WIDENING CULTURAL HORIZONS THROUGH THE PERFORMING ARTS

ABSTRACT:

A. This proposal "Widening Cultural Horizons Through the Performing Arts" supports a project that will present to all the students of a rural county, live performance in music, ballet, drama and opera.

B. Although school administrators are showing an increased interest in cultural and artistic experiences for students, finances are insufficient to support them. The community offers very little and most children are unable to attend these activities in the metropolitan areas. If the intent of the Elementary and Secondary Education Act of 1965 is to have the impact on cultural and educational improvement for which it was planned, the children from rural areas must keep pace; must have the same opportunities as children from metropolitan areas.

C. We propose that this project is exemplary in that it brings into the classroom the finest artistic performances available. Although planned for all elementary and secondary students, the very young children are given special consideration in a small audience situation where they can hear, see and even talk with the artists.

D. The present program, carried on for five years, involves about 5% of the students. It provides three concerts a year for sixth grade students of Merced City and the 7th and 8th grade students of surrounding rural schools. The children are brought by bus to the Merced Theatre.

E. The arts are an integral part of our civilization. It is hoped that through the performances offered, students will become artistically aware of, and alert to ways in which the arts can enrich their own lives. There should be an increased student participation in artistic activities and a motivation to creativity. There should be academic improvement generally. The community also should become interested in that which is artistic.

F. Three performances a year for all grades will be given by professional groups, students from the Creative Arts Department of colleges and universities and local artists. Also included are presentations by ethnic groups which should give students an appreciation of the artistic contributions of other cultures. An evaluation team, as well as teachers, parents and students will appraise the program.

PROJECT SUMMARY

In May, 1966, a Title III ESEA project entitled "Widening Cultural Horizons Through the Performing Arts" began in Merced County. Twenty-two elementary and five secondary school districts as well as six non-profit private (parochial) schools and two pre-school centers within the county participated in the project the first year. For the second year, Mariposa County schools were added, as well as five other pre-school centers in Merced County. During the third year (1968-69) when districts were asked to support the project by paying 10% of the costs, one elementary school, three high schools and two parochial schools felt they could not afford that added amount to their budget, so did not participate.

Although schools did not have a budgeted cost item for support of the project until the third year, there were other costs they did assume during the
three years of the project -- that of bus transportation for students to and from a performance, custodial help in getting a facility ready for a performance and small items such as piano tuning.

Since the major objective of this project was to bring live performances in music, ballet, drama and opera to students of a rural area, many professional and semi-professional performing groups have participated. The quality of the performances has been excellent and in most cases, very suitable for the age for which they were intended. The rapport between the performing groups and the students has been outstanding.

The following is a summary of the number of performances given and the number of student participations for each of the three years:

<table>
<thead>
<tr>
<th>Year</th>
<th>No. of Groups</th>
<th>No. of Performances</th>
<th>No. of Student Participations</th>
</tr>
</thead>
<tbody>
<tr>
<td>1966-1967</td>
<td>24</td>
<td>606</td>
<td>125,078</td>
</tr>
<tr>
<td>1967-1968</td>
<td>18</td>
<td>391</td>
<td>81,330</td>
</tr>
<tr>
<td>1968-1969</td>
<td>20</td>
<td>427</td>
<td>91,364</td>
</tr>
</tbody>
</table>

It should be pointed out that since the project began in May, 1966, those performance numbers have been added to the 1966-67 figures.

In addition to outstanding performing groups, schools have moved very easily in adjusting to the flexible schedules that the performances require. Class days are interrupted, multi-use rooms are used by many groups, much bus transportation must be arranged for, and yet, most school administrators and teachers
have been very enthusiastic about the program.

Another significant result is the substantially higher level of response coming from middle grade boys as compared to girls of the same class levels. The evaluation reports, letters from students and comments from teachers support this. Also, the excellent response of children at the pre-school level far exceeded expectations.

In advance of each performance, program notes are sent to administrators and teachers. Besides the performance schedule, these include an informative selection to acquaint the audience with the performing group and the pertinent information relative to the performance medium. Also included are suggested class discussion ideas for before and after the performance and suggested materials to supplement it, including films, books and records. Although each set of program notes follows somewhat the same format, the materials in this report include only excerpts from all of the program notes.

Although federal funds terminate at the end of the third year for this project, most schools are continuing to budget some money to carry on the program in a limited way. An effort is also being made to find some other source of funds.

LETS LEARN ABOUT BALLET

WHAT IS A BALLET COMPANY?

A ballet company is an organization.

Everyone in it has a job to do.

Everyone's job is important. The ballet dancers could not perform without help from others.

The people in the ballet company include:

MANAGING DIRECTOR ............ decides which artists to use
CHOREOGRAPHER ................. designs dance patterns
BALLET MISTRESS/MASTER ....... technical manager
BALLET TEACHERS ............... teach the dancers their roles
... conduct daily classes
COMPOSER ....................... writes the music for the ballet
MUSICAL DIRECTOR/CONDUCTOR ... works with dancers and musicians
... directs the orchestra
SET DESIGNER .................... designs scenery to suit the time, place, and mood of the ballet
COSTUME DESIGNER ............ designs costumes which:
1) are attractive
2) suit the story
3) are in harmony with scenery
4) allow dancer to move freely
STAGE MANAGER

responsible for
"mechanics"
1) movement of scenery
2) lighting
3) other "staging" needs

ARTISTS

those who dance the ballet

WHAT IS THE LANGUAGE OF THE BALLET?

There are 5 basic positions. These are performed at the barre.

First Position: Heels together, toes turned out as far as they go.

Second Position: Feet outward in a straight line, heels slightly separated.

Third Position: Used for character dancing.

Fourth Position: Feet turned outward, parallel to each other and slightly separated.

Fifth Position: Feet turned outward, one foot directly in front of the other, not separated.

(All exercises begin, go through and end in one of the above 5 basic positions)

the BARRE:

A railing which dancers hold to keep them in balance as they practice. Every day begins with exercises at the barre.

PORT DE BRAS:

Refers to the use and carriage of the arms. Helps the dancer stay in balance. Adds to the grace of her appearance.
7 BASIC MOVEMENTS OF BALLET:

- Sauté - to jump
- Tourne - to turn
- Plié - to bend
- Tendu - to stretch
- Glisse - to glide
- Elan - to dart

**BALLERINA:** The star female dancer of a ballet company.

**TUTU:** The ballet girl's skirt. It has many layers that look as if they were heavily starched to stand out straight.

**CLASSIC TUTU:** Short fluffy ballet skirt.

**ROMANTIC TUTU:** Long fluffy ballet skirt. Reaches to between the knees and the ankles.

***********************************************************************

These are just a few of the terms comprising the language of ballet. No matter what language other performers speak, they can always communicate. These terms are called the same throughout the world.

* * * * * * * * * * * * * *

Suggested Classroom Activities Before Attending Performance:

1. Adapt the program notes to the individual classroom. Present the material and information well in advance of the program.

2. Discover the individual student's understanding of the ballet through:
   - Class discussion
   - Demonstration (some may be ballet students)
   - Art

3. Tell a story through bodily movement. Plan:
   - The story
   - The music
   - The steps

4. Make use of audio-visual materials listed with these notes

Suggested Classroom Activities After Attending Performance:

1. Discuss impressions of the performance.
2. Tell another story through bodily movement. Compare with the one produced before the performance.

3. Art activities:
   - sketch impressions of the ballet
   - finger paint while listening to ballet music

4. Creative writing:
   - poem
   - story

Workshop
To better understand the people of Mexico, it is necessary to know something of their past. Although native groups of the Indian races have been treated and considered of low caste because of their primitive ways, they are descendants of noble races. Among them have been great artists, architects, engineers, and men wise in astronomy who were builders of strange and brilliant civilizations.

Among these civilizations were the Mayan, the Toltec, and the Aztec peoples who built great stone cities with thriving and thrilling customs, traditions, myths and (gods) religions.

We will tell here the story of the great god Quetzacoatl and the Toltec civilization because of its influence on the later history of Mexico.

"Quetzacoatl lived among the people for many years as a great teacher. He taught them to offer snakes and insects on the ceremonial altars instead of making human sacrifices. He is credited with the invention of the calendar and the art of picture writing. He showed them how to improve their crops. He tried to create a kingdom of happiness out of simple things.

Was Quetzacoatl a man who once lived among the ancient people? Probably he was. One theory is that he was one of the Norse explorers of North America who wandered west and south (from "Vinland") until he came to the Toltec country. If that is true, he had one of the most extraordinary travel adventures ever known. Certainly, a Norseman fits the physical description of Quetzacoatl that runs through all the legends. And these legends undoubtedly embroider fact with considerable fiction, but there had to be some fact to begin with."

Quetzacoatl put on his great feathered headress and his feathered cape and traveled east to the great salt water. There he made a boat and sailed into the setting sun promising to return. This is why many years later the Indian tribes of Mexico welcomes the Spanish explorer Cortez as a returning god.

We tell this story in dance form because through all civilizations the stories of life and death have been danced.

1Mexico - Ralph Hancock, p. 24-25
We will first show you some of the traditional "Ethnic" or "Folk" dances of Mexico. Then we will take you to the year 1000 A.D., where we will dance the ancient story of the people Toltec civilization and the arrival and departure of the god of Quetzalcoatl. The folk dances will be danced as the people of Mexico do them today at their Fiestas. The story of the Toltecs will be danced as a Ballet. Ballet is a refined form of dance that allows the performers to rise to their toes and move more beautifully. The earlier civilizations were unable to do this, in fact they usually danced in bare feet.

Come with us now as we tell the story of an ancient people and their god in the beautiful form of Ballet.

WHERE DID THE MARIACHI COME FROM?

In the state of Jelisco, more than a hundred years ago, roving groups of musicians played for birthdays, village fiestas and marriages. It is said that the name comes from the French word for marriage. Now they are found throughout Mexico still roving, playing in parks, at fairs, at parties, in taverns, on street corners and even early in the morning under windows. They play for pay -- now. They sell songs one by one at a price agreed upon on the spot. They will come to your home to serenade wife, daughter, mother or even mother-in-law on her birthday or saints day. They will "carry the rooster" to a sweetheart's window at four in the morning whenever you wish and whenever you pay for the serenade, by the song, or by the hour.

WHAT IS THIS GROUP OF MOVABLE MEXICAN MUSICIANS?

The traditional instrumentation of the Mariachi is:

Two trumpets
Two violins
Two Spanish guitars
One requinto (a smaller Spanish "soprano guitar")
One vibuela (a fat-bellied, sawed off guitar)
One guitarrro (slightly bigger than the vibuela)
One guitarron (a big, bulgy, unwieldy bass guitar)

Sometimes the group has more guitars or violins, but very, very seldom are there more than two trumpets. Sometimes there are fewer instruments than listed, but trumpet, violin and guitar are the essentials.

The Mariachi Infantil Mexicano comes to us from Monterrey, one of the largest cities of Mexico, a northern industrial metropolis. There are young people of an orphanage who have been playing, singing, and dancing their way across the United States, earning money to support themselves and the more than 300 others of the orphanage there. They are young Mexico carrying on in the old way, bringing the soul stirring Mariachi music of Mexico to us.

There are songs for weeping, songs for shouting, songs for love of the land, songs of history, songs for dancing, and songs of love in the repertoire of every Mariachi.

AND WHAT ARE THESE SONGS?

Sones, jarabes, huapangos, and corridos are among the musical tradition of the Mariachi.
"Son" means sound or song. There are songs of the mountains, of the coast, of the desserts. Some have words and some are dance tunes. Perhaps the best known "sones" are those of Vera Cruz, danced with unbelievable rhythm patterns stamped out by the heels of white clad dancers. The lyrics of these songs are rapid and repetitious, often humorous, romantic and flirtatious. "La Bamba" is a prime example of a Son Vera cruzono.

Jarabe is a name derived from a syrup or sweet drink. It is a dance of many tempos and rhythms and intricate steps. The best known is the "Jarabe Tapatio" or sometimes called the Mexican Hat Dance. There are also many other varieties of Jarabe.

The "huapango" rhythm is a catchy version of the waltz. The huapango guitar strum is the background for many romantic and poetic songs. The lead singer soars high into falsetto as in "Malaguena Salerosa". The minor key is often used in huapangos fitting the plaintive poetry of the lyric.

"Corridos" are the story songs of Mexico and are usually in waltz rhythm with a countermelody played by the trumpets or violins. The lead singer often tells the story with the others filling in on chorus lines or they will take turns telling parts of the story. "Juan Charrosoquato" is a favorite corrido made famous by Jorge Negrete, the singing actor, hero of many an adventure movie. Some corridos are written, but most are part of the oral tradition known as folklore. They are about events, about people and places. There is even one extolling the joys of having the Olympic Games in Mexico.

The Mariachi music of Mexico is anchored in antiquity and laden with tradition. Much of it is learned by ear and is note for note the same for all instruments whether heard in Mexico City or Mazatlan. There are figures of obligato or embellishment that are played identically in Fresno and Guadalajara. The trumpets often have this decorative task.

Melodies are plaintive, poignant or picturesque by turns, while harmonies are usually in thirds on the major scale. Chord progressions are usually simple, though key changes frequently occur in the middle of a number. Changes from major to minor seldom occur within a song.

Classical in form, unchanged and unchanging, Mariachi music continues throughout Mexico. Once regional in character, now it is nearly universal with minor differences in instrumentation and style.

If you wish something typically Mexican, the Mariachi comes first to mind.
Suggested Class Activities Before Attending the Performance

1. Motivate discussion by such questions as:
   Do the Mexicans have a right to call themselves Americans? Why? Why not? (Larralde says: "...in truth, all the peoples of the countries that form the Western Hemisphere should be known as Americans too").
   How many of you have been in Mexico? Did you see any wondering musicians? What kind of music did you hear? (Guitar, marimba, etc.)

   Music is made up of rhythm, melody, and harmony. Can you name a song from Mexico that you like best because of its rhythm? One you like because of its melody? One you like because of its harmony? (Use song books to try to discover some songs from Mexico)

2. Discover: (Use music series to find songs from Mexico.)
   How many have you learned?
   What are most of the songs about?
   Are the rhythms even or uneven?
   Is the harmony happy or sad?
   Do you think the melodies easy to learn?

Suggested Class Activities After Attending the Performance

1. Art Activities:
   Individual expression of reaction to performance
   Group expression: planning and making a mural(s)

2. Language arts and music correlation:
   Select a favorite tune from Mexico - discover:
   rhythm meter phrases
   Determine a theme. Write new words to fit tune. Can these be translated into Spanish? How? By whom?

3. Find or make:
   Rhythm instruments. Plan a rhythmic accompaniment for a well-known Mexican song. Write down the rhythm pattern for each instrument.

- 32 -
4. Listen:
   To music from Spain
   To music from various sections of Mexico - Compare and contrast

5. Oral reports:
   Suggested topics:
   - Music of the Aztecs
   - Musical Artists of Mexico
   - The Music of Chavez
   - Orchestras and Bands of Mexico
   - Impressions of the Mariachi Band
   - Things I Didn't Know Until Now About Mexico and Its People

MATERIALS: (to supplement performance)

FILM: 16mm available from Merced County Schools Audio-Visual Department
   - Toot, Whistle, Plunk, and Boom
   - Native Arts of Old Mexico
   - Airplane Trip to Mexico
   - El Cumpleanos De Pepita
     (Party - shows music of Mariachis)
   - Harmony in Music
   - Rhythm is Everywhere
   - Mendez, Rafael (The Trumpet)
   - Give and Take with Mexico
   - Mexican Children
     (shows "contrasts", cultural heritage)

BOOKS: (used to prepare these notes)

Larralde, Elsa. The Land and People of Mexico. Lippincott, 1964
Londeck, Beatrice. Echoes of Africa in Folk Songs of the Americas.
Schwendener and Tibbets. Legend and Dances of Old Mexico.
AN INTRODUCTION TO AFRICAN MUSIC

There are many things which confuse the American when he first hears African music. For one thing, he listens with American or Western ears. He is used to creating his own music as though it were the one true music, and when he is confronted by another kind, having relatively little in common with his own, he naturally feels himself to be a total stranger in a new world.

There are many unfamiliar intervals in African music. In fact, we might wonder whether the African can keep in tune at all. But as all singers commit the same "mistake", there must be some explanation, especially as the song seems to develop spontaneously, and with a joyfulness which does not leave the Westerner unmoved.

The African's freedom from ordinary musical rules takes other forms as well. His wholehearted participation in the song is unmistakable. Free flowing and unrestrained, it is often accompanied by rhythmic handclapping and graceful body movements. The listening American experiences a new sensation. He finds it difficult to decide what is the connection between melody and movement, since there is nothing here which can be fitted into regular 2 or 3 time. Handclapping which should mark some kind of accentuation, never occurs at the place where the listener would wish the accent to be. Nevertheless, there must be coordination even here, as all the singers perform their handclapping with a metronomic precision.
An African never speaks of musical scales because he does not know that they exist. A scale in the Western meaning of the term, in fact, never occurs in African music, where scales are neither played or sung.
MUSIC IN EVERYDAY LIFE

Music plays a very important role in the daily life of the African—it is, in fact, one with the whole course of his life. Often it is the interpretation of a course of events. If nothing is happening, the music is usually missing.

