></td>
<td>historical highlights (especially the conquest of South and Central America)</td>
</tr>
<tr>
<td></td>
<td>South and Central American nations (topics similar to those for Spain)</td>
</tr>
<tr>
<td></td>
<td>Spanish influence in North America</td>
</tr>
<tr>
<td>Passive vocabulary will be larger than active, but extent of both will depend on student’s ability and willingness to speak &amp; read Spanish.</td>
<td>The cultural study is done mainly in Spanish with some supplementary reading in English. Activities might include:</td>
</tr>
<tr>
<td>A variety of graded readers may be used at this level. Much of the passive vocabulary will depend upon the selection of reading materials &amp; textbooks.</td>
<td>listening to recordings &amp; viewing films, filmstrips, &amp; slides;</td>
</tr>
<tr>
<td>A vocabulary suitable for writing letters &amp; compositions should be developed.</td>
<td>discussing what has been heard or read;</td>
</tr>
<tr>
<td>Topical vocabulary might include:</td>
<td>reading of various kinds including graded readers, periodicals, poetry, &amp; literary prose;</td>
</tr>
<tr>
<td>current events</td>
<td>writing letters, reports, or compositions.</td>
</tr>
<tr>
<td>sickness and doctor</td>
<td></td>
</tr>
<tr>
<td>education</td>
<td></td>
</tr>
<tr>
<td>government</td>
<td></td>
</tr>
<tr>
<td>history</td>
<td></td>
</tr>
</tbody>
</table>

Increase the ability of students to make active use of vocabulary items to express what they want to say. Activities might include directed talks by individual students, conversations between students, debates, etc.

Spoken & written vocabulary differ in volume & kind. The command of a large vocabulary can be achieved only through constant listening, speaking, reading, & writing practice.

The Hispanic culture must be evaluated objectively & on its own merits. The Spanish have made many contributions to American culture.
## Grade Twelve in a Four-year Sequence

<table>
<thead>
<tr>
<th>Phonology</th>
<th>Morphology</th>
<th>Syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reinforce the contrast among un-stressed vowels. Reinforce auditory discrimination of all consonant sounds. Review &amp; reinforce liaison &amp; linkage.</td>
<td>Review use of the subjunctive, imperfect vs. preterite, <em>por &amp; para</em>, the passive voice, stem changing verbs. Progressive &amp; perfect tenses, comparisons of adjectives. Reflexive verbs. Reinforce understanding of verbs like <em>gustar, faltar, parecer</em>, etc.</td>
<td>Reinforcement of knowledge with respect to the word order in sentences with <em>gustar, faltar, parecer</em>; passive voice; comparison of adjectives; use of subjunctive in subordinate clauses.</td>
</tr>
<tr>
<td>Reinforce the production of all consonant sounds. Reinforce proper liaison &amp; linkage in speaking at near-native speed.</td>
<td>Use of the above items in speaking at near-native speed &amp; in contexts that are understandable to native speakers. All pronouns should now be in the active repertoire of the student as should all uses of the articles.</td>
<td>Speaking situations emphasizing the above items in basic word order.</td>
</tr>
<tr>
<td>Read materials with proper pronunciation &amp; intonation at normal speed. (Enact roles in plays &amp; other works which exemplify the ways in which changes in phonology affect meaning.) Reinforce ability to associate written symbols with sound.</td>
<td>Presentation of the above items in expanded usage (specifically contrasting: Preterite &amp; imperfect; <em>por &amp; para</em>; forms of the passive voice; comparisons of adjectives. Use of the subjunctive. Reflexive verbs).</td>
<td>Provide supplementary readings stressing the importance of basic word order as outlined above.</td>
</tr>
<tr>
<td>Have students paraphrase in writing what they hear (short dialogues or stories); exercises incorporating the more difficult spelling: <em>h, j, ge, je, i, gue, gui, y, n, ll, rr, y, b</em>, diphthongs; silent vowels in linkage.</td>
<td>Use of the above items in written exercises according to a specific grammar point using the passive voice; <em>por &amp; para</em>; imperfect &amp; preterite, subjunctives, comparison of adjectives, progressive &amp; perfect tenses <em>gustar, faltar</em>, etc. Stem changing verbs, reflexive verbs.</td>
<td>Have students write sentences &amp; do other written exercises according to specific points of word order, position of pronouns, passive voice, use of subjunctives in subordinate clauses; comparison of adjectives; <em>gustar, faltar, parecer</em>, etc.</td>
</tr>
<tr>
<td>Poetic forms of the language may differ from everyday spoken &amp; written Spanish. Spanish has a highly consistent punctuation.</td>
<td>Full realization on the part of the student that Spanish-speaking people express ideas differently from English-speaking people.</td>
<td>Expand the ability to understand, speak, read, &amp; write meaningful sentences emphasizing the word order suggested above.</td>
</tr>
</tbody>
</table>
# Grade Twelve in a Four-year Sequence

