This communication arts program is part of a larger plan designed to provide a continuing link between the language arts component of grades 3 through 6 and the language arts programs for middle and high schools in Hartford, Connecticut. The purpose of the program is to develop communication skills in sequence, and to relate all of the communication skills to each other. The student receives a foundation in perceptual training, oral language development, and reading-writing skills; the teachers and students are then given options for achieving their own objectives. Among the related materials used in this program are audio cards, cassettes, games, diagnostic tests, and supplementary books. Practical activities and suggestions are included in this course guide. The program also contains an evaluation form. (RS)

1. nonfiction C. A true book. 2. fiction F. A make-believe story, a book that is not true, such as a fairy tale.
The teachers, consultants, and principals who will be piloting this program have a most important role. They will be pioneering new strategies, guidelines and management techniques, in addition to modifying and improving this program. By contributing their energy, enthusiasm, and talent they are adding the dimension needed to insure success for students.

We are indebted to the following teachers, reading consultants and specialists who were directly involved in creating and researching specific materials for this program.

Myrna Dubrin
Dorothy Dwyer
Marcella Fritz
Faye Hughes
Gwen Hurley
Gladyse Hyatt
Helen Jackson
Pearl Jacobs
Marilyn Jones
Margaret Keating
Sara Lee
Mary McGunnigle
Catherine Mele
Ann Minor
Connie Odium
Elena Paolillo
Barbara Porter
Santo Sacuzzo
Pat Saponare
Geraldine Smith
Diane Thompson
Gail Trudeau

Odessa West

We wish to acknowledge with warm appreciation the assistance of Milton Van Vlack - Curriculum Materials Consultant/Production Manager.

A special note of thanks is extended to the following for their support: Henry Luccock, Assistant Director-Curriculum; Ed Manson, Assistant Director-Multi-Media Services; Marita Wezowic, Supervisor of Reading; Beatrice Wood, Assistant Supervisor of Reading; Joe Randazzo, Assistant Director for Early Childhood. Special credit is given to graphic artists: Jayne Norton and Gary Corrigan.

HARTFORD PUBLIC SCHOOLS - June 1971.
Foreword

The committee that guided this communication arts program was made up of classroom teachers who had received the support of school administrators and members of the community.

This program is viewed as being one facet of a larger plan called Hartford '74. It has been designed to provide a continuing link between the language arts component of the Follow-Thru program and the language arts programs planned for middle and senior high schools.

Through coordinated efforts it is hoped that this program will help to implement the educational philosophy as stated in the document Hartford '74 - Restructuring of grades 3 - Draft V.

A CHALLENGE

The last decade may be characterized as "the shouting sixties" for in spite of a wealth of rhetoric events have made it evident that there is a failure to communicate. Today, messages are sent without deliberation or thought and messages are swallowed "whole cloth" without analysis or thought.

Our challenge for the next decade is real. Can we, as educators, develop in students the skills of communication? Can students learn to interpret effectively the thoughts of others? Can students learn to convey their thoughts to others? The challenge implies not only the right to read but the right to read critically, not only the right to speak but the right to speak responsibly, not only the right to listen but the right to listen objectively. Above all, it implies not only the right to think individually but the right to think clearly.

It was the consensus of the language arts committee that this challenge be accepted and ways be found to meet student needs of the 70's. It should be realized that no one is infallible and that this reference guide has been prepared as a first step. Knowing that there will be "sins of omission and commission" in this guide, the committee has included an evaluation sheet to be used by teachers.

A PLAN

Interfacing

Can you define the term "communication"?

Common responses to this question indicate that communication is thought of as having 2 major subsets which usually are expressed as: either a. the receiving versus the sending of messages or b. oral language versus written language. If we were to skim the table of contents of language arts text books and language arts curriculum guides, chances are, we would find either of those 2 categories subdivided still further into discrete, isolated subjects (i.e. listening, oral expression, reading comprehension, children's literature, spelling, handwriting, grammar, reference skills, phonics skills, study skills, creative writing, composition, library skills, punctuation - ad infinitum).

It is our contention that the skills of the language arts complex should not (nor can they be) acquired as separate discrete subjects. (See Appendix A.) Therefore, this program joins the skills of oral and written language through the use of an interface. The term "interface," as defined in Webster's New International Dictionary, refers to a surface forming a common boundary of 2 bodies or spaces. The interface for this program is the continuum of specific measurable objectives.

Each objective is planned to work in conjunction with prior and subsequent objectives thereby reinforcing each intended learning outcome. The objectives interweave and relate all skills of the communication arts complex. The supposition is that the student does not deal with separate subjects but with related objectives as parts of the total process of communication. In addition to functioning as an interface for the program, they also do the following:

- the objectives will assist the teacher. Teachers using the program will not have to write objectives. However, since this is a flexible program, empty slots are left for teachers and students who wish to write objectives and find alternate activities
- the objectives act as pre-tests for the student and as such are stated in measurable terms
- the objectives use language that the student understands (not pedagese)
the objectives encourage creativity and self-direction. For example, an objective may use a term such as "synonym" even though it is understood that the child will not know this term, initially. The child is not told this term by the teacher but is expected to discover the meaning by doing the activities.

- the objectives build a vertical sequence of learning experiences for language arts 3-6 (reading levels 1-7), and are designed to assist the student in making generalizations that will be useful for later learning.

- the objectives allow the student to formulate his own workable generalizations and do not ask him to parrot rules and definitions.

- the objectives are grouped in series by level of difficulty. (There are 21 objectives to a series.) The objectives in the early series emphasize independent word attack skills. The objectives in the later series emphasize mature reading skills. (Teachers using the program are advised to read the earlier objectives so that they may properly assess the students' ability to cope with higher level objectives.) Note: Diagnosis or placement tests are written for this program.

- the objectives can be used as accountability devices. The student is encouraged to be responsible for his learning. The direction sheets that have the objective may be sent home. Certainly the objectives will help to give the parent a more specific means of evaluating his child's achievements.

The continuum of behavioral objectives is based on the premise that the manner and order in which generalizations are applied may be as important as the generalizations themselves. However, a realistic approach to presenting objectives out of sequence seems advisable. Although skills may best be presented in sequence, the sequence should not be considered set or rigid. There are children who can, do, and should learn skills out of sequence. Nevertheless, it is a questionable practice to jump around too much. In decoding and encoding for instance there is, in most cases, a constellation of skills that a student should have as a base before moving on to the next constellation of skills. Flexible planning should allow the student to master some skills out of sequence, provided they do so in a practical manner.

Teachers, therefore, should apply the fundamental principles of:

1. Taking inventory before assigning direction sheets.
2. Insisting on a reasonable degree of mastery before moving on.
3. Adhering to some degree of sequence in order to provide security for the student.