African music has an enormous range of expression, with considerable variations in style, from simple to richly-developed melodies. There are joyful, careful melodies; there are also heavy melodies, expressing sorrow and pain, and festival melodies, sung at special feasts and celebrations.

But whatever form the melody may take, it nevertheless can only be finally explained in conjunction with its rhythm. It sometimes seems that melody and rhythm have nothing to do with each other, but after much listening, there is seen a remarkable degree of coordination.

Spontaneous music inevitably gives rise to movement, and bodily movement develops into dance. Thus, we have the three primary elements in African music:

3. Dance. Characteristics of the dancing which we will see in "Les Danseurs Africains Du Mali."
THE AFRICAN DRUM

A large variety of drums are often used with the song and dance, as we shall see in the forthcoming performance. However, in many regions of Africa, a stick or hollow log will often suffice when percussion instruments are needed. The two main groups of African drums are:

1. Slit-drums, all-wooden
2. Drums with skin tops which are used in pairs, one giving a high note and the other a low note.

On the following pages, the students will see drawings of drums very similar to those which will be used in the forthcoming performance.
WOODEN DRUM
Large drums of this variety come in various sizes ranging from 2 to 6 feet in height. The drum head is most often made from the skin of an antelope or cow, though in the Northeast the elephant's ear and water-lizard skins are popular.
The African "Talking" Drum. Generally associated with the Yoruba tribe in a more southern part of Africa, the talking drums form a complete family. This drum is shaped like a narrow barrel whose inner structure is a hollow dumb-bell shaped wooden frame. The two open ends of the frame are covered with kidskin membranes. The most important part of the drum is the leather ropes which connect both ends of the frame. By squeezing these ropes, the drummer can tighten or relax the membranes and regulate the pitch of the sound, and, thus, can make the drum actually "talk" in a language known by tribal members.
A set of four drums tied together, resembling American Bongo Drums

One of the most popular instruments which will be featured in "Les Dansers Africains Du Mali" is the BALIPHON, similar to the American Marimba. Wooden keys are tied to a frame, either straight or curved gradually or almost to a complete circle, placed over a row of gourds or wooden bowls and struck with sticks or mallets. Since this instrument is capable of producing beautiful melodic sounds as well as exciting percussive effects, it is equally classified as a melodic - percussive instrument.
AFRICAN SONG

The typical African song is short, rarely exceeding 16 bars. However, when the listener sees the imaginative extension of this in the ballet, then he can truly appreciate the creative musicianship of the African. Each song is repeated over and over again, sometimes for as much as 2 or 3 hours at a stretch.

1. Types of songs:
   a. Songs of sadness
   b. Native love songs
   c. Satirical songs
   d. Hunting songs
   e. Occupations songs (hoeing, thrashing, stamping corn, etc.)
   f. Action songs
   g. Dance songs
   h. Game songs
   i. Children's songs
   j. Mimic songs
   k. Praise songs

2. African characteristic style of singing:
   a. Rich resonance of male voices
   b. Deep compass of basses
   c. Student quality of female voices
   d. "Scoop" up to the first note of each phrase
   e. Use of portamento (sliding from interval to interval)
   f. Warming-up process which results in an emotional crescendo as the music proceeds

The facts presented thus far are truly appreciated only when the audience is completely surrounded by drums as the program begins. The curtain then opens to reveal a stage dominated by a huge replica of the West African landscape. In front of this impressive shrine is a chorus of men and women dressed in colorful cotton prints, rotating their shoulders first one way and then another to the music.
STRINGED INSTRUMENTS

To be used in the performance

A single-string violin or REBEC of heavy Arabic influence

A six-stringed guitar-like instrument also of Arabic origin
Close-up of a KORA, a 21-stringed harp-guitar, showing calabash (gourd) construction and method of playing.
THE DANCE

One does not speak of African music without associating it with dance, or better yet, movement. The African Ballet can easily be summed up in that one word, movement. No song is sung without bodily movement. These movements on stage will vary from the graceful sway of the group to the accompaniment of a lovely folksong, to the unbelievable gymnastics performed by the acrobats.

Dance movements are similar to those found in other countries. For example:

. . . a single individual may move alone
. . . partners may move together, however, this is very rare
. . . one may lead a group
. . . one may dance in the middle of a group
. . . the dance may be quick or slow
. . . the dance may be heavy or light
. . . the movement is usually very graceful
. . . the dance is always accompanied by instruments, percussion or stringed, and usually has a choral background
ST. MATTHEWS CHOIR

FOREWARD TO THE TEACHER:

Negro folk music is more than haunting melodies, humor, and plaintive tunes. In it one discovers not only a cultural continuity and a relationship with other existing traditions, but also a really significant and large oral literature. Courlander says that to look at any single spiritual as just a "song" or an "example" is missing the larger picture altogether.¹ It is only a SINGLE POINT OF CONTACT with a RICH AND INTEGRATED RELIGIOUS VIEW OF LIFE.

The importance of providing the student with a thorough background for this program cannot be over-emphasized. Adequate preparation will insure a uniquely valuable experience from at least two standpoints: Musical and sociological.

If the Program Notes are adapted to grade level, ability level, and socio-ethnic aspects of each class through the resourcefulness of the individual teacher, the students should be stimulated in the direction of appreciation and understanding as they listen to the St. Matthew's Choir.

Program Notes which follow include:

1. Information about the performing group
2. Thought patterns
3. A read aloud section
4. Suggested discussion before and after attending the performance
5. Materials to supplement the performance including 16mm films, records, books

¹ Courlander. Negro Folk Music U.S.A.
THE ST. MATTHEWS CHOIR

Nathaniel White, Director
St. Matthews Baptist Church

Comprised of: adults from the church
volunteer singers

Dedicated to: presenting and preserving the traditional gospel
songs of their rich heritage

THOUGHT PATTERNS

MORE THAN the spiritual

Negro religious
music ranges
wide and deep

"Spiritual" not adequate
to describe Negro religious
music

. "square" songs reflecting white
hymns

. rocking and reeling songs

. two part prayer songs

. spirited tunes that are really marches
marches

. shouts that call for percussive
effects by clapping and foot
stomping

. songs accompanied with tambourine
guitar, drum, harmonicas

. ecstatic moans and groans

. religious songs of street singers

. gospel songs calling on sinners
to reform

. songs describing scenes from the
Bible very dramatically

</tbody>
</table>
THEMES PROJECTED in Negro religious music

- represents Negro as a thoughtful human being
- reveal his aspirations
- were the earliest and most impressive means for making the world conscious of the Negro and his music
- represent the crowning glory of Negro music
  example: Deep River

WORDS MARKED BY

faith        love
humility    salvation

- pinpoints events and stories recorded in Old and New Testaments
- economy of statement
- rich and fresh scenes
- capacity to evoke recognition and response

STANDARD IMAGES

Elijah's chariot

- represents transportation to heaven
- heavenly ascent to all who are saved

Train

- represents modern transportation heavenward to those who are saved
Some tie train image to chariot

Example:
"Who's that ridin' the chariot?
Well, well, well.
One mornin'
Before the evening
Sun was going down
Behind them western hills,
Old Number Twelve
Comin' down the track.
See that black smoke.
See that old engineer......"

Others show train has slightly threatening character

Example:
"Oh, the little black train is a-comin'
I know it's goin' to slack;
You can tell it by its rumblin'
It's all draped in black.

The train we are singin' about,
It has no whistle or bell,
And if you find your station
You are in heaven or hell.

There's a little black train and an engine,
And one small baggage car;
You won't have to have much baggage
To come to the judgment bar."

Double Meanings

- All Negro religious songs understood by slaves in light of own immediate condition of servitude
- Situation of Israelites in Egypt easily identified with people in bondage
  example: Steal Away
  Go Down, Moses

- 50 -
More generalized themes

- Without direct allusion to Biblical scenes
- Contain idea of death or Christian behavior

GENERAL: TOTAL PICTURE SHOWS

- Negro musical (religious) matter: rich, panoramic
- Great variation in subject matter
- Well spring of inspiration and imagery

INFLUENCE ON COMPOSERS

Antonin Dvorak
(1841 -1904)

- Czechoslovakian composer
- Visited America
- New World Symphony: theme, inspired by melodies of spirituals

George Gershwin
(1898 -1937)

- Folk opera: Porgy and Bess
- Story takes place in south
- Music popular representation of characteristic sound of; blues, spirituals, plantation songs of Negro

TRAITS IN PRESENT DAY NEGRO MUSIC

- rhythm predominates
- song and dance united
- solo lines alternate with chorus refrains
- love of singing in harmony
- ability to carry on simultaneous rhythms

Came from Africa
(Excerpt from North Star Shining by Swift. This is a pictorial history of the American Negro. Harriet Tubman is recognized in almost every account of Negro religious music.)

* * * * * * * * *

(Excerpt from Famous Negro Music Makers by Langston Hughes. The Fisk Jubilee Singers were responsible for establishing spirituals as respectable music.)
THE GREY EAGLES

FOREWORD:

"Many of us still consider the music of the American Indian as...full of whoops and calls, monotonous drum beats and unintelligible words. When we listen or sing, let's approach it from the Indian's point of view. The American Indian is part of a race wherein we find all the dignity of ancient civilization and culture. Truly, he's an aristocrat among primitives...a sensitive, poetic and reserved nature, regardless of an obvious love for showmanship, the dramatic or the spectacular...They have an intense spiritual understanding that is part of daily living and this understanding is deep-rooted".1

EAGLE DANCE SONG
(Papai Indians)

The eagle rises,
The wings swoop upward.
High toward the sky
The great bird moves.
Its plumes are filled with prayers.
Earth and Heaven are one.
The eagle rises!

The Program Notes which follow include:
- information about the artists
- A read aloud section
- Background information for class preparation
- Additional materials available:
  16mm records prints books

1Hofmann, War Whoops and Medicine Man.

- 54 -
WHO ARE THE GREY EAGLES?

The GREY EAGLES are a husband and wife team who now dance profession-
ally. Of particular interest to school personnel in Merced County is the
fact that Grey Eagles is the Indian name for Charles Haynes whose father is
principal of the Galen Clark School in Merced. An interview with Mr. Haynes
revealed the following information:

- The dancers create their own costumes.
  Some 400 fluff and feathers are needed per costume.
  The feather work takes from 3 to 10 days to complete.
  The bead work requires about a month.

- Most dances imitate the actions of animals and/or birds.
  Therefore, the steps and body movements are planned and executed
to portray these actions.
  Example: The HORSE-TAIL DANCE

- Dances range in mood from serious to comic; simple to complex.
  The HOOP DANCE is the most complex.

- The term "War" Dance implies "contest" rather than preparation for
  war.

- Mrs. Haynes will perform a prayer in sign language.

- The SWAN DANCE depicts the first snowfall.

- In a CONTEST, the dancer must LISTEN INTENTLY TO THE
  DRUM. WHEN THE DRUM BEAT STOPS, a GOOD dancer will
  "FREEZE". That is, he will stop at once. This means he will
  not bat an eye or take a breath.
  Of course, the drummer will try to trick the dancer.

- In the Haynes family:
  Charles Haynes (Grey Eagle) - First Place, World's
  Championship Contest
Mrs. Gather Haynes (Charles' mother) - Second Place, W.C.C.
Tim Haynes (Charles' brother) - Third Place, W.C.C.
Contests are usually held in the summertime.

Grey Eagle's professional career includes:
Indian Dancer at Disneyland
Around the world with the Harlem Glob Trotters
In Japan with Casey Tibbs and his Wild West Show
National School Assembly Programs

INDIAN MUSIC AND DANCE............................ Tell us all about it!

A basic thought: The American Indian is a child of the open world.
The source of his music is life in that world.

Therefore: His songs and dances imitate sounds and actions of all that is part of his life.

When the Indian dances: Sound and Motion Are A Rhythmic Unit
His whole body becomes expressive.
Motions are sharply vivid and natural.

Tribes Vary In Modes of Dancing
Yet there are two COMMON CHARACTERISTICS:
dramatic action rhythmic precision

An Indian has said: "The White Man Dances With His Legs, The Indian With His Individual Muscles".

Instruments used:
Percussion - Drums, rattles
Wind - Whistles, flutes

Indian tunes in modern compositions:
American composers add music of their own to Indian tunes.
Examples:
MacDowell: "From An Indian Lodge"
Uses the mourning song of an Indian woman for her lost son.
Cadman: "From The Land of The Sky Blue Water"
Uses flute call

Lieurance: "By The Water of Minnetonka"
Uses flute call.
INSTRUMENTAL MUSIC

Total project instrumental performances = 361
Total number of student participations = 52,809

THE FRESNO CHAMBER GROUP

presents

"WHAT'S IN A DANCE?"

Personnel:

- Violin
- Viola
- Cello
- Bass
- Harp
- Flute
- Mezzo-Soprano
- Narrator

- Betty Iacovetti
- Manny Kaufman
- Shirley Douty
- Richard Douty
- Doris Welton
- Frank Langone
- Patricia Zapp
- Patricia Zapp

PROGRAM

Jig - Purcell
Introduction of Instruments
String Demonstration
Loure - Bach
Czech Dance Song - Trad.
Minuet - Haydn
Spanish Dance
Harp Demonstration

Pavane - Ravel
Blue Danube Waltz - Strauss
Vienna, My City of Dreams - Sceiznsky
Slovanic Dance - Bolikov
Dance Calabresi - Morelli
Whistle While You Work - "Snow White"

SOMETHING SPECIAL IS COMING! LET'S FIND OUT ABOUT IT!

The Fresno Chamber Ensemble

What's "chamber"?

"Chamber refers to a room or small auditorium."

(That's why this program is coming to us!)

What's "Ensemble"?

Ensemble is a small group of people making music together.

- 61 -
Will the ensemble sing or play? How many are in it? The Fresno Chamber Ensemble will play. There are 6 players and one singer. (We could say: 6 instrumentalists and 1 vocalist)

What instruments will we hear? Violin, viola, cello, string bass, harp, and flute

What kind of a voice will the vocalist have? A mezzo-soprano voice

What kind of music will they play and sing? The ensemble will play dance music, but it's not dance music of today

What kind of dance music is it then? It is different kinds of different countries from different times (years)

What should we know before we hear the music? Many things

WHAT WE SHOULD KNOW!

About the instruments: (Teachers: Additional aids under Materials)

The Violin:

- A stringed instrument played with a bow
- Has the highest voice of the string family
- Made of about 70 pieces of wood, glued together, and varnished
- Four strings are stretched over the bridge, fastened at one end to the pegs and at the other to the tail piece. The pegs tune the strings
The Bow: The bow is as important to the violinist as breath is to the singer.

About 29 inches long with about 150 hairs, and is loosened or tightened by turning a screw at the end of the bow.

The back (stick) must be strong but elastic. Finest bows are made of pernambuco wood from Brazil.

The Viola: Oldest member of the violin family.

Looks like the violin, but is larger and more mellow in tone; a deeper voice (the larger size, longer thicker strings make it sound lower).

Also played with a bow.

The Cello: Whereas violin and viola are held with the chin, 'cello is held between knees, and rests on a spike (end pin) on the floor.

Tone is full and rich.

In early days church choirs used 'cello to blend with voices.

Also played with bow.

The Bass: The largest of stringed instruments.

Player stands; strings thick and long; deep voice.

Tone is heavy and gruff; a firm background for melodies of other instruments.

The Harp: Has 47 strings and 7 foot pedals.

Does not always play with an orchestra.

Is not called a member of the string section even tho' it has strings, because it is not played with a bow.
The Flute: Many years ago almost all "gentlemen" played the flute

Was once made of wood. Now of metal

Considered a member of woodwind family

Player blows across (not INTO) a hole at one end

Tone silvery and clear. Blends with voices

The Voice: Mezzo-Soprano means a female voice of medium pitch; neither too high or too low

---

STORIES OF COMPOSERS

JOHANN SEBASTIAN BACH

The little town of Eisenach in the country of Germany is a kind of story-
book town. Red, pointed roofs and tall steeples poke through treetops at the
foot of a great mountain. On top of the mountain is a very old castle. In those
days, every castle had its musicians. The Bach family who lived in this part of
Germany had been famous music-makers as far back as anyone could remember.
In 1695, there was a new Bach baby, named Johann Sebastian. As soon as he
could hold a fiddle, his father began to teach him. At the age of eight, he
went to school - from SIX in the morning, all day, and all summer!

As he grew up, he continued to study and learned to play the organ. He
became a teacher and choir director as well as writing or copying all the music
the choirs used.

