This reference handbook is designed to provide vocational counselors with background information on a wide range of occupations related to medicine. Nearly 60 careers are described with educational requirements, salaries, schools where training may be obtained, and sources of additional information. An address list of associations and a health careers filmography with sources are included. A 28-page section describes scholarships and loans available to potential health workers. Lists of Montana hospital administrators and directors of nursing, and of suggested resource persons by city are included. (MS)
STUDENT - COUNSELOR HEALTH CAREERS GUIDEBOOK

Prepared and Distributed by

Mountain States Regional Medical Program
Montana Division
P. O. Box 2829
Great Falls, Montana 59403

Western Interstate Commission for Higher Education

September 1971
To you the Counselor:

Because you play such a vital part in career guidance of high school students, we, who are interested in helping to fill the demand for new personnel in health careers, provide you with this guidebook to assist you as you talk to students about choosing their life work.

In the 1970's health care will be the largest industry in the nation. These are difficult times and there are many areas of concern for youth who wish to make major contributions to human society. There are few careers which compare to a health career in offering youth the opportunity for involvement, the challenge of social betterment, and the continuous diverse opportunity to make a distinctive change in the lives of so many people.

The critical shortage of health manpower coupled with the rapid advances in medicine and health have led to the creation of many new health careers. It is estimated by the American Medical Association that over one million new health workers will be needed in the next four years. The need is great and opportunities abound for young men and women.

By now you have probably been a participant in one of the area seminars on Health Career Recruitment which are being conducted by twenty-five key counselors who attended an orientation session in May of 1971 and accepted the commitment of carrying the message of career opportunities in health to their neighboring counselors throughout Montana. These sessions were developed by a planning committee composed of representatives of the Office of the Superintendent of Public Instruction, the President of the Montana Guidance and Personnel Association, and various health professionals. As a result of these seminars, this manual was compiled.

We hope this reference handbook on Health Careers will assist you in directing youth to meaningful and rewarding careers in health.

Please feel free to write our office at any time you have questions.

Sidney C. Pratt, M.D., Director
WICHE - Mountain States Regional Medical Program - MONTANA
Montana Medical Education and Research Foundation

Mrs. Esther Lantz, R.N., Educational Specialist-Nursing
INTRODUCTION

Health care is the second largest industry in the United States and, in all probability, will become the largest in the 1970's.

This guidebook was designed as an initial, single source reference for both the counselor and the student in seeking information in health careers. While the health care field affords employment opportunities in more than 200 different areas, we have, by necessity and design, limited the descriptive discussions to broad, well recognized health careers.

Many of the areas discussed have employment opportunities for "supportive" or "assistant" personnel (for example: inhalation therapy assistant, physical therapy assistant, medical record assistant, etc.). These positions afford the student a career opportunity with less formal education; frequently on-the-job training is the prerequisite.

We urge you to become familiar with all sections of this guidebook and the resources it provides — career descriptions, scholarships, community resource people, audio-visual, professional associations, etc. Use is limited only by your professional imagination.

We hope, by utilizing the loose leaf format, to periodically update content of this publication. Your comments for future inclusions or improvements will be welcome.
ACKNOWLEDGMENTS

Mountain States Regional Medical Program wishes to thank the health professionals who gave so generously of their time and expertise at the "Counselors Seminar on Health Manpower Recruitment", the beginning of this health careers program -- Mrs. Mary Cordingley, Mr. Robert Schuster, Mr. Robert Yurko, Dr. A. J. Terrill, Mr. Dirk VanLeer, Mrs. Dorothea Davis, Mr. Kenneth Tintinger, Mr. Francis Wright, Sister Anne Bouffard, Mrs. Helen Cory, Mrs. Ethel Nelson, Dr. F. J. Allaire, Miss Joan Cleveland, Mrs. Deborah Line of the Virginia Health Careers who allowed us to utilize parts of their reference manual; the planning committee, Mr. James Fitzpatrick, Mr. Dell Gustin, Mrs. Barbara Crebo, and Dr. Michael Basham; the many professional health organizations who provided career literature; and finally, the secretaries who assisted in the preparation, compilation, and typing of this booklet. We are most grateful and appreciative.

AUDIOLIGIST AND SPEECH PATHOLOGIST

DESCRIPTION: Specialists in speech and hearing have the common goal of helping speech-handicapped children and adults to talk in as nearly normal fashion as possible. The audiologist concentrates on hearing and may specialize in testing, on work with deaf children or adults, hearing rehabilitation or hearing conversation. The speech pathologist diagnosis and treats speech difficulties and his clients may range from small children to adults.

CHIROPRACTOR

DESCRIPTION: Chiropractors treat their patients primarily by manual manipulation of parts of the body, especially the spinal column. Because of the emphasis of the importance of the spine and its position, most chiropractors use X-ray extensively to aid in locating the source of the patient's difficulty. Many use such measures as water, light, and heat therapy, and prescribe diet, exercise, and rest. Some state laws restrict the type of supplementary treatment permitted in chiropractic. Chiropractic as a system for healing does not include the use of drugs or surgery.

EDUCATION: Most states require completion of 4-years chiropractic course following high school graduation. Courses in manipulation and spinal adjustments, chiropractic physiotherapy and nutrition. Other subjects, such as, anatomy, physiology and biochemistry. Most states regulate the practice of chiropractors who meet certain educational requirements and pass a State Board examination.

SALARIES: STARTING $8,000 AVERAGE $12,000 TOP $18,000

International Chiropractors Association 741 Brady Street Davenport, Iowa 52805
COMPUTER PROGRAMMER

DESCRIPTION: The computer programmer analyzes the information to be fed into the computer, determining the sequence and the terminology which must be used to convey very precise meanings. On the basis of this analysis, he then translates the data into computer terminology and prepares it for input by punchcard, paper tape, or for large jobs, the much faster working magnetic tape. In some cases, the medical engineer or physician or scientist directing a project acquires programming skills and serves as his own programmer, or as the supervisor of a programming staff.

DENTAL HYGIENIST

DESCRIPTION: Dental hygienist, working under the supervision of dentists, clean teeth by removing stains and deposits, polish teeth, massage gums, and chart conditions of decay and disease for diagnosis by the dentist. They may provide patient dental education by demonstrating the techniques of mouth care and proper diet.

EDUCATION: SCHOOL STUDY TIME
1. High School College prep. with 4 years
   emphasis on Math, English, & Science
2. College May lead to either 2-4 years
   associate or bachelor's degree de-
   pending upon school

SCHOOLS: Sheridan College
Sheridan, Wyoming 82801

BASIC EXPENSES: Tuition and fees vary between schools of dental hygiene. Tuition, textbooks, instruments; $700-$1,000 per year. Living Expenses; $500-$1,000 per year.

OPPORTUNITIES: Approximately 10,000 dental hygienists are in practice in the United States; almost all are women. The majority are employed in private dental offices; about one-fourth work for public health agencies or school systems; a few work in industrial plants, clinics, hospitals, and dental hygiene schools, and as civilian employees of the Armed Forces. The current shortage of qualified dental hygienists will continue during the next decade. The American Dental Hygienists' Association reports twice as many job openings as qualified applicants.

SALARIES: Salaries vary according to job location; city salaries are higher.

*Some dental schools will admit students with three years of undergraduate college preparation. Students wishing to enter a dental speciality field should plan on 2-3 years of postgraduate study.

OPPORTUNITIES: According to the latest figures, about 95,000 dentists were at work in the United States. Nine out of every ten were in private practice. Of the remainder, nearly 6,000 served as commissioned officers in the Armed Forces; about 1,200 had other types of Federal Government positions, and about 15,000 held full-time positions in schools, hospitals, or state and local health agencies. Only about 4% are recognized as specialists. The demand for dental services is increasing faster than the supply of new dentists. The growth in population, the growing awareness of the importance of regular dental care, the development of new payment arrangements, and expanded dental research require more trained personnel.

The electrocardiograph and the electroencephalograph technicians are vital members of the modern health team, operating highly specialized medical equipment. The electrocardiograph (EKG) technician operates the electrocardiograph, a complex piece of medical technology which records the electrical potential of the patient's heart muscles. The EKG specialist works in a hospital lab or at a patient's bedside depending on the individual's condition. Here, the EKG technician places electrodes on the patient's arms, chest, and legs thereby obtaining a reading of the heart's action. Following the test, the results are interpreted by a qualified physician or heart specialist (cardiologists). Important information concerning heart disease and heart attacks have been gained through the use of this important machine. The electroencephalograph technician (EEG) also operates a piece of highly complex specialized machinery. The electroencephalograph records brain waves which may be used in diagnosing a psychois, testing an epileptic child, metabolic diseases, or tumors. The EEG specialist must be skilled in preparing the patient for his test, and capable of keeping the machinery in good working order. While all tests are trained to recognize abnormal wave patterns which may be a clue to serious maladjustment requiring immediate attention.

EXECUTIVE HOUSEKEEPER and HOUSEKEEPING AIDE

EXECUTIVE HOUSEKEEPER

DESCRIPTION: The executive housekeeper is responsible for the maintenance of high standards of cleanliness in the hospital. Unless corridors, floors, bathrooms, and wards are kept spotless, germs and bacteria may spread and infect the patients. The executive housekeeper directs the campaign against the spread of disease by supervising all housekeeping personnel, establishing work methods and procedures, and training personnel. The executive housekeeper must work with other members of the health team and coordinate her activities in order to provide the most effective and efficient methods of housekeeping.

HEALTH EDUCATOR

DESCRIPTION: The aim of health education is to provide experiences which favorably influence habits, attitudes, and knowledge relating to individual and community health. This involves translating research findings into useful, easily understood information available to all people. A health educator is a specialist who provides learning opportunities and experiences for the public. He also helps each health worker to do his job better by using sound educational methods tailored to the job to be done. A public health educator employed by a health department helps to solve public health problems by organizing and working with local community groups and stimulating action on specific health problems. His duties with a voluntary health agency include educating the community about a specific health problem such as cancer, tuberculosis, or heart disease. A school health educator teaches classes such as personal and community health, marriage and family life, safety, and first aid.

A master's degree is usually required for public health and administrative positions.

Any accredited college can provide a four-year background. Graduate training is more specialized.

Graduate training in schools of public health:

University of North Carolina, Chapel Hill, N.C.
University of Michigan, Ann Arbor, Michigan
University of Minnesota, Minneapolis, Minnesota
University of California, Berkeley & Los Angeles, Calif.
Harvard University, Boston, Massachusetts
Yale University, New Haven, Connecticut
Columbia University, New York, New York
University of Puerto Rico, San Juan, Puerto Rico
University of Hawaii, Honolulu, Hawaii
BASIC EXPENSES: College tuition, fees and living expenses vary between schools. The college selected by the student will be able to provide information on expenses.

