Both of these catalogs are part of a series of four official AID publications covering both academic and non-academic training opportunities. These two in particular were developed to encourage increased use by Asians of the regional training resources designed to assist them in the economic and social development of their countries. The catalogues are intended for use as a working tool by both American and host government training officers and technical advisors in determining where to train participants, when to train, and to provide information about technical programs, fees, prerequisites, resource addresses, housing, language of instruction, and the United States involvement with the training resource. There are programs described for: 1) agriculture, 2) industry and mining, 3) transportation, 4) labor, 5) health and sanitation, 6) education, 7) public safety and administration, 8) community development, and 9) communications media. India, Lebanon, Pakistan, Turkey, Iran, Greece, U.A.R. (one), and Afghanistan (one) are included along with Thailand, Philippines, Korea, China, and Japan (one). (Author/AWW)
THIRD COUNTRY TRAINING RESOURCES IN EAST ASIA

INTRODUCTION AND EXPLANATORY NOTES

1. Purpose

The purpose of this catalogue is to serve as a resource of standardized, up-to-date data on both academic and non-academic training resources in East Asia. It is restricted to those resources considered to be of the greatest potential utility to A.I.D. in its training programs. These training programs are designed to assist in the economic and social development of the East Asia countries. An essential element in encouraging the increased use of East Asia training resources is the knowledge the USAIDs have about training opportunities.

This catalogue is one of a series of four official AID/W publications planned to cover training opportunities in the various areas of the world where A.I.D. sponsored training of foreign participants takes place.

It is hoped that this catalogue will be of value to USAIDs and the governments of the Region in the further utilization of regional resources and in the interchange of participants. Any questions, comments or suggestions for the improvement of this publication will be most welcome and should be sent to: Third Country Training Branch, Office of International Training, Agency for International Development, Washington, D.C. 20523.

2. Source of Information

The information contained in this catalogue is derived largely from USAID responses to the AID/W request for descriptions of selected resources particularly suitable for third country training in fields that fit into A.I.D. program concepts. This is not an inventory of facilities. No attempt has been made to be all-inclusive. It is designed for the use of American Advisors, Technicians and Development Training Officers responsible for participant programs and their implementation. It is also intended for the use of Development Training Specialists in the Office of International Training in AID/W as background information for combination U.S. and third country training.

3. Arrangements and Coverage of Contents

A. General. This catalogue is intended as a working tool for Development Training Officers and Technical Advisors in determining where to train, when to train and to provide available information on resources, processing, per diem, fees, housing, language of training and some general background material on individual country programs. We have included a description of any U.S. involvement in the facility since Technical Advisors would sometimes be familiar with the kind of courses given and the emphasis placed by the University contractor. The Predeparture Information is provided to smooth the way for the participants, as for example, insuring that he will have
readily available the points of contact and will not arrive in a strange
country to find all offices closed because of an official holiday. It is
hoped that this type of practical knowledge will facilitate the selection
and processing of participants for third country programs.

The A.I.D. Manual Orders for arranging and carrying out third
country training are:

M.O. 1386.1 - Third Country Training Policy
M.O. 1386.2 - Third Country Training Procedures and Schedules
of Maintenance Allowances
M.O. 1386.3 - Third Country Participants: Medical Examination
M.O. 1386.4 - Third Country Participants: Health and Accident
Protection Benefits

B. Prior to Documentation. Before preparing the necessary documentation;
a check should be made with the host USAID to ensure that the resource infor-
mation is correct if the resource has not recently or previously been used.
For various reasons there may have been changes in expenses or requirements
from those shown in the catalogue.

C. Section I. Resources by Code and Field of Activity. This section
contains a listing of technical programs available in the different countries,
arranged by code within each major field of activity. Within each activity
code, the resources are arranged alphabetically by country, e.g. resources
from China are listed before those from Korea. The page on which the complete
data may be found is shown. The codes assigned to the fields of activity of
the resource sheets are based on the technical codes described in Attachment A
to M.O. 1095.2, Coding of Projects and Project Documents. A reference copy of
this M.O. prefaces Section V.

D. Section II. Resources by Country. This contains a listing of
training resources arranged by country and within each country by major
field of activity together with the page on which it can be found.

E. Section III. Predeparture Information. This consists of an alpha-
betical listing of the countries covered, some statistical information on
each, the USAID address and telephone number, special arrangements required
for entry into the country and a listing of its official holidays. This
information is intended to assist USAIDs in determining the most appropriate
date of arrival in the country and to provide the participant with the kind
of data usually requested prior to departure, e.g. participants want to know
the street address in almost all cases.

F. Section IV. Statistical Data. Tables of statistical data on A.I.D.-
sponsored training to give some idea of the size and scope of the program.
THIRD COUNTRY TRAINING RESOURCES IN EAST ASIA

INTRODUCTION AND EXPLANATORY NOTES

1. Purpose

The purpose of this catalogue is to serve as a resource of standardized, up-to-date data on both academic and non-academic training resources in East Asia. It is restricted to those resources considered to be of the greatest potential utility to A.I.D. in its training programs. These training programs are designed to assist in the economic and social development of the East Asia countries. An essential element in encouraging the increased use of East Asia training resources is the knowledge the USAIDs have about training opportunities.

This catalogue is one of a series of four official AID/W publications planned to cover training opportunities in the various areas of the world where A.I.D. sponsored training of foreign participants takes place.

It is hoped that this catalogue will be of value to USAIDs and the governments of the Region in the further utilization of regional resources and in the interchange of participants. Any questions, comments or suggestions for the improvement of this publication will be most welcome and should be sent to: Third Country Training Branch, Office of International Training, Agency for International Development, Washington, D.C. 20523.

2. Source of Information

The information contained in this catalogue is derived largely from USAID responses to the AID/W request for descriptions of selected resources particularly suitable for third country training in fields that fit into A.I.D. program concepts. This is not an inventory of facilities. No attempt has been made to be all-inclusive. It is designed for the use of American Advisors, Technicians and Development Training Officers responsible for participant programs and their implementation. It is also intended for the use of Development Training Specialists in the Office of International Training in AID/W as background information for combination U.S. and third country training.

3. Arrangements and Coverage of Contents

A. General...This catalogue is intended as a working tool for Development Training Officers and Technical Advisors in determining where to train, when to train and to provide available information on resources, processing, per diem, fees, housing, language of training and some general background material on individual country programs. We have included a description of any U.S. involvement in the facility since Technical Advisors would sometimes be familiar with the kind of courses given and the emphasis placed by the University contractor. The Predeparture Information is provided to smooth the way for the participants, as for example, insuring that he will have
readily available the points of contact and will not arrive in a strange country to find all offices closed because of an official holiday. It is hoped that this type of practical knowledge will facilitate the selection and processing of participants for third country programs.

The A.I.D. Manual Orders for arranging and carrying out third country training are:

M.O. 1386.1 - Third Country Training Policy
M.O. 1386.2 - Third Country Training Procedures and Schedules of Maintenance Allowances
M.O. 1386.3 - Third Country Participants: Medical Examination
M.O. 1386.4 - Third Country Participants: Health and Accident Protection Benefits

B. Prior to Documentation. Before preparing the necessary documentation, a check should be made with the host USAID to ensure that the resource information is correct if the resource has not recently or previously been used. For various reasons there may have been changes in expenses or requirements from those shown in the catalogue.

C. Section I. Resources by Code and Field of Activity. This section contains a listing of technical programs available in the different countries, arranged by code within each major field of activity. Within each activity code, the resources are arranged alphabetically by country, e.g. resources from China are listed before those from Korea. The page on which the complete data may be found is shown. The codes assigned to the fields of activity of the resource sheets are based on the technical codes described in Attachment A to M.O. 1095.2, Coding of Projects and Project Documents. A reference copy of this M.O. prefaces Section V.

D. Section II. Resources by Country. This contains a listing of training resources arranged by country and within each country by major field of activity together with the page on which it can be found.

E. Section III. Predeparture Information. This consists of an alphabetical listing of the countries covered, some statistical information on each, the USAID address and telephone number, special arrangements required for entry into the country and a listing of its official holidays. This information is intended to assist USAIDs in determining the most appropriate date of arrival in the country and to provide the participant with the kind of data usually requested prior to departure, e.g. participants want to know the street address in almost all cases.

F. Section IV. Statistical Data. Tables of statistical data on A.I.D.-sponsored training to give some idea of the size and scope of the program.
G. Section V. M.O. 1095.2. The codes assigned to the fields of activity under Item 4 of the Resource sheet are based on the technical codes described in Attachment A to M.O. 1095.2. A copy of the M.O. is included with this catalogue for reference purposes. In some cases it was difficult to fit facilities under specific codes of this M.O. since the codes were set up to cover existing A.I.D. projects. This is particularly evident in those facilities placed under the category of Education, under which are grouped certain universities with descriptions of courses which range over many fields of activity and which are not necessarily intended to prepare students for teaching. Also please note the use of the "90" code, i.e. "All Others..."

H. Section VI. Third Country Training Resource Sheets. Training opportunities available in the various countries are recorded on Third Country Training Resource Sheets. The Resource sheets have been arranged by field of activity according to the codes found in Attachment A of M.O. 1095.2. Within each field of activity the Resource sheets are arranged alphabetically by country.

The types of training are classified in three categories: a) academic--institutional leading to a degree; b) course--a fixed program with a definite start and stop date, usually repetitive; c) program--often ad hoc and tailor-made for specific individuals which frequently includes on-the-job training and might or might not include a course. Other blocks of the Resource sheet are self-explanatory. Incomplete blocks and data reflect lack of information submitted by the USAIDs or are otherwise not available.

All expenses shown as "dollars" mean U.S. dollars.

The remainder of the items are self-explanatory.

4. Keeping the Catalogue Up-to-Date

The catalogue is in loose-leaf form so that USAIDs can supplement, delete, amend and up-date information. In order to keep the catalogue current and up-to-date, AID/W depends on the active interest of Training Offices and Technical Divisions in the field to send in suggested additions, corrections, and deletions. Changes to facilities already included in the catalogue will be distributed periodically by AID/W on revised sheets which will carry the same page number as the original sheets they replace indicated as replacements by a later date under Item 1 of the Resource sheet. New facilities will be given the number of the sheet which precedes it in the catalogue with the letter "a" added. In the event that several sheets are added after a specific page of the original catalogue, letters "b", "c", etc. will be added to the number of the original page.

All proposed changes or additions should be forwarded on standard Third Country Training Resource Sheets such as those used in this book to Third Country Training Branch, Office of International Training, Agency for International Development, Washington, D.C. 20523. At the same time copies of the
new or revised sheets should be sent to the USAIDs most likely to use the facilities described for third country training purposes so that there is no delay in their receipt of the information. If the Mission does not have Resource sheets, the same information may be transmitted by airgram.

5. Other Sources of Data

In addition to the resources contained in this catalogue, there are other sources of training opportunities which may be of interest:

a. Third Country Training Opportunities in The Philippines, Institute of Public Administration, University of The Philippines and USAID/Philippines, Manila, 1962

b. Training Opportunities in East Asia, Far East Manpower Branch, USAID/Philippines, Manila, 1968

c. Handbook of Training Facilities at The Technician Level in South and Southeast Asia, Colombo Plan Bureau, 12 Melbourne Ave., Colombo 4, Ceylon, 1964

d. Directory of Selected Training Facilities in Family Planning and Allied Subjects, International Planned Parenthood Federation, 18-20, Lower Regent Street, London, S.W.1

e. Programme and Financial Estimate for 1969, Asian Productivity Organization, Aoyama Daiichi Mansions, 14-102, No. 4, 8-chrome, Akasaka, Minato-ku, Tokyo

USAIDs desiring any of these publications should contact the USAID of the country where the facility is located or the facility direct, since AID/W has only reference copies and none for distribution.

6. Future Distributions. Persons who wish to receive copies of revisions and additions to the Training Resource Catalogues should send this request to the:

Third Country Training Branch
Office of International Training
AID-State Department
Washington, D.C. 20523, USA

SECTION III

PREDEPARTURE INFORMATION

EAST ASIAN COUNTRIES

REPUBLIC OF CHINA

Capital: Taipei
Area (square miles): 14,000
Independence Date: October 10 (Founding of Republic of China)

Population (estimate): 14,500,000
Official Language: Chinese

Joint Technical Assistance Committee (JTAC) Address:
2-1 Hsuchow Road
Taipei, Taiwan

JTAC Telephone: Taiwan 29180

Special Requirements: Standard visa procedures

Holidays:
January 1, 2
March 29
October 10
November 12
Mid February (Chinese New Year)
September 28
October 25
December 25

REPUBLIC OF KOREA

Capital: Seoul
Area (square miles): 38,000
Independence Day: August 15

Population (estimate): 29,000,000
Official Language: Korean

USAID Address: c/o American Embassy
Sejong-Ro, Chongro-ku
Seoul

USAID Telephone: Seoul 72-2601, Ext 2325

Special Requirements: Standard visa procedures

Holidays:
January 1-3, March 1, April 5, June 6, July 17, August 15,
September 18, October 3, October 9, October 24, December 25.
PREDEPARTURE INFORMATION (Continued)

REPUBLIC OF THE PHILIPPINES

Capital: Manila
Area (square miles): 116,000
Independence Date: June 12
Population (estimate): 33,000,000
Official Language: Tagalog

USAID Address: 1200 Roxas Blvd.
Manila, Philippines

USAID Telephone: 5-80-11

Special Requirements: Pre-entry visa possession necessary; visa not issued planeside. Other usual immigration/customs practices and requirements observed.

Holidays: January 1, (variable) Maudy Thursday/Good Friday, April 9, May 1, June 12, July 4, November 30, December 25, December 30; other holidays specially declared by the President.

THAILAND

Capital: Bangkok
Area (square miles): 198,000
Constitution Day: December 10
Population (estimate): 32,000,000
Official Language: Thai

USAID Address: 642 Petchburi Road
Bangkok, Thailand

USAID Telephone: 70040

Special Requirements: Normal visa requirements. Cholera shots. Diplomatic clearances are granted by the Thai Government in response to requests from participants' governments through diplomatic channels.

Holidays: January 1, February 13, May 1, May 6, May 13, July 9-10, August 12, October 23, December 5, December 10, December 31.

CIT/MASB Dec 1970
DEFINITIONS OF TECHNICAL CODES

Direct Military Support:

010 - Airfield Construction
Covers construction or extension of military airfields, including runways and taxiways, barracks, warehouses, schools for military or civilian employees, dependents' housing, or other related facilities.

020 - Naval Base Construction
Covers construction or extension of naval bases, including harbor defense installations, firing ranges, barracks, warehouses, schools for military or civilian employees, dependents' housing, or other related facilities.

030 - Army Base Construction
Covers construction or extension of army bases, including defense installations, firing ranges, barracks, warehouses, schools for military or civilian employees, dependents' housing, or other related facilities.

040 - Radar and Communications Network Construction
Covers construction, installation, erection, or extension of military signal or communication facilities of any type, or related facilities.

050 - Other Defense Construction
Covers construction, expansion, rehabilitation, or maintenance of transportation, power, communication, or industrial facilities, such as railways, bridges, roads, harbors, and power plants used both by defense agencies and by the civilian economy. This functional field is limited to the minimum costs or portion of costs absolutely essential and properly attributable to defense requirements. Also includes any military base construction not otherwise classifiable under codes 010-040.

060 - Major Materiel Production
Covers production of major materiel items (either complete items or components) as follows: man-carrying aircraft, engines, and parts; artillery; combat vehicles; ammunition, guided missiles, and explosives; electronics and communications; weapons and small arms; engineering and military railroad equipment (except tracks or railbed chargeable to code 050, if military) transport and other noncombat vehicles; and ships and harbor craft. This category may include procurement costs of equipment required to produce any of these major materiel items as well as costs of materials, labor, and any technical services or assistance required for production, and costs of construction of plants, factories, arsenals, shipyards, or other physical facilities for production of these items.

070 - Operations and Maintenance Supplies
Covers procurement of any commodities or services incident to the maintenance, operation, and repair of equipment and facilities utilized by the military establishment. Excludes major materiel production costs and troop pay. May include such things as petroleum products (POL), station and equipment maintenance, depots and warehousing costs, medical or clinical costs, and general administrative costs incident to maintenance, repair, and operation (MRO).

080 - Military Personnel Costs (including clothing, food, and pay)
Covers cost of:

a. Clothing: Cost of uniforms and clothing furnished to military personnel.

b. Subsistence: Cost of rations of all types and kinds furnished to military personnel.

c. Other Services and Supplies: Cost of transportation and recreation, or such morale-building services as libraries, chaplains, etc.

090 - All Other Direct Military Support
Covers direct military support activities not classified under another functional field.
### Agriculture and Natural Resources

**110 - Agricultural Education, Extension, and Research**
Covers general methodology, organization, and administration in agricultural education (except purely teacher training and vocational agriculture education (620)); agricultural extension and research activities contributing to increased agricultural production and improved rural living. Research, study, or work involving only a single more specific functional area, such as a specific crop or livestock development or land and water resources, should be coded in the more specific field. Teacher training as such and teaching methods in vocational agriculture and home economics should be coded under education.

**120 - Land and Water Resources**
Covers activities in soil conservation, upstream flood control measures, drainage, soil surveys and soil classification, land use, land reform, and programs and activities for the use and disposition of water where the primary purpose is the construction or improvement of dams and irrigation systems for agricultural purposes, and the improvement of irrigation practices, land clearing, and land preparation for irrigation, management and use of irrigated lands under different kinds of irrigation systems. (This category does not cover rural or urban water supply programs which are included under rural wells and potable water (125) and urban potable water (521), or activities under environmental sanitation (520) or hydroelectric projects which are included under power (220)).

**121 - Land Resettlement**
Covers projects to stimulate and assist desirable agricultural reform, involving land settlement and resettlement objectives. Food and feed may be provided to farmers and their families and their essential foundation livestock while in the process of bringing new land into production or changing existing land use for the social and/or economic development of the country.

**125 - Rural Wells and Potable Water**
Covers activities related to dug or drilled wells, spring captations, or other sources or safe water for domestic consumption, stock-watering, and other uses in a rural community, including the pumps, piping, storage tanks, and other appurtenances necessary for operation.

**130 - Crop and Livestock Development**
Covers specific activities for the improved production and development of agricultural crops, including the use of fertilizers, improved seeds, development of new crops, and disease and pest control; all phases of livestock production and management, including disease control and prevention, and production.

**140 - Agricultural Economics, Farm Organizations, and Agricultural Credit**
Covers functions of farm organizations, agricultural cooperatives, and agricultural credit systems; agricultural economics, including farm management, production economics, agricultural statistics, farm planning and work simplification, and land tenure adjustments.

**150 - Agricultural Marketing and Processing**
Covers general agricultural marketing, commodity processing, storage problems, and cooperative marketing, including organization, financing, and membership problems.

**160 - Home Economics**
Covers activities for the application of practical home economics knowledge and techniques to improve family living and more efficient resource utilization with emphasis on rural areas. Such projects deal comprehensively with the triple role of women as homemaker, consumer, and producer and include such activities as: producing, preserving, and preparing food; improving sanitary and physical environment and general health conditions of the home; selecting, making, and caring for clothing and other household articles; caring for and training children; and efforts to increase family income and improve the management of available resources.
165 - Rural Youth
Covers programs such as 4-H Clubs and their activities, with primary emphasis on contributions to improving agricultural production, rural development, and rural living.

170 - Forestry
Covers activities in reforestation, improved forestry management practices, development of forest products, and the establishment and operation of forestry schools.

180 - Fisheries
Covers activities for development of salt and freshwater fisheries, including fishing techniques, equipment, research, teaching, and special production and marketing problems.

190 - All Other Agriculture and Natural Resources
Covers activities of farm mechanization, operation, maintenance, and care of farm machinery; structure and layout of farm service buildings; farm storage problems; and food and agricultural activities not classified under another functional field.