<table>
<thead>
<tr>
<th><strong>Vocabulary</strong></th>
<th><strong>Culture</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>A student should be able to understand standard Spanish in normal conversational contexts.</td>
<td>A student should listen with understanding to audio stimuli &amp; detect nuances of meaning relating to common aspects of Hispanic culture.</td>
</tr>
<tr>
<td>He should have an active speaking vocabulary appropriate to his age and capacity enabling him to communicate in Spanish.</td>
<td>He should speak &amp; write in culturally acceptable forms &amp; in his speech &amp; writing reveal some knowledge of the heritage of the people who speak Spanish.</td>
</tr>
<tr>
<td>He should recognize in context a wide range of vocabulary items. If he is planning to continue Spanish in college he should do extensive outside reading to familiarize himself with many literary forms, words, &amp; expressions.</td>
<td>He should read everything from newspapers to works of literature with an understanding of its place within the Spanish culture.</td>
</tr>
<tr>
<td>A student should have a writing vocabulary which is appropriate to the occasion.</td>
<td>A student planning to continue his studies of Spanish in college should familiarize himself with literature in his field of interest.</td>
</tr>
</tbody>
</table>

Spoken & written communication employs a large volume & variety of words & expressions.

A knowledge of culturally acceptable forms & of the Spanish heritage is a part of learning the Spanish language. Works of literature can be appreciated best in the language in which they were written.
### Grade Seven in a Six-year Sequence

<table>
<thead>
<tr>
<th>Phonology</th>
<th>Morphology</th>
<th>Syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spanish vowels: a, e, i, o, u; contrast unstressed vowels; consonant sounds; initial &amp; intervocalic: d, g, l; differentiate between systems of stress in Spanish and English; intonation and rhythm in statements, questions, &amp; commands. (See appendix.)</td>
<td>Familiar &amp; polite [pronoun, verb contractions (al, del)]. Regular present of AF, ER, IR verbs. Present of ser &amp; estar. Possession with de. Imperatives. Personal a. Articles, nouns, &amp; adjectives (gender, number), use, placement of no, placement &amp; agreement of adjectives, present with future meaning. Cardinals &amp; ordinals.</td>
<td>WORD ORDER: Statements, interogatives, &amp; imperatives. Position of adjectives. Word order to denote possession. The negative sentence (the concept of the double negative).</td>

<tr>
<td></td>
<td>rhymes</td>
</tr>
<tr>
<td></td>
<td>songs &amp; music</td>
</tr>
<tr>
<td></td>
<td>The units of vocabulary are obviously linked closely to the study of culture. As much of this as possible is done in Spanish.</td>
</tr>
<tr>
<td></td>
<td>Cultural items are an integral part of a language. In listening to or reading the language, one must be aware of the nuances of cultural forms. To speak or write the language correctly also means to use culturally acceptable forms.</td>
</tr>
</tbody>
</table>

In spoken and written form, words make up a language. To communicate in that language one must grasp their meaning, isolated or in context, without conscious reference to English.
## Grade Eight in a Six-year Sequence

