This publication has been compiled to provide educators with information, ideas, examples, and guidelines for establishing or implementing an orientation and exploratory career education program at the middle or junior high school level. Sections of the manual include: (1) a definition of career education and its role, (2) a discussion of the rationale for an orientation and exploratory program and listing of students' needs which should be met by such a program, (3) identification of the essential elements of a career education program and suggestions for implementing a program, (4) a discussion of the importance of behavioral objectives and how to write them, (5) use of community resources, (6) suggested curriculum for learning activities for a career education program, and (7) a bibliography of publications, programs, and materials concerning career education. GUIDELINES
GUIDELINES

for an ORIENTATION AND EXPLORATION CAREER EDUCATION PROGRAM in MIDDLE SCHOOL/JUNIOR HIGH

By

Vandalyn L. Hooks, Coordinator Orientation and Exploration Region III Career Education Development Project Owensboro, Kentucky 42301

August 1972
If something needs to be done, and if, in the end, it is not done, then you and I are among those who did not do it.

Ayers Law §2
PREFACE AND ACKNOWLEDGMENTS

In the attempt to develop some guidelines that would assist teachers and educators in our districts to initiate a career education program in the middle school/junior high, ideas and materials have been borrowed from many sources. Special recognition, however, must be given to the following persons: Cas Heilman, Oregon State University and the Springfield, Oregon Project; Joel Smith and staff from the Cobb County Occupational and Career Development Program, Marietta, Georgia; Don Newlen and Pat Gibson, Henderson County Exemplary Project, Henderson, Kentucky; Otto Mattei, Shirley Holland, and educators in the Bowling Green Career Education Project, Bowling Green, Kentucky; the Curriculum Development Center with Dr. Herbert Bruce, Bob Spillman, Tom Vantress, and Glenn Collins; Theo Vickers, our project director, and our typist. For each and every contribution and effort I am personally grateful. We sincerely hope that you will find some of those suggestions useful to you as you attempt to implement your program.

Hopefully, by the conclusion of the project we will be able to arrive at some guidelines that will be useful to other school districts in the State of Kentucky for the implementation of a career education program in the orientation and exploration phase. I shall be counting on each of you to contribute your ideas, research and written contributions to the final product.

Vandalyn Hooks

INTRODUCTION

The material included in this booklet has been compiled for the purpose of providing educators in the Third Region with information, ideas, and examples which might be helpful in establishing or implementing a meaningful orientation and exploratory career education program in the middle school - junior high school. At the present time it is assumed that students coming into the seventh grade will not have had any type of career awareness education and many teachers in those schools will not have had any career education workshops. Hopefully, this material will be useful in enabling a new school district to begin the first stage of a career development program.

Each student, each teacher, each school, and each community is different. Needs, resources and activities to accomplish objectives will vary from school to school and from student to student. Resourceful educators such as you will use these guidelines only as a launching point for developing a meaningful orientation and exploration career education program for your own situation.
In an attempt to answer the question "What Is Career Education?" We will begin by saying it is a REFOCUSING ON THE KNOWLEDGE AND SKILLS we teach. A REFOCUSING for all students on the PEOPLE who use the knowledge and skills in their life roles, as citizens, as members of a family, in jobs, and in avocations.

Let's focus our attention on a paraphrase of Plato's Myth of the Cave in order to magnify our perception of education and our ROLE as teachers.

In the myth we find men chained in a cave staring at the wall in front of them. All about them are reflections of light flitting about on the walls of the cave. These are caused by the fires that are burning behind giant pillars. To the men chained in the darkness of the cave these reflections have no meaning. One day the men are unchained and taken from the cave to the world outside. At first they are blinded by the brightness of the sun, but slowly they begin to see. They behold the clouds above their heads, the ground beneath their feet, the rippling streams, the life within and about. They see, touch, feel, taste and behold their new world. Again the men are taken back inside the cave, and again they are shackled. The question... can the reflections ever be the same nothingness again? Will they now see new things in them?

Education through the years has done an excellent job of teaching about the rocks, the plants, the stars, the animals, and on the listing goes. We have helped children to know the names of all of these. The symbols on the printed page are able to be read, new words have meaning. Math symbols are seen and comprehended, but there is one thing, however, we feel we have been lacking in, and that is the PEOPLE element.

Career Education attempts to help us refocus our ROLE as teachers by helping the students to look at PEOPLE. People who use the information about the rocks, trees, bodies, words, reading, writing, speaking, or whatever knowledge or skills we are teaching.
This we see as the ROLE of the teacher, no matter what grade level, or what subject area we teach. It is not just the ROLE of the elementary teacher! If we listen to a young group of people called the Up, Up, with People Troupe, we can hear them exclaiming their joy and excitement from looking at People. We must remember that these young people have recently exited our school doors, but they have discovered PEOPLE—just recently, listen to their words...

It happened just this morning,

I was walking down the street,
The milkman, and the fireman,
and the postman I did meet!
There in every window,
In every shining door....

I recognized people I'd never noticed before.

In summary to the question of "What Is Career Education?" we would answer by saying it is refocusing our learning experiences to include PEOPLE who use whatever we teach. It is a REFOCUSING OUR LIFE-CENTERED EDUCATION to make it truly life centered for the student. This is what we have chosen to call the orientation, exploration career education's ROLE.
What is ROLE?

ReFOCUSING - MEANINGFUL - RELEVANT
OUR - EVERYBODY'S CHILDREN
LIFE - CENTERED - LIFE-ROLES
EDUCATION - LEARNING

THE ROLE OF MAKING LEARNING USEFUL AND MEANINGFUL - DIRECTED TOWARD LIFE CAREERS.
Refocusing Our Life-Centered Education

PROCESS

SUBJECT INTEGRATION
- Weaving into all
  career information.

OCCUPATIONAL INFO.

RATIONAL

FOR AN ORIENTATION AND EXPLORATION CAREER EDUCATION PROGRAM

grades 7 to 10

For any program to be implemented, it must first be recognized as meeting the needs of the group for which the program is designed. Following are a list of needs as we presently see them. These needs must first be seen as the students' needs within your district before they can be meaningful for those planning a program within any district. They are offered as a suggestion only. Each district must assess their own before implementing their program. Needs marked with an asterisk (*) seem to have particular implications for an orientation and exploration career education program.

I. Need for development of basic skills and abilities
   A. Communication skills (reading, writing, speaking, listening)
   B. Study skills (finding information, outlining, interpreting, analyzing, summarizing)
   C. Cognitive skills (critical thinking, decision-making, computing, group responsibility, problem solving)
   * D. Knowledge of our economic system
   * E. Knowledge of consumer economics
   * F. Knowledge of government structure, laws, taxation, voting. (Particularly adaptive to simulation and role playing components of the career education program)
   * G. Knowledge of handling finances, budgeting money and time
   F. Proper use of telephone
   * G. How to read and utilize the newspaper
   * H. Ability to use manipulative equipment such as simple hand tools, typewriters, adding machines, calculators, cash registers and filing systems.
   * I. Knowledge of the world of work
   J. Awareness of current affairs
   * K. Ability to apply for a job
II. Need for development of relationships with others

* A. Respect and tolerance for others (social awareness)
* B. Opportunity to select leisure and relaxation activities
* C. Experiences in working with others
* D. Ability to resist unwholesome influences
* E. Respect for authority, employers, etc.
* F. Understand the nature of family, school, community and career interdependence and interrelationships.

