ABSTRACT

This quarterly publication announces the availability of instructional materials acquired and processed by the Educational Resources Information Center (ERIC) Clearinghouse on Vocational and Technical Education. It should be of particular interest to teachers, curriculum specialists, supervisors, and administrators involved in curriculum development or the use of instructional materials in the teaching-learning setting. Each abstract, a condensation of the report in about 200 words, usually includes the means used to develop the material, the setting for use of the material, and source of available copies. Author, subject, and document number indexes provide entry to the abstracts. Most of the documents which have not been announced in "Research in Education" are available as a separate microfiche set from the ERIC Document Reproduction Service as ED 063 502. Others are available from the source identified in the abstract. (CD)

The Center is comprehensive in its commitment and responsibility, multidisciplinary in its approach and interinstitutional in its program.

The Center's mission is to strengthen the capacity of state educational systems to provide effective occupational education programs consistent with the individual needs and manpower requirements by:

- Conducting research and development to fill voids in existing knowledge and to develop methods for applying knowledge.
- Programmatic focus on state leadership development, vocational teacher education, curriculum, vocational choice and adjustment.
- Stimulating and strengthening the capacity of other agencies and institutions to create durable solutions to significant problems.

PREFACE

Finding and using relevant information frequently is a major task for curriculum specialists, teachers, administrators, and students. The Center for Vocational and Technical Education is dedicated to making useful and vital information accessible so that educators may use it to improve school practice.

The Center quarterly assembles, under one cover, instructional materials relevant to the field of vocational-technical education. Abstracts of Instructional Materials in Vocational and Technical Education (AIM) is presented in the form of collections of abstracts of documents from all areas within this field.

AIM abstracts are designed especially for teacher or student classroom usage. The current information provided will also benefit educators directly related to classroom instruction and all who need access to contemporary instructional materials development.

We are indebted to our colleagues within the profession for providing us instructional materials as they become available. We also appreciate the contributions of instructional materials laboratories, local school systems and professional associations such as the Vocational Instructional Materials (VIM) section of the American Vocational Association. Members of the profession are continually encouraged to forward instructional materials for possible inclusion in future issues of AIM to the Acquisitions Specialist at The Center.

We hope that this publication will prove valuable to you in your particular educational endeavors.

INTRODUCTION

This volume of AIM (Abstracts of Instructional Materials in Vocational and Technical Education) has two major sections: resumes containing abstracts and indexes.

Each abstract presents information about a document's content to help you to decide if you want to read the full text of the document. The abstract is part of the resume which provides information about the document, its source and availability. Abstracts are arranged in ascending VT-number order. A sample resume, following this Introduction, is explained in detail.

The indexes help you to locate the abstracts by page numbers and VT numbers. These indexes are: Subject Index, Author Index and Conversion of Document Number Index. Index terms used in the subject index are ERIC descriptors. Each document has been assigned several of these descriptors; therefore, each document title appears in the subject index several times.

The full texts of documents are available from the original sources or from the ERIC Document Reproduction Service (EDRS) as microfiche or xerox reproductions. Ordering information for AIM and EDRS reproductions is provided in a following section.
