This publication deals with recreation and leisure in American society. It is stated that the greater mobility of Americans, the increased time and money available for leisure time pursuits, the higher degree of educational level with accompanying wider interests, and the changing attitudes toward the balance between work and play are having significant effects in the field of recreation. Issues and questions related to recreation are discussed. Among these are the factors changing recreational patterns, buying recreational equipment, teenage spending, factors to be considered in choosing recreation, balanced recreation, and recreation in the city and in the country. Other topics of discussion include bicycling, hosteling, automobile travel, camping, wilderness experience, camping vehicles, campsites, hobbies, and tours. It is concluded that the nation's educational institutions at all levels - local, regional and state - should renew their commitment to play a major role in developing proper attitudes concerning leisure and leisure proficiencies among students. FOREWORD

In 1967, the State Education Department published "Consumer Education - Materials for an Elective Course." This material has since been introduced into more than 400 of the New York State high schools. As a result of the interest in Consumer Education in the State and Nation, the Department has begun the preparation of a series of modules - Expanded Programs in Consumer Education. This module, The Consumer and Recreation, is one unit in the series. It is expected that other modules will be prepared in the fields of:

- Consumer Issues and Action
- The Consumer and His Health Dollar
- Beauty Products and the Consumer
- Special Problems of the Poor
- The Consumer and Transportation - Aside From the Automobile
- The Consumer Looks at Automobile Insurance
- The Consumer and His Tax Dollar
- Education and the Consumer

Unlike the original syllabus, where 12 units covering various phases of Consumer Education were bound together, the modules in Expanded Programs of Consumer Education are being prepared as separate publications to provide greater flexibility. Each of the nine modules in the series may be used as a discrete unit, or with others in the series. The nine modules may be presented as a semester or part of a semester course, or presented in conjunction with the original syllabus which covers such areas as the purchase of food; shelter; appliances; automobiles; and a consideration of credit; money management; fraud, quackery, and deception; banking and savings; life and health insurance; security programs; and consumer law.

It is hoped that the presentation of the modules as separate publications will tend toward flexibility in their use as mini-courses in such fields as social studies, business education, home economics, industrial arts, and other areas of the curriculum.

The suggestions to the teacher found in "Consumer Education - Materials for an Elective Course," pages 1-4, apply equally to each of these modules.

This material was developed and written by Hillis K. Idleman, associate in secondary curriculum development.

Gordon E. Van Hooft
Director, Division of
School Supervision
ACKNOWLEDGMENTS

Appreciation is expressed to the following individuals for their review of this module and for their helpful suggestions:

In the State Education Department —

Irving Rosenstein, associate, Bureau of Physical Education and Recreation

In the New York State Department of Parks and Recreation —

O. Reginald Brown, Director, Outdoor Recreational Planning
Ivan P. Vamos, Acting Director, Planning and Research Division
James E. Arles, Acting Deputy Commissioner

"The need for creating a greater awareness of the role of recreation in today's society is of paramount concern. There is no question that public demand in the pursuit of leisure time activities will continue to grow which will greatly increase our responsibility for providing meaningful experiences which will satisfy this need. This proposal, clearly, addresses itself to a major area of this overall responsibility—Education for Leisure. It represents one of the most positive steps which education has taken in this direction."

James E. Arles
Acting Deputy Commissioner
New York State Department of Parks and Recreation

"This is our land. These are pleasant places. Keep them. Guard them. For this land does more than nourish our bodies. It keeps pleasant places to refresh the mind, renew the spirit, rekindle faith in the knowledge that life is good."

—Montana Wildlife Federation News
INTRODUCTION

Recreation is a universal human need, but for the disadvantaged it has special importance for these reasons:

- Advantaged persons may carelessly toss away money on useless or unrewarding leisure time pursuits with no great loss; but, to those with limited money, large expenditures that bring no gratification may be calamitous.

- Many of the disadvantaged live lives of hopelessness, of apathy, of limited horizons. Learning how to get the most satisfaction from recreation can bring hope to the hopeless, joy to the apathetic, expanded opportunities and horizons to the imprisoned in spirit.

While every attempt has been made to make this material applicable to inner-city students, it has been difficult to secure material which deals specifically with the recreational problems of this group. One of the best references on how to reach such students is:

"Reaching the Fighting Gang" published by the New York City Youth Board, 79 Madison Avenue, New York, New York. $3

It is suggested that teachers working with such students secure a copy of this report which has valuable examples of recreational activities which have been effectively used. It is hoped that teachers interested in this problem will share their effective techniques with the Secondary Curriculum Development Bureau. If sufficient material is forthcoming, it might be possible to issue a supplement to this module containing examples of effective practices and resources.

A further suggestion is that all of the resources in the school and community be employed to fullest advantage. For example, the art department could give instruction in photography and making fishing flies; the music department could help in selecting appropriate instruments, in instructing in the playing of such instruments, and in listening to records; the home economics department could help with camp cookery, food purchase for outings, and selection of cooking equipment; the physical education department could assist by instructing in camping skills and other recreation skills such as fly casting, boxing, snowshoeing, skiing, roller skating, ice skating, small boat handling, water safety, archery, golf, and tennis; the science department might aid in selecting, operating, repairing, and possibly building stereo systems and quadraphonic systems; and the English department could help select appropriate periodicals and books about recreation.

Similarly, interested community members have much to offer. In each community there are those with unusual hobbies, often willing to share their interests with students. Sporting goods dealers are eager to share their knowledge. Finally, in every community there are public and private agencies concerned with recreation who are glad to help if asked.
The dictionary defines recreate: "to create anew; to restore; to refresh with games, pastimes, exercises, etc." People find many ways in which they can restore or refresh themselves. To those whose work is largely sedentary, recreation may mean exercise: bowling, swimming, skiing, skating, dancing. For those who engage in hard physical work, recreation might mean loafing in the sun, fishing, watching TV, or listening to records. For many, recreation means travel and the opportunity to see new places and people. For others, recreation implies an outlet for creative talents: sewing, painting, gardening, singing, writing.