III. Need for independence and self-direction

A. Self-discipline, self-respect; healthy relationships with others
B. Some freedom of choice with realization of certain limitations
* C. Be able to assess interest, abilities and limitations
* D. Find something at which he can excel for finding self-worth
* E. Ability to set realistic and meaningful goals
* F. Feeling of acceptance and worth
* G. Variety of exploratory experience to arrive at choices
* H. Responsibility and dependability
* I. Understanding of educational choices and opportunities
* J. Opportunities for creative expression

IV. Need for adjustment to psychological and physiological changes

A. Good health practices
* B. Good grooming
* C. Safety practices
* D. Understanding and tolerance of individual differences
E. Understanding of daily and psychological changes in maturation
Because success in work contributes to success in all of life, and because lack of success in work contributes to problems in other aspects of life, it is important that we provide a school curriculum where all students can feel successful in their work. It is also important to remember that each person is a part of a family, is a citizen, and must have some leisure time activities. Each of these affects the other, and each of these deserves some attention. Many school activities simulate work and others are, in fact, work. Work, doing and experiencing, is how most people learn best. Hands-on-activities are a motivating device and offer an opportunity for success and accomplishment. The orientation and exploration phase of career education can facilitate making the "work" of school relate to the world and to people.

There is a need to look at the curriculum and refocus our attention on life roles. The basic skills and traditional courses taught in our school often lack relevance in the minds of the young people. Our curriculum needs to be identified with realistic and meaningful goals for the students. Relating the skills and subject matter to careers, and PEOPLE can make them more realistic and meaningful. Students begin at the 7th grade level in selecting subject matter. Career awareness and exploration should enable them to make wiser choices.

The normal characteristics of the students in the middle school, junior high level includes needs which can be met effectively through the career orientation and exploration program. Students in this group are highly socially aware, they express a need to understand others and to be able to work with others. They differ as individuals; they learn and are motivated to learn in different ways; they come from different backgrounds; they have different abilities and interests. They are trying to establish their independence, and at the same time they desire some structure and stability; they are searching for an identity. Career orientation and exploration, including some hands-on-experiences, some work experience with or without pay, some role playing, and simulation experiences, some decision making, some occupational and career information and research,
sone meeting and talking with "PEOPLE" who work can be one of the most meaningful educational experiences possible for meeting these needs for young people.
THE DIGNITY OF ALL WORK

Dear Lord,

help me teach my child the worth of the men who
sweep our streets
and grade our country roads.

There are so many whose names I don't know---
whose faces I don't even know---
who, by performing their daily tasks,
make it possible for me to perform mine.

I have only to empty the trash.
If I had to haul it to the city dump, well,
it would cut a hunk out of my day.
I wouldn't even do it until I had to.
And neither would my neighbors.
We have only to shovel the snow off our own
drive.
But we ride to work and school and the grocery
store on streets already cleared for us during
the night.

Ad infinitum.

Help me remember my debt to them.
Help me remember to mention this debt to my chil-
dren,
reminding them of the worthiness of labor,
of the worth of any task performed for the common
good.

Help me to undertake my own daily tasks as for the
common good.
Help me teach my children that they too have a life-
long responsibility--
for the common good.

Amen.

SOCIAL BASIC ESSENTIAL ELEMENTS 
( or basic goals and concepts) 
OF A CAREER EDUCATION PROGRAM 

The following elements are considered to be essential to a meaningful orientation and exploration career education program.

1. STUDENTS MUST BE TAUGHT CONCEPTS WHICH ARE BASIC AND APPLICABLE REGARDLESS OF THEIR CAREER CHOICE.

Some of these are:

the dignity of work

that most people change occupations several times in a lifetime

that most people who lose their jobs do so because of personality reasons rather than lack of job skills

that all jobs have advantages and disadvantages

that the career you choose is related to certain life styles

that there is an interrelationship between the occupation, family, avocation and citizenship life roles.

that there are basics for seeking and obtaining a job

II. STUDENTS MUST DEVELOP ATTITUDES AND GAIN THE MENTAL, PHYSICAL AND COMMUNICATIVE SKILLS WHICH WILL HELP OPEN THE DOORS OF OPPORTUNITY TO THEM.

For example:

speaking

reading

typing

use of hand tools

use of the newspaper

use of the telephone

how to get a job

how to write a resume

how to dress for an interview

how to write for an interview

how to solve problems and make decisions

how to communicate with and get along with others.
III. STUDENTS MUST GAIN REALISTIC INSIGHTS INTO THEIR OWN ABILITIES, INTERESTS, LIMITATIONS.

For example:

In which subjects do I do well?

In which subjects do I do poorly?

Do I have any physical or mental limitations for a career which might be of interest to me?

Do I like to work most with persons?

Do I like to work most with things?

Do I like to work most with symbols and ideas?

Am I willing to make the sacrifices necessary to attain the career which interest me?

Is the career compatible with the lifestyle I desire?

What do tests show me that might affect my vocational decisions?

IV. STUDENTS MUST ACQUIRE KNOWLEDGE AND INSIGHT INTO THE WORLD OF WORK.

including:

job clusters or job families

educational requirements for jobs of interest

employment opportunities locally and nationally

occupations which are either increasing and decreasing in demand

relationship of an occupation to one's family, hobbies, and citizenship role.

working conditions of the job

expectations of employers

actual work experience

on the job training
V. STUDENTS MUST BE HELPED TO MAKE WISE CHOICES IN EDUCATIONAL AND OCCUPATIONAL PLANNING

including:

knowledge of available career clusters or job families that will be taught in their high school and vocational schools

identifying, if possible, a job cluster of interest to them and taking the prerequisite courses

assuming some responsibility for setting life goals

making realistic self appraisal

guidance and counseling to make appropriate course selection and job exploration

seeking appropriate work experience

knowing that supply and demand affect career opportunities

a country's economy, location, government, and laws affect career opportunities

different jobs will exist in the future; be flexible

training requirements for skilled occupations have increased and are increasing

career education and training is an ongoing process

career choice is not final; it can and may be changed

some people are genuinely more suited to some kinds of jobs than to others

jobs are generally classified by responsibilities required
CAREER EDUCATION. HOW DO WE DO IT?

In observing career education programs around the nation we have noticed that there are certain COMPONENTS or ELEMENTS that are common to all unit writings. These components are called by different names, but they generally include the following: (1) subject matter integration; (2) career or job information; (3) simulation or role playing activities; (4) community and parent involvement; (5) hands on activities; and (6) self guidance. These components occur at all grade levels, and in the beginning of a program would be in specific sequence.

I. Component One: Subject Matter Integration

A. Each teacher looks for ways of relating the subject taught to the world of work and to the avocational, family and citizenship roles.

B. Offers a chance to explore career characteristics through outside experiences and enables the students to utilize their subject matter in different work settings.

C. Enables the students to see application of academic skills as preparation for employment, avocational, family and citizenship roles.

II. Component Two: Career or Job Information

A. A library or resource center with career information is available to all students.

B. Interviews with persons representing a wide variety of careers or job families who can come into the school and discuss the opportunities and the realities of the vocations they represent.

C. Inservice for the entire staff that enables the teachers to become oriented to the career opportunities available.

III. Component Three: Simulation and Role Playing

A. Emphasizes feeling in work simulation activities - explores the feeling about occupations, how to apply for a job, and the feelings of workers on the job.

B. Puts the element of play into what we are learning.
IV. Component Four: Community Involvement: Resource Persons.

A. Puts the "People" element into that we are teaching.

B. Promotes the feeling of joint responsibility for education between the school, home, and the community.

C. Presents persons as "people" who can clearly show the application of subject matter concepts, skills, and tools used in the world of work.

D. Enables the students to ask questions about "people's" job skills, duties, qualifications, and educational preparation to enable them to prepare for job clusters of their interest.

V. Component Five: Hands-on-Activities

A. Emphasizes 100% participation of the students in a hand-on-activity that produces a visible product.

B. Emphasizes a use of tools and skills as an extension of self and stresses the process.

C. Places emphasis on tools and skills as they relate to occupations in the world of work.

D. Emphasizes tools and skills as they relate to job preparation.

E. Conscious effort should be made to relate activities to jobs.

VI. Component Six: Field Trips

A. Planned programs of field trips to businesses and industries with the occupations, rather than the products being emphasized.