199 - Technical Support, Agriculture and Natural Resources
Covers general program support (i.e., not feasible for costing under other projects) for agriculture and natural resources.

Industry and Mining

210 - Mining and Minerals
Covers activities related to the location, development, and production of all minerals, including petroleum and coal, except projects concerned with management or workers training as defined in industrial management (270) and industrial training (280).

220 - Power
Covers activities related to planning, design, establishment, and/or operations of facilities for the generation and transmission of electric power for commercial distribution, except activities concerned solely with management or worker training as outlined in 270 and 280. Includes dams for which power is the predominant purpose.

225 - Communications
Covers activities related to the planning, design, establishment and/or operations of telephone, telegraph, radio, television, and related special purpose facilities for point-to-point or mass communications.

230 - Manufacturing and Processing (not classified elsewhere)
Covers activities related to all manufacturing and processing installations and techniques, except fertilizer (231), pesticides and other plant chemicals (232), food processing and fortification (233), food storage and refrigeration (234), and projects concerned solely with management or worker training as outlined in 270 and 280.

231 - Fertilizer Production
Covers activities related to the manufacturing and processing of fertilizer, except projects concerned solely with management or worker training as outlined in 270 and 280.

232 - Pesticides and Other Plant Chemicals
Covers activities related to the manufacturing and processing of pesticides, and other plant chemicals, except projects concerned solely with management or worker training as outlined in 270 and 280.

233 - Food Processing and Fortification
Covers activities concerning the planning, engineering, construction, and management of techniques and facilities for industrial food processing and related operations, including but not limited to fruit and vegetable products, sea foods, meats, dairy, and bakery products. Includes the fortification of foods with vitamins and minerals.

234 - Food Storage and Refrigeration
Covers activities related to the planning, engineering, construction, and management of facilities for food storage and
refrigeration, e.g., grain treatment and storage, ice and other refrigerant manufacture, and industrial food storage and refrigeration facilities.

240 - Service Industries
Covers all service industries not elsewhere classified, such as banking, credit firms and associations, insurance, printing, and publishing.

250 - Engineering and Construction
Covers activities requiring professional engineering or construction services not confined to specific activities included under any other functional area. (See codes for specific industry, agriculture, land use, water, housing, etc.)

260 - Marketing and Distribution
Covers activities related to the marketing and distribution of processed consumer and durable goods.

270 - Industrial Management
Covers activities primarily devoted to any or all aspects of industrial management including: organization and policy, financial management and controls, personnel management, executive development, production techniques, research and development, productivity measurement; and also such subjects as labor management relations, human relations in industry, job analysis, etc., where the participating foreign nationals are at the management or supervisory level.

280 - Industrial Training
Covers activities for acquisition or improvement of industrial research, manufacturing, engineering, construction, and mining skills including technical aids media.

290 - All Other Industry and Mining
Covers industry and mining activities not classified under another functional field.

299 - Technical Support, Industry, and Mining
Covers general program support for industry and mining.

Transportation

310 - Highways (not classified elsewhere)
Covers activities on highway bridges, highway transportation, equipment, highway improvement and maintenance, development road construction, and highway safety studies.

311 - Intercity Highways
Covers activities related to the planning, engineering, and construction of new roads; maintenance of new and existing roads, including surface maintenance, drainage, culverts, bridges, shoulders, traffic lights, and directional signs, normally, hard-surfaced roads.

312 - Rural Farm to Market Roads
Covers activities related to the planning, engineering, construction, and maintenance of secondary and tertiary roads ranging from hard-surfaced roads to small roads and paths, often carrying animal-drawn vehicular and pedestrian traffic, light bridges and footbridges, normally from food-producing areas to villages or major highway marketing points.

320 - Urban Transit and Traffic Engineering
Covers projects related to operation and maintenance of urban transit systems, such as motorbus, trolleybus, streetcar, and any other means employed to transport urban traffic, traffic counts, and economic and design studies.

330 - Railways
Covers projects for railway surveys, maintenance of way, motive power and rolling stock, signals and communications, and railway repair and construction shops.

340 - Port Facilities and Harbor Improvements
Covers projects on cargo handling and storage, dredging, piers, and warehouses.

350 - Inland Waterways
Covers projects for all phases of development, construction, expansion, or maintenance of inland waterways.
A.I.D. MANUAL ORDER

TRNS. LErrER NO. 9:170

EFFECTIVE DATE December 10, 1970

PAGE NO. A-5

NO.: 099.2
Attachment A

360 - Ship Operations
Covers projects on navigational aids and other technical services relating to maritime administration.

370 - Air Transport
Covers projects on airport design and development, navigational aids, air safety, and airport operations.

390 - All Other Transportation
Covers transportation projects not classified under another functional field.

399 - Technical Support, Transportation
Covers general program support for transportation.

Labor-Manpower

These revised codes and definitions apply only to new projects. Active and completed projects will continue to be coded and reported as they were prior to the date of receipt of this revision. A Transition Guide shows the inclusions of old code items with the new definitions.

410 - Trade Union Development
Covers trade union leadership training; trade union development, structure, organization, and administration; workers' education; establishment and operation of labor education centers and training of union officers and members in the techniques of collective bargaining, contractual and grievance, arbitration and conciliation procedures; and related trade union activities.

Covers such institutions as the American Institute for Free Labor Development (AIFLD), African-American Labor Center (AACL), and Asian-American Free Labor Institute (AAFLI). Covers union-to-union programs, workers' education, skills training, housing, cooperatives, impact projects, civic and social development, and other trade union institution-building activities. See M.O. 1612.40.2 - Strengthening Trade Unions.

420 - Skills Training
Covers assistance to public and private institutions engaged in occupational training of the labor force at levels which do not usually involve the development of professional and university-educated personnel. Includes initial training of newly hired workers, upgrading skills of currently employed workers, retraining employed workers for jobs requiring different skills, training unemployed disadvantaged and underemployed workers to meet skill requirements for employment, training young persons for highly skilled occupations through apprenticeship, and training of training directors, coordinators, foremen, and first-level supervisors who in turn are directly involved in training workers. Among the covered programs are preapprenticeship, apprenticeship, on-the-job training, job corps types of training for disadvantaged youth, neighborhood youth corps types of training related to in and out-of-school programs, work experience and training in rural areas for poor adults, and experimental, demonstration, and research projects related to these programs.

430 - Labor Productivity
Covers trade union economic research, trade union engineering, job evaluation and classification, wage incentive, and employment and technological change, when the participating foreign nationals are primarily a labor team, though it may include supervisory or management members.

440 - Labor-Management Relations
Covers collective bargaining, mediation, conciliation, arbitration, trade union university training (industrial relations).

450 - Labor Law and Standards
Covers assistance to public and private institutions concerned with wages, hours, and conditions of work; occupational safety and hygiene; special protection of working conditions for women and children; industrial welfare facilities; improvements in the status of women and expansion of their opportunities for employment; labor law administration; and experimental, demonstration, and research projects related to these programs.

451 - Social Security
Covers assistance to public and quasi-public institutions responsible for such programs as unemployment insurance, separation pay, old age insurance, survivors insurance, workmen's compensation, health and disability insurance, and similar programs developed for members of the labor force to protect them and their families from interruption of their earnings as a result of unemployment, old age, accident, sickness, and death. Includes experimental, demonstration, and research projects related to these programs.
460 - Employment Services

Covers assistance to public and private institutions engaged in such manpower development services as recruitment and placement, job development, occupational and job analysis, labor market information and analysis, youth and other employment counseling, and participation in national, regional, and local manpower and job development programs. Services focus on the unemployed and underemployed in terms of recruitment, testing, referral to training, placement in jobs; enhancement of the employability of disadvantaged persons; provision of labor demand and supply information to employers and job seekers; encouragement of private and public employers to develop job opportunities for and to hire, train, retrain, and upgrade hard-core unemployed and underemployed youth and other job seekers; provision of or arrangement for counseling, basic and remedial education and work experience for chronically unemployed adult and disadvantaged youths; provision of a coordinated program of manpower and supportive services for the unemployed job seekers, with special emphasis on the local labor-market areas. Includes experimental, demonstration, and research projects related to these programs.

490 - All Other Labor-Manpower

Covers labor-manpower projects not classified under any other specific functional field. Includes specialized sector-oriented projects within the general coverage of Codes 420, 450, 451, 490, and 492; e.g., projects in skills training, labor standards, employment services, social security, and/or manpower statistics in the health, educational, or agricultural sectors, in population-family planning programs, for rural and community development, and strengthening the private sector. Also includes special-purpose projects designed to reduce manpower but not necessarily manpower projects not classified under any other specific field or institution, the applicable specific code is to be used. See M.O. 1612.40.3 - Strengthening Labor Ministries, paragraph V. of Attachment A to M.O. 1612.40.1 - Labor Programs, General.

492 - Labor, Manpower, and Price Statistics

Covers assistance to public and other institutions, such as universities, responsible for the collection, processing, and dissemination of factual information on (1) the size, trends, and composition of the labor force, including employment, unemployment, and underemployment; (2) wholesale and retail prices and consumer prices index; (3) wages and hours of work; (4) labor turnover; (5) work injuries and stoppage due to industrial disputes; (7) collective bargaining agreements; (8) productivity; (9) union membership; and (10) manpower and employment surveys and estimates of manpower resources, requirements, job opportunities, bottlenecks, and training requirements. Includes experimental, demonstration, and research projects related to these programs.

493 - Manpower and Employment Planning

Covers assistance to public officials, generally located within the overall development planning agency, responsible for the formulation, coordination, and evaluation of policies, programs, and institutions necessary for the attainment and maintenance of full, productive, and freely chosen employment involving the interrelated and interdependent elements of (1) development of the skills, knowledges, abilities, and motivations of the labor force; (2) helping to create jobs to make the fullest use of the labor force through appropriate fiscal, monetary, investment, manpower, and related measures; (3) linking job seekers with job openings, occupationally, geographically, and by economic sectors; and (4) improving worker productivity, welfare, and dignity. Includes experimental, demonstration, and research projects related to these elements and objectives and projects for coordination with the ILO's World Employment Program, the component regional manpower and employment
plans, and other multilateral assistance in manpower and employment planning. See M.O. 1612.40.4 - Manpower and Employment Development, and paragraphs II. through IV. of Attachment A to M.O. 1612.40.1.

494 - Manpower and Employment Seminars
Covers A.I.D.-financed seminars, symposia, conferences, and workshops conducted by A.I.D., the International Manpower Institute of the Department of Labor, universities, foundations, professional societies, consulting firms or other institutions in the area of overall and sector manpower and employment planning, administration, and evaluation. Includes worldwide, regional, subregional, and country projects of this nature, whether bilateral or in cooperation with such multilateral agencies as the ILO, OECD, OAS, ECAFE, ECA, and World Bank. Seminars, etc., covering one or more of the major elements set forth in M.O. 1612.40.4, are coded under this number.

499 - Technical Support, Labor-Manpower
Covers general program support for labor and manpower.

TRANSITION GUIDE FOR REVISED LABOR MANAGEMENT TECHNICAL CODES

Previous Code | Revised Code
--- | ---
410 - Labor and Trade Union Leadership | 410 - Trade Union Development (Title change and new, but comparable, code definition.)
420 - Apprenticeship and In-Service Training for Workers | 420 - Skills Training (Title change and new, but comparable, code definition.)
430 - Labor Productivity | 430 - Labor Productivity (Title and code definitions same as present.)
440 - Labor-Management Relations | 440 - Labor-Management Relations (Same title and code definition as present.)
450 - Labor and Social Legislation) | 450 - Labor Law and Standards (Title change and new, but comparable, code definition.)
(470 - Industrial Safety and Hygiene) | Note: All active and completed projects already coded 470 will continue to be reported in Code 470. New projects will be coded 490.
451 - Social Security | 451 - Social Security (New title and code definition—previously contained in 450.)
460 - Manpower Utilization | 460 - Employment Services (Title change and new, but comparable, code definition.)
480 - Worker's Cooperatives - Housing and Trade Union Welfare activities | 480 - Dropped for coding of new projects but is retained for reporting on present active and completed projects.
490 - All Other Labor | 490 - All Other Labor-Manpower (Title change and new, but comparable, code definition, with following exceptions: Codes 491 through 494 listed for purpose of separate identification on new projects.)
491 - General Labor Ministry Development (New title and definition—comparable projects (if any) shown previously under 490.)
Previous Code

499 - Technical Support, Labor

Revised Code

492 - Labor, Manpower, and Price Statistics
    (New title and definition--comparable projects
    (if any) shown previously under 490.)

493 - Manpower and Employment Planning
    (New title and definition--comparable projects
    (if any) shown previously under 490.)

494 - Manpower and Employment Seminars
    (New title and code definition--comparable
    projects, if any, shown previously under 490.)

499 - Technical Support, Labor-Management
    (Minor title change and code definition basically
    the same.)

(Continued on page 6c)
Health and Sanitation

510 - Control of Specific Diseases (not classified elsewhere)

Covers research activities and all campaign or emergency-type activities that are carried out separately, apart from regular health center or related activities.

511 - Malaria Eradication

Covers activities related to programs to eliminate and prevent the recurrence of malaria. Includes planning, epidemiological evaluation, geographical reconnaissance and identification of malarious areas, pilot (or preeradication) projects, and spraying with insecticides.

520 - Environmental Sanitation

Covers sewerage systems, garbage disposal, rat control, privy construction, laundries, public baths, markets, slaughterhouses, and related engineering plans and surveys.

521 - Urban Potable Water

Covers activities related to public utilities which collect, process, and distribute potable water to the premises of domestic and industrial consumers in an urban community. Activities include, but are not limited to, the planning, design, and installation of systems; the operation and maintenance of completed systems; and the training of personnel concerned with the development of institutions to carry out these functions.

530 - Health Facilities - Operation of and Advisory Services to

Covers health centers, hospitals, clinics, laboratories, dispensaries, subposts, and mobile units, not covered under other specific functional codes in health and sanitation.

531 - Maternal/Child (Infant and Preschool Children)

Covers projects to assist pregnant and nursing mothers by providing them with needed foods and other services at institutions such as clinics, hospitals, and community centers.

540 - Health Training and Education

Covers local training courses which are set up as activities and require professional and subprofessional personnel (physicians, sanitary engineers, nurses, laboratory technicians, sanitary inspectors, nurse aides) and activities for assistance to nursing, medical, and engineering schools, and health education projects, including contracts with colleges and universities.

550 - Health Facilities, Construction, Remodeling, Equipment

Covers construction, remodeling, repairs, maintenance, supplies and equipment of health facilities such as hospitals, health centers, laboratories, and similar facilities.

560 - Nutrition

Covers activities to improve health through better nutrition: improvement in agricultural and food technology, e.g., food surveys to provide reliable information on the nature and extent of existing malnutrition, levels of consumption, food patterns, consumption of foods commonly consumed, and availability of food to provide an adequate diet; educational programs for the general population to increase consumption of high quality nutritious foods; training nutritionists and other professionals involved in health or food production and utilization programs, i.e., doctors, health workers, teachers, agriculturalists, home economists, and community development workers; the provision of foods and other assistance to improve handling, preparation, preservation, and utilization processes.

570 - Population Studies

Covers projects designed to increase knowledge about levels and trends of population growth and their determinants and consequences. Such activities include registration, surveys, and analyses of vital statistics as well as studies of public knowledge, attitudes, and practices related to family planning. Excludes epidemiological studies of mortality trends by specific cause of death, which are included under control of specific diseases (510) and decennial censuses included under statistics - general and census (780).

580 - Family Planning

Covers projects designed to reduce the population growth rate or to limit family size as necessary, feasible, or desired by individual families as well as their governments.

590 - All Other Health and Sanitation

Covers all other health and sanitation projects not classified under any other specific functional field.
599 - Technical Support, Health, and Sanitation
Covers general program support for health and sanitation.

Education

610 - Technical Education (not classified elsewhere)
Covers activities dealing with improvement and expansion of education facilities for trade and industrial education, including training of teachers of vocational education for all levels, and establishment and improvement of vocational and trade schools.

620 - Vocational Agriculture Education
Covers activities for expanding and improving the teaching of agriculture at elementary and secondary levels, including preparation of teachers of vocational agriculture and improvement of agricultural schools.

630 - Home Economics Education
Covers projects for expanding and improving the teaching of home economics in elementary and secondary schools, and training of teachers of home economics for all levels.

640 - Elementary Education
Covers projects for improving basic education, including expansion and improvement of elementary school facilities and equipment, adaptation of curriculum and textbooks to local needs, and training of elementary school teachers.

650 - Secondary Education
Covers projects for expanding and improving general education opportunities at the secondary level, including improvement of teaching methods, textbooks, curriculum, school facilities and equipment, and training of secondary school teachers.

660 - Professional and Higher Education
Covers projects for improving educational opportunities at advanced levels, in such fields as education or engineering, including establishment and improvement of university facilities and advanced training of instructors and professors, and university contracts related to education proper. Activities for training in public administration, agriculture, public health, etc., are classified under the appropriate related functional field.

670 - Fundamental Adult and Community Education
Covers projects for improving and expanding educational opportunities for fundamental education and general adult education, including community schools.

680 - Educational Administration
Covers projects for improving educational administration, including reorganization of school systems, training of school administrators, and improving methods of educational finance, compilation of educational statistics, and activities in educational research.

690 - All Other Education
Covers educational projects not classified under any other specific functional field.

691 - Central Book Fund
Covers projects related to the need for text and other books used in social development and educational programs. Includes consultant services, technicians courses, and pilot projects.

699 - Technical Support, Education
Covers general program support for education.

Public Safety and Public Administration

710 - Public Safety
Covers projects designed to improve management, organization, and operation of public safety organizations. In addition to the usual police functions of protection of life and property, crime prevention and detection, regulation of traffic, an activity may embrace assistance in related fields including border patrol, prison administration, coast guard functions, operation of countrywide police communications networks, maintenance of national
personnel registries and personnel identification systems, fire fighting and fire prevention, and a variety of other regulatory functions.

720 - Government-wide Organization and Management

Covers projects aimed at improving organization and management in fields which are government-wide in application, scope, or effect, whether at Federal, State, or local levels. Includes "Hoover Commission" type surveys or reconnaissance surveys of public administration problems, organization, or management projects which cut across more than one governmental agency, organization and management of economic development programs excluding development planning (795) and government-wide organization, analysis, and planning.

750 - Public Personnel Administration

Covers projects dealing with recruitment and testing, classification and pay, motivation and morale, personnel legislation, human relations, and other civil service activities.

740 - Organization and Management of Particular Ministries

Covers projects aimed at improving management of particular ministries, programs, or levels of government such as improving organization and methods in substantive (agriculture, health, education, etc.) ministries, organization and management of government corporations, central-state-local relations, and local government functions, etc. Activities designed to provide substantive support of a governmental organization are classified under the specific related activity.

750 - Public Budgeting and Finance Administration

Covers projects dealing with government budgeting, accounting, auditing, fiscal analysis and economic planning, taxation, public debt management, tariffs, customs administration, and government banking and credit activities.

755 - Development Planning

Covers projects related to the development of effective national development planning processes in the developing countries.

760 - Administrative Services

Covers projects aimed at improving government administration, records administration, library administration, and office management and services such as business machines, filing, microfilming, mail and messenger services, printing and reproduction, space, lighting and ventilation, and forms control and design.

770 - Organization and Administration of Institutes or Schools for Public or Business Administration

Covers projects designed to improve facilities for training and education in public and business administration and associated activities involving research and consultation services, including university-to-university contracts in the fields of public and business administration.

780 - Statistics - General and Census

Covers projects to improve general government statistics and census statistics. Other activities in the fields of statistics are classified under the appropriate related functional field.

790 - All Other Public Administration

Covers public administration projects not classified under any other specific functional field.

799 - Technical Support, Public Safety, and Public Administration

Covers general program support for public safety and public administration.