"Like the old woman who lived in the shoe, Bach had so many children
he scarcely knew what to do. So he taught them all to sing and play, which
was much better than spanking them soundly and sending them to bed, as the old
woman did"1

Bach earned only about a hundred dollars a year. Yet that seemed to be
enough for the whole family, including twenty children! One thing that saved

money was all the things there WEREN'T! . . . motor cars, movies, newspapers, not many books! Can you name some others? They amused themselves by making music. And, of course, they had to have music, so Bach wrote pretty sets of dance tunes.

See what else you can learn about Bach and his music.
THE MERCED CHAMBER ENSEMBLE

presents

"A MUSICAL KALEIDOSCOPE"

(from "Snow White and the Seven Dwarfs")

Andante
(from String Quartet #68 - Haydn)

Twa Guitars
Russian Gypsy Folk Song

Come On and Join Into the Game

Tomcats

La Danza - Rossini

The Merced Chamber Ensemble

What kinds of music will they play and sing?

What is a kaleidoscope?

A KALEIDOSCOPE of music

It is a round tube which contains bits of colored glass. The tube is looked into, and as it is turned, the bits of glass change in form and pattern.
What would a MUSICAL KALEIDOSCOPE be?  
A musical program in which the kinds of music which are played change in form and pattern as the program goes on.

What should we know before we hear the music?  
Many things.

How Music is Like a Kaleidoscope

A kaleidoscope has many colors.  
So does music.

A kaleidoscope changes patterns  
So does music.
(Can you think of others?)

Each change of color and pattern as we look at a kaleidoscope gives us a different feeling.

Each change of color and pattern in the music we listen to gives us a different feeling.

Let's Talk About a Color . . . "red"

What feeling do you get when someone says "red"?  
Goy? Bright? Happy? Angry? Hot?

Why did you get that feeling?  
Probably you saw the color in your mind's eye.
What happened inside your mind when you heard the word?  
Or perhaps what you saw gave you a certain feeling.

How did you describe (tell about) that feeling to others?  
You used words. The words gave others the feeling you wanted them to have.

We use words to describe color.  
A composer uses notes.

And so we could say that . . .

Our "COLOR IMPRESSION" of music depends on: the FEELINGS we get from the SOUNDS that we HEAR.
Is There a Musical Language? Yes, indeed!

The musical language has:

**MELODY** . . . notes, one after the other, arranged with:
- up-ness
- down-ness
- same-ness

**RHYTHM** . . . long and short tones, heavy and light beats

**HARMONY** . . . two or more notes sounded together

**FORM** . . . music that is:
- the same
- almost the same
- different

That is:
- one-part (same music every stanza)
- two-part (a tune and a contrasting tune)
- three-part (the tune, a contrasting tune and the first tune again)

example: "O Christmas Tree"

How Does a Composer Decide What Instruments to Use?

Each instrument has its own sound We say "tone color".

The composer: decides what he wants to say, musically

knows what feelings he wants you to have as you listen

decides what instruments would be best to:

. . . say what he wants to say
. . . in the way he wants to say it
. . . give you the feeling he wants you to have
SOMETHING TO LEARN SO YOU CAN JOIN THE ENSEMBLE AND VOICE

This song is so easy to learn. Once you know it you will be able to "perform" with the ensemble and vocalist.

"Let everyone (clap hands) like me,
Let everyone (clap hands) like me,
Come on and join into the fun,
You'll find that it's always the same,
Let everyone clap hands like me."

Now try substituting: whistle, yawn
sneeze, laugh
stamp feet, etc.

Suggested Classroom Activities Before Attending the Program

1. Use Program Note information and materials.

2. Discuss:
   Moods  Feelings  Sounds
   Play musical examples. Decide what mood? what feeling?
   What sounds (instrumental, vocal)? Other related ideas.
   Can you name a tune that makes you feel happy? sad? like marching? like dancing? etc.

3. Discover:
   Why the above-named tunes make you feel this way. Is it the rhythm? the melody? the kinds of instruments you hear playing?

4. Art activity:
   Play selected music with distinct feelings (contrasting). Children have crayons (or paints) and paper available. As they listen, have them use the color or colors (that the music makes them think of) on the paper.

5. Listen:
   to many records.
6. See:
   A variety of films from film list.

7. Display:
   Pictures of the families of instruments.
   Pictures, works of art, related to the conveyance of feelings through the use of color.

Suggested Classroom Activities After Attending the Program

1. Discuss:
   Impressions of the performance.
   What part of music you would choose if you were going to make it your life's work: composer, conductor, players?
   What piece you enjoyed the most. Why?

2. Art activities:
   Sketch impressions of performance.

3. Discover:
   More about "sound". What makes it:
   on the violin and viola
   on the piano
   the voice
THE SYMPHONIC BAND

(A BAND DESIGNED TO PLAY CONCERT MUSIC)

WHAT WILL WE SEE ON STAGE?

The members of the band, including:

5 flutes (piccolos interchangeable)
(approximately)
2 E-flat clarinets
24 or more B-flat clarinets
2 alto clarinets
2 bass clarinets
2 or more oboes (one doubling on English horn)
5 saxophones (sop., alto, tenor, baritone, and bass)
4 or more B-flat cornets
2 or more B-flat trumpets
4 to 8 French horns
4 to 6 trombones
2 to 4 baritones
2 E-flat tubas
4 B-flat tubas
2 string basses
1 harp
1 set of tympani
3 other percussion

(Note: This is a suggested instrumentation as set by National School Band Association for symphonic band for Class A schools)

The Conductor ................. The Captain of the Team*

WHAT DOES THE CONDUCTOR DO...AND WHY?

Every member is master of his instrument,
BUT ................... he is on INDIVIDUAL

When the conductor raises his hand
the INDIVIDUALS ...... become a UNIT

*Commins. All About the Symphony Orchestra, p. 47., Halo and Co.,
Eau Claire, Wisc., 1961
The UNIT becomes an INSTRUMENT through which ........ the CONDUCTOR presents the music.

His task is to ............... bring out full beauty of music........ achieve precision
...... know what every instrument can do
...... draw musicians with him (leadership)
...... distinguish every tone produced by every musician
...... hear total blend of sound produced by all

HOW DOES THE CONDUCTOR ACCOMPLISH THIS TASK?

Technique begins with study and practice in use of HANDS.
THE HANDS SPEAK FOR THE CONDUCTOR.

The GESTURES are MEANINGFUL SIGNALS
...... right hand: beats accents cues

...... left hand: interprets

...... whole body: emphasizes

COULD I TELL HOW MANY BEATS IN A MEASURE JUST BY WATCHING A CONDUCTOR?

Yes there are the patterns:

2-beat measure

3-beat measure

4-beat measure

-72-
A Festive Overture ............................ Alfred Reed

A Festive Overture is in traditional overture form, a brilliant opening allegro followed by a reflective, lyrical interlude and concluding with a return to the first themes and mood. The entire work is built on three motifs, which are heard in the first section, with the middle section developed from one of these, which first appears as the bass line to the main theme. In the course of the work the full resources of the modern, integrated concert band are called upon, to present the motifs in constantly varied forms and combinations, and in scintillating tone colors.

Irish Washerwoman .............................. Leroy Anderson

This is from Anderson's Irish Suite. It is based on an old Irish jig, a type of dance, which I'm sure everyone will find familiar.

Toccata and Fugue in D Minor ...................... J. S. Bach

Not the least among Bach's claims to greatness is his treatment of the organ and his appreciation of it as a vehicle for creative art. Some of his grandest conceptions are to be found in his organ works, and the Preludes and Fugues include many of his loftiest compositions for the instrument.

The Toccata and Fugue in D Minor, classed among these, consists of a brilliant introduction, alternating slow and fast, followed by the fugue, the subject of which is a short figure in sixteenth notes.

Change of Pace.................................... Sammy Nestico

Sammy Nestico is an instructor and arranger at the Navy School of Music, Washington, D.C. This march is just what the name says, A Change of Pace.
Erik Satie wrote his three antique dances, Gymnopedies, in 1888 as Piano Solos. Two of them, numbers I and III, were subsequently transcribed for small orchestra by his friend, Claude Debussy. In his orchestration, however, Debussy reversed the order of the dances so that number III comes first. This builds an increase of both dimension and sound, making for a logical form and maintaining the listener's interest.

Featured will be Jill Weber and the rest of the flute section: Steve Bristow, Joe Redman, Jennifer Waldron, and Karen Westphal.

Gordon Jacob is an English composer and like his contemporary, Ralph Vaughn Williams, uses English folk tunes as the basis of his compositions.

Henry Fillmore was one of the most brilliant circus band-masters of his day and was also conductor of the Municipal Band of Cincinnati, Ohio. His Honor, dedicated to the mayor of that city, is a brilliant essay in the best circus band manner.
THE CHAMBER ORCHESTRA

WHAT IS CHAMBER MUSIC?

In 1622 Henry Peacham wrote:

Chamber music is the most delightful and inoffensive recreation.

It is:

..for friends to share
..best in a small hall
..intimate
..clear
..enjoyable

WHEN (IN MUSICAL HISTORY) DID IT DEVELOP?

In the Baroque Period (before 1750)

..one player per part
..no conductor

In the Classical Period (1750-1825)

..instrumental music favored over vocal
new form emerged

..string quartet (2 violins, viola, cello)
contrast with Baroque

..keyboard player merely accompanist (Baroque)
..piano becomes equal partner (Classical)
orchestra:

..parts written to include:
pairs of flutes
oboos
bassoons
horns

Haydn's scoring:

..6 violins I 2 oboes
6 violins II 1-2 bassoons
4 violas 2 horns
2 'celli 2 trumpets
2 bassos 2 tympani
2 flutes

- 75 -
WHY DO COMPOSERS ENJOY WRITING FOR CHAMBER GROUPS?

Because there are so few players per part and such a small number of types of instruments, the composer is challenged to do his best work. He must do so much with so little, to put it simply.

DOES CHAMBER MUSIC START WITH THE BAROQUE PERIOD?

Quote from CHAMBER MUSIC: A Hyatt King

"In Spain, the practice of chamber music was of great antiquity, greater perhaps than in any other country. In the cathedral at Pamplona there exists a finely carved ivory box made in Cordoba in 1005, and showing an ensemble of a lute, a double pipe and a kind of a viol."

WHO IS THE FATHER OF THE MODERN VIOLIN?

An Italian named Betolotti (da Saio). He was dissatisfied with the existing instruments called viols. The tone was small and had no brilliance. At last, Betolotti produced a model which was copied by others. It had these characteristics which have become standard:

...strings reduced to four
...less cumbersome
...simple in design
...bigger tone and brilliance

TO: Administrators and Teachers - grades 7 - 12
FROM: Lois M. Bigelow, Music Education Consultant
RE: Performing Arts Program - Vince Guaraldi Jazz Trio

The first performance for students, as provided by the Performing Arts Project, Title III, ESEA, is by the Vince Guaraldi Jazz Trio from San Francisco. This concert is for some of the grade 7 - 12 students of Merced County. Other performance groups will be provided for other students.

The purpose of the project and these performances is to bring to students experiences with many kinds of music and other performing arts - to widen their cultural horizon, not merely bring entertainment. Program Notes (prepared by Catherine Clark) including information about the performance and the performing group are sent to each school. Also included are suggested 16 mm films, books, and records to enhance the appreciation of each program. It is very obvious that students who have had some preparation before attending any concert have considerably more understanding and acceptance of that performance.

We hope that you will also discuss with the students the importance of courtesy toward the performing group and to the other students who are enjoying the performance. Someone should be given the responsibility to host the performing group when they arrive at the school - to show them where the performance is to be held and where the light controls are. Someone should also introduce the group to the students.
The schedule for the Vince Guaraldi Trio follows:

TO: Teachers - - - Grades 7 - 12
FROM: Catherine Clark, Program Writer
"Performing Arts" project, Title III, ESEA
PROGRAM: VINCE GUARALDI TRIO

FOREWARD TO TEACHERS:

The word "jazz" is commonplace in the culture of our times. Yet, if students were asked to write a short statement in answer to the question "What is Jazz?", their awareness of its basic properties would undoubtedly be found wanting.

The Vince Guaraldi Trio is one of the outstanding jazz groups today. Nevertheless, uneducated ears miss much of what this ensemble has to offer. These program notes have been prepared to assist as you attempt to prepare classes for what they are to hear.

The program notes which follow include:

1. Material written in narrative style. This may be read to the class.

2. Material in outline form as a point of departure for your own re-sourcefulness in class presentation.

3. Suggested discussion before and after attending the performance.

4. Materials to supplement the performance, including:
   - 16mm films
   - records
   - books

- 84 -

77
THE VINCE GUARALDI TRIO

Guaraldi's Story -

Started life professionally as a printer's devil.
Accident almost cost him a finger.
Returned to the piano. Studied at San Francisco State.

Played with Woody Herman and Cal Tjader.

Wrote and recorded on Fantasy label,
CAST YOUR FATE TO THE WIND.
BEST SELLER FOR 22 WEEKS

Won Grammy Award as "Best Jazz Instrumental" for 1962, from the National Academy of Recording Arts and Sciences.

A sports fan, enjoys auto racing, and builds model cars.

Has his own publishing company, Felfar Music

Married. Two children

Jazz--in a CATHEDRAL??!!

It happened in Grace Cathedral, San Francisco, May 21, 1965
Recorded by Fantasy

Guaraldi was asked to compose a twentieth century musical setting for the Eucharist.
TIME magazine, July 9, 1965 says:

"In his MUSICAL SETTING OF THE EUCHARIST, . . . Pianist Vince Guaraldi took Anglican plain chant as his starting point."

Human interest story -

Vince Guaraldi finally could afford the 9-foot grand he had wanted all his life. But his studio is only 12 feet long! So now he takes cat naps on top of the piano. "There's no place else".

WHAT IS JAZZ?

The answer is short. Jazz is a WAY OF PLAYING music. Almost any music can become jazz if it is played with jazz treatment. What then is JAZZ TREATMENT?

First, jazz treatment includes IMPROVISATION. This is not just playing music; it is playing with music. This means that each time the piece is played differently... new little breaks, riffs, and runs. The mood can change, too.

IMPROVISATION is the thing that made jazz DIFFERENT.

Second, jazz treatment includes an interweaving of rhythms, one over the other. "...In jazz there are usually at least two rhythms going at once, one part of the music keeping a steady beat while the other part dodges the accent, plays around with the time, ... jumping ahead or holding back ... weaving together many rhythms, called polyrhythms... melodies in jazz do the same things. While a cornet plays the tune, the clarinet may play a countermelody - that is one melody against the other...

Richard Wright, in his book Twelve Million Black Voices, says: "...our blues, jazz, swing, and boogie-woogie are our 'spirituals' of the city pavements,

1 Hughes. First Book of Jazz. p. 41.
our longing for freedom and opportunity, an expression of our bewilderment and despair in a world whose meaning eludes us..."

George Gershwin, composer of Rhapsody in Blue, says the same thing in a different way. "Jazz has contributed an enduring value to America in the sense that it has expressed ourselves."

TEN BASIC ELEMENTS OF JAZZ -

- Syncopation - A shifting of normal rhythmic stress from strong beat to weak. Offbeat accented. One rhythm plays against another. Syncopation basic and continuous in jazz. Rhythms become very complex.

- Improvisation - Composing as you play. Interest and beauty depends upon talent of individual performer.

- Percussion - Drums provide basic beat, but banjo or guitar, string bass or tuba, and the piano also provide percussion.

- Rhythm - In jazz, not limited to percussion beats alone. Variations of volume, tone, and pitch may also be used to give additional accents.

- Blue Notes - Notes somewhere between flat and natural. Difficult to write down on paper. Often indicated by flatted third or seventh notes of scale.

- Tone Color - Jazz instruments take on varied tones of the singing or speaking voice.

- Harmony - Frequent use of blue notes.

- Break - Brief syncopated interlude between musical phrases - often improvised. Louis Armstrong famous for these.

- Riff - Single rhythmic phrase repeated over and over.
Joy of Playing

Gives jazz its zest and verve. New musical ideas are born as the musicians play together for hours without written music – just for fun.

JAZZ HERITAGES –

Blending of Cultures

Africa and Europe
The blending has never ceased

African contributions

Emphasis of rhythm
Call and response pattern

European contributions

Melodic features
Harmonizations
Musical forms – 12 bar strains

CURRENT TRENDS –

Third Stream Music

A style lying between jazz and classical and using things from both.

Soul Jazz

Encompass a feeling of early Gospel music. Rhythm and emotional intensity highlighted.

FUTURE DEVELOPMENTS –

Presentation in small concert hall and theatre in the round.

Jazz festivals – Newport, R.I., Monterey, California

Some predict – jazz will completely blend with the classical

Others predict – will never merge
Duke Ellington - predicts just one music eventuall

JOANN BON AND THE COQUETTES

The Coquettes. A talented and attractive group includes the leader, Joann Bon who plays cordovox, sings and carries the chores of emcee, Ruth Ross - guitar and trumpet, Sandra Smith - drums, Diane McGahan - trumpet and trombone, Kathy Diamond - organ and Sandra Hasty - bass. The Coquettes' vocal and instrumental selections are accomplished with excellent musicianship and good taste. Each girl ably performs solos on her special instrument and collectively they have arrangements which makes them sound like a big band.