B. Teachers and students are exposed to different occupational settings. In the exploration phase, students have an opportunity to explore in depth the workers job and feelings about the job.

C. Students become aware of specific job skills and academic preparation necessary for the job.
Behavioral Objectives For The Students

Early in the development of any program it is important that specific student outcomes be established. In the career education program, as with any good program, the student objectives should be based on students' needs. Because of differences in programs and the past experiences and opportunities for students in different school systems, the behavioral objectives for students will differ from district to district.

It is important, however, for specific student outcomes be built into the program to ensure continuity from year to year. The student objectives listed below are to provide ideas and guidance for developing activities which contribute to meeting the students' needs. The year level for these goals is not included, but can be assigned by the teachers in the districts.

- Be proficient in the basic skills of reading, computation and spelling as measured by standardized test.
- Demonstrate ability to write legibly.
- Demonstrate interviewing techniques.
- Have a minimum of _____ hours of instruction and experience in the basic use of common tools such as hammer, chisel, file, pliers, screwdriver, wrench, saw.
- Have a minimum of _____ hours of instruction and experience in the use of the typewriter, adding machine, calculator, and business machines.
- Demonstrate ability to read and use a newspaper to find "help wanted" ads.
- Demonstrate ability to write a personal resume.
- Demonstrate ability to use the telephone to arrange for a personal interview for a newspaper want ad.
- Demonstrate ability how to dress for a job interview.
- Have the opportunity to choose and explore at least one area of career interest each school year.
- Have a minimum of three on site observations during the school year of major occupations in the community, looking specifically at people in their jobs.
- Have group guidance and personal counseling to assist in planning course selections for the following school year.
demonstrate knowledge of good health practices and their relationship to career success.

demonstrate proficiency in speaking, listening, and summarizing skills by listening the main advantages and disadvantages of an occupation described by a community resource person.

be able to list five industries of greatest employment available in the community.

have a classroom role playing experience in applying for a job and engaging in a job interview.

given a list of available career preparation courses in the high school, list five occupations related to the cluster.

identify a minimum of three tentative career choices based on interest, aptitude and ability.

demonstrate in the classroom the understanding of the relationship of career choice, family, citizenship and leisure time activities.

have visits to______ businesses in the community and demonstrate knowledge of the available job opportunities.

be able to classify a given list of 100 or more jobs according to people, data, or things emphasis.

have______ hours of on-site work observation or experience during the school year in a job of his choosing.

list three titles of occupationally oriented books read during the year.

find information concerning salary, training, required aptitudes, job characteristics and advancement opportunities for three occupations of interest to them.

know the occupations of their parents, job training, salary, opportunities for advancement and job satisfaction or dissatisfaction.

state education and/or training requirements of their parents' occupation.

have on-site field trip to the vocational schools.

have an opportunity to interview students in vocational classes in high school programs.

participate in decision making simulation activities.

list two occupations for which training is available on the job.

list four jobs for which technical or vocational training beyond high school is required.

list institutions and locations for two year training programs.
list ten occupations for which a Baccalaureate Degree is required
list five activities they would like to do on their future job.
list five activities they would not like to do on their future jobs.
list some personal characteristics which could cause prejudice against them in the world of work.
Suggestions For Implementing A Career Education Program

1. **RATIONALE AND BASIC GOALS:** The basic purpose for the program should be stated and some basic goals established. The rationales and goals should be brief, meaningful, and stated clearly. The rationale statement and basic goals should be written specifically for each program in each school.

2. **IMPLEMENTATION PLAN:** is a must. Any program to be effective must have the full support of the superintendent, board of education, and principals. The phase one plan of the Regional Project was directed toward achieving this goal for the districts.

3. **REGIONAL CONSULTATION:** Inservice programs for key district leaders has been provided. The regional project staff are available for consulting service to individuals, groups of teachers, P.T.A. programs, etc. Any service that a school would deem necessary in establishing an effective career education program. The regional office exists for the purpose of serving the needs of the local districts. We can also print out other programs or other resource personnel available.

4. **BOARD OF EDUCATION ENDORSEMENT:** is highly recommended. Whether or not they approve the program, they should be knowledgeable and supportive of the program if it is to be successful.

5. **STAFF INVOLVEMENT:** For an effective orientation and exploration program to be initiated it is essential that all staff members in the building be oriented to a "career education" philosophy and goals. Each teacher should have the opportunity to "refocus" their obligations toward relating what he teaches to the students present and future needs.

For staff involvement to occur successfully it is recommended that released time be arranged for continuing in-service, and for thinking and planning together.

6. **PARENT AND COMMUNITY PARTICIPATION, INVOLVEMENT AND UNDERSTANDING:** Close communication with parents and the community is imperative in an orientation exploration career education program to be truly effective. If the program over achieves the goal of becoming truly exploratory and allows the students to go into the community to see and experience work in areas of interest to them, then those persons should be well informed.

Several methods might be used to promote parent and community involvement and understanding. Some suggestions are listed below and a sample letter follows:

- Parent discussion groups
- Community panel discussions
- School newspaper or newsletters
- Brochures about the program
- Articles in newspapers
- Speaking on the career education program to civic groups
- Special recognition awards for parents and community personnel who participate in the program.
7. GUIDANCE PROGRAM: Guidance personnel are an important part of the orientation-exploration phase of career education. Group guidance programs and the development of exploratory programs should be developed to help meet the needs of the youngsters. Students in the guidance program should come to know their interest, aptitudes and interests more clearly during this phase. It is also highly recommended that all staff members develop a guidance point of view.

8. COORDINATION OF THE PROGRAM: If an exploratory program is to be developed, if time is provided for teacher inservice and planning, if parents and community is to become involved, it is deemed absolutely necessary that someone be designated with the responsibility of coordinating and directing the program. This person might be the principal, assistant principal, guidance counselor, or teacher.

9. TEACHER TRAINERS: Because of the magnitude of the Regional project, designated teachers from each district were given inservice training to enable them to work with other teachers within their building. Encouragement, and hopefully some incentive for this type of activity should be fostered for the program in that building to become truly effective.

10. EVALUATION: Evaluation should be built into the program. Objectives for the students should be written in measurable terms. Evaluation should provide information for expanding and revising the program. The overall evaluation of the Regional Project will be done by Southern Association of Colleges and Universities.
OPEN THE DOOR TO COMMUNITY RESOURCES
The Career Education Advisory Committee is studying various ways of enriching the education program of the _______________ schools. One way to widen the students' educational opportunities, particularly in learning work skills, is to use the resources of the community. The purpose of this questionnaire is to find out what interests and talents the people of _______________ would be willing to share with their young people. Once this information is on file, it will be possible to match and individual's special skill with a student's particular interest. Would you be willing to have this questionnaire kept on file at the _______________ Schools so that, in the event of a particular need or interest, you might be contacted?

Name ___________________________

Address __________________________________________ Phone __________________________

Town __________, Ky. __________
EXPLORATION

AND

ORIENTATION

CURRICULUM AND ACTIVITIES

SUGGESTIONS
VOCATIONAL SCHOOL INVOLVEMENT IDEAS

VOCATIONAL EXPLORATION

Engage students in the vocational schools as "big brothers," and "big sisters" to middle school, junior high students to enable them to try their hands at a variety of skills. With the school's instructors the fun of work activities and the rewards of seeing a finished product should be stressed. In this way, these students could explore the courses offered in the vocational school, and perhaps help them to make career decisions in their high school program planning. At the same time it would offer many an opportunity to explore many occupational avenues.

MIDDLE SCHOOL/ JUNIOR HIGH SEMINAR

A program designed for middle school-junior high students with low self concepts and low vocational or school expectations could be called a Vocational Seminar. This program could provide frequent contact with the occupational world, (field trips, interviews, on the job observations) as well as trips to the area vocational schools and interviews with the vocational and technical students.