Each student should be encouraged to read individual books of his own choosing even though these books don't necessarily coincide with the objectives assigned to him. A student may be doing reading selections that are matched with objectives in the direction sheets and he may be reading other books just for fun. Learning is creating; learning is continuous. A student can acquire a skill before he is given the direction sheet for that particular skill. The time for assessing his mastery of the skill will come when he is given the direction sheet for that particular skill.

Continuity

In the Follow-Thru Program the student receives a thorough foundation in perceptual training, oral language development, and other reading-writing skills. The intent of the Communication Arts program for
grades 3-6 is to carry on with the communication arts component of Follow-Thru. The Communication Arts program for grades 3-6 is designed to pick up the student where he leaves off in skill development initiated in Follow-Thru, and to carry him further along in the skill development scheme. Although the student has had earlier exposure to beginning reading skills, it would be totally unrealistic to assume that all children leaving Follow-Thru (Grade 2) are reading on a 3rd level. Therefore, the objectives for this Communication Arts program begin on a lower level of sophistication than would otherwise be found in a traditional curriculum for grade 3. In other words, some provision is made for those students who have forgotten, or have not had the maturity to acquire skills such as alphabet recognition or sounds of short vowels.

To compensate for problems incurred by the high mobility of students, the reading activities cited in the student direction sheets are not locked into one specific commercial reading program. Instead, the citations used in the direction sheets cross-reference a wide variety of commercial reading programs. Commercially produced reading programs vary in their approach to reading in the sense that each one may place the same skill on different rungs in the learning ladder. Commercial programs also place different emphasis on what they view to be the most important skills. Some even skip certain skills entirely. Because of the high student mobility rate it is necessary for us to provide our own sequence of objectives. By so doing, we should be able to reduce haphazard and faulty learning caused by mobility. (e.g. gaps in learning and unnecessary repetition.)

In essence, Hartford's C.A. program allows each student to proceed through his own program of objectives even though he may transfer from one school to another or one reading program to another.

(The plight of a student who moves from one commercially based reading program to another is made graphically clear in the chart found on page 31.) The chart represents a student's reading experiences in three different programs without having his own individualized scheme of objectives.

STRUCTURE AND FREEDOM

In Crisis in the classroom, author Charles E. Silberman has argued that freedom and structure are compatible. However, the actual achievement of a balanced learning environment is not accomplished by wishful thinking. If we are to take a lesson from the mistakes made by educators in the past (as examined by Dr. Silberman), we cannot view structure as a strait-jacket nor freedom as an unbridled free-for-all. "Children cannot learn through play alone without any assistance or teaching."2 Neither is a rigidly structured program conducive to the development of self-directed learners. Essentially then, this C.A. program is designed so that a proper mix of structure and freedom is attained.

Freedom

The freedoms inherent in this program are embodied in the options that are open to both teachers and students. Some of the choices given to teachers are found in the following:

- managing the flow of objectives

---
1 A Case for Early Learning - An Invitational Environment for Children, Ages 3-6 by Joseph Randazzo, Hartford '74 Working Paper
2 Silberman, Charles E., Crisis in the classroom, p. 237. Random House
• adding other objectives

• scheduling and directing "rap sessions". Certain objectives call for specific discussion sessions with the teacher. The sizes of the groups for these oral language development sessions are dependent upon the teacher. Other sessions may be added by the teacher.

• managing conferences or assessment periods. (e.g. small groups, or individually; how long--how often, etc.)

• adding other self instructional and self correcting materials or supplementary books, magazines, or games

• modifying and monitoring the direction sheets

• selecting methods of record keeping, diagnosing, and analyzing learning difficulties and strengths

• adding attractive displays. e.g. children's work, posters, motivational and instructional bulletin boards

• scheduling of speakers from the community such as: authors, artists, publishers, radio announcers, etc.

• arranging relevant field trips e.g. radio and TV stations, Telephone Co., newspapers, libraries, public relations firms, etc.

• recycling of students who need extra work to pass the post-test, e.g. either recycle through activities that they have not done--or add new ones

• assessing student's progress thru teacher observation and tests other than the diagnostic tests

• enlisting the aid of reading consultants on how to manage the individualized reading unit supplied with the program--or finding solutions to any other problems

• arranging group-showing of film clips (children's books)

Some of the options open to students are found in:

• selecting any combination of activities from the direction sheets

• adding original objectives and other ways to learn

• working at own pace and rate and with material of his own choice

• working alone or with a friend

• setting own deadlines for a week's work (dependent upon each teacher)

• selecting additional books to read that are not necessarily matched with objectives

• making own self-assessment as to when he is ready for the post-test

• working on a single objective at a time or working on more than one (related) objective at a time
correcting his own work

Structure

A major portion of the structure built into this program becomes self evident as we analyze the materials which are supplied. (See chart page 8.)

THE CORE MATERIAL

Goal or Student-Direction Sheets

No teacher, managing an individualized program, can write separate objectives—with multiple activities—for each objective—for each student—every day. Time and adequate chalkboard space preclude this possibility. For this reason, among others, the C.A. program is built around a core of printed student direction sheets. Each of these tiny packets (average 4 pages) contain:

a. an objective (as explained previously)
b. suggested activities that the student may do in order to meet the objective
c. a post test

These sheets are coded and boxed by level of difficulty. The code is used by the student in finding the related materials that are matched to the objective. For example: Goal sheet CAI-69 may tell the child that he may use laminate sheets CAI-69, audio cards CAI-69, tapes CAI-69, etc.

The activities suggested for the student in the sheets already have been used successfully in the IRIT program and regular classrooms, and are those that the committee felt matched the objective. Of course there may be other activities that teachers may feel are even more appropriate. In such cases, teachers are encouraged to add these to the sheets and please send the information back to the curriculum office so that it may be included in the future.

Related Materials

Concurrent with the printed goal sheets are related materials. These materials have been researched, selected and/or created by Hartford teachers. The basic principles that guided teachers in selecting and writing materials are detailed in Appendix B.

1. Laminated Sheets

Because it is a good educational practice to provide immediate response, each goal sheet has reference to a specific set of laminated sheets written by Hartford teachers. These laminates are for additional instruction, practice or drill, and are self-correcting. The student may either write on these with an erasable marker, write on a separate plastic overlay or write on scrap paper, or he doesn't have to write at all. He then has the opportunity to assess his own skill by turning the sheet over and correcting his work immediately. In cases where answers may vary—he checks his responses with the teacher.

2. Audio Cards

Printed and voiced language master cards are included as a way to provide repetitive auditory stimuli that is needed for phonetic and other word recognition skills. The committee made these cards, but teachers may add to them.

3. Cassettes

Tapes are included because they are a good teaching aide and can be repeated as needed by students. Taped lessons and tests are provided for each encoding objective. In addition, the lessons needed for certain other objective— are also taped.
These are not merely listening exercises but require student participation either through worksheets included in the goal sheets or read-a-long books supplied with the program. (Teachers may add any other tapes if they wish.)