"Recreation consists of an activity or experience, usually chosen voluntarily by the participant, either because of the immediate satisfaction to be derived from it, or because he perceives some personal or social values to be achieved by it. It is carried on in leisure time, and has no work connotations, such as study for promotion in a job. It is usually enjoyable and, when it is carried on as part of organized community or agency services, it is designed to meet constructive and socially worthwhile goals of the individual participant, the group, and society at large."

The study of this module should help students to:

- Give evidences of the growing importance of recreation and leisure time activities
- Make realistic plans for recreation based upon their individual needs and desires
- Plan a balanced recreational program
- Give evidences of having become acquainted with new types of recreation
- Recognize the recreational resources present in every area of America
- Identify sources of help in planning recreational and leisure time use
- Use the time and money devoted to recreation to better advantage

Former chairman of the Department of Health, Physical Education and Recreation, School of Education, New York University, quoted in "Philosophy of Recreation and Leisure," C. V. Mosby Co., St. Louis, Missouri
**Understanding**

ARE RECREATION AND FUN SYNONYMOUS?

- The desire to have fun is almost a compulsion for many people. About $150 billion is spent annually for entertainment; the cost is expected to rise to $250 billion by 1975.
- Despite increased expenditures some people find that while they are spending more they are enjoying life less.
- Some psychologists claim that youth rebellion is really a desire to have fun rather than what it is claimed to be — a revolt against "the establishment."
- For the child, fun is the whole purpose of life. Society has attempted to condition children to replace fun as a goal with other goals such as work or success. But some, at least, of the modern generation seem to value the lifelong pursuit of fun more than other goals.

**Suggested Pupil and Teacher Activities**

- Have the class discuss how the desire for fun has reshaped America. What new jobs have been created? What changes in travel have taken place? What changes in spending patterns are emerging?
- Discuss the following quotation: "You may find fun elsewhere — but only the fun you bring with you" (Frank Trippett).
- Discuss these quotations: "For older people, fun might be canasta. For the young, it is making a revolution" (Paul Kassner). "Fun is fighting in the streets and roasting pigs" (Abbie Hoffman).
- How does a child find fun in simple things? (splashing water, walking barefoot through mud, blowing through milk or water, chasing a butterfly)
- How does society repress these attempts at fun and insist on the child "growing up"? Should this happen?

- "The Unending Quest for Fun," Look, July 29, 1969
### UNDERSTANDINGS

**WHAT FACTORS ARE CHANGING RECREATIONAL PATTERNS?**

- Many observers of American life believe the trend is toward shortened workdays and hours with increased time for leisure and recreation.
- Fringe benefits which include the 4-day week and increased vacations are goals of labor.

### SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Have each pupil state the recreational activities he would engage in if he had a complete year of leisure time and sufficient funds.
- Have pupils ask older family members whether the hours of work and the length of vacations have changed. Report the findings to the class. (In 1900, the normal work week was 60 hours. Now it is about 39 hours.)
- Invite a labor spokesman to report on contract trends with regard to hours of employment.

### SOURCE

- U.S. Department of Labor
- AFL-CIO and other union publications
- AFL-CIO spokesman
- News releases regarding the 4-day week

"Just think, by the year 2000 they will be rationing work!"
UNDERSTANDINGS

- Coupled with the shorter work year are increased earnings so that more disposable income is available to use as desired, including use for extended leisure time opportunities.

- Other observers believe that we shall have less time for leisure than we think and that the test is going to be how well we can use the time we have. Those who hold this opinion point out that:
  - the tendency as work hours are shortened is to "moonlight," to take a second job, which actually reduces leisure time available.
  - the leisure society is a myth because more and more man-hours will be needed to provide for ever-expanding services.

- Expenditures for recreation and leisure time activities are growing rapidly.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Are there other factors besides time and money that have increased the demand for recreation? Heightened expectation as a result of almost universal TV coverage? Less fatigue as a result of labor saving devices?

- Poll parents and friends to see how many have more and how many have less leisure time. How many are employed on two jobs?

- In your own home what "expanding services" are now purchased which were formerly either not available or provided by the family? (furnace cleaning, home cleaning, laundry, instruction in sports, automobile repair, appliance repair, etc.)

- Leisure time spending of Americans rose to $80 billion in 1969. Ask pupils to discuss evidences of this spending which they see. To what degree has their spending increased during the last year?

SOURCE

- Median family income has almost doubled in 10 years. Even with inflation, buying power is up 30 percent during the last decade.

- "There'll Be Less Leisure Than You Think," Fortune Magazine, March 1970

- "Despite Inflation People Living Better," U.S. News and World Report, 2/23/70
WHY IS IT IMPORTANT TO SET UP CRITERIA FOR BUYING RECREATIONAL EQUIPMENT?

- Before making any large expenditure for recreational equipment, it is wise to establish criteria for purchasing. Among the criteria are these:
  
  - Would it be wiser to rent or borrow equipment until a continuing interest is determined? (Closets are cluttered with equipment purchased in a flush of enthusiasm for a new sport or hobby, only to find that interest later waned.)
  
  - Is this item top in spending priority or may other items or services provide more lasting satisfaction?
  
  - If a purchase is to be made, should top quality, medium quality, or low quality goods be selected?
  
  - Other factors include the possibility that the article may be outgrown (i.e., skates), that it may or may not have a trade-in value, or that it's a passing fad product.

- Check with pupils to see if any have spent (and later regretted) large sums for recreational equipment (boats, skis, minibikes, musical instruments, camping equipment). What alternatives to such expenditures are there?

Assign groups of pupils with common interests to explore alternatives in the field of their interest. For example, a group of skiers might make a project of comparing various makes of skis to determine which brands offer the best buy for novices, intermediate, and expert skiers. The same process could take place with those interested in hi-fi equipment, water skiing, "hot rodding," sewing.

Assign pupils to the job of securing authentic and reliable information about equipment in their field of interest. What agencies can provide objective help? consumer agencies? experts in the field? friends? sporting, hobby, and music equipment sales personnel?

UNDERSTANDINGS

HOW IMPORTANT IS TEENAGE SPENDING?