Seminars could be conducted by vocational students, students in co-operative Work Programs, or Distributive Education students. These seminars could give these students an opportunity to discuss their problems with sympathetic listeners in their peer group.
Mini Exploratory Education Course Suggestions

Middle School/ Junior High

BECOMING EMPLOYABLE: Purpose is to acquaint students with personal qualities relating to employability, and to enable the students to role play situations involved in becoming employable. Students would select careers of particular interest to him to explore. Personal grooming, interest, ability, aptitude and attitude should be important elements in the program.

BUSINESS: Purpose is to introduce students to use business equipment such as the typewriter, duplicating machines, adding machines, calculators, and cash registers. Offers students opportunities to explore careers that use those machines.

CLOTHING AND TEXTILES: Purpose is to teach the care, selection, design, and construction of clothing. Affords students the opportunity to explore the vast career opportunities in the garment and fashion industry.

CONSTRUCTION: Purpose is to explore the vast careers in the construction field. Activities would utilize a variety of construction materials. Actual on site construction such as football bleachers, storage building, decorative brick wall, etc. would enhance the course.

FOODS AND NUTRITION: Purpose is to acquaint the students with the elements of nutrition. Provides opportunities to plan menus, prepare nutritious meals, and explore careers in the Food Service Industry.

FORESTRY: Purpose is to acquaint the students with the career clusters relating to forestry, such as the forest ranger, entomologist, horticulturist, nurserymen, gamekeeper, forest fire fighter. An outdoor classroom in a federal game reserve, or national forest would be ideal.

INFORMATION PROCESSING: Purpose is to explore the basic principles of data processing, and the variety of jobs in the computer field.

HEALTH AND COMMUNITY SERVICES: Purpose is to explore the careers in the medical field and community agencies.

DISTRIBUTION AND MERCHANDISING: Purpose is to focus on the world of marketing and sales for meeting man's economic needs in a society. The student is able to trace the movement of goods from the manufacturer to the consumer.

MANUFACTURING: The purpose is for the students to perform activities using tools, equipment, materials, and the manufacturing process to achieve a visible product. Explore a manufacturing industry to discuss career opportunities available in the field.

VISUAL COMMUNICATIONS: Purpose is to explore the media of printing, photography, silk screening, commercial art, store window display, and film making. Careers in the field should be included.

TRANSPORTATION: Purpose is to explore the fields of transportation relating to rocketry, gasoline and diesel engines, trains and river transportation.
"One must learn by doing the thing; for though you think you know it you have no certainty until you try."
A LIVING UNIT

DEVELOPED BY:

Vandalyn Hooks, Coordinator
Orientation and Exploration
1501 Frederica Street
Owensboro, Ky. 42301
INTRODUCTION

The following simulation unit was developed with the students in a self-contained classroom. It was developed to meet the needs of diverse levels of achievement and it was as individualized as the teacher and students could make it. The prime concern was that all students could develop wholesome attitudes toward themselves while learning by doing.

The ideas for this material came from simulation units, behavior modification suggestions, the curriculum of the age group, but most of all from the students' interest and enthusiasm. Only a few of the units that were taught are included, but the number was limitless. Those that are included were deemed absolute essentials, by this teacher, for the success of our program.

Hopefully the units, materials, and ideas included are complete enough to engender some ideas for you. Perhaps you will be formulating some exciting simulation classroom experiences and ideas for your students. These ideas should be easily adaptable for a team of teachers, for an entire school, or for multiple groupings. Please read it through, ask questions, but most of all try some simulation ideas. We promise you a most rewarding and exciting teaching experience.

Vandalyn Hooks, Coordinator
Orientation and Exploration
RECEIVING WAGES FOR WORK

Introduction of the unit began with the concept of work. School activities were defined as the work or job we were assigned to do while "on the job," or in school. The concept that many people work harder and more effectively on their jobs was discussed. Further concepts discussed were the value of good work and initiative. At the conclusion of this discussion the students and teacher arrived at a basic salary schedule and the ground rules for receiving this salary. To encourage initiative, incentives were added from the suggestions of the class. This list was not completed but was left open ended to allow the students the opportunity of thinking of other ways that would help them to do their jobs. A copy of this was then given to the students for reference in preparing their payrolls.

All papers and work that the students claimed on their payroll was included in a folder and left on their desk on Friday afternoon. The teacher dated the work as it was graded. Errors in mathematics in figuring the salary were deducted from the salary at double the amount of the error to encourage accuracy in computation.
HOW TO EARN SALARY AND BONUSES

Salary $25.00 per week

Requirements:

1. Listen carefully when someone is speaking.
2. Be ready to begin work promptly at 8:00
3. Have good manners both in the classroom and on the playground.
4. Follow directions
5. Put all supplies that you use away when you have finished using them.

INCENTIVES:

1. Accept responsibility

   - Keep bookshelves orderly $2 per day
   - Maintain aquarium $2 per day
   - Water and care for plants $2 per day
   
   Apply for the jobs in your best handwriting, write your letter in correct business form, to Mrs. Hooks, Teacher
   School
   Street

2. Be willing to work with a friend, a contract for this will be issued by the teacher, and signed by the student receiving help.

$2.00 per day for 20 minutes, total of $10.00 per week

3. (If you do not presently know)
   - Learn multiplication tables through 10 (5 slips)
   - Learn to multiply two digit numbers ($5.00)
   - Learn to multiply three digit numbers ($5.00)
   - Learn division of two digit numbers ($5.00)
   - Learn division of three digit numbers ($5.00)
   - Learn subtraction of whole number and rational numbers ($5.00)
   - Learn addition of whole numbers and rational numbers ($5.00)
   - Learn subtraction of whole numbers and rational numbers with regrouping ($5.00)

4. $3.00 will be paid for all 95 to 100 papers turned in.

5. $5.00 will be paid for all new vocabulary words used at least three times either in writing and/or speaking.
6. Prepare tapes and/or visual aids for news forecasting. $5.00
7. Prepare tapes and/or visual aids for weather forecasting daily. $5.00
8. $5.00 for each book read and shared within the week.
9. Special interest sharing activities shared in an effective way with the class. $10.00
10. Creative writing written and shared with the class in some way. $5.00
11. Coordinated art presentations for any unit of study. $5.00
12. Improve your handwriting on all papers for four weeks. $10.00
13. Keep accurate records and accounts of business and personal checking accounts. $5.00 for each two week submissions.
14. Plan a budget for one month showing income expected, and expenses, for either your personal income or your business. $5.00
15. Study grants in science. Advance $10.00
   Completion of Project $15.00
16. Anyway that you can think of that will make you a better student, discuss and incentive will be determined in negotiation.
Curriculum and Activities of Mini Democratic Society

I. SOCIAL STUDIES

A. Economics:
   1. Living in a free-enterprise, capitalistic society
   2. Banking
   3. Taxes
   4. Individual, and business budgets
   5. Real estate
   6. Government enterprises

B. Politics and Government:
   1. Kinds of government (Federal, State, Municipal)
   2. Representative and direct participation
   3. Elections
   4. Government services, police, schools, etc.
   5. Written constitution
   6. Written laws
   7. Decision making process

C. Court System
   1. Attorneys must pass student bar exam
   2. Field trip to see court procedure
   3. Trial by jury or by Judge
   4. Different court levels

D. Licensing Bureau
   1. Business license
   2. Record keeping
E. Units of study from American History
   1. Taxation without representation
   2. Life under a dictator
   3. Colonial form of government
   4. Balance of power

II. Math
   A. Computation skills for maintaining:
      1. check book
      2. balancing accounts
      3. rendering financial statements
      4. computing taxes (per centage)
   B. Stock investments and dividends calculated
   C. Interest
   D. Making graphs of business companies gross income, net income, expenses, etc.
   E. Keeping records for declaration of payroll weekly
   F. Working with integers by beginning all businesses in the red by declaring expenses before deriving income
   G. Budgeting income both personal and business, allowing for per centage for basic expenditures that are necessary for living and also recreational experiences.
   H. Keeping scores of grades in each subject and figuring averages or mean scores for each week.