OPPORTUNITIES: As a health educator, you may be employed in a local or state health department; the U.S. Public Health Service; international health programs; voluntary health agencies on a local, state or national level; schools or universities; hospitals; clinics; life insurance companies or industry. Vacancies are known to exist regularly. This is a growing field with an increasing need for persons with the necessary specialized education and training.

HOSPITAL ADMINISTRATOR AND RELATED MANAGERIAL POSITIONS

DESCRIPTION: The hospital administrator acts to assure that the hospital operates efficiently as a unit; sees that ample facilities, equipment, and services are available; helps coordinate the development and maintenance of training programs for hospital personnel; and sees that the hospital contributes to preventive medicine and improving community health as well as to caring for the ill. He must see that established high professional standards are maintained. The hospital board of directors is their representative within the hospital and the community.

EDUCATION: SCHOOL TIME
1. High School 4 years
2. College 4 years
3. School of Hospital Administration 1 year
4. Residency 1 year

Currently, 330 colleges and universities offer graduate programs in this field, 32 of them in the U.S. and Canada. Some of the programs involve one year of academic study followed by 12 months in administrative residency. Others have a two-year academic period which may include clinical experience. Prerequisite undergraduate training, leading to a bachelor's degree, should stress the liberal arts and include studies in economics, business management, statistics, personnel administration, and the biological sciences.

BASIC EXPENSES: Tuition and fees vary between schools.

OPPORTUNITIES: About two-thirds of all hospital administrators work in nonprofit or private hospitals; the remainder are employed in federal, state, or local government hospitals. Opportunities are available in related fields such as hospital associations, public health, hospital planning programs, and consulting. Growth and expansion are constant. More and more new hospitals are being built and trained administrators will be needed to manage them or to work in staff positions.

SALARIES: STARTING AVERAGE TOP
$10,000-$12,000 $16,000 $25,000 Experienced

OTHER HOSPITAL MANAGERIAL OCCUPATIONS

Working behind the scenes are a great number of dedicated individuals trained in making the hospital a successful business operation. This does not mean operating the hospital in order to make a profit, but providing the hospital with the most capable personnel, the best available facilities, and the most efficient methods of financing the entire hospital enterprise. Four such careers include the business director, purchasing agent, personnel director, and public relations director.

BUSINESS DIRECTOR - This job may vary slightly from institution to institution, but the business manager or director is in charge of the general financial policy of the hospital. Working with accountants, clerks, and credit managers. The business manager approves all expenditures and keeps accurate financial records for each individual hospital program. A bachelor's degree and several years of accounting work at an accredited hospital are the minimum educational requirements.

PERSONNEL OFFICER - The personnel director is concerned with finding the right man for the right job. Along with his personal staff, the personnel officer formulates and supervises the program of selection, training, promotion and welfare of hospital employees. The personnel officer must have a detailed and comprehensive knowledge of the hospital and its inner workings. Educational requirements include a bachelor's degree with a major in personnel administration and at least one year work experience under a qualified administrator.

PURCHASING AGENT - The purchasing agent buys the supplies, equipment, and services needed by the hospital. Good business judgment, the ability to deal with people, and a general knowledge of economics and bookkeeping are essential qualifications for the purchasing agent. The position requires at least a high school education and five years experience in purchasing. Many large hospitals also require a bachelor's degree in business administration.

PUBLIC RELATIONS DIRECTOR - The public relations director seeks to publicize the hospital's objectives and accomplishments. He makes the community aware of special programs, innovations in medicine being used, and newly appointed members of the medical staff. The public relations director uses various media including television, radio, local newspapers, hospital bulletins, and other publications. Hospitals prefer men and women with a background in journalism, public relations, or advertising to handle this rapidly growing career.

HOSPITAL PERSONNEL OCCUPATIONS NOT REQUIRING A COLLEGE EDUCATION

These health careers do not require a college education, but they are essential to keep the hospital running smoothly.

ORDERLY - The orderly assist both the physician and professional nurse by performing various routine duties as assigned by other members of the health team. He assists in the lifting of patients and the transportation of both patient and medical equipment within the hospital. The orderly is often called upon to render special services for male patients. Educational requirements vary with the institution, but most hospitals require simple on-the-job training with additional classroom training and demonstration by professional nurses and doctors.

NURSES AIDE - The nurses' aide helps care for the patient. She performs various functions such as helping with meals, adjusting the patient's bed, and answering his phone calls of which add to the patient's comfort. In many hospitals, the nurses' aide takes temperatures, blood pressure, and sterilizes equipment. Training and education is similar to that of an orderly.

RECEPTIONIST - The hospital receptionist directs patients and visitors to various locations within the hospital. She must have a thorough knowledge of the hospital and a pleasant and warm personality.

STOCKROOM WORKERS - Stockroom workers are members of the purchasing staff. Their responsibility includes storing efficiently all hospital supplies so they may be obtained at a moment's notice. The stockroom manager and his staff must keep accurate records of all goods in order to prevent shortages of necessary supplies. A high school education with an emphasis on business and commercial courses is recommended.

LAUNDRY WORKER - The laundry worker is responsible for properly arranging and preparing garments for wear. She may use an electric iron or a large steam press. Six months experience is desirable. New workers can be trained on the job.

MAINTENANCE WORKERS - Maintenance workers perform the various repairs and installations necessary in any hospital. Daily maintenance of the boiler, electrical system, and water system, as well as general carpentry work require a full time staff. Training is gained either on the job, or for more specialized tasks, at a recognized trade school.

HOSPITAL CENTRAL SERVICE TECHNICIAN

DESCRIPTION: The central service technician (who also may be called a central supply worker, hospital aide, or materials handler) performs a variety of duties related to the health and safety of both patients and medical staff. One of his primary responsibilities is the cleaning and sterilizing of instruments, equipment, and supplies according to prescribed procedures and techniques. He collects or receives the used materials from the nursing units, emergency units, outpatient departments, operating rooms, delivery rooms, nurseries, and laboratories, and reprocesses them for reuse. The central service technician is also responsible for assembling and processing sterile and nonsterile treatment and procedure trays or packs, including intravenous infusion sets, blood transfusion sets, several kinds of surgical trays, surgical dressing sets, and obstetrical packs.

OPERATING ROOM TECHNICIAN

DESCRIPTION: A new member of the surgical team, the operating room technician plays a vital supporting role in the operating room. Working under direct and continuing medical supervision, the operating room technician assists in treating patients in the hospital operating and emergency rooms and performs tasks associated with maintaining maximum aseptic conditions. The operating room technician may assist in either minor or major surgery, depending upon training and ability. Duties may include helping to set up the operating room with the surgical instruments and supplies required for each operation; handing physicians instruments during surgery; and assisting with postoperative dressing.

INHALATION THERAPIST

DESCRIPTION: Inhalation therapy is a specialty whose aim is to see that the human body is receiving an adequate supply of oxygen, and at the same time is eliminating its carbon dioxide. It is the aim of inhalation therapy to restore the heart and lung system to normal. For example, cardiac failure, bronchitis, asthma, pulmonary edema, emphysema, cerebral thrombosis, drowning, hemorrhage, and shock are some of the disorders treated by inhalation therapy.

EDUCATION:  

<table>

Riverside, California 92501
DESCRIPTION: The medical engineer's interest is on health services to the individual and on related research. Working with physicians and scientists, he is utilizing engineering ideas, skills, and techniques to improve medical care, including diagnosis, surgery, and rehabilitation. Still in pioneering stages, medical engineering is already helping to strengthen the analysis and treatment of many diseases and disorders; among them are allergies, arthritis, blindness, cancer, heart disease, and associated circulatory disorders, infectious diseases, mental health, and speech and hearing difficulties. The major tasks are:

1. The development of new kinds of instruments for use in medical and surgical care or in research.
2. The invention and perfecting of devices to repair or compensate for parts of the human body that don't function properly or that have suffered damage as a result of illness or accident.
3. The adaptation of computer technology to serve a wide range of specialized requirements in the health services and in health research.
4. The application of engineering's progressively more precise methods and concepts for use in biophysical research in studies; for example, of the structure of the living organism and the mechanisms through which the human body maintains itself in good running order.

MEDICAL ILLUSTRATOR (ARTIST)

DESCRIPTION: The medical illustrator forms the link between the men who do medical research and those who study and apply that information. It is the medical illustrator who takes the latest advances in scientific and medical research and translates those ideas into clearly understandable photographs and drawings. The actual work of the medical illustrator will depend greatly on his individual training and interests, but most medical illustrators are capable of handling a variety of artistic and communication skills including photography, drawings, sketches, and even television. Other medical illustrators are trained in making plastic or synthetic representations of various human organs for classroom demonstration. Medical illustrators work with various members of the health team as well as with authors and educators (illustrating text books) and with research scientists and physicians. The medical illustrator may also be employed in a hospital setting or university where his talents may be used to record visually the latest progress in medicine and aid the student and doctor in his continual study of the human body.

MEDICAL TECHNOLOGIST

DESCRIPTION: The medical technologist, MT, (ASCP), works under the supervision of a pathologist or qualified physician and performs bacteriologic, chemical, microscopic, and other clinical laboratory tests to determine the presence or extent of such diseases as diabetes, polio, syphilis, tuberculosis, and many others. Technologists who work in smaller laboratories often engage in many types of tests. Those employed in large hospitals, research or diagnostic laboratories, usually specialize in several kinds of related tests of a single type. The letters after each category of registration designate the specialty of each technologist or laboratory assistant after successful completion of studies and the required national certifying exam.

EDUCATION: SCHOOL STUDY TIME
1. High School College prep. 4 years
2. College 3 years
3. School of Medical Technology 12-18 months

      710 South Wolcott Avenue
      Chicago, Illinois 60612
CLINICAL LABORATORY TECHNICIAN

DESCRIPTION: Generally, clinical laboratory technicians do not require college training. They assist the medical technologist by performing simple, routine tests and related work that can be learned in a relatively short time. They prepare and stain slides for study, apply sensitivity discs to culture plates and record results; and prepare specimens for microscopic studies. Like technologists and assistants, they may function as generalists in several areas of the laboratory or may specialize in one or more fields.

EDUCATION: The educational requirements for a clinical laboratory technician vary. Some receive on-the-job training while others are required to have one or more years of college. Most programs in junior colleges usually last about two years. The students spend the first nine months in a liberal arts curriculum and the next year they take courses in clinical laboratory procedures. Certification examinations administered by the Board of Medical Technologists of the American Society of Clinical Pathologists (ASCP), are available to graduates of AMA approved schools.

OPPORTUNITIES: Demand for well-trained microbiologists now greatly exceeds supply. With the continued expansion of our nation's industry, the increased demand for and availability of medical care, the expansion of teaching and research facilities, and an increasing interest in world health, there is every indication that there will be a continuing shortage of microbiologists at all levels of training for many years.