- Recreational spending by teenagers is big business.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Have pupils keep records of their weekly expenditures. How do the expenses compare with those of boys and girls 16-19 years of age who spent:

SOURCE

What other types of leisure and recreational spending should be included? travel? automobile expenses? costs of home entertainment? others?
UNDERSTANDINGS

CAN MONEY SPENT FOR RECREATION BE CONSIDERED AN INVESTMENT?

- The total bill for travel of Americans is over $38 billion annually, including transportation, food, lodging and vacation expenses. Six billion dollars alone is spent for travel abroad.

- Leisure spending totals more than $80 billion annually.

- Recreational costs should not be considered simply as expenses; there are values and profits from these expenditures too.

WHAT FACTORS NEED TO BE CONSIDERED IN CHOOSING RECREATION?

- Many factors need to be considered in choosing recreation. Even more important

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Make a bulletin board display of as many recreational expenditures as the class can think of. Include such items as the costs of the car when not used for business purposes, club membership fees, tickets for sporting events, costs of a swimming pool, TV's and radios, ski, boating, bowling and other sports equipment, etc.

- Consider what kind of people we would be if we spent nothing for recreation. What does the word "re-create" imply? What would happen to our friendship if we had no recreation? What would happen to us? How does recreation pay off in health, in friends, in personal development, in our outlook on life, and in our attitude toward work?

- How much time and money should be spent on recreation? Are satisfactions com-

- Recreational leaders
- Parents
UNDERSTANDINGS

than the money spent is the investment of time.

Sometimes we need to spend more time and more money to get the most out of recreation.

WHY IS A VARIETY OF RECREATIONAL INTERESTS DESIRABLE?

Varied forms of leisure can be constructive, both to allow rest and escape from routine and to reinforce the social system, teach rules and skills, improve health, etc.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- mensurate with investment? What should we expect in terms of our investment? Have we been paying too high or too low a price? How does the expenditure of time and money fit in with our other life goals? Are we building interests we can enjoy the rest of our lives?

- Invite leaders in the fields of sports, music, art, drama, etc., to discuss their fields of proficiency. Did their interest grow out of a hobby? How much time and money went into becoming proficient? Would they do it all over again? What advice do they have for the group?

- How much of your leisure activity is composed of work? (camping, chores, gardening, jobs around the house, sewing) Do you learn from these activities? Do they give you a feeling of accomplishment?

- How much of your leisure is spent in recreation? How much of this is physically active (i.e., sports and games) and how

UNDERSTANDINGS

WHAT IS BALANCED RECREATION?

- Recreation should be balanced between active and passive.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Much passive entertainment? What skills and understanding do you gain through these activities? (coordination, sportsmanship, leadership, social rules - fitting in with your group and others). Do you learn anything from playing cards, baseball, or walking in the park? If you have a younger brother or sister, how much of his or her attitudes are learned during play (recreation)?

- How much of your leisure time is spent perfecting skills, arts, hobbies, and learning things which you would like to know, like dancing and fancy diving (cultural leisure)?

- Divide the bulletin board in half. On one side list examples of active recreation; on the other side list examples of passive recreation. How can we turn passive recreation into active recreation? (Examples: when watching a football game, try to guess the next play the quarterback will call; when reading a book or watching a play, try to figure out how the

UNDERSTANDINGS

Recreation should be balanced with time for each of the following:

- Physical recreation
- Mental recreation
- Recreation apart from others

SUGGESTED PUPIL AND TEACHER ACTIVITIES

• Discuss the need for recreation involving physical activity. Make a list of activities of this type in which the class engages. What activities are most popular with boys? With girls? What types of physical activities are becoming increasingly popular in America?

• Discuss the need for recreation involving mental activity. What kinds of activities provide this mental stimulation? Why is "one man's meat another man's poison?" What can be gained from a "rap" or "buzz" session? Why is it important to talk with those who have different opinions from our own?

• Take a poll of the class but without indicating who the writers are. How many consider themselves "loners" and feel happiest apart from others? How many are "joiners" and feel

SOURCE

"The relationship of regular periods of physical activity to health is clearly established. The control of obesity and diabetes, the possible prevention, delay, or reduction of severity of heart disease and other degenerative processes, the rehabilitation of injured or damaged limbs and muscles, all of which may be considered present or future problems of youth, are related to adequate amounts of appropriate exercise." J. Rosewell Gallagher, M.D., chairman, American Medical Association's Committee on Physical Fitness
UNDERSTANDINGS

- Recreation with others

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- What are the values of solitary recreation? (Time to think over the day and plan for the future? Time to enjoy nature or music or art? Time to daydream undisturbed?)

- Is it true that "people need people"? What happens to the behavior of people who are entirely alone? Is it possible to heighten the joy of an experience because it is shared? Have the class give examples to prove their contentions regarding these matters.

- How many students belong to clubs? to gangs? to church or community groups? What values does such membership have?

- Discuss the charge that America has become a nation of sport spectators instead of sport participants. Is this true? If so, is it harmful? Should 40 million Americans be watching a championship prizefight or

WHERE CAN RECREATIONAL OPPORTUNITIES BE FOUND?

- Opportunities for recreation abound everywhere. Those who say "there is nothing to do" might consider the many possibilities offered.

WHAT DOES THE CITY OFFER IN RECREATION?

- Many people are drawn to the city by the hope of finding more interesting things to do, more fun, more recreation.
- The city offers many opportunities for recreation: playgrounds for basketball, baseball; rinks for roller and ice skating; TV stations; zoos;
- Make a survey of recreational opportunities in the community or area of the city in which the school is located. Consider the offerings of:
  - churches, schools YMCA's & YWCA's, Boys' Clubs, police athletic leagues, community centers, social groups, parks, museums, etc.
- Discuss the quotation from a popular song of some years ago: "How you gonna keep them down on the farm after they've seen Paree?" (Paris) What are the attractions a big city offers in the way of recreational opportunities? Is it true that the city is "where the action is"? Conversely, is it possible to find as many outlets for fun in the country?
- Have each student list the attractions of the city in which he lives or a city with which he is familiar. Have the attractions listed in the order of interest to the

- The Big Sisters, Inc., 135 East 22d St., New York, N.Y. 10010 (Plans for field trips for small groups of children to places of interest in the city. Pays for private camps to take children for summer vacations)
UNDERSTANDINGS

Even in a crowded city some space is available for outside games and sports: softball, shuffleboard, sliding on the snow, flying a kite, taking a swim, having a picnic.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Industry such as garment workers, jewelry stores, leather shops, fish markets, wholesale produce; zoos; museums; historical places; botanical gardens; planetariums; theaters, construction projects.