III. Language Arts:
   A. Public speaking
      1. campaign speeches
      2. retoric of lawyers
      3. poise of judges
      4. reports to committees
      5. discussion of timely issues
      6. news forecasting
      7. speaking as a defendant or witness in a trail
B. Letter writing
1. applications for jobs
2. business letters
3. work agreements
4. job offers

C. Taping broadcast of news, sports events, weather, advertisements, political editorial on campaigning promises (pointing out the omissions, and ambiguities), etc.

D. Reading and studying newspapers for ideas of "models" that can be produced by a business of the society, Evaluating the newspaper of the society. Writing letters to the editors.

E. Writing an advertisement skit for a picture of a product, that can be produced.

F. Play production
1. acting out skits written by classmates
2. acting out advertisements written by classmates
3. production of a play as a money making enterprise, actors and actresses receive wages, keep budget of expenses for figuring cost of tickets to the production.

G. Design and produce games to be used by children with learning disabilities (these can be children with learning disabilities, or can be made for other classes with children with learning disabilities.
1. make sequential cards by glueing to note cards comics from the funny paper.
2. make large picture with hidden objects in pictures
3. make geometric shapes in colors
4. make short vowel sounds, etc., on note cards with glue and yarn. (These may be color coded with the yarn, all nouns red, verbs blue, adjectives purple, etc.)
5. make drawings of spatial relationship sheets for students to reproduce.
6. make analogy list for works that do not belong
7. write creative similes, metaphors, etc. for children who cannot think of their own.
8. using number line paper, or sentence strip paper list four works with beginning sounds, one without.
9. etc.

Note: (This activity can be both drill and service agency on a private study foundation, Learning Disabilities Workshop Material Center, or fellowship in service enterprises.)

H. Contributions to a Creative Writing or creative art to illustrate the writing for a Creative Writing Publication/s/.
I. Produce a newspaper
   1. cartoonist
   2. original jokes
   3. crossword puzzles
   4. sports writers (terminology and vocabulary of sports headlines)

J. Outlining and drafting
   1. written constitution
   2. laws

IV. Art
   A. Cartooning (publication of cartoon magazine)
   B. Greeting Card Company for cards for students and teachers who are ill, have a death, accident, or congratulations, etc.
   C. Advertising Agency for political posters, sets for plays, job advertisements, special days, bulletin boards, etc.
   D. Art Exhibits where handicrafts, hobbies, pop art, portraits, still life, etc. are displayed and sold. Sales proceeds for both private or charitable purposes may be considered.
   E. Art lessons may be given in by students
      1. paper folding (books in libraries)
      2. crocheting jewelry
      3. water coloring
      4. paper air plan making (books in libraries)
      5. wood sculpturing
      6. puppets
      7. wire sculpture
      8. etc.

V. Science
   A. Making weather instruments, and Est. a weather bureau (field trip to a weather station recommended) posting daily weather reports, making forecasts
   B. Public Health Projects
      Conduct surveys on skin care, tooth care, standards of safety in restrooms, safety of school ground, safety campaigns, etc.
   C. First Aid (teach lesson in first aid)
      Lecture Demonstration are available from Telephone Company. Also excellent films.
   D. Private study grants for any field of interest
   E. Research in genetics with animals in classroom, mice, Guinea pigs, etc., fish
F. Graph growth changes in a random sampling

G. Study growth of plants under varying conditions, light, soil, water, etc.

H. Etc.
NECESSARY EXPENSES IN MINI DEMOCRATIC SOCIETY

1. Use of Pencil Sharpener (necessary daily)  $1.00 per week
2. Lights  $2.00 per month
3. Art Materials (necessary for at least one art project per week, or more)  $1.00 per week minimum
4. Rent (unless property is owned by occupant)  5% of purchase price
   20% of cost for private estates
5. Income taxes, Personal (Under $100.00 per week)  1% Municipal
   5% State
   20% Federal
6. Business Taxes (Income under $200.00 monthly)  1% Municipal
   5% State
   20% Federal
7. Personal Income Tax (Over $100.00 per week)  1% Municipal
   6% State
   25% Federal
8. Income Tax Business (Over $200.00 monthly)  Same as above
9. Real Estate Taxes  1% of purchase price monthly
10. Check Books  $2.00 per 10 checks
11. Field Trips  Price varies, average $10.00
    Field Trip to Frankfort $100.00
12. Book fees and purchases  (To be determined)
13. Janitorial Services  $2.00 per month
14. Coat Closet Rental
   A. Fines for failure to pick up daily  $1.00 per week
   B. Third day failure to pick up item, may be auctioned to highest bidder to be repurchased by owner.  $1.00 per day
GOVERNMENT EMPLOYEES

1. Tax Collector (Established for the collection of personal, real estate, and business. Three sets of records must be maintained, for personal taxes, local taxes, state taxes, and federal taxes, deducted from gross salary.)
   A. Secretary
   B. Recorder

2. License Bureau
   A. Manager (Legislators)
   B. Secretary

3. Utilities Company
   A. Secretary
   B. Treasurer

4. Special Services Office (This office is established for the sole purpose of issuing permission slips for special projects, and collecting activities fees.)
   A. Secretary
   B. Treasurer

5. Field Trip Travel Agency
   Duties:
   A. Prepare permission slips on ditto
   B. Have ditto slips run off in office
   C. Distribute permission slips
   D. Collect permission slips and fees, both real and mini Democratic Society money
   E. Maintain financial records
   A. Secretary
   B. Treasurer

6. Bank Clerks
   Duties, sections of the alphabet are divided among the number of clerks necessary. Money for salaries is derived from sale of checkbooks.

Bank is opened daily from 7:45 till 8:15, and from 2:30 till 3:00. On Monday, or the day salary checks are issued and business is conducted, bank is opened from 7:45 till 9:00.

Bank statements must be issued monthly to all depositors. A financial statement must be issued monthly to the teacher, and the legislature.
SOCIAL STUDIES UNIT

GOVERNMENT:

TAXATION WITHOUT REPRESENTATION
LIFE UNDER A DICTATOR
COLONIAL FORM OF GOVERNMENT
BALANCE OF POWER

TEACHER ESTABLISHED A COLONIAL FORM OF GOVERNMENT, WITH NO REPRESENTATION FROM THE STUDENTS. (ALL PROPERTY WAS OWNED BY THE TEACHER FROM WHICH RENTALS AND TAXES WERE PAID, UNTIL STUDENTS ACQUIRED CITIZENSHIP;) CITIZENSHIP WAS OBTAINED BY PRESENTATION OF THE FOLLOWING ACTIVITIES FOR OBTAINING CITIZENSHIP. NO TIME LIMIT WAS ESTABLISHED.

CONCEPTS TO BE DEVELOPED:

A. INTELLECTUAL REVOLUTION
   A. Students will study recent revolutions and the American Revolution from as many sources as can be provided, and be able to tell what a revolution involves, countries that have had recent revolutions and the country that the American Colonist fought for freedom.

   B. Students will study the argument for freedom as seen by the American Colonist and in groups study the advantages of freedom for the students of our simulated environment.

   C. Students will study the arguments against freedom as seen by the American Colonist, and in groups discuss the disadvantages of forming an independent government within the classroom.

B. ESTABLISHMENT OF A CONSTITUTIONAL DEMOCRATIC REPUBLIC.

   A. Students will study the Convention of 1787 and discuss the form of government established by our forefathers.

   B. Students will discuss in groups and by visual aids, or bulletin board developed by the group, the privileges of citizenship.

   C. Students will be assigned important figures in our struggle for freedom and the establishment of our government for oral reporting to the class.