ADDITIONAL INFORMATION: Write: The American Society of Microbiology 1913 "I" Street Northwest Washington, D.C. 20006
HOSPITAL LIBRARIAN

DESCRIPTION: The hospital librarian provides hospital patients with pleasure reading materials. If the library collection is large, the librarian may be responsible for reviewing, selecting, and cataloging all library materials.

EDUCATION: Depending on the institution—public, private or government—requirements will vary. Small hospitals may employ a librarian with on-the-job training; in contrast, larger institutions may require a graduate degree for employment (see medical librarian—medical library assistant).

ADDITIONAL INFORMATION: Write: Medical Library Association 919 North Michigan Avenue, Suite 1601 Chicago, Illinois 60611
MEDICAL ASSISTANT

DESCRIPTION: The medical assistant is the doctor's "right hand". She performs many clerical and technical duties which allow the physician to concentrate more fully on his medical responsibility to the patient. The medical assistant helps prepare patients for examination, sterilizes instruments, takes temperatures, measures heights, and performs simple and routine laboratory tests. In her administrative and clerical capacity, the medical assistant may also serve as a receptionist, bookkeeper, and general secretary to the physician. The medical assistant is the vital link between the public and their doctor.

MEDICAL SECRETARY

DESCRIPTION: The duties of the medical secretary and those of the medical assistant often overlap; frequently qualified young women assume the responsibilities of both. The medical secretary performs services similar to a secretary in any large business organization, such as answering the phone, making appointments, and answering routine mail. Experienced medical secretaries often act as the physician's business manager, sending out bills, keeping the books and ordering supplies. In the hospital setting, the medical secretary takes technical medical dictation and transcribes from notes or mechanical dictating equipment.

EDUCATION: Educational requirements are similar to that of the medical assistant though the secretary should place more emphasis on the clerical skills during her education.

MALE NURSE

DESCRIPTION: The male nurse provides the same services which occupy the female nurse's valuable time. Both the male and female nurse are responsible for rendering bedside care, administering medicine, checking for signs of disorder, and a multitude of other tasks and procedures which are more fully detailed under "Professional Nurse." The male nurse plays a unique role within the hospital, a role based on his distinctive male qualities. The first attribute of the male nurse is his "staying power." The male nurse is often a family man, and his position in the hospital represents a permanent place of employment. To most men, nursing is a full time profession and a life-time career. Another attribute of the male nurse is strength. The male nurse not only brings a greater physical strength to his profession which may be necessary in lifting and transporting patients, but an important psychological "strength." Surveys have shown that many patients respond better to a male figure than a female - while some patients may prefer to be "mothered," others respond better to a "father image." The most significant contribution the male nurse has made is in the supervisory and teaching capacity. More and more qualified male nurses assume roles as anesthetists, administrators, directors, deans, instructors and professors. In the exciting field of nursing the ever important need for capable, responsible, leadership abilities is making the male nurse a vital member of America's health team.

EDUCATION: Educational requirements for the male nurse are identical to those of women.

OPPORTUNITIES: There are NO areas of nursing which do not actively encourage men to enter. The nursing profession desperately seeks more men in the operating room, at the bedside, on faculties in public health agencies, in industry, government - everywhere that female nurses are employed.

LICENSED PRACTICAL NURSE (LPN)

DESCRIPTION: Licensed practical nurses assist in the care and treatment of the physically and mentally ill, under the direction of physicians or professional nurses. As members of a nursing team they perform many of the less complex tasks such as bathing and feeding patients, taking temperatures, administering medicine, thus freeing professional nurses for more skilled and specialized duties. They may also assist physicians or professional nurses with complicated diagnostic procedures or treatments.

EDUCATION: SCHOOL STUDY TIME
1. High School Math and Chemistry 4 years
2. School of Practical Nursing 1 calendar year

SCHOOLS: See approved nursing schools list on page 62.

OPPORTUNITIES: The majority of licensed practical nurses work in hospitals, clinics, homes for the aged, and in nursing homes or other institutions. A sizable number are employed in private homes, some on a part-time basis. Most of the remainder work in doctors' offices, schools and public health agencies. There is a shortage of practical nurses now and it is believed that the need will increase.

SALARIES: STARTING AVERAGE TOP
$4,500 $5,500 $6,000

ADDITIONAL INFORMATION: Write: National Federation of Licensed Practical Nurses
250 West 57th Street
New York, New York 10019
Committee on Careers
National League for Nursing
10 Columbus Circle
New York, New York 10019
ADDITIONAL INFORMATION: The profession of nursing is only one hundred years old, but already it ranks as one of the most publicized and important of health careers. It is also a career that has one of the widest ranges of educational levels, and offers the broadest scope of employment opportunities.

To obtain a license for practical nursing an applicant must graduate from a State-approved school of practical nursing and pass an examination in every state and District of Columbia. In addition, most states require that applicants be U.S. citizens or have applied for naturalization.

Practical nurse training, which generally lasts one year, may be obtained in schools operated by public school systems, usually as part of a vocational school or adult education program, or universities. In recent years, an increasing number of high schools have included practical nursing courses in their regular curriculums. Approval of schools of practical nursing is given by State boards of nursing. In addition, standards of operation are established by State boards of vocational education for schools under their control.

Practical nurse training includes classroom study of basic nursing skills and related subjects, such as body structure and functions, conditions of illness, nutrition, and types of medicine and medications, as well as supervised clinical practice in applying this training to actual nursing situations.

Post graduate education and in-service training programs are provided in some hospitals. Such programs usually prepare licensed practical nurses to give nursing care in specialized areas such as psychiatric nursing and operating room technique.

Licensed practical nurses are expected to have excellent employment opportunities throughout the remainder of the 1970's. Although the number of practical nurses completing training has risen steadily in recent years to approximately 25,000, the supply of licensed nurses has not kept pace with the demand generated by the establishment of new positions and the need to replace practical nurses who retire, die, or leave the nursing field for other reasons.

*For Nurse's Aide, see "Hospital Personnel Occupations Not Requiring A College Education" on page 30.
REGISTERED NURSE (R.N.)

DESCRIPTION: Registered professional nurses provide nursing services to patients, either by giving direct care or through supervising allied nursing personnel. They administer medications and treatments prescribed by physicians; observe and record symptoms and progress of patients; instruct auxiliary personnel; and perform other duties concerned with the care of the sick and injured, prevention of illness, and promotion of good health.

Each school of nursing will have state approval so that its graduates are eligible for the state licensing exam to become registered nurses. Accreditation by the National League for Nursing means the program meets standards considerably above the minimum required for state approval. A college or university offering a nursing program should also be approved by its appropriate regional accrediting association for higher education. After graduation from any of these programs, the graduate is eligible to write the state board of nursing examinations which she must successfully pass to be licensed to practice professional nursing in a particular state. If licensed in one state, she may receive a license by endorsement to practice nursing in another state. After having received a license to practice nursing, the graduate is prepared for first level positions in nursing.

SCHOOLS: See attached list.

EXPENSES: Cost varies with type of program. Cost ranges from $1,000 - $3,000.
OPPORTUNITIES: There are many job opportunities for men and women as nurses. Nurses (general duty, head nurses, supervisors and directors) are employed in hospitals, nursing homes, public health departments, doctors' offices, industries, schools, schools of nursing and as private duty nurses. In addition, the armed services have many opportunities for nurses and they are given officer's rating at the very beginning.

DESCRIPTION: Occupational therapy is treatment of a patient by a registered occupational therapist through individual or group participation in restorative activity. The therapy may be needed because the patient has been disabled by an accident or disease; is physically or mentally ill; or handicapped by a birth defect or the infirmities of age. The objective of occupational therapy is to make the patient as independent and well-adjusted as possible, through improving or restoring emotional, physical or vocational capacities and promoting and sustaining social and psychological function.

OPTOMETRIST

DESCRIPTION: Optometry is the art and science of vision care. The doctor of optometry (O.D.) is dedicated to preserving the nation's vision. He is skilled in the principles of optics, chemistry, pathology, neurology, physics and countless other scientific disciplines. In the optometrist's quest for the conservation and improvement of vision, he begins by making a series of tests in order to determine the efficiency of your eyes. The test completed, the optometrist analyzes the results and, if necessary, prescribes and fits the proper eye glasses or corrective lenses. The optometrist, however, is not limited to the detection of disease and the prescribing of corrective lenses. Many optometrists are going into specialization such as children's vision, contact lenses, aid to the partially sighted, and visual training.

SCHOOLS:

- University of Montana
  Missoula, Montana 59801
- Montana State University
  Bozeman, Montana 59715

OPPORTUNITIES: The majority of physical therapists work in hospitals. Approximately one-fourth of all physical therapists are employed by rehabilitation or treatment centers, schools or societies for crippled children, and public health agencies. Some therapists work in physician's offices or clinics, teach in schools of physical therapy, or perform research. The demand for qualified physical therapists is likely to continue. In recent years, schools of physical therapy have been filled to capacity.

SALARIES:

- STARTING: $6,000
- AVERAGE: $8,500
- TOP: $12,000 for administrative positions and consultants

ADDITIONAL INFORMATION: Write: American Physical Therapy Association
1790 Broadway
New York, New York 10019
Professional education for physical therapists in the United States may be obtained in 41 schools of physical therapy (including the Army Medical Service School) which have been approved by the American Medical Association and the American Physical Therapy Association. The majority of approved schools are part of large universities; the others are operated by hospitals, which usually have university affiliations.

About half of the approved schools offer 4-year programs in physical therapy leading to a bachelor's degree. Some approved schools provide 1 to 2 year undergraduate programs to students who have completed required courses in the biological, physical, and social sciences and through which students may earn either a degree or a certificate in physical therapy. Other schools accept those who already have a bachelor's degree, including the required courses, and give a 12 to 24 month course leading to the certificate. Many schools offer both degree and certificate programs.

The curriculum of approved schools includes anatomy, physiology, pathology, clinical medicine, and psychology, as well as courses in electrotherapy, heat therapy, hydrotherapy, massage, and exercise. In addition to classroom instruction, students are assigned to a hospital or treatment center for supervised clinical experience in the care of patients.

Several universities offer the master's degree in physical therapy. A graduate degree, combined with clinical experience, increases the opportunities for advancement to positions of responsibility in teaching, research, and administration, as well as in the treatment area of physical therapy.

Since an important part of a therapist's job is to help patients and their families understand the treatments and prepare them emotionally for changes that occur, therapists must have patience, resourcefulness, and a sympathetic attitude toward people. Their work also requires good verbal expression, and the ability to plan their work and to schedule treatments so as to insure maximum use of time. In addition, physical therapists should have manual dexterity and physical stamina. For those wishing to determine whether they have the personal qualities needed for this occupation, summer or part-time work as a volunteer in the physical therapy department of a hospital or clinic may prove helpful.
PHYSICIAN

DESCRIPTION: If you are considering medicine as a career choice, you must explore the possibilities objectively. It is easy to glamorize medicine because of the deep sense of job prestige and excellent standard of living which many physicians enjoy. These "status" elements are, however, by-products of the practice of medicine. They are earned through hard work, advanced education, and long, and often unpredictable, hours of medical practice.