4. **Read-a-long books and records**

Hearing and reading stories—simultaneously—increases reading comprehension and reading rate. There are many worthwhile commercial read-a-long books and records. However, the ones used with this program were selected to match objectives, and were the least expensive. Teachers may add any others if they have the funds to buy them. In cases where no commercial materials were available, original read-a-long books and cassettes were made by Hartford teachers.

5. **Games**

Many commercial games are provided with the program as another way to learn. The games were selected to match the objectives. Some games are used with more than one objective. There may be other commercial games or teacher made games that are even more appropriate and teachers may add these if they wish. A booklet of additional teacher designed games will be published and distributed. Games created by HTFD’s teachers are in the packets.

6. **Diagnostic Tests**

To assist the teacher in placing the student at the right level in this program, teacher written diagnostic tests are provided. These diagnostic or placement tests have one or two items for each objective. The teacher may give series 1 test and check the items missed by the student. These items are labeled to match objectives and the student is expected to achieve 100% accuracy on the item. If he missed an item he then is given the goal sheet that has the corresponding number. Should a student pass all the items on series 1, he is then given series 2 placement test—and so on. A few objectives are not included in the tests because these are strictly oral speaking or oral participation objectives. It certainly would be advisable to have the student do these objectives anyway as reinforcement or enrichment. For example, students working in series 1 & 2 should be given goal sheets 1-45, 1-46, 2-74, 2-76 even though oral items for these are not on the placement tests.

7. **Books and Workbooks**

As previously explained in the objectives, many basal programs have been researched and matched with objectives. These books and workbooks are referred to by initials, book level, and page number to assist the student in finding them. Teachers will be given stickers for these and they should put these on the books. The symbols used for book and workbooks are as follows:

- **ADC** = American Book-Read Program
- **BRL** = Behavioral Research Lab—Programmed Reading
- **SRA** = Science Research Assoc.
  - Basic & Comprehensive Series
- **F** = Follett—World of Language
- **GJ60** = Ginn 360 Series
- **M.H.** = McGraw-Hill Programmed Reading Series
- **S.F.-L** = Language and How to Use It—Scott Foresman
- **ABC-L** = Our Language Today
  - American Book
- **O.H.** = Open Highways
- **MER** = Merrill Linguistic
  - Reading Series
Other reference books are referred to by publisher, title and number.

Harcourt Brace - Hook Mark Series - Read Skills
Thornrike Barnhardt - Beginning Dictionary
Scott Foresman - In Other Words 1
Modern Curriculum Press - Phonics Workbooks A, B, C
Bernell Loft - Skills by Title Series A, B, C
Noble & Noble - Spell/Write
Bobbs-Merrill - I Can Write
Harcourt Brace - Reading for Concepts A,B,C
Language Round Up - Bronco, Lariat, Cowboy Books

(Note: Some of these are retained and others are changed for grades 5-6.)

8. Filmstrips

Filmstrips with and without cassettes have been selected and matched to objectives. These use the company's code number in the direction sheets.

9. Answer Keys

Answer keys are provided for all books. These may be either separate sheets or the teacher's edition. It is suggested that teachers make a special box for these and explain to students how they can be used to check their work.

10. Supplementary Books

The Scholastic Individualized Reading Lab is provided. This lab is meant to be used by teachers as an individualized reading program operating in conjunction with the C.A. program. It would be a good idea if teachers could add as many other individual books, paperbacks and magazines to this supply. Each student should be allowed, at course, to select his own books for supplementary reading.

11. Read a Book-Activities Booklet

Two booklets are supplied. These booklets: Read a Book 1 and Read a Book II contain comprehension questions for approx. 100 individual books. The student does not write in these booklets but may do the activity listed for one of the books he has read. Answer booklets are also supplied. The student may correct his own work when he is finished.

Some practical Suggestions:

At this writing, the objectives for later series are not included. It is suggested that teachers save the first 4 series printed in this guide. (They may be kept in a loose-leaf not-book). As the other series are printed teachers will receive these sheets and they should add them to series 1-4.

Teachers can keep their records in any manner that best fits their situations. One simple way would be to make a chart that lists all students names a place for the goal number and places for dates assigned and completed. Teachers may also keep a sheet for each student that contains anecdotal records and more detailed information.

It certainly seems advisable for teachers to have a "run thru" session with students on what the symbols mean, where the materials are located, how to use the A.V. equipment, and the necessity of keeping things in order. Since many students will be using the materials, they should not write in any of the books. And they should return them to the places where they found them.

It might be advisable for teachers to also have a sign up chart posted on a wall. Students could sign up for the post tests when they feel they are prepared to pass it.
MATERIALS

- INDIVIDUAL BOOKS
- PAPER & ARTS SUPPLIES
- WORKBOOKS
- TEXT REFERENCE BOOKS
- PEOPLE FACILITATORS
- ANSWER KEYS
- GOAL OR DIRECTION SHEETS
- MOTION PICTURE FILMS
- TRANSPARENCIES
- AUDIO CARDS
- RECORDS & CASSETTES
- FILM STRIPS
- GAMES

13
OBJECTIVES AS THEY ARE STATED FOR STUDENTS IN DIRECTION SHEETS,
GENERAL PURPOSES OF OBJECTIVES, ANSWERS TO POST TESTS, AND
OTHER INFORMATION FOR THE TEACHER.

CA 1-35
CAN YOU DO THIS:
1. Read these words: bag, fib, pot, get, bus, hill, mes.
2. Write 5 other words that have the same vowel sounds as these:
   hat win hot men pup

For the teacher: General purposes -- ability to read independently and
quickly a wide range of one syllable words with short vowel sounds.
Pattern cvc. Post test should be administered orally. Some extensions are:
56a, 56b, 56c, 52, 63, 64, 65, 71, 72, 73. (Audio cards included.)

CA 1-36
CAN YOU DO THIS:
Read all the words on pages 4, 5, and 6. You should be able to read any
word that your teacher points to on these pages.

For the teacher: General purpose -- immediate recognition of Dolch and basic
sight vocabulary. Oral post test. Tapes included in addition to audio
cards for drill and self-test.

CA 1-44
CAN YOU DO THIS:
1. Write the alphabet and draw a loop around the vowels.
2. Say the alphabet.
3. Read the words below and write 5 other words that have the same vowel
   sound as each word.
   might go use say me

For the teacher: General purposes -- ability to write and say alphabet in
sequence, recognition of vowels and consonants, and that long vowels say
their own name. Some extensions are: 56h, 56n, 91h, 57, 68, 69, 89, 93,
103, 104, 114, 117, 118, 119. Written and oral post test. Answers for
post test, part b: say a; tight i; may a; go o; won't o; use u; bone o;
meet e; way e; ate e; mule a; low a; tight i; pine i; right i; cake a;
feet e; rule u; me o; dime e; I i. (Audio cards included.)

