Evaluative Checklist: An Instrument For Self-Evaluating An Educational Media Program In Colleges And Universities.

Association for Educational Communications and Technology, Washington, D.C.
Sep 70

15p.; Originally prepared for U. S. Office of Education, Bureau of Research

National Education Association, 1201 Sixteenth Street, N. W., Washington, D. C. 20036 (Stock Number 071-02322, $1.00)

This checklist provides sets of criteria according to which judgments about each of the six major elements of an institution's educational media programs can be made. These elements are: 1) commitment on the part of the administrative and instructional staff to the use of media; 2) the inclusion of media services as an integral component of curriculum and instruction; 3) the adequacy of the media center's functioning; 4) the availability of suitable physical facilities to house media operations; 5) the presence of adequate financing; and 6) the allocation of sufficient staff to the media program. These specific judgments, once made in quantifiable fashion, can be built into a global evaluation of the institution's overall media program. (PB)
EVALUATIVE CHECKLIST
AN INSTRUMENT FOR SELF-EVALUATING
AN
EDUCATIONAL MEDIA PROGRAM
IN
COLLEGES AND UNIVERSITIES

W. R. Fulton
University of Oklahoma

Single copy, $1.00. Discounts on quantity orders: 10 percent on 2-9 copies; 20 percent on 10 or more copies. All orders must be accompanied by purchase order or payment in advance. Address communications and make checks payable to the National Education Association, 1201 Sixteenth Street, N.W., Washington, D.C. 20036. Order by Stock Number: 071-02322.
INTRODUCTION TO CHECKLIST

The Evaluative Checklist which follows has been revised from an instrument developed by W. R. Fulton. The checklist has been through a try-out and validation phase. It is known that when properly applied to an institution, it will discriminate among the several levels of quality in educational media programs.

This Evaluative Checklist is based on the assumption that there are fundamental elements of an educational media program which will facilitate the improvement of instruction. The elements around which this checklist was developed were assumed to be common to most educational media programs. These include: 1) administrators and teachers are committed to the proper use of educational media for instructional purposes, 2) educational media are an integral part of curriculum and instruction, 3) an educational media center is accessible to the faculty, 4) the physical facilities are conducive to proper use of educational media, 5) the media program is adequately financed, and 6) the staff is adequate and qualified to provide for the educational needs of all faculty members.

The status of an educational media program is not likely to be known without periodic evaluation. The use of this Checklist should greatly facilitate such an evaluation by providing useful guidelines for making judgments on program elements.

The term "educational media" as used in this instrument means all equipment and materials traditionally called "audio-visual materials" and all of the newer media such as television, overhead projectuals, and programmed materials. Likewise, the terms "media" and "educational media" are used interchangeably to mean both instructional equipment and instructional materials.

Before completing the Checklist, the evaluator may want to become familiar with the inventory of educational media and pertinent physical facilities of the program being evaluated. He may also want to study the criteria relating to the elements covered in the Checklist.

The original instrument was a part of a study performed pursuant to a contract with the United States Office of Education, Department of Health, Education and Welfare, under the provisions of Title VII, Public Law 85-864 by W. R. Fulton, Professor of Education, University of Oklahoma.
EVALUATIVE CHECKLIST

DIRECTIONS:

Mark one of the spaces at the left of the statement that most nearly represents the situation in your institution. If a statement accurately describes your institution, mark one of the middle spaces of 2, 5, 8, or 11 to the left of that statement. If you feel that the situation at your institution is below what is described, mark one of the lower numbered spaces of 1, 4, 7, or 10, if above, mark one of the higher numbered spaces of 3, 6, 9, or 12. In any case mark only one of the twelve spaces.

Remember, each one of the subdivisions preceded by a capital letter requires only one mark in one of the boxes numbered 1 to 12. Mark only one box in each subdivision.

EXAMPLE:

There is no director of the media program.

There is a part-time director of the media program.

There is a full-time director in charge of the media program.

There are a full-time director and a sufficient number of clerical and technical personnel.
I. INSTITUTIONAL EDUCATIONAL MEDIA SERVICES

CRITERIA:

- An institution should have a program of media services administered through an educational media center, and sub-centers if such are needed, which provide the faculty with an adequate supply of appropriate instructional materials.

- The educational media center should be a separate service unit that operates at the same level as other major institutional services.

