This content analysis schedule for the Calexico Intercultural Design of Calexico, California, presents information on the history, funding, and scope of the project in its second year. Included are sociolinguistic process variables such as the native and dominant languages of students and their interaction. Information is provided on staff selection and the linguistic background of project teachers. An assessment is made of the duration and extent of the bilingual component, and the methods of second language teaching in general. Included is an analysis of materials, student grouping, tutoring, curriculum patterns, and cognitive development. The report also discusses self-esteem, learning strategies, the bilingual and community components, and means of evaluation. Inserts include a list of detailed objectives for teacher schedules. This analysis has been verified. (SK)

11.4 Instructional component - function in a society where predominant lang is not his native lang.
MISSION STATEMENT

Bilingual education is instruction in two languages and the use of these two languages as media of instruction for any or all parts of the curriculum.

The Calexico Intercultural Design, hereafter referred to as CID, is a bilingual education program designed to meet the specific educational needs of pupils in Grades 7-9 who have little or no English-speaking ability and who come from environments where the dominant language is other than English. It is also designed to involve pupils in the same grade levels on a voluntary basis who are already partly bilingual but whose main competency is English.

The primary objectives for the students in this target group is to develop those skills and competencies in English and Spanish which will enable each individual to function in a society whose predominant language is other than his native language.

Social Studies will be the vehicle utilized to instill an acculturation pattern in the target group of students, with such areas as the basic study skills, History of the United States, World Geography, and the California State requirements. These will be taught bilingually.

The Language Arts will include sequential instruction in speaking, reading, and writing English and Spanish.

Sub-Objective:

In order to achieve the above, the CID will be able, via an educational and financial audit, to submit evidence that:
1. Measureable learning gain in a target staff population indicative that behavioral change has taken place during the course of staff training as measured by agreed upon pre and post-test behavioral performance objectives;

2. The performance requirements of all logistical considerations relating to the project have been met;

3. The financial PPB model of cost analysis and accounting has been successfully employed in this program;

4. All performance contracts with internal staff as well as those sub-contracts for the provision of outside technical assistance have been fulfilled as measured by specific work statement criteria;

5. A wide variety of community resource personnel have been actively involved in the planning, implementation, and audit phases of the project as evidenced by response indicators specified by the design requirements;

6. A dissemination network has been set up, maintained, and monitored as to its effectiveness via response gest questionaires sent to receivers;

7. LAP (Learning Achievement Packages) instructional materials have been designed and tested according to criteria agreed upon during staff training sessions and as specified during the educational audit.

A series of charts have been developed to simplify this year's evaluation. A great amount of pertinent data is not available due to the time constraints imposed by the evaluator. This data will be collated and disseminated in the final report and the report of the audit team.
The Calexico Bilingual Program is funded by Title VII of the Elementary and Secondary Education Act for the 1969-70 school year. The Calexico Intercultural Design, hereafter referred to as CID, was named after the Spanish Epic poem.

"Make it unique," "make it different," "make it innovative"—unique, different, innovative—are words educators hear from all corners. These are the watchwords of current curriculum development and those of us who have undertaken such development have found ourselves responding to these words as mandates. The times seem to be so enamored with the "new" that it becomes virtually an imperative for the present.

The Calexico Bilingual Project is basically a program to enhance the chances of success in school for the bilingual student. The goals and objectives are spelled out in detail in the introduction and "mission statement" of the official project proposal. Excerpts from the proposal will serve to best describe the new program for bilingual students in Calexico.

The activities within the project are designed primarily to improve the educational opportunities and performance of students in grades seven through nine who speak little or no English. Their "native language" will be used as the medium of instruction while at the same time introduce them to instruction in the English language. There will also be a group of students involved whose main competency is in the English language. This group will be learning and developing proficiency in the speaking, reading and writing of Spanish. These students are taught as single class under the tutelage of bilingual teachers. A total of 180 students are participating in the project.

There are two classes at each grade level beginning at grade seven and continuing through grade nine. Thirty students are enrolled in each class. The project criteria specifies that approximately two-thirds of the students speak Spanish as the predominant language, and that a third speak English as the predominant language.

