This annotated bibliography, which is an addition to "Day Care: An Annotated Bibliography," contains approximately 90 items published between 1966 and 1971. Books, pamphlets, magazine articles, research papers, and reports are included in this list. All are sources that the Day Care Policy Studies Group examined for a study undertaken for the Office of Economic Opportunity. These references are grouped in twelve categories as follows: 1. General Issues, 2. Child Development, 3. Specific Programs, 4. Personnel, 5. Economic Issues, 6. Licensing Standards, 7. Legislation and Regulation, 8. Special Issues, 9. Evaluation, 10. Facilities and Supplies, 11. General Resources, 12. Public Schools. There is an author index at the end of the bibliography. Many items of general educational interest are included, so that this list would be of value not only to those concerned with the day care field, but to many types of professionals involved in working with children. (For related documents, see PS 005 969-982.) (AL)

December 1971
ADDITION TO

DAY CARE: AN ANNOTATED BIBLIOGRAPHY

REVISED SEPTEMBER 1971

The September Revision contained approximately 1500 items
The December issue contained approximately 220 items
This addition contains approximately 90 items
FOREWORD

This final report is submitted to the Office of Economic Opportunity by the Day Care Policy Studies Group in fulfillment of Contract B00-5121. This report presents the research undertaken by the Day Care Policy Studies Group and does not necessarily represent the policies or positions of the Office of Economic Opportunity.

The final report is presented in two sections; Part I Alternative Federal Day Care Strategies for the 1970's: Summary Report, and Parts II through X, supporting appendices to the summary report.

The following separately bound volumes are included:

II  Volume 1  Child Care Programs: Estimation of Impacts and Evaluation of Alternative Federal Strategies
     Volume 2  Appendixes to Child Care Programs: Estimation of Impacts and Evaluation of Alternative Federal Strategies
     Volume 3  Measurements of Impacts of Child Care Programs

III  Existing Day Care Legislation

IV  Volume 1  Costs of Day Care
     Volume 2  Appendix to Costs of Day Care: Proceedings of a Workshop

V  Challenges in Day Care Expansion

VI  Public Opinion Toward Day Care

VII  Types of Day Care and Parents' Preferences
In addition to this final report and supporting technical appendixes, the Day Care Policy Studies Group has provided the following supporting documents to the Office of Economic Opportunity in fulfillment of this contract.

- An Explication of Some Alternative Federal Day Care Strategies for the 70's
- Potential Impacts from Child Care
- Considerations in the Evaluation of Alternative Funding Mechanisms for Day Care Services
- The Effect of Present and Proposed Tax Deductions for Child Care
- Emerging Findings and Implications for the Implementation of the Day Care Provisions of H.R.1 and OEO R & D in Day Care
- Pending Federal Legislation Pertaining to Day Care
- Review of Pending Day Care Legislation
- Benefit/Cost Analysis of Day Care Programs Under a Family Assistance Plan
- The Public's Opinion of Day Care
- Paraprofessionals in Day Care
- Some Implications of the Provision of Day Care Services
- Day Care: An Annotated Bibliography Monthly Supplements
- Questions Relating to the Federal Role in Day Care (Unpublished)
- Evidence of Interest by States and Local Governments in Implementing Day Care and Preschool Educational Programs (Unpublished)

1. GENERAL ISSUES

Caldwell, Bettye M. "A Timid Giant Grows Bolder." SATURDAY REVIEW, 20 February 1971, pp. 47-49

The author traces the changes the word and the field of "day care" have gone through, noting its advocacy by different groups at different times for different reasons. However, she sees this pull in one direction and then another as keep- ing day care from making policy, rather than following it only. Her solution to make day care "a powerful instrument of social policy" is a forum in public education.

DAY CARE EXPECTATIONS. New York: National Study Service, 1971. 8 pp. 1.00

Day care is viewed as a partial answer to breaking the cycle of public dependency, but quality day care is viewed as child care with a strong child-development program.

Evans, E. Belle; Shub, Beth; and Weinstein, Marlene. DAY CARE: HOW TO PLAN, DEVELOP, AND OPERATE A DAY CARE CENTER. Boston: Beacon Press, 1971. 337 pp. 6.95

DAY CARE offers step-by-step guidance for planning, developing, and operating a high-quality day care center for pre- school children. The book presents alternative ideas and solutions appropriate to laymen as well as professionals, and to small parent cooperatives as well as large federally funded enterprises.

A GUIDE FOR MANAGERS OF CHILD DAY CARE AGENCIES. Phoenix: Migrant Opportunity Program, 1969. 70 pp. ERIC, 3.29

"This guide was compiled by a group of rural Arizona day care center managers working under the Migrant Opportunity Program (MOP) established in 1965. The managers were previously inexperienced and, at the end of two years, were interested in self-improvement and more efficient ways to perform their jobs. Their collaboration and idea exchange, based on their actual experiences, resulted in this guide."

Matheson, Helen. DO YOU NEED DAY CARE? (Reprinted from the WISCONSIN STATE JOURNAL) 5 pp. 1.00

Check lists for care in family homes and centers have been suggested by about 74 day care operators, teachers, parents, licensing agents, and child development specialists to help parents evaluate day care services.
McFadden, Dennis N. FINAL REPORT ON PRESCHOOL EDUCATION TO OHIO DEPARTMENT OF EDUCATION. Columbus, Ohio: Columbus Laboratories, Battelle Memorial Institute, 1969. 120 pp. ERIC, 6.10

"The objectives of this report are to determine whether there is a need to establish a statewide policy of early education in Ohio, to define what priorities are implied by such a need, and to suggest relevant recommendations for the establishment of a policy, if needed. Sixteen chapters of this report present information from research literature on the development of abilities or skills of young children necessary for school achievement."

NEW CONSIDERATIONS IN EARLY CHILDHOOD DEVELOPMENT: A SYMPOSIUM. Washington, D.C.: Day Care and Child Development Council of America, 1971. 95 pp. 3.00

A group of workshops at the National Conference on Social Welfare brought together people from a variety of disciplines -- social work, early childhood education, psychology -- as well as operators of several programs for young children. The purposes of the sessions were to relate social work practice to other developments in the early childhood field, to discuss new knowledge and insights which have emerged from research, and to provide information about programs and program models with which practitioners have been experimenting.

This report summarizes the fact finding and recommendations of almost 8,000 people in Illinois who participated in preparing for the 1970 White House Conference on Children and Youth. It is divided into the following four sections: delivery of services which deals with the broader philosophy, problems, and priorities relating to the ways agencies and institutions reach and help young people; youth's role in society which is concerned with youth's quest for identity; the family unit which focuses on the conservation of the family as a natural base and the collaborative role of agencies in the education process.