- An institution should have clearly defined policies, procedures, and plans for its educational media program including short-range and long-range goals.

- There should be a sufficient number of professional media staff members to administer the educational media program and to provide consultative services to an institution's entire faculty.

A. Commitment to the Media Program

- The institution's educational media program does not offer the services of a media center and no clerical or technical staff members are available to administer the educational media program.

- The institution's educational media program consists of media services from a media center managed by clerical and technical staff members. The services are not well coordinated and no one person has been given administrative responsibility for institution-wide media activities.

- The institution's educational media program consists of a media center with clerical and technical staff. The program is directed by a staff person who has some media training but not enough to qualify him as an educational media specialist. He reports to the institutional administrator directly responsible for instruction.

- The institution has an educational media program including a media center and necessary sub-centers directed by an educational media specialist who reports directly to the administrative officer in charge of instruction. He is provided with facilities, finances, and staff essential in meeting the media needs of the instructional program.
B. Commitment to Educational Media As An Integral Part of Instruction

1. The institution provides some educational media for teachers, and no trained personnel are available to assist in the utilization of the educational media that is provided.

4. The institution has some educational media and services for faculty members who request them, but the faculty is not particularly encouraged to use the services.

7. A variety of educational media and services are generally available and some attempts are made to acquaint faculty members with the services, and to encourage their use.

10. The institution provides quantity and variety of educational media and services needed by all instructional units and encourages the faculty to use media as integral parts of instruction.

C. Commitment to Providing Educational Media Facilities

1. The buildings in use at this time provide for only very limited use of educational media.

4. Although some new and remodeled facilities provide for the use of some types of educational media, the institution gives very little attention to media utilization at the time classroom buildings are planned.

7. The institution provides most new and remodeled classrooms with light control and other facilities necessary for the use of some types of educational media.

10. All new classrooms are equipped for the greatest possible use of educational media and are designed to permit adaptation for the use of new developments in media. Old classrooms are being modified as fast as possible to provide for effective use of media.

D. Commitment to Financing the Educational Media Program

1. Finances for the educational media program are not included in the budget.

4. The major source of income for the educational media program is that received for media services rendered to instructional departments and non-institutional users, and the budget is based on immediate needs only.

7. The educational media program is partially financed by regularly appropriated institutional funds and partially by income derived from services to non-institutional users. Long-range plans are occasionally considered when making the budget.

10. The educational media program is financed entirely from regularly appropriated institutional funds when media and services are used for instructional purposes. The budget reflects to some degree long-range educational media plans and includes provision for special media for unusual curriculum problems. The budget is prepared, presented, and defended by the director of the media services in the same manner as that of any other budget unit.
E. Commitment to Staffing the Educational Media Program

1. The responsibility for utilization of educational media services rests entirely with the individual teacher who desires such services.

2. The responsibility for educational media services is assigned to various institutional staff members whose primary commitments are in other institutional jobs.

3. The responsibility for educational media services is delegated to a person who has had some training in educational media. He is provided some clerical and technical assistance.

4. Leadership and consultative services are provided by an educational media specialist and a qualified professional staff, all of whom have faculty status. An adequate clerical and technical staff is also provided.

II. EDUCATIONAL MEDIA SERVICES - CURRICULUM AND INSTRUCTION

CRITERIA

- An institution should engage in a continuous evaluation of its educational media program as it relates to the instructional program.

- Continuous inservice education in the use of educational media should be carried on as a means of improving instruction.

- The faculty and the professional media staff should cooperate in planning and developing the parts of the instructional program that make provisions for the use of educational media.

- Professional educational media personnel should be readily available for consultation on all instructional problems where media are concerned.

A. Consultative Services in Educational Media Utilization

1. There are no educational media personnel available to provide for consultative services.

2. Educational media personnel render consultative assistance in the instructional application of educational media when they are asked to do so and are free from other duties.

3. Educational media personnel are usually available and are called on for consultative assistance in the use of educational media.

4. Educational media professional personnel work as a part of their regular assignments with faculty members in analyzing teaching needs and in designing, selecting, and using educational media to meet these needs.
B. Media Services to Educational Preparation Programs

3. No inservice education activities relating to the utilization of educational media are provided.

6. The educational media program provides some media services for teacher preparation programs, but the department or college of education depends on its own leadership for planning media experiences in preparation programs for prospective teachers and media specialists.