CA 1-45
CAN YOU DO THIS:
1. Read phrases without stopping after each word.
2. Read with expression the talking part in a play.
3. Take part in oral reading.

For the teacher: General purposes are to develop fluent and expressive oral
reading, to correct word by word reading, use of variations in stress, pitch
and juncture to make meaning clear, increase word recognition, provide oral
reading practice, and choral reading participation. The broad generalization
that we wish children to grasp thru this objective is that reading of printed
word is related to spoken word and that an author is a flesh and blood person.
No item for this objective is included in placement test. No written pre or
post test. Record of student's ability to accomplish objective should be
noted in the teacher's anecdotal records. Some extensions of objective area:
CA 2-74, 3-92, 3-95, 3-100, 4-109, 4-112, 4-115. (Two tapes included.)
CA 1-46

CAN YOU DO THIS:

1. Listen to and read along with story records.
2. Answer questions about the stories.
3. Find out how the stories Bozo the Clown and Silly Sidney are alike.

For the teacher: General purposes are to develop listening and reading comprehension and increase vocabulary and reading rate. No item included on placement test. Objective is linked with read-a-long records. Answers to pre-test: 1. an elephant; 2. No. He said he was unhappy. 3. He was glad to be himself. 4. Yes; 5. No; 6. a bird; 7. No. He was too small. 8. No. He lost his friends. 9. To be happy and be yourself. The values implied in this objective for possible small group discussions are: be happy with what you are, be happy with what you do.

CA 1-56a

CAN YOU DO THIS:

Spell these words:

1. cup 7. tag 13. of
2. dog 8. log 14. his
3. win 9. pup 15. on
4. big 10. Monday 16. rat
5. Sunday 11. bus 17. if
6. get 12. and 18. fan

Write the words clearly. Use the words in sentences.

*(a) sight words

For the teacher: General purposes -- spelling, handwriting, word meaning, and usage. Initial lesson and final test on cassette.

CA 1-51

CAN YOU DO THIS:

Write simple sentences using "a" or "an." Put "a" or "an" in the blanks below.

1. onion 4. owl 7. egg
2. sink 5. candle 8. elephant
3. uncle 6. skirt 9. uniform

For the teacher: General purposes -- use of articles a and an, listening to initial sound of word following the articles, ability to write simple sentences using articles a and an. Answers to pre-test: 1. an onion; 2. a sink; 4. an uncle; 5. a candle; 6. a skirt; 7. an egg; 8. an elephant; 9. a uniform. Answers to post test, part a: 1. an; 2. a; 3. an; 4. a; 5. an; 6. a; 7. an; 8. an; 9. an; 10. an; 11. an; 12. a. Some extensions of 51 are 52 and 53. (Audio cards included.)

CA 1-52

CAN YOU DO THIS:

1. Read words such as: camp, sand, pants.
2. Use the words in sentences.
3. Write words that rhyme with these.

For the teacher: General purposes -- expansion of word attack skills, hearing rhymes, and composing sentences using words with short vowels and nt, nd, mp endings. Oral test. Written test answers may vary. (Audio cards included.)
CA 1-53

CAN YOU DO THIS:

Write simple sentences using period and question mark at the end. Use capital letters where they are needed.

For the teacher: General purposes -- recognition of sentence and punctuation signals (period, question mark, and capital letters). Written post and pretest sentences may vary but check for correct use of above.

CA 1-54

CAN YOU DO THIS:

1. Read and listen to a story record.
2. Answer questions about the story.
3. Write the opposites for these words from the story: big, high, fast, dry, light, down, deep, out, bottom, boy, good, always, no, loud, night.

For the teacher: General purposes -- listening and reading comprehension, understanding of idiomatic expressions, and identification of opposites.

PLEASE NOTE: Audio cards are included but in error no picture signals are used in the direction sheets. Please add, as activity #4 page 2 of direction sheets, a reference for student to use audio cards CA 1-54. Extensions of this objective are 1-62 and 2-76. Answers for post test, page 1: top-bottom; always-never; loud-soft; dry-wet; afraid-brave; shallow-deep; asleep-awake; distant-near; exit-entrance; high-low. 1. c; 2. a; 3. e; 4. f; 5. b; 6. d. 1. surprised; 2. stared through the fog.

CA 1-56b

CAN YOU DO THIS:

Spell these words:

1. pass 5. tall 9. yell 13. mess
3. well 7. miss 11. odd 15. Tuesday
4. add 8. mitt 12. buzz 16. lets

Use the words in sentences.

For the teacher: General purposes -- spelling, handwriting, word meaning, and usage. Initial lesson and final test on cassette.

CA 1-57

CAN YOU DO THIS:

Read words such as: spy, fry, dry, cry, try, pry, twin, spin, stab, smack, brim, drag, crib, grab, trip. Use the words in sentences.

CA 1-59

**CAN YOU DO THIS:**

Find other words that mean the same or almost the same as these words: sad, funny, cut, pull, din, run, cold, clean, happy, yell, old, pick, big, start, pretty, small, ugly. Tell your teacher in your own words what a synonym is.

* * * * * * * *

For the teacher: General purposes -- understanding of synonyms, vocabulary enrichment, and comprehension skills. Answers for post test: A. CA 4-109

CAN YOU DO THIS?

Use your best voice to: 1. take part in choral reading, 2. read a cartoon aloud to a small group (a cartoon you have drawn showing a communicating problem), 3. introduce people to each other, 4. give and take a telephone message.

For the teacher: General purposes -- developing skills of oral communication. Taped lessons included. Test is teacher observation of the following activities: choral reading, reading poetry or riddles, introductions and greetings, cartoons, discussion groups, manners while working.
CA 4-56L

CAN YOU DO THIS?

Spell these words:

1. car 7. curl 13. corn
2. hurt 8. far 14. bird
3. her 9. start 15. burn
4. clerk 10. girl 16. shirt
5. skirt 11. north 17. torn
6. fork 12. serve 18. hurl

Use the words in sentences.

CA 4-114
CAN YOU DO THIS?
Read words such as: sly, baby, monkey, honey, spry, why, hungry, angry.
Use the words in sentences.

For the teacher: General purposes -- independent word attack skills (2 sounds of y - long e and long i) one, two, and three syllable words, and developing vocabulary. Audio cards included. Answers for post test are:
1. heavy 2. money 3. weary 4. monkey 5. chilly
1. spry 2. nylon 3. butterfly 4. python
synonym sympathy antonym syllable

CA 4-115
CAN YOU DO THIS?
Underline the sentence that does not belong in this paragraph: Lake Sunapee, whose Indian name means "Land of the Wild Goose Waters," is located in New Hampshire. It is a spring-fed lake. The water is so clear and pure in the lake that you can drink it. Five wild geese landed on the dock. The lake is ten miles long and three miles wide. Many people come to the lake to enjoy swimming, boating, and fishing.