Community Development, Social Welfare, and Housing and Urban Development Community Development, Social Welfare, and Youth

810 - Community Development

Covers projects with a unified overall approach to the problems of raising living standards at the community or village level through the application of community development processes, and provides for participation of the people in both planning and carrying out organized self-help undertakings. Activities of a more
specialized nature are classified under the appropriate related functional field.

820 - Social Welfare, Institutional
Covers activities to provide food and other assistance to needy residents of institutions who, because of their economic status, are unable to pay the full charge of the assistance provided. These institutions are nonpenal, noneducational, public or nonprofit private establishments operated for charitable or welfare purposes where needy persons reside and receive meals and other assistance, e.g., homes for the aged, orphanages, and summer camps.

821 - Social Welfare, Noninstitutional
Covers activities to provide food and other assistance to needy persons living in family groups outside of institutions who are in need because of their economic condition. Wherever possible the recipients engage in self-help activities in return for the food and other assistance received; the activities are nonreligious; are of benefit to the recipients, their families, and communities; and are organized and supervised.

822 - Refugees
Covers activities to provide assistance to persons who are in need because they have fled or have been expelled from their country of nationality or domicile and are living in a country other than the one in which they hold citizenship, or to persons who fled or have been expelled from their homes to a part of the country other than that in which they usually earn a livelihood.

823 - Emergency Assistance (not classified elsewhere)
Covers activities to provide assistance to persons who, because of extensive periods of drought, crop failure, or civil strife; or prolonged rehabilitation operations after flood, fire, earthquake, or man-made disaster, are in need of such assistance. Wherever possible recipients of food and other assistance engage in organized and supervised self-help activities.

825 - Youth
Covers projects concerned specifically with youth leadership training including related activities other than rural youth (105).

Housing and Urban Development

830 - Covers projects with a primary aim to accomplish nonrural shelter improvement except activities directly related to improvement of manufacturing and construction activities, engineering, and construction (250). Includes training, survey, investigation, advice, planning, and actual demonstrations for all types of private enterprise or public housing; activities aimed at improved housing policy or legislation and governmental organization for implementation; housing finance and management; architectural and planning design of housing; activities in housing economics and statistics, and in research and development.

840 - Self-help Housing
Covers projects of home building or improvement with the maximum utilization of family or community labor, and government programs aimed at sponsoring activities of this type.

850 - Supporting Projects, Housing
Covers projects which form an essential part of a major housing goal having its principal support from the cooperating government and its principal costs borne other than by assistance.

860 - Emergency Housing
Covers projects particularly related to disaster or major upheavals as distinct from usual, continuing housing activities.

890 - All Other Housing
Covers housing projects not classified under any other functional field.

899 - Technical Support, Community Development, Social Welfare, and Housing and Urban Development
Covers general program support for community development, social welfare, and housing and urban development.
General and Miscellaneous

Private Enterprise, Promotion (900-950)

910 - Development and Investment Centers

Covers projects related to local institutions providing technical services to private enterprise (feasibility surveys, preparation of prospectuses and loan applications, advice to owners of industrial and service establishments on management and marketing skills, and attracting local and foreign investment).

920 - Development Banking and Investment Credit Facilities

Covers projects related to industrial credit institutions (small industry credits, guarantees, development corporation lending, and development banks).

930 - Surveys of the Private Investment Situation and Specific Opportunities

Covers projects related to general surveys of investment climate, industrial possibilities, investment plans, entrepreneurial interests, governmental procedures, and other factors relating to investment potential. An example would be where the government requests help in determining how to open the private sector of the economy to broader opportunities for local and foreign businessmen and a team is supplied to report on the investment climate, tax laws, import restrictions, investment incentives, specific areas of possible industrial development, need for development institutions, and related matters.

940 - Industrial Districts

Covers projects related to the planning, establishment, and management of industrial districts or to provide land, buildings, and technical advice on parks constituting groups of diversified industries (manufacturing, utilities, and supporting services).

950 - All Other Private Enterprise, General (not classified elsewhere)

Covers activities not listed above as surveys in insurance, credit rating, security exchange, product design and other fields, e.g., insurance, banking, market surveys, encouragement for the establishment or program activities of chambers of commerce, trade associations, and associations of manufacturers.

Other (860-980)

960 - Communications Media

Covers projects with the main purpose of spreading knowledge - any kind of knowledge - faster, farther, and more effectively. Generally it applies to activities for audiovisual support of various Mission programs or for improving communications media - broadcasting, graphic arts, motion pictures, publications, etc. Activities with the primary purpose of improving public services in individual technical fields, e.g., agriculture, health, and education are classified where practicable under the appropriate technical field. Excludes special-purpose activities such as point-to-point communications, telephony, aircraft, weather communications, photogrammetry, and the like which do not entail communications media or audiovisual education.

970 - Supply Services

Covers projects involving the conveying of advice to the cooperating country on any phase of supply management.

980 - Peaceful Uses of Atomic Energy

Covers projects concerned primarily with the peaceful use of atomic energy. When the use of atomic energy is of secondary importance and is only a segment of an activity, the activity is classified under the appropriate related function.

995 - All Other, General and Miscellaneous

Covers projects not classified under any other functional field and multifield activities in which the predominant functional field cannot be determined.

998 - Special Development Activity Authority

Covers projects approved and implemented under the Special Development Activity Authority described in M.O. 1323.1.1 - Special Development Activity Authority.

999 - Technical Support, General and Miscellaneous

Covers program support for the General and Miscellaneous Sector and the Mission generally, i.e., where it is not practicable to attribute the activities and related costs to specific projects or other major technical fields (e.g., the portion of Mission building space, communications, utilities, office supplies and equipment, and State Department support costs chargeable to program funds).

This document provides a comprehensive guide for coding projects and related documents, including codes for various sectors such as health and sanitation, education, industry and mining, and community development. The codes are organized to facilitate the identification and classification of projects and related documents.
THIRD COUNTRY TRAINING
RESOURCE SHEET

1. DATE
January 1971

2. REGION
East Asia

3. COUNTRY
Republic of China

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Agriculture 110

5. TYPE AND DESCRIPTION OF TRAINING
Type: Program
Description: Farm Extension for Adult Farmers. A combination of lecture, discussion, practice and field observation. Organizational system of agricultural extension at all levels and place of farm extension in the overall program; organization and functions of farm discussion group; model farmer program; advisory committees and their role; professional and lay leaders; relationship between workers and specialists.

6. INSTITUTION OR TRAINING RESOURCE
Joint Commission on Rural Reconstruction
Taipei

7. LANGUAGE OF INSTRUCTION
Chinese, Japanese, English

8. PREREQUISITES FOR ENTRANCE

9. DURATION:
Three weeks starting third Monday in April or November.

10. HIGHEST CREDENTIAL OFFERED

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition:
   b. Other training fees:
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   d. Other:

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
   Average hotel accommodations ranging from $4 to $6 a day.

14. OTHER
   A tourist visa is required for visitors staying less than 1 month. All visitors staying for more than 1 month must obtain an entry visa. Maximum number of participants: 15; minimum: 3.
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE
January 1971

2. REGION
East Asia

3. COUNTRY
Republic of Korea

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Agriculture 110

5. TYPE AND DESCRIPTION OF TRAINING
Type: Program
Description: Agricultural Research.
Observation of the organization and facilities for agricultural research in Korea; the development of agricultural activities; the utilization of agricultural research; and rice production process ranging from methods of planting and cultivation to the processing of yields.

6. INSTITUTION OR TRAINING RESOURCE
Office of Rural Development
Suwon City

7. LANGUAGE OF INSTRUCTION
Korean or English

8. PREREQUISITES FOR ENTRANCE
None

9. DURATION: Two months and seasonal.
   Begins:    Ends:

10. HIGHEST CREDENTIAL OFFERED

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition:
   b. Other training fees: Transportation costs, per diem and salary for interpreter and escort are needed.
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility: and escort are needed.
   d. Other:

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
   No dormitory is available but hotel or inn is available.

2. REGION
East Asia

3. COUNTRY
Republic of China

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Agriculture 130

5. TYPE AND DESCRIPTION OF TRAINING
Type: Program
Description: Rice Culture and Crop Rotation.
A combination of lecture, discussion, practice and field observation.
Management of rice field; relay interplanting of summer crops and sugarcane;
harvest of rice; handling of paddy and rice straw after harvest; preparation;
nursery; transplanting; water control; weeding; fertilization; pest control;
etc. Experiment covers improvement, fertilizer, pest control, seed testing
and classification.

**THIRD COUNTRY TRAINING RESOURCE SHEET**

1. **DATE**: January 1971  
2. **REGION**: East Asia  
3. **COUNTRY**: Republic of the Philippines

### 4. GENERAL FIELD AND CODE (See M.O. 1093.2)

- Agriculture 130

### 5. TYPE AND DESCRIPTION OF TRAINING

- **Type**: Program consisting of lectures and observation
- **Description**: Livestock & Poultry Production

Combination on-the-job training, laboratory work and observation in the following areas: Animal breeding, artificial insemination, dairy, swine and beef cattle management, poultry management, broiler production, pasture improvement, field management, extension service, etc.

### 6. INSTITUTION OR TRAINING RESOURCE

- Bureau of Animal Industry  
- Department of Agriculture and National Resources  
- Otis St., Paco, Manila

### 7. LANGUAGE OF INSTRUCTION

- English

### 8. PREREQUISITES FOR ENTRANCE

- Technical background and acceptance by agency concerned.

### 9. DURATION

- Programs vary from 2 weeks to 3 months
  - **Begins:**  
  - **Ends:**

### 10. HIGHEST CREDENTIAL OFFERED

### 11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

AID assisted in providing the agency with commodity support and the training of the agency's key personnel through the AID participant training program.

### 12. ESTIMATED EXPENSE (Excluding International Travel)

- a. Tuition:  
- b. Other training fees:  
- c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:  
- d. Other:

### 13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

- Hotel, dormitory and boarding house type of accommodation available.

### 14. OTHER

- Pre-entry visa possession necessary; visa not issued planeside.  
- Other normal immigration/quarantine/customs practices and requirements observed.
### Third Country Training Resource Sheet

#### 1. Date
January 1971

#### 2. Region
East Asia

#### 3. Country
Republic of the Philippines

#### 4. General Field and Code (See M.O. 1095.2)
Agriculture 130

#### 5. Type and Description of Training
**Type:** Course

**Description:** Multiple Cropping Training Course

The objective of the Multiple Cropping Training course is to demonstrate the food production potential of a tropical environment under modern scientific management and to equip the trainees with the knowledge and practical skills necessary to operate successful multiple cropping systems involving rice and some other food crops.

**Method of Training:** Combination of classroom lectures, seminars and field experience.

#### 6. Institution or Training Resource
The International Rice Research Institute
Los Banos, Laguna

#### 7. Language of Instruction
English

#### 8. Prerequisites for Entrance
Nomination and acceptance (limited number) by the Institute. All candidates must be interviewed by an IRRI staff before final acceptance is made.

#### 9. Duration:
4 months

**Begins:** February 20

**Ends:** June 20

#### 10. Highest Credential Offered
Certificate

#### 11. U.S. Involvement in Development of Resource
Financial support from Ford and Rockefeller Foundations and AID

#### 12. Estimated Expense (Excluding International Travel)

- **a. Tuition:**
- **b. Other Training Fees:**
- **c. Per diem rate:** (See M.O. 1386.2 for travel status.) At facility:
- **d. Other:**

  Cost per participant: $1,350.00 paid directly to the Institute (Amount covers stipend, room and board, laundry service, medical care, local travel and other training costs.)

#### 13. Availability of Housing or Dormitory Facilities
Institute provides dormitory facilities.

#### 14. Other
Pre-entry visa possession necessary; visas not issued planeside. Other normal immigration, quarantine and customs practices and requirements observed.
## THIRD COUNTRY TRAINING
### RESOURCE SHEET

1. **DATE**
   - January 1971

2. **REGION**
   - East Asia

3. **COUNTRY**
   - Republic of the Philippines

4. **GENERAL FIELD AND CODE (See M.O. 1095.2)**
   - Agriculture 130

5. **TYPE AND DESCRIPTION OF TRAINING**
   - **Type:** Course
   - **Description:** Rice Production Training Course
   - The objective of the Rice Production Course is to train individuals to become rice production specialists so that they will be in a position to organize short-course training programs upon return to their home countries with a view to local extension workers.
   - **Method of Training:** Combination of classroom lectures, seminars on various aspects of rice research and field experience.

6. **INSTITUTION OR TRAINING RESOURCE**
   - The International Rice Research Institute
   - Los Banos, Laguna

7. **LANGUAGE OF INSTRUCTION**
   - English

8. **PREREQUISITES FOR ENTRANCE**
   - Nomination and acceptance (limited number) by the Institute. All candidates must be interviewed by an IRRI staff member before final acceptance is made.

9. **DURATION:**
   - Begins: July
   - Ends: December
   - **Duration:** 6 months

10. **HIGHEST CREDENTIAL OFFERED**
    - Certificate

11. **U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE**
    - Financial support from Ford and Rockefeller Foundations and AID.

12. **ESTIMATED EXPENSE (Excluding International Travel)**
    - **a. Tuition:**
    - **b. Other training fees:**
    - **c. Per diem rate:** (See M.O. 1386.2 for travel status.) At facility:
    - **d. Other:**
      - Cost per participant: $2,000.00 paid directly to the Institute. (Amount covers stipend, room and board, laundry service, medical care, local travel and other training costs.)

13. **AVAILABILITY OF HOUSING OR DORMITORY FACILITIES**
    - Institute provides dormitory facilities.

14. **OTHER**
    - Pre-entry visa possession necessary; visas not issued planeside. Other normal immigration, quarantine and customs practices and requirements observed.
**THIRD COUNTRY TRAINING RESOURCE SHEET**

4. **GENERAL FIELD AND CODE (See M.O. 1095.2)**
   Agriculture 130

5. **TYPE AND DESCRIPTION OF TRAINING**
   **Type:** Program and degree (academic) training
   **Description:** Rice Research
   Training offered in the following phases of research related to rice culture:
   1. Agronomy (culture practices)
   2. Plant Breeding and Genetics
   3. Soil Chemistry
   4. Soil Microbiology
   5. Plant Pathology
   6. Entomology
   7. Plant Physiology
   8. Biochemistry
   9. Cereal Chemistry
   10. Engineering
   11. Agricultural Economics
   12. Communications & Extension & Statistics

6. **INSTITUTION OR TRAINING RESOURCE**
   The International Rice Research Institute
   Los Banos, Laguna

7. **LANGUAGE OF INSTRUCTION**
   (cont) English

8. **PREREQUISITES FOR ENTRANCE**
   Nomination and acceptance (limited number) by the Institute. Except for participants who visit IRRI for less than a week's duration applicants nominated to attend IRRI programs normally are interviewed by an IRRI staff member before they are accepted for training.

9. **DURATION**
   Begins: A few months to two years. (See continuation sheet)
   Ends: (See continuation sheet)

10. **HIGHEST CREDENTIAL OFFERED**
    Certificate of completion; Diploma for those completing M.S. degrees.

11. **U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE**
    Financial support from Ford & Rockefeller Foundation and AID.

12. **ESTIMATED EXPENSE (Excluding International Travel)**
    a. Tuition:
    b. Other training fees:
    c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
    d. Other: Cost per participant: $4,000.00 per year paid directly to the Institute (amount includes stipend, room and board, laundry service, medical care, local travel and other training costs.) Cost is prorated if training period is for less than 12 months.

13. **AVAILABILITY OF HOUSING OR DORMITORY FACILITIES**
    Institute provides dormitory facilities.

14. **OTHER**
    Pre-entry visa possession necessary; visas not issued planeside.
    Other normal immigration/quarantine/customs practices and requirements observed. Individual trainees receive close supervision under an Institute scientist depending on the field of specialization.
5. Type and Description of Training (Continued)

The Institute's training program provides young scientists from rice-producing countries with opportunities to study and to conduct research under the guidance of senior scientists. The trainees obtain a wide range of both practical and theoretical experience. In some cases, they also are enrolled as graduate students at the College of Agriculture, University of the Philippines. They undertake thesis problems at the Institute under the supervision of their Institute advisers, who are members of the Affiliate Graduate Faculty, College of Agriculture, University of the Philippines.

9. Duration (Continued)

Normally, the duration of individual research programs lasts from 6 months to one year. Participants however, who are enrolled for the masters degree program have to stay for at least two years. Non-academic participants can be accepted any time depending on space availability. Academic participants must arrive in time for classes at the University of the Philippines. (First semester starts about June 15 and the second semester about November 5).

Participants who train for programs of less than 6 months are accepted by the Institute on a case by case basis depending on the availability of space.

THIRD COUNTRY TRAINING RESOURCE SHEET

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Agriculture 180

5. TYPE AND DESCRIPTION OF TRAINING
Type: Program
Description: Southeast Asian Fisheries Development Centers. The Centers are designed to increase the production of food from the sea and to increase the supply of animal protein through improved fisheries, thus improving the nutritional standards of Southeast Asia. This will require:
1. Training government and industrial personnel in planning and directing deep-sea fishing.
2. Improving fisherman skills to operate larger vessels and to conduct deeper fishing operations (continued)

6. INSTITUTION OR TRAINING RESOURCE
Southeast Asia Fisheries Development Center
Bangkok (Training Center)
Singapore (Research Center)

7. LANGUAGE OF INSTRUCTION
English

8. PREREQUISITES FOR ENTRANCE
Fishermen, staff officers for vessels, technical personnel of governments of member countries.

9. DURATION:
Begins: 
Ends:

10. HIGHEST CREDENTIAL OFFERED

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
AID contributes U.S. source items of support such as U.S. laboratory equipment, books and fishing gear. $100,000 per year is estimated for the initial 3-year period starting in FY 1969.

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition:
   b. Other training fees:
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   d. Other:

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

14. OTHER
5. **Type and Description of Training.** (Continued)

3. Improving technology in storage and processing in order to expand distribution.

In order to meet these objectives, two Centers are in operation; one in Bangkok and the other in Singapore, beginning during the second half of FY 1969.

**Bangkok:** Training Department. Training will be in the operation of large motorized vessels and in the use of advanced technological equipment to permit the industry to expand ocean-going and deep-sea fishing and thus to get away from limited shore and shallow-water operations.

**Singapore:** Training in Research.

**Japan:** Provides research vessels and operating staffs. Japan has been the prime mover for the establishment of these Centers.

**Progress to Date:** In July 1967 Japan sponsored an international working group meeting in Singapore to draft plans for fisheries development programs, which were accepted at the meeting, and an international agreement setting up the two Centers was signed by Thailand, Singapore, the Philippines and Japan. Indonesia and Malaysia are expected to sign both departments started operations in early 1970.

5. **Type and Description of Training**: (Continued)

4. Observation Missions primarily to Japanese plants.

5. Agricultural surveys and symposia relating to agriculture business.

6. Multi-Country Seminars/Workshops in the productivity aspects of various fields, including top/middle concepts/practices; tourism and trade promotion; quality control and standards development; modern marketing and distribution; industrialization with regard to agricultural and forest products; and education for business leadership.

The several programs include medium-term training (up to 4-6 months) and short-term seminar/workshop sessions averaging 2-3 weeks.

The Asian Productivity Organization was established in May 1961 to stimulate increased industrial activity and production efficiency among the countries of East and South Asia. It is a central organization through which 14-member countries can pool and disseminate industrial productivity information and managerial and technical skills. Present membership includes the Governments of Ceylon, the Republic of China, Hong Kong, India, Indonesia, Iran, Japan, the Republic of Korea, Nepal, Pakistan, the Philippines, Singapore, Thailand and the Republic of Vietnam.