The Coquettes have performed in Chicago, the Thunderbird Hotel in Las Vegas, and have toured the Orient, Europe and Africa. They have also appeared on the Ed Sullivan, Mike Douglas and Dick Clark shows and are scheduled for Joey Bishop. Their hit records are "I'll Release You", "Honey", "Gentle on My Mind", and "Going Out of My Head".

85 - 93 -
Many people find operatic music difficult to accept. In its use of unnatural situations for dramatic effect, it is known as an artificial art form. Aaron Copland, an American composer of note, has said that you must begin by accepting opera and its unrealities in order to enjoy it. Therefore, the goal of the program notes is to aid the teacher as he attempts to cultivate a receptive attitude within the students before they attend the operatic program.

The Nature of Opera

For well over three hundred years, the opera has been one of the most alluring forms of musical entertainment. A special glamour attaches to everything connected with it — its arias, singers, and roles, not to mention its opening nights.

An opera is a drama that is sung. It combines the resources of vocal and instrumental music, soloists, ensembles, and chorus, orchestra and ballet, with poetry and drama, acting and pantomime, scenery and costumes. To weld the diverse elements into a unity is a problem that has exercised some of the best minds in the history of music.

Opera and Reality

At first glance, opera would seem to make impossible demands on the credulity of the spectator. It presents us with human beings caught up in dramatic situations, who sing to each other instead of speaking. The reasonable question is (and it was asked most pointedly throughout the history of opera by literary men) how can an art form based on so unnatural a procedure be convincing? How can it bring about that "suspension of disbelief" which is the essence of the theatre experience? The question ignores what must always remain the fundamental aspiration of art: not to copy nature, but to heighten our awareness of it. True enough, people in real life do not sing to each other. Neither do they converse in blank verse, as Shakespeare's characters do; nor live in rooms of which one wall is conveniently missing so that the audience may look in.
All the arts employ conventions that are accepted both by the artist and his audience. Lyric poetry gives the impression of being a spontaneous utterance; yet much of it is arranged in the most artful patterns of meter and rhyme. We respond to the illusion of depth in a painting even though we know that the canvas is flat. We accept a motion picture as a slice of life, although the action has been carefully plotted to begin at a certain point, reach its climax at another, and come to a satisfying conclusion at the end of the sixth reel. Art is the grand illusion; the adorable lie and the penetrating truth. The conventions of opera are more in evidence than those of poetry, painting, drama, or film, but they are not different in kind. Once we have accepted the fact that the carpet can fly, how simple to believe that it is also capable of carrying the prince’s baggage.

Opera functions in the domain of the poetic drama, which prevailed for centuries before the realism that holds sway in our theatre and films today. It uses the human voice to impinge upon spectator the basic emotions, love, hate, jealousy, joy, grief, with an elemental force possible only to itself. The logic of reality gives way on the operatic stage to the transcendent logic of art, and to the power of music over the life of the heart.

WHERE DID OPERAS BEGIN? WAS IT A LONG TIME AGO?

Operas had their beginnings in Florence, Italy around 1600 when certain composers and poets met at the palace of Count Bard. Their objective was to reform the theatre which, they felt, had many faults. As a result, they looked to the Greeks, who, many hundreds of years ago, had interspersed their dramas with music. And so a new form was created and this form spread to other cities—Vienna, Paris, London.

By 1700, words were of less importance; music was more important. Through the years, various changes took place. The popularity of opera finally diminished. At last in about 1924 in Germany, there was a renewal of interest. Every little town had its opera house. Going to the opera took the place of musical comedy, movie, and theatre combined. Every citizen had his weekly subscription to the opera. Publishers encouraged writing of new operas. Of course, this meant money to them.

IS ANYTHING NEW HAPPENING TO OPERA TODAY?

Yes. Chamber operas requiring just a few principals, small choruses,
TYPES OF VOICES THE STUDENTS WILL HEAR:

Voices are classified according to range and quality.

There are four general classifications: Soprano, Alto, Tenor, Bass.

Find the highest soprano note and go to the lowest bass note. You will have covered about four octaves.

Within the four general classifications, there are variations:

SOPRANO

...colorature: unusually high, runs, decorations (often heroine)
...lyric: beauty of sound rather than power
...dramatic: powerful voices; theatrical, emotional
...mezzo: lack of brilliance or richness (usually supporting roles, not leads)

ALTO

...low tones: rich, resonant, dark

TENOR

...robusto: tremendous power in top notes
...lyric: also referred to as "Irish"
...dramatic: like robust, but used in German opera

BASS

...basso profundo: is especially proud of low notes
...basso contante: specializes in lyric style
...basso buffo: associated with comic roles
WHAT ELSE DOES OPERA INCLUDE BESIDES SINGERS?

Really, it includes everything. A list would look like this:

- symphony orchestra
- solo voice
- vocal ensemble
- chorus
- ballet
- pantomime
- drama
- spectacular staging
- magnificence of lights
- gorgeous costumes
- extraordinary scenery

Suggested Activities Before Attending the Program

1. Survey the class through questions and discussion to discover:
   - pre-conceived ideas about opera
   - background and audience
   - attitudes toward operatic performances

2. Play a recording selected from list under Materials. Observe reactions to the sound of solo voice singing.

3. Discuss materials contained in Program Notes.

4. Encourage research into the area of singing.
   - Define singing
   - How does the voice produce a tone?
   - What are the vocal chords?
   - What sets up the vibrations?
   - How is a good tone produced?
   - What is meant by good diction?

POINT TO STRESS:

Everyone must learn that: Composers are free to create as they will, but we (consumers) should accept or reject these creations ONLY after we have given them a fair hearing.
The teacher's responsibility: To help children mature musically from "This music is strange" to "This music I understand" to "This music I enjoy"

Suggested Class Activities After Attending the Program

1. Motivate class discussion of reaction to performance:
   - Was this an honest performance?
   - Did you experience the lifting of spirits (exhilaration), the humor, the enjoyment of music which was intended by the composer?
   - What did you notice about the way it was staged..scenery, etc?
   - Was the cast well-chosen in your opinion? If not, why not?
   - Did the accompaniment help to reinforce the mood?

2. Art activities:
   - Create an artistic interpretation of some phase of the performance. Example: represent pictorially the mood of the operetta - as a whole or in part

3. Language arts:
   - Try to find and read libretti (text) of other operettas
   - A class project: Write and produce an operetta
   - Begin by: writing the libretto
   - Select well-known tunes, substitute original words suitable to the text
   - Plan staging, costuming
   - Project the operetta
MATERIALS:

FILM  16mm available from Merced County Schools Audio-Visual Department

Night at the Peking Opera, The
Naughty Marietta

Note: It is suggested that any film from the A-V catalog which by its nature would depict that which is 'staged' could be used to implement the general theme of something "Theatrical".

La Cenerentola means Cinderella. This is a comedy with sly jibes at human nature woven into the basic fairy story. It might be well to remind the children that there are many versions of most of the fairy stories. The music is melodious with graceful ornamentation and is often very difficult for all voices.

The Italian composer whose name is Rossini wrote Cinderella. He was a master of comic opera and very popular. To get various effects, he used tricks in an ingenious way. For excitement, Rossini gave the orchestra more rapid notes. Every few seconds more instruments would join the group, and at the same time, the key of the melody would rise higher and higher.

* * * * * * * * * * * * *

The Opera: La Cenerentola

The setting: Salerno, Italy. 18th Century

Synopsis: The Prince is bound by his father's will to marry soon. He hopes to marry for love. Alidoro is a philosopher in the service of the Prince. He comes to the Baron's castle disguised as a beggar in order to investigate the daughters of the house as possible choices for the Prince's bride. Cinderella receives him warmly, but her two snobbish stepsisters, Clarinda and Tisbe, chase him away. Soon the Prince himself comes, but he changes roles with his valet, Dandini. He falls in love with Cinderella.

Only the two stepsisters attend the ball. Alidoro plays fairy godmother and send Cinderella to the party. She is the real Dandini, confessing that she loves his squire. She gives one of her twin bracelets to the disguised prince. He claims her the following day by recognizing it. By then, Cinderella is once more dressed in rags. Crowned the new princess, Cinderella, out of the goodness of her heart, forgives her cruel stepmother and stepsisters.

DIE FLEDERMAUS

Dr. Peggy Donovan, Musical Director

The Cast

Gabriel von Eisenstein  Tenor
Rosalinda, his wife  Soprano
Adele, their maid  Soprano
Dr. Blind, lawyer  Tenor
Dr. Falke, ballmaster  Baritone
Frank, a warden  Baritone
Prince Orlofsky  Mezzo-Soprano
Frosch, a jailer  Speaking role

revenge on Eisenstein.

* * * * *

ACT I. The voice of Alfred, a letter-day minstrel floats through the windows of the Eisenstein villa (home). He had been a suitor of Rosalinda, now Mrs. Eisenstein.

The Chambermaid, Adele, is reading a letter from her sister. It is an invitation to a masked ball that night at the home of Prince Orlofsky (who will be omitted from this version). When Rosalinda enters, Adele asks for the night off. Rosalinda refuses. Adele exits. Alfred enters. He begins to woo Rosalinda. She resists him until he sound a high A at whose beauty she melts and promises that he may return later. Alfred leaves.

At this point Eisenstein enters with his bumbling lawyer, Dr. Blind. Eisenstein had insulted a civic official and was to be imprisoned for a short time. Thanks to Dr. Blind's bumbling, the sentence was increased and so Blind is fired on the spot.
Dr. Falke arrives. He speaks to Eisenstein of the wonderful ball being given by Prince Orlofsky. Wouldn't it be wonderful pre-prison entertainment? Whereupon Eisenstein tells his wife, Rosalinda, that he is off for prison. The two men exit. At this point Rosalinda gives Adele the evening off. Alfred enters.

Rosalinda and Alfred are interrupted by the prison warden, Frank, who has come to escort Eisenstein to jail. Rosalinda persuades Alfred to pose as Eisenstein. He is led off.

ACT II. A crowd of richly attired guests is on Prince Orlofsky's terrace. Adele is among them. Eisenstein enters and thinks he recognizes Adele. But she laughs him off. Then Rosalinda, also invited by Falke, appears in the disguise of an Hungarian Countess. Eisenstein does not recognize her as his own wife. He flirts with this "mysterious countess". She (Rosalinda) pilfers his watch to keep as a "souvenir" of the evening's activities. The clock strikes six. Frank, the warden, who has also been invited to the party by Falke, escorts Eisenstein out. Neither one recognizes the other.

ACT III. The scene is the Vienna jail. Alfred has been giving an unceasing operatic recital, keeping the other prisoners awake. Frank enters with Adele. He had met her at the party and had promised her a theatrical career. When a knock is heard on the door, Frank hides Adele in one of the cells. The man at the door is Eisenstein who is there to fulfill his prison term. He is led to his cell only to find it occupied by a man who claimed to be Eisenstein, and who was reported to have been dining with Rosalinda. Eisenstein grabs a robe and wig from Dr. Blind, the lawyer, who has appeared on the scene. Eisenstein intends to get an explanation from Alfred.

Now things begin to be even more complicated. Rosalinda comes in to secure Alfred from prison. She tells the lawyer (really Eisenstein, her husband, in disguise) about her little bit of fun with Alfred (Act One). Now the lawyer reveals that he is really her husband and rages against his wife, accusing her of being unfaithful. She, in turn, produces the watch taken from Eisenstein by the "mysterious countess". He sheepishly ceases his protestations. Soon the assembled group is joined by Adele and Falke. The jail is filled with a happy company, rejoicing at the reconciliation of Eisenstein and Rosalinda.
Silvio, a handsome young army captain, is in love with Lauretta, the daughter of the mayor. The large, grumpy mayor believes that all soldiers are mean and do not make good husbands for young ladies. So the mayor does everything he can to keep Lauretta from seeing the young soldier, Silvio.

The story begins one early morning, as the mayor and his family are awakened from their sleep by a loud band of musicians outside in the street. Hearing this, the mayor believes that the young soldier, Silvio, has come to secretly see his daughter. When the mayor looks out the window all he sees is a traveling medicine man called "Dr. Miracle" with his followers. This makes the mayor angry, so he goes out to chase the noisy group away. When the mayor returns, he finds Lauretta and her stepmother talking of soldiers. As the mayor returns, he brings with him a newly hired servant, called "Pasquin". For breakfast, Pasquin cooks the mayor and his family an omlette. This omlette, which tastes very badly, is eaten only by the big, fat mayor who would eat anything.

The mayor and his wife, Veronica, leave for a morning walk, and at this time "Pasquin" takes off his disguise and shows himself to Lauretta, as her true lover Silvio, the army captain. When the mayor returns, he finds the two lovers together. Knowing he has been tricked, he throws Silvio out of the house. Shortly thereafter, Veronica brings a note to the mayor which has been left on the front door. The note reads that the bad tasting omlette has been poisoned and that the mayor is going to die.

Suddenly the mayor feels sick and falls into his chair. Just then, the noisy band of Dr. Miracle is heard outside. The mayor sends for the doctor, saying he will give the doctor anything for a cure. The ugly Dr. Miracle enters the house, and when the mayor is not looking shows Lauretta that he is really Silvio, her true love, in another disguise! Dr. Miracle, really Silvio, promises to cure the mayor if he is allowed to marry the mayor's daughter. Lauretta acts as though she dislikes the ugly, old doctor, but the mayor says the doctor can marry his daughter as long as his own life is saved.
To make sure that everything is legal, the doctor asks the mayor to sign a written agreement. After this, the doctor removes his disguise and shows the mayor that he is Silvio, his daughter's lover. To the mayor's surprise, he finds he has given his daughter to Silvio, and the omlette really wasn't poisoned at all. The mayor gives his daughter to the soldier because he knows that he has lost the battle. As the two lovers leave the scene, the mayor realizes that things aren't so bad after all, and they all join in a hoppy song at the end.
WESTERN OPERA THEATRE

presents

Rossini's  THE BARBER OF SEVILLE

Herbert Grossman, Musical Director  Byron Ringland, Stage Director

* * * * * * * * * * * * * * * *

Gioacchino Rossini. Rossini created a masterpiece of comic opera with The Barber of Seville. Today, one hundred and fifty years after its first performance, audiences still laugh at its liveliness and gaiety, its sparkle and wonderful melodies.

Many children and young adults have been acquainted with Rossini for longer than they realize. Who has NOT heard the familiar cry of "Heigh! Ho! Silver", followed by Ta-dee-um, tadee-um, ta-dee-um-tum-tum as the Lone Ranger comes riding into view? Musical contribution from Rossini's William Tell Overture!!

Rossini's father was the town trumpeter in Pesaro, Italy. He got into some sort of political trouble and was sent to jail for awhile. During this time, the mother sang in small theatres to earn a living. Before Rossini was fifteen, he held an assortment of jobs - working for a butcher, a blacksmith, and singing in the theatre to earn money for lessons on the harpsichord and cello.

THE STORY

Figaro, the barber, not only cuts hair and gives shaves, but he seems to know about everything and everybody. In addition, he has an extremely good opinion of himself. ...In his own words, "Figaro here, Figaro there, Figaro up, Figaro down".

The scene opens on a square in Seville. Dr. Bartolo's home is situated here, and in his home lives Rosina, for whom the doctor is guardian. One day he hopes to marry her, and so he watches carefully that young men do not have an opportunity to win her affections. Count Almaviva has seen Rosina and has fallen in love with her, but they have never met.
The Count has come to serenade Rosina, so he sends his servant, Fiorella, away. Someone is heard coming toward the square. The Count hides near the house. Figaro enters, playing a guitar and singing a song about himself and his importance. He sees Almaviva, and, since the two know each other, the Count tells Figaro of his love for Rosina. Figaro offers his assistance. From this point on, the plot thickens with disguises and complications. The ending, as is fitting and proper in comic opera, is a happy one.
Into the lives of Miss Todd, a spinster, and her maid Laetitia, there comes a young man named Bob who knocks at their porch door one day asking for a meal.

Because they are both lonely for the company of a man and because Bob is young and charming, he is invited to stay for "a few days" although his visit must be kept a secret so as not to scandalize the neighbors. After his first day with Miss Todd, the inquisitive Miss Pinkerton arrives with the news that a convict accused of murder and rape has escaped from the county jail. Miss Todd and Laetitia then jump to conclusions and act upon them, to Laetitia's ultimate joy and Miss Todd's ultimate sorrow.

** * * * * * * * * * * * * *

"The Old Maid and The Thief" was originally conceived as a radio broadcast and had its world premiere on NBC in 1939. The first stage performance was given by the Philadelphia Opera Company in 1941.

GIAN CARLO MENOTTI .................. a name to remember!

Menotti's early childhood sounds a bit like that of Mozart. He was born to wealthy parents, played the piano at age 4, wrote his own melodies at
age 6, composed his first opera at 11, and later wrote for small orchestras.