For the teacher: General purposes are to develop reading comprehension skills, paragraph construction, and keeping to the main idea. Answers are:
p. 1 Five wild geese landed on the dock.
p. 2 A. Dad works at a factory that makes typewriters.
p. 3 B. Tim got a football for his birthday.
p. 4 A. The tallest clown likes bacon, eggs, and toast for breakfast.
P. 4 B. The telephone rang twice. Tim went out of the room to get a drink.

CA 4-116
CAN YOU DO THIS?
Read these words and write their plurals:
slip slip box boxes church churches
dish dish baby baby monkey
day
baby boss man
clothes
collar
lady lion
clothes
tie
clothes
leaves
clothes
leaves
clothes
tie
clothes

For the teacher: General purposes -- reading and writing singular and plural nouns (regular and irregular spellings), spelling generalizations, and agreement in sentence construction. Answers for page 1 are:
slips boxes churches
slips boxes churches
slips boxes churches

Answers for test are:
7, 8, 9, 11, 12, 4, 13, 14, 2, 10, 5, 3, 1, 6
2, 10, 6, 9, 5, 12, 1, 7, 11, 4, 3, 8, 14, 13

CA 4-117
CAN YOU DO THIS?
Read words with oa that have a long o sound, and read a few words with oa that do not have long o sound. AS: board, hoarse, coarse, soar, abroad.

For the teacher: General purposes -- independent word attack skills (making generalization that usually oa team in a word has long o sound - exceptions to rule also presented as in oasis).and word and sentence comprehension. Audio cards included. Post test is oral.
CA 4-118

CAN YOU DO THIS?

Read and write words that have long a sound as in mail, braid, clay, main, grain, Spain, faint, wait, paid, straight, sprain, seal, plain. (Also read word said.) Use words in sentences.

......

For the teacher: General purposes -- independent word attack skills, reading words with ai-ay having long a sound and exceptions, word meaning, and sentence meaning. Audio cards included. Answers for post test may vary as it is writing and reading original sentences with words having ay and ai.

CA 4-119

CAN YOU DO THIS?

Read words with ea having long e sound, such as: reach, peal, steal, teach, peach. Read words with ea that don't have long e sound, such as: spread, thread, instead, health, wealth. Use the words in sentences.

......

For the teacher: General purposes -- independent word attack skill (generalization ea in words may have long e sound - exceptions to rule also studied) and word and sentence meaning. Audio cards included. Post test is part oral. Answers for written are:

A. 1. bread, 2. spread
B. 1. bead, 2. clean
C. each-2, head-1, peach-2, seal-2, beach-2, thread-1
teach-2, spread-1, bean-2, bread-1, deal-2, steal-2
meal-2, instead-1, peel-2, heal-2, health-1, wealth-1
read-1, read-2, lead-2, lead-1

CA 4-56m

Spell these words:

1. candy
2. cellar
3. carrot
4. circus
5. coach
6. center
7. card
8. circle
9. couch
10. Canada
11. cabbage
12. cage
13. goat
14. garden
15. garage
16. giant
17. giraffe
18. budge

Use the words in sentences.

......

For the teacher: General purposes -- spelling and reading words with hard and soft g, c and k spelling of k sound, word meaning, and handwriting. Taped lesson and taped test included.

CA 4-56n

CAN YOU DO THIS?

Spell these words and use them in sentences:

1. may
2. day
3. way
4. praying
5. saying
6. blame
7. make
8. making
9. baking
10. taming
11. skating
12. trail
13. nail
14. great
15. sleigh
16. weigh
17. acorn
18. acorn

For the teacher: General purposes -- spelling and reading words with long a sound: ai, ay, ea; dropping e before adding ing, word meaning, and handwriting. Taped lesson and taped test included. Answers for page 2:

1. weigh, 2. sleigh, 3. blame, 4. great, 5. acorn, 6. nail, 7. day, 8. praying, saying, 9. (1) baking, (2) taming, (3) skating, (4) making, 10. yes,
1. yes 2. yes 3. yes 4. you
CAN YOU DO THIS?

I. Tell your teacher what this symbol (.) is called.

II. Read aloud each sentence below and circle the unaccented syllable of the underlined words: 1. The story was about a boy and his dog. 2. We saw a clown in the circus. 3. Have you ever taken a book from the library? 4. He made a mask that was very evil looking. 5. A lemon has a sour taste.

III. Pronounce these words: (sp a get) (ba nan' a) (t a m a t a) (chik' an)

For the teacher: General purposes -- recognition of schwa sound and symbol, unaccented syllables, dictionary skills (pronunciation key - the schwa), and word enrichment. Tape included for auditory training. Test is partially oral. Written answers are:

Page 1 - about, circus, taken, evil, lemon
Page 2 - yes
Page 5 - 1. a hed' 2. a 'pr a1 3. bok' s a 4. ze' br a
5. w o l ' r a s 6. ga r i l' e 7. wag' a n 8. vul' ch a r
9. vil' a 10. u 'n a k o r n 11. um brel' a
12. g a l' a p 13. z i th' a r
Page 6 - 1. d, 2. f, 3. e, 4. b, 5. g, 6. c, 7. a

CAN YOU DO THIS?

Read words such as: graph, tough, photo, through, nephew, alphabet, Phil, sphere, geography, enough, laugh, bought, sight, ghost, pharmacy, cough, elephant, thought. Use the words in sentences.

For the teacher: General purposes -- independent word attack skills (ph and gh sounding like f, silent gh review), and word and sentence comprehension. Audio cards included. Tests are part oral and part written. Written answers are:

Page 3 - elephant, nephew, sphere, telephone, pharmacy, phial, photo, graph
Page 4 - enough, cough, tough
1. nephew, 2. elephant, 3. geography, 4. pharmacy, 5. cough,
6. Phil, 7. sphere, 8. through

CAN YOU DO THIS?

Spell these words:

1. house 7. point 13. flew
2. ounce 8. join 14. blew
3. proud 9. spoil 15. chew
4. sound 10. toy 16. blue
5. about 11. annoy 17. glue
6. boil 12. destroy 18. Washington (sight word)

Use the words in sentences.

For the teacher: General purposes -- spelling and reading words with ow-ou spelling of ou sound; oy-oi patterns, ue, ew patterns, handwriting, and word meaning. Taped lesson and taped test included. Possible to use corresponding audio cards.

CAN YOU DO THIS?

1. Circle the verbs in the sentences. Underline the part of the sentence that is the predicate. (a) John paddled the canoe. (b) The students performed in a play. (c) He caught a frog. (d) My mother washes my clothes.

2. If the word in the box is used as a noun, write N on the line. If the word is used as a verb, write V on the line.

Catch
a. He made a good catch.
b. I will catch the ball.