- Water-oriented recreation activities are frequently available to city dwellers. Are there places nearby which rent rowboats? boats with motors? canoes? Are there pools for swimming? Where are they located? What is the cost?

- A high proportion of young people fish for entertainment. Where are there good places to fish nearby? What kind of fish can be caught? Are there any "charter" fishing boats available? How much do they cost?

- What facilities are available for other outside sports in the town or city in which the students live? Should additional facilities be provided? What kinds? Would the taxpayers be willing to pay for these additional facilities?

"Physical Fitness Elements In Recreation: Suggestions for Community Programs," President's Council on Physical Fitness and Sports, Washington, D.C. 20202

American Association for Health, Physical Education and Recreation, 1201 16th St., N.W., Washington, D.C. 20036
**UNDERSTANDINGS**

**WHAT DOES THE COUNTRY OFFER IN RECREATION?**

- Country areas provide other types of recreation. New York provides an extensive system of park areas for camping, swimming, hiking, fishing, and cooking over an open fire.

- Group camping provides an opportunity to initiate urban youth to the joys of the outdoors without the fears and apprehensions attendant upon the first solo experience in the woods.

- New York State is increasingly setting aside wilderness areas which are to remain "forever wild."

- On the other hand, private and commercial interests seek to develop unimproved land. The conflict between these interests is apparent at each session of the Legislature.

**SUGGESTED PUPIL AND TEACHER ACTIVITIES**

- Secure from the State Office of Parks and Recreation a map of such areas. What areas are within a 50 mile range? What facilities does each provide? What are the major rules and regulations for use of these parks? What fees, if any, are charged?

- Investigate the possibilities of group camping. Does the local community center run a group camping program? What is the cost? How does this cost compare with renting a private campsite? Is leadership furnished? What are the rules? What facilities are available?

- Controversies arise when attempts are made to increase State holdings of wilderness areas. On the one hand an increasing population and an increasing desire to get away from civilization create a demand for such land use. On the other hand are those opposed to further use of tax money to develop wilderness areas, and those who would like

suggested pupil and teacher activities

to develop the areas for private recreational use or commercial use. What is the attitude of students toward this controversy?

source

while the city continues to attract residents, there is a counter movement away from the city to escape the problems of congestion, pollution, crime, and high tax rates.

how do the attractions of the country — room to hike, ski, skate, snowmobile, garden, picnic — weigh against the attractions of the city so far as class members are concerned?

"farm & ranch vacation guide," usa & canada farm vacations & holidays inc., 36 east 57th st., new york, n.y. 10022
UNDERSTANDINGS

- Many people look forward either to moving to the country or to having a second house in the country.

WHAT DOES BICYCLING HAVE TO OFFER?

- Bicycling, popular in the late 1800's and early 1900's, is returning to favor both for country and city dwellers.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- What are some of the pleasures of country living? What are the disadvantages?

- Why is it that over 60 million Americans ranging in age from small children to oldsters find pleasure in peddling their bicycles? What are the advantages of cycling? the disadvantages?

- Discuss the use of a bicycle as a spring-to-fall transportation alternative. Is it possible that a bicycle may be the fastest way to get through city traffic?

- Investigate the costs for bicycles. What is the range of price from low to high? What is the average price? What features do high-priced bicycles have? How important are these features?

- The longest bikeway in the United States is one in Wisconsin that runs for 320 miles from the Mississippi to Lake Michigan. What bikeways are in your area? What additional ones are needed?

SOURCE

- "Buy A Vacation Place All Your Own?" Changing Times, August 1971, Kiplinger Magazine, 1720 H St., N.W., Washington, D.C.

- Bicycle shop Discount house
UNDERSTANDINGS

- Bike trails and bike paths are special roads from which cars are barred.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- What bike trails and bike paths are in your area? Should others be built? Should the shopping centers of inner cities be closed to automobiles and open only to bicyclists and pedestrians?

WHAT DOES HOSTELING OFFER?

- Hosteling (organized trip-taking by bicycle, hiking, skiing, canoeing, riding horseback, or other inexpensive means) is rapidly growing in popularity throughout the world.

- Investigate the growth of the hosteling movement. What routes are laid out in the area served by the school? In the State of New York? How far does the average hosteler travel in a day? Is hosteling limited to young people? What are the lower age limits? What are the advantages of hosteling? the disadvantages? About what would a night's lodging cost? How are meals prepared? Are hostelers supervised? What facilities are offered?

- To what type of person would hosteling appeal? What types of people might not enjoy it?

- The average hosteler hikes or rides 35 miles per day.

- The average hosteler hikes or rides 35 miles per day.

- Hostelers must be 15 in the United States; 16 in Hawaii; and 17 for trips in Europe, Japan, the Caribbean, and Mexico.

- Charges for a night's lodging run from $1-$2.

- Hostelers prepare their own meals.

- Houseparents supervise hostelers.

- Facilities may consist of anything from a crude shelter, to a barn, an inn, a house, or a

SOURCE

- American Youth Hostels, 20 West 17th St., New York, N.Y.

- Canadian Youth Hostels, 86 Scollard St., Toronto, Canada

- The average hosteler hikes or rides 35 miles per day.

- Hostelers must be 15 in the United States; 16 in Hawaii; and 17 for trips in Europe, Japan, the Caribbean, and Mexico.

- Charges for a night's lodging run from $1-$2.

- Hostelers prepare their own meals.

- Houseparents supervise hostelers.

- Facilities may consist of anything from a crude shelter, to a barn, an inn, a house, or a
UNDERSTANDINGS

- Organized trips led by a trained leader are available in this country and abroad.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Investigate the different types of hosteling trips offered within the United States and abroad.