<table>
<thead>
<tr>
<th>Phonology</th>
<th>Morphology</th>
<th>Syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dental &amp; velar n. Pronunciation of x, diphthongs. Stress differences between intonational patterns in statements, questions, &amp; commands. Develop auditory discrimination among verb tenses (present to preterite, future, etc.).</td>
<td>Pronouns with prepositions; stem-changing verbs; object pronouns (form &amp; position); possessive adjectives; preterite; imperfect; demonstrative adjectives &amp; pronouns; present progressive; comparison of adjectives &amp; adverbs, future &amp; conditional; relative pronouns; <em>gustar</em>, <em>faltar</em>; indefinite pronouns.</td>
<td>Position of pronouns including affirmative and negative commands, infinitives, &amp; gerunds; difference between positions of demonstrative pronouns &amp; adjectives; position of indefinite pronouns; word order in comparisons of adjectives &amp; pronouns; position of relative pronouns.</td>
</tr>
<tr>
<td>Produce the sounds listed for grades seven &amp; eight in context; variation of verb forms; stress importance of careful pronunciation of verb endings: present to preterite, future.</td>
<td>Use of above in speaking. Suggested activities: use of subject pronouns with prepositions; form &amp; position of object pronouns; change of present to imperfect &amp; preterite; use of <em>gustar</em>, <em>faltar</em>, <em>parecer</em>; change of present to future &amp; conditional; use of present progressive.</td>
<td>Drills stressing the position of object pronouns; differences between the position of demonstrative pronouns &amp; adjectives. Speaking situations in which students make comparisons with adjectives &amp; pronouns.</td>
</tr>
<tr>
<td>Read appropriate material aloud with proper pronunciation &amp; intonation; determine verb tenses by recognizing accents &amp; endings characteristic of the various tenses studied.</td>
<td>Use of &amp; exposure to above in reading activities; short supplementary reading passages emphasizing the forms listed above.</td>
<td>Expose students to supplementary readers combining basic word order in more complicated materials. Provide more complex materials where students encounter basic word order in new contexts.</td>
</tr>
<tr>
<td>Dictations involving the basic principles of stress (<em>hablo</em>, <em>habló</em>, <em>estás</em>, <em>estas</em>). Additional exposure to writing reviewing sounds for grades seven &amp; eight in new contexts. Writing answers to aural questions in Spanish using complete sentences at all times.</td>
<td>Formulate questions requiring students to answer by utilizing the grammatical forms suggested above; other written exercises emphasizing usage of the basic grammar points listed above.</td>
<td>Written exercises requiring an understanding of the form &amp; position of object pronouns, demonstrative adjectives &amp; pronouns, indefinite pronouns, &amp; word order in comparisons.</td>
</tr>
<tr>
<td>Emphasize the fact that stress is so important in Spanish that it changes the meaning of the word.</td>
<td>Differentiation of verb tenses: present, imperfect, preterite, future, conditional, progressive; stress the importance of verb endings to express meaning.</td>
<td>Realization that basic word order in English &amp; Spanish is fundamentally the same with respect to the position of subject, verb, &amp; predicate; however, object pronouns precede verbs unless the verb form is an affirmative command, gerund, or infinitive.</td>
</tr>
</tbody>

<td>Phrases emphasizing the production of vowel clusters, diphthongs, fusion of vowels, &amp; linkage. Tape sounds involving the points listed above — always with practical materials in complete meaningful sentences.</td>
<td>Use of above in speaking. Nominalization; change from present to imperfect subjunctive; use of the subjunctive; passive voice with se &amp; ser; hacer with expressions of time; if clauses in the subjunctive.</td>
<td>Drills emphasizing the position of reflexive pronouns; the word order with gustar, faltar, parecer; the passive voice; hacer with expressions of time. Drills requiring the use &amp; correct word order with the subjunctive.</td>
</tr>
<tr>
<td>Recognize vowel clusters, diphthongs, fusion of vowels &amp; linkage. Practice reading sounds represented by the following spellings: ll, y; qui, que; ca, co, cu; b, v; ge, gi; ga, go, gu, gue, gui; gua, guo, gui. Observance of accents which break diphthongs: cuido, traído, Raúl.</td>
<td>Supplementary readings involving the subjunctive in as many forms as possible. Assign a graded reader or other material incorporating the basic grammatical forms listed above.</td>
<td>Expose students to supplementary readers where basic word order is found in new contexts. Provide more complex reading in order that students encounter basic word order in varied contexts.</td>
</tr>
<tr>
<td>Dictations &amp; other written exercises emphasizing knowledge of written symbols for sounds listed above.</td>
<td>Give students contexts requiring them to choose between the: imperfect &amp; preterite, indicative &amp; subjunctive, sequence of tenses, por &amp; para, the correct use of the passive voice construction. Additional written exercises involving the use of the grammatical forms listed above.</td>
<td>Write short sentences in which word order is stressed: Give the infinitive of reflexive verbs; verbs or expressions requiring the subjunctive; change active to passive voice; cues requiring the use of gustar, faltar, etc. (All material written by the students should be complete &amp; meaningful sentences.)</td>
</tr>
<tr>
<td>Differentiate between syllabication in writing (los-a-lum-nos) &amp; speaking (lo-sa-lum-nos). Realization of the relationship between spelling &amp; sounds.</td>
<td>Realization that people speaking Spanish express ideas with different grammatical structures (por &amp; para, indicative &amp; subjunctive, imperfect &amp; preterite). The subjunctive is very commonly used in Spanish &amp; is necessary if one wants to speak the language idiomatically.</td>
<td>Realization on the part of the student that word order in English is the same as that of Spanish with a few exceptions: position of object pronouns &amp; reflexive pronouns, idiomatic expressions (gustar, faltar), hacer with time, etc.</td>
</tr>