Paint
a. Let's paint a picture.
b. He bought red paint for the house.

* * * * * * *
CA 4-122 (Cont'd)

For the teacher: General purposes -- reading and listening comprehension, language function of verbs and nouns, sentence construction. Two tapes and read-a-long records are included. Answers are:

Activity #2: 1. Rumpelstiltskin, 2. the miller, 3. the king and his men, 4. the miller's daughter, 5. the miller, 6. the people, 7. Rumpelstiltskin, 8. the miller's daughter, 9. Rumpelstiltskin, 10. messengers

Page 1 - 1. (a) paddled  (b) performed  (c) caught  (d) washes
2. (a) catch  N  (b) catch  V
Page 6 - 1. (a) catch  N  (b) catch  V
2. (a) paint  V  (b) paint  N

CAN YOU DO THIS?

1. Use any of these 4 words in sentences: gigantic, garage, garbage, gorgeous.

2. Circle the words below that have a "g" sound like the "g" in golly: gown, goblet, gypsy, ghost, gem, gasp, giant, geranium, gardenia, gelatin, germ, garlic, garden, giraffe, gallon, gentle, gang, gun, gerbil, gamble, ginger, genius, George, Gail, gibberish, single, finger, angel, frog.

3. gardenia-7, gigantic-3, garage-2, gorgeous-4, garbage-1, gallon-6,
The spelling lessons use words having similar spelling patterns and one or two sight words. These lessons are to be done EITHER after the student has successfully completed the related reading objective OR while he is working on the reading objective. Handwriting practice sheets are included in each lesson and each objective has corresponding laminate sheets that provide comprehension activities. Each spelling lesson is on cassette and the student uses page 1 of the direction sheets with the cassette. In addition, the final test for each lesson is on cassette. The student should not have the direction sheets in front of him while taking the final test. There are 31 spelling lessons in the series 1 thru 7. These are coded: 56a through 56n; 91a thru 91m. Spelling lessons 142a, 142b, 142c, and 142d may also be used in series 1 thru 7, even though they have been placed in series 8 and 9.

Listed below are Kottmeyer's list of spelling elements and the number of the objective where they are found. Other spelling elements in addition to the Kottmeyes are also listed below.

- **X** Generalization presented
- --- Student mobility
- **R** Review
HOW GOOD IS THAT DECODING RULE?

"When two vowels go walking—the first one does the talking and it is usually long." Have you seen this catchy phrase? Have you used it to help students decode words? Have you seen colorful pictures showing two vowels walking hand in hand? Have most students been able to learn this rule easily? Can they apply this rule or make the generalization?

Most students have no difficulty learning this rule, AND YET, it has so many exceptions that it is relatively useless as a decoding help. In fact, studies done of phonics rules and their utility for primary and intermediate reading have shown this well-touted generalization to be useful with only 10 percent of the words the student meets.

This does not mean that all generalizations we wish the child to grasp in order to function independently are useless. It does mean we have to take a hard look at some of the decoding/encoding generalizations.

GENERALIZATIONS

Recent research indicates that many of the generalizations previously taught hold true less than 50 percent of the time and fail in usefulness for words beyond the primary level.

There is ample research to show that in the earliest stages of learning to read, a word carries much more meaning for a child than a letter: the word pig carries meaning; the letters p, i, g—do not. HOWEVER, children cannot go on indefinitely learning whole words by sight, using configuration, or context clues alone, but need additional clues to assist them in independent word attack skills. In fact, most modern authorities of reading advocate some method of decoding whether it be a phonic or linguistic approach (Dr. Chall—Learning to Read, The Great Debate).

Since phonics is considered one of the helps in providing decoding clues for the student, it is important for teachers to consider the value of phonic generalizations which are commonly taught. Therefore on the following pages we have listed the generalizations that have a high percent of utility for words beyond the primary level. We have also included a cross reference which shows the similarity of useful phonic generalizations to spelling and linguistic generalizations. At this time, the listing is not complete as there may be other generalizations, including some more suitable for intermediate grades, which have not been discovered.

In listing these generalizations, it is not our purpose to encourage teachers to pound rules into the students' heads. Rather, they are meant to serve only as guides for teachers planning learning activities. Generalizations, of course, serve only as aids and are not learned as hard and fast rules. In addition, some generalizations included (such as #18—having a utility of 63 percent) have exceptions with almost equal utility which means the exceptions must also be presented.

Emans, Robert, "The Usefulness of Phonics Generalizations Above the Primary Grades," The Reading Teacher, 1967, 20, 419-425.
PHONIC GENERALIZATIONS

1. When there is one vowel in the middle of a one syllable word, the vowel is usually short--except that it may be modified in words in which the vowel is followed by r. (80% utility) (Linguistic generalization #1)

2. The letter r gives the preceding vowel a sound that is neither long nor short. (82% utility) (Linguistic generalization #2)

3. A long vowel sounds like it does in the alphabet -- a-e-i-o-u. (The letter y sometimes sounds like long e and sometimes sounds like long i.) (100% utility)

4. When 2 of the same consonants are side by side, only one is usually heard (91% utility)

5. When C is followed by o or a, the "K" sound is likely to be heard--examples: cap-cop. (100% utility) When C is followed by i, e, or y, the "S" sound is likely to be heard.

6. "G" often has a sound familiar to that of "j" in jump when it is followed by i, e, or y. (80% utility) G also has a hard sound as in goal.

7. When "c" and "h" are next to each other, they make only one sound. (100% utility) ch, sh, th, and wh are speech blends which have two letters but one sound. Examples: fish, what, with, chin, thousand. (ch most often sounds like ch as in chair, 67% utility.) It may also sound like "k" as in character or "sh" as in champagne.

8. "x" often has the "ks" sound as in box. (100% utility)

9. "ph" as an "f" sound as in phonograph. (100% utility)

10. We often use "ck" to make a "k" sound at the end of a word or syllable. (100% utility)

11. The letters oo usually have the double o sound as in food, pool. (100% utility) The letters oo also have the double o sound as in wood. (Linguistic generalization #5)

12. Words having double e usually have the long e sound as in peek, volunteer. (100% utility) (Linguistic generalization #5)
Phonic Generalizations (Cont'd)

13. The letter "y" has 2 sounds when used as a vowel (long i as in cry, long e as in baby). (98% utility) When "y" is used as a vowel, it most often has the sound of long e as in baby. (52% utility) The letters "ay" have the sound of a as in play. (100% utility) (Linguistic generalizations #2 & #5)

deer
cry

14. When there are 2 vowels in a word, one of which is final e, the first vowel is long and the e is silent. (63% utility) (Linguistic generalization #4)

15. The two letters ow together make either the long o sound we hear in slow, elbow— or they make the "ou" sound we hear in mouth, such as: crowd, scowl. (100% utility) (Linguistic generalization #5)

