AUTHOR    Luedtke, John R.
TITLE     Directory of Marine and Marine Related Information Resources at the University of Wisconsin. Part I, Reference and Referral Resources.
INSTITUTION Wisconsin Univ., Madison.
REPORT NO  WIS-SG-71-104a
PUB DATE   70
NOTE       33p.
EDRS PRICE MF-$0.65 HC-$3.29
DESCRIPTORS *Directories; Earth Science; Facilities; *Marine Biology; *Oceanology; Resource Materials; *Resources

ABSTRACT   This volume, part one of a two-volume directory, contains listings and descriptions of reference and referral resources for marine and marine-related information. These resources include the reference and referral services of the University of Wisconsin, other regional libraries and information centers, selected national oceanographic data centers, and local, regional, and selected national marine research laboratories and centers. (PR)
DIRECTORY of MARINE and MARINE-RELATED INFORMATION RESOURCES at THE UNIVERSITY of WISCONSIN

PART I. REFERENCE and REFERRAL RESOURCES
WIS-SG-71-104a
DIRECTORY OF MARINE AND MARINE RELATED INFORMATION RESOURCES AT THE UNIVERSITY OF WISCONSIN

PART I. REFERENCE AND REFERRAL RESOURCES

Public Information Report #4
WIS-SG-71-104a

THE UNIVERSITY OF WISCONSIN SEA GRANT PROGRAM
MEMORANDUM

To: All recipients of the Reference and Referral Resources section of the Directory of Marine and Marine Related Information Resources.

Subject: Your reaction.

It will be very useful for us to know your reaction to this Directory. Only through your individual critiques will we be able to fit the directory concept to your respective needs.

To what degree is the Directory useful to you?

What sections could you make use of? What ones could you not? Why?

How would you improve this Directory?

Other comments and suggestions:

Feel free to continue your comments on the other side of this page. Please return this questionnaire to the above address at your earliest convenience. Thank you for your assistance and cooperation in this effort.

INTRODUCTION
INTRODUCTION

Modern science has generated a number of important multidisciplinary fields. The information support required by such fields goes beyond that supplied by traditional library systems. This Directory of Marine and Marine Related Information Resources at the University of Wisconsin is intended to help meet this new demand in the area of oceanography, an area which involves such diverse disciplines as bacteriology, botany, engineering, geology, geophysics, meteorology, and zoology. It consolidates a wide range of information resources of use to industrial, governmental, and university personnel involved in the marine sciences.

The Directory is divided into two separate parts. PART I: REFERENCE AND REFERRAL RESOURCES contains listings and descriptions of this university's reference and referral services, other regional libraries and information centers, selected national oceanographic data centers, and local, regional, and selected national marine research laboratories and centers. PART II: LIBRARY AND FILM RESOURCES identifies and locates periodicals, indices and abstracts, bibliographies, monographs, films, and filmstrips, available within the university's library network.

Since potential user needs will vary considerably, it is felt that a two-part format will allow greater flexibility in usage. One or both parts will be distributed on a general evaluation of the recipient's requirements. Additional copies of both parts are available upon request from the University of Wisconsin Sea Grant Information Service. Because this is an exploratory effort in multidisciplinary services, changes will undoubtedly be necessary to best fulfill the Directory users' needs. A memorandum form has been included as a preface to each volume of this Directory to accommodate suggestions.

LeRoy G. Zweifel
Director
Information Services
REFERENCE AND REFERRAL SERVICES
REFERENCE AND REFERRAL SERVICES

I. University of Wisconsin

A. UNIVERSITY-INDUSTRY RESEARCH PROGRAM

Address: University-Industry Research Program
The University of Wisconsin
905 University Avenue, Room 301
Madison, Wisconsin 53706

Information Telephone: (608) 262-2021
Office Hours: 8:00-4:30 Monday thru Friday
Director: John A. Duffie

General Objectives of the Program:

The University-Industry Research Program provides convenient access for Wisconsin firms to a diversified resource of scientific, engineering, and management knowledge which can be vital to economic progress. Established by the faculty to facilitate cooperation with industry, the program draws upon the stores of information and special competences uniquely available at an educational and research center such as the University of Wisconsin.

As an activity of the Graduate School, UIR selects its staff members from pertinent academic departments with regard for their professional experience and interest in industrial areas. Acting as a catalyst, UIR draws upon the total resources of the University to provide effective assistance in industrial growth and development.

