This curriculum guide for use in Liberian schools, K-12, describes the responsibility and burden of social studies education as that of providing method for implementing and strengthening democratic attitudes and behavior, knowledge, understanding, beliefs and loyalty in all Liberian citizens. This is elaborated through 21 more specific objectives to be achieved in the teaching of social studies. The general content of social studies instruction for each grade is briefly described. The learning sequence largely parallels that of United States social studies education, beginning with understandings associated with the school and home in first grade, progressing through studies of community, county, country, Nigerian and African geography, history, civics, of Nigeria and Africa, and concluding with a study of world geography, history, and economics. Related documents are SO 000 744 and SO 000 746. (JLB)
REVISED SOCIAL STUDIES FOR LIBERIAN SCHOOLS

CURRICULUM, SYLLABUS (SCOPE AND SEQUENCE)

AUGUST, 1970.
The Place of the Social Studies in the School Curriculum

It is the unique function and burden of social studies to lay a solid foundation and to provide the method for implementing and strengthening democratic attitudes and behavior, knowledge, understanding, beliefs and loyalty in all our citizens. Several major and unprecedented changes have occurred in the Liberian way of life since the war resulting in profound pressures being placed on all our educational endeavors to nurture and develop the highest and noblest qualities of citizenship for effective and useful living now and in future. Thinking and mentally alert citizens and educators are more necessary now and will be so increasingly important in future if we are to appreciate these changes and chart future directions for them for the continual ability and security of our nation. The challenges of the present therefore make it imperative that all our ablest efforts be directed toward the goal of building a sound human foundation based upon knowledge, faith and beliefs in the values of our national way of life.

OBJECTIVES TO BE ACHIEVED IN THE TEACHING OF SOCIAL STUDIES

1. To understand and appreciate our cultural and national heritage and to appreciate the role which various leaders in church, state, public and private life have played in our history.

2. To acquire and appreciate knowledge of historical events and their causes.

3. To know and understand governmental regulations, functions, duties and their daily impact on the lives of all citizens.

4. To practice democratic behavior of justice and fair play at home and at school and in the community.

5. To understand and appreciate the role of the individual in society.

6. To learn the merits of truth and its various interpretations.

7. To develop the ability and willingness to consider controversial issues objectively and how to work with others to solve problems even as a student.

8. To understand the economic policies of our nation and the world and the role played in our economic development by the uses of our natural resources and how to preserve them.

9. To develop attitudes and habits which safeguard property both public and private.

10. To develop a consistent code of behavior toward all people which respects the dignity of all men regardless of race, creed, religion.
To understand the importance to society of each person having the freedom and opportunity to develop his innate capacities to their fullest levels.

To understand the historic and geographic reasons for the behaviour of regional, national groups and communities noting cultural similarities and differences and to appreciate these similarities and differences.

To understand and appreciate the meaning of national unification and integration.

To acquire knowledge of the physical world through the study of geography and to develop an appreciation of the interdependence of peoples and nations.

To learn and understand the interrelationships between man and his natural environment.

To understand that a harmonious family life is the foundation of a stable national life.

To learn and practice the right attitudes and skills for good family relationships.

To understand and appreciate the meaning of jobs and the types of workers necessary to provide for our welfare, and to evaluate each individual's assets and capacities for a useful vocation.

To learn wholesome recreational skills and develop good leisure interests and habits.

To appreciate scientific discoveries for human welfare and happiness.

To develop good work habits and attitudes and principles of cooperative group living.

**SOCIAL STUDIES**
