Bibliographies; Booklists; Geography; *Geography Instruction; *Human Geography; *Interdisciplinary Approach; *Physical Geography; Secondary Grades; Social Studies; *World Geography  

A total of 644 paperback books by commercial publishers and university presses, including a brief sampling by the United States Government, published between 1950 and 1970, with the majority appearing after 1965, are listed in this bibliography for geography and social studies teachers. Emphasis is on a broad coverage of geography including economic, historical, human, medical, military, physical, political, population, regional and urban. Miscellaneous citations are also given on a wide-range of related topics including agriculture, anthropology, climatology, ecology, exploration, geology, geomorphology, hydrology, land use, manufacturing, mapping, meteorology, oceanography, recreation, religion, resources, rocks and minerals, soils, space, sun, transportation and trade, theory and teaching. Selected series of paperbacks are identified. Full subject entry citations include prices and availability, and, in a few cases, indications of books out of print. The entries are cross-referenced in an alphabetically arranged subject and region index. A publishers list is also provided. (SJM)

PREFACE

It is estimated that well over a million paperback books are sold daily in the United States. Many of these show up in the classroom and it appears that the popularity of the paperback in the classroom is increasing. Yet, for the busy teacher, there are few convenient, easy to use listings of paperback titles. The Printed Materials Committee of the National Council for Geographic Education has undertaken the task of publishing this booklet in the belief that it will prove to be a valuable and inexpensive addition to the geography and social studies teacher reference shelf.

INTRODUCTION

by
Hugh A Hornstein

This booklet is a substantial enlargement by the author of an article which appeared in the JOURNAL OF GEOGRAPHY, October, 1966. It is an attempt to develop a useful bibliography of some of the paperback books relating to geography.

Such an undertaking is beset with difficulties. An obvious one relates to the scope of the field of geography. So broad is the discipline, that a listing such as this cannot be exhaustive. Another problem involves a duplication of effort. For example, no attempt has been made to include in this bibliography any more than a brief sampling of the publications of the U.S. Government. Vinge and Vinge's U.S. GOVERNMENT PUBLICATIONS FOR TEACHING AND RESEARCH IN GEOGRAPHY is such an effort. The need to update the list to include the rapidly expanding variety of new titles appearing on the market daily presents another problem.

Despite these handicaps, it would seem that the increased use of the paperback book in the classroom suggests the need for a convenient listing. This is particularly so inasmuch as there is no single source from which one can gain knowledge of paperbacks available at a given time. A variety of sources, used collectively, can provide a fairly complete picture.

Certainly PAPERBACKS IN PRINT has the most extensive listing. In addition to the "Geography" listing, one may also find a number of excellent books listed under "Science" and under the subdivisions and cross references of both of these areas. Unfortunately, it does not list the publications of many of the university presses. Professional journals provide a wealth of information relative to paperbacks in their book review sections, including many of those of the university presses. Also SCHOL-
ARLY BOOKS IN AMERICA has a "Geography" section and lists almost all of the university press releases. The biweekly lists of the U.S. Government Printing Office frequently include geographic materials, most of them paperback. Finally, individual publishers often have mailing lists for their new releases and a postcard request will gain one a place on these lists.

One of the brightest spots in the area of paperbacks in geography has been the introduction of a number of series. The oldest, although not necessarily the best known of these, is that of the Department of Geography of the University of Chicago, which now numbers well over one hundred volumes. While the majority of these are narrow in scope, they are nonetheless extremely valuable.

One of the better known series is Van Nostrand's Searchlight Series. It consists of some forty (40) books, all but four or five of which are regional studies. Several of these titles deal with areas about which relatively little has been written. Prentice-Hall has two series in preparation, a FOUNDATIONS OF CULTURAL GEOGRAPHY SERIES and a FOUNDATIONS OF ECONOMIC GEOGRAPHY SERIES. The former has the greater number of offerings in print at the present time, but both series have additional books scheduled for publication in the near future. These two series include a number of volumes in areas in which to date virtually nothing is available. In addition, a third Prentice-Hall series, FOUNDATIONS OF EARTH SCIENCE SERIES, has a number of titles applicable to geography.

A wide variety of paperbacks usually not considered as geographical have a fund of geographic information. The writer still remembers the excellent geographical description of the Upper Peninsula of Michigan in ANATOMY OF A MURDER.

Finally, a number of the publications listed are now out of print and their listing so indicates. These titles are marked (op) after the listing. They have been included because many may still be found in the expanding secondhand book market.
### Agriculture

18. **The Sabi Valley Irrigation Projects.** W. Roder. University of Chicago Department of Geography, 1965. $4.00.