But Menotti was born in Italy and is living today. He describes his first opera, written at 11 years of age, this way: "Everyone sings and plays all the time and dies in the last act". This is just about the way most of us would have described opera, perhaps!!... before we learned any better!

At the age of 17, he came to the United States to study at the Curtis Institute in Philadelphia. This in itself is unique. Most of us think that "to arrive" in opera one must go to Italy! Here is a case where the procedure is reversed. Surprisingly enough, Menotti thinks English the ideal language for opera. He learned it by going to the movies four times a week.

Menotti holds the historic distinction of having written the first TELEVISION OPERA: Amahl and the Night Visitors. This was in 1951. It has become a classic in its own time and is shown annually at Christmas time.

KEY TO MENOTTI'S SUCCESS

- He bridges the gap from the traditional to the modern... from Puccini-like lyricism to avant-garde idioms. (Re-statement: He is an eclectic. That is, one whose music is composed of elements drawn from various sources.)

- His music can be:
  - romantic or mystic
  - classical or popular
  - lyrical or dissonant
  - impressionist or satirical

- He always maintains:
  - unity of concept
  - consistency of the dramatic or musical viewpoint

- He has a wonderful feeling for theatre, literally:

  - A MAN OF THE THEATRE
    - writer of libretti
    - director of stage and casting director
    - is involved in every phase of production

- 109 -

102
HE MAKES OPERA A VIBRANT AND PULSATING STAGE EXPERIENCE.

Menotti himself prefers to call his works not operas - but "plays with music" or "musical dramas".
WESTERN OPERA THEATRE presents Gian Carlo Menotti's THE MEDIUM

Characters in order of appearance:

Monica, Madame Flora's daughter...soprano
Toby, a mute...mezzo-soprano
Madame Flora (Baba), the medium...contralto

The clients:

Mrs. Bogineau...soprano
Mr. Bogineau...baritone
Mrs. Nolan

THE STORY

Flora is a fake medium who carries on fraud seances with the assistance of a mute, Toby, and her daughter, Monica, whom Toby loves. The dramatic power of the story evolves from this situation.

As the curtain opens, Monica and Toby are preparing the weird and shabby parlor of Madame Flora for the evening's seance. Baba (Madame Flora) returns home only to find that the room is not ready. She is furious. Soon the clients arrive and the seance begins. Monica and Toby fake certain effects which the customers believe are their "dead" returning to visit them.

Suddenly Flora feels clammy

DEFINITIONS

1. medium: a person through whom others seek to communicate with the spirits of the dead.

2. seance: a meeting of people who seek to communicate with the dead through a medium.

3. mute: a person who cannot speak.

DESCRIPTION OF THE WORK:

eerie
high-tensioned
melodramatic

HOW THESE EFFECTS ARE CREATED:

uses severe kind of song-speech
dissonant chords (not in harmony)
hands gripping her throat. She screams. This is not part of the planned scheme. What is the explanation? She shrieks out in terror and sends her clients away. She then accuses Toby of playing a trick on her.

When Monica and Toby are once more alone, they play in their own world of make-believe. Meanwhile, Baba's terror has led her to excessive drinking. In her drunken stupor she suspects Toby of trying to kill her. She enters the room, accuses Toby, and chases him from the house.

The clients return for another seance. Baba confesses she is a fake, but they do not believe her. Nevertheless, they leave.

As Baba lies in a drunken stupor, Toby comes back to see Monica. He accidentally makes a noise and hides behind the puppet stage. The noise awakens Baba. She does not know who is there, and, in her fright, grabs a gun and shoots Toby. Toby is killed. In desperation, Baba tries to believe that she has killed the "ghost" who touched her.

**Polytonal combinations** (several musical keys used at the same time)

**BASIC THEME OF STORY:**

A fraudulent spiritualist falls victim to her own imagination.

**WHAT THE COMPOSER SAYS ABOUT THE MEDIUM:**

"Despite its eerie setting and gruesome conclusions, THE MEDIUM is actually a play of ideas. It describes the tragedy of a woman caught between two worlds, a world of reality which she cannot wholly comprehend, and a supernatural world in which she cannot believe. Baba, the medium, has no scruples about cheating her clients... until something happens which she herself has not prepared. This insignificant incident... shatters her self-assurance, and drives her almost insane with rage."

**THE MEDIUM PROVES ITS WORTH:** Menotti wrote the opera in 1946. The first performance was in 1947 at Columbia University in New York City. The
audience did not like it even though it won the critics' praise. Slowly, by word of mouth, reports spread that it was superb theatre. Consequently, each time the programs announced a closing date, there was a sudden box office boom which kept it running. Now THE MEDIUM has become one of the most frequently played American operas with over one thousand performances in the United States.
GIANNI SCHICCHI

(in English)

Comic Opera in one act

Conductors: Richard Waitach and Richard Parrinello

Place: Florence Time: 1299

CHARACTERS

GIANNI SCHICCHI ............................................. Baritone
LAURETTA, his daughter ................................. Soprano

THE STORY OF "GIANNI SCHICCHI"

The action takes place in the bedroom of the rich Buoso Donati, who has just died. His numerous relatives are kneeling round the bed, praying and lamenting. Betto has heard a rumour that Buoso has left his whole fortune to a religious order, and the other relatives in horror leave their devotions and can only talk of how to counter this if it be true. Old Simony says that they must first find out whether the will is in the house; if it is in the hands of a lawyer, there is nothing more to be done. A frantic search for the will begins. At last, the young Rinuccio finds the all-important document. They all try to tear it out of his hand, but he first insists that they must consent to his marriage with Lauretta, Gianni Schicchi’s daughter. For the sake of the will, the relatives agree. Rinuccio sends little Gherardino to Gianni Schicchi’s house to ask him to come at once with his daughter. Meanwhile, the relatives have studied the will and found that, in fact, the whole large inheritance is to go to the religious house. They are all first furious, then deeply depressed, as they cannot see any solution. Rinuccio suggests that perhaps the cunning Gianni Schicchi might have an idea. The relatives at first refuse to have anything to do with him, but Rinuccio warmly defends his beloved Lauretta’s father extolling him as worthy successor to Giotto, Arnolfo and the Medici as a great Florentine. Gianni arrives with Lauretta, and is astonished to learn that old Buoso has died and given his relatives such a terrible disappointment. Rinuccio begs him to think of a way out, but only when Lauretta joins all the relatives in imploring him to help does Gianni Schicchi look at the will. Once he has made sure that no one else knows of Buoso’s death, he conceives a plan. He orders the men to take the body into an adjoining room and the women to remake the bed. There is a knock at the door; it is the doctor, come to ask after the sick man’s condition. On Schicchi’s suggestion, the relatives tell the doctor that Buoso is better, and try to keep him out of the room. Buoso’s voice is heard from the bed, where Schicchi is lying, imitating him. He assures the doctor that he is much better and only needs rest. The doctor, reassured, goes away. The relatives now begin to understand Schicchi’s plan. They all gather round him enthusiastically, each one asking him to give him or her a good share of the inheritance. A notary and two witnesses are sent for so that the new will can be drawn up at once, but Gianni Schicchi first warns the relatives of the terrible punishment which threatens them if this deceit were discovered; the loss of their right hands and banishment. They all join fearfully in a folk-like “exile’s song”. The notary and two witnesses arrive, and Schicchi, in a plaintive voice, dictates his new will in which he
declares all previous wills null and void. The money is to be divided equally
among all the relatives, and each of them is also to receive a small country
estate. The tensions reach its climax when he comes to the partition of the
most valuable goods, the house in Florence, the mill at Signo and the mule,
which they all dream of owning. To everybody's fury the sick man bequeaths
these wonderful treasures to his dear friend, Gianni Schicchi. As soon as some-
body dares to protest, Schicchi starts singing "Farewell, dear Florence, fare-
well enchanting city", which at once silences them. When the notary and
witnesses have left, the relatives pour down curses on Schicchi and try to take
away everything they can lay their hands on. Schicchi furiously chases them
out, since the house now belongs to him. Rinuccio and Lauretta are engaged
in a tender little love-scene and the sight of them calms the furious man. He
then turns to the audience and asks whether the estate could have been better
divided. Father Dante certainly would have sent him to hell for this roguish
trick, but he thinks that the audience, which has been enjoying itself, will
agree that there were extenuating circumstances!

IN WHITE AMERICA

The following excerpts are freely adapted from a discussion by Nagle Jackson, actor-director at the A.C.T. He is presently the director of Martin Duberman's "In White America".

IN WHITE AMERICA is a documentary drama - telling the process of the Negro in America, and telling it emotionally rather than statistically. Martin Duberman, the author, has taken letters, diaries, government records, and newspaper accounts which contain very strong and dramatic episodes which happen to be factual. Duberman allows the records to speak for themselves: he has avoided any embellishment by his own creative writing. The only part of IN WHITE AMERICA which Duberman himself wrote are a few narrative sentences, between documents, to get us from one section to the next.

We have used a great amount of music, not the musical score which Duberman originally included the work, but our own score composed by Gil Turner, a folk musician. He compiled this music from having been in Birmingham at the time of the first riots, and also from having played IN WHITE AMERICA through the Deep South. The result is a really current and exciting musical score, sung by the members of the cast and accompanied by an instrumentalist who sits on one side of the stage. The music ranges from old slave spirituals through a modern song called "Bourgeois Blues", written about the housing problems in Washington, D.C. At the start, the cast enters singing "Woke up this Morning with my Mind on Freedom", sort of a theme song of the production. The cast comes down and addresses the audience, giving a few opening thesis statements, then the narrator quickly leads us right into the action.

The series of incidents and documents are presented, roughly speaking, in chronological order, but are put together not with the historian's sense of logic. First there is a statement by a ship's doctor about the conditions aboard the slave ships. Then, demonstrating that slavery was not totally accepted, we see a Quaker lady attempting to get a petition to the Congress to abolish slavery. A statement by Thomas Jefferson will surprise many, because he comes to the conclusion through logical deduction, he says, that the blacks are inferior to the whites in both body and mind. This is not to say that Jefferson was a bigot: rather, it shows the trend of the 18th Century thinking in the American aristocracy. Many of the incidents are not in history books: for instance, the slave rebellions, a shocking account from the Second World War about white American GI's shooting on black American GI's and a fascinating interview with Woodrow Wilson as he shows himself to be less than a liberal. The conflict in philosophy between Booker T. Washington and W.E.B. Du Bois at the turn of the century is shown very clearly. It's exactly the same conflict.
which is going on today in the black community between the proponents of radical action and those of restraint. There are also sections on the Civil War and Reconstruction and we work our way right up through Martin Luther King. IN WHITE AMERICA tries to show the whole broad spectrum, letting each person pick what he wants from it. We end with "We are Soldiers in the Army", with the whole cast singing in a really exultant fashion.

The production is completely mobile. All we use are seven small stools, which we bring, and a small table of any kind, which is the only prop we need from the school. We can work anywhere, on a stage, in a lecture hall, or in a basketball gym. Costumes are simply contemporary modern dress, and are relatively neutral because each actor plays many parts.

Suggested Activities Before Attending the Program

1. Adapt the program notes to the age level of your group.

2. History classes: Begin by listing the areas of Negro History covered in textbooks, and then look at this list and see what gaps appear. Try to locate, through other sources, information to fill these gaps.

3. English classes:

(1) "Negro impatience can be readily understood but defiance breeds doubt and riots breed hatred." (This statement is from the play). Write your reactions to this statement.

(2) "The American Negro has been waiting for voluntary action since 1876. If the Thirteen Colonies had waited for voluntary action, this land today would be part of the British Commonwealth". (Also from the play). Do you agree or disagree?

4. Drama classes: Read works by contemporary negro playwrights such as James Baldwin, Lorraine Hansberry, LeRoi Jones, Langston Hughes, Ed Bullins. Do these writers present an accurate and complete picture of the current racial scene in the USA?

Suggested Activities After Attending the Program

Discuss other pertinent statements presented in the drama in the same manner as those discussed prior to the performance.

In the forthcoming production, "The Nature of Comedy", you will see live actors on the stage exploring and explaining what makes people laugh. The program provides a flexible basic structure for the examination of comedy and a format which can be adhered to, but which may change in both direction and emphasis if the audience response warrants this. The actors have been trained in improvisation and in the approach to acting through improvisation, the spontaneous creation of scenic material out of nothing but themselves.

The following excerpts are freely adapted from a discussion by Edward Hastings, Executive Director of the American Conservatory Theatre.

The basic format begins with an improvisation by the actors, either based upon something one of them suggests or upon a suggestion from the audience. The actors will then help the audience to decide what was funny about the scene. Next, the actors briefly analyze other things which are funny, breaking these down into the different kinds of humor -- farce, verbal humor, low comedy, and so forth. These are each demonstrated by a short scene, and depending on which scenes are used, will total three or four. For instance, a straight farce scene might be from CHARLEY'S AUNT, a verbal scene from THE IMPORTANCE OF BEING EARNEST, and then a burlesque, slapstick, knock 'em down, drag 'em out type of scene. Two other excellent scenes are in THE TAMING OF THE SHREW and Inescio's THE LESSON. THE LESSON, based upon a student-teacher relationship is especially good for a student group because it's very funny, and it's also a situation with which students will immediately identify.

I want to stress the flexibility of the program. THE NATURE OF COMEDY will strive, in each separate performance, to meet as exactly as possible the responses of each particular audience. It will be a professional event and it will have an opening, and closing, and it will be professionally mounted. I hesitate, beyond that, to limit the concept by a hard and fast definition.

The viewer should be aware that there is a difference between stage life and real life, and understanding this distinction may make the theatre.
experience more enjoyable. If someone falls on a banana peel in real life, it is liable to be dangerous, and will not evince laughter until it is realized that there is no real risk. On stage, it must always seem reasonably safe so that the audience knows it is free to laugh.

Suggested Activities Before Attending Program

1. Adapt the program notes to the age level of your group.

2. Ask the following questions: What is the funniest event in your life? What makes it funny?

3. Select a comedian you have seen. Why is he able to make you laugh? What kinds of comedy does he use?

4. Are there different kinds of physical laughter? What kinds of comedy evoke each? Do different people react to the same comic situation in different ways, and if so, why?

5. Select a situation and describe it twice. At first try to emphasize the comic side, then try to emphasize the serious side. What techniques have you used to make your two versions different?

Suggested Activities After Attending the Program

1. Discuss pertinent comic elements which you observed during the performance. How has your understanding of comedy been enhanced?
COMEDIA AND MIME

IS COMMEDIA RELATED TO COMEDY?

Yes, it is. Both are derived from the Greek word "komos", which means a humorous or funny play. For instance, two of the actors are very good jugglers so the children will most likely see a humorous juggling scene. Always be alert to costumes, masks, gestures, and personalities of the characters which will convey the comic, though often silent elements. Ask the children to choose their favorite commedia (for instance, Red Skelton) or favorite clown and then discuss his comic characteristics.

IS COMMEDIA RELATED TO MIME?

Yes, it is. Humor has always played an important role in Mime performances. These humorous elements can often be detected in the costumes, masks, gestures and facial personalities of the actors. Farcical clowns, dancing, music, and pantomime are all important elements of Commedia. Commedia uses stock characters and universal situations.

IS MIME RELATED TO PANTOMIME?

Yes, it is. Both are derived from the Greek word "mimeisthai", which means to imitate or represent.

Modern MIME is a purely silent art where meanings are conveyed through gesture, movement and expression.

HOW IS MIME DIFFERENT FROM PANTOMIME?

Pantomime to most children means a soundless interpretation of words, probably to a song.
Marcel Marceau, greatest mime, defines the art of MIME this way: It is the art of expressing feelings by attitudes and NOT a means of expressing words through gestures.

When used interchangeably, pantomime usually refers to the performance, and mime to the performer.

**HOW CAN THIS BE EXPLAINED TO CHILDREN?**

Try to relate it to their own experiences. For example, select an activity song the children know. Have them "pantomime" the words. Then choose an idea to be conveyed. Ask the children to let their bodies express the idea.

During the American Conservatory Theatre's performance, they will actually present situations which the entire audience can do in its seat, making the student more aware of his body and what an action does to his body and to his psyche. For instance, the miming of putting on gloves, or lifting cups different sizes -- a tea cup, a coffee cup, a drinking glass, a loving cup -- actions which can be explained and demonstrated, and attempted by each member of the audience.

The performance will begin with a visual and verbal explanation-demonstration of the variety of ways in which physical movement is used to tell a story, or convey humor, to understand oneself. The actors are trained to respond and encourage response from the audiences, and they intend to use this training to make each performance as meaningful to its audience as possible.

**THOUGHTS ABOUT PANTOMIME:** (as "points of departure")

- - - Acting is not just speaking lines. It is also expressing what is being said with the body.

- - - Dancing can be pantomime set to music, such as Ballet.
Pantomime is sometimes used when the spoken word is impossible. Example:
A traffic officer holds up his hand. The motorist stops.

The pure mime stands alone.

