This bibliography provides annotated listings of the publications of the Bureau of Labor Statistics and its 10 regional offices. Publications are organized into 37 subject areas covering various aspects of employment and the labor market. Instructions are provided for obtaining publications, including out-of-print documents available through the National Technical Information Service. (BH)

Publications of the

BUREAU OF LABOR STATISTICS

July-December 1971

GENERAL

Explores a procedure known as "compromise settlement agreements" used by insurance companies to settle industrial injury cases. Findings based on study of a random sample of cases from files of Texas Industrial Accident Board for fiscal year ending August 31, 1967.

A Biologist's View. By Barry Commoner, Director, Center for the Biology of Natural Systems, Washington University. pp. 3-13; also Reprint 2768.

Theme indicates that substitution of synthetic for natural products has hastened pollution of the water, the air, and the soil.

An Economist's View. By Walter W. Heller, Regents' Professor of Economics, University of Minnesota. pp. 14-21; also Reprint 2769.

Heller suggests use of the price system to raise the cost of pollution and spur technology to curb it.

Historical volume of major statistical series produced by the Bureau. Related series from other governmental agencies and foreign countries. Contains 166 tables, each starting at the earliest point in time from which a continuous, reliable, and consistent series can be carried.

Adaptation from final chapter of Blue-Collar Workers, a symposium on middle America edited by Mr. Levitan. Position of blue-collar workers in recent years and their adjustment and adaptability to new social and economic changes is examined.

Historical and out-of-print publications, as listed on p. 50, are now available through National Technical Information Service (NTIS). Cost generally is $3 hard copy; 95 cents microfiche copy. Write to address listed.

Study on use of drugs in State of New York, conducted by New York State Narcotic Addiction Control Commission, suggests 1 out of 8 employed workers is a regular user of legal or illegal drugs.

NOTE: A limited supply of Reported Drug Use by Employed Workers in New York State, August 1970 (highlights of study), is available without charge from the Office of the Assistant Secretary for Policy, Evaluation, and Research, U.S. Department of Labor, Washington, D.C. 20210.

Inflation Versus Unemployment: Another View of the Trade-Off. By Stanley S. Wallack, Assistant Pro-

Productivity, Wages, and Prices. (Text and tabulations.) Release, quarterly. (Mailing list 310. Free.)

Reviews output per man-hour in the private economy; average real weekly earnings; average size of union contract settlements; price rises in Consumer Price and Wholesale Price Indexes.

Annotated index listing publications issued during this period.

Report on extent the business boom of 1964-69 benefited the male labor force (18 years and over); What were the effects by age, race, and education? What happened to the labor market "twist"? Findings were that rapid economic growth halted decline in position of less educated male workers relative to the better educated.

ABSENTEEISM

Improving Productivity: Labor and Management Approaches. See under Productivity and Technological Developments.
CIVIL RIGHTS

Significant Decisions in Labor Cases. In each issue of Monthly Labor Review.

COLLECTIVE BARGAINING

Current Wage Developments. See under Wages, Salaries, and Hours of Work.

Developments in Industrial Relations. In each issue of the Monthly Labor Review.

Fact Sheet on Collective Bargaining. Provides perspective on scheduled negotiations; key features of major work stoppage history.

Major Agreement Expirations. In each issue of Monthly Labor Review.

A list of collective bargaining agreements ending during month. Includes almost all agreements covering 1,000 workers or more.

Summary results of first survey of municipal collective bargaining agreements. Purpose of study was to furnish information on the prevalence of particular provisions presently included in contracts and related documents, and to serve as a benchmark against which to measure subsequent developments.

NOTE: Additional details will be provided in a forthcoming bulletin.

Presents a summary of major changes in salaries and supplementary (fringe) benefits for municipal employees, subject to regulation of Milwaukee Common Council.

Municipal Public Employees Associations. Bulletin 1702, 46 pp., 1971. 50 cents, GPO.

One of series of studies dealing with public employee collective bargaining and labor relations. Analyzes the basic characteristics, growth and structure of municipal public employee associations; also offers a brief look at employer-employee relations.

NOTE: See regional office listings for Municipal Government Wage Surveys.

Public File of Collective Bargaining Agreements. File of approximately 5,000 agreements, including virtually all agreements in United States covering 1,000 workers or more, exclusive of railroads, airlines, and government. Except for a few of these agreements, file is open to public use; located in Washington, D.C. Copies of specific agreements available at cost of copying. Cost of reproducing submitted upon request.

Excerpts adapted from five papers presented at Third Annual Collective Bargaining Forum held in New York City in May 1971 by the Institute of Collective Bargaining and Group Relations.

Emergency Disputes and Public Policy. By Professor Charles C. Killingsworth, Michigan State University, pp. 42-45.

Employee Rights Under an Agreement: A Current Evaluation. By Professor Benjamin Aaron, University of California, Los Angeles, pp. 52-56.

The Influence of Selected Industry Characteristics on Negotiated Settlements. BLS Staff Paper No. 5, 30 pp., 1971. 25 cents, GPO.
An exploratory attempt to determine whether differences among industries in the pattern of negotiated wage adjustments over time are related to industry characteristics in a systematic way.

Wage Calendar for 1972. See General under Wages, Salaries, and Hours of Work.

