This content analysis schedule for the Pomona Bilingual Leadership Program of Pomona, California, presents information on the history, funding, and scope of the project. Included are sociolinguistic process variables such as the native and dominant languages of students and their interaction. Information is provided on staff selection and the linguistic background of project teachers. An assessment is made of the duration and extent of the bilingual component, and the methods of second language teaching in general. Included is an analysis of materials, student grouping, tutoring, curriculum patterns, and cognitive development. The report also discusses self-esteem, learning strategies, the bicultural and community components, and means of evaluation. Inserts include information on staff development procedures, program design, operational procedures, community involvement, and advisory committee functions. (SK)

5.3 STAFF DEVELOPMENT PROCEDURES:

5.3.1 Pre-service

Staff pre-service orientation will be conducted two weeks prior to the fall semester. This training will provide project staff, district staff, and administrative personnel with the functional knowledge necessary to implement the bilingual program in the participating junior high schools. The major topics to be included in the pre-service component are:

- Techniques for implementing a behaviorally oriented instructional program
- Techniques for conducting parent conferences
- Techniques for recognizing student problems and counseling students
- On-going assessment of student performance
- Development and utilization of multi-media materials
- Parental and community involvement
- Student motivation, reinforcement, and self-concept development.

5.3.2 In-service

Beginning in September and lasting throughout the school year, in-service training will be held for project instructional staff and other district and non-public school personnel. This in-service not only will include special training by curriculum specialists but will also include visitations to other bilingual projects having similar programs so that alternate approaches to instruction can be viewed in actual practice.

The in-service sessions primarily will be concerned with developing the leadership capabilities of the target children within the operational framework of a dynamic bilingual/bicultural learning environment. In addition, materials assessment, selection, and development and/or adaptation will constitute an on-going process for the instructional staff. The student program will be continuously monitored to provide them with the most relevant programs of socio-cultural and educational experiences possible.

3.0 BILINGUAL PROGRAM DESIGN

The bilingual-bicultural program designed in this second year renewal proposal will be implemented at the junior high school levels in prescribed schools of the Pomona Unified School District. This second year of project implementation is firmly based upon successes and necessary adjustments in program design as implemented during the initial year of project operation.

Principle criteria for the formulation of the bilingual-bicultural program to be implemented under the terms of this proposal include provisions for instruction of a bilingual-bicultural character through the utilization of the vehicles of leadership, speech and drama, social skills, and an adjusted instructional program in the language arts fields. In this manner, participating students will acquire bilingual and bicultural skills through the application of these learnings in prescribed subject fields within the curriculum of the schools.

Instructional assistance will be focused upon a designated target population, which will include students having only an oral facility in the Spanish language, those with an oral facility in Spanish and English, pupils with language skills in both English and Spanish, but who have restricted literate capabilities in the use of these languages. Precise instructional procedures relative to program application will be provided in that section of this proposal describing program procedures.

Particular stress will be placed upon instruction in bicultural social skills, social studies, and the development of cultural heritage relative to each prominent ethnic culture. As will be noted in that section of this proposal pertaining to staff objectives, attention shall be given to the
formulation of instructional guides and courses of study which will strengthen provisions for a smooth transition into the utilization of both Spanish and English languages as constant communications media applied in the learning processes.

The implementation of this bilingual-bicultural program shall be during a three-period time block during the regular school day with scheduling adjustments to allow the participating students to maintain enrollment in the regularly prescribed programs of the junior high schools during the remaining portions of the day and during scheduled "extracurricular" activities which have a school based purpose.

Throughout the demonstration of this proposal program, opportunities will be included for increased student interaction, both in formal instruction periods and through participation in the informal "extra-curricular" activities of the school.

5.0 OPERATIONAL PROCEDURES

The operational procedures developed and described in this chapter of the proposal shall be used to provide guidance for the structural implementation of the Bilingual Leadership Program.

5.1 OPERATIONAL PROCEDURES:

To adequately implement the instructional program included in chapter 3.0 of this proposal, students in the target population will be divided into four learning groups. These groups include one to two groups each of the following categorical descriptions at grades seven and eight.

- **Group A**
  - Students who are bilingual, literate in both Spanish and English languages.

- **Group B**
  - Students who understand Spanish, but who are not literate in this language.

- **Group C**
  - Students who speak English only.

- **Group D**
  - Students who speak Spanish only.

These students will be scheduled in pairs of groups (see section 5.5) in the processes of providing the instructional program described in the chapter on educational objectives.

5.2 COUNSELING PROCEDURES:

The primary responsibility for the counseling of students participating in the Pomona Unified School District bilingual education program will rest upon the project teachers. Each teacher has one period each day set aside for the scheduling of individual student teacher conferences and counseling on matters of immediate concern. It is felt that by maintaining a close relationship between the students and the educational staff, needs may be quickly sensed and procedures developed to alleviate problem areas. Any student who is found to have further need for counseling will be referred to the project director/counselor.
11.13 1-Program is one-way - only non-English Iother Tongue students (including N-ELT-English dominant). English Iother tongue students do not receive instruction in a second language.

12.0 METHODS OF SECOND LANGUAGE TEACHING

(mark: all that apply; some projects may use a combination of methods)

1 - Audio-lingual habit skills or behavioral approach. Emphasis on communication. Includes contrastive analysis of sounds (units) in both languages by teacher and students, student repetition of tapes and/or fluent teachers' model sentence patterns until responses are automatic. Structural drills and dialogues are systematically presented. Includes direct association between object and word in second language in a sequence of patterns learned in complete sentences. Inductive-generalizations drawn from examples.