- Originally hostlers provided all their own transportation. How are trips to foreign lands arranged now?

- What might be the desirable outcomes of a hosteling trip?

SOURCE

- Guides are provided.

- The cost of an organized trip ranges from $240 to $1195. Guides are provided.

- In addition to hiking and cycling, hostlers now travel by boat, train, or other public transportation.

HOW HAS THE AUTOMOBILE CHANGED RECREATIONAL PATTERNS?

- Automobile travel is the great American sport. Trips of 400-500 miles a day are easily accomplished on super-highways.

- There are some Americans whose only home is a travel bus, van, or trailer. Some choose this way of life out of preference and some out of necessity.

- Truly mobile homes are changing the patterns of living for many Americans.

- What are some of the advantages of automobile travel as contrasted to travel by train, bus, or plane?

- What are the advantages of "living on rubber"? What advantages would truly mobile homes provide for older people? migrant workers? construction people?

- Four hundred thousand camper trailers, buses, and vans are sold each year, and the number produced is increasing rapidly.

- What effect would a large migrant population have on a community in the form of taxes, businesses, schools, churches?
UNDERSTANDINGS

Costs of automobile travel vary depending on many factors.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

What factors might increase or decrease costs of automobile travel? (make of car, miles driven, speed, type of lodging and meals selected, area of country)

Assuming the AAA figures are reasonable ($39.50 a day for two persons), what percent or dollar amount might go for these items?

- Lodging
- Meals
- Gas and oil
- Tips and miscellaneous

Have class members compare these estimated costs with actual family expenditures on a recent trip.

HOW CAN AUTOMOBILE TRAVEL BE MADE LESS EXPENSIVE?

It is possible to stretch the vacation dollar by careful planning.

Have the class develop tips on how to save money when traveling. (Suggestions:

- If staying in motels, make reservations in advance to be sure of an accommodation.
- Stop early enough to find accommodations at a price you can afford.
- Avoid tourist traps.

SOURCE

The American Automobile Association estimates average costs for two people en route by passenger car as $39.50 per day, including food, lodging, and gasoline.

"This Year, Take A Different Vacation," Changing Times, June 1971, Kiplinger Magazine, 1729 H St., N.W., Washington, D.C. 20006

UNDERSTANDINGS

WHAT DOES CAMPING HAVE TO OFFER?

Camping is one of the most popular activities in America. Nearly 50 million Americans go camping each year.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Use Mobil and other tour guides which list inexpensive accommodations.
- Use tourist homes instead of expensive motels or hotels.
- Avoid peak travel seasons when prices are high.

- Explain: "Camping has become a national way of life." What are the implications of this "way of life" on:
  - the recreational patterns of America?
  - industry?
  - park planners?

- Have the class exchange camping experiences. What are the disappointments? the satisfactions? the costs? What suggestions do pupils have for making camping possible for more Americans?

SOURCE

- "Foresights on Campsites," Everybody's Money, CUNA International, P.O. Box 431, Madison, Wisc. 53701
- National Recreation and Park Association
- The camping industry has grown 500 percent in the past 10 years.
- Sales of camping vehicles have increased from $213 million in 1961 to $1 billion in 1970.
UNDERSTANDINGS

The majority of campers travel by car but some travel on foot, some by canoe, bicycle, on horseback, or by airplane.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

What types of camping experience have class members experienced? Have members describe those that:
- cost the least
- cost the most
- were the most unusual
- were the most fun

SOURCE

**UNDERSTANDINGS**

. Camping is attractive for many reasons

**SUGGESTED PUPIL AND TEACHER ACTIVITIES**

. List the reasons for the popularity of camping. Which comes first: the fact that it is inexpensive? the desire to get close to nature? the desire for change? the desire to get away from civilization? other? Illustrate in the form of cartoons the various reasons for camping.

**SOURCE**

*Letchworth State Park*
**UNDERSTANDINGS**

**WHAT TYPES OF CAMPING ARE AVAILABLE?**

- Camping is carried on in many ways, ranging from day camping on school or park lands in a city to trips into rugged wilderness areas.

- Family camping has been growing rapidly in popularity as an enjoyable and inexpensive form of family fun.

- Camping activities provide opportunities for the handicapped.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- lake or ocean bottoms? sailors of open whale-boats? canoeists of isolated lakes? trekkers of the wilderness? Ask them to share their experiences with the class.

- What are the joys of testing one's strength and skill against nature? Does such an experience build understanding and compassion? develop responsibility? tend toward better understanding of oneself? What precautions need to be taken?

- Consider a situation where participants must survive with a sheet of plastic for shelter, a cup, a knife, some string, and a few matches. How might food be secured? How could a person keep warm? How close to these conditions have class members come on camping expeditions? What are the reactions of those who have "roughed it" in wilderness areas?

- Organizations such as Outward Bound provide opportunities to come face-to-face with the wilderness. After being trained in survival techniques, each participant spends 4 days and 3 nights in solitude with minimum equipment.

- Other agencies such as the Boy Scouts of America provide similar training.

SOURCE

- Five Outward Bound Schools in Maine, North Carolina, Minnesota, Colorado, and Oregon enroll about 3,000 youngsters and adults in a survival course each year. Write Joshua Miner, 10 Wheeler St., Andover, Mass. 01810
UNDERSTANDINGS

WHAT CHANGES ARE TAKING PLACE IN CAMPING EQUIPMENT?

- The trend in camping is away from the simple pup tent to more luxurious quarters, often in the form of vehicles that can be transported from one site to another.

WHAT TYPES OF CAMPING VEHICLES ARE AVAILABLE?

- There are five basic types of camping vehicles: folding campers, pickup bodies, travel trailers, converted vans, motor homes.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Have pupils visit a camping vehicle equipment dealer. What is the minimum price for the most essential camping outfit? What are the prices of the most popular camping equipment items?

- Visit a travel show to inspect the various types of vehicles. Determine the features each offers within specific price ranges.

- Consult use-test information for engineer test results of camping vehicles.

- Consider first in importance whether the camper will fit family needs.