   D. Students will study our National government and know the three divisions.

   E. Students will study the law making branch of government and prepare visual aids showing how a bill becomes a law.

   F. Students will study our city and county form of government and each student will be assigned a person either in city or county government to interview. (Techniques of interviewing will be discussed.)

   G. Students will in groups draw visual aids to explain our city or county government.
I. Students will study our Kentucky state government and a representative from our district will be interviewed by the students in the classroom.

II. The history of the U.S. Constitution will be studied and students will demonstrate the ability to summarize what it means in their own words.

III. Students will study the Bill of Rights and be able to explain five of the Bill of Rights in their own words and explain how it is important to them as a citizen.

NOTE:

IF CITIZENSHIP IN OUR MENTHEOCRATIC SOCIETY IS TO BE EARNED, THEN THE OBJECTIVES ARE A

DEMONSTRATED. THREE TESTS WERE GIVEN, THE PAPER AND ONE ORAL (ORAL TEST ON THE BILL OF RIGHTS). THE TESTS WERE TAKEN AT ANY TIME THE STUDENT INDICATED HE WAS READY. EACH TEST WAS TAKEN AS OFTEN AS THE PARTICIPANT NEEDED. CONTRACTS FROM THE GOVERNMENT (TEACHER) WERE ISSUED TO CITIZENS TO HELP EVERY STUDENT ACQUIRE CITIZENSHIP. BOOKS, VISUAL AIDS, FILMS AND FILMSTRIPS WERE PROVIDED.

WHEN CITIZENSHIP WAS EARNED, PUBLIC ANNOUNCEMENT WAS MADE IN A

FORMAL CEREMONY AND CITIZENSHIP AWARDS WERE PRESENTED.

(SEE CITIZENSHIP AWARDS)

WHEN 50% OF THE CLASS OBTAINED CITIZENSHIP, EACH PERSON WAS GIVEN A CONTRACT TO HELP ANOTHER TO ACQUIRE CITIZENSHIP. PAYMENT TO THE HOLDER OF THE CONTRACT WAS MADE WHEN HIS STUDENT WAS PRESENTED HIS "CITIZENSHIP AWARD."

WHEN 75% OF THE CLASS EARNED CITIZENSHIP STATUS, THEN THE TYPE OF GOVERNMENT DESIRABLE BY THE GROUP WAS DETERMINED.

THIS COULD BE VERY EFFECTIVE WHEN ENLARGED TO INCORPORATE MANY CLASSES, THEN MUNICIPAL, STATE AND FEDERAL GOVERNMENT CAN RUN CONCURRENTLY.

EXAMPLE OF TEST ADMINISTERED:

1. The duties of (1) helping make laws; (2) carrying out laws; (3) running affairs; (4) Commander-in-chief of the Armed forces are the duties of ____________________________.

2. Each state has ______ senators, with a total of _______ for the entire United States.

3. Senators are elected for ______ years.

4. The House of Representatives are elected on the basis of ________.

5. A compromise means ____________________________.

6. The Executive Branch of national government includes:

(1) ___________________ (2) Vice

(3) and the Cabinet Members who must ____________________________.
7. The Legislative Branch of government includes (1)__________and (2)___________________.

8. The Judicial Branch includes the___________________, whose job it is to determine if the_______of the land are constitutional.

10. List some characteristics you think a good leader should have:
    (1)_________________________, (2)_________________________,
    (3)_________________________, (4)_________________________.

11. A____________________form of government is a strong plan of government.

12. A Republic is a nation_______________________ whom the voters choose in elections.

13. The members of government who are elected are:
    (1)_________________________, (2)_________________________,
    (3)_________________________, (4)_________________________.

14. The present president and vice president of the United States are:__________and__________.

15. Our Kentucky Senators are_______________________and_______________________.

16. Name a representative from Kentucky,_______________________.

17. Our first form of government was the___________________. It was considered a very weak government. In 1787 our present___________government was formed.

18. Our nation's capital is in_____________________.

19. Our state capitol is in_____________________, Kentucky.

20. Our county is______________________Co. Our government is housed in a building called a_____________________, in the county seat, which is_____________________.

21. Our mayor in Owensboro is_____________________. Our representatives in our city government are called city_____________________.

22. Our first president was_____________________.

23. Our county judge is Mr.__________________. Name three agencies of county government: (1)_____________________, (2)_____________________, (3)_____________________.

PREAMBLE OF THE CONSTITUTION
OF MINI DEMOCRATIC SOCIETY
Written by the Governor, Lieutenant Governor and Representatives

WE THE PEOPLE OF MINI DEMOCRATIC SOCIETY HAVE VOTED ON A LEGISLATIVE
COMMITTEE THAT WILL PASS ALL LAWS. THESE LAWS WILL INSURE THE EQUAL
RIGHTS OF ALL THE PEOPLE OF OUR SOCIETY.

BILL OF RIGHTS

1. EVERY MEMBER OF THE SOCIETY SHALL BE GRANTED FREEDOM OF SPEECH,
PRESS, THE RIGHT TO ASSEMBLE PEACEFULLY, AND THE RIGHT TO PETITION
THE GOVERNMENT.

2. EVERY MEMBER OF THE SOCIETY SHALL BE ENTITLED TO A FAIR TRIAL, AND
SHALL BE INNOCENT UNTIL PROVEN GUILTY.

3. IF A BUSINESS DOES NOT DO ITS JOB, AND IS FOUND GUILTY OF NEGLECT,
IT SHALL BE FINED AND CLOSED TEMPORARILY.

4. NO PERSON SHALL BE FOUND DISTURBING THE PEACE OR ANOTHER, A "WARING"
WILL BE GIVEN THE PERSON, AND IF HE CONTINUES, ARREST WILL BE MADE.

5. FINES MAY NOT BE TOO HIGH FOR A CITIZEN AND IF YOU CANNOT PAY THEM,
YOU MAY HAVE A COURT APPEAL HOWEVER MEANS CAN BE ARRANGED FOR
WORKING OFF THE FINES.

6. YOU MUST HAVE COMPLETED TWO ASSIGNMENTS BEFORE HAVING P. E., OR RECESS.

7. A BUSINESS MUST HAVE ITS FUNCTION, RULES AND LAWS OF THE BUSINESS
WRITTEN DOWN AND APPROVED BY THE LEGISLATORS BEFORE A LICENSE WILL
BE GIVEN.

8. NO PERSON SHALL BE GUILTY OF BAD MANNERS IN THE LUNCH ROOM. A PERSON
WHO (A) THROWS FOOD, (B) PUSHES PEOPLE DOWN IN THE SEAT, (C) SHOOTS
STRAW PAPER, MAY BE GIVEN A COURT SUMMONS BY A POLICEMAN ONLY.

9. THERE SHALL BE TWO ELECTIONS DURING THE SEMESTER. THE NEXT ELECTION
IN APRIL. THE REPRESENTATIVE, LT. GOVERNOR, GOVERNOR, MAY SEEK
RE-ELECTION.

10. IF ANYONE IS CAUGHT CONSPIRING AGAINST THE GOVERNMENT, THEY WILL BE
ARRESTED AND SUMMONED TO COURT.

11. CONSPIRACY AGAINST THE GOVERNMENT BY AN OFFICER OF THE GOVERNMENT WILL
BE PUNISHABLE BY TAKING AWAY CITIZENSHIP RIGHTS AND IMPEACHMENT.

12. AN OFFICER OF THE GOVERNMENT MAY BE IMPEACHED ON GROUNDS OF
(A) CONSPIRACY, (B) NOT TAKING PART IN A MEETING, (C) FRAUDS
OF GOVERNMENT FUNDS.
13. FORGERY IS A MAJOR FELONY PUNISHABLE BY A FINE OF $100.00 OR THREE EXTRA ASSIGNMENTS IN ENGLISH, SPELLING, SOCIAL STUDIES, SCIENCE AND MATH.