Regional Labor Training Resources

Organization: Asian-American Free Labor Institute

Offices: 1775 K Street, N.W., Washington, D.C. 20006

Description:

The Asian-American Free Labor Institute (AAFLI) was established in 1968 by the AFL-CIO to encourage and assist in developing free trade union organizations in Asia. Under policy guidance and direction from AID, AAFLI conducts programs in trade union leadership, skills training, cooperatives, social welfare and other subjects designed to strengthen labor organizations. Besides in-country programs in Vietnam and the Philippines, AAFLI, in cooperation with various International Trade Secretariats (ITS), has organized seminars on trade union building and collective bargaining procedures in India, Indonesia, Turkey, Korea, Malaysia and Singapore. Its Manila regional office, working in cooperation with labor organizations in the area, hopes to expand AAFLI's activities through new country programs, short-term workshops and social impact projects. AAFLI also trains Asian participants in the United States and third countries through observation and study programs.

Training officers should contact AID/W, AAFLI/Washington or AAFLI's Manila regional office (c/o USAID Manila).

5. Type and Description of Training. (Continued)

5. Develop special physiological and chemical studies related to better and less expensive methods of treatment
6. Extend studies of the role of food and water in transmission of cholera

Research is carried on at the Laboratory by reps. of the U.S., the United Kingdom and the SEATO member countries. Operations are under the scientific direction of the U.S. National Institute of Health and the general direction of the International Directing Council of the Cholera Research Laboratory.

Progress to Date: A study of patients in South Asia began December 1962 when a basic laboratory and 20-bed hospital were completed. This study resulted in the development of new and simplified methods for the rapid diagnosis and treatment of cholera. New high potency cholera vaccines are now being tested. There now exists a strong possibility for the development of a safe vaccine which would provide long-term protection against cholera infection and lead to eventual eradication of the disease. In FY 1968 research was started to develop specialized studies of cholera in children.

The SEATO countries are: Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom, the United States, and Vietnam as observer.

   East Asia

3. COUNTRY
   Republic of the Philippines

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
   Health and Sanitation 511

5. TYPE AND DESCRIPTION OF TRAINING
   Type: Course - consists of lectures & field observation
   Description: General Course in Malaria Eradication for Professional Personnel: Program consists of lectures, discussions, field and practical training and demonstration, followed by two weeks field observation in India (optional). The curriculum follows the WHO recommendations, i.e., having an adequate coverage of basic malariology (epidemiological, clinical medicine, parasitology and entomology) and related subjects as administration and management, health education and biostatistics. The interplay of all these disciplines is demonstrated in the comprehensive course on malaria eradication that follows and which includes the planning as well.

6. INSTITUTION OR TRAINING RESOURCE
   Malaria Eradication Training Center
   Manila

7. LANGUAGE OF INSTRUCTION
   English (cont.)

8. PREREQUISITES FOR ENTRANCE
   Candidates should be university graduates who have qualified in medicine, science or engineering. In certain circumstances, science graduates (biology, entomology, zoology, biostatistics) maybe accepted provided (cont')

9. DURATION:
   12 weeks
   Begins: January
   Ends: April

10. HIGHEST CREDENTIAL OFFERED
    Certificate of completion issued by the Center

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
    Resource established with cooperation of A.I.D., WHO, Philippine Government. Currently receives financial support provided by the NCDC, Atlanta, Georgia.

12. ESTIMATED EXPENSE (Excluding International Travel)
    a. Tuition:
    b. Other training fees:
    c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
    d. Other:
    Estimated cost per participant $1,000.00

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
    Hotel or other housing in Manila to be used since the Center does not have a dormitory.

14. OTHER
    Pre-entry visa possession necessary; visas not issued planeside.
    Other normal quarantine, immigration/customs practices and requirements observed. Institution is an International Center, staffed by WHO and USPHS/AID professional and technical personnel. The Center has facilities for simultaneous translation for use by groups accompanied by interpreter.

Participants: Maximum: 35, Minimum: 25.
5. Type and Description of Training (Continued)

as the operational and assessment practices in each phase of the malaria eradication program. After this institutional part of the course, participants will spend two weeks in the field in one or more selected units of the Philippine Malaria Eradication Program. This field training includes the various operations in the successive phases of a Malaria Eradication Program, as geographical reconnaissance, spraying operations, malarialometric surveys, surveillance and procedures and entomological activities. The administrative and organizational aspects of the program on each level are also discussed and explained.

Field visit to the malaria eradication program in India or Thailand is optional.

8. Prerequisites for Entrance (Continued)

they have had some exposure in malariology. In general, participants of this course are holding overall directive or supervisory responsibilities at Regional or zonal levels or are likely to be assigned to such positions upon completion of their training. Depending upon their educational background and assignment in the malaria eradication service, health educators and administrators may be considered for senior professional training.
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE
January 1971

2. REGION
East Asia

3. COUNTRY
Republic of The Philippines

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Health and Sanitation 511

5. TYPE AND DESCRIPTION OF TRAINING
Type: Program
Description: General Course in Malaria Eradication for Instructors: Combination of lectures, discussions and field observations. This course is intended for technical personnel working as instructors. Eligible for admission are technical (sub-professional) teaching staff at national malaria eradication training centers, as senior technicians for either spraying operations or epidemiological operations respectively, with emphasis on practical and field operations.

6. INSTITUTION OR TRAINING RESOURCE
Malaria Eradication Training Center
Manila

7. LANGUAGE OF INSTRUCTION
English

8. PREREQUISITES FOR ENTRANCE
Nomination and acceptance.
Government employee, or working with WHO or USPHS/AID in malaria work.
Appropriate educational/professional background required by respective courses.

9. DURATION:
12 weeks
Begin: July
End: October

10. HIGHEST CREDENTIAL OFFERED
Certificate of Completion issued by Center

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
Resource established with cooperation of A.I.D., WHO, Philippine Government.
Currently financial support provided by A.I.D. under Project No. 498-11-510-018.

12. ESTIMATED EXPENSE (Excluding International Travel)
a. Tuition:
b. Other training fees:
c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility: Participants on continuous travel status due to varying locations.
d. Other:
Subject to change. Books/training materials costs vary according to course ($5.00 to $25.00)

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
Hotel or other housing in Manila to be used since the Center does not have a dormitory.

14. OTHER
Pre-entry visa possession necessary; visas not issued planeside. Other normal immigrant/customs practices and requirements observed. Institution is an International Center, staffed by WHO and USPHS/AID professional and technical personnel. Instruction offered unquestionably of high level.

Participants: Maximum 35, minimum 25.

THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE: January 1971
2. REGION: East Asia
3. COUNTRY: Republic of the Philippines

4. GENERAL FIELD AND CODE (See M.O. 1095.2): Health and Sanitation (Family Planning) 580

5. TYPE AND DESCRIPTION OF TRAINING
Type: Course
Description: Regular Family planning for Physicians, Nurses and Midwives

This course plans to develop awareness, understanding and skills in the current trends, practices, methods and techniques in the care of mothers and children in the light of past and future health problems, needs and developments. The course is divided into three phases and is presented in a variety of teaching methods:

1. Learning Laboratory (live-in)

6. INSTITUTION OR TRAINING RESOURCE: National Training Center for Maternal Health Service in the Philippines
Institute of Maternal and Child Health, Q.C. R. P.

7. LANGUAGE OF INSTRUCTION: English

8. PREREQUISITES FOR ENTRANCE: Physicians, nurses and midwives who are already in the service and private practitioners who intend to set up their own clinics or who will staff the Family Planning clinics of Puericulture Centers will be given preference for admission by the Institute.

9. DURATION: Course usually offered from 4 to 5 times a year depending on 4 weeks

10. HIGHEST CREDENTIAL OFFERED: Certificate

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE: Financial support provided by AID.

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition:
   b. Other training fees:
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   d. Other:

   Cost per participant $400.00

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES: Hotel or other housing in Manila or Quezon City to be used since the Center has no dormitory.

14. OTHER: Pre-entry visa possession necessary; visas not issued planeside. Other normal immigration, quarantine and customs requirements observed. The Institute was established in 1967 and has trained more than 2,000 public health personnel from the private sector and the Philippine Government. It is headed by an internationally prominent pediatrician and obstetrician, Dr. Fe del Mundo.

Participants: Maximum 30 participants. Institute can accept 10 foreign participants per class.
5. Type and Description of Training (Continued)

This is an unstructured sensitivity session wherein participants will live together for the duration of the session.

The participant will be grouped. Each group will be composed of not more than 10 participants. A trainer and a psychologist with experiences in this kind of training strategy will be permanently assigned to a group.

2. Theoretical Phase:

Specific subjects on trends in MCH and Family Planning will be presented through the lecture method and group discussion and the use of a variety of teaching aids such as films (strips and slides), models, charts, graphs, posters, and the like will be utilized.

3. Practical Phase (Clinical and field experience)

a. Field trips to health centers and agencies to portend trends in health care wherein participants observe and evaluate facilities, resources, activities and services as a basis for determining problems and needs will be included.

b. Guided clinical and field experience

Actual participation and guided activities particularly on the Family planning clinics will be done. Guidelines will be provided to help develop competencies among the different professional groups.

Supervision and guidance will be provided by the training personnel, clinic staff and the field representatives, whenever they are available.
Health and Sanitation (Family Planning)  580

5. TYPE AND DESCRIPTION OF TRAINING

Type: Course

Description: Special Course on Family Planning for Public Health Nurses

This program is so tailored to suit any local health department who wishes to conduct a refresher course for their public health nurses on family planning. Emphasis of the course is placed on the roles and functions of the Public Health Nurse in family planning.

The course is divided into two phases and will be presented in a variety of teaching methods:

a. Tuition:

b. Other training fees:

c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:

d. Other:

Cost per participant $400.00

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

Hotel or other housing in Manila or Quezon City to be used since the Center has no dormitory.

14. OTHER

Pre-entry visa possession necessary; visas not issued planeside. Other normal immigration, quarantine and customs requirements observed. The Institute was established in 1967 and has trained more than 2,000 public health personnel from the private sector and the Philippine Government. It is headed by an internationally prominent pediatrician and obstetrician, Dr. Fe del Mundo. Institute has a capacity of 50 participants per course, and can accept a maximum of 10 foreign participants.
5. Type and Description of Training (Continued)

1. Theoretical Phase: Emphasis will be placed on subjects that will develop communication, teaching and motivational skills and reinforce knowledge and other skills, so the nurse will be able to work effectively and efficiently in the clinic, home and community.

2. Practical Phase (Clinical and Field experiences)

   a) Guided clinic experience: Observation and participation in clinic activities of the nurse assigned in the training areas.

   b) Field experience: Practice sessions on how to organize, prepare and lecture to community groups and participation in the dissemination of information, community health surveys, motivational activities and follow-up home visits. Supervision and guidance will be provided by the training personnel, nurse-supervisors and clinic staff.

THIRD COUNTRY TRAINING RESOURCE (Continuation Sheet)  

5. Type and Description of Training (Continued)

communication. 1. group meeting, 2. home visiting, 3. mass media, 4. direct mailings, 5. referral system. (b) Acceptability of different contraceptive methods. 1. oral pills, 2. IUD, 3. foam, 4. jelly, 5. vasectomy, 6. condom.
(c) Relationship between MCH services and family planning. 1. base-line survey results, 2. present efforts at improving services, 3. long-range improvement in the family planning program. (2) Observation of urban health centers. (a) Meeting center staff, (b) Observing facilities, organization, etc., (c) Meeting clients.

C. Rural Family Planning Project. (1) Review of the project. (a) Means of communication. 1. group meetings, 2. home visiting, 3. mass media, 4. direct mailings, 5. referral system. (b) Use of para-medical workers in family planning. 1. insertion of IUDs by nurses, 2. utilization of local women for home visiting. (c) Mothers' classes. 1. pilot studies, 2. present Kyonggi Province evaluation of effectiveness of mothers' classes. (d) Characteristics of rural program. 1. acceptors characteristics, 2. Acceptability of contraceptives, 3. relationship of family planning to local health services, 4. training and supervision of workers.

D. Male Contraception. (1) Vasectomy. (a) Observation and review of vasectomy operation. (b) Comparison between clinical research and national program. 1. effectiveness, 2. age, 3. education, 4. number of living children. (c) Physiology of recanalization. (d) Meeting with clients and discussing their personal experience with vasectomy. (2) Condom. (a) Effectiveness of condom. (b) Acceptability of condom. (c) Comparison of clinical research.

E. Female Contraception. (1) IUD insertion. (a) Comparison between IUD research and national program. 1. side effects, 2. duration of wearing, 3. drop-out rate in different age groups. (b) Observation of inserting IUDs in a family planning clinic. (2) Oral pill. (a) Comparison between oral pill research and national program. (b) Meeting with clients and discussion of their experience with the pill, (c) Observation of oral pill distribution, (d) Observation of screening examination for oral pill. (3) Other Methods.

F. Induced Abortion. (1) Review of urban and rural induced abortion study. (a) age, (b) education, (c) religion, (d) economic status. (2) Relationship between induced abortion and maternal and child health. (3) Social and legal problems with induced abortion in Korea. (4) Contribution of induced abortion to family planning and population control.

G. Field Trip. (1) Visiting local (provincial) government offices. (2) Meeting with local family planning field workers. (3) Observing local family planning activities. (a) Health Center, (b) Clinic, (c) Health Sub-Center, (d) Mothers' Class.
EDUCATION IN EAST ASIA

Throughout the lesser developed parts of the world emphasis on educational growth remains an essential, contributing force for economic advancement. Indicators of the linkage between education and economic development underline the relationship and point out the need for continued efforts. In the most literate countries of the world the average annual income of the working man ranges up to 15 times that of his counterpart in the least literate countries. Ninety percent of the world's education expenditures are within developed nations, those with the highest literacy rates, yet only one-third of the world's population. Unless the 10 percent remaining for two-thirds of the world's population can be increased to provide greater educational opportunities, the average man in the less developed countries will still face a life of poverty and illiteracy.

In non-communist East Asia, Japan has led the countries of the region in the push for industrialization and at the same time in education of her citizens. Japan's literacy rate is 98 percent; in the rest of the region the literacy rate is 57 percent. Students in East Asia comprise only 15 percent of the population; in the United States, 23 percent. The GNP of the United States with a smaller population than that of the lesser developed countries of East Asia combined, was $628 billion and the GNP of Japan was $69 billion while that of developing East Asia countries was $30 billion in 1965. Education is not the only factor contributing to the lag in economic development in East Asia but the quality and quantity of educational opportunities offered reflects a country's potential in overcoming the gap between the more advanced and the less developed countries.

In countries where the push in education began several decades ago, or even as recently as in the last twenty years, the pay off in economic growth is being realized today. The current educational situation in East Asia has a direct bearing on the future economic growth of the area. In addition to technical skills and know-how, development requires increased sophistication and receptivity of new ideas among the citizens of a country.
Except in Japan much of the present schooling available in East Asia needs further development. Standards for teachers, physical facilities and instructional materials all need improvement. Of those children who enter the educational systems in East Asia not more than 40 percent will reach the fifth grade; many of these will enter first grade several times. Among other factors, lack of space in upper grades and economic conditions contribute to such a high drop-out rate. For all of these countries total primary school enrollments reach just under 33 million pupils. Secondary level enrollment is about 5 million.

The Agency for International Development through its East Asia Bureau maintains education programs in four countries of the region at the present time (Korea, Laos, Thailand and the Philippines) whose combined population is 95 million or about one-third the 275 million living in developing East Asian countries. A separate AID bureau for Vietnam assists education in that country. Primary school enrollment in these AID-assisted countries including Vietnam is less than half the total enrollment in primary schools throughout the developing countries of the region. The ratio of primary school teachers in AID-assisted countries to the number in these other countries is even less.

AID's educational programs in East Asia are limited in scope and impact to only a portion of the region's educational systems and their needs. Specific projects are designed to meet the requirements of each national situation and are undertaken in cooperation with the governments of these countries. In addition to country programs in East Asia, AID maintains a regional program assisting the Southeast Asian Ministers of Education Council institute centers of excellence in higher education. The result will be greater opportunities for advanced studies available to a number of qualified Asian students.

The following resume of the program briefly describes its establishment and activities.
In addition to country programs in East Asia, A.I.D. is providing assistance to the Southeast Asian Ministers of Education Organization in its sponsorship of regional education projects and activities as described below.

Significant activity in cooperative regional education programs is taking place under sponsorship and initiative of the Southeast Asian Ministers of Education Organization (SEAMEO), the Ministerial Council (SEAMEC), and its Secretariat (SEAMES). SEAMBO members include Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Vietnam. The program focuses on those educational needs of the participating countries which can best be met by cooperative regional action. The six Centers which are currently being developed to serve the region are listed below. At the present time training and research programs of the Centers, geared specifically to the background and needs of Southeast Asia, are being filled by direct arrangements between cooperating country representatives and the Centers.

1. **Regional English Language Center (RELC), Singapore.**

   Training programs, especially tailored to meet the needs of the member countries, are organized at this Center for key language educators in the region, and research and development activities are oriented to the preparation of improved instructional materials and introduction of new methods of teaching English. The program complements related national activities in the member countries.

2. **Regional Center for Education in Science and Mathematics (RECSAM), Penang, Malaysia.**

   Similar in concept to RELC, training programs are geared to the needs of the region and are oriented primarily to introducing key science and mathematics educators to the new instructional approaches in these curricular areas at the primary and secondary levels. Research and development activities are concerned with the preparation of instructional kits and other materials suited to the Southeast Asian setting.

3. **Regional Center for Graduate Study and Research in Agriculture (SEARCA), Los Banos, Philippines.**

   The Center offers graduate training and carries out agricultural research in the various agricultural specialties needed within the region.
4. **SEAMEO Regional Project for Tropical Medicine and Public Health, (TROPMED).**

This program is a cooperative effort of existing medical institutions in the cooperating countries working toward improvement of the standard of health and elimination or control of endemic diseases of the region. Coordination is carried out through a Central Coordinating Board, with offices in Bangkok, on which each country is represented. Each of the Centers at the cooperating national institutions has an assigned regional specialization in carrying out training and research activities.

5. **Regional Center for Tropical Biology (BIOTROP), Bogor, Indonesia.**

The Center will organize and implement research projects and training programs in tropical forestry, pests, marine biology, and inland waterways, geared to the opportunities and problems of the region.

6. **Regional Center for Educational Innovation and Technology (INNOTECH), Saigon, Vietnam (temporarily located in Singapore).**

The Center will offer a unique kind of training to key educational planners in the region, exposing them to the systems approach to problem-solving, providing familiarization with educational technology now in use around the world, and engaging them in problem-solving activities which will produce prototype solutions to be tried out in the member countries.

Description: Masters Degree Program in Business Management

The objective of this program is to provide a first-rate graduate-level business education for Filipinos and other Southeast Asian students to help prepare them for positions of administrative leadership in business, government and education, and thereby contribute to economic and social development in Asia. The principal method of instruction is the "case method", as developed by the Harvard Business School. In addition to the use of the case studies, role playing, simulation, management games, lectures and other methods of instruction are used. (Continued)

14. OTHER
    Pre-entry visa possession necessary; visas not issued planeside. Other normal immigration, quarantine and customs practices and requirements observed. Most of faculty have been trained in U.S. and instruction is comparable to U.S. Credits earned in all colleges of the University of the Philippines generally credited abroad.

---

4. GENERAL FIELD AND CODE (See M.O. 1095.2)

5. TYPE AND DESCRIPTION OF TRAINING
   Type: Academic
   Description: Agricultural Education

   Four-year general course in agriculture leading to the degree of Bachelor of Science in Agriculture. Students may major in any of the following departments: botany, chemistry, education (including extension option), engineering, economics, agronomy (including plant breeding), animal husbandry (including poultry husbandry), entomology (including zoology), information and communications, soils, plant pathology.

6. INSTITUTION OR TRAINING RESOURCE
   College of Agriculture
   University of the Philippines
   College, Laguna

7. LANGUAGE OF INSTRUCTION
   English

8. PREREQUISITES FOR ENTRANCE
   High school diploma required for entrance to undergraduate programs. For graduate program: bachelors degree or equivalent. Candidates for the graduate program are required to submit their application to an admissions committee before final acceptance is made by the college.

9. DURATION:
   Academic school year starts mid-June for first semester and
   Begins: first week of November for the second semester.