Eighty-seven percent of the students in the Calexico Unified School District come from homes where Spanish is the dominant language. Because of the proximity of Calexico to Mexico, many of the children in Calexico schools retain ties to the country from which their parents came. One of the purposes of the project is to bring to the student the cultural and language skills of the society in which he is now a member, while at the same time giving him a knowledge of his dominant culture.

Social studies will be the vehicle utilized to instill an acculturation pattern in the target group of students in such subject areas as the basic study skills, History of the United States, World Geography, and the California Requirements. These will be taught bilingually. Language arts will include sequential instruction in speaking, reading and writing Spanish.

Six bilingual teachers are on the teaching staff and bilingual aides are provided to assist these teachers. Because of the lack of "ready made" materials for instruction, the project teachers spend a half day, following morning instruction, in the development of social studies and language arts materials suitable for the bilingual classes. Entirely new materials have to be developed wherein existing materials are not available. On occasions, the teachers translate English materials to Spanish and Spanish materials to English.

An intensive in-service training program for the teachers is included in the project. The Calexico Unified School District is very fortunate in that the United States Office of Education and the California State Department of Education have realized the problems facing Calexico. Most of our students are bilingual and we feel that the use of their native language as a tool of instruction will speed the learning process. Our ultimate goal is to graduate students from our high school who understand two cultures and are truly bilingual.

The project is to be expanded each year for five years until all grade levels, kindergarten through grade twelve, are included and most subject areas of the curriculum taught in Spanish and English.
In keeping with the spirit with the proposal submitted to the United States Office of Education in May, 1969, the Calexico Unified School District is submitting the following modified proposal for refunding. In the original proposal, bilingual-bicultural education was to be expanded vertically in grades and horizontally in curriculum through a period of five years until grades K-12 in most curriculum areas were taught with the bilingual-bicultural approach. During this second phase of implementation, it was proposed that curriculum be expanded in a modified fashion and that the project be expanded upward into the tenth grade to follow those students in the target population who are now ninth graders. It will be expanded downward into grades four, five, and six to begin to prepare the target population for progress in bilingual education at the higher grade levels. The curriculum addition at the tenth grade level will be bilingual biology. In addition, the target population at the tenth grade level will continue to study English Language Arts, Spanish Language Arts, and Social Studies taught within a bilingual matrix. To the ninth grade curriculum, the CID will add Algebra I to be taught within the bilingual matrix. It is necessary to add biology and algebra to the existing curriculum of Social Studies and Language Arts in order to accomplish one of the most important unstated objectives of bilingual education. That objective is to assure, within the constraints of time and skill, that youngsters from the target population will be able to meet the requirements of the Calexico Unified School District and the State of California for graduation. In order for a student to receive a high school diploma, he must include in his high school program world history and geography, United States history, American government, first aid, drug and narcotic education, driver education, biology, and English.
The second phase of the program development proposes to continue the Estudiantina which was developed in mid-year during the first year's operation and to extend this upward into the tenth grade as the target population progress through completion so that those students who have been introduced to it will be able to continue in the second year.

The second phase of the CID junior high school curriculum will continue in the same manner as the first year's program envisioned. The Social Studies framework will continue to be refined and applied as the vehicle of bilingual instruction in the seventh and eighth grades with the continuation of instruction in English and Spanish Language skills.

The teaching-learning situation in the fourth, fifth, and sixth grades differs significantly from that of the seventh through tenth grades; hence, modification and alterations are required. In the Calexico Unified School District, the concept of the self-contained classroom is an integral part of the elementary school philosophy. The CID accepts the validity of the self-contained philosophy and wishes to encourage the development of the bilingual-bicultural attitudes within the framework of the self-contained classroom. Therefore, the curriculum design contained within this second phase of development involves all such areas normally taught in the curriculum of these grades. The CID proposes to continue the development of LAP's, materials, and curriculum for bilingual-bicultural instruction in the subject areas of English Language Arts, Spanish Language Arts, and Social Studies for grades four through six. The remaining part of the curriculum for these grades will be taught in the language which seems most appropriate to the students and the subject at the time. It will remain the objective of CID to teach the recent immigrants from Mexico and the Mexican-American students whose language development in English
makes learning in a curriculum taught in English difficult. In order to meet the requirements of the long-range CID objectives and in order to maintain the advantages of self-contained classrooms, the second phase of CID proposes to utilize team-teaching in an ungraded situation at grades four, five, and six. This will allow for the flexibility of scheduling and staff utilization necessary to implement the CID and to provide for some release time for curriculum construction and materials development.