- What considerations should be determined in terms of family needs? number and ages of persons in family or group who will be using the camper? price? features available? safety?

SOURCE

- Invite an authority on camping or a camping vehicle equipment dealer to visit the class to discuss changes in Americans' selection of such equipment. One dealer reports a range from $699 for a fold-down, self-contained camp vehicle to $15,000 for a completely equipped vehicle.

- Travel show

- "Recreational Vehicle Owner Survey," O'Hare Office Center North, 2720 Des Plaines Ave., Des Plaines, Ill. 60018

- Travel Trailer Magazine, Woodall Publishing, 500 Hyacinth Pl., Highland Park, Ill. 60035

UNDERSTANDINGS

- Folding campers, sometimes called tent trailers, are the least expensive, most compact, and least luxurious of camping vehicles. Usually they consist of a collapsible tent mounted on a small trailer.

- Pickup bodies are essentially of two types: one is a portable camper that can be bolted on a truck body for occasional use; the second is a camper built permanently on a truck frame. Usually the latter is more expensive and larger than the former.

- Travel trailers are portable homes on wheels. They are usually equipped with a stove, oven, sink, closets, cupboards, toilet, a dinette, and bunk beds. Prices range from $1,000-$10,000 or more.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- What are the advantages of a rigid-body camper over a folding camper? Which is apt to provide more room? What is the comparative cost of each? Which would provide greater flexibility in use? What is the price for a truck to transport a pickup body and the cost for the camper itself?

- Manufacturers advertise a travel vehicle in terms of the number of people it will sleep. Check sleeping space of one or more travel trailers. Would sleeping space accommodate as many adults as advertised? Or does a "four sleeper" really mean two adults and two children? How much eating space is there? How much room for food preparation? Is heating provided for cold weather? Air conditioning for hot weather?

- For what types of camping and what size family might a folding camper be most satisfactory? What are the principal advantages and disadvantages? What is the price range for this type?

SOURCE

"Trailer Topics Magazine," 28 East Jackson Blvd., Chicago, Ill. 60604
### UNDERSTANDINGS

- Converted vans are van-type vehicles that are adapted either by the manufacturer or the owner for camping purposes.

- Motor homes are the elite travel vehicles. These are self-propelled vehicles featuring all the comforts of a modern house. The average 21-foot motor home costs more than $10,000; prices range as high as $35,000.

- Wise shoppers rent or borrow camping vehicles to see whether the features desired are adequate for comfortable mobile activities.

### SUGGESTED PUPIL AND TEACHER ACTIVITIES

- What are the advantages and disadvantages of a van-type camping vehicle? Is space adequate? Would gas mileage be better than with a travel trailer? Would fees be lower on throughways? Could the converted van be used as a regular car when not in use as a camper?

- Under what circumstances would the purchase of an expensive motor home be justified? Assuming a useful life of 10 years and interest on money invested at 6 percent, what would be the annual costs for these items on a $10,000 vehicle whether it were used or not?

- Check prices for rental of camping or mobile home equipment. Why is it wise to try out a vehicle before purchasing it? What types of problems might arise if a vehicle were purchased without prior trial?

- On a map locate private campsites in the area. Is there a shortage of such sites? What is the usual fee charged? What services are available? Are reservations needed?

- More than 425,000 private campsites are available for rent in America.

- The usual fee is $2-$5 a night. Costs for a year's rent may run from $100-$600 or more.

### ARE AN ADEQUATE NUMBER OF CAMPSITES AVAILABLE?

- So great is the desire to camp that public parks are unable to handle the traffic. A flourishing industry in renting private campsites has developed.

### SOURCE

"A Redbook Guide to Family Camping," Redbook Travel Department, 230 Park Ave., New York, N.Y. 10017

Camping equipment dealers' showrooms
**UNDERSTANDINGS**

- Both public and private campsites increasingly provide services such as water, fireplaces, and toilets. Some provide electricity and sewage hookups for trailers.

- With the growing popularity of camping, some public areas have become so crowded that they have been described as "wall-to-wall tents."

**SUGGESTED PUPIL AND TEACHER ACTIVITIES**

- Consider the problem of providing sufficient camp space for all Americans who wish to enjoy the sport. Should additional places be provided at public expense? Is this a proper charge against all taxpayers?

- Investigate the adequacy of camping facilities in your area. Are there sufficient public areas? If not, should other areas be provided at public expense? Should private operators be encouraged to develop land for public use at a fee?

**SOURCE**

American Association for Health, Physical Education and Recreation, Council on Outdoor Education and Camping, College of Education, Michigan State University, East Lansing, Mich. 48823

The boom in camping has created enormous problems for many of America's public parks, operated by the Federal, State, and local governments. The National Park Service, for instance, registered in excess of 175 million visits by individuals last year - counting some people several times as they entered and reentered one or more parks.

"I've heard about wall-to-wall rugs but not wall-to-wall camping! "

---

**Image Description:**

- A drawing of a forest with trees and small huts, resembling a camping scene.

---

**Note:**

- The image contains a cartouche with the text "ERIC," which is likely a reference to the Educational Resources Information Center, a database for educational materials.
**UNDERSTANDINGS**

**WHAT PLACE DO HOBBIES HAVE IN THE RECREATIONAL PICTURE?**

- Hobbies can be both pleasant and profitable. Many people who have taken up a hobby simply for pleasure have learned to profit from their interest. Eight hundred million dollars are spent each year for the purchase of materials and instructions to pursue hobbies.

- Many of today's hobbies are highly sophisticated.

**SUGGESTED PUPIL AND TEACHER ACTIVITIES**

- Make a list of the hobbies enjoyed by the classes. Have each person illustrate his hobby by a drawing, sketch, cartoon, or clipping.

- What opportunities are open to hobbyists to capitalize on their skills? (For example, can the products be sold? Can the hobbyist act as an agent or salesman for a manufacturer? Is there a market for his skills as a lecturer? Is there a market for his ability as a repairer?)

- List some of the more complex hobbies. (For example: model airplane and rocket making, rug hooking, painting, jewelry making, making of artificial flowers, electronics, astronomy, mineralogy, geology) What skills are required?