He receives no help from brilliant lines by an author.
He cannot rely on a melody furnished him by a composer.
His body and skill must communicate emotion to the audience.
He uses a minimum of costume, lighting and stage properties.

CLOWNS RELY ON PANTOMIME:

The clown costume came from the various-colored costume of the Roman mimes.
It was originally intended to symbolize rags. This was to indicate that the clown was an impractical fellow who had difficulty getting along in the real world.

IS A MAGICIAN A MIME?

Yes, he is. Houdini once said: "A magician is an actor playing the part of a magician". Magic has often been performed without words, but never without pantomime. This is a difficult form of pantomime. The magician must pantomime one set of actions to convey ideas and emotions different from the set of actions he is actually performing.

TRY IT YOURSELF

What must you do to try it yourself?

Pantomime is physical. The mime must have control of his body. Sports, diet, and gymnastics are important.

Individual actions and gestures must be learned. Later, these are put together to tell a story or evoke an emotion. (As a writer puts words together).

To build this kind of vocabulary, watch how people move in different occupations.

Start by pantomiming a simple action, such as pulling on a rope. Try the real action with a rope. Then imitate by exaggerating. Try to do it as if the rope were being pulled in different ways: easy, hard, very hard.
Notice the difference in body attitude. What happens to the feet? When pulling easily, the feet can be close together. With greater effort, leg opposite direction of pull must be extended, and the knee toward the direction of pull must be flexed. Attitude of shoulders is different when pulling hard than when pulling easily.

---

Some standard gestures include:

- Finger to lips for silence
- Use a silent pause
- Hand to forehead to express sorrow

Suggested Classroom Activities Before Attending Performance

1. Select an everyday event (tying your shoe, combing your hair, drinking water with ice cubes in it) and describe all the actions necessary to complete the task.

2. Select a single action (lifting something from the floor to a table, sitting down a chair, climbing stairs) and do it very slowly. Try to feel which muscles you use, and sense the reactions your body has.

3. Select an emotion and describe it using only your body. Let other students try to identify which emotion you have chosen.

4. See: films selected from list of MATERIAls to observe how ideas may be expressed through various means and mediums.

Suggested Classroom Activities After Attending Performance

1. Discuss the performance: what did students observe about—
   - Bodily movements and gestures
   - Costumes
   - Make-up
   - Facial expression

2. Plan and execute individual or group pantomimes.
   - Use ideas from the "Try it Yourself" and "Suggested Classroom Activities Section".

3. Use films, art prints, and reference books to increase appreciation of the art of mime.
INTRODUCING

THE ENCHANTRES

as they present

THE MAD TEA PARTY from Alice in Wonderland . . . Chamber Theatre

DRAGGY, THE DROWSY DRAGON by Jodie Bowen . . . A Playlet

II: IMPROMPTU STYLE: Selected . . . Commedia dell 'Arte

Characteris' of the three forms of presentation:

CHAMBER THEATRE . . . A piece of children's literature is dramatized

. . . The spoken word is exactly as written

. . . The narrator is actually a part of the scene

PLAYLET . . . A fairy tale is presented

. . . Complete with costumes, props, etc.

IMPROMPTU STYLE . . . Inherited from years ago (the Commedia dell 'Arte)

. . . A story is selected

. . . Dialogue is made up on the spot (impromptu)

. . . No costumes, props, or scenery will be used
PURPOSES AND RESULTS OF CHILDREN’S THEATRE

The major purpose: to provide true theatre experience.

To do so, a children’s theatre production must...

. be within range of understanding
. be directed toward characteristic reaction patterns

Results expected: provides child with basis for future thought and action.

This will occur if the production helps children to gain insight into their own actions through a vicarious involvement in dramatic event and identification with characters living it.

VALUES TO READING PROGRAM (found in reading plays)

. Children delight in dramatization - adds interest
. Enriches imagery in reading fiction
. Provides disciplines not found in other types of reading
. Enhances: Comprehension
. Vocabulary development
. Phase reading
. Expression
. Improves speech skills
. Adds personal and social values to child's development

CRITERIA OF GOOD THEATRE

. Artistic and communicative relationship inseparably binds playwright, director, designer, actors, audience.

. Firm, studied direction by an imaginative artist needed to assure true theatre experience for child audience.

. A fine theatre experience will be assured if the performance has convincing and genuine characters working as an ensemble in a situation which arouses empathic involvement.

. Formal theatre must be characterized by especially high technical standards.

Suggested Activities Before Attending the Performance:

1. Use as many of the supplementary materials as possible

2. Discover what children in your class have been to a live performance
   ...Where was it? What was it about? ...Were there costumes? Scenery?
3. Discuss qualities of a good play

4. Discuss how a play is different from a story. Example: The story TELLS: the play SHOWS

5. Discuss characteristics of behavior at a performance when you are a part of an audience

Example: If the play is funny, you laugh more with others. You share the feelings of others. Join in.
Good manners. What are they?

6. Discuss what a good story does

Example: Describe events so that they seem natural
Characters seem to be real people doing real things
Makes listeners care about what happens to story people

7. Discuss what a good story has

Example: A Beginning (introduces who, when, where and arouses curiosity)
A Body (series of happenings to "who")
A Climax (brings a crisis in "Who's affairs; solves the problem)
An End (comes quickly; tells what happened to "who"

Suggested Activities After Attending the Performance

1. Review qualities of a good play. Did the performance have these qualities?

2. What was different about the performance from what you expected? Discuss reactions to performance.

3. Select a story (or write one) and "play" it. Present it for another class or parents.

4. Art Activities: Describe the plays artistically -either story or character (individual expression). Build a mural telling one of the stories (group expression).

5. Language Arts and Music Correlation: Select a favorite song tune -discover:
   rhythm, meter, phrases, etc.
   Write words relating to the play -must fit rhythmically.
   Phrase-wise the tune selected.
   Write, rehearse, perform a play -incorporate the original song in presentation.
6. Read plays aloud in class. Discuss ways in which attending performance helped the class to read plays more meaningfully.

Once upon a time there lived a king who was interested only in clothes. Now he looked and what he wore were all he ever thought about. One day two rogues stopped by the palace. They sold the king on the idea that they were exceptionally fine designers and weavers of cloth. They also said that anyone who was unworthy could not see the cloth. He hired them, gave them a room in which to work, and paid richly for the golden and silver threads. This money, of course, was pocketed by the rogues for they had no intention of really weaving at the looms. They only pretended to be busy. The king was curious to know what the cloth was like, but because he was afraid he would be unable to see it, he sent one of his most trusted officials. The thieves pretended to be busy at work, asking the official (who could see nothing) to step closer, and describing the patterns in detail, pretending to point out this and that. Naturally, the official, who really was honest, did not want people to think otherwise, so he went to the king and told him how truly gorgeous the cloth was. Finally, the king himself went to try on his new clothes. He was to wear them for a splendid procession. The officials, who did not want him to know they could not see the clothes, pretended to help him dress; the rogues made over his appearance; and the king, trusting these people, was sure that he looked splendid, even though he himself could see no clothes. All the people watching the procession cheered wildly and praised the king's appearance, for they, too, had heard that this cloth was only visible to those who were worthy of seeing it. And, of course, no one wanted anyone else to think he was unworthy. Finally, a little child, in its innocence and honesty, said, "But he doesn't have fancy clothes on." The word spread from person to person and on to the king, who, not wanting to admit that he had been fooled, straightened his shoulders and continued in the procession as if he were clothed in magnificent robes.

* * * * * * *

THE READ ALOUD SECTION

WHAT DOES IT TAKE TO PLAY A STORY?

Have you guessed the answer?...That's right. It takes a STORY to PLAY a story. Had you ever thought about where stories started?...or who started them?...or how long ago? Actually, stories started wherever and whenever there were people. If that sounds confusing, think of it this way. People and stories have grown up together. Sort of like this......

Way back in the days before books, television and schools, families and groups
of families would gather round the campfire in the evening. Perhaps the men in the group would tell one another of the adventures they had had while hunting or fishing. Often the tales were so interesting that the children listened, and they began to look forward to the "stories". As the children grew up, these stories were told to their children, and so they were passed along from one group to another.

Some people became official "story tellers", traveling around from highway to byway, from palaces to cottages. These story tellers were many things. They were news reporters, teachers, entertainers, and preachers who showed how "right" always won over "wrong". But whatever the story, the story teller made the words come alive to the listener. The listener FELT the story and SAW it in his mind's eye.

All of this was before the invention of printing. When finally the printing press was invented, more and more people could read stories. Today almost everyone reads, but we still hear children saying, "Tell us a story". Do you suppose you could make up a story and play it?
TO: TEACHERS - grades 4 - 6

FROM: Catherine Clark, Program Writer
'Performing Arts' Project, Title III ESEA

PROGRAM: San Francisco Players Guild
presents
"Reynard the Fox"

FORWARD TO THE TEACHERS:

Albert Einstein has said: "It is the supreme art of the teacher to awaken joy in creative expression". It might be added that this kind of joy offers "first aid to a drooping class, an invitation to adventure and learning". Thus the goals of the theatre performances which are a part of the Performing Arts Project are two-fold:

1. To provide a true theatre experience that cultural horizons may be widened
2. To help the teacher discover ways in which the "theatre" can be used in the classroom to serve as an education tool

The San Francisco Players Guild is a nonprofit professional touring company which has reached well over three million young people in its eighteen year existence. "Reynard appears in the Guild's production with his traditional companions: Lion, Crow, Bear, Wolf, and Marmot. While each has his own animal look and character, they are so human, so true in the ways of this world that the 'lesson' in all fables speaks out in their adventures". Program notes which follow include:

1. Description of the work to be performed
2. Background information for teachers
3. Suggested class activities before and after attending the performance

1 Allstrom. Let's Play a Story. Publ. Friendship Press, N.Y., 1957
2 Brochure: from San Francisco Players Guild, San Francisco, California
4. Materials to supplement the performance, including 16mm films records books

LET'S FIND OUT!

ABC UF THAT FOX: REYNARD!

This fellow is a very famous character. He has laughed and fooled his way through the world's stories and poems for over 2,000 years.

Long, long ago men lived amongst wild animals and counted on them for food and clothing and tools. Therefore, the animals were held in high esteem. Their strength was admired, as was their cleverness. In the caves where early man lived, the walls were often decorated with pictures of beasts. Sometimes the animals were even worshipped as gods.

A favorite pastime was story-telling, for these were the days before writing and reading. The characters in the stories were frequently wonderful animal creatures who could talk! From out of these days came Reynard, the fox.

We can thank the French people for this name. The French word for fox is "renard".

WHY THE FOX IS A FAVORITE CHARACTER

The fox represents the little fellow who relies on his cleverness to get out of bad situations. He DOES commit his share of crimes, but have you noticed against whom? ... That's right! Usually against those who were foolish enough to fall for his tricks, or those who were as bad, if not worse, than he!

WHAT OTHER ANIMALS ARE USUALLY IN PLAYS FROM THE MIDDLE AGES?

REYNARD, the FOX: who shows people that an ounce of wit is worth a ton of brute force

WOLF: the greedy-grabber type who takes advantage of those not as strong as he

BEAR: a boring wind-bag. Yakkity, yakkity, yak!

LION: naturally, the KING! Called "Noble".
Often NOT as noble as he pretended to be
THE STORY OF THE PLAY WE WILL SEE:

Place: In a forest grove in France.

Scenes: Spring Summer Autumn Winter

Cast: (in order of appearance)

Directed by: John Brehner
Produced by: Martha Eliot

In this play, Reynard is called into court. He had played such terrible tricks on some of his companions that they had become enraged and plotted to have him hanged!

King Lion presides over the court. Reynard defends himself so cleverly that Lion ruled he should be given another chance. Poor King Lion! In his heart he did not really want to lose the fox; secretly, he was quite fond of him. Reynard gives Lion courage and good sense. King Lion's judgment is that the Fox is to be placed on a year's probation. During this time he may have TEN violations of good conduct because after all NO ONE can be perfect. However, any violation after that will bring punishment without mercy.

Wolf and Bear are furious with the ruling. So is Crow, until King Lion orders him to keep a record of Reynard's tricks. This, of course, makes Crow feel very important. The only person who approves the King's ruling is Marmot, Reynard's good friend.

The play you will see is about the funny, exciting year of Reynard's probation and what happened when the year was over. Reynard couldn't help playing jokes on Bear, Wolf and Crow. They couldn't resist trying to finish him off. The Fox outwitted them every time. So, at the end of the year, there was Reynard still alive, still laughing at them. But there, too, was Crow's record -- with a long list of more than ten violations. This meant the end of Reynard. His enemies insisted on a quick end -- by hanging. They put the noose around his neck and Wolf started to pull the rope...It wouldn't be fair to tell what happened next, because Reynard wants to surprise you himself in the play!
ABOUT THE COUNTRY

(The following is designed to be read to your class, but you may wish to put it in your own words or add supplementary material. Older students may also like to see exactly where Rumania is in relation to other countries on your classroom map of Europe).
Katya, The Wonder Girl takes place in Rumania, a country on the southwestern border of the Soviet Union. Sometimes the country is called ROMania. This is because almost two thousand years ago, the ROMans conquered the land. Today the people speak a language based on the ancient Roman language called Latin, just a French, Spanish, Italian and English all come from the Latin spoken by early Romans.

At one time or another, Bulgaria, Hungary and Russia controlled parts of the country as have Austria, Turkey and others. It was a long, bloody struggle before the people won independence and named their land Rumania. Believe it or not, this didn't happen until 1859, a little more than 100 years ago!

Today Rumania is a communist country. But its people are proud and independent, and the government tries to run Rumania in its own way without much interference from other communist nations.

SERFS AND BOYARS

(The following is important to a fuller understanding of the play).

At the time of Katya, The Wonder Girl, there were still serfs (slaves) in Rumania. They were ruled by rich landowners called boyars. You will meet a boyar in the play named Petru, the Rumanian name for Peter. He lived in a great manor house like the one you can find on the map. He was expected to settle all arguments between the people in his district, not only the serfs but the independent farmers like Costan in the play. He made all important decisions and arranged the marriages of his serfs. This is why, in the play, Petru says he will find Katyo a good husband. Katya and her family were serfs.

In the country where Katya lived, there were just mud roads and no stores or schools. The children of the rich were tutored at home until they were old enough to be sent off to the university in the capital city of Bucharest, which you can find on the map. The rest of the people could not read or write and they knew nothing about the world except their farms and villages. There, they went regularly to a church like the one on the map; they worked long hours and, when they had a little time to enjoy themselves, they gathered together to dance and make music and to tell favorite stories they had learned from their parents and grandparents. These stories often began like this: There once upon a time was and if it wasn't once upon a time, it never was... Katya, The Wonder Girl is such a story -- a folk tale from Rumania made into a play for you.
The purpose of the performance is not merely to entertain, but to bring to the student an experience which will broaden his cultural and creative horizons.

Students who have had some preparation before attending the performance will have a better understanding and acceptance of the performance. Also, while enthusiasm is still high, a follow-up program should take place.

The following is merely a skeletal outline of pre-and-post activities. A complete guide to the specific performance follows. At any rate, the outline that is provided for the teacher should serve only as a guide for each teacher's individual creativeness.

**Suggested classroom activities Pre-performance**

**DISCUSS:** Types of stages, difference between stage and TV or movies, definitions of theatre terms, etc. Who is a student's favorite actor and who.

**DEMONSTRATE:** Reading and enacting of plays, stories, styles of acting etc.

**OBSERVE:** Rehearsals of plays. Emotional reactions of the students' friends and family. Why are these emotions often seen in theatre?

**CREATIVE ACTIVITY:** Individual interpretation of a play. Introduction to new words, starting a theatre scrapbook, etc. Class project could be to build a theatre model.

**Suggested classroom activities Post-performance**

**DISCUSS:** Attitudes toward theatre, and how they have changed since seeing the play.

**CREATIVE ACTIVITY:** Designing sets, costumes, new stages. Creative writing, speaking, movement.
TEACHER'S AID

IN-SERVICE TEACHING AID - WHITE OAKS THEATRE

CORRELATE WITH LANGUAGE ARTS:

Letter writing, story, poem, build a glossary of facts and information on theatre.

* * * * * * * * * * * * *

Any and all subjects can be taught when they are motivated through the use of a live theatre experience.

GLOSSARY OF TERMS:

The following general terms may be used in conjunction with theatre discussions, both prior to and following the performance. It will be most effective post-performance, in discussion of how many of these terms the students recognized during the play.

ACT: A natural division of a play, consisting of one or more scenes.

FLIES: Space directly above the stage up into which the scenery is placed.

FOURTH WALL: Name given to the imaginary side of a room toward the audience.

LINES: Speeches in a play.

MONOLOGUE: Speech by one player of any length.

PROPS: (Properties) - All objects, exclusive of scenery that are on the stage. (furniture, books, dishes, etc.)

REPERTORY: Collection of plays that may be readily performed because of their familiarity to the actors.

- 143 -
SCRIPT: Typewritten copy of a play.