14. LAWS MAY BE SUBMITTED TO THE GOVERNING BODY BY CITIZENS, PROVIDED THEY ARE SIGNED BY FIVE MEMBERS OF THE SOCIETY, BUT THE POWER TO MAKE LAWS REST IN THE LEGISLATURE AND THE GOVERNOR.
UNIT ON BANKING

OBJECTIVES:
BANKS WERE ESTABLISHED FOR THE PURPOSE OF PROVIDING A SAFE PLACE FOR THE KEEPING OF MONEY, FOR MAINTAINING FINANCIAL RECORDS, FOR LOANS, AND KEEPING MONEY IN CIRCULATION.

BEHAVIOR OBJECTIVES:
1. Students will demonstrate the ability to fill out a deposit ticket, listing cash, and checks separately and totaling correctly.

2. Students will demonstrate the ability to write checks and keep a current balance in checkbook at all times.

3. Students will be able to reconcile checkbook balance with a bank statement.

4. Students will demonstrate the ability to endorse checks and know which checks to endorse.

ASSIGNMENTS:
1. Fill out a deposit ticket with cash, at least three checks, total deposit ticket correctly.

2. Students will write three checks, one for rent, made payable to the owner of the house, one for 10% of his weekly income for taxes, and one for a purchase.

3. Students will then check his checkbook to see if the balance is correct. A bank statement will be issued that is incorrect to test the ability of the student in finding the error in the statement.

4. Checkbooks with checks and deposits will then be sold to the students for all personal business conducted.

MATERIALS:

TEACHER MADE CHECKBOOKS WITH CHECKS AND DEPOSIT TICKETS

TEACHER MADE BANK STATEMENTS

ACTIVITIES
Activities for math will be taken from Dollars and Sense 6 Davis Drive
Belmont, California 94002

A field trip to a local bank. Interviews with cashiers, loan manager, and some top bank official. These will be recorded by groups and brought back to the classroom for discussion.

Study: The History of Banking (21 page illustrated booklet designed for William F. Amelia Assoc. classroom use).

Establish a classroom bank. Applications for cashiers will be taken. Three will be hired, each responsible for certain letters of the alphabet. Bank will be opened from 7:45 till 8:15, and 2:30 till 3:00 daily. Opened longer on days payroll is issued and bills are paid.
Unit on Banking

HOW A CHECK IS FILLED OUT

Suppose you wish to buy a book for reading from Cambron's Book Corner for $1.10.

Notice that the name and address of your bank appear here. Your checks are numbered here.

You would fill out the check like this:

- You write the name of the person who is to receive the money here.
- You write the amount in dollars and cents here.
- You spell out the amount of money here to make certain it is clear.
- You write the date here. A
- You sign your own name here. B
WHAT HAPPENS TO A CHECK AFTER IT IS WRITTEN?

THE CAMBROTON BOOK CORNER takes the check to the bank and endorses it. This means he writes his name, as it is written on the front, on the back of the check so that the bank will have written proof that CAMBROTON BOOK CORNER has received the $1.10 for the purchase. The bank will accept the Cambron Book Corr's owner's endorsement only, since the check was made out to him.

Only the payee (person to whom the check is written) can endorse the check. Some companies use a special stamp instead of a signature.

The bank subtracts $1.10 from the money you have deposited in your checking account.

The bank dates and stamps the check as paid. The bank returns the check (which is called a canceled check now that the bank has put its stamp on it) to you, together with a statement of how much money you have left in your account.

How to fill out a DEPOSIT TICKET.

Unit on Applications for Jobs

Objectives:

Only the best persons for the jobs are hired in the labor market.

Behavioral objectives:

1. Students will demonstrate ability to fill out an application for employment.
2. Students will describe in writing his personal traits, skills and experiences. (Personal Data Sheet)
3. Students will demonstrate ability to get along with people and be responsible

Assignment:

1. Write a letter of application for employment.
2. Go for a personal interview of the job, and fill out an application blank for employment.
3. Students will be instructed in the ability to list his strengths, skills and experiences on a personal data sheet.
4. Employment committee will evaluate applications and applicants.
5. The employment committee will attempt to place every student in a job.

Materials:

Teacher made ditto applications

Evaluation:

Teacher will evaluate the applications for the traits the student list for self-concept evaluation. Encouragement for each student that there is a job for him to do that is important within the classroom.

ceape

Questions:
Who is in Grant's tomb?
What color is George Washington's amber horse?
Find the difference between these pictures

In 7 games Mel scored two hundred three points. How many points does Mel average in a single game. If today is Wed. what day of the week is 10 days from now, 7 days, 22 days. Find the number that is half-way between fifty-two and eighteen.
PARENT AND COMMUNITY INVOLVEMENT IDEAS
AND
ROLE PLAYING COLLEGE STUDENTS

Perhaps one of the most rewarding experiences of our "Mini" society was the unusual use of parents and community persons. Colleges were established or founded by the students. Courses were offered, and parents knowledgeable in the fields were the "professors." Students applied for admission to these schools and paid "mini" money to attend.

A law school for lawyers and judges was taught by a local lawyer. Language concentration on vocabulary, research methods, rhetoric, and persuasion enabled the students to refocus their thinking about their language assignments for the entire year. Upon completion the students were granted "law degrees" and were granted the privilege of being lawyers in the "Mini Society" court system established in the classroom.

A school of nursing was taught by two mothers, a nurse and a lab technician, with the help of units developed with the teacher's assistance. Four science and health units were completed before the "state" test were completed and simulation "nursing" certificates were awarded.

A school for mechanics focused on science subjects of simple machines, motors and engines. The courses were taught by a student's father who was a mechanic, with assistance by the teacher. At the conclusion of the courses the students were given licenses to operate the school's movies projectors and other equipment in the school environment.

A school for geologists and "rockhounds" was taught by a local parent. All science units relating to geology were explored. For a culminating activity the students made a display of "Stories from the Earth" from artifacts the group had collected on a field trip.
The college idea was formulated to focus on the interests of the students. The possibility of using parents in this was limitless. The approach proved to be rewarding to the teacher in two ways: one, the enthusiasm with which the students attacked their assignments, and two, the limitless possibility of parent and community involvement. Further, it allows the students to become involved in some decision making processes and it enables the teacher to make the subject matter more individualized.

Vandalyn Hooks
EVALUATION FORM:
HOW I FEEL ABOUT THE MINI DEMOCRATIC SOCIETY

DIRECTIONS: READ EACH QUESTION CAREFULLY, THEN CIRCLE THE APPROPRIATE ANSWER. THERE ARE NO "RIGHT" OR "WRONG" ANSWERS. YOU WILL NOT BE GRADED ON YOUR ANSWERS.

Yes No Undecided 1. I enjoyed my school work more in a simulation environment.
Yes No Undecided 2. I feel my school work has improved in a simulated environment than in a regular classroom situation.
Yes No Undecided 3. I have seen the value of all the classmates in the simulated environment.
Yes No Undecided 4. My opinions of other classmates have improved in the simulated environment.
Yes No Undecided 5. I have worked harder because of the incentives than I would if everyone had received the same wages.
Yes No Undecided 6. I feel the incentives were fair for everyone.
Yes No Undecided 7. I understand some things about how our capitalistic society works by seeing the reactions of classmates in a simulated environment.
Yes No Undecided 8. I feel we have had sufficient field trips for an understanding of our units.
Yes No Undecided 9. I enjoyed asking questions about a person's job and what I should study if I wanted to fill this position in society.
Yes No Undecided 10. I think we had enough visitors in the classroom to help us with our units.
Yes No Undecided 11. I would like to have more "colleges" established in our classroom.
If yes, name some persons and subjects you would like a resource person or persons to come and teach.