COLLECTIVE BARGAINING PROVISIONS

Summarizes examination of major collective bargaining agreements (excluding railroads, airlines, and Government), 1970-71. Of 1,845 agreements analyzed, approximately 80 percent contained layoff provisions.

CONSTRUCTION

Construction Manpower Needs by 1980. See under Projections.

Results of BLS study designed to measure the number of man-hours required for each $1,000 of single-family house construction price. Covers on-site labor requirements, distribution of on-site man-hours by occupation and type of contractor, 1969, and distribution of costs.

NOTE: More detailed account will appear in forthcoming report.

COURT DECISIONS AND AGENCY RULINGS

Significant Decisions in Labor Cases. In each issue of Monthly Labor Review.

DISPLACED WORKERS

Defense Engineers: Do They Have Special Reemployment Problems? By B. Curtis Eaton, Assistant Professor of Economics, University of British Columbia. In Monthly Labor Review, July 1971, pp. 52-54; also Reprint 2751.

Study deals with the transferability of engineering and scientific personnel from defense to nondefense work. Compares overall experiences of workers from two defense-related layoffs as result of cancellation and completion of contracts: Boeing and Company, Seattle, December 1963; and Martin Company, Denver, late 1964.

EDUCATION

March 1971 survey shows median education level of workers has risen only slightly above the 1959 level of 12 years or high school completion. Survey results describe and analyze changes in educational attainment of workers between March 1959 and 1971; reasons for changes.

EMPLOYMENT AND UNEMPLOYMENT

An investigation was made of Michigan's new financial work incentive program, begun in 1969, to determine its effect on encouraging welfare recipients to seek employment. The method of analysis is presented for an evaluation of the findings.

Children of Women in the Labor Force. See under Youth.

Educational Attainment of Workers, March 1971. See under Education.

Employment and Earnings. Monthly report. (Annual subscription, $10; $12.50 foreign; single copy, $1, GPO.)
Detailed establishment data on employment, hours, earnings, turnover, job vacancy, and employment status of war veterans, insured unemployment, nationally and by State and area; household data on labor force, total employment and unemployment; special articles presenting data on various phases of labor force; charts also included.

Special articles and tables:

**July**
Quarterly Averages—Seasonally Adjusted Household Data, 1968 to date, pp. 112-130 (Vietnam Era War Veterans, pp. 127-130). ¹

**August**
Women Employees on Nonagricultural Payrolls, by Industry, pp. 58-64. ²

**September**
BLS Establishment Estimates Revised to March 1970 Benchmark Levels, pp. 18-30; also employment estimates for some industries not published monthly—March 1959, and 1961-70 (table 7). Reprint.³

**December**

¹Quarterly data included in January, April, July, and October issues.
²Quarterly data included in February, May, August, and November issues.
³Beginning with this issue, all national employment series in the establishment survey have been adjusted to March 1970 benchmarks. Data in table C-10 (indexes of man-hours) and tables E-1, E-2, E-3, and E-4 (job vacancies) have not been adjusted to reflect the effects of these benchmarks.

Third in series presenting estimates of private employment generated in each industry by Department of Defense (DOD) military expenditures, 1968-71. Results show loss of approximately 1.7 million jobs over the period.

Employment in private sector of atomic energy field increased from 1963 to 1970; in contrast, government-owned establishments showed a decline. Findings based on annual survey. Tabular data presents employment by type of establishment, segment, occupation, region, and size of establishment; also scientists and engineers in research and development by segment.

**Employment in Perspective.** Series of special reports on workers in and out of the labor force.

Discussion of persons outside the labor force (discouraged workers) who want work, but are not actively seeking a job because they think their search for one would be in vain.

Provides 1970 annual average regional unemployment changes by race, age, and sex; occupation, and full- and part-time status.

Analyzes recent developments of Negroes in labor force relative to whites: employment, unemployment, and other labor force characteristics, and progress up occupational ladder.

Employment of School-Age Youth. By Howard Hayghe, Division of Labor Force Studies. In
Report based on October 1970 sample Current Population Survey relating to persons 16 to 24 years of age in civilian noninstitutional population. Findings show that for first time in 10 years (October 1960-70) there was no significant increase in number of students in labor force.

Employment and unemployment statistics of male Vietnam Era veterans compared to nonveterans (20 to 29 years old), January 1969 to June 1971; also, second quarter averages, 1970 and 1971, by age and race.

Highlights of an experimental survey of employment for selected occupations in six major industry groups (1968): ordinance and accessories, fabricated metal products, machinery, electrical machinery and equipment, transportation equipment, and professional instruments. First time such data available for such a large segment of industry and for so many occupations.

**First Comprehensive Survey of Employment by Occupations Soon to Get Underway.** See under Program Note.

Advance summary of March 1970 and March 1971 statistics on employment status of persons by marital status, sex, color, and family head.

Findings of latest survey of persons 16 years old and over holding two jobs or more (multiple jobholders) show very little change compared with the previous survey (May 1970). Includes a discussion of the relationship between the unemployment rate and multiple jobholding, earnings on second jobs, and seasonality and trends.