2 - Transformational-cognitive approach

Acquiring an understanding of the structural patterns or grammatical rules of a language.
5.5 MODULAR CLASSROOM PROCEDURES:

The modular schedule for classroom instruction for the divisions of the student populations to be treated in each of the participating schools has been constructed to provide special grouping of students in order to strengthen the effectiveness of the language instruction given.

The precise groups organized are described on the model in section 5.6 of this division of the project. It will be understood that the groupings of students presented allows for the combining of students with the ability to understand spoken Spanish with those students only orally capable in the Spanish language. Also, this combining of modular groups places students with bilingual capabilities with those students limited to English language facility only. In this manner, students with similar needs are placed together in instructional settings, permitting the formulation of teacher directed learning and supportive learning activities provided by classmates in the same learning environment.

12.0 Methods of Second Language Teaching

Continuation P.40 Pomona
2a-inductive - generative approach: through listening to communication, perhaps of peers, and attempting the new language in situations which call for the student to generate sentences - test his understanding. (the way native language is acquired)

Includes direct association between object, picture or action and word in second language. (Through making speeches) pg 670

2b-deductive - the cognitive code approach: through initial formal study and analysis of grammatical structures, then applying them through examples, i.e. answering questions, or transforming affirmative sentences to negative, declarative to interrogative, active to passive.

3.6.4 DRAMA - ROLE PLAYING

The overall program is composed of a series of roles to play with basic standards to follow.

Drama in the form of skits, plays, puppetry and marionettes are performed by the students for their peers, adults and for the elementary students which feed into their junior high school.

The materials or dialogue in most instances were taken from booklets and magazines and varied to meet the students needs or standards. Some were written by the students themselves. The youngsters assisted in making their own sets, costumes, and puppet stages.

The intended results in dramatic presentations are self-awareness, experience in simulated leadership situations, learning and memorization of dialogue, developing confidence and self-worth.

3.6.5 ETHNIC STUDY

One of the most neglected areas in the study of United States history and social studies is the development and contributions of the Mexican American in the United States. Our efforts was to bring about the recognition and worth of the American of Mexican descent and of other diverse groups which make up our nation.

La Raza, an audio-visual history of the Mexican American served as the bases of materials for this study. This kit is composed of filmstrips

Form 3
The Pomona Unified School District, recognizing the need for a close home-school relationship, has delineated a comprehensive program of parental and community involvement. For this program to be successful, it must have relevance for and be responsive to the socio-educational needs of the community. It is vital, therefore, not only to involve children, but to bring family members, lay citizens, and community service organizations and agencies into the classroom. Based upon the first year of project operations, it is deemed critical that these groups be actively involved in the educational environment of the bilingual program.

9.1 Parent Involvement:

Parents and other family members of children participating in the bilingual program shall be involved in a series of regularly scheduled parent-education meetings. The purpose of these meetings is to articulate project objectives and program activities and to elicit suggestions concerning student bilingual education needs, home-school interfacings, and active parental support requirements.

Parents also will be involved in the actual learning environment as resource persons to share their knowledges and expertise with the students, and serve as identification models for student self-image.

Further, two part-time Community Relation Aides will provide a close home-school link to all parents having children in the bilingual program. This added dimension will greatly aid project staff in obtaining the involvement and support essential to program success, and will serve an important function in establishing district responsiveness to community educational needs.
9.2 Community Involvement:

A comprehensive informational program of the Pomona plan for bilingual education will be initiated to members of the community. Lay citizens and local agencies and service organizations having specific interest in the bilingual/bicultural character of the community will be encouraged to participate as concerned individuals/groups, members of the Advisory Committee, or as program resource persons. The on-going vehicles of dissemination will be school-community meetings, home visitations, information brochures, and planned visitations to project activities. The direct methods for community involvement in the bilingual program will include at least the following:

1. Four orientation meetings will be held to describe project intent in terms of student growth and development, and to determine strategies whereby local citizens and agencies can enrich the education of those students enrolled in the bilingual program.

2. Lists of persons and agencies wishing to participate in the bilingual program will be made. Specific determinations also will be made regarding the type of involvement desired, i.e., field excursions, classroom presentations, Advisory Committee presentations of program tenets to community groups, etc.

3. Formal invitations will be extended to members of local community agencies to make on-site visitations and/or classroom presentations.

4. Project staff will make planned presentations to interested community organizations concerning both general and specific aspects of the program and elicit their support and direct involvement.

9.3 Advisory Committee Functions:

An Advisory Committee, representative of parents, school personnel, agencies and service clubs, businesses, and lay citizens, will be established to provide on-going assessment and direction to the bilingual program. This body will meet on a regularly scheduled basis, and will participate in the
following activities:

1. Four Advisory Committee meetings during the proposed academic year.

2. One classroom visit by each member of the Advisory Committee.

3. Fill out questionnaires/awareness inventories relative to program activities, with recommendations for program improvement.

The Advisory Committee will consist of at least 15 members representative of the above groups in the Pomona community. Approximately 50 percent of this group will come from parents of participating children, proportionally balanced according to classroom ethnic distribution. In addition, representation from project staff and district administrative personnel shall serve as ex officio members to the Advisory Committee.
25.2 Project's impact:
1-Project mentions that other classes in the school, but not in the program have picked up methods or material from the bilingual program
2-Project mentions other schools in the local educational system have started bilingual programs
3-Project mentions that a University has instituted teacher training courses in bilingual education to meet staff development needs
