This content analysis schedule for the City of Lakewood School District of Lakewood, New Jersey, presents information on the history, funding, and scope of the project. Included are sociolinguistic process variables such as the native and dominant languages of students and their interaction. Information is provided on staff selection and the linguistic background of project teachers. An assessment is made of the duration and extent of the bilingual component, and the methods of second language teaching in general. Included is an analysis of materials, student grouping, tutoring, curriculum patterns, and cognitive development. The report also discusses self-esteem, learning strategies, the bicultural and community components, and means of evaluation. Inserts include information on staff development, scheduling, and instructional materials. (SK)

8a X Tucson Early Education Model
17- Develop materials reflecting urban students
22- Foster teacher involvement with parents
Through extensive interfacing with its continuing EPDA B-2 Project, Montclair State College proposes that it will be able to provide, for cities with Title VII involvement, counselors, school social workers (visiting teachers), and teacher aides from participants in the B-2 training program.

Using a modified version of the multi-workshop approach to certification and course credit described in the accompanying pages, the Urban Institute of Montclair State College plans to employ, as co-adjutant staff, professional members of the Title VII teams in cooperation cities who will carry on the required leadership role to implement relevant workshops and seminars selected from among those included in the following descriptions. It is proposed that such workshops be conducted in centers close to the Title VII cities using a bilingual approach. Just such an approach was used by the college in training B-2 participants in the 1969-70 project.

Educators attempting to analyze the roots of student disruption or in-school rebellions tend to deal with the school in a vacuum as an entity separate from the pressures and problems of the surrounding community. Colleges have traditionally offered teacher education programs in which prospective teachers are taught to be concerned with in-school roles and activities only. The same weaknesses can be found within the college community itself. This perceptual isolation of the school from the rest of the community forces students to leave behind the realities of daily living. It is little wonder that students have difficulty relating to the highly artificial environment of the traditional school.

The Urban Institute recognizes that (1) the urban school merely reflects and reacts to the problems and pressures of the community surrounding it; (2) the college and the local school as well as the people associated with both (students, parents and faculty) must begin to address themselves to all urban problems which affect or are related to education; and (3) new teacher training approaches and techniques must be created to help teachers begin classroom assignments by dealing with the interests and needs of the urban student.

The Institute proposes offering a special series of short term workshops during the 1970-71 fall and spring semesters. The workshops will offer teacher training based on a series of successful experiences rather than merely defining teaching readiness in terms of required courses taken. The proposed program will emphasize communication skills and improved curriculum development practices through student involvement and the utilization of the community and
other student interests as laboratory and subject matter. The courses will be designed to (1) help interns understand and become more aware of specific problems facing urban students and his community and (2) help interns provide students with an education which can be immediately applied to real, human problems with all the complexities and differences of perception and reaction which accompany them.

The 80 interns who participate in the summer institutes and 35 interns who enter the program in September will be invited to earn 18 credit hours by participating in the following workshops or seminars (9 credit hours each semester):

(a) Community affairs workshops - 40 interns, 4 credit hours
A series of workshops will be held to examine the role of the teacher and the school in relationship to the entire community. Emphasis will be placed on the theoretical relationships expertise in different areas involving community affairs will be invited to analyze and discuss teacher education; administration of local schools and systems; supervised teaching, curriculum relevancy and community relations. The workshops will also deal with the emotional aspects of teaching, the approaches to promoting change in education, drug abuse in schools, etc. A special Northern New Jersey Regional Planning Conference will be held as part of the workshop series.