Two-thirds of all workers in United States reside in metropolitan areas, and most are concentrated in highly skilled occupations. Study explores major differences in occupational distribution of employees among large metropolitan areas (20 SMSA's) and between their central cities and suburban rings; also attempts to determine whether such skill differences have any bearing on the disparity between central city and suburban unemployment rates.

According to summary results of March 1970 survey, nearly 3 out of 5 employees were production and maintenance workers. Includes tabulation of estimated employment by selected occupations in printing and publishing industry.

**NOTE:** More detailed tabulations are available upon request.

Occupations affected greatest by defense expenditures are those heavily concentrated in defense-related work and sensitive to changes in resources devoted to national security. Discusses the differing occupational impact of defense purchases, 1970, and estimates how reduction in these purchases in recent years has adversely affected employment levels in a wide range of occupations.

Flow of Negroes out of urban areas is another dimension of unemployment situation in large SMSA's. The authors suggest that analysis of this factor will help in an understanding of economic position of inner city Negro. Presents conclusions resulting from test made using a New Occupational Flow measure.

Comments and discussion on a new concept, "dual labor market," developed by Peter B. Doeringer and Michael J. Piore in their recent book, Internal Labor Markets and Manpower Analysis. Their theory separates jobs into two categories: primary and secondary; a new attempt to reorder thinking about employment problems.

Presentation of positive and negative aspects of the older workers' position in the labor market, as reflected in latest available data—1970-71. Prepared for the White House Conference on Aging held on November 29, 1971.

The Employment Situation. Release, monthly. (Mailing list 365. Free.)

Estimates of size and characteristics of labor force, total employed and unemployed; employment, hours, and earnings estimates by industry.

Compares unemployment rates by race in poverty and other urban neighborhoods of the Nation's 100 largest metropolitan areas.

NOTE: Fourth quarter 1971 release final issue; publication of statistics discontinued temporarily.

Discusses some common misconceptions about what unemployment data represent; explains meaning of "statistically significant," and offers pointers on how to interpret fluctuations.

A brief summary of why poverty area residents are outside the labor force. Focuses on people of working age neither working nor looking for work during week prior to being interviewed in Atlanta, Chicago, Detroit, Houston, Los Angeles, and New York.

NOTE: More detailed accounts appear in Regional Reports for each area.

Presents highlights of the 1971 survey of the working age population. Report shows that economic slowdown of 1970 contributed to first decrease in number of year-round full-time workers in over a decade. Extent of employment discussed and rise in unemployment by age, sex, race, and other factors, 1967-70, analyzed.

Young Workers and Their Earnings. See under Youth.

FOREIGN LABOR

Provides data on comparative civilian employment for three sectors—agriculture, industry, and services—in 10 developed countries (United States, Belgium, Canada, France, Italy, Germany, Japan, Netherlands, Sweden, and United Kingdom).
1950-70. Foreign country data adjusted to United States concepts in most cases; adjustments made and sources are discussed in appendix.

Foreign Labor Briefs. In each issue of Monthly Labor Review.

Presents information on recent labor developments in foreign countries. Selected labor statistics for different countries are shown from time to time.

Special articles:

April-May

Combined April and May issues deal essentially with migration of workers for economic reasons—migration within countries and between countries: Western Europe, U.S.S.R. and Yugoslavia, Near East and South Asia, Africa, East Asia and the Pacific and South America Republics, pp. 1-83.

U.S. Department of State Living Quarters Allowances in Foreign Posts, by Salary Group, April 1971, pp. 84-89; also Reprint.

U.S. Department of State Indexes of Living Costs Abroad (Excluding Quarters) revisions, p. 90.\(^1\)

June

A Pattern for the Compensation of Americans in Foreign Countries, pp. 1-6; also Reprint.

Employment of Women in the Japanese Electronics Industry, pp. 7-12.

Annotated Sources of Information on Labor and Related Subjects—Near East and South Asia, pp. 32-41.

July

Arab Workers in Israel, pp. 1-9.

Annotated Sources of Information on Indian Labor and Related Subjects, pp. 25-34.

August

Decisions of the President’s Cost-of-Living Council Pertaining to Overseas Allowances, p. 22.

September

Labor in Northeast Thailand, pp. 1-5.

Decisions of the President’s Cost-of-Living Council Pertaining to Overseas Compensation, p. 25.

October

November-December

Combined issue.

Tripartism Reaffirmed by the 1971 International Labor Conference. See under Labor Organizations.

FRINGE BENEFITS

INCENTIVES

An Analysis of Michigan’s Experience with Work Incentives. See under Employment and Unemployment.

Improving Productivity: Labor and Management Approaches. See under Productivity and Technological Developments.

Findings of study show the incidence of incentive pay has decreased among office workers and plantworkers over past 7 years while prevalence of formal pay plans has increased. Based on information from occupational wage surveys in metropolitan areas conducted between July 1968 and June 1970.

INDUSTRIAL RELATIONS

Chronology of Recent Labor Events. In each issue of Monthly Labor Review.

Developments in Industrial Relations. In each issue of Monthly Labor Review.

Summarizes Government's involvement in railroad industry's emergency disputes during a 20-year period ending with 1969, with emphasis on emergency board cases. Data extracted from published and unpublished records of National Mediation Board.

Improving Productivity: Labor and Management Approaches. See under Productivity and Technological Developments.