<tbody>
<tr>
<td>1,000-1,500 words &amp; expressions above grade eight</td>
<td>Cultural items studied at this level should include: Spain: government, educational system, recreation, highlights of economy, industry, history, &amp; present political situation; Spanish influence in America: famous Spanish explorers &amp; conquistadores, Spanish settlements in America. The cultural study is done mainly in Spanish with some supplementary reading in English. It takes in: the listening to recordings &amp; viewing of films, filmstrips &amp; slides, the discussing of what has been heard or read; the reading of graded readers, periodicals, poetry, &amp; literary prose; the writing of letters, reports, compositions; all of the above should reveal an understanding of the Spanish culture.</td>
</tr>
<tr>
<td>800-1,000 words &amp; expressions above grade eight</td>
<td></td>

<tr>
<td>800-1,000 words &amp; expressions above grade eight</td>
<td></td>
</tr>
</tbody>
</table>

Each skill demands a certain amount & type of vocabulary. Beyond a general useful vocabulary one needs specific words suitable to the discussion of certain topics. The Spanish-speaking cultures must be evaluated objectively & on their own merits. Spanish culture has made many contributions to American life.

</table>
| **Amount of active & passive vocabulary is a matter of students' individual progress. A high rate of active vocabulary should be aimed for through a wide range of conversational topics, giving the student the ability to communicate in the modern world.** | The increased ability of the students to communicate in Spanish & to read everything from newspapers to works of literature makes possible an appreciation and understanding of Spanish & Latin American contributions to: 
- literature
- painting
- sculpture
- architecture
- dramatic arts
- music |

Choice of literary works is up to the teacher but should be based on the ability, interest, & maturity of the students, developing in them a sensitivity to the differences between spoken & written vocabulary & between contemporary & older literary forms, words, & expressions.

A writing vocabulary appropriate to the occasion should be mastered.

**Spoken & written communication employs a large volume & variety of words & expressions.**

**A knowledge of culturally acceptable forms & of the heritage of Spanish-speaking peoples is a part of learning the Spanish language.**

Current events are listened to, viewed, discussed, read, & written about. Books, periodicals, tapes, films, slides, records, & pictures are resource materials directly used by the students. The choice of these materials is up to the teacher who should take into consideration the age, maturity, ability, & interest of the students.

<tr>
<td>A student should be able to understand standard Spanish in normal conversational contexts.</td>
<td>A student should listen with understanding to audio stimuli &amp; detect nuances of meaning relating to any aspect of Spanish culture.</td>
</tr>
<tr>
<td>He should have an active speaking vocabulary appropriate to his age &amp; capacity enabling him to communicate in Spanish with considerable oral facility.</td>
<td>He should speak &amp; write in culturally acceptable forms &amp; in his speech &amp; writing reveal some knowledge of the heritage of the people who speak Spanish.</td>
</tr>
<tr>
<td>He should recognize in context a wide range of vocabulary items. If he is planning to continue Spanish in college he should do extensive outside reading to familiarize himself with many literary forms, words, &amp; expressions.</td>
<td>He should read selections ranging from newspapers to works of literature with an understanding of the place of each within the Spanish culture.</td>
</tr>
<tr>
<td>A student should have a writing vocabulary which is appropriate to the occasion.</td>
<td>A student planning to continue his studies of Spanish in college should familiarize himself with literature in his field of interest.</td>
</tr>
</tbody>
</table>

To understand, speak, read, & write Spanish one must have command of a large & appropriate vocabulary.

The heritage of the people who speak Spanish is a rich and interesting one. The Spanish-speaking cultures should not be evaluated from the standpoint of Anglo-American culture.
SPANISH
BIBLIOGRAPHY OF READING MATERIAL BY LEVELS

LEVEL I

Verano en Mejico. Dodd, Mead and Co.
Can be introduced in first year.