Guidelines cover the following areas: services and program provided, funding, policy making and administration, site, operating funds, staff, and parent programs.
2. CHILD DEVELOPMENT

A. GENERAL

"Specific suggestions are offered for mother-infant activities, sequenced according to developmental levels, which foster the physical and mental development of the infant and the socio-emotional relationship between mother and infant. The activities are intended for use by professionals, paraprofessionals, and mother-teacher aides who work with infants in Day Care and Home Bound programs."

Berk, Laura E. EFFECTS OF DURATION OF A NURSERY SCHOOL SETTING ON ENVIRONMENTAL CONSTRAINTS AND CHILDREN'S MODES OF ADAPTATION. Chicago: University of Chicago, Early Education Research Center, 1971. 23 pp. ERIC, 3.29

"This study is concerned with the way in which children's naturally occurring behaviors change over a period of time as they adapt to a nursery school setting. The results illustrate a basic conception of ecological psychology, that the program of an environment's inputs to individuals changes if its ecological properties change -- in this case, if the duration of the setting increases."

Cherry, Ralph W. IMPLICATIONS OF CHILD GROWTH AND DEVELOPMENT FOR SCHOOL PLANT DESIGN. Bryan, Texas: Caudill, Rowlett, Scott and Associates, 1956. 7 pp. ERIC, 3.29

Based on the belief that planning of school plants must be preceded by careful study of child growth and development, this paper discusses the following principles: development is a product of two factors -- learning and growth; human growth and development follow an orderly pattern; individuals differ in rate, pattern, and ultimate level of development, and all aspects of growth and development are interrelated.

A look at some of the ways business is cashing in on the preschool market and the question of what the aims of education should be.
A DEMONSTRATION PROJECT IN GROUP CARE OF INFANTS. Greensboro:
University of North Carolina, Institute for Child and Family

The objectives of Phase II of this infant care project are
to produce a variety of educational materials and to offer
training opportunities for individuals, largely at para-
professional levels, who give care to infants and toddlers;
to produce for various communications media interpretive
materials that define quality programs for infants and tod-
dlers; and to test the hypothesis that day home care is
better suited to the needs of children under three years of
age than is group care.

Deutsch, Martin. INTERIM PROGRESS REPORT. PART I: CURRICULUM,
PARENT PROGRAM, IN-SERVICE TRAINING, EXTRAMURAL TRAINING, AND
DISSEMINATION: PART II: RESEARCH AND EVALUATION. New York: New
York University, School of Education, Institute for Developmental
Studies, 1967. 579 pp. 10.00

The work of the Institute for Developmental Studies has been
concerned, in large part, with the social and academic prob-
lems of environmentally disadvantaged children in the areas
of research, curriculum innovation training, community in-
volvement, and comprehensive evaluation.

EFFECTS OF FACILITIES ON EDUCATIONAL ACHIEVEMENT: A SELECTED
BIBLIOGRAPHY. Madison: University of Wisconsin, ERIC Clearing-
house on Educational Facilities, 1970. 57 pp. ERIC, 3.29

References in this bibliography are grouped into six sections:
learning and the learning environment; classroom environment;
school and educational environments; environmental influences
upon learning and education; color, thermal environment,
lighting and visual environment, acoustical environment;
controlled and physical environments; and miscellaneous.

Evans, E. Belle; Shub, Beth; and Weinstein, Marlene. DAY CARE:
HOW TO PLAN, DEVELOP, AND OPERATE A DAY CARE CENTER. Boston:
Beacon Press, 1971. 337 pp. 6.95

DAY CARE offers step-by-step guidance for planning, developing,
and operating a high-quality day care center for preschool
children. The book presents alternative ideas and solutions
appropriate to laymen as well as professionals and to small
parent cooperatives as well as large federally funded enter-
prises.

"This paper attempts to organize the available literature on day care programs currently in operation or in the proposal state for infants under two years of age. Although consideration is given to many facets of these programs, special emphasis is placed on their goals for psychological development in the first two years, the curricula which have been developed to accomplish these goals and the evaluation of these curricula."

HARVARD EDUCATIONAL REVIEW 39(1969):147 pp. 4.75

"Architecture and Education" is the theme of this issue. The intent "is to explore the relationship of architectural values to significant human experience and in particular to basic educational goals -- to question if and how the physical environment informs and shapes and liberates the human spirit."

The Tucson Early Education Model was designed originally to develop a different kind of early education experience for the Mexican-American children of Tucson who came largely from the poverty areas of the city. The model was implemented in 68 classrooms, grades 1-3, in eight metropolitan public schools.

The author notes that between 1965 when EQUALITY OF EDUCATIONAL OPPORTUNITY was written and 1970, national priorities had shifted away from integration and back to "separate but equal." His purpose in this paper is to demonstrate that despite changes in national policy, the conclusions of EEOR remain correct, namely that family background and peers have a large effect on children, whereas teachers and physical surroundings have small effects.

This report is based on data for 516 urban families considered to be representative of Guilford County, N.C. Findings are reported and recommendations made on the basis of these findings.

McFadden, Dennis N. FINAL REPORT ON PRESCHOOL EDUCATION TO OHIO DEPARTMENT OF EDUCATION. Columbus, Ohio: Columbus Laboratories, Battelle Memorial Institute, 1969. 120 pp. ERIC, 6.10

"The objectives of this report are to determine whether there is a need to establish a statewide policy of early education in Ohio, to define what priorities are implied by such a need, and to suggest relevant recommendations for the establishment of a policy, if needed. Sixteen chapters of this report present information from research literature on the development of abilities or skills of young children necessary for school achievement."

NEW CONSIDERATIONS IN EARLY CHILDHOOD DEVELOPMENT: A SYMPOSIUM. Washington, D.C. Day Care and Child Development Council of America, 1971. 95 pp. 3.00

A group of workshops at the National Conference on Social Welfare brought together people from a variety of disciplines -- social work, early childhood education, psychology -- as well as operators of several programs for young children. The purposes of the sessions were to relate social work practice to other developments in the early childhood field, to discuss new knowledge and insights which have emerged from research, and to provide information about programs and program models with which practitioners have been experimenting.

Among the tools named for prevention of public dependency is day care service. It is recommended that this service have a child development focus for all children in slum or low income neighborhoods in order to orient the children to new life experiences and expose the parents to living conditions better than they have ever known.

Recommendations from the 1960 White House Conference on Children and Youth are divided into the following categories: general, physical environment, social environment, personnel, religion, values and ideals, human rights, children and youth as individuals, and world concerns.

This report summarizes the fact finding and recommendations of almost 8,000 people in Illinois who participated in preparing for the 1970 White House Conference on Children and Youth. It is divided into the following four sections: delivery of services which deals with the broader philosophy, problems, and priorities relating to the ways agencies and institutions reach and help young people; youth's role in society which is concerned with youth's quest for identity; the family unit which focuses on the conservation of the family as a natural base; and the collaborative role of agencies in the education process.

RESEARCH STUDIES ON KINDERGARTEN EDUCATION. Albany: State Education Department, University of the State of New York, 1964. ERIC, 3.29

This listing of research is divided into the following areas: values in kindergarten education, entrance age and class size as factors in kindergarten education, research on beginning reading with implications for kindergarten education, and recent research on intellectual development and learning with implications for kindergarten education.