The second phase of CID will continue the refinement of curriculum materials already begun, the construction of learning achievement packages with the pre and post-test concept of assessment in the Social Studies from grades four through ten, and the instruction of English and Spanish Language Arts skills in grades four through ten.
4.0 MODIFICATION OF LONG-RANGE PLANS

In the first year proposal for Project CID, it was envisioned that vertical articulation would be initiated to the high school as well as down to the elementary levels. This would develop a K-12 curriculum by 1974. Current thinking amongst curriculum project directors in bilingual education indicates a trend towards starting such instruction as early as possible and continuing such efforts over the five year funding period. This does not appear to be inconsistent with the design of Project CID except that the Calexico effort, because it started in the junior high level, must articulate development in two directions. Some modification of the long-range plans will be forthcoming this year in the choice of other academic vehicles of instruction. Further modification will be suggested as a result of this year's program. (See Figure 1 and 1a.)

The Calexico Unified School District CID Bilingual Project for the 1970-71 school year will expand vertically to include grades four through ten. There will be two bilingual sections of approximately 30-35 students in each grade level. One-third will be monolingual English, one-third will be monolingual Spanish, and one-third will be bilingual, for a total of 420-490 students.

The elementary program, grades four through six, will be located at the Rockwood Elementary School in which all subjects will be taught bilingually in a team-teaching non-grade situation. Eight teachers, and four teacher-assistants will make up two teaching teams at the elementary level. Each team will have six members and have approximately 90-105 students. The coordinating teacher will be responsible to coordinate all activities for the elementary bilingual program.
The intermediate program, grades 7-8, will be located at the De Anza Junior High School in which Social Studies, English, and Spanish will be taught bilingually. The staff will consist of four teachers and three teacher-assistants. The coordinating teacher will be responsible to coordinate the bilingual program for the De Anza Junior High School and the Calexico High School.

The secondary program, grades 9-10, will be located at the Calexico High School in which algebra, Social Studies, English, Spanish, and biology will be taught bilingually. The staff will consist of four teachers and two teacher-assistants.
11.4 The current project will be linked to a future Bilingual Program at the indicated grade level: (indicate specific grade)

12.0 **METHODS OF SECOND LANGUAGE TEACHING**

(i.e.: all that apply; some projects may use a combination of methods)

1. **Audio-lingual habit skills or behavioral approach.** Emphasis on communication. Includes contrastive analysis of sounds (units) in both languages by teacher and students, student repetition of tapes and/or fluent teachers' model sentence patterns until responses are automatic. Structural drills and dialogues are systematically presented. Includes direct association between object and word in second language in a sequence of patterns learned in complete sentences. Inductive-generalizations drawn from examples.

2. **Transformational-cognitive approach.** Acquiring an understanding of the structural patterns or grammatical rules of a language.
2a-inductive - generative approach: through listening to communication, perhaps of peers, and attempting the new language in situations which call for the student to generate sentences - test his understanding. (the way native language is acquired) Includes direct association between object, picture or action and word in second language.

2b-deductive - the cognitive code approach: through initial formal study and analysis of grammatical structures, then applying them through examples, i.e. answering questions, or transforming affirmative sentences to negative, declarative to interrogative, active to passive.

ENGLISH LANGUAGE ARTS

5.3 MONOLINGUAL SPANISH (7-10)

PERFORMANCE OBJECTIVES

5.3.1. From baseline positions of mean pupils performance in Grades 7, 8, 9, and 10 established during the weeks of Sept. 27- Oct. 1 on the Nelson Reading Test and the Calexico oral-aural English Test administered to all monolingual Spanish speaking pupils in the target population, such pupils will demonstrate a statistically significant increase in test scores on the same tests administered during the week of May 10-14, 1971. Statistical significance will be determined by t-test from frequency distributions of raw scores.

PROCEDURES

5.3.1.1 Using a curriculum based upon objectives such as the following:

100% of the students word-recognition ability will have shown improvement as measured by teacher-made pre and post tests.