16. When a word begins with "kn" the k is silent. When a word begins with "wr," the "w" is silent. When "ght" is seen in a word, the "gh" is silent. Other consonants are sometimes silent as "1" in chalk, "b" as in thumb. (100% utility)

17. When the letter i is followed by the letters gh, the i usually is long and the gh is silent. (100% utility) (Linguistic generalization #6)

18. The letter q always is followed by "u" to make a "kw" sound. (100% utility)

19. We usually make the vowel you hear in joy and boil with "oi" and "oy." (100% utility) (Linguistic generalization #5)

20. When two vowels are together and the first is "a" and the second is "i," the "a" usually is long and the "i" is silent. (83% utility) (Linguistic generalization #5)

21. When two vowels are together and the first vowel is "o" and the second is "a," the "o" is usually long and the "a" is silent. (86% utility) (Linguistic generalization #5)

22. The letter a has the same vowel sound when it is followed by w, u, or l. (84% utility) (Linguistic generalization #5)

23. When a is followed by r and final e, we usually expect to hear the sound heard in care. (99% utility)
Phonic Generalizations (Cont'd)

24. We change noun endings to form plurals. We add s or es, or change final y to i. Words ending in sh, ch, x, s, usually add es. Ex: dishes, churches, boxes, bosses.

25. When words end with a consonant and "y," we usually change "y" to "i" before adding an ending—candy, candies.

26. We usually change verb endings when we want to form the past tense of verbs. We add ed to most verbs. We add d to verbs which end in e. Sometimes we double the final consonant of a verb before we add ed. Ex: jump, jumped; hop, hopped; hope, hoped. (Spelling generalization #1)

27. We change adjective endings by adding r and st or er and est. Sometimes we change a final y to i before we add er or est. Ex: friendly, friendlier, friendliest; cold, colder, coldest; big, bigger, biggest; brave, braver, bravest. (See #24 & Spelling #1)

28. We change word endings when we form participles by adding ING. Sometimes we drop a final e before we add ing. Ex: snore, snoring; rap, rapping; jump, jumping. (See Spelling #2)

29. We often put words together to make compound words. Ex: pigpen, eyebrow.

30. There are common prefixes which we use with words to change their meanings. Ex: redo; defame; disapprove; express; protect; prepare; incomplete; improper; unable; entire; confess. If a, in, re, ex, de, or be is the first syllable in a word, it is usually unaccented. (83% utility)

31. There are common suffixes which we add to many words to change their parts of speech. Ex: swiftly, rocky, neatness, agreement, comfortable, dangerous, allowance, careless, careful, defensive, etc.

32. When long words are not compounds or have no familiar prefixes or suffixes, we count the vowels to find how many syllables. We do not count silent vowels. Then we divide the word into syllables. (Do not divide consonant blends or digraphs.) Examples: pho/co/gr a ph c v/cv/c v c

When we get vowel-consonant-consonant-vowel, we divide between the consonants. Then we find out if the vowels in the syllables are long or short. If a syllable ends with a vowel, it is most often a long
Phonics Generalizations (Cont'd)

32. (Cont'd)

- vowel. (go, no, etc.) If a syllable ends with a consonant, the vowel is more often short (mat, bat). If the vowel is followed by r, the vowel is neither long nor short. (92% utility)
- Examples: mat/ter -- vol/ca/no -- mar/ket
cvc/cvc
cvc/cv,cv
cvc/cvc

33. When the first vowel element in a word is followed by th, ch, sh, these symbols are not broken and may go with either the first or second syllable. (100% utility)
- Ex: atheism.

34. In words ending in le, the consonant before le usually begins the last syllable and the e is silent. Ex: puzzle, table.
(78% utility)

A Note about Grade Levels

"Most of the formulas and vocabulary specifications now used for grading primary-level books are based on the standards of the basal readers published in the late 1940's and early 1950's. If we do not develop new standards, we will be overestimating difficulty and underchallenging the children.

Even before changes in published materials are made, schools should take the ceilings of the levels of readers from which children now receive instruction. The "skill-building" exercises suggested in the manuals and in the work books are not all needed. In fact, as we learned from the basal-reader analysis, many of the exercises are of questionable value." 4

LINGUISTIC GENERALIZATIONS

1. (The single or short vowel pattern) When there is a single vowel within a one syllable word, the vowel is short. One or more consonants may precede the vowel, more than one consonant may follow. Ex: catch, that, witch, chip, stretch, swoosh, chip, clump, lump, etc. Pattern known as CVC.

2. (Vowel with r pattern) A vowel and r represent a special sound as in arm, harm, or, for, fur, sir, her. When w precedes or or ar, it modifies the sound as in work, war.

3. (Open vowel pattern) If a single vowel ends a one syllable word, the vowel is long—up, up, my, cry, hu, she. This open vowel pattern may also appear at the end of an accent syllable within a word—in which case it is a long vowel. Ex: ha/dy, du/ty, di/al, po/em.

4. (Vowel with final c pattern) If a vowel is followed by a consonant and final e, the first vowel is usually long. Ex: skate, slide, fuse, hope. (The e has changed the short vowel to long as mat, rate.)

5. (The double vowel pattern) Words may be grouped by the sound of the two vowels in middle position. 1. Double ee—long e sound, heat. 2. Ai sounds like ay as in brain, spray. 3. Oi sounds like oy as in coin, boy. 4. Ou in out sounds like ow in clown. 5. Au in fault sounds like aw as in claw and a as in fall. 6. Ou as in neutron sounds like ow as in know. 7. Double oo may sound like oo as in fool or oo as in good. 8. Ou as in would sounds like oo as in wood. 9. The letters oo usually have a long e sound as in coat.

6. (Special vowel consonant patterns) Words may be grouped by special combinations that break pattern generalization 41. These may be old-cold, bold, igh-sight, flight, might, ong-long, song, wrong, ind-mind, bind, kind.

SPELLING GENERALIZATIONS

1. Most words of one syllable that end in a single consonant following a single vowel, double the final consonant before adding ing or ed. Ex: run, running.

2. A word ending in a silent e usually drops the e before adding a suffix beginning with a vowel. Ex: snore, snoring.

3. A word ending in silent e usually keeps e before a suffix begging with a consonant. Ex: care, careful.

4. Words that sound alike but are spelled differently are called homonyms and are learned through a combination of sound-sight-meaning. horse-hoarse, knight-night, rode-road.
OVERVIEW OF DECODING SKILLS

A. Preparatory skills. Knowledge of sound letter relationships—meaning of words in context.
   1. Auditory perception (listening for sounds in initial, final, and medial positions).
   2. Auditory discrimination (listening for differences between sounds: e.g., hat/cat, cat/cab, sat/sit).
   3. Visual memory (recalling the shapes of letters and words).
   4. Visual discrimination (distinguishing between similar shapes of letters and whole words).
   5. Alphabet recall.