STAGE: Temporary or permanent raised platform on which plays are performed.

BIBLIOGRAPHY: The following list of titles may assist the teacher in compiling her own list. Public library catalogue listings under 'Theatre' and 'Children's Theater' will supply a variety of titles.

- Golden Age of the Theatre - Mancewiz
- The Penguin Dictionary of the Theatre
- Creative Dramatics - Geraldine Brain Sicks
- Stories to Dramatize - Ruth Sawyer
- Way of The Storyteller - Ruth Sawyer

We also suggest checking the availability of recordings or films on theatre, and recorded performances as audio-visual aids, both prior to and following the performance.

SPECIFIC - THE OGRE COLLECTOR

THE OGRE COLLECTOR is a marvelous vehicle for stirring the creative imagination of the K-6 age group. On several levels, the children can be encouraged to express their own feelings toward the production and theatre in general.

PRIOR TO THE PERFORMANCE

1. As the central character in the play is a pantomime character, the history of the clown figure in theatre may be studied as a key to better understanding of the play. Discussion of clowns in the circus, as opposed to the classic Marcel Marceau pantomime, etc.

2. A discussion of the synopsis of the play. What do the children expect the characters to look like. Possibly correlate with art class.

3. A general discussion of deportment during the performance. Particularly with a child audience unfamiliar with theatre, we have found that they enjoy the play more if they know what is expected of them as an audience.
AFTER THE PERFORMANCE

1. The immediate reaction of the audience following the performance offers a multitude of ideas for expression. Two of the most effective (and appreciated by us) are letters from the students to the teacher, and drawings of the set and characters.

2. Having noted what the audience expected as to the appearance of the characters (costume, makeup) compare these reactions following the play.

3. Correlate the performance with other subjects. In language arts, study plot, stories with a moral (what was the moral of Ogre Collector, etc.). History or social studies lends itself to the history of piracy, the dragon legends, and in this particular case, wild animals and where they are found — the historical source of the ogre —. As a stimulation for art work, the following may serve as a guide.

   a. Murals telling the story of the play.
   b. Creation of a puppet stage. Puppet plays encourage the child to participate, in that they can transfer the acting to the puppet, rather than draw attention to themselves.
   c. Class play production. Painting scenery, etc. Flats may be constructed from butcher paper, props from cardboard cartons.
WHITE OAKS THEATRE

presents

A DOCTOR IN SPITE OF HIMSELF
by Moliere (1622-1673)

The Play: The story tells how faggot binder Sganarelle becomes a physician in spite of himself. It was written as a short piece to present before another play called "Le Misanthrope". Moliere was poking fun at the doctors of the day who seemed to think that it was better to die according to the rules than to recover contrary to them!

The Author: In the day of Louis XIV in France, there was a position in the king's household called "Superintendent of Royal Upholstery". This post was held by Moliere's father. So that Moliere would be prepared to follow in his father's footsteps, he was sent to college for five years where he studied academic courses such as Latin and philosophy. Later he studied law, practiced it, and at last succeeded his father.....as MAKER OF THE KING'S BED, for this was how "Superintendent of Royal Upholstery" translated itself! Finally Moliere signed away his rights to the job by paying 630 livres. With others he formed a new theatrical company, hired a tennis court for a theatre, went bankrupt, and twelve years later secured a hearing and was successful in winning the favor of the court. He became the creator of French comedy and left a collection of
comedies unique in Western literature...

Moliere was a victim of tuberculosis...a man who covered his griefs with laughter. Through his comedies, he carried on a war against superstition and sham. France loves Moliere as England loves Shakespeare.
WINNIE THE POOH
A Synopsis - for grades K - 3

Winnie The Pooh, the A.A. Milne fantasy relates the adventures of a host of lovable animal characters and their companion Christopher Robin. The audience meets such delightful personages as Rabbit, Eeyore, Piglet, Owl, Kanga and Roo, and of course, Pooh, the fat little bear whose fondest desire is to drift through life humming tunes and stopping occasionally for a bite to eat. The series of events that take place when Christopher Robin and Pooh set off on their journey have charmed children and adults all over the world.

WELL, HERE WE ARE
A Synopsis - for grades 6 - 8

WELL, HERE WE ARE, is a delightfully zany original musical, suitable for any grade level. ZIP and WAP, two slapstick comedy characters find the traditional "basket of goodies" and go in search of GRANDMA in order to return it. Grandma in this case is a retired musical comedy star restricted to a wheelchair, and kept virtually a prisoner by her evil NURSE. On the scene appears the HERO, a well-meaning, but bumbling protagonist who with the help of the pretty MAID, and ZIP and WAP scheme to free GRANDMA from the clutches of the evil NURSE. They all flee to an abandoned theatre, where in a fast-paced finale, they stage a review. GRANDMA performs the musical comedy number that made her a star, HERO and MAID sing a romantic duet,
ZIP and WAP present a "song and dance" number, and the NURSE, caught up in the excitement, sees the light of her evil ways. A happy future is insured for all.

THE ROMANCERS
A Synopsis - for grades 9-12

The "path of true love" proves to be a particularly bumpy one for two young lovers in this 18th century play. Written by Edmond Rostand, the author of "Cyrano de Bergerac", THE ROMANCERS tells the story of Sylvette and Percinet, two young people whose love affair is engineered by their respective fathers. The lighthearted mayhem that ensues includes a mock abduction and sword battle, and a multitude of confusing situations, before the lovers are permanently united. In addition to providing the audience with an enjoyable, comical story, Rostand's ROMANCERS makes interesting comments on the parent-child relationship, and the age-old problems of young love.

THE OGRE COLLECTOR
written and directed by Gale Peterson

THE OGRE COLLECTOR

This charming story centers around Franklin, the misunderstood ogre. Gleep, our pantomime hero, and his friends attempt to help Franklin as he flees from the evil "ogre collector". Offering a basic lesson in communication, and its importance, this production is fast-paced as well as heartwarming.
A puppet is an inanimate figure that is made to move by human effort before an audience. There are various kinds of puppets, and the ones that are carefully balanced and manipulated by strings are called marionettes. The marionette may be made of wood, metal or plastic sculptured in the round and jointed in fifteen or sixteen places. Marionettes can be made to follow the human form more accurately than glove-puppets, but they still retain some of the extravagance and exaggeration of Mr. Punch. The heads and hands need to be a little larger than life-size and the legs slightly shortened to give a closer semblance to reality than exact imitation. Puppetry seems always to have had its beginning in religious ceremony. It was used as a means of communication and to influence people.

The early church, while it frowned on the vulgarity of live actors, was fully aware of the educational value of the theatre and the arts. In order to have one without the other, it welcomed the puppet. And despite occasional grumbling in high places, puppetry became an integral part of medieval religious drama. Some plays were exclusive for the Marionettes. The story of the Nativity was played by puppets before it was ever entrusted to human beings; in fact, somewhere along the line the wooden actors became so closely associated with the Nativity as to acquire the name of Marionettes, or "Little Marys".
"THEATRE IN THE ROUND
SUGGESTED SEATING.....

This seating chart is for your assistance in
arranging hall, room, gym, etc. Based on the size
of the hall and the number to attend the show, the
dimensions are relative, but not absolute.

We prefer the boys and girls be seated on the
floor in 1 to 3 rows. Chairs should be arranged
in rows behind the children. It is best to stagger
the rows of chairs allowing viewing between the
shoulders.

All action takes place on floor level. There
is no raised area used for the performance.

Should there be any further questions, please
call us.

BOB BAKER MARIONETTES

Audience faces into three sides of the
performing area, viewing the puppeteer
working.

Puppeteer working in the
performing area.
Total project vocal music performances - 133
Total number of student participations - 20,130

THE MEANING AND DERIVATION OF A CAPPENDA

The Story:

Once there was a man
who shared his coat
with a beggar.

A cloak was called "cappa"

The cloak which the Bishop
of Tours had shared with the
beggar was preserved in a
sanctuary.

In the Vatican is the
Sistine Chapel (Cappella).

Unaccompanied singing
provided the music there

Thus: unaccompanied
singing took place in the
cappella.

Because of this derivation
it becomes a truth that the
man (St. Martin) who shared
his cloak (cappella) with a
beggar has shared it with
not just one, but many
"beggars"...the great
audience which through
the centuries has hungered
for fine choral a cappella
music. 1

Information:

This was the Bishop of Tours,
later called St. Martin.

The diminutive is: "a cappella"

The sanctuary came to be dub-
bed CAPPELLA because of the
cloak.

Instrumentalists were never
used in the Sistine Chapel.

And so: unaccompanied singing
became known as a cappella
singing.

1Scholes. Oxford Companion to Music
(Note: The following excerpts are from *The Swapping Song Book* by Jean Ritchie. This is available in the Merced County Schools Library).

Advice from Jean Ritchie to those who sing folk songs:

"I wish that, when you sing these songs, you won't feel bound to sing every note as you see it in the book. It is almost impossible to capture a folk-tune on a piece of paper, with all the little variations that the individual singer puts into the tune each time he sings it. It is impossible, too, to put every word under the right note, or to write notes for every word. Whenever you find a line that has too many words in it for the given music, you just use your own feeling about it and fit them in as it seems best to you. You will find that all the extra words will fall very naturally into place, and you will be singing the song YOUR way, which is what all true folk singers do.

Feel free with these songs, have fun with them. I don't mean that you should consciously change the tune, rather that your voice should give it your own interpretation. However, don't try to dramatize or "put over" these songs when you sing them. Folk songs are straightforward and simple, and they have their greatest charm when they are sung just that way."
Suggested Classroom Activities Before the Program

1. Use Program Notes and materials as listed.

2. Find folk songs in state music series. Discover how many the children already know...Which are the favorites? Why? Are these American folk songs? What other countries?

3. Discuss differences and similarities between our folk songs and those of other countries.
   What instruments could be used for accompaniment? Why?
   What are the rhyming patterns in the different songs?

Suggested Classroom Activities After the Program

1. Motivate class reactions to the program.
   Did the songs tell stories? Describe things or places?
   What was the mood of particular songs?
   Was there any one song you enjoyed more than others? If so, Why?

2. Language arts:
   Discuss word usages common to folk songs and different from what we learn.
   Experiment with "making up" a folk song. What should it be about? (Everyday experience? Travel? etc.) Should the tune be planned and written down?

BOOKS  Books listed below offer information and songs to enlarge upon the areas briefly mentioned above. These are available from the Merced County Schools Library.

Kelly, John M.  Folk Music Festival in Hawaii

Children's Songs from Japan
WHO IS MRS. ZIMMERMAN?

Mrs. Zimmerman graduated from Atwater High School and now lives in Merced with her family of four children, ages 3, 2, 1, and 2 months.

As a child, she was encouraged to study piano, violin, and viola. By age fourteen, she began to emphasize vocal activities and was cast in the first lead roles in local productions of The Fortune Teller and Naughty Marietta.

During the time she was enrolled at the University of Pacific and Stockton College in Stockton, California, she sang the lead in Offenbach’s Les Contes D’Hoffman. Mrs. Zimmerman was a winner of the Youth Auditions sponsored by the Merced Symphony Orchestra, and as such, appeared with the orchestra in concert. She is a regular member of the St. Luke’s Episcopal Choir. One of her newest ventures is in the role of composer.

WHAT WILL MRS. ZIMMERMAN SING FOR US?

Mrs. Zimmerman has two basic programs from which she will make her selections.

I
WHISTLE A HAPPY TUNE (from The King and I)
Di Tole Smor (Verdi’s II Travatore)
OVER THE RAINBOW
THE LILAC TREE
ALLELUIA...Mozart
AVE MARIA
Piano Solo
DO, RE, MI (from The Sound of Music)
SUPERCALAFRIGILISTICEXPIALIDOSHIS (from Mary Poppins)

II
GETTING TO KNOW YOU (from The King of Siam)
ITALIAN STREET SONG (from Naughty Marietta)
CARE SELVE...Handel
DEBORAH...Bone, Fenton
HEAR YE ISRAEL (from Mendelssohn’s Elijah)
WHEN LOVE IS KIND
Piano Solo
DO, RE, MI
SUPERCALAFRIGILISTICEXPIALIDOSHIS

Others:
SUMMERTIME (from Porgy and Bess)
SI MI CHIAMANC MIMI (Puccini’s La Boheme)
REJOICE GREATLY (Handel’s Messiah)
I WAITED FOR THE LORD...Mendelssohn
A SPOONFUL OF SUGAR (from Mary Poppins)

WHAT IS A “SOPRANO” VOICE?

Voices are classified according to ...range
...quality

There are four general classifications ...SOPRANO
ALTO
TENOR
BASS

SOPRANO is the name given to the highest of these.

WHAT CAUSES PEOPLE TO MAKE SOUND?

The vocal cords.

These are two small bands of tissue stretched across the voice box (larynx)
One band stretches on each side of the windpipe opening.

Muscles in the throat tighten and loosen the chords.

...The cords relax when we breathe.
...To speak the cords are pulled by the muscles.
...Then air is driven into the voice box from the lungs.
...The tight vocal cords are stretched and moved by the air.

**WHAT MAKES THE SOUNDS HIGH OR LOW?**

The more tightly the cords are stretched, the higher the sound.

The pitch of the voice is determined by the size of the voice box.

**HERE IS A POEM TO SHOW HOW WE EXPRESS JOY FOR EACH NEW DAY:**

"I wake in the morning early
And always, the very first thing,
I poke out my head and I sit up in bed
And I sing and I sing and I sing."

* * * * * * * * *

**Suggested Activities Before Attending the Program**

1. Play a recording from list under Materials.
2. Observe reactions to the sound of solo voice singing.
3. Discuss reactions. Relate to information about the voice.
4. Encourage research into the area of singing.
   ...Define singing
   ...How does the voice produce a tone?
   ...What are the vocal cords?
   ...What sets up the vibrations?
   ...How is a good tone produced?

150

- 160 -
...What is meant by good diction?
...What is meant by good intonation?
...What comes first -- the music or the words?
  (in composition of a song)

5. Try setting new words to familiar tune (create the words).

6. Use materials under Materials.

Suggested Activities After Attending the Program

1. Discuss:
   ...observations about voice quality and production
   What adjectives could describe the 'kind' of voice?
   Could you see Mrs. Zimmerman take a breath?
   What made the words understandable?
   How did facial expressions help you 'catch the mood of the song'?

Allan Price ............. Baritone
Florence Bieman ....... Mezzo-Soprano

1) Explanation and demonstration of range of human voice. Each artist sings a brief aria characteristic of his or her range.

2) Emphasis on the study of languages and learning to play an instrument. Comparison of the human voice with instruments of the orchestra (in question and answer form). Demonstration of the different types of opera: serious, comic.

3) A scene from an opera is performed, where diction and acting are stressed.

4) Question and answer period.

5) The program is closed with one or more trios of entertaining character and fast moving action:

Delibes
Bells Song - "Lakme"

Bizet
Seguidilla - "Carmen"

Mozart
Serenade - "Don Giovanni"

Bellini
Duet: Mira, Norma - "Norma"

Rossini
Duet: Figaro - Rosina, "Barber of Seville"
EVALUATION OF THE MERCED COUNTY SCHOOL

PERFORMING ARTS PROJECT

In the report on Widening Cultural Horizons through the Performing Arts for 1968, the evaluation team stressed the benefits to the instructional program as reflected in the teacher-administrator experience. In addition, the team, by visit and personal observation involving discussion with pupils, teachers, and administrators, coupled with attendance at performances and in class observation of teacher-pupil interaction made positive determinations as to the value of the project in the schools. The reaction was overwhelmingly positive.1

During this past year, fall 1968 and Spring 1969, similar visits, observations both of performance and class activity, as well as organizational phases of the program were conducted and impressions recorded.

The administration of the program has not only maintained a high degree of vision and imagination in the continuing experiences involving the arts, but has maintained an unusual level of efficiency in use of groups, in use of school time, in material for pre- and post-class discussion, and in getting students to and from performances.

New experiences were introduced this year, some of which to certain individuals may seem controversial. The introduction of In White America, which reflects aspects of one of the social problems our nation is currently involved in understanding and hopefully solving, is a case in point. It seems to us that it is most important for all segments of our society to be

1See Evaluation of the Merced County Schools Project, Attachment 1, 1968 Report
aware of the emotional and intellectual factors inherent. The urban problem will become the problem of all cities, whatever their size. Therefore, it is important that the arts be used to reflect what can become relevant and meaningful in pre- and post-performance discussion. To know is to be free. We will solve our problems as a nation, not in segments.

Some concern of a very minor nature was expressed about language use in performance. We feel again that the school must not reflect isolation from what the pupil accepts without concern every day through other media. It again gives an opportunity for the development of a well grounded sense of values which reflect an understanding of the current scene and an application of an improved value scale. A rigid and nervous concern will precipitate a response which does not allow for establishing acceptable limits. It would be our impression that the introduction, through a performance, of an opportunity to discuss the propriety of all phases of what television, newspapers, and other media project as our "culture" would give an excellent teaching opportunity because the reasonable limit has been reflected in the performance and the extreme is open to question by virtue of the use of the reasonable. The discussions that follow can be rich in developing a clear and helpful set of value criteria.