10. HIGHEST CREDENTIAL OFFERED
    Diploma

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
    Development of professional staff supported by AID

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition:
   b. Other training fees:
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   d. Other:

   Cost per participant: $2,600 per year. (For both graduate and undergraduate programs)

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
    On campus student dormitory available. Participants may choose to stay off campus in private housing/dormitory.

14. OTHER
    Pre-entry visa possession necessary; visas not issued planeside. Other normal immigration, quarantine and customs practices and requirements observed. Most of faculty have been trained in U.S. and instruction is comparable to U.S. Credits earned in all colleges of the University of the Philippines generally credited abroad.
5. Type and Description of Training (Continued)

Four year course in home technology leading to the degree of Bachelor of Science in Home Technology.

Five year course in agricultural engineering leading to the degree of Bachelor of Science in Agricultural Engineering.

Five year course in agricultural chemistry leading to the degree of Bachelor of Science in Agricultural Chemistry.

Master of Science Degree with major in any of the following fields: (2 years)

1. Agricultural Botany (including Genetics)
2. Agricultural Chemistry
3. Agricultural Communications
4. Agricultural Economics
5. Agricultural Education (including Extension)
6. Agricultural Engineering
7. Agronomy (including Plant Breeding and Horticulture)
8. Animal Husbandry (including Poultry)
9. Entomology
10. Experimental Statistics
11. Food Science
12. Plant Pathology (including Microbiology)
13. Soils

Doctorate (Ph.D.) with major in any of the following fields (3 years):

1. Agricultural Botany
2. Agricultural Education (including Extension)
3. Agronomy (including Plant Breeding)
4. Animal Husbandry (including Poultry)
5. Entomology
6. Plant Pathology
7. Soils
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE
January 1971

2. REGION
East Asia

3. COUNTRY
Republic of the Philippines

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Education 660

5. TYPE AND DESCRIPTION OF TRAINING
Type: Academic

Description:
Undergraduate and Graduate Degrees in Arts and Sciences, Architecture and Fine Arts; Business Administration, Dentistry, Education, Engineering, Fisheries, Home Economics, Hygiene, Law, Medicine, Nursing, Pharmacy, Veterinary Medicine, Library Science, Music, Public Administration, Statistics, Agriculture and Forestry.
Doctorate program in the following fields: Education, Philosophy, Public Administration, and Agriculture.(see list for the College of Agriculture, U.P.)

6. INSTITUTION OR TRAINING RESOURCE
University of the Philippines
Diliman, Quezon City

7. LANGUAGE OF INSTRUCTION
English

8. PREREQUISITES FOR ENTRANCE
High school diploma for undergraduate courses and Bachelors degree for graduate curriculum. Applications for candidates to the graduate program are screened by an Admissions Committee.

9. DURATION:
Doctorate program
Begins: [ ]
Ends: [ ]

4-5 years for undergraduate; 2 years for graduate work; 3 years for Doctorate program.

10. HIGHEST CREDENTIAL OFFERED
Diploma

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
AID assisted in the development of the University's professional staff under the Mission participant training program.

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition: $60.00 to $70.00 per semester
   b. Other training fees:
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   d. Other: $52.00 (Estimate for books and training materials, per semester)

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
Dormitory and boarding house type of accommodations available.

14. OTHER
Pre-entry visa possession necessary; visas not issued planeside.
Other normal immigration/quarantine/customs practices and requirements observed.
Instruction comparable to U.S. Credits earned in all colleges of the University of the Philippines generally credited abroad.

Academic school year starts about June 15 for the first semester and November 5 for the second semester.

   Education 660

5. TYPE AND DESCRIPTION OF TRAINING
   **Type:** Academic
   **Description:** Graduate Study and Research in Engineering. Advanced engineering of the highest standard is offered through (1) academic program leading to the degree of Master of Engineering and (2) research by students, faculty and research staff members. This is a recognized institution offering graduate program of engineering in:
   1. Hydraulics
   2. Transportation
   3. Structures
   4. Soils
   5. Public Health

6. INSTITUTION OR TRAINING RESOURCE
   - Asian Institute of Technology
   - Chulalongkorn University
   - Bangkok

7. LANGUAGE OF INSTRUCTION
   - English

8. PREREQUISITES FOR ENTRANCE
   - B.S. in engineering

9. DURATION:
   - Begins: August
   - Ends: July

10. HIGHEST CREDENTIAL OFFERED
    - M.A. degree, Ph.d Eng

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
    - A.I.D. plans to provide up to 50% of development and operational costs of the Institute through FY 74.

12. ESTIMATED EXPENSE (Excluding International Travel)
   - a. Tuition:
   - b. Other training fees:
   - c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   - d. Other: Academic Rate
     - ($8,400 is current scholarship fee covering all expenses for one year exclusive of international travel.)

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
    - Dormitory provided

14. OTHER
5. Type and Description of Training: (Continued)

It also offers:

a. research facilities for students and faculty
b. research sponsored by industry and government
c. a post graduate program for practicing engineers

The Asian Institute of Technology was officially launched in January 1968 as an independent, non-political international institution chartered in Thailand and primarily serving the people of Asia. This event culminated the transition stage from the Southeast Asia Treaty Organization (SEATO) Graduate School of Engineering which had been established in 1959 to meet the growing need for advanced engineering education in Southeast Asia. Its purpose is to become a specialized regional institution for graduate study and research in engineering responsive to the needs of Southeast Asia, including the requirements for the development of the Lower Mekong River Basin.

Qualified students are admitted from any nation; both staff and student bodies are international with beneficial results. The school has an enrollment of 150 students from participating countries; to date 175 M.A. degrees have been awarded.

- August 17, 1970: Registration for first semester
- 3rd wk April 70: Second semester course examinations end
- 1st wk May 70: Second semester ends
- 3rd wk May 70: Summer session begins
- July 1970: Summer session ends

</tr>
</tbody>
</table>

#### PREREQUISITES FOR ENTRANCE

The training program is intended for selected provincial, city and municipal officials and field personnel of national agencies. Participants will be drawn from those who are holding executive and administrative positions.

#### DURATION:

- Begins: March 16
- Ends: May 22

#### HIGHEST CREDENTIAL OFFERED

Certificate

#### U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

AID provides financial support for setting up the course.

#### ESTIMATED EXPENSE (Excluding International Travel)

- Tuition:
- Other training fees:
- Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
- Other:

Cost per participant - $900.00

#### AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

This is a residence course which is usually held at the YMCA or at the Taal Vista Lodge in Tagaytay.

#### OTHER

Pre-entry visa possession necessary; visas not issued plane-side. Other normal immigration, quarantine and customs requirements observed. Center is staffed by highly qualified personnel mostly U.S. trained.

Participants: Maximum- 30 participants. Center can accept a maximum of 10 foreign participants.
5. Type and Description of Training (Continued)
and economic environment of local government;
   (3) Local government finance - sources of local government revenues, fiscal management, fiscal reforms;
   (4) Urban planning - comprehensive approach to development, planning and program implementation, funding local development projects.
   (5) Issues and Problems - administration of protective services, metropolitan and regional governments, integration of areas for special purpose development;
   (6) Local Government Research - practical field research on selected case studies on problems of local government; the industrial, commercial and agricultural development of a specific region.

The training program will use a variety of methods and techniques but the discussion group and plenary session will be used extensively. This will be supplemented by selected case studies on problems of local government.

8. Prerequisites for Entrance (Continued)
as in the following fields:
   (a) Chiefs/Assistant Chiefs of Office - assessment, agriculture, auditing, community development, education, engineering, health, planning, treasury, etc.
   (b) Administrative Officers/Executive Assistants.
   (c) Secretaries of provincial boards, city councils and municipal boards.

Participants should be preferably college graduates. There is no age requirement but it is desirable that participants be within the age bracket of 28-55 years old. A screening committee in the Center will review the qualifications of prospective participants based on their bio-data and interviews.

**13. Availability of Housing or Dormitory Facilities**
IIRR has a 125 acre campus at Silang, Cavite, Philippines. Meals are at IIRR's canteen. During field internship, arrangements are made in villages.

**14. Other**
Pre-entry visa. Visas are not issued planeside. Other normal immigration customs, practices and requirements.

Participants: Maximum 30; Minimum 15
1/ The IIRR helped organize indigenous rural reconstruction movements, all under private auspices, in: Republic of the Philippines, Thailand, Guatemala, Colombia.

The IIRR trained teams from these movements and also several contingents of persons from South Vietnam.

The Philippine Rural Reconstruction movement, begun in 1952, is used as the social laboratory and training field for the IIRR since the basic economic and social problems of the Philippines are similar to those in other developing countries.

The Thai pilot project, established in 1968 in the central Thailand province of Chainat, is the only private agency of its kind in Thailand.

The Colombian and Guatemala movements began in 1965 and are fulfilling roles as catalytic agents in those countries.

2/ The training attempts to produce better technicians reoriented to new values and outlooks:
   a. **International Extension.** To stimulate and assist influential civic minded leaders to establish private, national, rural reconstruction movements to help their rural people.
   b. **Leadership Training.** To train carefully chosen rural development specialists and young associates from the developing countries in the techniques of rural reconstruction.
   c. **Operational Research.** To continue to improve and develop new techniques and practices to meet the needs of the peasant people.
   d. **Conferences and Publications.** To hold conferences and seminars with leaders and field workers from affiliated rural reconstruction movements and from other national and international agencies in rural development; to publish monographs and reports of findings.

3/ Lectures cover:
   a. **Economic Development:** crop and livestock production, cooperatives development, farm management and marketing, land reform, planning and implementation of economic programs, village industries.
   b. **Rural Health:** health protection and medical relief; health education, environmental sanitation; family planning; training of auxiliary health workers.
   c. **Education.** Literacy promotion, literature preparation, mass communication media, cultural development.
   d. **Citizenship.** Village government structure, village associations for rural reconstruction, village leadership training.
Third Country Training Resource (Continuation Sheet)  Page 3 of 3

e. Administration and supervision of field operation.

f. Operational research and evaluation.

g. Training of village workers.

4. Village internship. Internship includes one month stay in the village where successful rural reconstruction projects are in active operation by the village people. Participants will not only observe but participate in these projects under the supervision of the Institute's experienced staff.

5. Addresses for further data;

IIRR Manila Office                            U. S. Resident Representative

THIRD COUNTRY TRAINING RESOURCES IN NEAR EAST - SOUTH ASIA

FEBRUARY 1971

U.S. DEPARTMENT OF STATE
Agency For International Development
Office of International Training
Washington, D.C. 20523
Introduction
THIRD COUNTRY TRAINING RESOURCES IN NESA

INTRODUCTION AND EXPLANATORY NOTES

1. Purpose

The purpose of this catalogue is to serve as a resource of standardized, up-to-date data on both academic and non-academic training resources in the Near East and South Asia. It is restricted to those resources considered to be of the greatest potential utility to A.I.D. in its training programs. These training programs are designed to assist in the economic and social development of the NESA countries. An essential element in encouraging the increased use of NESA training resources is the knowledge the USAIDs have about training opportunities.

This catalogue is one of a series of four official AID/W publications planned to cover training opportunities in the various areas of the world where A.I.D. sponsored training of foreign participants takes place.

It is hoped that this catalogue will be of value to USAIDs and the governments of the Region in the further utilization of regional resources and in the interchange of participants. Any questions, comments or suggestions for the improvement of this publication will be most welcome and should be sent to: Third Country Training Branch, Office of International Training, Agency for International Development, Washington, D.C. 20523.

2. Source of Information

The information contained in this catalogue is derived largely from USAID responses to the AIDA request for descriptions of selected resources particularly suitable for third country training in fields that fit into A.I.D. program concepts. This is not an inventory of facilities. No attempt has been made to be all-inclusive. It is designed for the use of American Advisors, Technicians and Development Training Officers responsible for participant programs and their implementation. It is also intended for the use of Development Training Specialists in the Office of International Training in AID/W as background information for combination U.S. and third country training.

3. Arrangements and Coverage of Contents

A. General. This catalogue is intended as a working tool for Development Training Officers and Technical Advisors in determining where to train, when to train and to provide available information on resources, processing, per diem, fees, housing, language of training and some general background material on individual country programs. We have included a description of any U.S. involvement in the facility since Technical Advisors would sometimes be familiar with the kind of courses given and the emphasis placed by the University contractor. The Predeparture Information is provided to smooth the way for the participants, as for example, insuring that he will
have readily available the points of contact and will not arrive in a strange
country to find all offices closed because of an official holiday. It is
hoped that this type of practical knowledge will facilitate the selection
and processing of participants for third country programs.

The A.I.D. Manual Orders for arranging and carrying out third
country training are:

M.O. 1386.1 - Third Country Training Policy
M.O. 1386.2 - Third Country Training Procedures and Schedules
of Maintenance Allowances
M.O. 1386.3 - Third Country Participants: Medical Examination
M.O. 1386.4 - Third Country Participants: Health and Accident
Protection Benefits

B. Prior to Documentation. Before preparing the necessary documentation,
a check should be made with the host USAID to ensure that the resource infor-
mation is correct if the resource has not recently or previously been used.
For various reasons there may have been changes in expenses or requirements
from those shown in the catalogue.

C. Section I. Resources by Code and Field of Activity. This section
contains a listing of technical programs available in the different countries,
arranged by code within each major field of activity. Within each activity
code, the resources are arranged alphabetically by country, e.g. resources
from India are listed before those from Lebanon. The page on which the
complete data may be found is shown. The codes assigned to the fields of
activity of the resource sheets are based on the technical codes described
in Attachment A to M.O. 1095.2, Coding of Projects and Project Documents.
A reference copy of this M.O. prefaces Section V.

D. Section II. Resources by Country. This contains a listing of
training resources arranged by country and within each country by major
field of activity together with the page on which it can be found.

E. Section III. Predeparture Information. This consists of an alpha-
betical listing of the countries covered, some statistical information on
each, the USAID address and telephone number, special arrangements required
for entry into the country and a listing of its official holidays. This
information is intended to assist USAIDs in determining the most appropriate
date of arrival in the country and to provide the participant with the kind
of data usually requested prior to departure, e.g. participants want to
know the street address in almost all cases.

F. Section IV. Statistical Data. Tables of statistical data on A.I.D.-
sponsored training to give some idea of the size and scope of the program.
G. Section V. M.O. 1095.2. The codes assigned to the fields of activity under Item 4 of the Resource sheet are based on the technical codes described in Attachment A to M.O. 1095.2. A copy of the M.O. is included with this catalogue for reference purposes. In some cases it was difficult to fit facilities under specific codes of this M.O. since the codes were set up to cover existing A.I.D. projects. This is particularly evident in those facilities placed under the category of Education, under which are grouped certain universities with descriptions of courses which range over many fields of activity and which are not necessarily intended to prepare students for teaching. Also please note the use of the "90" code, i.e. "All Other...."

H. Section VI. Third Country Training Resource Sheets. Training opportunities available in the various countries are recorded on Third Country Training Resource Sheets. The Resource sheets have been arranged by field of activity according to the codes found in Attachment A of M.O. 1095.2. Within each field of activity the Resource sheets are arranged alphabetically by country.

The types of training are classified in three categories: a) academic—institutional leading to a degree; b) course—a fixed program with a definite start and stop date, usually repetitive; c) program—often ad hoc and tailor-made for specific individuals which frequently includes on-the-job training and might or might not include a course. Other blocks of the Resource sheet are self-explanatory. Incomplete blocks and data reflect lack of information submitted by the USAIDs or are otherwise not available.

All expenses shown as "dollars" mean U.S. dollars.

The remainder of the items are self-explanatory.

4. Keeping the Catalogue Up-to-Date

The catalogue is in loose-leaf form so that USAIDs can supplement, delete, amend and up-date information. In order to keep the catalogue current and up-to-date, AID/W depends on the active interest of Training Offices and Technical Divisions in the field to send in suggested additions, corrections, and deletions. Changes to facilities already included in the catalogue will be distributed periodically by AID/W on revised sheets which will carry the same page number as the original sheets they replace indicated as replacements by a later date under Item 1 of the Resource sheet. New facilities will be given the number of the sheet which precedes it in the catalogue with the letter "a" added. In the event that several sheets are added after a specific page of the original catalogue, letters "b", "c", etc. will be added to the number of the original page.

All proposed changes or additions should be forwarded on standard Third Country Training Resource Sheets such as those used in this book to Third Country Training Branch, Office of International Training, Agency for International Development, Washington, D.C. 20523. At the same time copies of the
new or revised sheets should be sent to the USAIDs most likely to use the facilities described for third country training purposes so that there is no delay in their receipt of the information. If the Mission does not have Resource sheets, the same information may be transmitted by airgram.

5. Future Distributions. Persons who wish to receive copies of revisions and additions to the Training Resource Catalogues should send this request to the:

Third Country Training Branch
Office of International Training
AID-State Department
Washington, D.C. 20523, USA

SECTION III
PREDEPARTURE INFORMATION

NEAR EAST AND SOUTH ASIAN COUNTRIES

GREECE
Capital: Athens
Area: 50,944 sq. mi.
Population (1968 estimate): 8,803,000
Political Status: Kingdom
Monetary unit: Drachma
Religions: Greek Orthodox (96%); Mohammedan (2%)
Languages: Greek, Turkish

USAID Address: c/o American Embassy
Athens, Greece

INDIA
Capital: New Delhi
Area: 1,261,810 sq. mi. (includes Jammu and Kashmir)
Population (1968 estimate): 523,893,000 (85% Hindu, 10% Moslem).
Political Status: Republic, Member of Commonwealth of Nations
Monetary unit: Rupee. Principal Languages: Hindi (official), English, et alii

USAID Address: USAID Participant Training Branch
Faridkot House, Lytton Road (near Sapru House)
New Delhi, India

USAID Telephone: New Delhi 45111

Special Requirements: At the time of application, a request for diplomatic clearance should be initiated with the nearest Embassy or High Commission, as per New Delhi's airgram of January 1962 on "Procedure for Third Country Training in India."

Holidays: Idu'l Fitr (January), January 26, February 26, March 15, Muharram (April), Good Friday, August 15, 16, September 30, October 1, 2, Diwali (October), November 5, December 21, 25.
PREDEPARTURE INFORMATION (Continued)

IRAN

Capital: Tehran
Area: 636,293 sq. mi.
Religions: Moslem (98%)
Population (1968 estimate): 26,985,000 (Iranian, Kurdish, Azerbaijani)
Political Status: Kingdom
Monetary unit: Rials.
Languages: Iranian (Persian, Kurdish), Azerbaijani

USAID Address: USAID/Iran
Training Office
Ave. Takht Jamshid, off Iranshahr
c/o American Embassy
Tehran, Iran

USAID Telephone: Tehran 60711

Special Requirements: Visa required, with selected exceptions for some neighboring countries. A resident's visa is required if participant remains over 90 days.

Holidays: Iranian New Year (about March 21-April 3), Shah's Birthday October 26, and Islamic religious holidays which change from year to year.

LEBANON

Capital: Beirut
Area: 4,015 sq mi.
Languages: Arabic, French
Religions: Christian (50%), Moslem (34%)

USAID Address: AID Regional Training Officer
c/o American Embassy
Ali Reza Building
Avenue de Paris (Corniche)
Beirut, Lebanon

USAID Telephone: Beirut 292800
Marine Guard Telephone: Beirut 240800
AUB Telephone: Dean of Student Affairs Beirut 292860

Special Requirements: Lebanese visa should be obtained from any Lebanese Embassy; if no Embassy, visa can be obtained at Beirut Airport.
PREDEPARTURE INFORMATION (Continued)

LEBANON (Continued)

Holidays: January 1, March 22, Good Friday, Easter Monday (both Eastern and Western rite celebrations of the last two holidays), May 1, 6, August 15, November 1, 22, December 25, and holidays of the Islamic religion which change from year to year.