"In Kansas City, Missouri, 208 Negro five year olds were studied to examine the influence of housing upon child development and to compare the relative influence of housing on Head Start and non-Head Start children."

Schwartz, Conrad. THE EFFECTS OF MOTHERS' PRESENCE AND PREVISITS ON CHILDREN'S EMOTIONAL REACTIONS TO STARTING NURSERY SCHOOL. Syracuse, New York: Syracuse University, Syracuse Center for Research and Development in Early Childhood Education, National Laboratory on Early Childhood Education, 1969. 36 pp. ERIC, 3.29

This study investigated the emotional effects of various treatment conditions on children starting nursery school. It concluded that most middle class children readily adapt to a nursery school situation, regardless of treatment conditions at time of entrance.
B. PHYSICAL

The general subject of this bibliography is the physical aspects of early childhood education and includes three subdivisions: genetics, sensory-motor processes, and growth.

The three purposes of this final report were to evaluate the causes of anemia through detailed studies of urban New Orleans preschool children and their mothers, to study the effect of dietary supplementation of school feeding programs upon the nutritional status of groups of anemic and non-anemic children in preschool and kindergarten programs, and to use nationally standardized procedures to collect and integrate New Orleans data with data obtained from Mississippi and Alabama studies on rural and semi-urban children.

A STUDY OF VISUAL PERCEPTIONS IN EARLY CHILDHOOD. Silver City, New Mexico: Western New Mexico University, 1967. 95 pp. ERIC, 3.29

A three-year study of 510 children's visual perceptions was conducted at Western New Mexico University. The relation of visual perceptions to cultural deprivation and to membership in a non-dominant culture was investigated. The second aspect of the study regarded the finding of the most effective program for overcoming perceptual difficulties.

C. SOCIAL-EMOTIONAL

"The study asks how specific characteristics of preschool settings affect the natural occurrence of environmental constraints and children's adaptations to them. A Montessori class, a University Nursery School, and two Head Start classes comprised the observed settings."

"The central problem of this study is the relationship between the child's perception of teacher and of mother. It is based on the theoretical assumption that childhood feelings and attitudes toward parents are displaced upon others and thus influence perception of others, as emphasized by the psychoanalytic concept of transference."

Honig, Allice S. FINAL REPORT ON "APPROACH." Syracuse: Syracuse University, 1970. 13 pp. Free

The objective of this study has been the development and application of an observation coding technique for use in naturalistic assessments of the young child with particular reference to cognitive and emotional social development.

L'Abate, Luciano. DESIGN FOR A PLAYROOM. Atlanta: Georgia State College, n.d. 14 pp. ERIC, 3.29

The author makes recommendations for the construction of play therapy facilities which would not interfere with clinical practice but would permit the gathering of research data concerned with the effectiveness of play therapy.

"Behavioral research presents an analysis of the classroom in which sources of academic success or failure are sought in contingencies of reinforcement functioning in the child's learning environment."

"The focus of this study is to review and analyze current programs, practices, and procedures of child mental health consultation in order to generate an in-depth, empirically derived, conceptual framework which will assist in the development of new programs of training and research in consultation."

This is the first in a series of reports on a study of the relationship between factors in the home and school achievement. The two home variables which were found to be useful predictors of achievement were the parents' anticipated education for the child and number of books in the home suitable for the child.

Fargo, George A.; Roth, Colleen P.; and Cade, Theo M. EVALUATION OF AN INTERDISCIPLINARY APPROACH TO PREVENTION OF EARLY SCHOOL FAILURE. Honolulu: University of Hawaii, 1968. 51 pp. ERIC, 3.29

The objectives of this Head Start research project were (1) to focus interest on the need for early intervention with poorly-functioning preschool children with the intent to offer services of a preventive rather than remedial function; (2) to demonstrate the need for and value of an interdisciplinary approach to diagnosis and educational planning; and (3) to serve as a training function for prospective teachers and pediatric residents.

Furno, Orlando F., and Collins, George J. CLASS SIZE AND PUPIL LEARNING. Baltimore, Maryland: Baltimore City Public Schools, 1967. 153 pp. ERIC, 6.58

"To test the hypothesis that pupil achievement is inversely related to class size, a 5-year study (1959-1964) examined the relationship between class size and pupil achievement in reading and arithmetic."

Honig, Allice S. FINAL REPORT ON "APPROACH." Syracuse: Syracuse University, 1970. 13 pp. Free

The objective in this study has been the development and application of an observation coding technique for use in naturalistic assessments of the young child with particular reference to cognitive and emotional social development.

The specific home environmental factors examined in this study were maternal teaching style, maternal language style, children's daily schedules, and home prereading activities.
E. DISADVANTAGED POPULATIONS

This research on parents' acquisition of teaching skills was conducted in three phases. The first was designed to determine if the literature that described the use of reinforcement by parents was accurate for both middle class mothers and for the target population of lower class mothers. The learning strategies most helpful to parents were developed. During phase two, one parent was worked with for 15 weeks using the strategies. Phase three consisted of working with six mothers using the same design as that of phase two, in order to evaluate whether the reinforcement skills training program had similar effects on other parents.

Deutsch, Martin. INTERIM PROGRESS REPORT. PART I: CURRICULUM, PARENT PROGRAM, IN-SERVICE TRAINING, EXTRAMURAL TRAINING, AND DISSEMINATION; PART II: RESEARCH AND EVALUATION. New York: New York University, School of Education, Institute for Developmental Studies, 1967. 579 pp. 10.00

The work of the Institute for Developmental Studies has been concerned, in large part, with the social and academic problems of environmentally disadvantaged children in the areas of research, curriculum innovation training, community involvement, and comprehensive evaluation.

This report contains a series of studies that grew out of the parent education project of the Institute. The objectives and general design of the project consisted of instruction of 200 environmentally disadvantaged mothers by parent educators using a sequence of infant stimulation exercises conducted in the home.

Among the tools named for prevention of public dependency is day care service. It is recommended that this service have a
child development focus for all children in slum or low income neighborhoods in order to orient the children to new life experiences and expose the parents to living conditions better than they have ever known.

"The general purpose of this paper is to evaluate the reliability of a new individual intelligence scale, the Wechsler Preschool and Primary Scale of Intelligence. A secondary purpose is to consider the idea that perhaps carefully administered and specifically renormed conventional intelligence tests might be a better solution to cultural-bias problems than the culture-free intelligence test."

F. PARENT-CHILD INTERACTION

"Specific suggestions are offered for mother-infant activities, sequenced according to developmental levels, which foster the physical and mental development of the infant and the socio-emotional relationship between mother and infant. The activities are intended for use by professionals, paraprofessionals, and mother-teacher aides who work with infants in Day Care and Home Bound programs."