75% of the students will show a year's growth in reading comprehension as measured by the Nelson standardized reading test.

75% of the students will demonstrate an increased in reading as manifested in each student checking out at least one paperback from the classroom library on their own accord.

Teachers will develop curriculum based on similar objectives in order to achieve the performance requirement.
INSTRUCTIONAL COMPONENT

5.4 SPANISH LANGUAGE ARTS - BILINGUAL AND MONOLINGUAL ENGLISH (7-10)

PERFORMANCE OBJECTIVES

5.4.1 From baseline positions of mean pupil performance in Grades 7, 8, 9, and 10 established during the weeks of September 27-October 1, 1970 on the MLA, Form MA, to all target pupils will demonstrate a statistically significant increase in test scores on Form MB of the same test administered during the week of May 20-25, 1971. Statistical significance will be determined by t-test from the frequency distributions of raw scores.

PROCEDURES

5.4.1.1 Using objectives such as those listed below, the teachers will instruct all students in the target population in the Spanish Language Arts.

75% of all students with 100% accuracy will be able to identify, recite, use, and write:

(a) present and past participles
(b) shortening of adjectives
(c) object pronouns (lo, la, los, las)
(d) personal pronouns
(e) most commonly used affirmative and negative commands.
(f) comparative and superlative forms of adjectives
(g) the use of the infinitive with object pronouns after prepositions.

As measured by teacher-made oral test, written test, and teacher observation.

90% of all students will be able to write with ease a dictation exercise in Spanish based on previously studied materials from the Spanish textbook as measured by the teacher.

80% of all students will be able to read a magazine or newspaper article in Spanish and be able to state in Spanish a brief summary of the article both orally and written as measured by the teacher.

75% of all students will be able to write a 1,000 word essay in Spanish on a topic of their choice as measured by the teacher.

Teachers will develop a curriculum based on similar objectives in order to achieve the performance requirements.
INSTRUCTIONAL COMPONENT

5.5 SPANISH LANGUAGE ARTS MONOLINGUAL SPANISH (7-10)

PERFORMANCE OBJECTIVES

5.5.1 From baseline positions of mean pupil performance in Grades 7, 8, 9 and 10 established during the weeks of Sept. 27-Oct. 1, 1970 on the MLA from MA to all target pupils will demonstrate a statistically significant increase in test scores on Form MB of the same test administered during the week of May 20-25, 1971. Statistical significance will be determined by t-test from the frequency distributions of raw scores.

PROCEDURES

5.5.1.1 Using objectives such as those listed below the teachers will instruct all students in the target population in the Spanish Language Arts.

Conjugate in "present" and "past" tense the 10 most common verbs (including the verb "to be") with 90% accuracy as measured by a teacher-made test.

Spell correctly in Spanish a minimum of 15 of 20 vocabulary words selected at random given orally to be written in Spanish.

Translate an English written paragraph into Spanish with 90% accuracy in structure as measured by performance.

Given a list of twenty verbs derived from Ser and Estar, 90% of the students will correctly mark with "S" or "E" 90% of these verbs to indicate the infinitive form from which it was derived.

Teachers will develop curriculum based on similar objectives in order to achieve the performance requirement.

"Social Studies will be the vehicle utilized to instill an acculturation pattern in the target group of students, with such areas as the basic study skills, History of the United States, World Geography and the California State requirements being taught bilingually."

**PERFORMANCE OBJECTIVE:**

2.4.9.1 Project personnel who are assigned to teach Social Studies, under the direction of the resource consultant, will continue to develop and refine the Social Studies outline begun during the initial proposal development. They will construct a LAP to the specifications of the resource consultant. They will teach the LAP and evaluate the performance with the resource consultant. They will participate in the development of scheduling procedures for the target population as evidenced by continual review of daily and weekly activities and a changing of scheduling when this is required by the imperatives of the teaching-learning situation.

They will cooperate with teachers in the Spanish Language Arts and English Language Arts in programming learning experiences for the target population as evidenced by incorporating language experiences into the Social Studies curriculum.

Project personnel who are assigned to teach Spanish Language Arts and English Language Arts will cooperate with Social Studies teachers by including in the Spanish and English Language Arts classes appropriate materials and exercises.