PAKISTAN

Capital: Islamabad
Area: 365,527 sq. mi. (excludes Jammu and Kashmir)
Population (1968 estimate): 125,000,000 (86% Moslem, 13% Hindu)
Political Status: Republic, Member of Commonwealth of Nations
Principal Languages: Bengali (official), Urdu (official), English, Hindi, Punjabi.

Monetary unit: Pakistan rupee

USAID Address: U.S. Mission Building
18 Sixth Street
Ramna 5, Islamabad

USAID Telephone: Ramna 24071 and 24081

Special Requirements: Standard visa procedures; usual customs, immigration, and health requirements observed.

Holidays: February 27, 28, March 23, 29, May 29, August 14, 11, October 27, December 5, 11, 12, 25.

TURKEY

Capital: Ankara (former capital at Istanbul, which was originally called Constantinople, ancient capital of the Holy Eastern Roman Empire.)
Area: 301,380 sq. mi. (includes 9,121 sq. mi. in Europe).
Population (1968 estimate): 33,539,000 Religion: 99% Moslem
Languages: Turkish (90%); Kurdish (7%)
Monetary unit: Turkish Pound (T.L.)
Political Status: Republic

USAID Address: USAID/Turkey
Training Office
c/o American Embassy
16-18 Vall Doktor Resit Caddesi
in the Cankaya District of Ankara

USAID Telephone: Ankara 125030/114
PREDEPARTURE INFORMATION (Continued)

TURKEY (Continued)

Special Requirements: Visa required.

Holidays: January 1, 12-15* (Seker Bayrami), March 21-24* (Kurban Bayram), April 23, May 19, 27, August 30, October 29. (* changes yearly)

UNITED ARAB REPUBLIC
(formerly Egypt)

Capital: Cairo
Language: Arabic. Religions: Moslem (91%), Christian (8%).
Monetary unit: Egyptian Pound

USAID Address: 5 Sharia Al Zahra
(Al Walda formerly)
Garden City
Cairo

EAST ASIA

AFRICA

NEAR EAST, SOUTH ASIA
DEFINITIONS OF TECHNICAL CODES

Direct Military Support

010 - Airfield Construction
Covers construction or extension of military airfields, including runways and taxiways, barracks, warehouses, schools for military or civilian employees, dependents' housing, or other related facilities.

020 - Naval Base Construction
Covers construction or extension of naval bases, including harbor defense installations, firing ranges, barracks, warehouses, schools for military or civilian employees, dependents' housing, or other related facilities.

030 - Army Base Construction
Covers construction or extension of army bases, including defense installations, firing ranges, barracks, warehouses, schools for military or civilian employees, dependents' housing, or other related facilities.

040 - Radar and Communications Network Construction
Covers construction, installation, erection, or extension of military signal or communication facilities of any type, or related facilities.

050 - Other Defense Construction
Covers construction, expansion, rehabilitation, or maintenance of transportation, power, communication, or industrial facilities, such as railways, bridges, roads, harbors, and power plants used both by defense agencies and by the civilian economy. This functional field is limited to the minimum costs or portion of costs absolutely essential and properly attributable to defense requirements. Also includes any military base construction not otherwise classifiable under codes 010-040.

060 - Major Materiel Production
Covers production of major materiel items (either complete items or components) as follows: man-carrying aircraft, engines, and parts; artillery; combat vehicles; ammunition, guided missiles, and explosives; electronics and communications; weapons and small arms; engineering and military railroad equipment (except tracks or roadbed chargeable to code 050, if military) transport and other noncombat vehicles; and ships and harbor craft. This category may include procurement costs of equipment required to produce any of these major materiel items as well as costs of materials, labor, and any technical services or assistance required for production, and costs of construction of plants, factories, arsenals, shipyards, or other physical facilities for production of these items.

070 - Operations and Maintenance Supplies
Covers procurement of any commodities or services incident to the maintenance, operation, and repair of equipment and facilities utilized by the military establishment. Excludes major materiel production costs and troop pay. May include such things as petroleum products (POL), station and equipment maintenance, depots and warehousing costs, medical or clinical costs, and general administrative costs incident to maintenance, repair, and operation (MRO).

080 - Military Personnel Costs (including clothing, food, and pay)
Covers cost of:

a. Clothing: Cost of uniforms and clothing furnished to military personnel.

b. Subsistence: Cost of rations of all types and kinds furnished to military personnel.

c. Other Services and Supplies: Cost of transportation and recreation, or such morale-building services as libraries, chaplains, etc.

090 - All Other Direct Military Support
Covers direct military support activities not classified under another functional field.
Agriculture and Natural Resources

110 - Agricultural Education, Extension, and Research

Covers general methodology, organization, and administration in agricultural education (except purely teacher training and vocational agriculture education (620)); agricultural extension and research activities contributing to increased agricultural production and improved rural living. Research, study, or work involving only a single more specific functional area, such as a specific crop or livestock development or land and water resources, should be coded in the more specific field. Teacher training as such and teaching methods in vocational agriculture and home economics should be coded under education.

120 - Land and Water Resources

Covers activities in soil conservation, upstream flood control measures, drainage, soil surveys and soil classification, land use, land reform, and programs and activities for the use and disposition of water where the primary purpose is the construction or improvement of dams and irrigation systems for agricultural purposes, and the improvement of irrigation practices, land clearing, and land preparation for irrigation, management and use of irrigated lands under different kinds of irrigation systems. (This category does not cover rural or urban water supply programs which are included under rural wells and potable water (125) and urban potable water (521), or activities under environmental sanitation (520) or hydroelectric projects which are included under power (220)).

121 - Land Resettlement

Covers projects to stimulate and assist desirable agricultural reform, involving land settlement and resettlement objectives. Food and feed may be provided to farmers and their families and their essential foundation livestock while in the process of bringing new land into production or changing existing land use for the social and/or economic development of the country.

125 - Rural Wells and Potable Water

Covers activities related to dug or drilled wells, spring captations, or other sources of safe water for domestic consumption, stockwatering, and other uses in a rural community, including the pumps, piping, storage tanks, and other appurtenances necessary for operation.

130 - Crop and Livestock Development

Covers specific activities for the improved production and development of agricultural crops, including the use of fertilizers, improved seeds, development of new crops, and disease and pest control; all phases of livestock production and management, including disease control and prevention, and production.

140 - Agricultural Economics, Farm Organizations, and Agricultural Credit

Covers functions of farm organizations, agricultural cooperatives, and agricultural credit systems; agricultural economics, including farm management, production economics, agricultural statistics, farm planning and work simplification, and land tenure adjustments.

150 - Agricultural Marketing and Processing

Covers general agricultural marketing, commodity processing, storage problems, and cooperative marketing, including organization, financing, and membership problems.

160 - Home Economics

Covers activities for the application of practical home economics knowledge and techniques to improve family living and more efficient resource utilization with emphasis on rural areas. Such projects deal comprehensively with the triple role of women as homemaker, consumer, and producer and include such activities as: producing, preserving, and preparing food; improving sanitary and physical environment and general health conditions of the home; selecting, making, and caring for clothing and other household articles; caring for and training children; and efforts to increase family income and improve the management of available resources.
165 - Rural Youth
Covers programs such as 4-H Clubs and their activities, with primary emphasis on contributions to improving agricultural production, rural development, and rural living.

170 - Forestry
Covers activities in reforestation, improved forestry management practices, development of forest products, and the establishment and operation of forestry schools.

180 - Fisheries
Covers activities for development of salt and freshwater fisheries, including fishing techniques, equipment, research, teaching, and special production and marketing problems.

190 - All Other Agriculture and Natural Resources
Covers activities of farm mechanization, operation, maintenance, and care of farm machinery; structure and layout of farm service buildings; farm storage problems; and food and agricultural activities not classified under another functional field.

199 - Technical Support, Agriculture and Natural Resources
Covers general program support (i.e., not feasible for costing under other projects) for agriculture and natural resources.

Industry and Mining

210 - Mining and Minerals
Covers activities related to the location, development, and production of all minerals, including petroleum and coal, except projects concerned with management or workers training as defined in industrial management (270) and industrial training (280).

220 - Power
Covers activities related to planning, design, establishment, and/or operations of facilities for the generation and transmission of electric power for commercial distribution, except activities concerned solely with management or worker training as outlined in 270 and 280. Includes dams for which power is the predominant purpose.

225 - Communications
Covers activities related to the planning, design, establishment and/or operations of telephone, telegraph, radio, television, and related special purpose facilities for point-to-point or mass communications.

230 - Manufacturing and Processing (not classified elsewhere)
Covers activities related to all manufacturing and processing installations and techniques, except fertilizer (231), pesticides and other plant chemicals (232), food processing and fortification (233), food storage and refrigeration (234), and projects concerned solely with management or worker training as outlined in 270 and 280.

231 - Fertilizer Production
Covers activities related to the manufacturing and processing of fertilizer, except projects concerned solely with management or worker training as outlined in 270 and 280.

232 - Pesticides and Other Plant Chemicals
Covers activities related to the manufacturing and processing of pesticides, and other plant chemicals, except projects concerned solely with management or worker training as outlined in 270 and 280.

233 - Food Processing and Fortification
Covers activities concerning the planning, engineering, construction, and management of techniques and facilities for industrial food processing and related operations, including but not limited to fruit and vegetable products, sea foods, meats, dairy, and bakery products. Includes the fortification of foods with vitamins and minerals.

234 - Food Storage and Refrigeration
Covers activities related to the planning, engineering, construction, and management of facilities for food storage and
refrigeration, e.g., grain treatment and storage, ice and other refrigerant manufacture, and industrial food storage and refrigeration facilities.

240 - Service Industries

Covers all service industries not elsewhere classified, such as banking, credit firms and associations, insurance, printing, and publishing.

250 - Engineering and Construction

Covers activities requiring professional engineering or construction services not confined to specific activities included under any other functional area. (See codes for specific industry, agriculture, land use, water, housing, etc.)

260 - Marketing and Distribution

Covers activities related to the marketing and distribution of processed consumer and durable goods.

270 - Industrial Management

Covers activities primarily devoted to any or all aspects of industrial management including: organization and policy, financial management and controls, personnel management, executive development, production techniques, research and development, productivity measurement; and also such subjects as labor management relations, human relations in industry, job analysis, etc., where the participating foreign nationals are at the management or supervisory level.

280 - Industrial Training

Covers activities for acquisition or improvement of industrial research, manufacturing, engineering, construction, and mining skills including technical aids media.

290 - All Other Industry and Mining

Covers industry and mining activities not classified under another functional field.

299 - Technical Support, Industry, and Mining

Covers general program support for industry and mining.

Transportation

310 - Highways (not classified elsewhere)

Covers activities on highway bridges, highway transportation, equipment, highway improvement and maintenance, development road construction, and highway safety studies.

311 - Intercity Highways

Covers activities related to the planning, engineering, and construction of new roads; maintenance of new and existing roads, including surface maintenance, drainage, culverts, bridges, shoulders, traffic lights, and directional signs, normally, hard-surfaced roads.

312 - Rural Farm to Market Roads

Covers activities related to the planning, engineering, construction, and maintenance of secondary and tertiary roads ranging from hard-surfaced roads to small roads and paths, often carrying animal-drawn vehicular and pedestrian traffic, light bridges and footbridges, normally from food-producing areas to villages or major highway marketing points.

320 - Urban Transit and Traffic Engineering

Covers projects related to operation and maintenance of urban transit systems, such as motorbus, trolleybus, streetcar, and any other means employed to transport urban traffic, traffic counts, and economic and design studies.

330 - Railways

Covers projects for railway surveys, maintenance of way, motive power and rolling stock, signals and communications, and railway repair and construction shops.

340 - Port Facilities and Harbor Improvements

Covers projects on cargo handling and storage, dredging, piers, and warehouses.

350 - Inland Waterways

Covers projects for all phases of development, construction, expansion, or maintenance of inland waterways.
360 - Ship Operations

Covers projects on navigational aids and other technical services relating to maritime administration.

370 - Air Transport

Covers projects on airport design and development, navigational aids, air safety, and airport operations.

390 - All Other Transportation

Covers transportation projects not classified under another functional field.

399 - Technical Support, Transportation

Covers general program support for transportation.

Labor-Manpower

These revised codes and definitions apply only to new projects. Active and completed projects will continue to be coded and reported as they were prior to the date of receipt of this revision. A Transition Guide shows the inclusions of old code items with the new definitions.

410 - Trade Union Development

Covers trade union leadership training; trade union development, structure, organization, and administration; workers' education; establishment and operation of labor education centers and training of union officers and members in the techniques of collective bargaining, contractual and grievance, arbitration and conciliation procedures; and related trade union activities.

Covers such institutions as the American Institute for Free Labor Development (AIFLD), African-American Labor Center (AALC), and Asian-American Free Labor Institute (AAFLI).

Covers union-to-union programs, workers' education, skills training, housing, cooperatives, impact projects, civic and social development, and other trade union institution-building activities. See M.O. 1612.40.2 - Strengthening Trade Unions.

420 - Skills Training

Covers assistance to public and private institutions engaged in occupational training of the labor force at levels which do not usually involve the development of professional and university-educated personnel. Includes initial training of newly hired workers, upgrading skills of currently employed workers, retraining employed workers for jobs requiring different skills, training unemployed disadvantaged and underemployed workers to meet skill requirements for employment, training young persons for highly skilled occupations through apprenticeship, and training of training directors, coordinators, foremen, and first-level supervisors who in turn are directly involved in training workers. Among the covered programs are preapprenticeship, apprenticeship, on-the-job training, job corps types of training for disadvantaged youth, neighborhood youth corps types of training related to in and out-of-school programs, work experience and training in rural areas for poor adults, and experimental, demonstration, and research projects related to these programs.

430 - Labor Productivity

Covers trade union economic research, trade union engineering, job evaluation and classification, wage incentive, and employment and technological change, when the participating foreign nationals are primarily a labor team, though it may include supervisory or management members.

440 - Labor-Management Relations

Covers collective bargaining, mediation, conciliation, arbitration, trade union university training (industrial relations).

450 - Labor Law and Standards

Covers assistance to public and private institutions concerned with wages, hours, and conditions of work; occupational safety and hygiene; special protection of working conditions for women and children; industrial welfare facilities; improvements in the status of women and expansion of their opportunities for employment; labor law administration; and experimental, demonstration, and research projects related to these programs.

451 - Social Security

Covers assistance to public and quasi-public institutions responsible for such programs as unemployment insurance, separation pay, old age insurance, survivors insurance, workmen's compensation, health and disability insurance, and similar programs developed for members of the labor force to protect them and their families from interruption of their earnings as a result of unemployment, old age, accident, sickness, and death. Includes experimental, demonstration, and research projects related to these programs.
460 - Employment Services

Covers assistance to public and private institutions engaged in such manpower development services as recruitment and placement, job development, occupational and job analysis, labor market information and analysis, youth and other employment counseling, and participation in national, regional, and local manpower and job development. Serves entire labor force but focuses on the unemployed and underemployed in terms of recruitment, testing, referral to training, placement in jobs; enhancement of the employability of disadvantaged persons; provision of labor demand and supply information to employers and job seekers; encouragement of private and public employers to develop job opportunities for and to hire, train, retrain, and upgrade hard-core unemployed and underemployed youth and other job seekers; provision of or arrangement for counseling, basic and remedial education and work experience for chronically unemployed adult and disadvantaged youths; provision of a coordinated program of manpower and supportive services for the unemployed job seekers, with special emphasis on the local labor-market areas. Includes experimental, demonstration, and research projects related to these programs.

490 - All Other Labor-Manpower

Covers labor-manpower projects not classified under any other specific functional field. Includes specialized sector-oriented projects within the general coverage of Codes 420, 450, 451, 460, and 492; e.g., projects in skills training, labor standards, employment services, social security, and/or manpower statistics in the health, educational, or agricultural sectors, in population-family planning programs, for rural and community development and strengthening the private sector. Also includes special-purpose projects designed to reduce manpower and employment problems flowing from unemployment, urbanization, and industrialization and projects to improve the employability and status of such disadvantaged workers within the labor force as women, minorities, handicapped, and illiterates.

491 - General Labor Ministry Development

Covers assistance in planning, policy making, administration, evaluation, and supporting services to the executive agency which has the responsibility to promote the productivity and welfare of wage and salary workers, improve working conditions, and increase opportunities for employment and which encompasses several of the organizational units responsible for the functional fields described under 420 through 494. This executive department may have other names, such as a ministry of social welfare or be combined within a larger unit, such as a ministry of health and labor. If assistance is primarily directed at one functional field or institution, the applicable specific code is to be used. See M.O. 1612.40.1 - Strengthening Labor Ministries, and paragraph V. of Attachment A to M.O. 1612.40.1 - Labor Programs, General.

492 - Labor, Manpower, and Price Statistics

Covers assistance to public and other institutions, such as universities, responsible for the collection, processing, and dissemination of factual information on (1) the size, trends, and composition of the labor force, including employment, unemployment, and underemployment; (2) wholesale and retail prices and consumer prices index; (3) wages and hours of work; (4) labor turnover; (5) work injuries; (6) work stoppage due to industrial disputes; (7) collective bargaining agreements; (8) productivity; (9) union membership; and (10) manpower and employment surveys and estimates of manpower resources, requirements, job opportunities, bottlenecks, and training requirements. Includes experimental, demonstration, and research projects related to these programs.

493 - Manpower and Employment Planning

Covers assistance to public officials, generally located within the overall development planning agency, responsible for the formulation, coordination, and evaluation of policies, programs, and institutions necessary for the attainment and maintenance of full, productive, and freely chosen employment involving the integrated and interdependent elements of (1) development of the skills, knowledges, abilities, and motivations of the labor force; (2) helping to create jobs to make the fullest use of the labor force through appropriate fiscal, monetary, investment, manpower, and related measures; (3) linking job seekers with job openings, occupationally, geographically, and by economic sectors; and (4) improving worker productivity, welfare, and dignity. Includes experimental, demonstration, and research projects related to these elements and objectives and projects for coordination with the ILO's World Employment Program, the component regional, manpower, and employment
plans, and other multilateral assistance in manpower and employment planning. See M.O. 1612.40.4 - Manpower and Employment Development, and paragraphs II. through IV. of Attachment A to M.O. 1612.40.1.

**494 - Manpower and Employment Seminars**

Covers A.I.D.-financed seminars, symposia, conferences, and workshops conducted by A.I.D., the International Manpower Institute of the Department of Labor, universities, foundations, professional societies, consulting firms or other institutions in the area of overall and sector manpower and employment planning, administration, and evaluation. Includes worldwide, regional, subregional, and country projects of this nature, whether bilateral or in cooperation with such multilateral agencies as the ILO, OECD, OAS, ECAFE, ECA, and World Bank. Seminars, etc., covering one or more of the major elements set forth in M.O. 1612.40.4, are coded under this number.

**499 - Technical Support, Labor-Manpower**

Covers general program support for labor and manpower.

499 - Technical Support, Labor-Management
    (Minor title change and code definition basically
    the same.)

(Continued on page 6c)
Health and Sanitation

510 - Control of Specific Diseases (not classified elsewhere)
Covers research activities and all campaign or emergency-type activities that are carried out separately, apart from regular health center or related activities.

511 - Malaria Eradication
Covers activities related to programs to eliminate and prevent the recurrence of malaria. Includes planning, epidemiological evaluation, geographical reconnaissance and identification of malarious areas, pilot (or preeradication) projects, and spraying with insecticides.

520 - Environmental Sanitation
Covers sewerage systems, garbage disposal, rat control, privy construction, laundries, public baths, markets, slaughterhouses, and related engineering plans and surveys.

521 - Urban Potable Water
Covers activities related to public utilities which collect, process, and distribute potable water to the premises of domestic and industrial consumers in an urban community. Activities include, but are not limited to, the planning, design, and installation of systems; the operation and maintenance of completed systems; and the training of personnel concerned with the development of institutions to carry out these functions.

530 - Health Facilities - Operation of and Advisory Services to
Covers health centers, hospitals, clinics, laboratories, dispensaries, subposts, and mobile units, not covered under other specific functional codes in health and sanitation.