(b) Intercollegiate awareness institutes - 20 interns, 6 credit hours
The college through the Urban Institute has been using Education Professions Development Act (EPDA) funds to conduct extensive training workshops for college personnel working with urban, disadvantaged students. These workshops are designed to help make college faculty members more aware of the specific problems involved in teaching inner-city students and the immediate, critical needs which must be met. More than 200 faculty people from the following four colleges have participated during the past year: Newark State College, Paterson State College, Bloomfield College and Montclair State College. Member colleges of the New Jersey Education Consortium and other colleges throughout the state will be invited to participate in the 1970-71 workshops. Twenty UEC interns will participate and be trained to serve as observers, recorders and, eventually, co-trainers.
(c) Community field service program - 20 interns, 3 credit hours

The program is a coordinated effort to have different departments in the College and local public and private agencies work together in creating relevant and meaningful community interns. The project began last year as a UEC program and has developed into a campus wide clearing house for the placement, the on-the-job-training and supervision of students working on community and human service projects. Emphasis during the coming year will be placed on creating field assignments which will provide interns with some insight into local social problems.

(d) Community school program - 10 interns, 3 credit hours

The Urban Institute in cooperation with the Urban League of Essex County will continue offering two Adult Basic Education (ABE) courses to community residents at the Glenfield School in Montclair. Formal classes and tutoring of ABE students will provide interns the opportunity of earning field service credit. In the fall, the program will also include GED and CLEP instruction.

(e) Inner-city skills development and training centers
   (A teacher assistant program - 35 interns, 3 credit hours; a professional semester option - 30 interns, 13 credit hours)

The proposed Center programs would involve two groups of interns:

(1) A teacher assistant program will involve establishing special study skills development centers on campus and in a Newark evening school next fall. Such centers are now being conducted for Spanish-Speaking Teacher Corps participants in Paterson, Union City and Newark. The centers offer supplementary instruction to off-campus students, particularly those living in disadvantaged, inner-city areas. The proposed centers would also help recruit new UEC interns and college students. Interns participating in center programs would earn field work for teaching by offering tutorial and/or supervisory assistance services.

(2) Professional Semester Option has encouraged an increasing number of Montclair State College undergraduates to elect an Educational Semester of practice teaching in an urban school. Five or ten interns will join an equal number of Montclair State College students in
creating a mid-city training site where it would not be economically feasible for either group to do so alone. The proposed centers will be located in areas near the College and will include at least one bilingual group in Passaic or Paterson.

(f) Leadership training in urban recreation seminars - 10 interns, 3 credit hours.

Twenty-five tenth and eleventh grade Upward Bound students who participate in the NCAA summer pre-service institute will continue meeting every Saturday morning throughout the fall and spring semesters. Ten UEC interns specializing in physical education will work with the students in developing leadership skills.

(g) Proposal development and writing seminar - 20 interns, 3 credit hours.

Interns involved in the Montclair State College phase of the statewide UEC program have developed proposals requesting state funds to carry out innovative programs in school systems where they are teaching. The initiative taken by the interns points up the need to provide UEC interns with special assistance in proposal research, development and preparation and to encourage the interns to practice the art of grantsmanship as a means of bringing about change in their school system. The proposed seminars will use professionals who develop proposals for federal, state, local and private foundation programs. They will provide interns with such information as (1) how to identify programs which provide funds for specific educational efforts; (2) the process involved in developing a proposal; and (4) the resources which can be used to carry out the project. Also, expertise will be made available to help interns develop the many skills involved in actually writing a proposal, preparing proposed budgets and following a proposal through to funding.

(h) Community workshop skills development seminar - interns, 3 credit hours

A special series of seminars will be held to provide interns with the knowledge and skills required to plan, and develop and conduct workshops on urban social problems in the communities where they are teaching. Instruction will involve the many techniques involved in organizing and implementing a community workshop.
Interns will be encouraged to use workshops as a way of becoming involved in community affairs.