Baldwin, Clara P. INFORMATION EXCHANGE IN MOTHER-CHILD INTERACTIONS. Paper presented at the meeting of the Society for Research in Child Development, March 1969, Santa Monica, California. ERIC, 3.29

"To assess mother-child interaction, 23 mother-child pairs from the West Harlem ghetto (half lower class and half middle class Negroes) and from Washington Square (white middle class) were observed. Children were 3-year-old boys.

This research on parents' acquisition of teaching skills was conducted in three phases. The first was designed to determine if the literature that described the use of reinforcement by parents was accurate for both middle class mothers and for the target population of lower class mothers. The learning strategies most helpful to parents were developed. During phase two, one parent was worked with for 15 weeks using the strategies. Phase three consisted of working with six mothers using the same design as that of phase two, in order to evaluate whether the reinforcement skills training program had similar effects on other parents.

This is the first in a series of reports on a study of the relationship between factors in the home and school achievement. The two home variables which were found to be useful predictors of achievement were the parents' anticipated education for the child and number of books in the home suitable for the child.

This report contains a series of studies that grew out of the parent education project of the Institute. The objectives and general design of the project consisted of instruction of 200 environmentally disadvantaged mothers by parent educators using a sequence of infant stimulation exercises conducted in the home.

The specific home environmental factors examined in this study were maternal teaching style, maternal language style, children's daily schedules, and home prereading activities.

"To determine what kinds of parent behavior are related to the scholastic achievement of inner city elementary school children, 32 high achievers and 32 low achievers in third and fourth grade were selected and interviews were collected from their mothers."

"Both mother and teacher are social agents in the child's environment and provide the foci for the two separate, but related, ongoing studies on reinforcement patterns described in this paper. The long range study goal is to find clues on how to direct teachers and help them act as constructive agents in the child's environment."

Schwartz, Conrad. THE EFFECTS OF MOTHERS' PRESENCE AND PREVISITS ON CHILDREN'S EMOTIONAL REACTIONS TO STARTING NURSERY SCHOOL. Syracuse, New York: Syracuse University, Syracuse Center for Research and Development in Early Childhood Education, National Laboratory on Early Childhood Education, 1969. 36 pp. ERIC, 3.29

This study investigated the emotional effects of various treatment conditions on children starting nursery school. It concluded that most middle class children readily adapt to a nursery school situation, regardless of treatment conditions at time of entrance.
3. SPECIFIC PROGRAMS

A. DAY CARE PROGRAMS

"The purpose of this study was primarily to gather information about working women in Olmsted County and to learn what provisions they made for the care of their preschool age children while they worked. Such data was requested by community leaders in Rochester, who were charged with the responsibility of planning for future community services for all young children in the county."

B. HEAD START PROGRAMS

"The study asks how specific characteristics of preschool settings affect the natural occurrence of environmental constraints and children's adaptations to them. A Montessori class, a University Nursery School, and two Head Start classes comprised the observed settings."

Fargo, George A.; Roth, Colleen P.; and Cade, Theo M. EVALUATION OF AN INTERDISCIPLINARY APPROACH TO PREVENTION OF EARLY SCHOOL FAILURE. Honolulu: University of Hawaii, 1968. 51 pp. ERIC, 3.29

The objectives of this Head Start research project were (1) to focus interest on the need for early intervention with poorly-functioning preschool children with the intent to offer services of a preventive rather than remedial function; (2) to demonstrate the need for and value of an interdisciplinary approach to diagnosis and educational planning, and (3) to serve as a training function for prospective teachers and pediatric residents.

"In Kansas City, Missouri, 208 Negro five year olds were studied to examine the influence of housing upon child development and to compare the relative influence of housing on Head Start and non-Head Start children."

C. INFANT PROGRAMS

The objectives of Phase II of this infant care project are to produce a variety of educational materials and to offer training opportunities for individuals, largely at para-professional levels, who give care to infants and toddlers; to produce for various communications media interpretive materials that define quality programs for infants and toddlers; and to test the hypothesis that day home care is better suited to the needs of children under three years of age than is group care.

"This paper attempts to organize the available literature on day care programs currently in operation or in the proposal stage for infants under two years of age. Although consideration is given to many facets of these programs special emphasis is placed on their goals for psychological development in the first two years, the curricula which have been developed to accomplish these goals and the evaluation of these curricula."

D. PRESCHOOL EDUCATION PROGRAMS

Berk, Laura E. EFFECTS OF VARIATIONS IN THE NURSERY SCHOOL SETTING ON ENVIRONMENTAL CONSTRAINTS AND CHILDREN'S MODES OF ADAPTATION. Paper presented at the American Educational
"The study asks how specific characteristics of preschool settings affect the natural occurrence of environmental constraints and children's adaptations to them. A Montessori class, a University Nursery School, and two Head Start classes comprised the observed settings."

Hughes, Marie M.; Wetzel, Ralph J.: and Henderson, Ronald W.

The Tucson Early Education Model was designed originally to develop a different kind of early education experience for the Mexican-American children of Tucson who came largely from the poverty areas of the city. The model was implemented in 68 classrooms, grades 1-3, in eight metropolitan public schools.

"The purpose of this study was primarily to gather information about working women in Olmsted County and to learn what provisions they made for the care of their preschool age children while they worked. Such data was requested by community leaders in Rochester, who were charged with the responsibility of planning for future community services for all young children in the county."

E. SCHOOL-AGE PROGRAMS

No entries.

F. FOREIGN PROGRAMS

Blackstone, Tess. PRE-SCHOOL EDUCATION IN EUROPE. Strasbourg, France: Council of Europe, Council for Cultural Cooperation, 1970. 43 pp. ERIC, 3.29

"The extent and nature of preschool education in Europe is discussed, with reference to England and Wales, France, the Netherlands, Norway and Sweden. Reports on preschool education in these countries give examples of both an early and a late start to compulsory education, very extensive
and very limited preschool provision, and the effects of private and state support."

Jacoby, Susan. "Who Raises Russia's Children?" SATURDAY REVIEW, 21 August 1971, pp. 41-43

Nursery-kindergartens that would be considered total day care centers in the United States are the basic units of preschool education in the Soviet Union. They enroll children between the ages of two months and seven years. Lack of enough facilities and concern over leaving children for long working days reveal problems similar to other countries where more working mothers are creating a rising need for adequate day care.

The classroom environment of two infant schools (ages 5-7), two junior schools (ages 7-11), one primary (infant and junior) school, and two high schools (ages 11-15) in Leicestershire County, England, is described in this report.

The author presents the history, theory, and practice of England's primary schools because of her discovery that England "had what I considered to be 'good' education, even with large classes, and that it provided this in the state framework."

G. FAMILY PROGRAMS

"The purpose of this study was primarily to gather information about working women in Olmsted County and to learn what provisions they made for the care of their preschool age children while they worked. Such data was requested by community leaders in Rochester, who were charged with the responsibility of planning for future community services for all young children in the county."