B. Consonants and consonant combinations.
   1. All consonants with single sound. (b, h, j, k, l, m, n, p, r, t, v, w, x, y, z)
   2. Consonant clusters in initial, final, and medial position.
   3. Consonants having 2 sounds. (c as "k" and "g"; g as "g" and "j"; f as "f" and "u"; s as "z" and "z;" etc.)
   5. Silent consonants (knife, write, sighs, night, column, lamb, back).

C. Vowels and vowel combinations
   1. Short vowel patterns: CVC (cat), CVVC, CVC in the accented syllable (wagon).
   2. (E) spelled ea (bread), ie (friend), ai (said). (U) rough, other, some.
   3. Long vowel patterns: VCe (pane), CV (go)
      a. (A) spelled as in day, they, main, sleigh
      b. (E) spelled as in green, each, chief, receive, baby, key
      c. (I) spelled as in high, cry, cried
      d. (O) spelled as in beat, cold, grow
      e. (U) spelled as in new moon
   4. Other vowel sounds as in "a" calm, oo-hook
   5. Effect of r on vowels.
   6. Effect of "l," "lk," "w," and "u" on "a" as in hall, talk, bawl, haul
   7. Diphthongs on house; oi-boil; oy-boy.
   8. Unstressed vowel (Schwa).

D. Structural analysis (to be continually emphasized in intermediate level)
   1. Compounds of 2 or more words
   2. Roots, prefixes, and suffixes

3. Contractions
4. Effect of endings on spelling
   a. silent e ending
   b. one-syllable words ending in single consonant (winning)
   c. words ending in g
   d. words ending in s, x, ch, sh, requiring es
   e. ed endings
5. Syllabication
   a. understanding that a syllable contains one vowel sound
   b. hearing syllables in words
   c. syllabication generalizations
APPENDIX A

Since there may be a tendency on the part of some teachers using this program to feel that they are not "teaching" or that teacher-pupil interaction is at a minimum, some reminders are in order.

A primary goal of Hartford '74 is to develop self-directed learners. As Alan S. Cohen has stated: "...deprived low-achievers can become self-directed learners if we teach them how." Perhaps because it is so obvious, we may overlook the fact that - in a large measure - the fundamental skill of knowing how to learn (or knowing how to teach yourself) is dependent upon communication skills. In reality then, teachers will be applying all skills of communication as they help students become self-directed learners; and more teacher-pupil interaction will occur with this program than occurs in a traditional classroom. Certainly these words of Alan S. Cohen bear repeating: "No other teaching except the 1 to 1 tutorial method provides as much teacher-pupil interaction as the self-directing classroom."2

It can be said that the development of this program has a long history even though the actual writing didn't begin until 1970. The idea of relating all skills in the communication arts complex is not new. In fact, the theory was explored in a series of in-service workshops, conducted by the reading department in 1967, to promote a project entitled Development of the Role of The Language Arts Generalist. The rationale of that project stated: "Language skills are interrelated. Training in one specific area of language arts would not provide the improvement of skills that would accrue if emphasis were given in the entire area of communication skills." In working to implement the theories of skill relatedness and individualization of instruction, some problems were encountered.

This program did not have the funds to make or purchase film loops for handwriting instruction. Of course film loops are useful tools. But since they are not available, teachers should analyze the handwriting practice sheets included in some packets, diagnose the writing problems, and then set aside time for direct instruction of handwriting in small groups for students showing similar needs. Although teachers will be working occasionally with small groups needing extra handwriting instruction, handwriting should not be considered a separate, discrete subject. Instead, teachers are urged to use all writing activities included in the packets to strengthen the student's ability to write legibly.

Another problem met in creating this program was how to supply the teacher-directed lesson when it was needed. To solve this problem, we created tape lessons. Audio cards are also used for work in auditory discrimination and sound symbol relationships. In some cases, teachers may still wish to have additional teacher-directed reading lessons. They should feel free to do whatever they feel is required to assist students. However, it is hoped that teachers will see the implications in the following: "...our observations of beginning reading classrooms for disadvantaged children reveal that they do not read enough in the classroom. Either the teacher talks too much or the children sit and listen while one child reads. The actual amount of time each child spends reading for pleasure and/or information is quite short. A recent study indicated that 47 to 49 percent of the classroom time designated as the reading period was spent by teachers talking to or at their pupils."3

1Cohen, Alan S. Teach Them All to Read, P. 246.  
2Ibid, p. 239.  
APPENDIX B

Principles that Guided the Selection and Creation of Materials

It was the consensus of the committee that materials for this program should be:

1. **Accessible.** Good teachers can do a good job teaching skills with any materials; but often a good teacher is frustrated when she must hunt for materials geared toward meeting a specific learning need. The materials are necessary to meet the need of a student at the moment the need arises. The materials for this program should be on hand; and should be coded or indexed to ease the student's or teacher's task of finding them.

2. **Varied.** We should not as teachers presuppose that a student is "stuck with" one learning style for the rest of his life. Rather, we should provide the student with multisensory stimuli that will develop all possible learning modalities. We should provide a variety of settings (alone, small groups, large groups) in order to train the student to function in many different environments.

3. **Purposeful.** Learning should be based upon relevant, high-priority objectives that have been predetermined by teachers. And we should use materials that are designed to match the objective. This does not mean that students cannot create new objectives or use other materials. It does mean that we as teachers must assume some of the responsibility for learning and recognize the fact that when some students are left to their own devices they will not always find a purposeful or constructive objective.

4. **Thoughtful.** Learning experiences should be based upon valid research. They should be sequenced by degree of sophistication and mastery in order to provide security and success for the learner. Learning should be fun. Insecurity and frustration are not fun. Learning becomes a hateful process when learners are asked to complete tasks which are above or below their present capabilities or interests.

5. **Flexible.** It is recognized that all languages change. The materials should allow the teacher to accept the student's style of expressing himself and use this as a base to broaden the student's language experiences.

6. **Child-Centered.** Materials should be based upon student interest and motivation. It is often difficult to make a valid assessment of materials that indeed interest students. Whenever possible we should use materials that have already been proven to have high student interest. When specific materials are not available commercially, these should be written by teachers who have a practical knowledge of student abilities and interests. Needless to say, no offensive materials should ever be included. However, this does not imply censorship. We cannot censor all printed materials that are available to students outside of school. But we can teach them to read critically.

7. **Individualized.** The materials should be task oriented so that a student may proceed from task to task according to his own learning rate. The materials should be self-instructional and self-correcting.
Evaluation

If you complete this sheet - please send it to the Curriculum Office, Attention: Alice Fraser, Editor for Curriculum Publications. Copies of other objectives printed in the original working paper will be sent upon request.

1. Are some objectives unnecessary? Which ones?

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

2. Are there better activities for a particular objective? What are they?

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

3. Other suggestions.
