This quinmester guide describes a laboratory course designed to offer opportunities for experimentation in mosaic design by exploring uses of various techniques and materials. The course, which is offered to 7th through 12th grade prevocational students, emphasizes the use of design in relation to creative composition. Students learn to design, glaze, fire, cut and develop their own tiles, tessera, etc., to be utilized in mosaic projects. Proper use of instruments and tools as well as proper technique is emphasized. In addition to actually producing projects, students learn the importance of mosaic art as a medium for art expression, and the historical background of mosaic design from the Egyptians to contemporary artists. Other sections of the guide include: a course outline; an evaluation section; bibliographies of student and teacher references; a list of places to visit; a list of periodicals of interest, suggested media resources for teachers, and a list of equipment suppliers. Related documents are: SO 005 292, and SO 005 270. (Author/OPH)

III. COURSE DESCRIPTION
A laboratory course designed to offer opportunities for experimentation in mosaic design by exploring uses of various techniques and materials. Emphasis is placed on the use of design in relation to creative compositions. Students design, glaze, fire, cut, and develop their own titles, tessera, etc. to be utilized in mosaic projects.

IV. RATIONALE
The importance of mosaic art as a medium for "serious" art expression cannot be questioned; mosaic masterpieces that have survived millenniums attest to this. For the student the most effective recommendation for making mosaics can be stated quite simply - it is just plain good fun! When one has known the pleasure of creating a mosaic - whatever the material used, it becomes a fascinating artistic expression.
V. COURSE ENROLLMENT GUIDELINES
   A. Pre-vocational
   B. Grades 7-12
   C. No prerequisite

VI. COURSE OF STUDY OBJECTIVES

Competencies expected of the student upon completion of this course, in writing or orally:

A. Definition and background

The student will be able to do the following:
   1. Define the term mosaic.
   2. Identify the work of several outstanding contemporary mosaicists.

B. Preparation and handling of ceramic and glass tessera.

The student will be able to do the following:
   1. Demonstrate the proper method of preparing and handling glass tessera.
   2. List the equipment and tools used in preparing ceramic and glass tessera.

C. Mosaic forming

1. Demonstrate the direct and indirect method of mosaic forming.
2. Identify the equipment and tools used in forming clay and glass tessera.
D. Decorating
The student will be able to do the following:
1. Demonstrate techniques of decoration that enhance and fit ceramic and glass mosaics.
2. Identify basic equipment and tools used in decorating mosaics.

E. Glazing
The student will be able to do the following:
1. Create a series of test tiles intended for the pretesting of ceramic and glass glazes.
2. Demonstrate the proper use and care of equipment tools used in glazing.

F. Firing ceramic tessera
The student will be able to do the following:
1. Demonstrate the proper procedure for firing ceramics and glass tessera.
2. Identify several glaze defects of glass and clay tiles due to improper firing.

VII. COURSE CONTENT
A. Definition and background
   1. Historical
      a. Egyptian
      b. Ancient Near East
      c. Asia
         (1) India
(2) China
(3) Korea
(4) Japan

d. Classical
(1) Crete
(2) Greece
(3) Etrusca
(4) Rome

e. Byzantium (Rome)

f. Islam

g. Pre-Columbian

h. Renaissance in Europe

2. Contemporary

a. Outstanding mosaicists
   (1) Frans Wildenhain
   (2) Richard Peeler
   (3) Thomas Hunt
   (4) Mariette Bevington
   (5) Charles Clement
   (6) Maurice Heaton
   (7) F. John Miller
   (8) Marlys Frey
   (9) Charles Counts
   (10) Aleksandra Kasula
   (11) Leo Lionni
3. Aesthetic reaction and movement

4. American Indian

B. Preparation and handling of ceramic, and glass tessera

1. Methods of preparing and handling ceramic tessera
   a. Wedging
   b. Kneading
   c. Conditioning
   d. Storing

2. Types of ceramic tessera
   a. Low fire ceramic tessera (Earthenware)
   b. High fire ceramic tessera
      (1) Stoneware
      (2) Porcelain
3. Equipment and tools
   a. Wedging boards with cutting wire and canvas
   b. Large heavy duty cans and crocks
   c. Plaster and setstone bats
   d. Large natural sponges
   e. Flexible rubbers
   f. Steel scrapers
   g. Pug mill
   h. Polyethylene plastic bags

4. Methods of preparing and handling glass tessera
   a. Cleaning
   b. Backing
   c. Scoring
   d. Smoothing irregular edges
   e. Storing

5. Types of glass tessera
   a. Stained glass
   b. Slab glass
   c. Crystal glass
   d. Textured glass
   e. Window glass
   f. Bottle glass