Services and Materials Provided:

Information Services; UIR publishes the Research Newsletter, which describes the work of University scientists; and
directories of the faculty and their research interests. These publications are available on request.

Research Capability; Industrially sponsored research, compatible with the University's educational responsibilities, can be arranged in many areas of mutual interest to the faculty and industry. Such cooperative research can develop knowledge useful in the industrial, scientific, and educational communities and bring beneficial ties between industry and the University's faculty members and students.

Consulting Assistance; The University faculty includes many experts in fields pertinent to industry. UIR assists in identifying individuals who can render valuable consulting services.

Special Facilities; University laboratories contain much unique experimental equipment, such as computers, analytical instruments, electron microscopes, and nuclear reactors. Industry can arrange to use this equipment as appropriate.

Examples of special facilities that can be useful to industry are the Physical Sciences Laboratory, the Spray-Drying Laboratory, the Design Engineering Laboratory and the Instrumentation Systems Center.

Continuing Education; The University, through the Graduate School and University Extension, offers a variety of credit and non-credit continuing education programs for those in industry. In cooperation with UIR, special meetings and conferences on research developments and industrial opportunities are also presented.

B. INFORMATION SERVICES DIVISION/UNIVERSITY INDUSTRY RESEARCH

Address: Information Services Division/University Industry Research
The University of Wisconsin
1324 West Dayton Street
Madison, Wisconsin 53706

Information Telephone: (608) 262-5913
Office Hours: 8:00-4:30 Monday thru Friday
Reference and Referral Services continued--

Director: LeRoy G. Zweifel

General Objectives of the Program:

To act as an information clearinghouse for Wisconsin business and industry.

Services and Materials Provided:

On site use of University materials. Quick reference service. Extensive consultation or assistance by appointment.

Location and loan of books in all University of Wisconsin (Madison campus) libraries consistent with established policies.

Location, loan or reproduction of periodicals articles from Madison campus libraries or off campus.

Use and assistance in procurement of ACE, NASA and other federal report collections.

Services are not limited to the above ... new ones are being developed to keep pace with growing needs.

For fee schedule contact ISD direct.

C. WATER RESOURCES CENTER

Address: Water Resources Center
Hydraulics and Sanitary Laboratory
University of Wisconsin
Madison, Wisconsin 53706

Information Telephone: (608) 262-3577

Office Hours: 7:45-4:30 Monday thru Friday

Administration: Gerard A. Rohlich, Director
Irving K. Fox, Associate Director
James E. Kerrigan, Assistant Director

General Objectives of the Program:

The basic purpose of the Water Resources Center is to foster a dynamic and effective water research program in the State of Wisconsin. In addition to this basic objective, the Center is to encourage the
development of strong curricula, to promote the dissemination of information, and to cooperate with extension activities related to water resources management problems, policies and programs.

Services and Materials Provided:

Water Resources Center acts as a "water information center", especially for those research and extension activities that are underway in the State of Wisconsin. A number of newsletters covering specific subjects or professional areas or regions are collected for ready reference. The Center has emphasized research on eutrophication and interdisciplinary studies having a direct relevance for policy with regard to water quality management. Several research projects related to these main areas are currently underway as well as a number of projects that address other water resource topics.

Individuals wishing to obtain general or specific information may contact the Center. If the members of the staff are unable to provide the needed information, they will assist in identifying specialists who will be qualified to help them. The University Extension services that are closely integrated with the Center are especially helpful with requests from citizen groups and individuals.

The Water Resources Reference Room, which is located in the Center, has over 5,000 documents organized into a keyword indexing and computer based retrieval system. A reference assistant is available for describing the use of the system and to assist in identifying materials of interest to the users. Documents may be used in the Reference Room or taken on short-term loan by faculty, students, and interested citizens.

D. EUTROPHICATION INFORMATION PROGRAM

Address: Eutrophication Information Program
1324 W. Dayton Street
Madison, Wisconsin 53706

Information Telephone: (608) 262-3270
Office Hours: 7:45-4:30 Monday thru Friday
Director: Dr. Gerald A. Rohlich
Objectives of the Program:

The primary goal of the Eutrophication Information Program is to serve the scientific community by expediting the exchange of information. In an attempt to achieve this goal, three interrelated functions have been established.

a. Abstracting - Pertinent articles are identified and abstracts are prepared by staff personnel with various scientific backgrounds. Abstracts are distributed via "Selected Water Resources Abstracts," a publication of the U. S. Department of the Interior, and via "Eutrophication Abstracts," a bulletin of the Eutrophication Information Program.

b. Literature reviews - The intent of this activity is to provide reviews which not only summarize research findings but also include critical assessments of results and focus attention on areas which need further study.

c. Referral service - This activity is designed to channel technical inquiries to the appropriate individuals within the University of Wisconsin such that competent assistance may be made available.