**WHAT ARE THE IMPLICATIONS OF INCREASED TRAVEL?**

- America is a mobile nation; the degree of mobility increases each year. In 1900, Americans traveled an average of 500 miles per year. By 1960, the average increased to 5,000 miles per year.

**SOURCE**

- Camp Fire Girls, Inc., 65 Worth St., New York, N.Y.

### UNDERSTANDINGS

- Over half spent $400 or more
- About half returned to a vacation spot they had visited before

How do these figures compare with the travel experiences of pupils’ families?

### WHERE CAN HELP BE OBTAINED TO MAKE TRAVEL PLEASANT?

- A number of agencies provide free or inexpensive help in planning trips.
- Investigate the cost and service provided by American Express, American Automobile Association, and other agencies of this kind. What help is available in planning a trip? What other services are provided? (trip planning, insurance, emergency towing service, etc.)
- Visit a travel agency. Look at the brochures available. What types of trips are available? What kinds of transportation are used? How can a travel agent provide free service and advice to travelers?

### SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Investigate the cost and service provided by American Express, American Automobile Association, and other agencies of this kind. What help is available in planning a trip? What other services are provided? (trip planning, insurance, emergency towing service, etc.)
- Visit a travel agency. Look at the brochures available. What types of trips are available? What kinds of transportation are used? How can a travel agent provide free service and advice to travelers?

### SOURCE

- American Automobile Association
- National gasoline companies
- Travel agencies
- State and local recreational agencies
- N.Y. State Conservation Department
- New York State Parks and Recreation Department
- New York State Department of Commerce
- National Park Service
- Local travel agency
- "The Travel Agent and You," Better Business Bureau of Metropolitan New York, 220 Church St., New York, N.Y. 10013
UNDERSTANDINGS

Not all travel agent's services are free; for those services for which he is not paid by some other agency, he must charge a fee.

Most travel agents are appointed by transportation carriers to issue tickets and officially represent the carriers. Among the carriers are the following official agencies:

- Air Traffic Conference of America
- International Air Transport Association
- Trans Pacific Passenger Conference
- Rail Travel Promotion Agency

Who pays the cost of the services? Although another agency may initially pay for the travel agent's service, who pays for it ultimately? Is it a good "buy" to use these services?

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Ask the travel agent what services he provides free of charge and what he charges for. Does he charge for railroad ticket reservations? special services? If so, why?
- Have the travel agent describe his services. Does he:
  - arrange transportation by air, steamship, cruise, bus, rail?
  - arrange for car rental?
  - arrange for car purchase abroad?
  - prepare individual itineraries?
  - arrange for personally conducted tours?
  - sell prepared package tours?
  - arrange for hotels, motels, and resort accommodations?
  - arrange for meals? sightseeing?
  - arrange for transfers of passengers between terminals and hotels?
  - arrange for tickets to theaters and festivals?

SOURCE

Travel agent
UNDERSTANDINGS

- Although travel agents provide a valuable service, it is sometimes more economical to plan a trip yourself.

- In addition to travel agents, there are a number of sources of help for travelers planning vacations.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- What are the possible disadvantages of using a travel agent's services? (Since the agent gets a commission from hotels and motels, individuals making their own arrangements may be able to secure lower rates. A further disadvantage is that the travel agent may be unwilling or unable to plan unusual, individual, "off beat" or low-cost vacations.)

- Investigate the following sources of help and report to the class on services provided by:
  - local Chambers of Commerce
  - State recreational agencies
  - Hotel and Motel Red Book
  - American Automobile Tour Book
  - Free reservation services of such hotel chains as Howard Johnson's, Holiday Inn of America
  - American Express
  - State and local tourism bureaus
  - Greyhound Highway Tours, 130 South Canal St., Chicago, Ill. 60606
  - Grey Line Sight Seeing Companies Associated, One

SOURCE

WHAT DIFFERENT TYPES OF TOURS ARE AVAILABLE?

- There are many types of tours: those independently arranged, package tours, group tours, cruises, weekend excursions, and charter flights.

- Independently arranged tours are those planned by individuals to meet their own needs.

- A package tour is one designed to fit the desires of a wide variety of travelers. Many such tours cater to the desires of special interest groups such as sun worshippers, skiers, art lovers. The cost, terms, and conditions of the tour are outlined in a brochure.

- Group tours consist of a number of people traveling together who are members of a club, business, professional, or other affiliated group.

- Travelers can, of course, plan their own tours and trips. Many, however, have arrangements made by a travel agent. Compare experiences of those in the community who have used a travel agent's services and those who did not.

- For those who used a travel agent's services:
  - Were the arrangements satisfactory?
  - Could the individual have made the same arrangements?
  - Would it have been more or less costly for the individual to arrange this trip?

- For those who did not use a travel agent:
  - How were reservations and other arrangements made?
  - What difficulties, if any, were encountered?
  - In planning another trip, would the individuals plan the trip themselves or use a travel agent's services?

**SUGGESTED PUPIL AND TEACHER ACTIVITIES**

- Fellow pupils, if any, who have traveled
- Members of the community who have traveled
- Travel agent
- Member of a charter group
UNDERSTANDINGS

- Usually there are savings in the form of a quantity discount rate for people traveling together as a group.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Role play a situation in which one class member, with the aid of attractive travel brochures, acts as a travel agent to sell the class a low-cost tour.

- Role play a situation in which those who have "taken" the low-cost tour describe their experiences. Remember that the advertisements

SOURCE

"There are many reputable and experienced agencies that make up tours. Unfortunately, there are also travel agencies of dubious qualifications. The uninitiated find it difficult to tell a good tour from a poor one until it's too late. Many of the marginal operators, having no reputation to sell, rely on price to pull in customers, and their product suffers. Your best guide to a tour or firm is the recommendation of someone who has used it before and liked it. If for any reason you must deal with an agent unknown to you, be sure to learn all the conditions, especially those covering cancellation. There are several methods used by operators to shave tour costs."

Time-Life Book of Family Finance

- Cruises with optional shore excursions using the ship as a floating hotel are often offered as package trips.