531 - Maternal/Child (Infant and Preschool Children)
Covers projects to assist pregnant and nursing mothers by providing them with needed foods and other services at institutions such as clinics, hospitals, and community centers.

540 - Health Training and Education
Covers local training courses which are set up as activities and require professional and subprofessional personnel (physicians, sanitary engineers, nurses, laboratory technicians, sanitary inspectors, nurse aides) and activities for assistance to nursing, medical, and engineering schools, and health education projects, including contracts with colleges and universities.

550 - Health Facilities, Construction, Remodeling, Equipment
Covers construction, remodeling, repairs, maintenance, supplies and equipment of health facilities such as hospitals, health centers, laboratories, and similar facilities.

560 - Nutrition
Covers activities to improve health through better nutrition: improvement in agricultural and food technology, e.g., food surveys to provide reliable information on the nature and extent of existing malnutrition, levels of consumption, food patterns, consumption of foods commonly consumed, and availability of food to provide an adequate diet; educational programs for the general population to increase consumption of high quality nutritious foods, training nutritionists and other professionals involved in health or food production and utilization programs, i.e., doctors, health workers, teachers, agriculturalists, home economists, and community development workers; the provision of foods and other assistance to improve handling, preparation, preservation, and utilization processes.

570 - Population Studies
Covers projects designed to increase knowledge about levels and trends of population growth and their determinants and consequences. Such activities include registration, surveys, and analyses of vital statistics as well as studies of public knowledge, attitudes, and practices related to family planning. Excludes epidemiological studies of mortality trends by specific cause of death, which are included under control of specific diseases (510) and decennial censuses included under statistics - general and census (780).

580 - Family Planning
Covers projects designed to reduce the population growth rate or to limit family size as necessary, feasible, or desired by individual families as well as their governments.

590 - All Other Health and Sanitation
Covers all other health and sanitation projects not classified under any other specific functional field.
599 - Technical Support, Health, and Sanitation
Covers general program support for health and sanitation.

Education

610 - Technical Education (not classified elsewhere)
Covers activities dealing with improvement and expansion of education facilities for trade and industrial education, including training of teachers of vocational education for all levels, and establishment and improvement of vocational and trade schools.

620 - Vocational Agriculture Education
Covers activities for expanding and improving the teaching of agriculture at elementary and secondary levels, including preparation of teachers of vocational agriculture and improvement of agricultural schools.

630 - Home Economics Education
Covers projects for expanding and improving the teaching of home economics in elementary and secondary schools, and training of teachers of home economics for all levels.

640 - Elementary Education
Covers projects for improving basic education, including expansion and improvement of elementary school facilities and equipment, adaptation of curriculum and textbooks to local needs, and training of elementary school teachers.

650 - Secondary Education
Covers projects for expanding and improving general education opportunities at the secondary level, including improvement of teaching methods, textbooks, curricula, school facilities and equipment, and training of secondary school teachers.

660 - Professional and Higher Education
Covers projects for improving educational opportunities at advanced levels, in such fields as education or engineering, including establishment and improvement of university facilities and advanced training of instructors and professors, and university contracts related to education proper. Activities for training in public administration, agriculture, public health, etc., are classified under the appropriate related functional field.

670 - Fundamental Adult and Community Education
Covers projects for improving and expanding educational opportunities for fundamental education and general adult education, including community schools.

680 - Educational Administration
Covers projects for improving educational administration, including reorganization of school systems, training of school administrators, and improving methods of educational finance, compilation of educational statistics, and activities in educational research.

690 - All Other Education
Covers educational projects not classified under any other specific functional field.

691 - Central Book Fund
Covers projects related to the need for text and other books used in social development and educational programs. Includes consultant services, technicians courses, and pilot projects.

699 - Technical Support, Education
Covers general program support for education.

Public Safety and Public Administration

710 - Public Safety
Covers projects designed to improve management, organization, and operation of public safety organizations. In addition to the usual police functions of protection of life and property, crime prevention and detection, regulation of traffic, an activity may embrace assistance in related fields including border patrol, prison administration, coast guard functions, operation of countrywide police communications networks, maintenance of national
personnel registries and personnel identification systems, fire fighting and fire prevention, and a variety of other regulatory functions.

720 - Government-wide Organization and Management

Covers projects aimed at improving organization and management in fields which are government-wide in application, scope, or effect, whether at Federal, State, or local levels. Includes "Hoover Commission" type surveys or reconnaissance surveys of public administration problems, organization, or management projects which cut across more than one governmental agency, organization and management of economic development programs excluding development planning (795) and government-wide organization, analysis, and planning.

750 - Public Personnel Administration

Covers projects dealing with recruitment and testing, classification and pay, motivation and morale, personnel legislation, human relations, and other civil service activities.

740 - Organization and Management of Particular Ministries

Covers projects aimed at improving management of particular ministries, programs, or levels of government such as improving organization and methods in substantive (agriculture, health, education, etc.) ministries, organization and management of government corporations, central-state-local relations, and local government functions, etc. Activities designed to provide substantive support of a governmental organization are classified under the specific related activity.

760 - Administrative Services

Covers projects aimed at improving government administration, records administration, library administration, and office management and services such as business machines, filing, microfilming, mail and messenger service, printing and reproduction, space, lighting and ventilation, and forms control and design.

770 - Organization and Administration of Institutes or Schools for Public or Business Administration

Covers projects designed to improve facilities for training and education in public and business administration and associated activities involving research and consultation services, including university-to-university contracts in the fields of public and business administration.

780 - Statistics - General and Census

Covers projects to improve general government statistics and census statistics. Other activities in the fields of statistics are classified under the appropriate related functional field.

790 - All Other Public Administration

Covers public administration projects not classified under any other specific functional field.

799 - Technical Support, Public Safety, and Public Administration

Covers general program support for public safety and public administration.

Community Development, Social Welfare, and Housing and Urban Development, Community Development, Social Welfare, and Youth

810 - Community Development

Covers projects with a unified overall approach to the problems of raising living standards at the community or village level through the application of community development processes, and provides for participation of the people in both planning and carrying out organized self-help undertakings. Activities of a more
specialized nature are classified under the appropriate related functional field.

820 - Social Welfare, Institutional
Covers activities to provide food and other assistance to needy residents of institutions who, because of their economic status, are unable to pay the full charge of the assistance provided. These institutions are nonpenal, noneducational, public or nonprofit private establishments operated for charitable or welfare purposes where needy persons reside and receive meals and other assistance, e.g., homes for the aged, orphanages, and summer camps.

821 - Social Welfare, Noninstitutional
Covers activities to provide food and other assistance to needy persons living in family groups outside of institutions who are in need because of their economic condition. Wherever possible the recipients engage in self-help activities in return for the food and other assistance received; the activities are nonreligious; are of benefit to the recipients, their families, and communities; and are organized and supervised.

822 - Refugees
Covers activities to provide assistance to persons who are in need because they have fled or have been expelled from their country of nationality or domicile and are living in a country other than the one in which they hold citizenship, or to persons who fled or have been expelled from their homes to a part of the country other than that in which they usually earn a livelihood.

823 - Emergency Assistance (not classified elsewhere)
Covers activities to provide assistance to persons who, because of extensive periods of drought, crop failure, or civil strife; or prolonged rehabilitation operations after flood, fire, earthquake, or man-made disaster, are in need of such assistance. Wherever possible recipients of food and other assistance engage in organized and supervised self-help activities.

825 - Youth
Covers projects concerned specifically with youth leadership training including related activities other than rural youth (165).

Housing and Urban Development

830 - Covers projects with a primary aim to accomplish nonrural shelter improvement except activities directly related to improvement of manufacturing and construction activities, engineering, and construction (250). Includes training, survey, investigation, advice, planning, and actual demonstrations for all types of private enterprise or public housing; activities aimed at improved housing policy or legislation and governmental organization for implementation; housing finance and management; architectural and planning design of housing; activities in housing economics and statistics, and in research and development.

840 - Self-help Housing
Covers projects of home building or improvement with the maximum utilization of family or community labor, and government programs aimed at sponsoring activities of this type.

850 - Supporting Projects, Housing
Covers projects which form an essential part of a major housing goal having its principal support from the cooperating government and its principal costs borne other than by assistance.

860 - Emergency Housing
Covers projects particularly related to disaster or major upheavals as distinct from usual, continuing housing activities.

890 - All Other Housing
Covers housing projects not classified under any other functional field.

899 - Technical Support, Community Development, Social Welfare, and Housing and Urban Development
Covers general program support for community development, social welfare, and housing and urban development.
General and Miscellaneous

Private Enterprise, Promotion (900-950)

910 - Development and Investment Centers

Covers projects related to local institutions providing technical services to private enterprise (feasibility surveys, preparation of prospectuses and loan applications, advice to owners of industrial and service establishments on management and marketing skills, and attracting local and foreign investment).

920 - Development Banking and Investment Credit Facilities

Covers projects related to industrial credit institutions (small industry credits, guaranties, development corporation lending, and development banks).

930 - Surveys of the Private Investment Situation and Specific Opportunities

Covers projects related to general surveys of investment climate, industrial possibilities, investment plans, entrepreneurial interests, governmental procedures, and other factors relating to investment potential. An example would be where the government requests help in determining how to open the private sector of the economy to broader opportunities for local and foreign businessmen and a team is supplied to report on the investment climate, tax laws, import restrictions, investment incentives, specific areas of possible industrial development, need for development institutions, and related matters.

940 - Industrial Districts

Covers projects related to the planning, establishment, and management of industrial districts or to provide land, buildings, and technical advice on parks constituting groups of diversified industries (manufacturing, utilities, and supporting services).

950 - All Other Private Enterprise, General (not classified elsewhere)

Covers activities not listed above as surveys in insurance, credit rating, security exchange, product design and other fields, e.g., insurance, banking, market surveys, encouragement for the establishment or program activities of chambers of commerce, trade associations, and associations of manufacturers.

Other (960-980)

960 - Communications Media

Covers projects with the main purpose of spreading knowledge - any kind of knowledge - faster, farther, and more effectively. Generally it applies to activities for audio-visual support of various mission programs or for improving communications media - broadcasting, graphic arts, motion pictures, publications, etc. Activities with the primary purpose of improving public services in individual technical fields, e.g., agriculture, health, and education are classified where practicable under the appropriate technical field. Excludes special-purpose activities such as point-to-point communications, telephony, aircraft, weather communications, photogrammetry, and the like which do not entail communications media or audiovisual education.

970 - Supply Services

Covers projects involving the conveying of advice to the cooperating country on any phase of supply management.

980 - Peaceful Uses of Atomic Energy

Covers projects concerned primarily with the peaceful use of atomic energy. When the use of atomic energy is of secondary importance and is only a segment of an activity, the activity is classified under the appropriate related function.

995 - All Other, General and Miscellaneous

Covers projects not classified under any other functional field and multifield activities in which the predominant functional field cannot be determined.

998 - Special Development Activity Authority

Covers projects approved and implemented under the Special Development Activity Authority described in M.O. 1323.1.1 - Special Development Activity Authority.

999 - Technical Support, General and Miscellaneous

Covers program support for the General and Miscellaneous Sector and the Mission generally, i.e., where it is not practicable to attribute the activities and related costs to specific projects or other major technical fields (e.g., the portion of mission building space, communications, utilities, office supplies and equipment, and State Department support costs chargeable to program funds).
Section VI
Resource Data Sheets for Third Country Training
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE
   January 1971

2. REGION
   NESA

3. COUNTRY
   Greece

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
   Agriculture 110, 620

5. TYPE AND DESCRIPTION OF TRAINING
   **Type:** Program
   **Description:** Practical Agricultural Vocational School, at secondary level. A model school on the way to set up a vocational school. This facility is recommended mainly for observational purposes for persons interested in setting up or improving an agricultural vocational school; however, some of the short-term courses (usually lasting 3 weeks) may be useful. The school also provides courses in metal work, carpentry, etc.

6. INSTITUTION OR TRAINING RESOURCE
   American Farm School
   Thessaloniki, Greece

7. LANGUAGE OF INSTRUCTION
   English (Greek)

8. PREREQUISITES FOR ENTRANCE

9. DURATION: 2 weeks to 3 months for observation and short-term courses.
   Begins:
   Ends:

10. HIGHEST CREDENTIAL OFFERED

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
   Founded through a special grant from AID, and currently receiving financial support through the American Sponsored Schools and Hospitals Abroad program in AID.

12. ESTIMATED EXPENSE (Excluding International Travel)
   a. Tuition:
   b. Other training fees:
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
   d. Other:

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

14. OTHER
   Highly recommended for school administrators and faculty of practical agricultural institutions for observation purposes.

4. **GENERAL FIELD AND CODE (See M.O. 1095.2)**

- Agriculture 110, 130, 140

5. **TYPE AND DESCRIPTION OF TRAINING**

**Type:** Academic

**Description:** Agricultural Sciences and Related Fields

- Standard University courses. Dairy Science, Agriculture, Veterinary Science, Agricultural Engineering and Technology
- Agricultural Research, teaching, and extension education of a statewide nature, patterned after U.S. land grant college system.

6. **INSTITUTION OR TRAINING RESOURCE**

Andhra Pradesh Agricultural University

Hyderabad

7. **LANGUAGE OF INSTRUCTION**

- English

8. **PREREQUISITES FOR ENTRANCE**

- Pre-university or higher secondary (11 years of schooling) with Science and Mathematics for undergraduate programs.
- Agricultural degree for post-graduate programs.

9. **DURATION:**

- 4 years for B.Sc. Agriculture;
- 5 years for B.Sc. Agri. Eng.

<table>
<thead>
<tr>
<th>Begins:</th>
<th>July</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ends:</td>
<td></td>

| Agriculture 110, 120, 130, 140 |

5. TYPE AND DESCRIPTION OF TRAINING

**Type:** Academic

**Description:** Education in Agriculture and Allied Sciences

Standard university courses in the field of agriculture. Includes research and organization of extension activities to improve the standards of living of rural people and to solve food problems.

6. INSTITUTION OR TRAINING RESOURCE

Jawaharlal Nehru Krishi Vishwa Vidyalaya

Madhya Pradesh State

(6 colleges throughout the state)

7. LANGUAGE OF INSTRUCTION

English

8. PREREQUISITES FOR ENTRANCE

Undergraduate: pass Higher Secondary Exam of M. P. Board, or its equivalent, with science, math, biology, agriculture; 16 year old minimum. Graduate: B. V. Sc. & A. H. or B. V. Sc. degree.

9. DURATION:

4 years for B. Sc.

**Begins:** July

**Ends:**

10. HIGHEST CREDENTIAL OFFERED

B. Sc. and M. Sc. in Agriculture and Veterinary

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

AID has groups of U.S. University Contract Advisors/Technicians from the University of Illinois working with their counterparts in all areas of instruction.

12. ESTIMATED EXPENSE (Excluding International Travel)

a. Tuition: About $50 for one year.

b. Other training fees:

c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility: NTE $5.00 a day on the campus

d. Other: Approximately $200 will be required for within India travel, special observation programs to be arranged during summer vacation and other incidental charges.

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

Students are required to reside in hostels; not open during summer vacation.

14. OTHER

Since the University has a rigorous schedule lasting from 7AM to 5PM, it is suggested that the students be in good health!

Students are permitted to migrate from one institution to another if a seat is available.

**4. General Field and Code (See M.O. 1095.2)**

Agriculture 110, 130, 140,

**5. Type and Description of Training**

Type: Academic

Description: School of Agriculture is an affiliated college of the University of Peshawar, located in the University Town. Offers B.Sc. (Hons.) and M.Sc. (Agriculture) in various subjects: Agricultural Chemistry, Agronomy, Plant Breeding and Genetics, Entomology, Animal Science, Agricultural Economics & Extension Education, Horticulture and Food Technology.

**6. Institution or Training Resource**

College of Agriculture, University of Peshawar, NW Frontier Province

**7. Language of Instruction**

English

**8. Prerequisites for Entrance**

High School (Secondary School) Matric.

**9. Duration**

B.Sc. (Hons) Agric. 5 yrs. after High School/Matric.;

M.Sc. 2 years.

Begins: Mid-Sept.  
Ends:

**10. Highest Credential Offered**

M.Sc. (Agriculture)

**11. U.S. Involvement in Development of Resource**

AID has provided technical assistance to the College through contracts with Washington State University and Colorado State University.

**12. Estimated Expense (Excluding International Travel)**

- Tuition: Rs. 15 for Intermediate; Rs. 18 for B.Sc. (Hons) Agric. and Rs. 19 for M.Sc. (Agric.) per month.
- Other training fees: (See M.O. 1386.2 for travel status.) At facility:
- Per diem rate: Rs. 19
- Other: Security Deposit Rs. 40 (Refundable)

**13. Availability of Housing or Dormitory Facilities**

Hostel facility available. Hostel expenses (all classes) approximately Rs. 68 per month.

**14. Other**

Students from Iran, Turkey, Afghanistan, Jordan, Nepal, Kuwait, East Africa, Sudan, Behrain, Thailand and Ceylon, studying in various professional and science faculties, are placed in a hostel called the International Hall, together with Pakistani students who have outstanding academic records.

Sixty days lead-time required to arrange programs.
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE
   January 1971

2. REGION
   NESA

3. COUNTRY
   Pakistan

4. GENERAL FIELD AND CODE (See M.O. 1995.2)
   Agriculture, 110, 120, 130, 140, 150

5. TYPE AND DESCRIPTION OF TRAINING
   Type: Academic
   Description: Courses and training in Agriculture Economics; Agriculture Statistics; Cooperation and Marketing; Rural Sociology; Agriculture Finance; Agriculture Engineering; Food Technology and Fruit Technology; Irrigation and Drainage; Agronomy; Ag. Extension and Teachers Training; Agric. Chemistry; Biochemistry; Plant Pathology; Soil Science; Animal Breeding and Genetics; Nutrition; Dairy Science; Poultry Science; Medicine and Surgery; Microbiology; and Pharmacology. Offers B.Sc. in Agriculture; (Cont)

6. INSTITUTION OR TRAINING RESOURCE
   East Pakistan Agricultural University, Mymensingh, with five faculties: Agriculture Economics & Rural Sociology; Agricultural Engineering & Technology; (Cont)

7. LANGUAGE OF INSTRUCTION
   English

8. PREREQUISITES FOR ENTRANCE
   Secondary School Examination or equivalent. Age not over 20 years on July 1.

9. DURATION:
   (See Block 14)
   Begins: Mid-Aug.  
   Ends: June of next year

10. HIGHEST CREDENTIAL OFFERED
    Ph. D. (Soil Science)

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
    AID has been providing technical assistance to the University through a contract with Texas A&M University (began 1955 end 1970).

12. ESTIMATED EXPENSE (Excluding International Travel)
    a. Tuition: Rs. 10 for B.Sc. and DVM; Rs. 12 for M.Sc. per month.
    b. Other training fees: Admission fee Rs. 30 per annum.
    c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
    d. Other: Examination fees: B.Sc. (Agric.) Part I and II Rs. 40 to Rs. 50  
       M.Sc. Rs. 55 to Rs. 60

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
    Three residence halls for 880 students.

14. OTHER DURATION: B.Sc. (Ag), B.Sc. Ag Economics and B.Sc. Animal Husbandry courses are of 5 years duration; B.Sc. Agric. Engineering and DVM are 6 years; M.Sc. (Agriculture) is one year after B.Sc.; M.Sc. (Extension Education), M.Sc. (Vet. Science) and M.Sc. (Agric. Economics) are two years after B.Sc. Ph. D. 3 years after M.Sc.

   Sixty days lead-time required to arrange programs.
5. **Type and Description of Training (Continued)**
Agric. Economics; Animal Husbandry and Doctor of Veterinary Science. M. Sc. in Soil Science; Botany, Entomology; Mycology; Biochemistry and Zoology; Animal Husbandry; Agriculture Economics and Extension Education.