(1) A drug abuse institute for school personnel - 20 interns, 3 credit hours

The proposed Institute will offer inter-disciplinary training to all school personnel in an intensive effort to curb the rising use of drugs by students in public schools. Addicts involved in rehabilitation programs and professionals working in the many different aspects of drug abuse will be recruited to provide special instruction to interns and other school personnel in the program. Special attention will be given on how to identify students using drugs and how to work with the students, the family and the community in handling drug abuse in schools. The Institute will begin collecting and documenting factual and objective information which can be made available to students, parents and school representatives concerning drug abuse. College and school personnel will be encouraged to work together in providing adequate referral services to student users and to create an educational program on drug abuse for interested people in the community. The proposed Institute will operate under the general supervision of the College Division of Community Services. Faculty will be drawn from the Panzer School of Health and Physical Education. Co-adjutant staff personnel will be selected on the basis of a candidate's experience with drug problems in inner cities.

(1) Inner-city economics - 20 interns, 3 credit hours.

The proposed seminars will provide interns with intensive analysis of practical economics in urban areas. Consumer fraud, minority representatives in the business community, buying boycotts as a form of political action, the inner-city business community and other aspects of economics in urban areas will be discussed. Black capitalism, business coalitions and aid to small business will be included. The program is designed to assist the New Jersey Center for Economic Education, an existing agency within the College Division of Community Services, to extend its efforts to deal realistically with the problems of teaching economics in the 1970's.
UEC curriculum development workshop - 20 interns, 3 credit hours

Interns involved in classroom teaching will be admitted to a special workshop series in which they will be required to assist in the refinement and revision of curricula. They will be offered training experience in curriculum development as a collaborative student-teacher effort. Interns will work in teams in drafting recommended curriculum changes and justification for the suggested revisions. Intern recommendations will be based upon their actual classroom and/or community experience. The proposed workshops will offer interns the opportunity of initiating projects-for-credit and/or independent study which will relate education to the immediate and critical needs of existing social problems. Successful programs are expected to be included as regular fare in subsequent offerings of the College.

Through this proposed interfacing, it will be possible to spread the influence of B-2 over a much larger geographical area of the state. Participants can be brought into the pre-service training program which will be conducted in intensive field-experience programs this summer by providing housing for the short-term period, and then returning to their home area for the continuation of the training program during the school year.

This proposal will enable the Title VII project during 1970-71 to greatly magnify the influence of the relatively limited training budget suggested. It will obviously require a considerable amount of coordination between B-2 and Title VII staffs. Such cooperation should be possible because to the overlapping responsibilities Montclair State College will have the two bilingual programs. An abstract of the 1970-71 program follows:

STAFF DEVELOPMENT IN-SERVICE COMPONENT

The staff shall attain a high degree of competence in bilingual education and secure attitudes to reach the goals of the program. There will be pre-service and in-service workshops and frequent conferences with the coordinator to further develop staff competence. Contacts with other communities that have "successful" bilingual programs will be emphasized. Participation in college courses which would be useful to staff in a bilingual program will be recommended. Assessment of staff development will be made by program coordinators.

11.15 Total min. per day of instruction through N-ELT

11.16 Subjects taught in second lang. of instruction

11.17 Mixed or separate language usage by teacher and/or aide in the classroom (mark all that apply)

0-not specified
1-languages are never mixed by either the teacher, aide or the pupil in any one class period; only one language is used.
2-the second language is used exclusively by the teacher, aide and pupils during at least one portion of the school day.
3-the teacher uses one language exclusively within a class period; pupils are allowed to use either native or second language.
4-the teacher uses only one language; however, the aide or paraprofessional uses another during the same class period; students may use either.
5-the teacher reinforces any conversation initiated by the child through the use of whichever language the child has used at the time.
6-constant switching from one language to another by teacher during lesson.
7-the teacher uses English and the paraprofessional translates the same material for N-ELT pupils.

7-the teacher uses English and the paraprofessional then translates the same material for N-IIT pupils.
8-other (summarize)

Teachers will present content in the dominant language (Spanish) most of the time and gradually increase the use of the second language (English).

12.0 Methods of Second Language Teaching

(mark all that apply: some projects may use a combination of methods)

1-Audio-lingual habit skills or behavioral approach. Emphasis on communication. Includes contrastive analysis of sounds (units) in both languages by teacher and students, student repetition of tapes and/or fluent teachers' model sentence patterns until responses are automatic. Structural drills and dialogues are systematically presented. Includes direct association between object and word in second language in a sequence of patterns learned in complete sentences. Inductive-generalizations drawn from examples.