9. The educational media program provides some media services and leadership for the teacher preparation programs, and gives some assistance in providing preview opportunities for those wishing to examine instructional materials.

C. Faculty-Student Use of Educational Media

3. None of the teachers nor students make any use of educational media in their individual presentations.

6. Only a few faculty members make any use of educational media in their classrooms. Students rarely use media in class presentations.

9. Quite a few faculty members make occasional use of educational media in their classrooms. Students occasionally use media in class presentations.

12. Most faculty members use appropriate educational media for instructional purposes. Students also use appropriate media for individual and group study as well as for class presentations.

D. Involvement of Media Staff In Planning

3. There are no professional educational media staff available, therefore they cannot be involved in planning for the use of educational media.

6. The professional educational media staff is seldom involved with the faculty in planning for the use of educational media.

9. The professional educational media staff is occasionally involved with the faculty and staff in planning and producing materials for use in the instructional program.

12. The educational media specialist and his professional staff are usually involved with the faculty in planning for the use of and in experimenting with educational media in the instructional program. He is also regularly involved in decision making activities relating to the integration of educational media with the curriculum and instruction.
III. THE EDUCATIONAL MEDIA CENTER

CRITERIA

Education media centers should be organized around the concept of offering a wide variety of services and media to all instructional and administrative units of an institution, with leadership, consultative help, and other services provided by professional media specialists and other media center personnel.

The instructional program should be supported by an adequate supply of educational media and a system of making them accessible to the faculty and students.

The educational media center should provide such media services as procurement, maintenance, and production of appropriate educational media to support the instructional program.

A. Location and Accessibility of Educational Media

1 2 3 The institution does not have an educational media center and does not have access to such services and media as might be rendered from an educational media center.

4 5 6 The location of the main educational media center is such that media are not accessible to most faculty members, and the main center is not supplemented by sub-centers where media are placed on long-term loan.

7 8 9 The location of the main educational media center is such that media are not very accessible to the faculty, but the main center is supplemented by sub-centers which duplicate some of the services of the main center.

10 11 12 The location of the main educational media center and the presence of necessary sub-centers make media highly accessible to all instructional units. Both the main center and the sub-centers are fully equipped to support a quality instructional program.

B. Dissemination of Media Information

1 2 3 Information concerning educational media is never disseminated to prospective users as a matter of policy, but occasionally information concerning educational media might be secured upon request.

4 5 6 Information concerning educational media is seldom disseminated to prospective users, and there are no definite plans or channels for such dissemination.

7 8 9 Information concerning educational media is disseminated to the faculty and staff on an occasional basis or when requested.

10 11 12 Information concerning educational media is frequently disseminated to the faculty, students, and staff as a matter of policy.
C. Availability of Educational Media

Educational media is practically nonexistent and responsibility for obtaining such materials rest entirely with the user.

The quantity of educational media is so limited that significant delays occur between requests for materials and their availability. Reservations must be made on a "first come, first served" basis, and the media must be picked up by the user.

There is sufficient quantity of educational media to make it possible for them to be delivered on relatively short notice.

There is sufficient quantity of educational media to insure their delivery to the point of use at any time during the week in which they are requested.

D. Storage and Retrieval of Media

There are practically no media storage facilities and those that are available are most difficult to locate and retrieve.

Media storage facilities are available but are inadequate for some type of media, and personnel have difficulty in locating and retrieving specific items.

The main educational media center and all sub-centers have enough storage shelves and drawers for currently owned instructional materials. The retrieval system is adequate most of the time.

Adequate storage space, including space for future expansions, is provided in the main educational media center and in all sub-centers with proper humidity control where needed. The center has a master retrieval system for immediate location of media.

E. Maintenance of Media

The institution has no provision for cleaning and repairing educational media.

Educational media are cleaned and repaired when complaints regarding their operable condition are made by users.

Educational media are repaired and cleaned whenever the maintenance staff has the time to do so.

All educational media are inspected after each usage and are cleaned and repaired on a regular basis, or when inspection indicates the need.

F. Production of Media

Practically no facilities for production are made available to teachers in producing their own materials.

Limited production facilities are available for faculty members to produce their own materials.
The educational media personnel, as well as faculty members, produce some educational materials. The staff of the center is limited to the extent that all demands for productions cannot be met.