INFLATION

JOB VACANCIES

Job Vacancies, Hires, Quits, and Layoffs in Manufacturing. Monthly: Release and Tables D-1 to D-4 and E-1 to E-4 in Employment and Earnings report. (Mailing list 305. Free.)

Hires, quits, and layoff rates (per 100 employees) by major industry group and selected States and areas: job vacancy rates and percentage distribution by selected industry groups and selected areas.

LABOR ORGANIZATIONS

Brief rundown on 19th biennial convention of the International Longshoremen's and Warehousemen's Union (Ind.) in Honolulu on April 19-24. Focus placed on such topics as income, maintenance, job security, and working conditions. Discusses major resolutions dealt with or adopted.

Preliminary estimates of membership in labor unions and public and professional employee associations headquartered in United States show membership increase of 542,000 between 1968 and 1970. (This is the first survey to include professional and State employee association members in total union membership.)

Highlights basic principles of ILO and resolutions adopted at the Fifty-sixth International Labor Conference held in Geneva, Switzerland, last June.

Highlights of 20th Convention of International Brotherhood of Teamsters, Chauffeurs, Warehousemen, and Helpers of America (Ind.); held in Miami Beach, Fla., July 4-9; National officers elect-
ed, union's constitution amended, and policy for next 5 years formulated.

A listing of recent name changes in unions and union personnel, originally reported in Bulletin 1665, Directory of National and International Labor Unions in the United States, 1969 ($1.25, GPO).

LABOR TURNOVER

Factory Labor Turnover. See Job Vacancies, Hires, Quits, and Layoffs in Manufacturing under Job Vacancies; also see Employment and Earnings under Employment and Unemployment.

LEGISLATION

Developments in Industrial Relations. See under Industrial Relations.

MANPOWER

Construction Manpower Needs by 1980. See under Projections.

Special Labor Force Reports:

Reprints from issues of Monthly Labor Review covering various aspects of the labor force; includes detailed tables. (Mailing list 308. Free.)

MIGRATION

Occupational Migration, Discrimination, and the Central City Labor Force. See under General.

MINORITY GROUPS

Progress and problems in recent years—migration and population, employment and unemployment, income, poverty, family, vital statistics and health, housing, crime, citizenship, and future projections. Includes list of bibliographies and references.

Differentials and Overlaps in Annual Earnings of Blacks and Whites. See under Wages, Salaries, and Hours of Work.

Discouraged Workers and Recent Changes in Labor Force Growth. See Employment in Perspective under Employment and Unemployment.
Employment in Perspective. See under Employment and Unemployment.

Marital and Family Characteristics of Workers, March 1971. See under Employment and Unemployment.

Occupational Characteristics of Urban Workers. See under Employment and Unemployment.

Regional Aspects of Unemployment, 1969-70. See Employment in Perspective under Employment and Unemployment.

The Negro Employment Situation. See Employment in Perspective under Employment and Unemployment.

Economic and social gains of the Negro have been substantial during the 60's and continued into the 70's. Presents statistics for period between 1960 and 1970: population distribution, family income and size, education, employment, housing, living conditions and health, voting, military and public officials.

Results of 1970 survey of disadvantaged black men in San Francisco Bay area to evaluate work attitudes in poverty areas. Survey results showed that "commitment to work" attitudes were directly related to labor force participation.

NOTE: More detailed account will appear in forthcoming bulletin.

OCCUPATIONAL OUTLOOK

Attempts to answer a question asked increasingly these days: Exactly what is a college education worth? Discussed are reasons for the tight job market, its effect on 1970 college graduates, reasons for investing in higher education, and future prospects.

Employment Grows in Atomic Energy Field. See under Employment and Unemployment.

Focus on Manpower for Environmental Quality. In Occupational Outlook Quarterly, Fall 1971, pp. 36-40.

Excerpts from chapter 5 of the 1971 Manpower Report of the President, sent to Congress last April. Focus is placed on types of workers needed in Nation's initial $4 billion effort to reduce pollution.

Jobs for the 1970's: Slide Series. Set of 40 color slides (35 mm.), $10; filmstrip, $5.

Slide presentation and accompanying text materials (44 page booklet) based on information in Occupational Outlook Handbook. Provides information on kinds of jobs available, where located, qualifications needed, and insight into prospective competitive situation for young people seeking to enter these jobs.

Motivational Pamphlets: List of occupations selected from the Occupational Outlook Handbook—qualifications, training, employment opportunities, and trends.

Jobs for which:

- Apprenticeship training is available
- College education is usually required
- High school education is generally required
- High school education is preferred, but not essential
- Junior college, technical institute, or other specialized training is usually required

Comprehensive study of future manpower needs—education and training. Shown are projected annual job openings, 1968-80, for approximately 232 white-collar, blue-collar, and service jobs, the status of occupational training and related training to needs.

Occupational Outlook Quarterly. Annual subscription $1.50; $2 foreign; single copy, 45 cents, GPO. Issued during school year: Spring, Summer, Fall, and Winter.

Supplements and brings up to date information in Occupational Outlook handbook. For persons interested in one of the following occupations as a career, presents briefly nature of work, where jobs located, educational and training requirements, earnings and working conditions, future occupational outlook, and sources for additional information.