13
H. PRIVATE-FOR-PROFIT PROGRAMS

A look at some of the ways business is cashing in on the preschool market and the question of what the aims of education should be.

"Working Mothers Get a Break; So Do Their Kids and Project Owners." APARTMENT CONSTRUCTION NEWS, June 1971, pp. 19-20

This article describes some of the day care facilities which have been included in apartment developments. Developers supply the facilities and then turn the operation over to such organizations as Kinder Care Nursery Schools, Inc.

I. WORK-RELATED PROGRAMS

A. STAFFING

Evans, E. Belle; Shub, Beth; and Weinstein, Marlene. DAY CARE: HOW TO PLAN, DEVELOP, AND OPERATE A DAY CARE CENTER. Boston: Beacon Press, 1971. 337 pp. 6.95

DAY CARE offers step-by-step guidance for planning, developing, and operating a high-quality day care center for preschool children. The book presents alternative ideas and solutions appropriate to laymen as well as professionals, and to small parent cooperatives as well as large federally funded enterprises.

A GUIDE FOR MANAGERS OF CHILD DAY CARE AGENCIES. Phoenix: Migrant Opportunity Program, 1969. 70 pp. ERIC, 3.29

"This guide was compiled by a group of rural Arizona day care center managers working under the Migrant Opportunity Program (MOP) established in 1965. The managers were previously inexperienced and, at the end of two years, were interested in self-improvement and more efficient ways to perform their jobs. Their collaboration and idea exchange, based on their actual experiences, resulted in this guide."

Seven education researchers met in Washington to help policymakers "in determining priorities in the recruitment, training, retraining, and utilization of educational personnel." Summaries of the papers presented at the conference are given in this publication.

This report provides an overview of paraprofessionals in education and makes recommendations for national, state, and local education associations to further the training and educational growth of paraprofessionals.

The goals of the experimental program described are the modification of curricular emphases, classroom practices, and pedagogical orientations of teachers, with particular focus upon the beginning school years for culturally disadvantaged children.

"Both mother and teacher are social agents in the child's environment and provide the foci for the two separate, but related, ongoing studies on reinforcement patterns described in this paper. The long range study goal is to find clues on how to direct teachers and help them act as constructive agents in the child's environment."

B. TRAINING

The objectives of Phase II of this infant care project are to produce a variety of educational materials and to offer training opportunities for individuals, largely at paraprofessional levels, who give care to infants and toddlers; to produce for various communications media interpretive materials that define quality programs for infants and toddlers; and to test the hypothesis that day home care is better suited to the needs of children under three years of age than is group care.

Deutsch, Martin. INTERIM PROGRESS REPORT. PART I: CURRICULUM, PARENT PROGRAM, IN-SERVICE TRAINING, EXTRA-MURAL TRAINING, AND DISSEMINATION; PART II: RESEARCH AND EVALUATION. New York: New York University, School of Education, Institute for Developmental Studies, 1967. 579 pp. 10.00

The work of the Institute for Developmental Studies has been concerned, in large part, with the social and academic problems of environmentally disadvantaged children in the areas of research, curriculum innovation training, community involvement, and comprehensive evaluation.
Evans, E. Belle; Shub, Beth; and Weinstein, Marlene. DAY CARE: HOW TO PLAN, DEVELOP, AND OPERATE A DAY CARE CENTER. Boston: Beacon Press, 1971. 337 pp. 6.95

DAY CARE offers step-by-step guidance for planning, developing, and operating a high-quality day care center for preschool children. The book presents alternative ideas and solutions appropriate to laymen as well as professionals, and to small parent cooperatives as well as large federally funded enterprises.

A GUIDE FOR MANAGERS OF CHILD DAY CARE AGENCIES. Phoenix: Migrant Opportunity Program, 1969. 70 pp. ERIC, 3.29

"This guide was compiled by a group of rural Arizona day care center managers working under the Migrant Opportunity Program (MOP) established in 1965. The managers were previously inexperienced and, at the end of two years, were interested in self-improvement and more efficient ways to perform their jobs. Their collaboration and idea exchange, based on their actual experiences, resulted in this guide."

This is the final report of a training program used to train teachers and aides in early childhood education methods by the means of filmed, written, and videotaped learning episodes.

This report provides an overview of paraprofessionals in education and makes recommendations for national, state, and local education associations to further the training and educational growth of paraprofessionals.

"This paper describes a plan for providing a preface of planned experiences to equip prospective inner-city faculty with the confidence, attitudes, and understanding to provide themselves a chance for a rewarding classroom situation, and therefore their students with opportunities for a better education."
5. **ECONOMIC ISSUES**

A. **SUPPLY AND DEMAND**

This report is based on data for 516 urban families considered to be representative of Guilford County, North Carolina. Findings are reported and recommendations made on the basis of these findings.

"The purpose of this study was primarily to gather information about working women in Olmsted County and to learn what provisions they made for the care of their preschool age children while they worked. Such data was requested by community leaders in Rochester, who were charged with the responsibility of planning for future community services for all young children in the county."

B. **COST/BENEFIT**

"The purpose of this investigation was to design a classification system for determining the operating costs of day care centers for preschoolers. The basic hypothesis of the study was that ownership arrangements and programs of day care centers could both be used to predict such characteristics as variations in clientele, facilities, staffing patterns, and organizational arrangements."
C. **EMPLOYMENT AND LABOR FORCE**

No entries.

D. **PARTICIPATION FOR AFDC POPULATIONS AND WOMEN IN GENERAL**

This paper describes, explains, and speculates on the effects of some of the key 1967 public welfare amendments to the Social Security Act on the capacity for self-support and on the employability of adults in the AFDC and AFDC-UP programs.

E. **POVERTY ISSUES**

No entries.

F. **FUNDING SOURCES**

Evans, E. Belle; Shub, Beth; and Weinstein, Marlene. *DAY CARE: HOW TO PLAN, DEVELOP, AND OPERATE A DAY CARE CENTER*. Boston: Beacon Press, 1971. 337 pp. 6.95

DAY CARE offers step-by-step guidance for planning, developing, and operating a high-quality day care center for preschool children. The book presents alternative ideas and solutions appropriate to laymen as well as professionals, and to small parent cooperatives as well as large federally funded enterprises.

A GUIDE FOR MANAGERS OF CHILD DAY CARE AGENCIES. Phoenix: Migrant Opportunity Program, 1969. 70 pp. ERIC, 3.29

"This guide was compiled by a group of rural Arizona day care center managers working under the Migrant Opportunity Program (MOP) established in 1965. The managers were
previously inexperienced and, at the end of two years, were interested in self-improvement and more efficient ways to perform their jobs. Their collaboration and idea exchange, based on their actual experiences, resulted in this guide.