Because the physician's work centers around the lives and well-being of his patients, he must bear heavy responsibilities. His time often is not his own. He must be prepared to meet his patient's needs at all times. His medical education never ends, for he must continue to expand his knowledge by keeping abreast of the latest scientific and other developments in medicine so that he can provide his patients with the best possible care.

Physicians diagnose disease, and treat sick people medically and surgically. In addition, they often provide emotional support for their patients. They are concerned with the prevention of disease and with the rehabilitation of people who are injured or ill. One out of three physicians engaged in private practice are general practitioners — frequently referred to as "family physicians". The others are specialists in one of the thirty-two fields recognized by the medical profession.

Pre-medical study must include a strong background in English, physics, biology, math, and chemistry. Students are also encouraged by many schools of medicine to acquire a broad general education by taking courses in humanities and social sciences.

EDUCATION: (Pre-medical)
University of Montana
Missoula, Montana 59801
Montana State University
Bozeman, Montana 59715
Carroll College
Helena, Montana 59601

OPPORTUNITIES: The latest figures indicated about 250,000 physicians were professionally active in the United States. The majority - over 175,000 - were engaged in private practice. About 34,000 were interns or residents in hospitals, and another 10,000 held regular positions on hospital staffs. More than 20,000 physicians were serving as commissioned officers in the Armed Forces or were employed in Federal Government agencies. The remainder were employed in private industry, state and local health departments, medical schools, research foundations, and professional organizations. The rapid population growth and the new frontiers being developed and explored in all areas of science as man moves into the "space" age, have created a need for more and more physicians. The future offers unlimited possibilities. More than 50,000 physicians will be needed by 1975.

SALARIES: INTERNS RESIDENTS PHYSICIANS
$6-8,000 $7,200-12,000 $28,000 average

ADDITIONAL INFORMATION: Write: Department of Undergraduate Medical Education and Council on Medical Education and Hospitals American Medical Association 535 North Dearborn Street Chicago, Illinois 60610 Montana Medical Association L.R. Hegland, Executive Secretary Box 1692 Billings, Montana 59103
The major medical specialties are:

ANESTHESIOLOGY - Administration of various forms of anesthetic drugs necessary during surgical operations or diagnosis.

COLON AND RECTAL SURGERY - Diagnosis and treatment of disorders or diseases of the lower digestive tract.

DERMATOLOGY - Diagnosis and treatment of diseases of the skin.

FAMILY PRACTICE - Evaluation of a patient's or family's total health care needs and provision of personal medical care in one or more fields of medicine and coordination of other health services needed by patients.

INTERNAL MEDICINE - Diagnosis and surgical treatment of diseases of the internal organs such as the heart, liver and lungs.

NEUROLOGICAL SURGERY - Diagnosis and surgical treatment of the brain, the spinal cord and nerve disorders.

OBSTETRICS AND GYNECOLOGY - Diagnosis and treatment of diseases of the female reproductive organs and also the care of women during and immediately following pregnancy.

OPHTHALMOLOGY - Diagnosis and treatment, including surgery, of diseases or defects of the eye.

PATHOLOGY - Study and interpretation of changes in organs, tissues, and cells as well as alterations in body chemistry.

PEDIATRICS - Prevention, diagnosis, and treatment of children's diseases.

PHYSICAL MEDICINE AND REHABILITATION - Diagnosis of disease or injury in the various systems and areas of the body and treatment by means of physical procedures as well as treatment and restoration of the convalescent and physically handicapped patient.

PLASTIC SURGERY - Deals with corrective or reparative surgery to restore deformed or mutilated parts of the body or improve facial or body features.

PREVENTIVE MEDICINE = Prevention of disease and promotion of health through epidemiological studies and public health measures.
PSYCHIATRY AND NEUROLOGY — Diagnosis and treatment of emotional disturbances, mental disorders, and organic diseases affecting the nervous system.

RADIOLOGY — Diagnosis and treatment of disease through the use of radiant energy, including X-rays, radium and cobalt 60.

THORACIC SURGERY — Diagnosis and operative treatment of diseases of the chest — those involving the heart, lungs or large blood vessels within the chest.

UROLOGY — Diagnosis and treatment of diseases and disorders of the kidneys, bladder, ureters and urethra, and the male reproductive organs.

GENERAL SURGERY — Diagnosis and operative treatment without limitation to specific organic systems.

ORTHOPEDIC SURGERY — Diagnosis and surgery of bones and joints.

EAR, NOSE, AND THROAT — Medical and surgical treatment of the ears, nose, and throat.

PUBLIC HEALTH — Prevention and control of communicable and environmental diseases.
PODIATRIST

DESCRIPTION: Podiatrists diagnose and treat diseases and deformities of the feet. The problems they deal with range from a simple corn to foot difficulties requiring foot surgery, special shoes or foot appliances. They prescribe drugs, use physical therapy, and to help in diagnosis they take X-rays of the feet and utilize laboratory and diagnostic tests. Podiatrists must be alert to a patient's general health so they refer some cases to other medical specialists for further treatment. Since probably 3 out of 4 people have foot troubles, a very real gap in health service is being filled by the qualified podiatrist.

**DESCRIPTION:**
The sanitarian is interested in solving many environmental health problems, usually those of a biological or chemical nature. He inspects restaurants, grocery stores, dairy plants, sewage systems, schools, industrial plants, ships, swimming pools, planes and trains, to name but a few. His purpose is to see that our daily environment is as clean as possible; this includes the food we eat, the houses we live in and the places we work or play.

VETERINARIAN

DESCRIPTION: Veterinarians keep animals free from disease by vaccinating them and teaching their owners how to feed and care for them properly. He gives medical or surgical care to sick or injured animals. And, finally, he works to protect and promote human health. His observations, research and treatments have been applied in bettering mankind's health in the fields of surgery, internal medicine, cancer, tuberculosis and chronic diseases. He plays an important part in protecting human beings from the various diseases that can spread from animals to man.

CAREERS IN SCIENTIFIC RESEARCH AND TEACHING
RELATED TO MEDICINE

The biological sciences are concerned with the world of living things — men and microbes, wild and domestic animals, plants and insects, birds and fish. Some scientists in this field conduct research to expand our knowledge about living organisms; others teach in colleges and universities. Still others apply biological knowledge to the solution of practical problems, such as the development of new drugs and vaccines or new strains of plants.

A list of the work of some biological scientists follows:

- Microbiologists
- Zoologists
- Agronomists
- Anatomists
- Biochemists
- Biophysicists
- Embryologists
- Entomologists
- Geneticists
- Horticulturists
- Husbandry specialists
- Nutritionists
- Pathologists
- Pharmacologists
- Physiologists
- Phytopathologists

Kenneth R. Tintinger, President-Elect
Montana Personnel and Guidance Association

SCHOLARSHIP AND LOAN INFORMATION

Since there is a drastic shortage of people pursuing health careers, many organizations offer financial assistance to health career students. The following scholarships are available to students who are pursuing health careers. Many have no limitation on area of study. It is advisable to check the entire list!

GENERAL SCHOLARSHIP INFORMATION

For 33 years, THE ELKS FOUNDATION SCHOLARSHIP AWARDS have made it possible for many students to continue their college courses. In 1969, $181,000 in scholarships was awarded to 150 students ranging from $800 to $2,500. Any student in the graduating class of a high or college preparatory school or in any undergraduate class (except senior) of an accredited college, who is a citizen of the U.S.A. and resident within the jurisdiction of the Benevolent & Protective Order of Elks, may file an application. Scholarship, citizenship, personality, leadership, perseverance, resourcefulness, patriotism, general worthiness, and financial need are the criteria by which applicants will be judged. Application blanks should be obtained from an officer of the local Elk Lodge or the Secretary of the State Elks Association and must be filed on or before February 15th with the Secretary of Lodge Foundation Chairman of the B.P.O. Elks Lodge in the city in which the applicant is resident.

KNIGHTS OF COLUMBUS "Pro Deo and Pro Patria Scholarship Trust" for undergraduate scholarships, The Knights of Columbus has an established trust fund which will provide annually $1,000 scholarships to members, to sons, and daughters, brothers and sisters of living or deceased members. The fund will also annually provide two $1,000 scholarships to Columbian Squires.

Awards will be made on the basis of academic excellence regardless of need, and may be renewed annually subject to satisfactory academic performance.

Selection will be made after a review of applicants' secondary school record, class rank, recommendation of principal or headmaster and the results of the College Entrance Examination Board tests.

All scholarship applicants must have applied for or to have been admitted as freshmen at the Catholic University of America.

When writing for an application form to the Secretary, Committee Fellowship and Scholarship, the Catholic University of America, Washington, D.C. 20017, membership in a Knights of Columbus council must be verified to show the parent, brother or applicant is a member or, if deceased, was a member in good standing at the time of death. Final filing date of applications is February 1 with award announcements to be made in May.
GENERAL MOTORS CORPORATION has a scholarship program that offers 300 four-year college scholarships each year. Applicants must be high school seniors and U.S. citizens. Candidates apply directly to the colleges at which General Motors Scholarships are available. College scholarship committees in more than 200 participating institutions select the awardees. Stipends range from $200 to $2,000 a year depending on demonstrated need. There is no limitation on course of study or career. Both young women and young men are eligible. Descriptive materials are available in the secondary schools early in the school year. For further information write to the General Motors Scholarship Program, 8-163 GM Bldg., Detroit, Michigan 48202.

MILITARY HEALTH CAREER programs in Dietetics, Physical Therapy, and Occupational Therapy enable qualified students to complete their professional education under Army sponsorship. Foods and nutrition or Institution Management majors may participate as junior and/or senior students in the Army Student Dietitian Program. A similar program is available to students in Occupational Therapy. In both programs, students earn over $250 monthly. The Army conducts approved dietetic internships, occupational therapy clinical affiliations and a certificate course in physical therapy for selected college graduates. Detailed information is available from The Surgeon General, Department of the Army, ATTN. MEDPT - RS, Washington, D.C. 20315.

THE HEALTH PROFESSIONS SCHOLARSHIP PROGRAM - Under this program Federally supported scholarship awards are available at participating schools of medicine, dentistry, osteopathy, optometry, pharmacy, podiatry, and veterinary medicine for students of exceptional financial need to pursue a full-time course of study. The amount of an individual scholarship depends upon the student's need as determined by the school; however, scholarship application forms may be obtained from the participating school selected by the student. General information and list of participating schools are available from the Bureau of Health Professions Education and Manpower Training National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014.