LEVEL II

Simplified version.

Jarrett. Sal y Sabor de Mexico. Mexican customs in prose, dialogue, and drama.

Rumbo a Mejico. (if available) Heath.

Supervia. La Cruz Verde Vida y Leyendas de Mejico. Odyssey Press.

LEVEL III

Interesting stories (adapted). Cultural aspects of Spanish and Spanish American cultures. Helpful exercises and questions.

Good historical reference material on Spain.

Rich collection of good, interesting stories written by recognized Spanish authors. Exercises and vocabulary especially helpful.

Historical events from discovery by Columbus to modern times. Poetry. Biographies of significant Spanish authors.

García and Wilson, Prada. *Nuevas Lecturas*. D. C. Heath.

All in Spanish with exception of some direction in English.

Por Esas Espanas. Holt, Rinehart, and Winston.

Rodríguez, Mario B. *Cuentos Alegres*. Holt, Rinehart and Winston, 1958.
Entertaining stories with helpful footnotes.

Short stories and playlets, varied reading, which can be prepared as part of a class assignment or for a Spanish program.

Practical vocabulary and idioms, helpful exercises. Content includes geography, stories, literary selections, and fragments of famous poems.

**LEVEL IV**

Interesting stories by variety of Spanish authors.

Casona, Alejandro. *La Dama de Alba*. Scribner's, 1947.
A realistic exciting play set in Asturias, Spain. Idiomatic Spanish.
Good introduction for study of Spanish American novel. Definitely for advanced students.

Manuel, Don Juan. Las Coplas de Jorge Manique. Goldsmith's.

LEVEL V

Mallo. Espana, Sintesis de su Civilizacion. Scribner's.

Marin. La Civilizacion Espanola. Holt.

MULTIPLE LEVEL

Fine stories about each Latin American country with historical background. Use is versatile--simple to complex reading. Third year students.

Evans, P. G. An Elementary Spanish Reader. Scribner's, 1960. Excellent for differentiated assignments--simple to complex with grammar explanation and drills for first to fourth year students.

Giner, Gloria and Nolfi. Por Tierras de Espana. Holt, Rinehart and Winston, 1959. Spanish culture exclusively. Good exercises at end of each chapter. For third or fourth year students.

Lizardi, Jose. *El Periquillo Sarniento*.

One of Cervantes' best works for third or fourth year students.

ADVANCED PLACEMENT

Casona, Alejandro. *La Barca sin Pescador*. Oxford University Press.

Modern contrast to Don Quixote. Humorous with current idioms and local slang. For Advanced Placement students.

Excellent materials of works of famous authors. Written for college students but suitable for Advanced Placement students.

Good selections by popular authors.

LEVEL IV AND V

Aleman, Mater. *Guzman de Alfarache*.

Anonimo. *Lizarillo de Tormes*.

Lizardi, Jose. *Periquillo Sarniento*.

MULTIPLE LEVEL

Adolfo Becques

Amado Nervo

Andres Bello

Dario, Rubene. *Poesias de Jose Marti*.

Manuel Acuna

Sor Juana Inez de la Cruz

Y Los Siguientes:
LEVEL V

Ercilla, Juan de. *La Araucana.*

Hernandez, Jose. *Martin Fierro.*

MULTIPLE LEVEL

Bauer, Olga. *Cortesia y Etiqueta Modernas.*

SUGGESTED REFERENCE WORKS FOR THE SPANISH CLASSROOM

*Cortesia y Etiqueta Modernas.* Gessler Publishing Company, Inc.

2000 Dibujos. For teachers who like to illustrate their own materials.

*Geografia Elemental.* Gessler Publishing Co., Inc.

A survey of Spanish literature, with equal attention to literary achievements in the Americas. Begins with the origins of the Spanish language during the Roman occupation and proceeds with a thorough account of the evolution of the Spanish language and its literature. 220 drawings.

A thorough account of world history from prehistoric times to the Sputniks. 864 illustrations. Two volumes. Cloth.

Complete information on the history of foreign language positions, requirements and qualifications for such positions, work conditions, opportunities for advancement, benefits, economic demand for work in this field, examinations required, licenses and certificates needed, and location of the positions for each occupation that is desired. Soft cover.

A modern treatise on the world's resources and economic development, extensively illustrated and documented with charts, maps and statistics. Cloth.