G. COST OF DAY CARE

Evans, E. Belle; Shub, Beth; and Weinstein, Marlene. DAY CARE: HOW TO PLAN, DEVELOP, AND OPERATE A DAY CARE CENTER. Boston: Beacon Press, 1971. 337 pp. 6.95

DAY CARE offers step-by-step guidance for planning, developing, and operating a high-quality day care center for preschool children. The book presents alternative ideas and solutions appropriate to laymen as well as professionals, and to small parent cooperatives as well as large federally funded enterprises.

"The purpose of this investigation was to design a classification system for determining the operating costs of day care centers for preschoolers. The basic hypothesis of the study was that ownership arrangements and programs of day care centers could both be used to predict such characteristics as variations in clientele, facilities, staffing patterns, and organizational arrangements."

H. STATISTICAL DATA

No entries.
6. LICENSING STANDARDS

This compendium of abstracts of state day care licensing regulations has been prepared as part of the National Survey of Day Care Licensing. A uniform format has been used to facilitate state-by-state comparisons. The licensing agency in each state was requested to review the abstracts of that state's regulations to ensure proper interpretation and to correct any errors or omissions.

Licensing requirements are divided into two levels: Level 1, Basic Child Protection, and Level 2, Exceeding Basic Child Protection. The three types of facilities are family day care home, small group day care home, and day care center. Care for infants and school-age children is included.

Matheson, Helen. DO YOU NEED DAY CARE? (Reprinted from the WISCONSIN STATE JOURNAL) 5 pp. 1.00

Check lists for care in family homes and centers have been suggested by about 74 day care operators, teachers, parents, licensing agents, and child development specialists to help parents evaluate day care services.

STANDARDS FOR DAY CARE CENTERS FOR INFANTS AND CHILDREN UNDER 3 YEARS OF AGE. Evanston, Illinois: American Academy of Pediatrics, Committee on Infant and Preschool Child, 1971. 23 pp. 2.00

These standards for quality day care for children under three cover the following areas: basic principles, administration, personnel, records, program, health services, nutrition, and facilities.

This report on phase 1 of the Day Care Licensing Study presents the findings and conclusions of the data gathering phase of a larger three-phase study of day care licensing statutes, regulations, procedures, and practices in the fifty states and the District of Columbia. The principal objective of phase 1 was to determine the status of licensing in the various states and the extent to which the licensing process might be a deterrent to future expansion of day care facilities.
7. LEGISLATION AND REGULATION

This "Legislative Packet" includes comparative analysis of major proposed legislation, a DCCDCA position paper on proposed legislation and descriptive memoranda and analyses of various facets of proposed legislation.
8. **SPECIAL ISSUES**

A. **SPECIAL POPULATIONS**

This bibliography dealing with aspects of poverty in the United States includes citations from the fields of anthropology, demography, economics, physical and mental health, psychology, sociology, and social psychology.

This report summarizes the fact finding and recommendations of almost 8,000 people in Illinois who participated in preparing for the 1970 White House Conference on Children and Youth. It is divided into the following four sections: delivery of services which deals with the broader philosophy, problems, and priorities relating to the ways agencies and institutions reach and help young people; youth's role in society which is concerned with youth's quest for identity; the family unit which focuses on the conservation of the family as a natural base, and the collaborative role of agencies in the education process.

**SOME GENERAL GUIDELINES FOR NAACP SPONSORSHIP AND ADMINISTRATION OF DAY CARE CENTERS FOR CHILDREN.** New York: NAACP, 1971. 8 pp. Free

Guidelines cover the following areas: services and program provided, funding, policy-making and administration, site, operating funds, staff, and parent programs.

B. **PARENT PARTICIPATION**

The work of the Institute for Developmental Studies has been concerned, in large part, with the social and academic problems of environmentally disadvantaged children in the areas of research, curriculum innovation training, community involvement, and comprehensive evaluation.

NEW CONSIDERATIONS IN EARLY CHILDHOOD DEVELOPMENT: A SYMPOSIUM. Washington, D.C.: Day Care and Child Development Council of America, 1971. 95 pp. 3.00

A group of workshops at the National Conference on Social Welfare brought together people from a variety of disciplines -- social work, early childhood education, psychology -- as well as operators of several programs for young children. The purposes of the sessions were to relate social work practice to other developments in the early childhood field, to discuss new knowledge and insights which have emerged from research, and to provide information about programs and program models with which practitioners have been experimenting.

C. COMMUNITY ORGANIZATION

Deutsch, Martin. INTERIM PROGRESS REPORT. PART I: CURRICULUM, PARENT PROGRAM, IN-SERVICE TRAINING, EXTRA-MURAL TRAINING, AND DISSEMINATION; PART II: RESEARCH AND EVALUATION. New York: New York University, School of Education, Institute for Developmental Studies, 1967. 579 pp. 10.00

The work of the Institute for Developmental Studies has been concerned, in large part, with the social and academic problems of environmentally disadvantaged children in the areas of research, curriculum innovation training, community involvement, and comprehensive evaluation.

D. GROUPING

Furno, Orlando F., and Collins, George J. CLASS SIZE AND PUPIL LEARNING. Baltimore, Maryland: Baltimore City Public Schools, 1967. 153 pp. ERIC, 6.58

"To test the hypothesis that pupil achievement is inversely related to class size, a 5-year study (1959-1964) examined the relationship between class size and pupil achievement in reading and arithmetic."

"This report reviews past research on the subject of class size and arrives at a summary of findings that may either aid further research or provide some basis for administrative decisions. The findings touch upon many phases of administrative responsibility and have immediate cost and quality implications."

9. EVALUATION

Deutsch, Martin. INTERIM PROGRESS REPORT. PART I: CURRICULUM, PARENT PROGRAM, IN-SERVICE TRAINING, EXTRA-MURAL TRAINING, AND DISSEMINATION; PART II: RESEARCH AND EVALUATION. New York: New York University, School of Education, Institute for Developmental Studies, 1967. 579 pp. 10.00

The work of the Institute for Developmental Studies has been concerned, in large part, with the social and academic problems of environmentally disadvantaged children in the areas of research, curriculum innovation training, community involvement, and comprehensive evaluation.

A GUIDE FOR MANAGERS OF CHILD DAY CARE AGENCIES. Phoenix: Migrant Opportunity Program, 1969. 70 pp. ERIC, 3.29

"This guide was compiled by a group of rural Arizona day care center managers working under the Migrant Opportunity Program (MOP) established in 1965. The managers were previously inexperienced and, at the end of two years, were interested in self-improvement and more efficient ways to perform their jobs. Their collaboration and idea exchange, based on their actual experiences, resulted in this guide."

Hoepfner, Ralph; Stern, Carolyn; and Nummedal, Susan G.; eds. CSE-ECRC PRESCHOOL/KINDERGARTEN TEST EVALUATIONS. Los Angeles: UCLA Graduate School of Education, 1971. 54 pp. 5.00

The MEAN test evaluation system developed by the Center for the Study of Evaluation reflects four critical areas of concern to test users: Measurement validity, Examinee appropriateness, Administrative usability, and Normed technical excellence. This compilation contains approximately 120 tests, including over 630 subtests, all of which were evaluated with the MEAN system by at least two independent raters.