THE ACTIVITIES OF THE ROTARY FOUNDATION

The program of the Rotary Foundation has been expanded significantly in recent years. Today the four major educational activities of the Foundation are known as;

Rotary Foundation Awards for International Understanding:

Graduate Fellowships
Undergraduate Scholarships
Technical Training
Group Study Exchange
One Rotary Foundation award — Graduate Fellowship, Undergraduate Scholarship or Technical Training — is offered to every district every year. In the past each district was eligible to submit a candidate for a Graduate Fellowship every other year and in alternate years a candidate for either an Undergraduate Scholarship or a Technical Training award. Beginning with the 1968-69 Rotary year, however, every district has the choice of submitting a candidate every year for any of these three awards — whichever one it prefers.

Graduate Fellowships are awarded to highly qualified young men and women for a year of graduate study in a country other than their own. Graduate Fellows must be unmarried, age 20 through 28, and have a bachelor's degree or the equivalent. The award covers all travel, living and educational expenses for one academic year.

Undergraduate Scholarships are the newest of the Foundation's activities. They are similar to the Graduate Fellowships in most respects, the major difference being that they are awarded to highly qualified young men and women for a year of undergraduate study abroad. Undergraduate Scholars must be unmarried, age 18 through 24, and have completed two years or more of university level work, but not have attained a bachelor's degree or the equivalent.

Technical Training awards are made to young technicians and artisans for up to a year of study abroad in a wide variety of technical fields. Awards are made to men only, either married or single, age 21 through 35 inclusive. There are no educational requirements except those established by the institution of training. The award covers all travel, living and training expenses for up to one year.

Group Study Exchange is an activity which provides travel grants to a team of six outstanding young men, age 25 through 35, who are engaged in a business or profession. During a two-month visit to a district outside their home country, together they visit communities, homes, schools, businesses, government offices and other institutions, talking, to learn through person-to-person contacts as much as possible about that country. Rotarians of the receiving, or host, district arrange the team's itinerary and provide meals, lodging, and transportation. The Rotary Foundation pays round-trip transportation between the two districts involved for the team and a Rotarian who accompanies it as the district governor's representative.

AID ASSOCIATION FOR LUTHERANS, AAL ALL-COLLEGE SCHOLARSHIP PROGRAM
Each year 100 scholarships are awarded to high school graduates ranging from $200 to $1,750 per year, depending on the financial need of the individual. Scholarships are renewable for three additional years, subject to continuing AAL membership and satisfactory academic progress. For further information write to Scholarships, Aid Association for Lutherans, Appleton, Wisconsin 54911. Secure application forms prior
to registration deadline date for required November or December SAT early in high school senior year.

THE NATIONAL ACHIEVEMENT SCHOLARSHIP PROGRAM for outstanding Negro students awards more than 300 scholarships annually. Candidates request consideration on the basis of scores on the National Merit Scholarship Qualifying Tests. Taken as second semester juniors or first semester seniors. Other qualifications are the same as for the National Merit Scholarship Program in which all Achievement candidates simultaneously participate. In 1969 the Achievement program will offer 250 National Achievement scholarships. The former carry a one-time stipend of $1,000 paid upon enrollment in an accredited U.S. college or university. Stipends of the latter are individually determined and are related to the student's financial need to attend the college of his choice within limits which may vary with sponsorship but generally fall in the range of $250 to $1,500 per year. Four-year Achievement progress toward a Bachelor's Degree in an accredited U.S. college or university. The program is administered by the National Merit Scholarship Corporation, 990 Grove Street, Evanston, Illinois 60201.

THE NATIONAL EASTER SEAL SOCIETY FOR CRIPPLED CHILDREN AND ADULTS has available the following scholarships for specialized training for work with the physically handicapped: (1) Speech Pathology and Audiology - Graduate Level - co-sponsored with Alpha Chi Omega National Women's Fraternity; (2) Physical Therapy and Occupational Therapy - Senior Year, Clinical Affiliation or Certificate Program - co-sponsored with Kappa Delta Phi Sorority; (3) Specialized Training in Minimal Brain Dysfunction - Scholarships are available through colleges and universities receiving training grants for summer programs in the identification and training of children with minimal brain damage - co-sponsored with Alpha Gamma Delta International Women's Fraternity. Additional information may be secured from the Scholarship Coordinator, National Easter Seal Society for Crippled Children and Adults, 2023 West Ogden Avenue, Chicago, Illinois 60612.

THE PROCTOR & GAMBLE FUND provides aid-to-education programs which exceed $1,300,000 a year. The fund provides for (1) 188 scholarships; two-thirds for study in liberal arts colleges and one-third for the study of science or engineering in technical and engineering schools. These scholarships provide to the participating schools for a four-year period an amount equal to full tuition, plus annual allowance for fees, books, and supplies up to a maximum of $2,400 per year. In addition, an unrestricted annual grant of $600 to the institution accompanies each scholarship. The schools select the recipients and allot funds to the participating students on the basis of financial need. (a) 37 new four-year scholarships, open to both men and women, are awarded each year at 37 selected colleges and universities; (b) 10 new four-year scholarships are awarded annually among 15 exclusively women's colleges. (2) Approximately 30 grants to chemistry, chemical engineering and mechanical engineering departments in support of graduate training; (3) unrestricted annual grants through 39 State and Regional Associations to some 500

96
colleges throughout America. (4) Unrestricted annual grants through the United Negro Fund to help support 33 accredited Negro colleges and universities. (5) Unrestricted annual grants to 14 leading universities. (6) Unrestricted annual grants to five leading graduate schools of education. (7) Unrestricted annual grants to six leading medical schools. (8) Contributions to graduate research, special projects and educational funds.

Detailed information should be secured from your high school counselor; however, if not available, write to the Procter & Gamble Scholarship Program, P.O. Box 599, Cincinnati, Ohio 45201. Applications should be made to the Director of Admissions of the school selected prior to mid December.

THE REHABILITATION SERVICES ADMINISTRATION provides teaching grants and traineeship grants to educational institutions, as well as grants to support training activities in state rehabilitation programs and in facilities for the mentally retarded. Individual traineeships are awarded by participating universities to selected graduate students interested in rehabilitation careers. Included are careers in physical medicine and rehabilitation, dentistry, physical therapy, occupational therapy, speech pathology and audiology, rehabilitation nursing, rehabilitation social work, prosthetics and rehabilitation psychology, rehabilitation counseling, recreation for the ill and handicapped, work evaluation and rehabilitation workshop administration, and other specialized fields such as rehabilitation of the blind, deaf, and mentally retarded. For a list of universities which award RSA traineeships, write to the Division of Training, Rehabilitation Service, Department of Health, Education, and Welfare, Washington, D.C. 20201.

TRAINING IN THE HEALTH, MEDICAL AND RELATED BIOLOGICAL SCIENCES - Training includes pre-doctoral and post-doctoral research fellowships, special research fellowships, and undergraduate and graduate training grants. Training is also available for medical graduates who have completed their internships. For information about these training opportunities write to the Career Development Review Branch, Division of Research Grants, National Institutes of Health, U.S. Public Health Service, Bethesda, Maryland 20014.

A VOCATIONAL REHABILITATION program is operated in every state to assist disabled people to achieve a gainful occupation. It provides personal counseling and guidance, medical examinations and needed restorative services, training and other services to people who have physical or mental disabilities which are handicaps to employment. Services to eligible disabled persons are provided by state agencies for vocational rehabilitation. For further information contact your nearest local office of the state vocational rehabilitation agency under state listings in the telephone book; write directly to the headquarters office, usually located in State Capitols.
SCHOLARSHIPS LISTED BY HEALTH PROFESSION

AUDIOLGY AND SPEECH PATHOLOGY

The publications "Opportunities for Graduate Education in Speech Pathology" and "Guide to Graduate Training in Speech Pathology and Audiology" give specific financial information. Write to: American Speech and Hearing Association, 9030 Old Georgetown Road, Washington, D.C. 20014.

CHIROPRACTOR

THE AMERICAN CHIROPRACTIC ASSOCIATION offers scholarships and loan sources for students wishing to select chiropractic as a career. Further information may be secured by writing to the American Chiropractic Association, 2200 Grand Avenue, P.O. Box 1535, Des Moines, Iowa 50312, or from the admissions offices of the various chiropractic colleges: Lincoln Chiropractic, 920 East Broadway, Glendale, California 91205; National College of Chiropractic, 200 East Roosevelt, Lombard, Illinois; Northwestern College of Chiropractic, 2222 Park Avenue, Minneapolis, Minnesota; Texas Chiropractic College, 5912 Spencer Highway, Pasadena, Texas 77505; Logan College of Chiropractic, 7701 Florissant Road, St. Louis, Missouri; Columbia Institute of Chiropractic, 261 West 71st Street, New York, New York 10023.

DENTIST

Each of the nation's 50 dental schools offers scholarships to its students. Eligibility requests for a summary of scholarships are available and application forms can be secured by writing the school selected by the student. Loans for dental students are also available from each school through the American Fund for Dental Education, United Students Assistance Fund, Health Professions Educational Assistance Act and the National Defense Education Act. Information on loans available may also be obtained by writing the American Association of Dental Schools, 211 East Chicago Avenue, Chicago, Illinois 60611.

AFDE DENTAL SCHOLARSHIPS - The American Fund for Dental Education was created in 1955 by the dental profession and the dental industry to finance dental education research and provide student aid. AFDE Dental Scholarships for black students have been made possible by a grant from the W. K. Kellogg Foundation and support from other foundations, business and industry, and dental societies. An AFDE Scholarship provided you with up to $12,500 for 5 years of schooling. You receive as much as $2,500 for the final year of predental education in college and for each of the four years of dental school. Scholarships are for use towards your school expenses and living costs. Any black student preparing to enter his or her senior, junior or sophomore year...
in college is eligible for an AFDE Dental Scholarship. Students entering dental school, or already in dental school, are not eligible. You will be considered on the basis of your academic background, your financial need and your character. Grades are important, but any student with an interest in dentistry is urged to apply. Deadline for applying is July 1 for study beginning in September. Selections are announced in August. American Fund for Dental Education, 211 East Chicago Avenue, Chicago, Illinois 60611.

OTHER FINANCIAL AID INFORMATION ON DENTISTRY:

ADMISSION REQUIREMENTS OF AMERICAN DENTAL SCHOOLS is an annual publication of the American Association of Dental Schools. The booklet lists the specific requirements for admission to each dental school in the United States and Canada, and includes detailed information on financial aid available from each of these schools. The booklet is issued each September and presents the requirements for admission to the following year's freshman class. It is available at $2.00 per copy from: The American Association of Dental Schools, 211 East Chicago Avenue, Chicago, Illinois 60611.