2-Transformational-cognitive approach
Acquiring an understanding of the structural patterns or grammatical rules of a language.
2a - inductive - generative approach: through listening to communication, perhaps of peers, and attempting the new language in situations which call for the student to generate sentences - test his understanding. (the way native language is acquired) Includes direct association between object, picture or action and word in second language.

2b - deductive - the cognitive code approach: through initial formal study and analysis of grammatical structures, then applying them through examples, i.e. answering questions, or transforming affirmative sentences to negative, declarative to interrogative, active to passive.

Grammar - Translation Method

13.1 Second language listening-speaking skills are learned:

1. Concurrently with dominant language listening-speaking skills
2. After a specified level of competency achieved in listening-speaking skills in dominant language
3. A specified period of time after learning listening-speaking skills in dominant language taught

13.2 AL-I sequence followed:

1. Listening-speaking proficiency precedes introduction of reading
2. Reading is taught concurrently with listening-speaking skills
3. Learning to read overlaps learning of listening-speaking skills
4. There is some overlap between learning to read and to write

13.3 Listening-speaking proficiency determined by:

1. Measure of listening-speaking proficiency
2. Informal assessment by teacher

13.4 Second language reading skills are learned:

1. Concurrently with learning to read in dominant language
2. After a specified level of dominant language reading competence achievement
3. A specified period of time after learning to read in dominant language (e.g., a specific grade)
4. Before learning to read in dominant language
At each of the aforementioned schools there will be two bilingual classes, one for Spanish Dominant children and the other for English Dominant children at the second-grade level.

From 8:30 A.M. to 11:00 A.M. the Spanish Dominant children will receive instruction primarily in Spanish from a native speaker of Spanish who is bilingual and a bilingual assistant teacher. The English Dominant children will receive instruction primarily in English from a native speaker of English who is bilingual and a bilingual assistant teacher.

From 12:00 Noon to 2:30 P.M., the Spanish Dominant and English Dominant children from the two classrooms will meet and receive instruction jointly.

**MORNING**

**SPANISH DOMINANT - CLASS A**

Teacher: Native speaker of Spanish  
Assistant: Bilingual  
Instruction: Primary Spanish

**ENGLISH DOMINANT - CLASS B**

Teacher: Native speaker of English  
Assistant: Bilingual  
Instruction: Primary English

**AFTERNOON**

**ENGLISH DOMINANT FROM CLASSES A & B**

Teacher: From Class A  
Assistant: From Class A  
Instruction: Spanish as a Second Language, advanced English plus bilingual activities in Arithmetic, Art, etc.

**SPANISH AND ENGLISH DOMINANT FROM CLASSES A & B**

Teacher: From Class B  
Assistant: From Class B  
Instruction: English and Spanish as a Second Language plus bilingual activities in Arithmetic, Art, etc.

In addition to the bilingual classes, provisions will be made to hire an ESL teacher who will service those boys and girls in the three elementary schools who are not in the bilingual classes.

The roll of the bilingual coordinator is to:

1. oversee the program  
2. recruit bilingual teachers and assistants  
3. develop curriculum  
4. order materials

Daily Schedule

Since we will be utilizing the language experience approach, it would be impossible to follow a prescribed daily schedule broken down into specified time periods. The room will be arranged in learning centers which will incorporate all the learning areas and the children will move from center to center throughout the course of the day. The learning and movement from center to center will be accomplished in small groups, subsequently the time for a particular learning will be different for each child. It is expected that the child will have the opportunity to participate daily in the language arts, arithmetic, social studies, and science which will be conducted in Spanish. An hour will be provided each day in the afternoon for English instruction by the language arts specialist. The minor areas of music, art, physical education and library will involve a half hour per week period taught in English.