6. Equipment and tools
   a. Padding ½ inch sheet cork
b. Polishing cloths
c. Graphite glass pencil
d. Steel rule
e. Glass cleaner
f. Alcohol
g. Abrasive stone

C. Mosaic forming

1. Methods of forming
   a. Direct
   b. Indirect

2. Methods of forming clay tessera
   a. Rolling out
   b. Patting
   c. Layering

3. Glazing

4. Cutting tessera: Shapes
   a. Wedge
   b. Triangular
   c. Angular
   d. Edged
   e. Small
   f. Medium
   g. Large

5. Firing tessera tiles

6. Cutting tessera with tile cutter

7. Backing tessera

8. Edging
9. Laying
10. Grouting
11. Removing
12. Equipment and tools
   a. 3½ and plaster bats
   b. Rolling pins
   c. Fettling knives
   d. Metal rulers
   e. Tile cutters
   f. Wooden guide strips 1/4 inch thick
   g. Magnesite
   h. Grout
   i. Epoxy resin
   j. Rubber cement
   k. Casein-based glue
   l. Plywood (waterproof)
13. Methods of forming glass tessera
   a. Scoring
   b. Cutting tessera: Shapes
      (1) Circular
      (2) Wedge
      (3) Triangular
      (4) Angular
      (5) Edged
      (6) Curved
c. Glazing

d. Firing (optional)

e. Edging

f. Laying

g. Mortaring

h. Removing

14. Equipment and tools

Glass cutters
Steel rule
Glass pliers
Graphite glass pencil
Mortaring tools
Hammer
Glaze brushes
Flint
Pyrometric cones
Stained glass
Plate glass
Slab glass

Bottle glass
Mortars
Adhesives
Putty mix
Back ing boards
Reinforcing wire
Glass decorating glazes
Metal enamels
Glass Cleaner
Kerosene
Oil
Alcohol

Padding 1/4 inch cork sheet

15. Mosaic materials

a. Plastic

b. Marble

c. Glass

d. Concrete
e. Wood
f. Metal
g. Paper
h. Clay
i. Marble

16. Creating a mosaic by making and using glass tessera
17. Creating a mosaic consisting of three panels
18. Creating a mosaic by using several clay and glass decorative techniques
19. Preparing glass tessera
20. Preparing clay tessera
21. Forming a mosaic by the direct method
22. Forming a mosaic by using wood, clay, and metal
23. Forming a mosaic consisting of several high fire tessera
24. Preparing a variety of glass tessera from plate glass, stained glass, and bottle glass

D. Decorating

1. Methods of decorating
   a. Incising
   b. Sagraffito
c. Carving
d. Embossing
e. Stamping
f. Texturing
g. Stenciling
h. Wax resist
i. Nishima
j. Satsuma
k. Slip printing
l. Slip trailing
m. Spraying
n. Terra sigillata
o. Impressing
p. Applique
q. Sprigging
r. Excising
s. Slips and engobes
t. Inlay
u. Underglazes
v. Underglaze crayons
w. Rubber resist
x. Semi-matt
y. Overglazes
z. Matt

2. Materials for decorating

a. Tools
(1) Decorating wheel
(2) Slip trailers
(3) Plastic bags
(4) Large round or flat brushes
   for glaze and slip application
(5) Bamboo brushes, large and
    medium for wax resist and
    other use
(6) Small pointed brushes for
    detail
(7) Flexible scraper, half-moon
    shape
(8) Steel plaster and clay model-
    ing tools for sgraffito,
    blending, incising, scraping,
    etc.
(9) Elephant ear sponge
(10) Professional boxwood tool
(11) Steel loop modeling tool
(12) Fettling knife
(13) Pencils and India ink
(14) Plastic water container

b. Consumable materials

(1) Slip
(2) Plaster of Paris
(3) Engobes
(4) Stencil paper
(5) Wax resist
(6) Rubber resist
(7) Underglaze
(8) Gloss
(9) Overglaze
(10) Semi-matt
(11) Matt

E. Glazing

1. Methods of glazing
   a. Dipping
   b. Pouring
   c. Brushing
   d. Spraying

2. Equipment and tools
   a. Glazing bowl
   b. Pitcher
   c. Two sticks
   d. Mesh metal sieve
   e. Metal glaze tong
   f. Glaze brushes - soft hair, flat - 1/2" to 1"
   g. Ceramic spray booth with exhaust
      exhaust fan, stand, and filter
h. Sprayer outfit with gun compressor
i. 120 mesh sieve