DENTAL HYGIENIST

THE AMERICAN DENTAL HYGIENISTS' ASSOCIATION'S EDUCATIONAL TRUST FUND - The American Dental Hygienists' Association awards annually eight scholarships for dental hygiene students in the United States. The recipients are selected from applicants throughout the country and must have been enrolled for at least one year in academic dental hygiene education. Contact the American Dental Hygienists' Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

DENTAL TECHNICIAN

22 DENTAL LABORATORY TECHNOLOGY SCHOLARSHIPS OFFERED BY AMERICAN FUND FOR DENTAL EDUCATION—Applicants must have a high school diploma. Scholarships may be awarded for the first or second year of dental laboratory technology school. For a listing of approved programs and scholarship information, write the AFD, 211 East Chicago Avenue, Chicago, Illinois 60611. Deadline for filing is July 1st. Awards will be announced in August for training programs beginning in September.

FOOD TECHNOLOGIST

INSTITUTE OF FOOD TECHNOLOGISTS administers fellowships and scholarships to students pursuing a program leading to a degree in the general field of Food Technology or Food Science. During the tenure of a fellowship or scholarship, winners must be enrolled in a recognized U.S. or Canadian educational institution. Freshmen (deadline date February 15) Sophomore (deadline date April 1) scholarships, thirty $500 awards. Junior and Senior Scholarships each $1,000. Graduate Fellowships, three
at $4,000 and eight at $1,000 (deadline date March 1). Applications available from School Department Heads or Institute of Food Technologists, 221 North LaSalle Street, Chicago, Illinois 60601.

THE NATIONAL RESTAURANT FOUNDATION-HEINZ SCHOLARSHIP AWARDS PROGRAM provides five college-level awards of $1,500 each ($500 per year over a three-year period, starting with the sophomore year in college). Matching payment up to a maximum of $500, each year, for satisfactory summer employment in the food service industry. Total award up to a maximum of $3,000. Scholarship winners chosen from among students undertaking, or planning to undertake, an educational program leading to a management career in the food service industry.

Eligibility: A student completing his first year of education in a four-year educational institution, or a student completing his first year of education at a junior/community college, but wants to continue his studies for the next three years in food service education at a four-year educational institution: or a student completing his second year in food service education at a junior/community college, but who wants to continue his studies to complete a Baccalaureate Degree program in food service education at a four-year educational institution.

Three junior/community college awards of $500 each, annually, over a two-year period, plus matching payment up to a maximum of $500 for satisfactory employment in the food service industry during the summer between his first and second years. Maximum awards $1,500. Student must be a high school graduate enrolled, or planning to enroll, in a program leading to an Associate Degree in Food Service Management. Applications may be secured from National Restaurant Foundation, 1530 North Lake Shore Drive, Chicago, Illinois 60610. Deadline date for filing applications is March 31.

HOSPITAL ADMINISTRATOR

THE AMERICAN COLLEGE OF HOSPITAL ADMINISTRATORS, 840 North Lake Shore Drive, Chicago, Illinois 60611, through its educational fund, has established a limited number of scholarship loans to assist worthy students to continue their professional education and training towards careers in hospital administration. These loans are available to students at two stages of their training: academic and residency. Committee by (1) students who have completed successfully one academic semester in an accredited graduate program in hospital administration, and, (2) students who are in their residency phase of graduate training in hospital administration.

MEDICAL RECORD LIBRARIAN

GRACE WHITING MYERS-MALCOLM T. MacEACHERN STUDENT LOAN FUND - ELIGIBILITY FOR LOAN: Persons are eligible to apply for a loan if they...
have been accepted for enrollment into a school approved by the Council on Medical Education of the American Medical Association for the education of Medical Record Librarians or Medical Record Technicians. Students enrolled in a four-year course leading to a degree in Medical Record Science may apply for a loan at the completion of their third year of schooling. Registered Record Librarians who wish to study for baccalaureate or advanced degrees and have been accepted by regionally accredited colleges or universities as candidates for a degree may apply for a loan. A student to whom a loan is granted is required to carry a full course load for residence. The applicant need not be a citizen of the United States or territories.

TERMS OF LOAN: Registered Record Librarian applicants accepted for study for baccalaureate or advanced degrees may borrow up to $2,400 per year per student. Applicants approved to enter a school for Medical Record Librarians may borrow up to $1,500. Applicants approved to enter a school for Medical Record Technicians may borrow up to $500. No interest will be charged for the time the student is attending school nor for one year thereafter, 3% interest on second year following graduation, 4% on third year. The interest is charged only on unpaid balance. Loan may be pre-paid before it is due, without penalty. Entire loan is to be paid back within four years following the date the Promissory Note is signed. Persons granted a loan shall sign a Promissory Note with two endorsers. The endorsers of Promissory Notes shall be citizens of the United States and territories. Money for the loan shall be paid directly to the applicant. The number of loans granted to students enrolled in schools for Medical Record Technicians shall be limited to no more than two per year.

PROCEDURE FOR APPLICATION: Application forms may be secured from the Foundation of Record Education, American Association of Medical Record Librarians, 211 East Chicago Avenue, Chicago, Illinois 60611. Completed forms are to be returned to that office.

MEDICAL TECHNOLOGIST

Information on scholarships and loans is available by writing to the American Society of Medical Technologists, Education and Research Fund, Hermann Professional Building, Houston, Texas 77025.

Many AMERICAN MEDICAL ASSOCIATION-APPROVED SCHOOLS OF MEDICAL TECHNOLOGY and SCHOOLS OF CYTOTECHNOLOGY waive tuition and pay stipends to students. Three years of college with science courses are prerequisite to the year of hospital training which leads to certification as a Registered Medical Technologist, and two years of college for the six months' training and six months' apprenticeship necessary for certification as a Cytotechnologist. Tuition is also free at most certified LABORATORY ASSISTANT SCHOOLS. High school graduates are eligible for this one-year course which leads to certification under medical
auspices as a Certified Laboratory Assistant. Other scholarships for
medical technology and cytotechnology students are also offered by
some state pathology and medical technology societies, Cancer Societies
and other organizations. A fact sheet on laboratory careers and a
listing of medical technology and cytotechnology scholarships, as well
as lists of the AMA-approved medical technology and cytotechnology
schools, may be obtained by writing the Registry of Medical Technolo-
gists, 710 South Wolcott Avenue, Chicago, Illinois 60612. A list of
the approved laboratory assistant schools may be obtained by writing:
Board of Certified Laboratory Assistants, 710 South Wolcott Avenue,
Chicago, Illinois 60612.

NURSE

ARMY STUDENT AND REGISTERED NURSE PROGRAMS enable selected nursing
students to continue their education while they receive full pay and
allowances as officer or enlisted personnel in the Army Reserve. The
Student Nurse Program is available during the third year of a three-year
nursing program or for the third and fourth years of a four-year program
in nursing. The Registered Nurse Program provides an opportunity to
continue nursing education for a period not to exceed two calendar years.
Detailed information may be secured from Army Careers, U.S. Army Recruit-
ing Command, Hampton, Virginia 23369.

THE EIGHT AND FORTY TUBERCULOSIS NURSING SCHOLARSHIPS FUND was
established to assist nurses to secure advanced preparation for posi-
tions in either supervision, administration or teaching. The students
are to have prospects of being employed in specific positions in hos-
pitals, clinics, or health departments on completion of their education,
and the position must have a full-time and direct relationship to tuber-
culos is control. Scholarship awards are $1,500 each. Full details rel-
ative to eligibility requirements may be secured from the local Eight
and Forty Scholarship Chairman or The American Legion Education and
Scholarship Program, Attention: Eight and Forty Scholarships, Box 1055,
Indianapolis, Indiana 46206. Deadline, June 1. Awards announced on
July 15.

NAVY NURSE CORPS CANDIDATE PROGRAM open to qualified junior and
senior nursing students and registered nurses who are enrolled in bac-
calaureate or master's degree nursing programs accredited by the Na-
tional League for Nursing. Tuition, salary and other allowances and
benefits are provided by the Navy during the time of enrollment with
the program. Persons given one year or less of subsidized training
incur a two-year active duty obligation; those with over one year of
subsidized training incur a three-year active duty obligation. For more
complete information contact the nearest U.S. Navy Recruiting Station.

NURSES' EDUCATIONAL FUNDS - An organization which grants scholar-
ships and fellowships to graduate nurses to equip them for advancement
in nursing. Men and women qualifying for these awards study in nursing
programs accredited by the National League for Nursing in colleges and
universities of their choice. Funds are contributed by nurses, business and industrial firms, organizations, and individuals. The executive committee determines the amount and number of awards each year on the basis of availability of funds and the nature of applications. Deadline for applications is February 1 preceding the fall for which award is made. Write for application forms or additional information to Nurses Educational Funds, 10 Columbus Circle, New York, N.Y. 10019.

NURSING RESEARCH - Predoctoral and postdoctoral fellowships for professional nurses are offered for graduate study in a university. Postdoctoral fellowships may be used also for training in a research center. Stipends are set according to individual needs. Applications are submitted to the Public Health Service at scheduled intervals (January 2, April 1 and October 1): awards are made within 3-4 months. A fellowship may be activated any time within 10 months after it is awarded. Write to the Research Grants Branch, Division of Nursing, Bureau of Health Professions Education and Manpower Training, National Institute of Health, Bethesda, Maryland 20014, for additional information about the research fellowship.

NURSE SCIENTIST GRADUATE TRAINEESHIP GRANTS PROGRAM - The traineeships are to enable graduate nurses who have baccalaureate or higher degrees to study full-time toward doctoral degrees in the biological, physical, or behavioral sciences to prepare them to function as nurse scientists. For further details write to the Research Grants Branch, Division of Nursing, Bureau of Health Professions Education and Manpower Training, National Institute of Health, Bethesda, Maryland 20014.

THE NURSING SCHOLARSHIP PROGRAM - Under this program Federally supported scholarship awards are available at participating schools of nursing which offer a program of nursing education leading to a diploma in nursing, associate degree in nursing, baccalaureate degree or equivalent degree in nursing, or graduate degree in nursing for students of exceptional financial need who need such financial assistance to pursue a full-time course of study. The amount of an individual scholarship depends upon the student's need as determined by the school; however, no scholarship may exceed $1,500 per year. Further information and application forms may be obtained from the participating school selected by the student. General information and lists of participating schools are available from the Bureau of Health Professions Education and Manpower Training, National Institute of Health, 9000 Rockville Pike, Bethesda, Maryland 20014.

PROFESSIONAL NURSE TRAINEESHIP PROGRAM - The traineeships are to enable graduate nurses to prepare for positions in administration, supervision, teaching and in clinical specialties. Traineeships are awarded for full-time academic study by the training institutions and provide tuition and fees as established by the school. Monthly stipends are also provided at the rate of $200 at the baccalaureate level, $200-300 at the postbaccalaureate level depending on the student's level of study, the years of
training, and the student’s previous work experience as a professional nurse. A dependency allowance of $42 per month for each dependent is also allowed. Candidates are selected by the training institution. Information and lists of institutions offering traineeships are available from the Nurse Education and Training Branch Division of Nursing, Bureau of Health Professions Education and Manpower Training, National Institutes of Health, Bethesda, Maryland 20014.