The above comments are made in some detail, not because this represented a strong position, or a major view, but because it was the single new element of negative reaction by a few teachers and administrators in reference to two performances out of all presented and with respect to two minor items in them.
The evaluation team this year concentrated on the pupil response to the program experience exclusively in the instruments used. Included during the visits were observation evaluations which included administration, teaching, and the effect in action of programs as the young people were seeing and hearing them.

It was most apparent during the observations that the pupil sense of what a live performance was to be, the level of expectation which did not exist before in the same degree, the capacity for functioning as an audience in a group and maintaining intense interest and empathic identification, has clearly increased. These cultural opportunities, unknown to these young people three years ago, were now becoming -- for those exposed during this period -- an event of meaning and enjoyment. They knew what to expect, they knew how to receive it, and they knew how to participate. These elements achieved alone would be worth all that has been expended in funds, time, and energy. But much more than these factors is reflected in the evaluation of the program over the years and including this year.

Two instruments were applied this year. One was to assess the impact of the Performing Arts Program on the knowledge of the students who were involved. The second instrument was to get some attitudinal and motivational indications.

In the first instrument designed to assess the impact on the knowledge of the students, the research issue was essentially the following: Do the students of Merced County who were involved in the Performing Arts Program possess more information about dance, theater, music, and the like than comparable students who were not involved in the Program?
To this end a questionnaire was devised to test factual knowledge in the areas of music, dance, and drama. This questionnaire was developed largely on the basis of library research and interviews with people in the field of music education, dance, and children's theater. Several preliminary samples of children were tested for the purpose of refining the questionnaire by improving those questions which contained confusing wording or eliminating questions which did not provide an adequate range of response. The final questionnaire contained fifteen multiple choice items and twenty-four true-false items. Brevity was considered to be important so as not to impose too much upon the time of teachers or the attention of students.

The final sample contained one-hundred and fourteen (114) sixth graders from Merced County, forty-six (46) sixth graders from Madera County, and fifty-one (51) sixth graders from Stanislaus County. The latter two samples are combined in the table presented below. An effort was made to match the communities from which the sixth graders were selected, on the basis of socio-economic level and ethnic mixture.

The following table shows the percentage of correct responses to each question for both groups.

GROUP A -- Merced County children with Performing Arts Program (N = 114)

GROUP B -- Children from adjoining counties without Program (N = 97)

* significant at 12% level
** significant at 5% level
*** significant at 1% level
**** significant at 0.001% level
Multiple choice items:

1. Ballet began in
   A. Italy 78%  B. China 70%
   C. Mexico

2. The stage manager is important because
   A. he watches the audience to see if they are enjoying themselves
   B. he arranges and moves scenery 66%  C. he designs costumes 66%

3. The person who makes up dance steps is called the
   A. producer 70%  B. stage manager 57%
   C. choreographer

4. Women ballet dancers dance on toe shoes
   A. to make them taller 89%  B. to give an impression of lightness 76%
   C. because it is more difficult

5. The dances of the American Indians are
   A. part of their religious observances 58%  B. mostly hollering and jumping 60%
   C. mainly to attract tourists

6. A woman opera singer can sing music written for
   A. bass 76%  B. tenor 62% *
   C. soprano

7. J. Hann Strauss is famous for
   A. writing waltzes in the Viennese style
   B. bringing English actors to America 62%  C. playing the clarinet 51%

8. A farce is a play
   A. with a moral lesson 40%  B. with a sad ending 40%
   C. with exaggerated actions and silly situations

9. A requinto is
   A. a drum 55%  B. a small guitar 43%
   C. a singer with a high voice

10. A concert band is different from an orchestra because
    A. it plays louder 67%  B. it has no stringed instruments 62%
    C. it has drums
11. The following is a percussion instrument:
   A. bass drum
   B. trombone
   C. clarinet

12. The conductor
   A. writes music
   B. introduces the musicians
   C. helps the musicians play together

13. A chamber ensemble is
   A. the same as a quartet
   B. a small group of musicians who play on a small stage
   C. nothing but stringed instruments

14. Spirituals are
   A. ancient songs of the Greek people
   B. an expression of the hope and faith in freedom of Negro slaves
   C. sung only by preachers

15. Spirituals are valuable to art because
   A. only a few people can sing them
   B. they remind us of the past
   C. of their poetry and truthfulness

True-false items:

1. Mariachi bands usually play sad music for funerals.
   A  B

2. All the movements of ballet are based on five positions of the feet and arms.
   A  B

3. A dancer must be as strong as an athlete.
   A  B

4. A dancer does not need to know much about music.
   A  B

5. Opera is not always true to life.
   A  B

6. An opera singer must know something about acting.
   A  B

7. Opera is always serious.
   A  B

8. Pantomime is imitation, while dance is expression.
   A  B
9. Clowns use pantomime
   A  77%  B  58%  **

10. The clarinet is a very important instrument in a concert band.
    A  81%  B  69%

11. The cello is a large stringed instrument.
    A  70%  B  63%

12. The trumpet is a woodwind instrument.
    A  76%  B  61%  *

13. Old dance tunes became the patterns for the first instrumental music.
    A  79%  B  72%

14. Folk songs are not art.
    A  65%  B  68%

15. Good pitch means being able to keep to the beat of the music.
    A  42%  B  38%

16. The most important instruments in a Mariachi band are trumpet, harp, and piano.
    A  58%  B  42%  **

17. The early English word for band was "noise".
    A  57%  B  49%

18. The march Stars and Stripes Forever was composed by Francis Scott Key.
    A  52%  B  40%

19. All brass instruments have the same mouthpiece.
    A  62%  B  60%

20. The oboe is not a stringed instrument.
    A  70%  B  69%

21. Boxers and basketball players can profit from ballet training.
    A  66%  B  56%

22. The dances of American Indians often imitate the movements of animals and birds.
    A  84%  B  71%

23. The movements in ballet dancing are complicated and difficult rather than simple.
    A  79%  B  68%

24. Stage drama gives us a chance to learn about human nature.
    A  61%  B  54%

---

Mean  70%  61%

Inspection of the table indicates a distinct trend on almost every
question. The students who have attended performances of the Performing Arts Program answer more correctly than the other group. The responses to five questions are significant at the 5% level of significance. Reversals of direction with the students from Stanislaus and Madera Counties answering correctly numbered only three. No reversal is statistically significant. It seems evident that the Performing Arts Program has added to the knowledge of students concerning music, dance, and theater in significant ways.

The questionnaires were administered anonymously, since only groups were being compared. Some students provided their names, however. Where results for boys may be compared with those of girls (where names are available), the trends for the Performing Arts Program students to respond correctly are even more pronounced. The evaluators are of the opinion that the tendency for the Performing Arts Program group to respond correctly is more pronounced as well when students from non-middle class backgrounds are compared. These conclusions cannot be documented statistically, but the evaluators consider that they have considerable validity. Middle class students, particularly girls, have much opportunity to learn about or to participate in drama, music, or dance. Accordingly, the Performing Arts Programs do not influence their store of knowledge so much as is the case for non-middle class students.

A second instrument was administered to get some attitudinal and motivational indications. Some very interesting and important factors were reflected in the response to this instrument:
1) The retention factor in terms of the specific performances was very high. About 25% had a period of a year elapse since the experience in several of the performances and yet they were able to remember and identify the performance and its effect. The validation of question one is in the consistency of response to the effect of the performances under the sections involving attitude and motivation factors (2 through 9, exclusive of 4).

The results show that ballet, opera, and the plays were outstanding in their appeal and effect. The other experiences rated high but these experiences clearly were most effective. This would, in our opinion, be contrary to any pre-casting of thought about the programs. At the inception of the project there was expressed concern by some teachers and administrators regarding these programs in terms of acceptability by their student population. The results of the student reaction would confirm the wisdom of the choices made by the director of the project. In fact, in all categories except solo performance, the Chamber Ensemble, and the mime effort there was a high record of favorable response. The schools tested did not have either the solo performer or the mime performances, except in one class on one occasion. The young people who responded favorably to these two would therefore still represent a good percentage in their group -- about 30%.

2) The second question is directed at student enjoyment of the performances and the percentage of response to the two highest levels of acceptance. The results of 73% very much, 24% fairly much, 3% very little, gives a sharply defined attitude in favor of the programs; 97% in the most favorable brackets. Only 3% of the total in the schools tested answered
"very little". None answered "not at all" when requested to respond to a complete lack of acceptance or interest.

The sequence of questions from 3 through 15 (excepting one phase of 6) were designed to get both an attitudinal and motivational potential profile.

**Comments on Results Under Numbered Headings 3-15**

3) The elements which indicate a high degree of immediate response under ballet are, in order, 1) they wanted to talk to their friends about it, 2) they wanted to talk to their parents about it, 3) see more ballet. A significant percentage were motivated to do such things as 1) study dancing, 2) paint the dancers costumes or scenery, 3) learn to move better through dances or sports, 4) write poetry. It should be noted and underscored that only 13 replied they felt like doing nothing, while 64 answered that they had no such feeling. The attitude of the high percentage of positive responses is consistently reflected in the specific attitudinal and motivational interests sections.

4) The experience with the Indian dance presentation which had a high ethnic-folk flavor and which is indigenous and an element with which they have had much more exposure through film and television than, say, ballet or opera, offers an interesting comparison. There were no areas where the motivational responses were as high as under the ballet. The over-all response was much higher in ballet, significantly higher in opera, in the negro choir performance, and the Mexican Mariachi band. The total responses were lower in the symphonic band and the Chamber Ensemble and solo singing performances only. The variation can be accounted for in
some measure by the fact that not all saw the performances in these special instances. It is also clearly consistent with their memory retention of experiences had in the various performances. The three lower in response to the attitudinal-motivational sections were also lower in the experience retention area.

5) The significant factor it appears under 4 is the breadth of their motivational interest with only 17 of 76 having no response. The various possible attitudinal-motivational-behavioral elements are almost equally divided on the positive response. The only single response where the negative outweighs the positive is in learning to sing better and that difference is not great. It is again apparent that the educational experience through the opera had a very strong impact and that the resulting motivational factors were very high.

6) This series was designed to get some further response on what had been learned specifically about these fields in general understanding. The percentage of correct answers is exceptionally high on the questions relating to basic definitions. The percentage of correct answers to knowledge of definitions is in this ratio:

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Correct Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>74</td>
<td>26</td>
</tr>
<tr>
<td>65</td>
<td>15</td>
</tr>
<tr>
<td>79</td>
<td>21</td>
</tr>
<tr>
<td>88</td>
<td>12</td>
</tr>
</tbody>
</table>

A cross reference to earlier attitudinal questions was included and the prior indications of enjoyment of the opera, enjoying talking about it are clearly validated.

Two interesting factors in this series were reflected in 1) the high negative response to hearing opera records as against the high interest
and acceptance of live performance, 2) the number who indicated they did not understand the opera. It may be that Die Fledermaus was more difficult for them to follow than Dr. Miracle and the response under this question may reflect that difficulty. The choice under the memory-retention factor in I was very high in response to Dr. Miracle, the opera. In fact, the second highest response to all performances. The 63 therefore who responded in this section that they did not understand the opera would most probably be reflecting the difference in the ease with which the story line was followed. Some of these clearly were responding to other factors than the story line when their response to opera in the other sections was so favorable. The impression here most likely is that out of the various operas the story line was not as easy to follow in one instance. I see no other implication in this reaction.

7) A distinctly different musical event with a choir composed of excellent negro singers brought a very heavy percentage of favorable response. The motivational and attitudinal factors in every instance are high. The desire to know more about the negro music, to talk to parents about it, represents an additional factor beyond the art; the promotion of understanding. I refer again to the production of >>>>>> in >>>>>> and I feel the same factor will pertain -- promotion of understanding.

8) The percentage balance in the case of the solo performance is very close in positive-negative response. I would assign two factors to account for this. 1) Fewer of those tested heard her, 2) the solo voice does not have the impact of larger groups or opera performance for this age level. It should also be noted however that the favorable response outweighs the unfavorable by percentage relationship.
9) The Mariachi Mexican Band is another musical-ethnic experience which reflects a favorable response but is much below ballet, opera, and the plays. Again, an expression or preference for what preconception in planning without vision might rule out. The young people in this instance were exposed to something they see and hear more often through television or in film and yet a sharp line of definition is established in favor of the more classical forms. Response was, as in the case of the Indian dance music folk experience, lower than for the more "classical" forms. The mean on responses however gave 54% of the group indicating positive motivational responses.

10) The attitude toward the Symphonic Band performance, while lower in numbers responding to the influence of the presentation, still 53% were influenced favorably and indicated positive motivational reaction with learning more about bands and learning to play a musical instrument the strongest of their motivational responses.

11) The Chamber Ensemble moved over 50% to indicate interest and intention with respect to how they felt at the time of the performance. It is significant that this experience created both a desire to respond in singing but also to hear more of this type of music and the impulse to paint or draw as a result of the imagination being touched.

12) Under the questions involving participation or desire to participate there is a clear indication that when the pupil was involved, the enjoyment reached a higher point. The two highest responses given were that enjoyment was at its highest when they could do something too and when it was talked about in class afterward. It is interesting to note
the difference and the significance of their reaction to when they talked about it in class afterward and when they talked about it ahead of time. There is a significant percentage difference favoring the post discussion which would signify the meaningfulness of the performances in terms of an increased learning experience with the live performance as a reference. The high percentage of response to yes under every question involving participation would support strongly the need for such an approach to be maintained and even expanded.

13) This section was used to validate the response to 1 and it appears it does with the opera, Dr. Miracle, and the play, Katya the Wonder Girl, getting a response consistent with the responses under question 1. The other performances were reacted to consistent with their retention-memory response.

14) Were the motivational possibilities on a long range potential clearly manifest at the time of performance? The fact that in every instance but one there was a desire to learn to do what they were seeing and hearing done was higher than the reverse. The percentage differential in three of the five is significant. It should be noted in this section that of 87 answering the final questions, only 15 indicated that they had no reaction of a motivational or attitudinal nature.

15) In the request for their own preference in what they would like to have in future performances, the responses are quite evenly divided. Theatre plays has the highest response but only if separated from the individual music responses. Music, ballet, and theatre reflect the consistency of their responses to these throughout the instrument. The percentage
differences are negligible with no one art area dominating. The weight in the music area would dominate in totaling all forms but this would be expected because the greater number of performances involve some music or was a music presentation.

There is certainly clear evidence of the pupil interest in the continuation of the program and a clear perception of what they have found interesting, provocative, and valuable.

Significant Findings

1) The retention-memory element being at such a high level indicates a great impact on the pupils involved.

2) The knowledge gained in the experience is clearly manifest in the capacity to answer with statistical significance the questions asked.

3) The program had virtually total acceptance and enjoyment response, with an insignificant 3% of those responding being negative.

4) The reaction to the various forms and media tend to give the weight in interest to the more classical rather than folk or popular. The folk and popular, however, have a significant impact as well.

5) Very positive and clear indication of motivational and behavioral responses:

- Talking with friends about art experience
- Talking with parents about art experience
- See more ballet
- See and hear more opera
- Participate with performers
Talk about the art experience in class before and afterward, with greater emphasis on post experience discussion
Desire to learn to be involved in music and ballet and theatre
To attend more theatre performances

These are the more weighted responses, but on the instrument indicated, a number of others are important to a certain percentage of the young people.

6) The administration of the program continues to be imaginative, well-organized, and responsive to the needs in the entire county.

7) The cooperation of the teachers and administrators remains at a very high level and the coordination between the director's office and the individual school is excellent. This is true both as to input and feedback. The degree of success of the program indicates a superior quality of interaction.

---

The Past -- The Future

The reports of the two previous years gave evidence of the high degree of satisfaction and professional involvement by the teachers and administrators. The impact on the young people was reflected through the response from the staffs involved. In addition, the performers and parents were clearly represented in the assessment. Also, through contact with the pupil, the classroom teacher, and direct involvement with the classroom, evaluation was made of the quality and value of the project. These two reports carried the explicit picture of an excellent educational experience for the socio-economic sector served through this project.
It is manifest that the young people involved have developed increasing awareness of the place of the arts in their lives. This year’s evaluation report carries clear evidence of growth in knowledge, attitude, motivation, and behavioral response. It has been the "eye-ball" observation of the team that these things were occurring as each visit to a performance and the post-performance observation, conversation, and discussion would support the observation. The results of the instruments administered thoroughly bear out the observation and extend the perimeters of it much beyond expectation in several areas.

It is therefore apparent that if at all possible in any way to continue this program it is without question a most valuable element in the lives of these young people in these schools. There is no contra-evidence which the evaluation team has encountered in its three-year assessment. There is every indication that the project has fulfilled in an exceptional way its objective, Widening Cultural Horizons Through the Performing Arts.