INDEX AND DESCRIPTION OF TESTS. New York: New York University, School of Education, Institute for Developmental Studies, 1965. 102 pp. 1.00

The principal areas of research with which the Institute for Developmental Studies is concerned include (1) the relationship of differing environments to language development; (2) classroom communication between teachers and children of
various socioeconomic strata; (3) the effects of various psychopharmacological agents on children's learning; (4) the relationships among sensory modality both preference and efficiency, lateral dominance, and psychological development and functioning. The Institute has devised many tests and adapted others for measurement and evaluation. This index provides a brief description of these measurement and evaluation techniques.

The author notes that between 1965 when EQUALITY OF EDUCATIONAL OPPORTUNITY was written and 1970, national priorities had shifted away from integration and back to "separate but equal." His purpose in this paper is to demonstrate that despite changes in national policy, the conclusions of EEOR remain correct, namely that family background and peers have a large effect on children, whereas teachers and physical surroundings have small effects.

"The general purpose of this paper is to evaluate the reliability of a new individual intelligence scale, the Wechsler Preschool and Primary Scale of Intelligence. A secondary purpose is to consider the idea that perhaps carefully administered and specifically renormed conventional intelligence tests might be a better solution to cultural-bias problems than the culture-free intelligence test."
10. FACILITIES AND SUPPLIES

Berk, Laura E. EFFECTS OF DURATION OF A NURSERY SCHOOL SETTING ON ENVIRONMENTAL CONSTRAINTS AND CHILDREN'S MODES OF ADAPTATION. Chicago: University of Chicago, Early Education Research Center, 1971. 23 pp. ERIC, 3.29

"This study is concerned with the way in which children's naturally occurring behaviors change over a period of time as they adapt to a nursery school setting. The results illustrate a basic conception of ecological psychology, that the program of an environment's inputs to individuals changes if its ecological properties change -- in this case, if the duration of the setting increases."

This annotated bibliography contains publications and report listings of the following sources: School Construction Systems Development (SCSD), University Residential Building Systems (URBS), Florida Schoolhouse Systems Project (SSP), Study of Educational Facilities (SEF), and Recherches en Amenagements Scolaires (RAS) Building Systems.

"The systems approach attempts to relate the processes of factory production and school construction in that the problems of the spacing and fitting of construction components are considered at the beginning of the design stage of construction. For the systems approach to insure minimum cost, high quality and flexibility it must be based on production volume, reasonable notice time to industry for tailor-made components, and clearly defined functional goals."

The barriers to more effective school architecture are listed as architectural and educational prejudice, obsolete codes, building complexity, and static thinking. The developments which tend to offset these barriers are group planning, learning walls and space dividers, student centers, landscaping, and humanistic architecture.
Cherry, Ralph W. **IMPLICATIONS OF CHILD GROWTH AND DEVELOPMENT FOR SCHOOL PLANT DESIGN.** Bryan, Texas: Caudill, Rowlett, Scott and Associates, 1956. 7 pp. ERIC, 3.29

Based on the belief that planning of school plants must be preceded by careful study of child growth and development, this paper discusses the following principles: development is a product of two factors -- learning and growth; human growth and development follow an orderly pattern; individuals differ in rate, pattern, and ultimate level of development, and all aspects of growth and development are interrelated.

**CLIMATE CONDITIONING FOR THE LEARNING ENVIRONMENT.** Chicago: Perkins and Will, Architects, 1968. 15 pp. ERIC, 3.29

This report discusses heating, cooling, and ventilation for the classroom in relationship to students' learning abilities. It is designed to assist school boards, administrators, architects and engineers in understanding the beneficial effects of total climate control and in evaluating the climate conditioning systems available for schools.

A look at some of the ways business is cashing in on the preschool market and the question of what the aims of education should be.

"The purpose of this analysis is to provide data against which the relative sizes of public schools in Philadelphia can be compared. The common denominator used here is square footage allocation per pupil. This denominator is reached by dividing the total square footage of the school by the number of students the school is intended to accommodate."

**EFFECTS OF FACILITIES ON EDUCATIONAL ACHIEVEMENT: A SELECTED BIBLIOGRAPHY.** Madison: University of Wisconsin, ERIC Clearinghouse on Educational Facilities, 1970. 57 pp. ERIC, 3.29

References in this bibliography are grouped into six sections: learning and the learning environment; classroom
environment; school and educational environments; environ-
mental influences upon learning and education; color, thermal
environment, lighting and visual environment, acoustical
environment; controlled and physical environments; and
miscellaneous.

GUIDE FOR THE EVALUATION OF SCHOOL FACILITIES. California
ERIC, 3.29

The school evaluation guide is designed to provide workable
criteria for appraisal of the physical characteristics of
existing school plants in order to seek out unsatisfactory
building features and to stimulate improvements in future
school construction.

Haessig, William B. HEALTH AND SAFETY REQUIREMENTS FOR EXISTING
SCHOOL BUILDINGS. Albany: University of the State of New York,
State Education Department, 1967. 11 pp. ERIC, 3.29

This manual of health and safety considerations for existing
school buildings, based on the Regulations of the Commissioner
of Education and requirements of the Division of Educational
Facilities Planning, forms the basis for review and evalu-
ation of existing buildings.

Haring, Norris G.; Hayden, Alice H.; and Hulten, William.
UNIVERSITY OF WASHINGTON CHILD DEVELOPMENT AND MENTAL RETARDATION
CENTER EXPERIMENTAL EDUCATION UNIT. Seattle: University of
Washington, 1968. 4 pp. ERIC, 3.29

"The physical facilities of the education unit of the child
development and mental retardation center at the University
of Washington are described. A floor plan is appended."

HARVARD EDUCATIONAL REVIEW 39(1969):147 pp. 4.75

"Architecture and Education" is the theme of this issue.
The intent "is to explore the relationship of architectural
values to significant human experience and in particular to
basic educational goals -- to question if and how the physical
environment informs and shapes and liberates the human spirit."

Jackson, R. Graham. MATERIALS FOR MODERNIZATION. Houston, Texas:
Wirtz, Calhoun, Tungate, and Jackson, 1961. 7 pp. ERIC, 3.29

"Choices and issues in selecting materials for modernization
of school buildings are discussed in this report. Background
information is introduced in terms of reasons for abandon-
ment, the causes and effects of school building obsolescence,
and problems in the modernization process."

Johannis, Norma; Doster, Mildred; and Cochrane, Robert. PROVIDING
A HEALTHFUL SCHOOL ENVIRONMENT: STANDARDS AND PROCEDURES. Denver:

This report discusses standards and procedures as applied to
mental and physical health and safety as affected by the
physical surroundings of the school.