PSYCHIATRIC-MENTAL HEALTH TRAINEESHIP PROGRAM - Traineeships are available for undergraduate, and graduate studies for nurses who intend to pursue a career in mental health. Support at the junior and senior levels of undergraduate education is for students who plan to continue study in psychiatric-mental health nursing at the master's level upon completion of the baccalaureate program. Support at the master's level is for study in psychiatric-mental health nursing, including community mental health nursing. Support at the post-master's, predoctoral and postdoctoral level is for nurses with a master's in psychiatric-mental health nursing for advanced study in psychiatric-mental health nursing and mental health related areas. Support for short-term and continuing education and training in special areas such as community mental health nursing, geopsychiatry and family therapy is also available. For details write to: Psychiatric Nursing Training Branch, Division of Manpower and Training Programs, National Institute of Mental Health, 5454 Wisconsin Avenue, Chevy Chase, Maryland 20015.

WALTER REED ARMY INSTITUTE OF NURSING PROGRAM enables selected high school graduates to obtain a bachelor's degree in nursing with most expenses paid by the Army. Participants are enlisted in the Army Reserve, and commissioned in the Army Nurse Corps Reserve following graduation and licensure. Detailed information is available at Army Recruiting Stations or by writing to Army Careers, U.S. Army Recruiting Command, Hampton, Virginia 23369.

OPTOMETRIST

AMERICAN OPTOMETRIC ASSOCIATION and its affiliated State Associations offer numerous scholarships at the professional level. Pamphlets on career opportunities and information about scholarships for study of Optometry are available by writing to the American Optometric Association, 7000 Chippewa Street, St. Louis, Missouri 63119.

OSTEOPATH

THE AMERICAN OSTEOPATHIC ASSOCIATION and the Auxiliary to the American Osteopathic Association annually award twenty National Osteopathic College Scholarships of $1,500 each. These awards are based on academic grades for at least 3 years of undergraduate college, need, motivation to become an osteopathic physician, personality and evidences of leadership. Application forms may be secured from the Scholarship Committee Chairman, 212 East Ohio Street, Chicago, Illinois 60611. Completed applications must be received by the Scholarship Chairman by May 1. Individual schools of osteopathy and some state associations also have information on numerous scholarship and loan funds.

PHARMACIST

NATIONAL SCHOLARSHIPS - American Foundation for Pharmaceutical Education provides a number of $200 undergraduate scholarship grants to superior students in need of financial assistance. These are limited to students in the last three years of the college program. Applications must be made to Dean of pharmacy college.
NATIONAL LOANS - The Federal Government, through the National Defense Education Act of 1958, allows a student to borrow up to $1,000 per year through the participating college. The Women's Auxiliary of the American Pharmaceutical Association provides a loan fund for women students in the last two years of professional study, available through the college of pharmacy. The Dargavel Foundation provides a loan fund for students of pharmacy. Applications must be approved by the Dean of the pharmacy school.

STATE SCHOLARSHIPS AND LOANS - Consult high school counselor, college advisor, or write State Department of Education to determine what financial assistance may be available. A number of State Pharmacy Foundations have been organized to provide scholarships. For further information, write the college of pharmacy of your choice.

OTHER SOURCES - Consult high school counselor about civic, service and fraternal organizations; religious, racial or nationality organizations; local firms and associations. Service clubs which give scholarships in certain areas include Elks Lodge, Knights of Columbus, Knights Templar, Zonta and Bethel Lodge.

NATIONAL MEDICAL FELLOWSHIPS, INC., provides scholarships to Negro students who are citizens of the U.S. admitted to or attending medical school. Application and information may be secured by writing to 3935 Elm Street, Downers Grove, Illinois 60515. Applications must be filed by March 1.

NEW YORK LIFE INSURANCE COMPANY MEDICAL STUDENTS SCHOLARSHIP PROGRAM offers four-year scholarships to assist young men and women with ability who would otherwise have serious financial problems attending a medical school. The amount provided is intended to cover tuition, room, board, fees, books and equipment as budgeted by the Dean of the school before each academic year. Selection of students is solely the responsibility of the medical schools; however, students must be citizens of the United States or Canada and cannot be relatives of employees of the New York Life Insurance Company. Inquiries about applications should be directed to the Dean of Medicine at the following medical schools: University of Alberta, University of Arkansas, University of California, Indiana University, University of Kentucky, Laval University Faculty of Medicine, University of Nebraska, State University of New York, Downstate Medical Center, University of Utah, University of Vermont, and West Virginia University.

PODIATRIST

APA SCHOLARSHIPS - Three $2,000 four-year scholarships are awarded annually (renewable up to $8,000). Applicants must possess a bachelor's degree, plus meeting other requirements.

FEDERAL GOVERNMENT - Up to ten per cent of the entering classes of each podiatry college may be awarded Federal scholarships in amounts up to $2,500 per year (renewable annually). Eligibility is based on academic excellence and demonstrated proof of financial need. The awards are administered by the individual college.

STATE ORGANIZATION SCHOLARSHIPS - Scholarships available to podiatry students include the Dr. William Lowe Scholarship ($100 awarded annually to a third-year student) by the California Podiatry Association to a student at the California Podiatry College. The Ohio Podiatry Association Scholarship ($300 renewable) is awarded annually to an Ohio resident at the Ohio College of Podiatry, preferably a beginning student who is in need of financial aid. Two Pennsylvania Podiatry Assistant Scholarships (Western Division) of $300 each are awarded annually to a junior and senior who are Pennsylvania residents attending the Ohio College of Podiatry. These awards are usually made to students who have shown need for financial help.
SCHOLARSHIP AWARDS BY PODIATRY COLLEGES - Partial scholarships (approximately $400 a year) are made available by the M. J. Lewi College of Podiatry Board of Trustees to students demonstrating need for financial assistance. Several of the other schools have similar programs. The Zacharie Scholarship in Podiatry - one full tuition, four-year award, is made each year to an entering student at the California Podiatry College. The California Podiatry College annually offers a scholarship for postgraduate study to a senior who demonstrates proficiency in clinical work. The Earl G. Kaplan Scholarship award ($200) is offered each year to a junior at the Ohio College of Podiatry toward tuition and fees for the senior year. Edward Bean Memorial Scholarship awards ($200) are made annually to members and former members of the Northwest Junior Athletic Association of Detroit.

THE AMERICAN PODIATRY ASSOCIATION offers three $2,000 scholarships annually (renewable up to $8,000) to first-year podiatry students of academic excellence who possesses a bachelor's degree as well as meet other requirements. The Association also offers $4,000 fellowships annually (renewable up to $8,000 over a minimum two-year period) for studies leading to an advanced degree in a field related to podiatry. Areas of specialization include the basic and clinical sciences, education, educational administration and public health.

Additional scholarships and student aid are available at the colleges of podiatry, while several state societies also support similar programs. Federal scholarships and student loans are available at the colleges of podiatry.

For additional information write the APA Committee on Scholarships and Fellowships, 20 Chevy Chase Circle, N.W., Washington, D.C. 20015.

OTHER SCHOLARSHIPS - New York State Scholarship Incentive Awards are given each year, varying in amounts from $200-800, for students attending the M. J. Lewi College of Podiatry. Awards are made available by the New York State Department of Education.

FELLOWSHIPS

AMERICAN PODIATRY ASSOCIATION - Each year the American Podiatry Association grants four $4,000 fellowships (renewable up to $8,000 over a minimum two-year period) for work leading to an advanced degree in a field related to podiatry. Areas of specialization include the basic and clinical sciences, public health, education and educational administration. In addition, a minimum of four hours per week is required at a college of podiatry.

STATE ORGANIZATION FELLOWSHIPS - Annually, the Ohio Podiatry Association offers a fellowship ($1,800) to support a graduate of a
college of podiatry holding a bachelor's degree and pursuing advanced work.

OTHER FELLOWSHIPS - Three fellowship awards of $1,000 each are made every year by the Mead Johnson Pharmaceutical Company for graduate programs, including internship training. For additional information and applications, write: Committee on Scholarships and Fellowships, American Podiatry Association, 3301 16th Street, N.W., Washington, D.C. 20010.

PUBLIC HEALTH

THE AMERICAN ASSOCIATION FOR HEALTH, PHYSICAL EDUCATION AND RECREATION, a Department of the National Education Association, 1201 Sixteenth Street, N.W., Washington, D.C. 20036, cooperates with interested organizations and corporations in sponsoring a program of scholarship assistance to high school seniors of unusual promise who desire to enter professional preparation of teaching and leadership in physical fitness and related areas of physical education. Grants vary from $1,000 and $2,000. Secure application forms prior to October 15 from the source indicated above.

PUBLIC HEALTH EDUCATOR schools of public health have information about scholarships and financial aid available for both undergraduate and graduate study. Also available are traineeships from both state and Federal health departments for graduate work leading to a master's degree in an accredited school of public health. For further information write or personally contact a public health educator in your local or State Health Department.

THE U.S. PUBLIC HEALTH SERVICE offers the following opportunities for training in health careers: Public Health Traineeships. Graduate or specialized training in public health for persons who have completed their basic professional education, and who plan to enter the field of public health. The traineeships provide stipend, tuition, fees, and certain transportation costs. Persons with training of this kind are needed throughout the range of activities found in modern public health practice. Application forms are available from the Health Manpower Grants Branch, Division of Health Manpower Educational Services, 9000 Rockville Pike, Bethesda, Maryland 20014.

SCIENCE

SCIENCE TALENT SEARCH, conducted by Science Clubs of America, sponsored by Westinghouse Educational Foundation each year, offers scholarships for boys and girls in their last year of high school. Awards are based on a science aptitude examination, high school record, recommendations of high school teachers, a thousand-word report on the science research project by the student and interviews of forty finalists by judges at the Science Talent Institute in
Washington, D.C. Awards include ten scholarships of one $10,000, two $8,000, three $6,000, and four $4,000. The remaining thirty each receive Westinghouse Science awards of $250. State Science Talent Searches are conducted currently with the National Competition in 43 states and the District of Columbia. Detailed information is available from Science Clubs of America, 1719 N. Street, N.W., Washington, D.C. 20036. Entry deadline date December.

SOCIAL WORK

THE CHILDREN'S BUREAU, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE makes available traineeships for graduate training at the master's degree level, and at the doctoral level for personnel for work in the field of child welfare. Traineeships provide basic allowances, tuition and fees. Information concerning traineeships may be obtained by writing to the Division of Family and Child Welfare Services, Children's Bureau, Social and Rehabilitation Service, U.S. Department of Health, Education, and Welfare, 330 Independence Avenue, S.W., Washington, D.C. 20201.