Services and Materials Provided:

A monthly bulletin, "Eutrophication Abstracts," is distributed without charge. In addition to abstracts, the bulletin contains a list of current acquisitions to the document collection. This list identifies pertinent articles from a broad spectrum of sources.

Literature reviews will be distributed periodically and a fee may be charged.

At the present time the Eutrophication Information Program is not able to provide copies of articles from the document collection; however, plans are underway to make copies available with an appropriate fee schedule.

Holdings:

As of January, 1970, approximately 1,400 specialized documents and reports were contained in the document collection.
Comments:

The Eutrophication Information Program is sponsored jointly by the Soap and Detergent Association, the U.S. Department of the Interior (Office of Water Resources Research and Federal Water Pollution Control Administration), the U.S. Department of Agriculture and the University of Wisconsin.

E. INSTRUMENTATION SYSTEMS CENTER

Address: Instrumentation Systems Center
511 Engineering Research Building
1500 Johnson Drive
Madison, Wisconsin 53706

Information Telephone: (608) 263-1552
Office Hours: 8:00-5:00 Monday thru Friday
Director: N. E. Huston

General Objectives of the Program:

Assistance in the research, development and design of instruments.

Services and Materials Provided:

Collaborative research, development, engineering, design and fabrication support for special instruments, devices and measurement techniques; instrument maintenance and repair; calibration and standardization; shop services.

Facilities include 28,000 square feet of fully equipped laboratory, office and shop space.

F. MARINE RECREATION RESOURCE DEVELOPMENT

Address: RECWAT Computerized Bibliographic Retrieval System
c/o Dr. Robert B. Ditton
University of Wisconsin-Green Bay
Green Bay, Wisconsin

Director: Robert B. Ditton
General Objectives of the Program:

The program seeks to integrate the wide variety of disciplines involved in water recreation resource planning, development, and management by means of an intensive retrieval of pertinent literature. Research literature published after January 1, 1960 has been and is continually being identified, reviewed, evaluated, and documented.

Services and Materials Provided:

The computerized bibliographic retrieval system (RECWAT) is now available as a service to investigators in this field. Using keyword inputs, an investigator can receive those bibliographic notations pertinent to his request for information. In addition to up-to-date bibliographies, a copying service makes hard copy available to users.

I. University of Wisconsin

CENTER FOR GREAT LAKES STUDIES

University of Wisconsin-Milwaukee
Milwaukee, Wisconsin 53201 (414) 228-4405

Director: C. H. Mortimer

General Purpose: To contribute, through research and education, to a better understanding of the physical, chemical, and biological processes occurring in the Great Lakes. Part of this effort is directed towards fundamental scientific research, while the remainder is devoted to present and potential resources and their utilization.

COLLEGE OF ENVIRONMENTAL SCIENCES

University of Wisconsin-Green Bay
Green Bay, Wisconsin 54301 (414) 435-3211

Coordinator of Marine Programs: Paul E. Sager

General Purpose: To provide support in a broad range of water related areas within the framework of the ecosystem, one primary area of which is that of water resources.

LABORATORY OF LIMNOLOGY

University of Wisconsin-Madison
Madison, Wisconsin 53706 (608) 262-3304

Director: Arthur D. Hasler

General Purpose: To support an integrated program of research and teaching in the fields of physical and biological limnology. Physiology of fishes, fisheries biology, effects of heated effluent water on the ecology of fishes and fish food organisms, and the ecology of
such fishes as the coho salmon, bluegill, brook trout, and walleye in Northern Wisconsin lakes and streams, are projects of major interest.

MARINE STUDIES CENTER
University of Wisconsin-Madison
1225 West Dayton Street
Madison, Wisconsin 53706
(608) 262-1585
Director: Robert A. Ragotzkie
General Purpose: To coordinate the marine related research activities on the Madison campus. These activities fall into three categories: marine science research, ocean engineering, and general studies involving social sciences aspects of marine resources.

INSTRUMENTATION SYSTEMS CENTER