All Project personnel will study the acculturation process under the direction of the resource consultant and will increase their knowledge of this process as evidenced by their ability to write more precise and

All pupils who were finally selected were volunteers from the list of nominations provided through the method described above. Instruction in English and Spanish Language Arts and bilingual instruction in Social Studies in grades 7, 8, and 9 was begun on September 10, 1969 with a full complement of 180 students. The original concept of 1/3 monolingual English, 1/3 monolingual Spanish, and 1/3 bilingual was not obtained in the ninth grade program. Due to the previous Title III Bilingual Program which was strictly for monolingual Spanish-speaking children, an attitude prevailed among high school students and teachers to think of the bilingual program as synonymous with lower status.

Generally speaking, the bilingual program was looked upon by high school students and teachers as an ESL program for monolingual Spanish-speaking students. Bilingual and monolingual English-speaking students did not enroll in the bilingual program because they were afraid that the monolingual Spanish-speaking students would slow them down and that they would lose out in the subject content and would not be adequately prepared to compete with college-bound students.

Our ninth grade pupils are faced with greater difficulties in school in the areas of performance, self-esteem, and social acceptance than the seventh and eighth grade students. It became necessary to incorporate some activity that would reinforce their cultural values and promote their self-esteem. The CID staff instituted an Estudiantina to help bridge the cultural and language gap.

The Estudiantina is a student choral and musical group whose focus of attention is participation and expression of learning through the medium of music. Students would learn about Mexican and American culture and history through music. In addition, they would be learning English through music. This required students to think carefully and respond emotionally rather than react in a purely intellectual abstract fashion.

2.2.1 The general objective of the first year's program for PROJECT CID was expressed in the MISSION STATEMENT as follows:

MISSION STATEMENT

Bilingual education is instruction in two languages and the use of these two languages as media of instruction for any or all parts of the curriculum.

The Calexico Intercultural Design, hereafter referred to as CID, is a bilingual education program designed to meet the specific educational needs of pupils in Grades 7-9 who have little or no English-speaking ability and who come from environments where the dominant language is other than English. It is also designed to involve pupils in the same grade levels on a voluntary basis who are already partly bilingual but whose main competency is English.

The primary objectives for the students in this target group is to develop those skills and competencies in English and Spanish which will enable each individual to function in a society whose predominant language is other than his native language.

Social Studies will be the vehicle utilized to instill an acculturation pattern in the target group of students, with such areas as the basic study skills, History of the United States, World Geography, and the California State requirements. These will be taught bilingually.

The Language Arts will include sequential instruction in speaking, reading, and writing English and Spanish.

10.0 PARENTAL/COMMUNITY INVOLVEMENT COMPONENT

PERFORMANCE OBJECTIVES

10.1 The Parents

10.1.1 Each parent of the students participating in the bilingual program will be able to define the concept of bilingual education and explain its purpose to an interested party.

10.1.2 Each parent will reflect a positive attitude toward bilingual education and the participation of their children as evidenced by positive answers on a questionnaire.

10.1.3 Each parent will provide assistance in improving and up-grading the instructional component by providing written or verbal feedback to specific questions directed to them at various points in the program.

10.2 The Community

10.2.1 Elements of the community concerned with the goals and objectives of bilingual education will be informed on a regular basis of the specific progress and achievements of the project in terms of student performance and accomplishment. They will provide evaluative feedback regarding their opinions of the appropriateness and effectiveness of the information device and of the program itself.

METHOD

10.1 Group parent orientation.

10.2 Group parent orientation and individual discussions with project staff plus public dissemination media.

EVALUATION

10.1 Sample: Individual responses elicit from members of the group during orientation.

10.2 Brief questionnaire distributed at end of orientation and follow-up home visits by project personnel when negative response to questionnaire is indicated.

10.1 Formal questionnaires and/or personal interviews.

10.2 Objective review of responses by project personnel and report to project director on results and recommendations.

See the communication sub-system, page 194.

Periodic requests for comments in the form of brief objective questionnaires mailed to addressees. The questionnaire will be designed to acquire feedback regarding the adequacy of the dissemination device and of the CID Project.