The educational media personnel produce a variety of educational media not otherwise available, and meet most production demands for such media as films, filmstrips, slides, graphics, and recordings.

IV. PHYSICAL FACILITIES FOR EDUCATION

CRITERIA

Each classroom should be designed for and provided with essential facilities for effective use of appropriate educational media of all kinds.

Each classroom should be equipped with full light control, electrical outlets, forced ventilation, and educational media storage space.

Classrooms should be equipped with permanently installed bulletin boards, chalkboards, projection screens, map rails, and storage facilities needed for the particular type of instruction conducted in each room.

A. Physical Facilities in Existing Classrooms

No classrooms have been modified for use of educational media and no systematic plans have been made to adopt such classrooms for use of media.

A few classrooms have been modified for use of educational media. However, no systematic plans have been made to adapt all classrooms for the use of educational media, except that some departments have made such plans for their own classrooms.

Some classrooms have been modified and equipped with such physical facilities as light control and electrical outlets and others are partially equipped. A plan for systematically equipping all classrooms is in operation.

All classrooms have been modified and equipped for optimum use of all types of educational media.

B. Physical Facilities in New Classrooms

Most classrooms are not provided with physical facilities that make possible the use of educational media.

Some new classrooms are provided with physical facilities such as light control and electrical outlets, but only in special cases are provisions made for the use of a wide variety of media.

Most new classrooms are provided with physical facilities that make possible optimum use of educational media.
All new classrooms are designed for and equipped with physical facilities that make possible optimum use of all types of educational media by faculty and students.

V. BUDGET AND FINANCE OF THE EDUCATIONAL MEDIA PROGRAM

CRITERION

Financing the educational media program should be based on both the institution's long-range goals and immediate educational needs. The budget should reflect a recognition of long-range goals, and be sufficient to support an adequate media program for optimum instructional improvement.

A. Reporting Financial Needs

1 2 3 The financial needs of the educational media program are almost never reflected in the budget and are never reported to the administrative officer.

4 5 6 The financial needs of the educational media program are reported to the chief administrative officer in charge of instruction only when immediate expenditures are urgently needed.

7 8 9 The financial needs of the educational media program are regularly reported to the chief administrative officer in charge of instruction.

10 11 12 Regular reports reflecting the status and needs of the educational media program, including facts about inventory, facilities, level of utilization and effectiveness of the media program, are made to the chief administrative officer in charge of instruction.

B. Basis for Budget Allocations

1 2 3 The budget does not usually contain an allotment for educational media.

4 5 6 The educational media budget is based on an arbitrary allotment of funds irrespective of need.

7 8 9 The budget is based almost entirely on immediate needs, though some consideration is given to long-range goals.

10 11 12 The budget is based on both the immediate needs and the long-range goals of the institution and reflects clear-cut policies concerning allocations, income sources, and budget practices.

C. Development of Media Budget

1 2 3 There is no provision for the development of a separate educational media budget.

4 5 6 Each instructional department develops its own educational media budget without consulting an educational media specialist.
The budget of the educational media program reflects the media needs of most instructional units. However, some departments have their own media budgets which have no relationship to the educational media program.

The budget of the educational media program reflects the media needs of the entire institution and is developed by the professional media staff in consultation with departmental administrators.

VI. EDUCATIONAL MEDIA STAFF

CRITERION

The educational media program should be directed by a well qualified full-time media specialist who is provided with sufficient professional, clerical and technical staff to provide adequate media services to all institutional programs.

1 2 3 No person has been assigned to look after the media program. Utilization of educational media is entirely the responsibility of the user.

4 5 6 An institutional staff person has been assigned to look after the educational media program. He performs more as a clerk, and a technician than as a professional media person.

7 8 9 A professional media person with some special media training, or equivalent experiences is in charge of the educational media program and has some professional assistance. He and his assistants are primarily oriented toward the mechanical and technical aspects of the program.

10 11 12 The educational media program is directed by a well qualified educational media specialist who is provided with sufficient professional, clerical and technical staff to provide adequate educational media services. He and his professional staff are instruction and curriculum oriented.
PROFILE SHEET

To develop a Profile image of your program, transfer your mark from each item of the Evaluative Checklist to this sheet. Connect the marked squares by straight lines. Then turn the sheet to a horizontal position. This will pictorially demonstrate the "peaks" and "valleys" of attainment for your program.