KAPPA KAPPA GAMMA FRATERNITY annually offers scholarships to young women to assist them in preparation for work with the mentally retarded, the physically handicapped, the socially deprived, the emotionally disturbed, and the aged. Applicants must be citizens of the U.S. or Canada and have completed two years of undergraduate work on a campus where a chapter of this fraternity is located. Women studying in the fields of physical therapy, occupational therapy, speech and hearing, mental health, and social work are eligible. Undergraduate awards are for $300 to $350. Graduate awards are for $500 to $1,000. Details and application forms may be obtained from Kappa Kappa Gamma Fraternity Headquarters, 530 East Town Street, Columbus, Ohio 43125.

THE SCHOOL OF SOCIAL SERVICE ADMINISTRATION, THE UNIVERSITY OF CHICAGO, offers graduate fellowships and scholarships ranging from $1,125 to $5,650. The school offers a two-year program leading to the A.M. Degree in preparation for practice in social casework, social group work, or community organization; and a program leading to the Ph.D. Degree in preparation for research or teaching. Application for admission and scholarship may be obtained by writing the Dean of Students, School of Social Service Administration, The University of Chicago, Chicago, Illinois 60637.

LOANS

THE NATIONAL DEFENSE STUDENT LOAN PROGRAM - If you are a college student, or a prospective college student, and in need of financial assistance to continue, or commence your college education, you may borrow for college expenses in one year a sum not exceeding $1,000.
or during your college course a sum not to exceed $5,000. A graduate or professional student may borrow up to $2,500 in one year, but the total loans during undergraduate and graduate study may not exceed $10,000. Repayment of the loan begins nine months after a borrower ceases to carry at least one-half the normal academic work load and is to be complete within ten years. Interest of 3% will begin at the time the repayment period begins. The Act contains a further provision that up to 50% of a loan (plus interest) may be cancelled in the event the borrower becomes a full-time teacher in a nonprofit elementary or secondary school, or in an institution of higher education. Should a borrower elect to teach in a designated school located in a poverty area or to teach handicapped youths in an elementary or secondary school system, his entire obligation may be cancelled at the rate of 15% a year. Interested students should consult their guidance counselor or the student financial aid officer of the college or university in which they are or expect to be enrolled.

THE NATIONAL DEFENSE EDUCATION ACT, under Title IV authorized the granting of 2,905 graduate fellowships for academic year 1969-70. The fellowships are designed to increase the supply of college teachers and to expand the facilities for graduate education in all fields. They carry stipends of $2,400 for the first year, $2,600 the second and $2,800 the third, with $500 a year for each dependent. Students should apply directly to the graduate schools having programs in which these fellowships are available. A booklet listing these schools and programs may be obtained from the Graduate Academic Programs Branch, Division of Graduate Programs, U.S. Office of Education, Washington, D.C. 20202.

PICKETT AND HATCHER EDUCATIONAL FUND makes loans to financially needy students enrolled in colleges and universities offering broad liberal education with preference being given to undergraduate students. Loans are not available for strictly professional education, such as law, medicine, or the ministry, except the profession of teaching is included. The loans may include amounts required for fees, tuition, room and board up to an annual amount of $1,000 with the total borrowed not to exceed $4,000. The loans will bear interest of 2% per annum while in school and 4% after student leaves school. Repayment is to start six months after the student leaves school and to include an amount which is not less than 10% of the income. For more information and application forms, write Pickett and Hatcher Educational Fund, P.O. Box 2128, Columbus, Georgia 31902.

THE HEALTH PROFESSIONS SCHOLARSHIP PROGRAM - Under this program Federally supported scholarship awards are available at participating schools of medicine, dentistry, osteopathy, optometry, pharmacy, podiatry, and veterinary medicine for students of exceptional financial need to pursue a full-time course of study. The amount of an individual scholarship depends upon the student's need as determined by
the school; however, no scholarship may exceed $2,500 per year. Further information and scholarship application forms may be obtained from the participating school selected by the student. General information and lists of participating schools are available from the Bureau of Health Professions Education and Manpower Training, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014.

**THE NURSING STUDENT LOAN PROGRAM** - Under this program, Federally supported loans are available at schools of professional nursing for students who need assistance to pursue a full-time course of study at the school. The amount of an individual loan will depend upon the student's need as determined by the school; however, no loan may exceed $1,500 per academic year. The aggregate amount a student may receive for all years is $6,000. The total loan is repayable over a 10-year period beginning nine months after the student ceases to pursue a full-time course of study at a nursing school. During the repayment period, interest accrues on the total loan at the rate of 3%. Repayment on a loan may be deferred during periods of active military duty and service in the Peace Corps (up to 3 years each) and during periods of advanced professional training in nursing (up to 5 years). Up to 50% of the total amount of a loan, plus interest, may be cancelled when the borrower is employed full time as a professional nurse in the fields of nurse training and service in any public or nonprofit private institution or agency at the rate of 10% per year for each complete year of such employment. Up to 100% of the total amount of a loan, plus interest, may be cancelled when the borrower is employed full time as a professional nurse in a public or nonprofit hospital located in an area which has a substantial shortage of nurses at such hospitals at the rate of 15% per year for each complete year of such employment.

**THE AMERICAN MEDICAL ASSOCIATION EDUCATION AND RESEARCH FOUNDATION** has established a Medical Education Loan Guarantee Program to help eliminate the financial barrier to medicine for all students who are qualified and accepted by an approved training institution. The loan program which is extended to medical students, interns and residents is the result of a cooperative effort by American medicine and private enterprise. Annual loans up to $1,500 are made with a maximum up to $10,000 over a seven-year period. Detailed information may be secured from the source listed above, located at 535 North Dearborn, Chicago, Illinois 60610.

**COMMERCIAL LENDING SOURCES OF FUNDS** - Over 9,000 banks in 50 states participate with approximately 900 colleges in a loan program known as United Student Aid Funds, Inc. The loans are available to all students at participating colleges in amounts up to $1,000 a year, up to a maximum of $5,000 for undergraduates; and $1,500 a year, up to a maximum of $7,500 for graduate students. Notes under this program draw 7% simple interest. In this case of many loans, much of the interest will be paid by the Federal Government. Repayments start the first of the
tenth month after finishing graduate or undergraduate education. Monthly installments usually are not less than $30 or more than $100. For further information, contact United Student Aid Funds, Inc., 5259 North Tacoma Avenue, Indianapolis, Indiana 46220, or your college Financial Aid Officer. Other well recognized organizations that specialize in education loans for students are: Funds for Education, Inc., 319 Lincoln Street, Manchester, New Hampshire 03103; Education Funds, Inc., 10 Dorrance Street, Providence, Rhode Island 02901.

OTHER ASSISTANCE PROGRAMS

THE AMERICAN HEART ASSOCIATION'S affiliates and chapters have varied programs for helping young people learn about health career opportunities. In the main, these are work experience, field trips and educational programs. For further information, contact the Heart Association in your community or the American Heart Association, 44 E. 23rd Street, New York, New York 10010.

FEDERAL GOVERNMENT COOPERATIVE EDUCATION PROGRAMS FOR NEARLY ALL COLLEGE MOTORS - High school graduates may be eligible for these programs. The work-study type program leads to a B.S. Degree and usually is of five years' duration. Student trainees receive a salary during periods of employment according to Civil Service standards. Some financial assistance toward tuition, books, and related fees may be paid by the sponsoring activities. Students wishing to be considered should apply to the agency in which employment is desired. Most Federal agencies employ some student trainees; however, the largest employers are the Departments of the Army, Navy, and Air Force, and the National Aeronautics and Space Administration.

COLD WAR GI BILL

Veterans' Pension and Readjustment Assistance Act of 1967

OBJECTIVE: To provide educational opportunities for a potential of over five million qualified service men and women now in civilian life or on active duty in the Armed Forces.

ELIGIBILITY: Any veteran of the Army, Navy, Marine Corps, Air Force or Coast Guard who has served and was honorably discharged; 1) Continuously on active duty for at least 181 days ending after January 31, 1955. 2) A veteran who served less than 181 days, if his active duty was ended by a service-connected disability. 3) Persons still in service, if they have had at least six months active duty.

DURATION AND BENEFITS: Benefits will be paid at the rate of 1½ months, for each month of active duty or fraction thereof, to a maximum of 36 months.
Basis for payments are as follows:

<table>

<td>$192.00</td>
<td>$10.00</td>
</tr>
</tbody>
</table>

AVAILABILITY OF TRAINING: In approved courses at a (public or private) college, vocational, business, high school, correspondence school, on the job training, institutional on the farm training, and flight training.

HIGH SCHOOL TRAINING: Benefits are available to complete high school training or refresher courses to qualify for higher education without a charge against the basic entitlement.

TIME LIMITATION: Benefits will not be paid beyond eight years from the date of the last discharge or release from active duty if the discharge was on or after June 1, 1966.

APPLICATION: Write or visit the Veterans Administration office nearest your place of residence.

WAR ORPHANS ACT (JUNIOR GI BILL)

OBJECTIVE: To provide Educational opportunities for approximately 185,000 children of veterans who died or were permanently and totally disabled in or as the result of service in the Armed Forces of the United States.

ELIGIBILITY: 1) Students whose parents died or are permanently and totally disabled from disease or injury incurred or aggravated in the Armed Forces during the Spanish-American War, World War I, World War II, the Korean War, or the Vietnam Conflict. 2) Benefits are also extended to children of veterans who died or are permanently and totally
disabled while in the Armed Forces during the following periods:
(A) Beginning September 16, 1940 and ending December 6, 1941;
(B) Beginning January 1, 1947 and ending June 26, 1950; and
(C) While selective service is in operation from the end of the
Korean War, (January 31, 1955). 3) Assistance is available to
eligible students, during the period which begins on date of 18th
birthday or successful completion of high school, whichever occurs
first, and ends on reaching the 26th birthday.

EXCEPTIONS: The period will be extended where (1) student's individ-
ual deadline falls in the middle of a term, in which case they would
be permitted to complete the semester or term; (2) persons enter mil-
itary service before age 26; (3) when students become eligible under
the Act and are over 18 but under 26 years of age.

DURATION AND BENEFITS: A maximum of 36 months of training and educa-
tion may be obtained with payments of $175 per month paid upon com-
pletion of each month of full-time training, $128 for 3/4 time, and
$81 for 1/2 time.

AVAILABILITY OF TRAINING: In approved colleges (public and private),
vocational, business schools, and other educational institutions.
MONTANA HOSPITAL ADMINISTRATORS AND DIRECTORS OF NURSING

NOTE: The following list is provided as a guide to the student for making career inquiries at his local hospital. The Administrator or Director of Nursing will usually be cooperative in giving guidance in hospital based careers or they will refer him, for further information, to other hospital personnel in the student's interest area.