- Sometimes it is true that a place that is advertised at a low rate is a bargain. It might be that one
Advertisements usually feature minimum rates with limited facilities available at the quoted price. of vacation spots are meant to sell holidays. All the glamorous descriptions would lead us to believe that the place is filled with beautiful women and handsome men, that fun goes on 24 hours a day, that the meals are a Ron...1 banquet, that the sun shines every day, that bathing in a pool or the ocean is only steps from the hotel. The actual situation may be quite different.

"It's the overhead that gets me!"

operator is trying to drum up trade in an off season and offers good bargains to keep his place full and his staff busy. Or he might be exceptionally efficient, or it might be that one tour operator bargained for and got better air-charter rates. Chances are, however, that the cheaper place is less expensive because its buildings are not new, its food not so good, or its services poorer than another place that charges more.
UNDERSTANDINGS

- Weekend excursions by boat, bus, train, or plane have become increasingly popular but are sometimes disappointing. That is not to say that the advertisements are untrue. More likely it is what is not said that we need to know. Or we may need to read the fine print to see all the exceptions. A good rule to follow is that if information is not given we had better check it.

- The total price of a holiday tour may be considerably more than the quoted "come on" price featured in big letters.

- It is easy to be fooled by prices quoted for holiday tours. Usually the basic price covers travel to and from a central point, sleeping accommodations, and two or three meals a day.

SUGGESTED PUPIL AND TEACHER ACTIVITIES

- Put on a skit where a group of travelers describe what they really found on tours which advertise such phrases as:
  - "A quiet hotel"
  - "In the heart of the city"
  - "On the water"
  - "Delightful annex"
  - "Snug hideaway"
  - "7-day holiday"
  - "Luxurious hotel"
  - "Convenient airport"
  - "Artist's impression of the hotel"

- Investigate what the rock-bottom price really means. Does it mean the price for:
  - off-season tours?
  - multiple occupancy rooms? (as many as four in a room)
  - room only without meals?

- Does the rock-bottom price mean the traveler has to:
  - pay ground transportation charges to and from the resort?
  - pay tips?
  - pay extra for a private bath?
  - stay in an out-of-the-way annex?
  - pay for baggage handling?

"Bonanza, U.S.A."
Weisinger, Mort.
(lists a variety of items we may get free, including travel brochures, maps, pictures, films, etc.)
About 42 per cent of all travelers visit relatives or friends; on pure pleasure trips.

About 55 per cent of Americans take vacation trips; some 45 per cent stay at home.

More than 85 percent of those who travel go by automobile.

More than two thirds of all vacationers making trips within the U.S. travel 1,000 miles or more.

Only four per cent of all trips take the traveler outside the U.S. but still the total going to other countries is about 21 million.

FAMILY FINANCE (c) 1969 Time Inc., Time-Life Books.
WHAT ABOUT THE ORGANIZATION OF RECREATION AND ITS FINANCIAL SUPPORT?

Almost everything in life has a price tag. So it is with recreation. The parks, playgrounds, youth centers, wilderness areas, beaches, bike trails, municipal theaters (and the programs run in these facilities) cost money. If we are to have the kinds of recreational opportunities we need and want, recreation must be supported, largely at taxpayers' expense.

Invite local officials, such as the director of parks and recreation, director of city planning, mayor, aldermen, city councilmen, State representatives, town supervisor, to discuss these questions:

- What recreational facilities are present?
- What additional recreational facilities are needed?
- What plans are there to develop these facilities?
- What will the anticipated cost be?

If possible, find taxpayers groups or other opponents of proposed recreational developments. What are their objections to planned developments?

Equally as important as money is long range planning. The facilities this generation enjoys were largely planned and developed by those of a previous generation. Among them are:

- Central Park
- Van Cortlandt Park
- Blue Mountain Reservation
- Mohansic State Park
- Ward Pound Ridge Reservation

Using a State map, have pupils locate the parks listed. List other parks and recreational areas in your community and locate these on a map.

Each generation has planned facilities to give the next generation a chance for recreation. With this thought in mind, what additional or improved recreational facilities do your pupils...

UNDERSTANDINGS

Pelham Bay Park
Cazenovia Park
Niagara Reservation
LaSalle Park
Lincoln Park
Palisades Interstate Park
Onondaga Park
Genesee Valley Park
Beaver Island State Park
Taconic Park
Thousand Island Park
Macomb Reservation
Robert Moses Park

SUGGESTED PUPIL AND TEACHER ACTIVITIES

feel are needed for the next generation on:
- the local scene?
- the area scene?
- the State scene?
- the national scene?

SOURCE

- How willing would pupils now in school be to support additional recreational opportunities if each has to pay a share of the tax load?

- Do pupils feel that the local community or the State as a whole should provide recreational opportunities or should those who use these facilities pay part or all of the cost? Why?
SUMMARY AND CHALLENGE

There are a number of reasons why recreation is growing in importance as an industry, as a major consumer expense, and as a recognized need of individuals. We all need the adventure, creativity, change, and refreshment that recreation provides. The growing number of people in America and the lack of adequate facilities make it increasingly difficult to provide the space and challenging experiences of a recreational nature to meet the needs of all.

The greater mobility of Americans, the increased time and money available for leisure time pursuits, the higher degrees of education level with accompanying wider interests, and the changing attitudes toward the balance between work and play are having significant effects in the field of recreation. Prudent consumers will want to budget reasonable sums for recreation, design well-balanced programs of leisure time use, and participate in extensive planning to realize optimum utilization of recreational resources.

"Fruitful use of increased leisure is one of the greatest challenges facing the American society." Arnold Toynbee

The High Priority Recommendation of the White House Conference on Children - 1970 - stated:

"The nation's educational institutions at all levels - local, regional and state - should renew their commitment to play a major role in developing proper attitude concerning leisure and leisure proficiencies among students.

- "Implement meaningful curricular programs that stress the development of a wholesome attitude toward the importance of leisure.

- "Encourage a wide range of curricular activities which challenge the interest of all students, help develop lifelong proficiencies, and include both passive and active, structured and unstructured leisure programs."
