A study was conducted of the perceived training needs and the importance of these needs for job effectiveness of urban extension agents working with disadvantaged audiences. The questionnaire was based largely on nine general areas of competency. Most of the respondents were younger than 35 and had less than 5 years' experience. Among the training needs they perceived were technical knowledge; effective use of radio, photographs, telephone, personal letters, television and newsletters; understanding why people join organizations and the purposes of various agencies serving the disadvantaged; understanding the relationship of daydreaming to creative thinking; understanding the implications of the rapidly changing population trends; how to develop a long-range extension program plan; how to develop an approach sensitive to the disadvantaged; programs on career exploration and development; how to interpret results of research in the physical sciences; and understanding of how the extension service is organized. (KM)
PERCEIVED TRAINING NEEDS OF
URBAN 4-H AGENTS WORKING
WITH DISADVANTAGED AUDIENCES *

By

Dr. Joel R. Soobitsky, Graduate Student
and
Dr. Clarence J. Cunningham, Advisor

Program and Staff Development
USDA-Extension Service

USDA-ES Study
INTRODUCTION

4-H agents have been challenged to shift programs and methods to meet changing needs of society. A large percentage of the American people are living in urban areas and many of these concentrated populations exhibit the paramount problems of poverty. In the United States today there is the science, technology, and economic capacity to abolish human poverty. The Cooperative Extension Service is an important part of this capacity and must assist society in eliminating this culture of deprivation.

It would be absurd to assume that Cooperative Extension is going to reach the urban disadvantaged with the 4-H staff of yesterday or today. Advance training, continuous in-service training, and the recognition of training needs are indispensable ingredients for successful progress.

This report will focus upon the factors relating to 4-H agents' training status and the perceived importance of training needed of selected areas of competency.
METHODOLOGY

The overall design for this study consisted of the development and utilization of mail questionnaires for describing the perceived training needs and the importance of these needs for job effectiveness of urban Extension agents working with disadvantaged audiences in the 12 North-eastern States.

The design of the questionnaire was based largely upon the nine areas of competency identified by the National In-Service Training Task Force of the Extension Committee on Organization and Policy of the Land-Grant College Association. These areas of competency include:

1. Extension Organization and Administration
2. Communications
3. Social Systems
4. Effective Thinking
5. Human Development
6. Educational Process
7. Program Planning and Development
8. Technical Knowledge
9. Research and Evaluation

Specific items were developed for each of the nine general areas. The items were arranged in random order with a scale from 5 to 1 placed on each item as to "importance" and "training needed".

State directors of Extension in each of the 12 States identified agents working with urban disadvantaged audiences and the survey was conducted in the fall of 1970.
Although this study included agents with all divisional responsibilities (163) only the needs of 4-H agents (60) will be presented in this report.

TABLE 1

TENURE OF 4-H AGENTS WORKING WITH DISADVANTAGED

Table 1 indicated that 59.3% of the 4-H agents working with urban disadvantaged audiences have less than five years' tenure in the Cooperative Extension Service.
Table 2 shows that 55.9% of 4-H agents working with urban disadvantaged audiences are less than 35 years of age with 44% less than 30 years of age.

Table 3 shows that there are slightly more female 4-H agents with urban disadvantaged audiences.

TOTAL 60

Table 7 indicates that over $\frac{1}{2}$ (53.3%) of urban 4-H agents working with disadvantaged audiences have an educational major field of education.
Table 8 illustrates a wide range of urban 4-H agents' total time spent with disadvantaged audiences. 50% of the 4-H agents spend less than 1/3 of their time with this clientele while 20% spend 100% of their time with urban disadvantaged clientele.
Table 9 indicates that most of the efforts by urban 4-H agents working with disadvantaged audiences are in cities with populations of 10-100,000.

Summary of Situational Data:  (Urban 4-H Agents Working with Disadvantaged Audiences)

1. 59.3% have less than 5 years' tenure in the Cooperative Extension Service
2. 55.9% are less than 35 years of age with 44% less than 30 years of age
3. There are slightly more females than males -- 55.9%
4. 81% have less than 5 years' experience with disadvantaged with Cooperative Extension Service
5. 80% have had no experience with disadvantaged with other agencies
6. 25% have Master degrees
7. 53.3% have education as their major field of education
8. 50% spend less than 1/3 of their time with urban disadvantaged audiences
9. Most of the urban disadvantaged work is conducted in cities with 10-100,000 population