Summer 1971 issue.

Logging a Job for the Hardy. By Charlotte Richmond, pp. 2-7.

Physician’s Assistant: Medical Occupation in the Making. By Gloria Stevenson, pp. 8-13; also Reprint.

Stock Clerks: Half a Million Keep the Shelves Full. By Ludmilla K. Murphy, pp. 36-39; also Reprint.

The Trucking Industry: Highway to a Career. By Kevin Kasunic, pp. 20-24; also Reprint.

Fall 1971 issue.

City Managers-Professionalism in Urban Government. By Donald Clark, pp. 32-36.

OLDER WORKERS

PENSIONS

Digest of Selected Pension Plans, 1970 Edition. Subscription $5 (Includes revised plans and analytical summaries as they become available.)

Incorporates and summarizes principal provisions of previously published and new plans for employees under collective bargaining and salaried employees. This Digest is the first in a series and supersedes Bulletin 1397. Digest of 100 Selected Pension Plans Under Collective Bargaining, Spring 1968; and Bulletin 1477, Digest of 50 Selected Pension Plans for Salaried Employees, Summer 1965.

Fringe Benefits of Urban Workers. See under Fringe Benefits.

Examines incidence of retirement plans among industries, by level of income, and by size of labor force. Data analyzed indicate a substantial majority of workers in private sector not participating in private retirement plans.

POVERTY

Unutilized Manpower in Poverty Areas of Six U.S. Cities. See under Employment and Unemployment.

PRICES AND COST OF LIVING

General

Productivity, Wages, and Prices. See under General.

In third quarter, price rises moderated due in part to the wage-price-rent freeze (August 15) and other provisions of the President's new Economic Stabilization Program. Increased supplies of agricultural products also contributed greatly to the slowdown. Presents report of changes which took place in Wholesale and Consumer Prices and the Gross National Product deflator during quarter.

The Theory of Hedonic Quality Measurement and Its Use in Price Indexes. BLS Staff Paper No. 6, 54 pp., 1971. 35 cents, GPO.

Provides theoretical framework for the so-called "hedonic" method of adjusting price indexes for quality change. Explains the different concepts of quality as used in economic measurement and presents the concept of quality measurement most useful in economic analysis.

Consumer Prices

Comprehensive report of the evaluation of the Bureau's Consumer Expenditure Survey, 1960-61: planning, data collection methods used, data uses, extensive comparisons of survey findings with data from other sources.

Index measures average changes in prices of goods and services; prices obtained in selected areas (39 SMSA's and 17 smaller cities) chosen to represent all urban places in U.S., including Alaska and Hawaii. Included in monthly report are Indexes for Selected Items and Groups and detailed tabulations on Food Items. CPI for Portland, Oreg., and Scranton, Pa., included in issues of Monthly Labor Review.

Measurement of changes in prices of goods and services purchased by urban wage earners and clerical workers in Washington, D.C., area.

Department Store Inventory Price Indexes. Press release, semiannual. (Mailing list 303. Free.)

Indexes on national basis for store total for 20 major department groups, and two special combinations—soft and durable goods.

Estimated Retail Food Prices by Cities. Report monthly. (Mailing list 300. Free.)

Individual food prices for urban United States and for each of 23 large metropolitan areas; estimated from special benchmark averages, computed annually and adjusted for price changes to current month, as shown by data collected for Consumer Price Index.

Findings show substantially little change in manufacturers' suggested retail prices of 1972 model passenger cars over 1971 models.

Retail Food Price Index—Washington, D.C. Press release, monthly. (Mailing list 333. Free.)

Retail food price indexes in Washington, D.C., area for food at home (cereal and bakery products, meats, poultry and fish, dairy products, fruits and vegetables, and other food at home) and food away from home. (Complete list of consumer goods and services in Washington priced every 3 months.)

Retail Prices and Indexes of Fuels and Utilities. Report monthly. (Mailing list 306. Free.)

Prices for U.S. and for each of 23 metropolitan areas; explanation of number of cities priced for each fuel, and definitions of terms of sale.
NOTE: As of July 1971, the word “Utilities” has replaced “Electricity” in title since residential telephone service is included. Also, the CPI U.S. All Items figure has been added.

Spring 1970 budget costs and indexes for retired couple at three levels of living (lower, intermediate, and higher) in 39 metropolitan and nonmetropolitan areas throughout the United States (includes Honolulu, Hawaii; and Anchorage, Alaska). Family for which budgets constructed consists of a husband and wife, both 65 or over, homeowners, and in reasonably good health and able to take care of themselves.

Primary Market Prices

Tuesday Spot Market Price Indexes and Prices. Weekly release. (Mailing list 332. Free.)
Measures price trends of commodities, particularly those sensitive to factors affecting spot markets. Summary of previous month’s data and monthly averages provided in first Tuesday of the month release.

Tabulation and text covering price movements over the month for commodity groups and subgroups. Detailed report contains final prices and indexes at the lowest level of detail.

PRODUCTIVITY AND TECHNOLOGICAL DEVELOPMENTS

Improving Productivity: Labor and Management Approaches. Bulletin 1715, 35 pp., 1971. 45 cents, GPO.
Examples of formal efforts by labor and management to improve productivity. Focuses on plant level practices within control of management or unions.

