The third part of a revised series of bibliographic listings relating to the study of youth status projections for residence, income, and family is presented. The original bibliographic listings were accomplished in 1966 and were updated in 1967. The current document replaces Part III of the 1967 report and contains an additional 52 listings (for a total of 194 citations). Specific major headings are residence orientations, income orientations, and family orientations. Sources were made available between 1949 and 1969. (AL)
YOUTH'S PROJECTIONS FOR RESIDENCE, INCOME, AND FAMILY STATUS: A BIBLIOGRAPHY OF RESEARCH LITERATURE. III.

INTRODUCTION

In this age of the "publication explosion" it is increasingly difficult to keep up with rapidly accumulating knowledge in particular problem areas of scientific investigation. As researchers have focused increasing attention on the social-psychological attributes of social mobility, one of the areas of great expansion of effort in the social sciences has been the study of status projections (i.e., aspirations and expectations) of youth. One of the problems facing the growing number of researchers involved in investigating this problem area is that relevant research results are reported in a number of different publications representing diverse disciplines and agencies.

In 1964 we came to the conclusion that there was a need to develop a comprehensive listing of the research literature on status projections of youth to serve in guiding researchers to accumulated information that could be used to plan new studies and to provide a broader information context for interpreting results of studies already completed. Since that time we have attempted to continuously compile citations on all relevant research published on status projections of youth and to share these with others. We published the first series of bibliographic listings in 19661 and one other updated, revised

---

version of these original listings in 1967. This report constitutes one of a series of three reports that is intended to bring up to date the earlier 1967 listings. The three reports in this third, 1970 series are as follows:

*DIR 70-4: Occupational Aspirations and Expectations of Youth: A Bibliography of Research Literature. I.

*DIR 70-5: Educational Aspirations and Expectations of Youth: A Bibliography of Research Literature. II.

*DIR 70-6: Youth's Projections for Residence, Income, and Family Status: A Bibliography of Research Literature. III.

This particular report replaces DIR 67-12, A Bibliography of Literature on Status Projections of Youth: III. Residence, Income, and Family Orientations. The new listing includes 194 citations, an increase of 52 over those listed in DIR 67-12. The new additions are broken down by projections for particular status areas as follows:

Residence - 17; Income - 23; Family - 12.

Our long-range plans are to continually expand and improve upon these listings and to eventually provide selective critical annotations of the research reports cited. Several structured sets of annotations on occupational and educational status projections have already been

*Texas A&M University, Agricultural Experiment Station, Department of Agricultural Economics and Rural Sociology, Departmental Information Report.
In addition, several attempts at empirical and theoretical syntheses based on these listings and annotations have been reported by the senior author.

We seek the reader's assistance in offering suggestions for improvement of these reports and in providing information about any significant efforts -- old or new -- that should be included in these listings.

The development of this report was made possible by the support of the Texas Agricultural Experiment Station. The authors also would like to acknowledge the substantial assistance of the following colleagues who contributed in compiling the original listings or helped in producing this most current series: George Ohlendorf, John Pelham, Sherry Wages, Nelson Jacob, and Jane Dameron. In addition,

5This report contributes to Texas Agricultural Experiment Station Research Project H-2611 and Southern Regional Project S-61, "Human Resource Development and Mobility in the Rural South", of the United States Department of Agriculture (CSRS).
colleagues too numerous to mention have contributed importantly
to the comprehensive nature of these listings by providing us with
information about relevant reports, and we wish to thank them for
their generous assistance.
