Three year course in Russian language at the Chinese-Russian Study Center with the first year of study beginning grade 9 or above.

The program is subject to revision and refinement on the basis of experience of competent Russian teachers in the classroom.
Objectives and Goals to be Reached

The four skills to be developed in the language study are listening comprehension, speaking, reading, and writing.

Listening Comprehension

The student should understand the Russian language as it is spoken by native speakers in situations similar to his own experience. The student should be able to understand conversations based on everyday situations about his questions, about his usual activities in and out of school, stories, brief descriptions of historical and current events, discussions about famous people past and present, passages from plays, books, and periodicals suited to his age level.

Speaking

The student should speak the Russian language in everyday situations with reasonable fluency and correctness, and with pronunciation acceptable to a native speaker; also, he should be able to ask familiar questions, to retell simple stories, to describe historical and current events with which he is familiar.

Reading

The student should read the Russian easily with and without translation. The student should be able to read books and periodicals appropriate to his age level (novels, short stories, poetry, geography, science). The student should
read rapidly for the sense of the story and more deliberately for fuller understanding.

Writing

The student should be able to write descriptions, reports, and informal letters with reasonable clarity and correctness. The student should be able to communicate in writing anything he can say: write simple dialogue and compositions dealing with his own experiences or with other topics.

Familiarity with Russian Cultures

The student should come to realize that language is the essential expression of a people's behavior and outlooks. Mastery of the skills will be accompanied by familiarity with the culture. Students should accept the fact that other peoples attach to their different way of life the same importance he attaches to his. Understanding this he will arrive at a more realistic approach to life and, consequently, a more profound appreciation of other culture systems and of his own. The fact that it is a matter of serious importance to people of other cultures that we try to speak this language is of great significance.

Visual Materials

Visual materials also will be introduced. Films, filmstrips, pictures, Russian postal stamps, magazines and newspapers, Russian music, folksongs.
Reading

From the beginning, the student will read only what he has already learned to understand and say. There are certain "rules" to be observed during this stage:

1. The student reads only what he has already learned through ears and tongue. This material he can read and understand without recourse to English equivalents. The student's early reading is carefully controlled; he can read directly in the foreign language without translating into English. Systematic translation from Russian into English is to be avoided as much as possible.

2. The material which has been read will be discussed. Reading comprehension will be exercised by repetition of most of the words of the question. The teacher asks (in the foreign language) and the student replies in full rather than minimal answers. Paraphrase -- changing from the first person to the third person, from present to past, etc.

3. The text to be read should be suited to the intellectual maturity of the students.

4. Reading in class and extensive reading which will be assigned in class and the text should be analyzed and explained.

Authenticity of Reading Matter

In reading material students will learn the similarities as well as the significant differences between his culture and the Russian. The readings will also be chosen on the economic and social life of Russia. Some of this reading
can be correlated with work in other classes, particularly art, music, and social science.

Writing

Russian writing will be started with the letters and letters elements. At the first stage the student will write only what he has already learned to understand, speak, and read. Straight copying of a Russian text, after this follows dictations guided composition on an assigned topic, and, free composition.

Grammar

In grammar the students should be informed of the reasons why he can profit from an abstract statement and a generalization but teacher should avoid extremes: One is to give the rules instead of the language, and the other is to refuse the students any generalization.
Understanding of the Russian Culture

Russian like any language in the world is both the major vehicle of culture and the most important aspect of culture. The history of the Russian language reflects the development of the Russian people. During this course of Russian the following will be mentioned and introduced to the students.

1. Russian alphabet (Cyril and Methodius)

Materials

1) Textbook to be used

Essentials of Russian
by A. V. Gronicka and H. Bates-Yakobson

and

Graded Russian Reader (For the second semester only)
Part I by Green and Ward

2) Additional material

Language Laboratory: Tapes will be used for comprehension and pronunciation.

Songs: Four Russian folk songs to be learned in class.

Slides: National minorities of Russia would be studied in class.

Postal Stamps: Collection of Russian postal stamps will be shown in class.

Magazines and Newspapers: Second semester students will read and discuss Russian papers and magazines.
The Textbook

The textbook is divided into thirty lessons preceded by two introductory units which set for the Russian printed and written letters and give their approximate phonetic values. Each lesson is divided into seven closely interrelated parts:

I. Common Expressions and Idioms  
II. Reading Exercise  
III. Vocabulary  
IV. Grammar  
V. Questions  
VI. Grammar Exercises  
VII. Translation into Russian

The two introductory lessons contain a brief analysis of the Russian sound system.

The Reading Exercises

The Reading Exercises are the core around which each lesson is organized. They contain all the new grammar and vocabulary introduced in each lesson. A basic principle of the text is to introduce the student to all new material first in the context of the Reading Exercise; and only when it has been read and generally understood, have him turn to the explanation and systematic treatment of the material given in the grammar section and the vocabulary. The Reading Exercises are carefully graded and lead the student from the simple dialogue of the first lesson to selection from the works of N. Nekrasov and L. Tolstoi.
The Common Expressions

The common expressions and idioms should be memorized and applied in short conversations between students.

The Vocabulary

The vocabulary of any one lesson is repeated in subsequent ones.

The Grammar Sections

Grammar discussion develops out of the analysis of the Reading Exercise. The translation sentences from English into Russian also are taken from the Reading Exercise.