Revises industry indexes of output per man-hour, output per employee, and unit labor requirements for 25 manufacturing, four nonmanufacturing, and six mining industries.

Productivity and Costs. Press release, quarterly. (Mailing list 310. Free.)
Seasonally adjusted quarterly data on output per man-hour, hourly compensation, unit labor costs, and prices in the private economy and nonfarm sector (1967 = 100). Also includes revised indexes in the private, private nonfarm sectors, and manufacturing, 1968-69.

NOTE: Third quarter release includes explanatory note concerning average earnings and wage changes for month of September—first earnings figures released during period of freeze. (Press release, USDL 71-520, October 5, 1971.)

A new report describing productivity growth, the relationship of its movements to income, costs, prices, and employment. Tables and charts illustrate four segments: (1) trends of productivity in private economy and major sectors; (2) changes in specific industries; (3) international comparisons; and (4) projections.

Productivity, Wages, and Prices. See under General.

Contains narrative discussion on productivity—meaning, measurements, and importance—and charts; recommendations are made for additional needed information.

Analysis of unit labor costs in manufacturing in the United States, Canada, Japan, and eight European countries. Presents comparative trends for the past decade (1960-70) in output per man-hour, hour-
ly compensation, and unit labor costs. Also briefly describes underlying data, concepts, and data limitations.

PROGRAM NOTE

The September earnings figures show first estimates following imposition of the wage-price-rent freeze. Discusses several points to be considered in interpreting earnings figures published during period of freeze.

A new hourly earnings index has been constructed to reflect percent change in average hourly earnings for production or nonsupervisory workers employed in private nonfarm sector, after certain adjustments. Includes table of monthly indexes, beginning with 1964.

Announcing new occupational employment statistics program to provide current data on employment by occupation within various industries, in States and local areas, and for the United States as a whole. First study results will present information for approximately 1,000 occupations in manufacturing.

PROJECTIONS

A brief sketch of a report, "Evidence of the Physicians Shortage," by Mario F. Bognanno, University of Minnesota and James R. Jeffers, University of Iowa.

NOTE: Full report available from Industrial Relations Center, University of Minnesota, Minneapolis, Minn. 55455.

Predictions indicate manpower requirements in construction will rise from 3.3 million to 4.6 million between 1970-80—an increase of 37 percent. These projected estimates for the construction industry and for selected building trades were prepared to assess long-term demands for labor to meet projected construction needs in the private and public sectors.

Five-year projections show an expected increase of 28 percent in State and local government expenditures (fastest growing segment of GNP during past decade). Outlines the historical perspective of State and local government finances and expenditures and discusses developing patterns of purchases; includes projections for 1975.

TECHNIQUES

Technical Note:

Concepts and methods for computing household (labor force), establishment (industry), and unemployment insurance data appear in Employment and Earnings monthly report. See under Employment and Unemployment.

The Meaning and Measurement of Productivity. See under Productivity and Technological Developments.

Unemployment Statistics and What They Mean. See under Employment and Unemployment.
TRAINING AND RETRAINING

Improving Productivity: Labor and Management Approaches. See under Productivity and Technological Developments.

Special survey (July 1968-June 1969) on extent and sources of job training received by residents in poverty areas of Atlanta, Chicago, Detroit, Houston, Los Angeles, and New York, shows that 1 in 6 residents in these cities received vocational training, most through school programs.

Progress report on a new pilot program designed to assist disadvantaged young people in becoming more knowledgeable of the world of work.

Occupational Manpower and Training Needs. See under Occupational Outlook.

WAGES, SALARIES, AND HOURS OF WORK

General

Current Wage Developments. Monthly. Reports No. 282-286. (Annual subscription $4.50; foreign $5.75; single copy, 45 cents, GPO.)

A monthly report on employee compensation, including wage and benefit changes resulting from collective bargaining settlements and management decisions; statistical summaries; and special reports on wage trends.

Special articles:

No. 283 Major Wage Developments, First 3 Months, 1971, pp. 3-41.

No. 284 Government Employees' Salary Trends, pp. 33-60; also Reprint.

Data based on new series developed from statistical information obtained from records of Social Security Administration and Railroad Retirement Board. Presents a composite picture of differentials and overlaps of earnings distribution of all black and white men and women who had private nonagricultural earnings during 1966.

Employer Compensation Expenditures. Studies of employer expenditures for compensation of employees.

NOTE: More detailed account will appear in forthcoming bulletin.

Explanatory Note concerning Average Earnings and Wage Changes. See under Program Note.

Summarizes quarterly wage-rate increases agreed upon in major collective bargaining settlements covering agreements of 1,000 workers or more.

Productivity, Wages, and Prices. See under General.

Real Earnings. Release monthly. (Mailing list 325. Free.)
Text and tabulations furnish gross and spendable average weekly earnings of production and nonsupervisory workers (worker with no dependents and worker with three dependents).

NOTE: The September release reflects the first estimates for a period following imposition of the wage-price-rent freeze.

Recent study of overtime workers shows a consistent decline in job holders working extended hours. Examines characteristics of overtime workers in May 1967, 1969, and 1970; describes the incidence of premium pay for these workers, and analyzes differences between persons receiving extra pay for overtime hours and those who did not.