3. Types of glazes
   a. Low temperature glazes
      (1) Alkaline glazes
      (2) Lead glazes
   b. Middle temperature glazes
      (1) Bristol glazes
   c. High fired glazes
      (1) Stoneware glazes
      (2) Porcelain glazes

4. Glaze textures
   a. Transparent
   b. Opaque
   c. Gloss
   d. Matt

5. Glaze defects
   a. Defects due to clay body
      (1) Pinholes and bubbles
      (2) Sandpaper surface
      (3) Blistering
   b. Defects due to application
      (1) Blisters and pinholes
      (2) Scaly surface
      (3) Running

14
(4) Chipping
(5) Dryness
(6) Cracking
(7) Bubbles and blisters
c. Defects in glaze composition
(1) Shivering
(2) Crazing
(3) Dull surface on gloss glaze
(4) Crawling
(5) Pinholes and bubbles

F. Firing ceramic - Tessera

1. Preparing ware for firing
   a. Storing (drying cabinet)
   b. Bone dry

2. Procedure for firing kiln
   a. Familiarizing with kiln manual
   b. Applying kiln wash
   c. Stacking kiln for bisque firing
   d. Stacking kiln for glaze firing
   e. Measuring and managing kiln temperature
      (1) Cones
      (2) Pyrometer
   f. Following firing schedule
   g. Following cooling schedule
   h. Removing ware from kiln
3. Defects due to improper firing
   a. Shattering
   b. Cracking
   c. Warping
   d. Blistering
   e. Pinholing
   f. Glaze crawling
   g. Melting
   h. Crazing

4. Equipment and tools
   a. Electric ceramic kiln with pyrometer
      and kiln - sitter
   b. Electric glass kiln with pyrometer
      and kiln - sitter
   c. Kiln shelves
   d. Kiln furniture
   e. Kiln wash
   f. Flint
   g. Pyrometric cones
VIII. EVALUATION

A. It is essential to establish criteria for evaluating the progress of the student in an art experience. Evaluation in mosaic art cannot be rigid to the extent that it will inhibit creative expression. Creativity is unique and personal.

The product itself cannot be evaluated without taking into consideration the process the student experienced from inception to completion. In addition, evaluation must include evidence of the growth of the individual in relation to his attitude, interest, ability to complete a project, how well he can use his past experience toward problem solving, respect for his own ability and the rights of others.

Evaluation is of vital importance to the student's development. It helps to determine the growth of the student so that the teacher can further motivate and guide the student toward his fullest self-development, creativity and aesthetic growth.

B. The criteria established for evaluation will vary due to individual differences among students and
teachers. Each teacher must determine his own goals and formulate standards for evaluation always keeping in mind that evaluation must be positive as well as constructive.

The following are some suggestions in setting up criteria for evaluation:

1. Has the student learned to evaluate his own mosaic as well as that of others with consideration to the sensuous quality of the material, form, and content?

2. Has the student designed the entire object with an awareness of space, form, movement, order, relationship of parts to the whole, and good color organization?

3. Has the student expressed his ideas creatively in the medium in an original and meaningful way?

4. Has the student developed a sensitivity to the material?

5. Does the student express his ideas and individuality in clay?

6. Has the student become aware that texture results from an interaction of the medium and the tools?

7. Is the student aware of the difference between tactile and visual textures.
8. Has the student become sensitive to the expressive qualities of the different mosaic materials and tools?

9. Is the student aware that improper use of material and tools results in poorly constructed forms?

10. Is the student aware that variety can add interest to forms but too much can destroy it?

11. Does the student react empathically to the medium in terms of two-dimensional forms?

12. Is the student familiar with good mosaic art of the past and present?

13. Is the student able to identify from contemporary mosaicists the ways in which the craftsmen manipulate their tools and materials?

14. Has the student developed good work habits?

15. Has the student's behavior outside the art class improved as a result of his art experience?

16. Has the student developed a respect for his personal ability?

17. Has the student developed a respect for the rights of others?
18. Has the student acquired increased efficiency in handling materials and tools?

19. Has the student developed the ability to carry the project through to completion?

20. Has the student learned the firing process and how to use it to its fullest advantage?

21. Has the student developed good craftsmanship and yet retained the natural qualities of Mosaic?

22. Has the student learned to form tessera correctly so it does not warp or crack?

23. Is the product suited for the purpose for which it was made?

24. Does it incorporate the principles of good mosaic design?

25. Is the product the one best suited for work in clay, glass, plastic, wood, etc.?

26. Is the product well constructed?

27. Does the product indicate individuality and expressive quality?

28. Does the design fit the form?

29. Has the student improved in attitude, interests, and development of technical skills?