L'Abate, Luciano. DESIGN FOR A PLAYROOM. Atlanta: Georgia State
College, n.d. 14 pp. ERIC, 3.29

The author makes recommendations for the construction of play
therapy facilities which would not interfere with clinical
practice but would permit the gathering of research data con-
cerned with the effectiveness of play therapy.

LITERATURE RELATED TO PLANNING, DESIGN AND CONSTRUCTION OF SCIENCE
47 pp. ERIC, 3.29

Articles and papers in the science facilities collection of
the Architectural Services Staff are listed for the following
topical areas: physical plant planning, physical plant cost
and management, space utilization and measurement, general
design and construction of science facilities, environmental
conditions for learning, science building type studies, and
special facilities and equipment.

Miller, Peggy L. OUTDOOR CREATIVE PLAY AREAS. Washington, D.C.: American Association for Health, Physical Education, and
Recreation, 1969. 12 pp. ERIC, 3.29

"Guidelines are given for the development of outdoor play
areas on school sites to provide children with natural areas
and simple facilities for creative play."

THE PHYSICAL LEARNING ENVIRONMENT FOR TEACHING: CHILD CARE
SERVICES, CLOTHING SERVICES, FOOD SERVICES, HEALTH SERVICES,
HOME FURNISHINGS SERVICES, HOUSEKEEPING SERVICES, MANAGEMENT
SERVICES. Albany: University of the State of New York, State
Education Department, Bureau of Secondary Curriculum Develop-
ment, 1969. 63 pp. ERIC, 3.29

"Suggestions are given to aid school administrators, area
directors, teachers, advisory committees, and architects in
planning for the home economics occupational education facility."
PLANNING MODEL FOR SCHOOL FACILITIES. Chelmsford, Massachusetts: Chelmsford Park High School, 1968. 172 pp. ERIC, 6.58

The basic philosophy of this report is that the construction of a multi-million dollar school plant should be the result of the community's best possible thought. To achieve this end, architects, administrators, teachers, school committee-men, and consultants all participated in designing both a new physical plant and a compatible curriculum.

Reida, G. W. A MANUAL FOR EVALUATING SCHOOL FACILITIES. Topeka: Kansas State Department of Public Instruction, 1962. 71 pp. ERIC, 3.29

This manual evaluates the functionality of school facilities on the following points: site; building structure; administrative space; classrooms; special rooms; general service areas; heating, ventilation, and air conditioning; lighting and electrical equipment; fire protection; and water supply and sanitary facilities.

"In Kansas City, Missouri, 208 Negro five year olds were studied to examine the influence of housing upon child development and to compare the relative influence of housing on Head Start and non-Head Start children."

The learning environment and its interrelationship with educational policies and the coordinated planning and design of schools and their facilities are discussed in their relationship to the student.

Wakefield, Howard E. DESIGNING AN ENVIRONMENT FOR LEARNING. Proceedings of A Conference of Educational Survey Directors of Member Universities of the Committee on Institutional Cooperation, April 27-28, 1967, Madison, Wisconsin. 24 pp. ERIC, 3.29

"Three topics are discussed -- (1) designing the environment of educational enterprises, (2) capabilities and promise of data processing in comprehending the educational environment, and (3) optimum learning environments - design mechanisms, principles, and application."
"Working Mothers Get a Break; So Do Their Kids and Project Owners." APARTMENT CONSTRUCTION NEWS, June 1970, pp. 19-20

This article describes some of the day care facilities which have been included in apartment developments. Developers supply the facilities and then turn the operation over to such organizations as Kinder Care Nursery Schools, Inc.
11. GENERAL RESOURCES

This annotated bibliography has a short review of the history and operation of the Neighborhood Youth Corps and then breaks down its 21 items into the following areas: program descriptions, characteristics of participants, evaluation reports, and reaction papers.

Lasswell, Thomas E., and Heppe, Jack. ACTIONS, OBJECTIVES AND CONCERNS: HUMAN PARAMETERS FOR ARCHITECTURAL DESIGN. Los Angeles: Deasy and Bolling, 1969. 100 pp. ERIC, 3.29

"An experiment conducted at California State College, Los Angeles, to test the value of social-psychological research in defining building needs is described. The problems of how to identify and synthesize the disparate objectives, concerns and actions of the groups who use or otherwise have an interest in large and complex buildings is discussed."

Stoke, Stuart M.; Grose, Robert F.; Lewit, David W.; Olmsted, Michael S.; and Smith, Bulkeley, Jr. STUDENT REACTIONS TO STUDY FACILITIES: WITH IMPLICATIONS FOR ARCHITECTS AND COLLEGE ADMINISTRATORS. Amherst, Massachusetts: Amherst College, 1960. 62 pp. ERIC, 3.29

One hundred students in four neighboring colleges were sampled to determine the most desired possibilities for new study space construction.

Theodores, James L. CRISIS IN PLANNING: AN ANALYSIS OF SOME FACTORS THAT INFLUENCE THE KINDS OF SCHOOLS WE HAVE, HOW THEY GOT THAT WAY, AND WHAT WE MUST DO ABOUT CHANGING THEM. Columbus, Ohio: Council of Educational Facility Planners, 1968. 36 pp. ERIC, 3.29

This is the author's interpretation of the current status of educational facility planning practices throughout the nation. He states that the deficiency in proper planning has two basic causes: a national school organization that divides people, resources, and energies into mutually exclusive but impotent camps, and reliance upon folkways rather than technical proficiency and research in the design of school facilities.

"The purpose of this analysis is to provide data against which the relative sizes of public schools in Philadelphia can be compared. The common denominator used here is square footage of the school by the number of students the school is intended to accommodate."

HARVARD EDUCATIONAL REVIEW 39(1969):147 pp. 4.75

"Architecture and Education" is the theme of this issue. The intent "is to explore the relationship of architectural values to significant human experience and in particular to basic educational goals -- to question if and how the physical environment informs and shapes and liberates the human spirit."

Seven education researchers met in Washington to help policymakers "in determining priorities in the recruitment, training, retraining, and utilization of educational personnel." Summaries of the papers presented at the conference are given in this publication.

The author notes that between 1965 when EQUALITY OF EDUCATIONAL OPPORTUNITY was written and 1970, national priorities had shifted away from integration and back to "separate but equal." His purpose in this paper is to demonstrate that despite changes in national policy, the conclusions of EEOR remain correct, namely that family background and peers have a large effect on children, whereas teachers and physical surroundings have small effects.

RESEARCH STUDIES ON KINDERGARTEN EDUCATION. Albany: State Education Department, University of the State of New York, 1964. 30 pp. ERIC, 3.29
This listing of research is divided into the following areas: values in kindergarten education, entrance age and class size as factors in kindergarten education, research on beginning reading with implications for kindergarten education, and recent research on intellectual development and learning with implications for kindergarten education.

The goals of the experimental program described are the modification of curricular emphases, classroom practices, and pedagogical orientations of teachers, with particular focus upon the beginning school years with culturally disadvantaged children.