Spendable Earnings and Purchasing Power. See Real Earnings.

NOTE: Beginning with the June release, title changed to Real Earnings.

The Influence of Selected Industry Characteristics on Negotiated Settlements. See under collective Bargaining.

Highlights of "Calendar of Wage Increases and Negotiations for 1972," indicating number of workers under major contracts which either expire in 1972 or contain 1972 wage reopening provisions.

Young Workers and Their Earnings. See under Youth.

Area Wages

Area Wage Surveys. Bulletins. 1971. Presents average straight-time earnings and distribution of earnings for approximately 60 selected office clerical, professional and technical, maintenance and powerplant, and custodial and material movement occupations. For listing of 1971 bulletins, see order form for sale publications in back of this catalog.

Tabulations of average straight-time earnings for selected groups of occupations studied in six broad industry divisions (manufacturing, public utilities, wholesale trade, retail trade, finance, and services), July 1970 through June 1971.

Information on straight-time hourly earnings for occupations studied in selected industry divisions. These surveys are similar to Bureau's regular annual Area Wage Surveys (90), but are more restricted in industrial coverage. (See regional office listings under Wages, Salaries, and Hours of Work—Area Wage Surveys for individual reports.)
Hours of Work

The 4-day workweek has caught the imagination of the public. Examines prevalence of this shortened workweek, trends in work time, arguments for and against, future prospects and possible impact.

Employment and Earnings. See under Employment and Unemployment.

Improving Productivity: Labor and Management Approaches. See under Productivity and Technological Developments.

Industries and Occupations

Information is presented for 11 of the 22 large city governments studied in 1970-71, covering selected occupations in all functions of each city, except education and hospitals. Results show that city government employees in 9 of the 11 cities held pay advantage over private industry and Federal Government counterparts in selected jobs.

NOTE: For available individual city reports, see regional office listings in back of catalog.

Survey of salary scales of full-time firefighters and police patrolmen by city size and region (1966-71); includes indexes for 1924-71 (1967=100).

NOTE: More comprehensive account appears in Current Wage Developments No. 284, September 1, 1971; also Reprint.

Industry Wage Surveys. A broad range of industries are surveyed cyclically. Surveys provide data on hourly earnings or weekly salaries, by occupation, and for nonwage practices and benefits. Results published first, as available, in individual reports for areas (see listings under Regional Offices in back of catalog); final results for all areas later summarized in a single bulletin. Bulletins include job descriptions of occupations covered in each industry studied. For listing of available bulletins, see order form for sale publications in back of this catalog.

Union Scale of Wages and Hours. Results of annual surveys of wage rates and scheduled hours of work in effect on July 1, for specified crafts or jobs as provided in labor-management agreements. Prelimi-
nary listings for individual areas issued as available (see listings under Regional Offices in back of catalog); final results for all areas later summarized in a single bulletin. For listing of available bulletins, see order form for sale publications in back of this catalog.

Building Trades. Release, quarterly. (Mailing list 318. Free.)

Wage Chronologies. General wage changes and related practices negotiated in collective bargaining agreements.

Shows percentage increases in average straight-time hourly earnings of selected occupational groups in all metropolitan areas combined for the United States. February 1961 to November 1970 and regional comparisons from May 1969 to November 1970.

Results of survey of wages and tips in March 1970 for five occupational categories in hotel and restaurants (bartenders, bellmen, busboys and girls, chambermaids, and waiters and waitresses) covered by the minimum wage standards of Fair Labor Standards Act. Observations show waiters, waitresses, and bellmen receive more in customer tips than in wages.

Preliminary information from annual nationwide survey of professional, administrative, technical, and clerical occupations used in comparing Federal Government salaries with those in private industry. The year ending June 1971 showed the largest recorded increase in the past 11 years.

NOTE: More detailed account will appear in forthcoming bulletin.

Study initiated and funded by Manpower Administration provides information for use by State officials to compare State government salaries with private industry. Tabulations show salary data for selected professional, administrative, technical, and clerical occupations in private industry—Statewide and for metropolitan areas, including Kentucky portions of interstate metropolitan areas.

NOTE: More detailed report available from regional office (see listing in back of catalog).

WOMEN

Children of Women in the Labor Force. See under Youth.

Pay Differentials Between Men and Women in the Same Job. See Industries and Occupations under Wages, Salaries, and Hours of Work. Also included in Area Wage Surveys and Industry Wage Surveys.

Unutilized Manpower in Poverty Areas of Six U.S. Cities. See under Employment and Unemployment.

WORK INJURIES

Compromise Agreements as a Means of Work Injury Settlement. See under General.

WORK STOPPAGES

Fact Sheet on Collective Bargaining. See under Collective Bargaining.

Bituminous Coal Industry, 1950-70.
Longshore Industry, 1958-70.

Government Intervention in Railroad Disputes. See under Industrial Relations.

Work Stoppages. Releases monthly and quarterly. (Mailing list 313. Free.) Number of stoppages beginning in period, number workers involved, and man-days idle selected periods.

YOUTH

Employment of School Age Youth. See under Employment and Unemployment.

Providence, R.I.

Springfield, Mass.

Boston, Mass. Serial No. 661.

Hartford—New Britain-Bristol, Conn. Serial No. 664.