6. **Institution or Training Resource (Continued)**
Agriculture; Animal Husbandry; and Veterinary Science.
1. DATE
   January 1971

2. REGION
   NESA

3. COUNTRY
   Pakistan

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
   Agriculture 110, 130, 140

5. TYPE AND DESCRIPTION OF TRAINING
   Type: Academic
   Description: Imparts basic instruction in physical, biological and social sciences which are of fundamental importance to the study of Agriculture. All students admitted to the University, after the Secondary School Certificate examination, are enrolled in the basic courses in sciences and arts for two years and are awarded the Intermediate exam. certificate.

Offers B.Sc. (Hons.) 3 years course after Intermediate in Agriculture; (Cont)

6. INSTITUTION OR TRAINING RESOURCE
   West Pakistan Agricultural University,
   Lyallpur, Punjab

7. LANGUAGE OF INSTRUCTION
   English - except for diploma and certificate courses where the medium is Urdu.

8. PREREQUISITES FOR ENTRANCE

9. DURATION:
   (see page 2) Begins: Ends:

10. HIGHEST CREDENTIAL OFFERED
    Ph.D.

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
    AID provided technical assistance to the University through a contract with Washington State University (1954-1969).

12. ESTIMATED EXPENSE (Excluding International Travel)
    a. Tuition: Intermediate - Rs. 6; B.Sc. (Hons.) - Rs. 12; DVM Course
    b. Other training fees: (see page 2) Rs. 12 per mo.
    c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
    d. Other:

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
    Dormitory facilities available. Residential Charges Rs. 27 per month, plus food charges.

14. OTHER
    Sixty days lead-time required to arrange programs.
5. **Type and Description of Training (Continued)**

B. Sc. Agric. Engr. & Tech. (4 years course); DVM Faculty of Veterinary Science 4 years course; B. Sc. (Hons.) Agriculture - a composite course of 5 years; B. Sc. Agriculture Engineering - a composite course of 6 years; Doctor of Vet. Medicine - a composite course of 6 years; B. Sc. (Hons.) Agriculture students can major in Agriculture Economics and Rural Sociology, Agronomy, Animal Husbandry, Entomology, Food Technology, Horticulture, Plant Breeding and Genetics, Plant Pathology, Plant Protection, Agriculture Extension and Social Science.

9. **Duration:**

M. Sc. - 2 years after B. Sc.
M. Ed. Agric. - 2 years after B. Sc. in Agriculture or in an applied discipline.
Ph. D. - Not less than 2 years full-time residence after Master's degree in Agriculture.

**Academic year, terms and vacations:**

1) **Undergraduate Classes**
   1st Session - Middle of August to Third Week of December.
   Mid-Session - 25 Dec. to 30th Dec.
   Second Session - 1st Week of January to Middle of May.
   Summer Vacation - Middle of June to Middle of August.

2) **Graduate Studies:**
   Autumn - Middle of August to Middle of November.
   Winter - Last week of November to Last Week of Next February.
   Spring - 1st Week of March to 1st Week of June.
   Summer - June 10 to 1st Week of August.

12. b. **Other Training Fees:**

   (Science fee for Inter and B. Sc. classes Rs. 2 and Rs. 2.50 per month, respectively.)
M. Sc. Rs. 72 and Ph. D. Rs. 60 per term.
Examination Fees: 1st Year Rs. 35 and 2nd Year Rs. 35 - Intermediate.
   B. Sc. (Hon) Agric., DVM, B. Sc. Agric. Engr.
   Part I - Rs. 40, Part II - Rs. 45;
   Part III - Rs. 50.
M. Sc. & M. Ed. - Rs. 100
Ph. D. - Rs. 260

   b. Other training fees: See M.O. 1322.1 (Book Allowance)
   c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
      $200 required for within India travel and other miscellaneous expenses.

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
   Hostel accommodations in Dehra Dun at moderate rates.

14. OTHER
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE
January 1971

2. REGION
NESA

3. COUNTRY
India

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Agriculture 120

5. TYPE AND DESCRIPTION OF TRAINING
Type: Course
Description: Water Resources Development
Combination of general lectures on planning, design, construction, maintenance of multipurpose river basin projects; plus special lectures adapted to interests of individual engineers, as well as field trips, seminars, and preparation of a project.

6. INSTITUTION OR TRAINING RESOURCE
University of Roorkee
Water Resources Development Training Center
Roorkee, U.P.

7. LANGUAGE OF INSTRUCTION
English (competency to be determined by the sending Mission)

8. PREREQUISITES FOR ENTRANCE
A recognized degree in engineering or its equivalent, plus 3 years experience (the latter may be relaxed at the discretion of the University). Applications should be received by April 30 for enrollment the following July.

9. DURATION:
one year
Begins: July
Ends: June

10. HIGHEST CREDENTIAL OFFERED
1) Post-graduate diploma; 2) Master of Engineering degree in Water Resources Development

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
The Center is financed totally by the GOI. Services of specialists from other countries are availed upon through the operations of U.S., AID, U.N., T.A.O., and Colombo Plan. AID has had some involvement through University of Wisconsin.

12. ESTIMATED EXPENSE (Excluding International Travel)
a. Tuition:
b. Other training fees:
c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:
d. Other: $2,500 estimated for total cost of course

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
Hostel accommodations available at the Training Institution.

14. OTHER
Since 1955, the Center has provided training in modern techniques and practices specifically tailored to water resource development needs of Asian countries.

14. **AVAILABILITY OF HOUSING OR DORMITORY FACILITIES**

    Hostel facilities available - run on a cooperative basis.

15. **OTHER**

    Also provides the following course: (1) post-graduate - leading to Ph.D. (Dairy Tech.); (2) M. Sc. (Dairying); (3) B. Sc. (Dairying); (4) Refresher Course in Dairy Engineering; (5) Dairy Extension and (6) Special short course in Market Milk Plant Operation and Milk Production.
THIRD COUNTRY TRAINING RESOURCE SHEET

1. DATE: January 1971
2. REGION: NESA
3. COUNTRY: India
4. GENERAL FIELD AND CODE (See M.O. 1995.2) 170, 190

5. TYPE AND DESCRIPTION OF TRAINING

Type: Course
Description:
Advanced Technical Training Course in Gur and Khandsari Industry (Jaggery and Unrefined Sugar).
Gur and Khandsari Technology; Sugarcane Culture; Cooperation, Mechanical and Practical aspects of Khandsari Manufacture and Juice Extraction, Boiling and Crystallisation.

6. INSTITUTION OR TRAINING RESOURCE

Khadi and Village Industries' Commission of the Directorate of Gur and Khandsari, Kanpur, Uttar Pradesh

7. LANGUAGE OF INSTRUCTION

English

8. PREREQUISITES FOR ENTRANCE

Graduates in Science with at least one year's practical knowledge of running Gur and Khandsari Unit.

9. DURATION:

5-6 months Begins: October Ends: March/April

10. HIGHEST CREDENTIAL OFFERED

Certificate

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

12. ESTIMATED EXPENSE (Excluding international travel)

a. Tuition: Nil
b. Other training fees: M.O. 1385.2
c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility: NTE $5 a day
d. Other: $250 required for within India travel and other miscellaneous expenses

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

Hostel Accommodation Available

14. OTHER

The course consists of:
a) Gur and Khandsari Technology: Introduction, Juice extraction, clarification, boiling, crystallisation, centrifuging and grading.
b) Sugarcane Culture: Plantation of sugarcane; classification of soils, manures, varieties and their characteristics for Gur and Khandsari; incidence of insects and pests and diseases of sugarcane; and their control measures, etc.
c) Cooperation: Introduction; Organisation and working of Gur and Khandsari Cooperative Societies and accounts and auditing.

3. **COUNTRY**
   India

4. **GENERAL FIELD AND CODE (See M.O. 1095.2)**
   Industry 210, 250.

5. **TYPE AND DESCRIPTION OF TRAINING**
   **Type:** Academic
   **Description:** Engineering and the Technological Sciences
   Undergraduate programs leading to Bachelor of Technology in all major engineering fields; also post-graduate program in mathematics, physics, and chemistry.

6. **INSTITUTION OR TRAINING RESOURCE**
   Indian Institute of Technology
   Kanpur, U. P.

7. **LANGUAGE OF INSTRUCTION**
   English

8. **PREREQUISITES FOR ENTRANCE**
   - Undergraduate - Higher Secondary/Pre-university (11 years of schooling w/science and mathematics) Minimum age - 16 on Oct.
   - Graduate - Bachelor's degree in 1st or high 2nd division

9. **DURATION:**
   5 years undergraduate--2 years graduate
   **Begins:** July
   **Ends:**

10. **HIGHEST CREDENTIAL OFFERED**
    Ph.D

11. **U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE**
    Since 1962, AID has provided technical assistance through a contract with 9 American institutions, Educational Development Center Inc. (EDCI).

12. **ESTIMATED EXPENSE (Excluding International Travel)**
    (a) Tuition: Approx. $4 a month
    (b) Other training fees: See M.O. 1322.1
    (c) Per diem rate: (See M.O. 1356.2 for travel status.) At facility: Not to exceed $3.16 per day.
    (d) Other: Approx. $200 for within India travel, special observation programs to be arranged during summer vacation, and other miscellaneous expenses.

13. **AVAILABILITY OF HOUSING OR DORMITORY FACILITIES**
    Hostel facilities available.

14. **OTHER**
    The American team assigned to IIT helped in developing a sound 5-year curriculum leading to Bachelor of Technology as well as engineering programs leading to M.Sc. and Ph.D. The teaching programs at IIT Kanpur serve as models to some of the other Indian technical and engineering centers and, in quality, are a substitute for certain U.S. based technical training.

- **Industry 220**

**5. TYPE AND DESCRIPTION OF TRAINING**

- **Type:** Program
- **Description:** Electrical Distribution System Repair and Maintenance
- Hot Line Maintenance.

**6. INSTITUTION OR TRAINING RESOURCE**

Bangalore Hot Line Maintenance Training Center
Bangalore, Mysore

**7. LANGUAGE OF INSTRUCTION**

English

**8. PREREQUISITES FOR ENTRANCE**

1. A strong working knowledge of English;
2. Actual experience for some years on repairs and maintenance of transmission and distribution lines and equipment;
3. General qualifications are high;
(continued)

**9. DURATION:**

- **6 months**
- **Begins:** April/October
- **Ends:**

**10. HIGHEST CREDENTIAL OFFERED**

Certificate

**11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE**

- USAID assistance since 1955
- Includes technicians to aid in training of Indian electrical workmen in overhead power transmission and distribution lines and equipment.

**12. ESTIMATED EXPENSE (Excluding International Travel)**

- **a. Tuition:** Approx. $175 for 6-month course
- **b. Other training fees:**
- **c. Per diem rate:** (See M.O. 1386.2 for travel status.) As per M.O.
- **d. Other:** Approx. $150 for within India travel and other misc.

**13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES**

- Hostel facilities are not available, but low cost housing can be arranged by the training institution.

**14. OTHER**
THIRD COUNTRY TRAINING
RESOURCE SHEET

1. DATE
January 1971

2. REGION
NESA

3. COUNTRY
Lebanon

4. GENERAL FIELD AND CODE (See M.O. 1095.2)
Industry 220, 250

5. TYPE AND DESCRIPTION OF TRAINING
Type: Academic
Description:

1. 5 year B.Sc. programs in civil, mechanical, electrical and architectural (6 yrs.) engineering

2. 2 year M.Sc. programs in sanitation or civil engineering

6. INSTITUTION OR TRAINING RESOURCE
The American University of Beirut
Beirut, Lebanon

7. LANGUAGE OF INSTRUCTION
English

8. PREREQUISITES FOR ENTRANCE
For the B.Sc. program, government secondary school leaving certificate. For the M.Sc. program, a B.Sc. in the appropriate field. In all cases the candidates must pass the AUB English Entrance Exam.

9. DURATION:
5 years for the B.Sc. program; 2 years for the M.Sc. program.

10. HIGHEST CREDENTIAL OFFERED
M.Sc.

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE
Most of the faculty are Americans.
Through the AID/AUB contract and through separate grants the U.S. has been the main contributor to the development of the program.

12. ESTIMATED EXPENSE (Excluding international Travel)

a. Tuition: $1,735 per school year
b. Other training fees: $931 (indirect fee)
c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility: $126 per month
d. Other: $125 for books

For further data on expenses as well as other information, contact the AID Affairs Officer, Regional Training Office, C/o American Embassy, Beirut, Lebanon

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES
AUB operates a number of dormitories for boys, capable of accommodating 640 participants. The hostels for girls can accommodate up to 355 girls.

14. OTHER
Undergraduate participants have to live on campus. Graduate participants may live off campus. A Lebanese visa, which is required, is obtainable at any Lebanese Embassy or, if there is no Lebanese Embassy, the visa can be obtained at the Beirut International Airport. Attendance at all class sessions required.
8. Prerequisites (continued)
high degree of manual skill, first-rate co-ordination, and calm, even temperament of the man performing his work, high degree of sound judgement; (4) trained mechanic who thoroughly understands how each tool is used.
## Third Country Training Resource Sheet

### General Field and Code (See M.O. 1095.2)

**Industry 225**

### Type and Description of Training

**Type:** Program/Course

**Description:** Telecommunications

Includes visits to telecommunication installations of various types, as well as academic training in various fields of telecommunication. Such fields include: transmission (open wire carrier, coaxial cable, microwave, VPT); switching (local and long distance); wireless (telephone and telegraph mechanization, etc. as desired.)

### Institution or Training Resource

Post and Telegraph Directorate  
\(^o_o\) Indian Posts and Telegraphs Department  
New Delhi

### Language of Instruction

**English**

### Prerequisites for Entrance

For senior grade officers or engineering graduates; must have adequate experience in the telecommunications field.

### Duration

**Applications require 3-4 month lead time**

- **As desired.**

### U.S. Involvement in Development of Resource

---

### Estimated Expense (Excluding International Travel)

- **Tuition:**
- **Other training fees:**
- **Per diem rate:** (See M.O. 1386.2 for travel status.) At facility:
- **Other:**

### Availability of Housing or Dormitory Facilities

Hostel facilities are available at the center.

### Other

About the same time the application is sent, a request for diplomatic clearance should be initiated with the nearest Indian Embassy/High Commission as per New Delhi's airgram "Procedures for Third Country Training in India", of January 1962.

1. Post-Graduate Programme in Business Administration

The programme commenced from 1st July 1964. Its aim is to provide an opportunity to students to acquire and develop knowledge, abilities, attitudes and understandings which constitute a foundation for their growth into competent and responsible administrators.

During the first year students are required to take the following courses: Production; Marketing; Finance; Organization Behaviour and Problems; Managerial Accounting and Economics; Managers and the Indian Economy; and written analysis of cases. During the second year the students are required: (i) to have a full year course in Business Policy; (ii) to carry out a research project; and (iii) to fulfill a programme of course that gives more intensive coverage of certain sections of the first year course. During the summer between the first and second year, students are required to spend a period of at least six weeks in some business or industrial concern. A variety of methods of instruction are used but the main emphasis will be on the case method of instruction.

It is expected that a successful completion of this course will lead to a degree.

    (See page 2)
14. **Other (continued)**

This is an integrated programme and includes: (a) Six-week Middle Management Course; (b) One-week Senior Executive Seminar; and (c) Two and a half days' Top Management Conference.

The objective of the programme is not merely training of individuals but also the improvement of management performance of organizations by raising the performance of individuals. Instruction is based on business cases. Emphasis is on management and decision-making in the functional fields of business. Hence the programme requires companies to assign men at three different levels of management.

**Six-week Middle Management Course**

It is meant for executives with at least five years' experience at middle level of management and who are under the age of 40. The course emphasises management and decision-making in functional fields of business. The ground covered is: (i) Administrative Practices; (ii) Business Policy; (iii) Cost and Financial Administration; (iv) Marketing Management; and (v) Production Management.

**One-week Senior Executive Seminar**

It is intended for senior executives above the age of 40, with at least ten years of experience and who direct the activities of executives at middle management level. Its purpose is to provide senior executives an opportunity to enhance their qualifications for top level positions through an educational experience specifically aimed at meeting the needs of modern top management.

**Two and a half days' Top Management Conference**

This is intended for managing directors and divisional functional heads. The emphasis is on long range problems of planning and corporate development, building of organization and broad management philosophy.

Other courses conducted by the Institute include:

1. Doctoral Programme aiming at encouraging research and advancing knowledge in the field of management; and

2. Special Programmes for university teachers, training in case writing, industrial relations, etc.

<td>The courses are meant for Departmental Candidates. Normally, such courses consist of 15-20 seats including Indian Nationals. No reservation is made for foreign nationals, who are admitted to the course by special arrangements. Prior consultation with the CAD regarding the number of foreign nationals is absolutely essential as the number of trainees for each course is determined at the time of commencement of the course, taking into consideration the other commitments of the CATC.</td>
</tr>
</tbody>
</table>
5. Type of Training (continued)
6) Radio teletype specialist 8-10 weeks
7) Air traffic control (basic) 8 months (1 month practical)
8) Air traffic control (refresher course) 14 weeks (2 weeks practical)
(practicals take place in Calcutta)

8. Prerequisites (continued)
B.A. or B.Sc. degree from recognized university with physics or math as one of the subjects; or holder of diploma of the Indian Institute of Science in Tele-Communications or Bachelor's degree with "Wireless" as a special subject or qualifications in radio or telecommunications equivalent to a degree; or holder or past holder of 'B' pilot's licence with not less than 200 hours solo flying; or past holder of air navigator's licence and not less than 1000 hours air experience as navigator and have passed the Intermediate Examination of a recognized university or the Senior Cambridge Examination.
Desirable: experience as pilot or navigator, knowledge of a European language other than English, experience as flight radio operator, age between 19 and 25 years.

12. Estimated Expenses (continued)
Since hostel facilities are available for all courses listed above, please make it clear to the participants that they will not be eligible for a regular per diem (either transit or resident status rate). The rate of per diem will be established after discussions with the training institution as the rates payable should be more or less at par with what the Indian trainees will be receiving from GOI. The Institute will bill USAID/India Mission directly for board, lodging, tuition fee, etc. However, we will pay a small pocket allowance to the participants, which will not exceed $3-4 a day.
## Third Country Training Resource Sheet

THIRD COUNTRY TRAINING RESOURCE SHEET

4. GENERAL FIELD AND CODE (See M.O. 1095.2)

Health and Sanitation 520.530

5. TYPE AND DESCRIPTION OF TRAINING

Type: Program

Description: Health Education Services

Short-term observation in the general organization and operation of public health programs in India, with emphasis on health education in schools and communities.

6. INSTITUTION OR TRAINING RESOURCE

Central Health Education Bureau (GOI)
Temple Lane
New Delhi

7. LANGUAGE OF INSTRUCTION

English (competency to be determined by the Rendija & Zassion)

8. PREREQUISITES FOR ENTRANCE

Experience in administration or operation of public health services.

9. DURATION:

Approximately 2-4 weeks, to be scheduled as and when requested,

Begins: 
Ends: 

10. HIGHEST CREDENTIAL OFFERED

Certificate

11. U.S. INVOLVEMENT IN DEVELOPMENT OF RESOURCE

AID assistance in the form of both technicians and equipment to enable the development of its training and research sections, and to develop criteria and standards for evaluation of health education methods.

12. ESTIMATED EXPENSE (Excluding International Travel)

a. Tuition: None
b. Other training fees: None
c. Per diem rate: (See M.O. 1386.2 for travel status.) At facility:

d. Other: Approximately $100 for a 2-4 week observation program which includes within-India travel and other miscellaneous expenses.

13. AVAILABILITY OF HOUSING OR DORMITORY FACILITIES

No facilities available at the training institution, but local arrangements can be conveniently arranged.

14. OTHER

The unique feature of in-service training for health educators has been the introduction of learning-by-doing methodology which provides the student with first hand experience in planning, conducting, and evaluating health education programs. Over 3,000 personnel belonging to different categories from health and welfare agencies have received training in the Bureau.