Yes No Undecided 12. I like to own businesses.
Yes No Undecided 13. I liked the extra work involved in keeping financial records.
Yes No Undecided 14. I have experienced some of the problems of self government.
Yes No Undecided 15. I think my subjects in school have fitted with our mini society.
Yes  No  Undecided  16.  I think our constitution is fair.
Yes  No  Undecided  17.  I think our judges have tried to be fair in their
decisions and abided by the constitution.
Yes  No  Undecided  18.  I think we have had worthy policeman.
Yes  No  Undecided  19.  I have learned to help other people in our society to
function better.
Yes  No  Undecided  20.  I like the opportunity to help others.
Yes  No  Undecided  21.  I have learned how to help others in a more meaningful
way than before I signed a contract.
Yes  No  Undecided  22.  I have discussed with my parents some of the things
we do in our "mini" society.
Yes  No  Undecided  23.  I want to a simulated environment next year.

DIRECTIONS: PLEASE ANSWER THE FOLLOWING QUESTIONS TRUTHFULLY AND TO THE BEST
OF YOUR ABILITY. YOU WILL NOT BE GRADED ON THIS.

NAME THE ONE THING YOU LIKED BEST ABOUT OUR SIMULATED ENVIRONMENT_______

NAME SOME THINGS YOU DID NOT LIKE________________________

NAME SIX THINGS YOU HAVE LEARNED THAT YOU FEEL YOU WOULD NOT HAVE LEARNED IN
A REGULAR CLASSROOM.

________________________________________________________________________

NAME A/OR SUBJECT AREA OR AREAS YOU FEEL YOU HAVE IMPROVED IN THROUGH A
SIMULATED ENVIRONMENT. _________________________________________________

CAN YOU NAME SOME THINGS YOU HAVE LEARNED ABOUT YOURSELF  YES  NO
IF YES, WOULD YOU TRY TO TELL ME, YOU MAY USE THE BACK IF YOU WISH.
DEMOCRACY

The game of Democracy is actually a set of games. Each teaches some aspect of the democratic process. By playing several of the games, each throwing light upon a different democratic process, players learn the complexity of decision-making in a democracy.

Recommended Grade Levels
Intermediate---High School

Number of Players
6-11

ECONOMIC SYSTEM

Description of the Game

Economic System simulates, in abstract form, basic features common to a wide range of economic systems. The game illustrates the dependence of each part of the system on the activities of other parts; ways in which markets function through the supply of goods and the demand for goods; the way that prices serve to bring demand and supply into balance; and the way in which collective actions in a society are related to individual actions in the economic system.

Recommended Grade Levels
Jr. High---High School

Number of Players
15. May be used with entire class by having them divide into groups.
Description of the Game

Ghetto was developed to sensitize its players to the emotional, physical, and social world the poor inhabit. It has sometimes aroused anger and disbelief, for it undercuts some comfortable rationalizations about ghetto life and ghetto people. Players experience vicariously the economic pressure that drive people into crime, welfare, and community action. As he plays the game, the player plans life strategies for a poor person and meets with the discouragements, frustrations, and occasional good luck that are the common lot of the poor. By the end of the game he may begin to see these problems in a new way. He may begin to understand why poor people act the way they do, why slums continue, and why they sometimes change.

The game is not really designed for residents of inner-city ghettos.

Recommended Grade Levels

Jr. High---High School

Number of Players

7-10. When there are more than 10 players, two can play one role. As many as 20 players can play one game. Several games can be played at the same time, however, so that the entire class can participate.

Description of the Game

Consumer is designed to illustrate the effective use of income and credit in planning purchases. The format of the game is a simulated marketplace in which goods are offered for sale and credit is obtainable. Players make many of the decisions faced in life by persons on a limited income. In the game, as in life, a wise decision is more rewarding than an unwise one, and increases the chances of winning.

The game is particularly suitable for groups studying mathematics, home economics, sociology, and consumer and citizen education.

Recommended Grade Levels

Intermediate---High School

Number of Players

15-17
LIFE CAREER

Description of the Game

In Life Career, students are able to walk through a span of eight years in the future, as the decision-makers for a fictitious person presented to them in the form of a Profile or case history. Each team of decision-makers in competition with other teams working with the same Profile. Planning is in the form of decisions about how this person will spend a typical week during each of the eight years. At various intervals in the simulation, players are fed back the consequences of their decisions in the form of scores or game points which are indicators of the relative satisfactions of the life they have planned.

Life Career is designed to meet four basic requirements for intelligent career decision-making: (1) a feeling for what the future will be like; (2) accurate information about the alternatives or opportunities available; (3) a sense of how a life cycle is patterned; (4) practice in decision-making.

Recommended Grade Level

Grade 6---High School

Number of Players

Any number, working in teams of two or three and with a scorer to about every five teams.

415 Twelfth Street N.W.
Washington, D.C. 20001
The Ohio Vocational Interest Survey (OVIS) has two aims: (1) to assist youth in understanding themselves in relation to the world of work and, (2) to provide a background for career choice. OVIS is useful with students in eighth grade and above. OVIS is compatible with standard occupational information publications from state and federal sources.

Wisconsin:
American Industry Project, Stout State University, Menomonie, Wisconsin. Material printed and available describes the restructured curriculum based on a conceptual framework of industry in the United States. Courses are developed for grades 8, 10 and 12.

Wyoming:
Developing an elementary program of "Attitudes---World of Work"; "Career Orientation" for grades 7 and 8; "Career Exploration" for grades 9 and 10; and "Career Preparation" at grades 11 and 12. The cluster concept has been utilized in developing the program for the last two years of high school. The Wyoming State Department of Education has published "A Comprehensive Occupational Education Program" describing the sequences.
Bibliography

Materials to Use with Students
Pamphlets, Books, Audio-Visual

Books

Counselor's Guide to Manpower Information Superintendent of Documents $1.00
An annotated bibliography of government publications.

Booklet written to help student to investigate his interests, abilities, and aptitudes, and apply the information to post school educational and occupational opportunities.

Current review of careers, published for each two year period. After each occupation is a source from which free materials may be requested. Could possibly be an inexpensive means of developing a career counselor in a junior high school with students writing the requests.
Occupational Outlook Apport Series Individual reprints from Occupational Outlook Handbook

Booklet focuses upon relationship of interests and occupational possibilities.

Booklet relating personality factors and occupational possibilities.
Audio-Visual

Building Work Habits. Stanley Bowman, Inc.

Career Familiarization Tapes. Stanfield and Associates, Portland, Oregon (tapes for junior high school and senior high school classroom and a study center for fifty occupations)

Choose a Job Inventory Objective: Students will display an expectation for future success by checking a higher percentage of want ad job requests from the "Choose a Job Inventory" which offers more prestigious, socially approved occupations. For information write:
The Instructional Objectives Exchange
P. O. Box 2408
Los Angeles, California 90024

Ohio Vocational Interest Survey (OVIS) Harcourt, Brace and World, Inc., 257 Third Ave.
New York, New York 10017
Pamphlets

Focused upon 9th year appraising pupil interests, aptitudes, skills; understanding of the world of work; understanding of economy. Previously was a teachers' guide for North Carolina.

How to Get and Hold the Right Job
How to Sell Yourself to Your Employer Oregon State Employment Service.

Materials developed for use with grades 6 through 9 focusing upon the things, people, or ideas orientation of careers. Kit is composed of various components: Junior Occupational Briefs, Junior Guidance Booklets, Student record books, teaching guide, and filmstrips (SVE, Inc., 1345 Diversey Parkway, Chicago, Illinois 60614).

(current, inexpensive occupational briefs; filing system may be utilized; based on DOT easily revised)

A pamphlet listing and describing 4-H projects for which printed instructional materials are available. This pamphlet and useful materials are also available through the County Extension Agent in each county in Oregon. Many 4-H projects and clubs are related to careers and offer exploratory experiences appropriate for students in grades 7 to 10.