  Massachusetts. Serial No. 666.
  Rhode Island. Serial No. 665.

WORK STOPPAGES

Year-end report indicates man-days lost as result of work stoppages in New England dropped sharply during 1970. Includes tables showing impact of work stoppages in New England in 1970 on State-wide basis and also for selected metropolitan areas.
REGION II—New York

GENERAL

Provides yearend review of economic indicators relating to recent and underlying labor trends in New York area.

EMPLOYMENT AND UNEMPLOYMENT

Shows nonagricultural employment by industry division; includes hours and earnings of production workers in manufacturing subareas.

Analytical report on findings from Urban Employment Survey: Central and East Harlem, the South Bronx, and Bedford-Stuyvesant section of Brooklyn. Focuses upon reasons for nonparticipation in the labor force and barriers to labor market entry.

OCCUPATIONAL OUTLOOK

Selection of charts and graphs prepared for speech presented by Mr. Herbert Bienstock, Regional Director, at New York State Personnel and Guidance Association annual conference, Lake Kiamesha, New York. He indicated employment outlook for college graduates in the 1970's likely to be less favorable than any time since the 1930's.

PRICES AND COST OF LIVING

Consumer Price Index, Middle Atlantic Region. Press releases:
Buffalo — quarterly
New York-Northeastern New Jersey — monthly

Findings from second study undertaken for New York City Rent Guidelines Board to provide an index of price changes for goods and services purchased to operate uncontrolled apartment buildings.

Retail Food Price Index. Press releases:
Buffalo — monthly
New York-Northeastern New Jersey — monthly
WAGES, SALARIES, AND HOURS OF WORK

Area Wage Surveys

Industries and Occupations

Fertilizer Manufacturing—Earnings. Locality release, Maryland, April 1971. Serial No. 71-34A.

Municipal Government Wage Surveys. Pilot study of occupational earnings, work practices, and supplementary benefits.

NOTE: Similar surveys available for Atlanta, Birmingham, Boston, Buffalo, Chicago, Cincinnati, Denver, Hartford, Houston, Kansas City, Mo., Los Angeles, Louisville, New Orleans, and Philadelphia.

Summarizes and interprets findings of June 1971 survey of professional, administrative, and technical pay in private industry establishments throughout New York State and New York Metropolitan Area, and New York City.

Women’s and Misses’ Coats and Suits—Earnings, August 1970. Advance reports: Newark and Jersey City Metropolitan Area New York Area Paterson-Clifton-Passaic Metropolitan Area

WORK STOPPAGES

One of a series of reports presenting and analyzing data on various aspects of labor and the economy in the Middle Atlantic Region. According to this new report on work stoppage trends in the New York-Northeastern New Jersey area, the level of strike activity in the area increased significantly in 1970.

1See listings of bulletins on Order Sale Form in back of Catalog.
REGION III—Philadelphia

EMPLOYMENT AND UNEMPLOYMENT

Report based on new statistical series presents for first time monthly data on nonagricultural employment in Philadelphia—both in the city and two other major sectors that make up the remainder of the SMSA (The Delaware Valley minus Philadelphia and the New Jersey sector).

PRICES AND COST OF LIVING

HOW TO OBTAIN BLS PUBLICATIONS

PLACING ORDERS

Publications may be obtained by using the order blanks which follow. Note that separate order forms must be used for free items and for items that are sold. Subscriptions and orders for individual publications should be ordered through the Bureau's Regional Offices, or directly from the Superintendent of Documents. Free publications are available from the Regional Offices while the supply lasts.

MAILING LISTS

Your name can be placed on the Bureau's mailing lists for press releases and announcements issued by the Washington office. Check the appropriate box on p. —; return the form to the Bureau of Labor Statistics, Room 1539 GAO Building, Washington, D.C. 20212.

REGIONAL SERVICES

The BLS has eight regional offices located throughout the country, which have been designated as agents of the Superintendent of Documents for the purpose of selling priced publications. Each office sends out periodic announcements describing the priced and free materials available through them. To be added to the mailing list of the regional office in your area, write to the office at the address nearest you. Regional office addresses and States served are listed on p. 22.

OUT-OF-PRINT TITLES

The National Technical Information Service (NTIS) now has available copies of various out-of-print bulletins and reports—"classics" of the Bureau of Labor Statistics. See list on p 50. Direct your order with remittance or coupons to the NTIC; give the accession number and the title of the publication. Almost all the documents in the collection are priced at $3 each for paper copies and 95 cents in microfiche. An exception is PB 183642 (BLS Bulletin 604) which is priced at $6 in paper copy and 95 cents in microfilm.

new publications on PRODUCTIVITY

What Does Productivity Mean?
What's Happening to Productivity?
How Can Productivity be Improved?

The Meaning and Measurement of Productivity (BLS Bulletin 1714, 30 cents) Tells what productivity is and the different ways it can be measured.

Productivity and the Economy (BLS Bulletin 1710, 50 cents) A chartbook that presents recent information on productivity and analyses it in a framework of related economic trends.

Improving Productivity: Labor and Management Approaches (BLS Bulletin 1715, 45 cents) Describes formal efforts by labor and management to improve productivity concentrating on plant-level practices that are within the control of management and unions.
